There are no central laws, regulations, or rules for publication of notices.

(c) What details of the intended procurement are normally published? Is there a minimum set of information that is required to be published? If so, please specify.

Relating to notification of opportunities and qualification of suppliers.

The main publications used for the advertising of procurement opportunities are the major daily newspapers, specialist magazines or publications such as the •Tenders Gazette•, •New Zealand Government and Local Body Tender•, •Australian Defence News• and the Australian and New Zealand annual joint defence equipment publication •The Yellow Book•.

(d) Are there any charges for obtaining the full set of tender documents? If so, please specify and describe how these charges are set?

Charges, where applied, for obtaining the full set of tender documents are set by the individual organisations themselves. The Government's purchasing guidelines state that the price charged or deposit required, if any, for tender or related documents should not be so high as to discourage *bona fide* competent contractors or producers from participating in the tendering proceedings.

(e) Are electronic means used to advertise procurement opportunities? What is the nature of systems that are in place? Are different tendering provisions applied to contracts advertised in this manner? If so, please describe.

We are not aware of any use by New Zealand government agencies of electronic media to publicise their procurement requirements although it is open to them to do so, as a matter of commercial decision. At present, however, some New Zealand calls for tender are appearing on the Internet via the Australian Commonwealth's pilot Government Electronic Marketplace Service (GEMS). These are fed into GEMS by the New Zealand Industrial Supplies Office from information which is provided voluntarily by the purchasing agencies. (New Zealand has no comprehensive centralised system for the collection and dissemination of government procurement opportunities).

Requirements laid down for possible suppliers

6.(a) Are there registration, residence or other requirements for potential suppliers?

(b) What is the nature of any conditions for participation required from suppliers - such as financial guarantees, commercial standing and technical qualifications? Do the conditions of participation vary according to the nature of the tender process and/or the value of the intended procurement?

There are no government requirements on (a) and (b) above laid down for possible suppliers. Individual agencies determine such relevant requirements for themselves. In practice, multi-stage procurement procedures are often adopted for large and complex procurement projects including e.g. requests for proposals or calls for registration of procurement interest (as a basis for prequalification of potential suppliers).

(c) Do there exist lists of approved suppliers? If so, what are the procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists? Are lists of approved suppliers, if any, regularly reviewed/updated?

Treasury's booklet •A Guide to the Management of Departmental Purchasing• advises as follows:

Organisations which purchase items specifically designed and manufactured to meet their requirements should consider developing a list of •approved suppliers•. This process involves potential suppliers being evaluated under appropriate criteria; for example, their financial stability, their ability to produce required items to appropriate quality standards at competitive prices, and whether they can meet required delivery schedules.

Building up an •approved supplier• network can be expensive, but there can be long-term benefits in consolidating effective relationships with reliable suppliers.

However, so that the requirements of fairness and equitability are met, organisations should be careful to avoid exclusivity, and ensure that lists are continually reviewed, and as they become known, other potential approved suppliers are evaluated.

Criteria for assessing bids and awarding contracts

7.(a) What criteria are taken into account in the award of tenders? Are criteria for award of contracts made available in advance to potential suppliers?

New Zealand's Government procurement policy is based on the ordinary commercial principle of best value for money through open and effective competition. This includes full and fair opportunity for domestic (New Zealand and Australian) suppliers to compete on a no-preference basis. The value for money criterion is taken to include considerations such as quality, price, delivery and service support, using life-cycle or similar costing techniques where appropriate.

Criteria for assessing bids and awarding contracts, used by the Ministry of Commerce, are attached as Appendix B as an example of individual departmental practice only.

(b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?

There is no mandatory requirement for offsets or counter-purchases in government procurement. An informal voluntary offsets policy is effectively inoperative outside defence purchasing.

(c) Is preference given to any particular enterprises or group of enterprises? If so, please specify.

Under the Government's purchasing policy there is no policy of giving preference to any particular enterprises or group of enterprises.

(d) Do the procurement criteria differ according to sector or region of the economy?

The Government's purchasing policy is neutral as between sectors or regions of the economy.

***(e) What is the margin of choice or discretion allowed to the purchasing authority?
What does the extent, if any, of discretion allowed depend upon?***

For departments, there are financial delegations by Cabinet to Ministers and Chief Executives (see below).

	Chief Executives	Responsible Ministers	Cabinet or Cabinet Committees
A.CURRENT EXPENDITURE			
Publicity expenditure	100,000	Nil	N/A
Special Payments			
(i) Compensation or damages in settlement, or claims which are endorsed by the Crown Law Office or judgements of the Court (claims under \$50,000 need not be referred to the Crown Law Office if a departmental solicitor certifies that such claims are in order)	100,000	500,000	N/L
Ex Gratia payments	20,000	50,000	N/L
B.CAPITAL EXPENDITURE			
Capital purchases or projects (Total cost of project)	5,000,000	10,000,000	N/L

Disclosure of bids received and contracts awarded

8.(a) How are tenders received, registered and opened?

The individual purchasing agency determines its own procedures for receiving, opening and registering tenders and in accordance with best practice.

Treasury's booklet •A Guide to the Management of Departmental Purchasing• advises: •Tenders should be time and date stamped when opened and those responsible for opening them should initial the date stamp. The tenders should be numbered and entered on to a register which should also be initialled, so that a subsequent tender cannot be added without explanation. Such internal control procedures ensure that the organisation is able to

demonstrate that it has acted in a fair and equitable manner. (For this reason, it is recommended that two people should be involved in opening and registering tender documents.)

(b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?

Entities are not required to publish details of the contracts awarded or notify unsuccessful tenderers. Communication to unsuccessful tenderers of reasons for not being selected is encouraged under the Government's purchasing guidelines where tenderers request this.

(c) Are entities required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected?

See answer in 8(b) above.

Treatment granted to domestic and foreign services and/or suppliers

9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or accord services and/or suppliers of a Member more favourable treatment than those of another Member? Please specify how, if at all, more favourable treatment is accorded. Please also specify the working definition of 'domestic' in relation to domestic services and suppliers.

There are no preferential treatment laws, regulations or procedures in New Zealand Government purchasing. As stated in the Government's purchasing guidelines, it is not the intention of the policy to encourage discrimination against foreign suppliers. Having given domestic industry full and fair opportunity, agencies should buy from the best source available, according to their own assessment of all costs and benefits.

An Industrial Supplies Office has been established to facilitate efficient information flows about domestic (New Zealand and Australian) industry capabilities to meet government purchasing requirements.

'Domestic' in relation to domestic services and suppliers means those services which are wholly or partly produced in New Zealand and/or Australia.

Procedures for hearing and reviewing complaints/appeals

10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract? Please provide details.

Suppliers with grievances may contact a number of organisations including, in the first instance, the purchasing agency involved (and/or Minister responsible for the agency). The Ministry of Commerce (Tariff Policy 2) which has responsibility for the Government's purchasing policy may also investigate

complaints of unfair treatment or denial of opportunity. An organisation may be required to provide information about its purchasing decisions (possibly under the Official Information Act 1982) and the Ombudsman may be involved. The Controller and Auditor-General has powers to conduct an inquiry as set out in the Public Finance Act 1977. Complaints concerning bribery and corruption may be dealt with under the Crimes Act 1961.

II. MEMBERSHIP OF PLURILATERAL, REGIONAL AND/OR BILATERAL AGREEMENTS

11. Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement? If so, please describe the relevant provisions.

In furtherance of the objectives of Article 11 (Government Purchasing) of ANZCERTA, New Zealand in 1989 signed the Australian National Preference Agreement, now known as the Government Procurement Agreement (GPA). Under the GPA, the New Zealand Government undertakes to ensure that departments, statutory authorities and other bodies controlled by it treat Australian products, services and suppliers equally with New Zealand products and services and suppliers in all aspects of the government purchasing regime. Similar obligations are undertaken in respect of New Zealand products, services and suppliers by the Australian Commonwealth, State and Territory Governments. New Zealand also undertakes to continue its current policy of not applying a preference margin to any purchases.

State-Owned Enterprises (SOEs) are not included in the GPA definition of government procurement for New Zealand. However, the New Zealand Government has formally communicated to the SOEs its expectation that they will give all prospective Australian tenderers an equal opportunity along with any New Zealand tenderers to compete with third country suppliers for contracts; that they will be non-discriminatory in their purchasing; and that they will cooperate in any investigation under the GPA of complaints or alleged discrimination in the awarding of contracts.

III. ECONOMIC IMPORTANCE OF SERVICES PROCUREMENT

12.(a) Please provide statistics (if available) on the number and value of services procurements

- *on both an aggregate and sectoral basis;*
- *by origin of services and suppliers.*

(b) Please provide statistics (if available) on the

- *share of services procurement in total procurement;*
- *share of procurement of each service in total domestic output of the service;*

- ***share of procurement of each service in total domestic consumption of the service.***

Procurement statistics are generally not available. Government agencies are not required to (and generally do not) collect figures on purchasing. It is estimated, however, that the New Zealand Government through its government departments buys goods and services from the private sector to a total value of around \$3 billion a year. Other central government agencies spend significant additional amounts. The number and value of services procurements is not known.

APPENDIX A

NB: This is an extract from the Ministry of Commerce's purchasing manual and is provided as an example of individual departmental practice only.

8.6.3.2 Procurement Channels and Price Guidelines

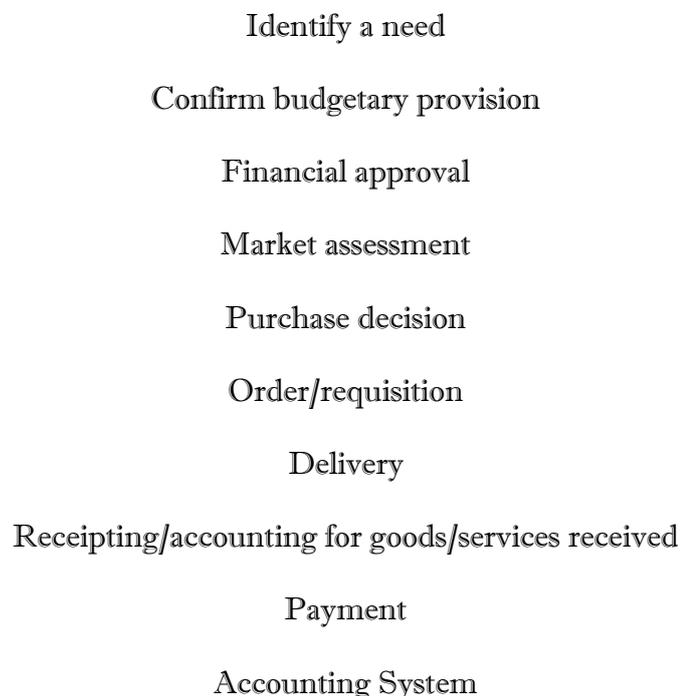

8.6.3.2.1 Why Purchase?

In deciding to buy a good or service, the Ministry must identify an unmet need, and consider the best way to meet it. Ideally, this process should take place during the annual planning and budgeting process.

If the purchase of a good or service is an option to meet an identified need, the purchase process can begin.

8.6.3.2.2 The Purchasing Process

This flowchart indicates the process of purchasing.

8.6.3.2.2.1 Defining a Need and Requisitioning

Defining a need accurately, and communicating this need to the market clearly, are essential parts of the purchasing process.

There is a tendency to oversimplify or overlook the requisition stage, but it provides a mechanism by which the purchasing officer can gain an accurate description of the goods or service required. The user may know what they need, but may not have the technical expertise to describe it correctly.

End User:•I want a hammer•

Supplier:•Certainly, sir. Claw or ball-pein? What weight? Wooden or steel shaft?
Red or blue?•

8.6.3.2.2.2.Financial Approval

All purchases are subject to budget availability, and the decision to commit expenditure must be made within an approved financial delegation limit.

8.6.3.2.2.3Market Assessment

Once the purchasing officer receives an approved requisition, a check should be made to ensure that the item is not already in stock. A market assessment should then be made, considering the following questions:

- What are the relevant price guidelines? (see below, p 13)
- Is there a competitive market for the item?
- Is the volume/value of goods required sufficient to warrant calling for quotations and tenders; and if so, should prices and other details be obtained by telephone or in writing?
- If there is no competitive market, should the sole supplier be given an immediate order, or can a lower price be negotiated?
- Is it appropriate to call for •Registrations of Interest• prior to inviting formal tenders?
- Are suitable existing contracts available?
- Is there a list of •approved suppliers• for the item, or is the establishment of an •approved suppliers• list warranted?
- Could there be scope for a bulk purchase?

8.6.3.2.3 Procurement Channels

There are many ways of making a purchase; the principal ones are set out in the following paragraphs.

8.6.3.2.3.1Period Supply Contracts

A •period contract• is a contract to supply goods over a specified period of time, which can be short (six months or less) or relatively long. When there is a steady demand for an item or a commodity group (for example stationery, hardware, timber), the best option may be to purchase by period contract.

The time-period of a contract is normally decided by factors such as:

- the cost of establishment (setting up a contract for the first time can be very time-consuming)
- the volume and time-frame of usage
- the value of the contract (it should be sufficient to encourage competition amongst suppliers)
- the risk of obsolescence (for example, model changes)
- price volatility (the contract should include clauses covering normal price rises/falls).

A period contract has many advantages. For example:

- it can be established by competitive tender, with a competitive price and agreed terms and conditions of supply;
- purchases covered by the contract can be made as and when required - with immediate or agreed time and no warehousing or stockholding costs;
- ordering is simplified - anyone can write an order, since price and terms have already been established;
- it helps the organisation to standardise where this is desirable (which can reduce training and maintenance costs).

The Ministry of Commerce has ongoing supply contracts with a number of organisations, including:

- National period supply contracts with Supplycorp;
- Local purchase contracts with SERCO;
- Ministry-specific and divisional contracts for services such as fire protection, cleaning, and postage.

Contract documents are held by the Administration Service, Corporate Services Section, Head Office, as well as the Operating Divisions and Regional Offices.

Existing contracts should not have precedence over other sources of supply; rather, they should be considered alongside other options within the principles of value-for-money, opportunities for local industry, and ethical purchasing behaviour.

8.6.3.2.3.2Competitive Purchasing

Most of the Ministry's day-to-day needs are acquired through period contract. However, there are always going to be occasions when individual purchases need to be made, or new contracts established.

In these circumstances, we want suppliers to compete with each other for the opportunity to provide the products or services we require. There are two methods of generating this competition.

Competitive Tenders

A •tender• is an offer by a supplier to deliver (•to tender•) goods and/or services. In general, tenders are called for major procurement where price is only one of the key factors in the decision to purchase.

When we invite tenders, we invite suppliers to make us a formal, structured offer, on the understanding that all offers will be compared and assessed. In detail by impartial expert staff.

An open call for tenders is the preferred method in major purchases, as it affords all potential suppliers fair and equal opportunity to compete.

Competitive Quotes

A •quote• (properly, a •quotation•) is an offer to provide goods or services at a fixed price. Quotes are less formal than tenders, but are legally binding on the supplier.

Quotes are generally requested (from three or more suppliers) for products or services where price is the main determining factor in the purchasing decision.

8.6.3.2.3 Selective Purchase

There are a few circumstances in which competitive purchasing is not practicable, and it is appropriate to make a selective purchase. A •selective purchase• is made without calling for competing quotes or tenders. An individual supplier is simply invited to provide goods and services.

Selective purchasing is the exception, not the norm. The selective purchase method should only be used in the following circumstances:

- for one-off purchases of goods or services of minor value (threshold \$5,000 plus GST) where competitive purchasing procedures would not be cost-effective, and where a period supply contract (as described in 8.6.3.2.3.1 above) is not appropriate

- when stores or services are only available from a specific source of supply (such as proprietary brands where there is no technically acceptable equivalent)
- when a supplier has unique expertise or knowledge. (Selective purchase on this basis may only be authorised by a General Manager, Chief Advisers, or specified delegates)
- where compatibility/standardisation with existing equipment (or office furniture/fittings) is required
- when acquiring spare parts or accessories for existing equipment
- for development or prototype work
- when a tender for other stores or services has recently been accepted from a supplier
- when making purchases from a public auction or from another government department, agency, or SOE.

Selective purchase may also be appropriate if a successful tenderer fails to supply. In these circumstances, it can be appropriate to approach one of the unsuccessful tenderers on a selective-purchase basis.

8.6.3.2.4 Price Guidelines for Specific Procurement Channels

All purchases are subject to budget availability, and the decision to commit expenditure must be made within approved financial delegation limits.

8.6.3.2.4.1 Purchases below \$20,000

At this level, it will generally not be cost-effective to issue a formal call for tenders. Wherever practicable, staff should seek at least three quotes. Otherwise, a selective purchase may be made within the guidelines set out in 8.6.1.3.3 above.

8.6.3.2.4.2 Purchases between \$20,000 and \$100,000

Where an open call for tenders is not practicable or cost-effective, authorised officers may call for competitive quotes (for goods or services commonly available) up to a value of \$100,000 plus GST.

Staff must seek at least three quotes. Suppliers should be asked to provide price, terms, and descriptions of the goods or services in writing.

The only exceptions will be those purchases made under existing period contracts, or in circumstances specified in the above section on Selective Purchases (8.6.1.3.3.3).

8.6.3.2.4.3 Purchases above \$100,000

In general, an open call for competitive tenders should be issued for all purchases of goods and services exceeding \$100,000 plus GST. The only exceptions will be those purchases made under existing period contracts, or purchases made in circumstances specified in the above section on Selective Purchases (8.6.3.2.3.3).

8.6.3.2.5 Choosing Suppliers

Having completed the market assessment and determined the method of purchase, the purchasing officer then decides on the supplier or suppliers. This decision must be well-documented, not only for audit purposes, but also in case there is a subsequent complaint or a request under the Official Information Act.

8.6.3.2.6 Ordering and Delivery

A Government Stores work order or an approved order form must be used when procuring goods or services. As an order form is like a blank cheque, it should be subject to the same controls and accountability as cheques. (Order forms are available from the Finance Section).

All orders should clearly state the terms of delivery. If the delivery terms and costs are the supplier's responsibility, the freight should be on a 'freight paid' basis.

APPENDIX B

NB: This is an extract from the Ministry of Commerce's purchasing manual and is provided as an example of individual departmental-Practice only.

8.6.3.4 Evaluation Tenders: Policy and Procedures

8.6-3.4.1 Policy

Where tenders meet the criteria of commercial competitiveness, technical acceptability, and conformity with the requirements set out in the tender document, the final selection will be based on value-for-money, taking into account the domestic content in the offered goods/services. and any advantage associated with sourcing from domestic production which could be looked upon favourably.

8.6.3.4.2 Practical Guidelines: Assessing Value-for-money

Value-for-money is the *key criterion* for choosing a specific product or service. It takes precedence above all other factors.

•Value• (as opposed to •cost•) is a difficult thing to assess. The components of value may be outlined as follows:

8.6.3.4.2.1 Quality

The •quality• of goods and services represents their ability to meet or, exceed the needs of the purchaser. Quality may be tangible (•How many pages-per-minute will this printer produce?•) or intangible (Ministry satisfaction that we have given New Zealand/Australian industry a fair crack of the whip).

8.6.3.4.2.2 Through-life costs

The •through-life-costs• of a product are the costs that it generates between purchase and writing-off. Classic through-life costs are consumables for photocopiers, or security guards for the Treaty of Waitangi. Maintenance costs for unreliable equipment are also •through-life• costs, as are the hours of productivity lost when a computer system crashes.

8.6.3.4.2.3 After-sales service/guarantees

In assessing these items, it's prudent to consider the stability and reputability of the supplier. All the glossy guarantees in the world are worth nothing if

the supplier goes bankrupt a week after a purchase, or if their after-sales service is conducted by clumsy, unqualified staff.

8.6.3.4.2.4 Ease of communication with the supplier

Communication factors include:

- the supplier's availability for discussions and negotiations;
- the supplier's ability to deliver the goods/services required when they are required;
- the supplier's ability to provide after-sales support promptly.

8.6.3.4.2.5 Other factors influencing value-for-money

Related factors to be considered in assessing value include:

- the relative benefits of lease versus purchase. (For more detail on this issue, refer to the Ministry of Commerce's Fixed Asset Management manual);
- versatility, life-span, upgradability, ease of repair.

8.6.3.4.3 Procedure for Evaluating Tenders

8.6.3.4.3.1 Overview

The tendering process should be transparent; that is, it should be seen to have been handled in a fair and equitable manner. If the tendering process has been followed correctly, the Ministry should be able to disclose the evaluation report which led to a specific purchase.

8.6.3.4.3.2 Evaluation

The invitation to tender must include the criteria by which the response will be evaluated. This is particularly important for complex tenders (such as those related to computer systems). The criteria for evaluation provide prospective tenderers with an insight into the requirements that the purchasers hold to be most important

In preparing the evaluation criteria, it is useful to consider:

- Who is going to evaluate the tenders.

It is important that the tender evaluators have the appropriate skills and can make a well-balanced decision. An evaluation team should contain an appropriate balance of technical, business, and management expertise, with an overall team-leader to co-ordinate and manage the evaluation process. Each team member should be formally advised:

- their role;
- their specific tasks and responsibilities;
- the time-commitment involved.

It is important to stress the importance of commercial confidentiality.

- who will receive the evaluation team's recommendations, and who will make the final decision;
- whether there's a need for external consultants to assist and advise on the purchase recommendation;
- what sort of weightings will be used for the various selection criteria during the decision-making process.

In some circumstances, a two-stage evaluation may be necessary. The first stage could evaluate selected major criteria to identify a shortlist, which will then go forward to a detailed evaluation in stage two. If formal presentations/demonstrations are to be permitted as part of the process, generally only those suppliers making the shortlist would be invited to do so.

- whether tenderers will be invited to make presentations, and, if so, how the presentation will be conducted. Is it appropriate/necessary to visit tenderers' premises or user sites?

Once any suppliers have been "knocked out" of the process, they should be advised as soon as possible. (This enables them to reallocate any resources they may have committed to the support of the proposal.)

8.6.3.4.3.3 Documenting the decision-making process

Tender evaluations must be well-documented, and care must be taken to ensure that all tenderers have been given the same opportunities, and that the requirements of fairness and equability have not been compromised. It must be remembered that the Ministry is accountable for its decision, and may be required (possibly under the Official Information Act) to provide information about the decision-making process.

8.6.3.4.3.4 Post-tender negotiations

It can often be useful to negotiate with tenderers after the tender documents have been received and assessed. Negotiations can cover issues such as:

- terms and conditions of supply;
- delivery;
- terms of payment;
- warranties;
- on-going maintenance.

However, it is important that this process be handled delicately and professionally. As Treasury puts it, "playing one tenderer off against another in a "Dutch Auction" is not a professional tender negotiation". Suppliers have little patience with this approach, and are likely to produce cagey, tentative, and ultimately useless tender documents in future.

Negotiations should be well-documented, and the parties should formally agree to the results of the negotiations. Before the tender is let, the negotiation process should be reviewed to ensure that all tenderers have been given the same opportunities, and that the requirements of fairness and equitableness have not been compromised.

8.6.3.4.4 Awarding Contracts

Many transactions will be completed by issuing an official purchase order, but contract documentation will be necessary for some purchases. This contract material may consist of a fairly simple exchange of letters, or may involve the drafting of complex legal documents. In general, if a procurement warrants the issue of a formal RFP, and the expense of a formal evaluation process, it will also require the preparation of proper contracts.

Key contract documents will be the RFP and the preferred supplier's proposal, which should always become attachments to the agreements. Any other major documents that supersede the RFP or proposal should also be attached.

A contract should address the following issues:

- the contract deliverables;
- the specification for deliverables;
- the implementation plan;
- performance and service standards;
- the purchasers responsibilities;
- purchaser and supplier project-management roles;
- acceptance procedures for goods/deliverables;
- the commercial terms, conditions, and schedule;
- issues of confidentiality, intellectual property, and liabilities;
- the consequences and remedies for both parties of default by the other.

Letters-of-intent

Developing contract documents can be quite time-consuming, and it may be appropriate to send the chosen supplier a "letter-of-intent". Such a letter states that the tender has been successful, but that a confirmed order may depend on negotiation of a satisfactory contract. The advantage of a letter-of-intent is that it allows the supplier to be sufficiently sure of securing the business to be able to begin substantive work on the contract.

It's important to seek legal advice on the wording of letters-of-intent to ensure that they do not make a binding commitment which could prejudice negotiation of the final contract.

8.6.3.4.5 Debriefing Unsuccessful Tenders

Suppliers who win contracts generally know what they are doing right. Tenderers who miss out often value the opportunity to discover what they are doing wrong; if nothing else, debriefing can help New Zealand firms enhance their ability to compete at home and abroad.

The Ministry is happy to "debrief" unsuccessful tenderers. This task should fall to the leader of the evaluation team. Wherever possible, staff should try to keep the process open, with frank and honest exchange of information. However, it is important to take into account the requirements of commercial confidentiality and the maintenance of fair competition between suppliers. To protect commercial confidentiality of all parties, staff should only advise suppliers of the relative strengths and weaknesses of their own proposals, without comparing them to the proposals of others.

The timing of debriefing is important, and (in case a chosen supplier drops out and the evaluation has to be re-opened) it should not precede the formal conclusion of negotiations and the completion of a contract.

8.6.3.4.6 Maintaining Good Post-Contact Relationships

It is important to maintain communication with the successful tenderer throughout the life of the contract; providing suppliers with feedback helps build a productive relationship. If it is appropriate suggest ways in which the performance of a supplier, or its products, can be improved.

Staff should deal with suppliers in an ethical and businesslike fashion - and should see that suppliers' accounts are paid on time!

Working Party on GATS Rules Original: English

COMMUNICATION FROM JAPAN

Response to the Questionnaire on Government Procurement of Services

The following communication is being circulated at the request of the delegation of Japan to Members of the Working Party on GATS Rules.

I. EXISTING PROCUREMENT REGIMES

Definition

1. What is the definition of government procurement employed in completing this questionnaire?

For the purpose of completing this questionnaire, government procurement is referred to as the procurement of services covered by the Agreement on Government Procurement concluded in Marrakesh on 15 April 1994 (hereinafter, •the Agreement•). It must be noted that this definition is used only in the context of this questionnaire and should not prejudice Japan's position on understanding of the scope of government procurement.

Administrative structure

2. How are government procurement activities administered? To what extent are procurement activities centralized? Please specify the identity of any central procurement agencies and their respective responsibilities.

In Japan, government procurement is conducted on the basis of procurement contracts entered into by each procuring entity, thus in a decentralized manner. The procurement procedures are provided for in the Accounts Law and relevant regulations with regard to central government entities, in the Local Autonomy Law and relevant regulations with regard to sub-central government entities, and in accordance with the relevant procurement procedures operating under the supervision of the central government entity concerned with regard to other entities. Procurement plans of the central government are normally formulated on the basis of procurement planned by the procuring entity. A draft budget is prepared after going through the examination by the fiscal authorities, and that draft comes into force at the beginning of the following fiscal year after the approval of the Diet.

Laws and regulations in force

3.(a) Please specify the laws, regulations, rules, guidelines, decrees, decisions and other measures governing government procurement. What is the scope of their application? In particular, please describe any exemptions that exist. Please provide a brief summary of the content of each of these measures.

The following is a list and outline of the major laws and regulations related to government procurement in Japan and the scope of their application.

(1) List

- (i) Accounts Law
- (ii) Cabinet Order Concerning the Budget, Auditing and Accounting
- (iii) Special Provision of the Cabinet Order Concerning the Budget, Auditing and Accounting
- (iv) Regulations on the Management of Contract Administration
- (v) Cabinet Order Stipulating Special Procedures for Government Procurement of Goods or Services
- (vi) Ministerial Ordinance Stipulating Special Procedures for Government Procurement of Goods or Services
- (vii) Local Autonomy Law
- (viii) Ordinance for Enforcement of Local Autonomy Law
- (ix) Cabinet Order Stipulating Special Procedures for Government Procurement of Goods or Services in Local Government Entities
- (x)
 - a) On the establishment of the Office of Government Procurement Review (Cabinet Decision of 1 December 1995)
 - b) Review Procedures for Complaints Concerning Government Procurement (Decision of the Office of Government Procurement Review on 14 December 1995)
 - c) Designation of Applicable Measures Concerning Government Procurement (Decision of the Head of the Office of Government Procurement Review on 14 December 1995)

(2) Outline

(i) Accounts Law

This law stipulates the basic items of the nation's accounting duties pertaining to contractual duties, contractual methods, tendering methods, contractual forms and other matters.

(ii) Cabinet Order Concerning the Budget, Auditing and Accounting, the Special Provisions for Cabinet Order Concerning the Budget, Auditing and Accounting and the Regulations on the Management of Contract Administration.

These accounting regulations stipulate the detail of the rules and procedures provided for in the Accounts Law, including the conditions for the use of selective tendering and single tendering

(iii) Cabinet Order Stipulating Special Procedures for Government Procurement of Goods or Services.

This Cabinet Order provides special rules and procedures which are necessary for implementing the Agreement in addition to the laws and regulations mentioned above in (1)(i) through (iv)

(iv) Ministerial Ordinance Stipulating Special Procedures for Government Procurement of Goods or Services

This Ministerial Ordinance is applied to the procurement contracts subject to the provisions of the Cabinet Order referred to above in (1)(v). The ordinance stipulates the details of the rules and procedures such as information to be published in the official gazette •Kanpo• on the qualification procedures, matters to be described in tender documents and information on the contract awarded.

(v) Local Autonomy Law

This Law provides a general principle concerning the organization and operation of local government bodies (including the rules on procurement contracts) and the basic relations between the central government and local governments.

(vi) Ordinance for the Enforcement of Local Autonomy Law

This Ordinance provides detailed rules and procedures for implementing the provisions of the Local Autonomy Law, including matters on procurement contracts.

(vii) Cabinet Order Stipulating Special Procedures for Government Procurement of Goods or Services in Local Government Entities

This Cabinet Order establishes the special rules and procedures needed to implement the Agreement in addition to the laws and regulations mentioned above in (1)(vii) and (viii)

(viii) On the establishment of the Office of Government Procurement Review (Cabinet Decision of 1 December 1995) (hereinafter the •OGPR•)

The OGPR was established by the Prime Minister's Office to implement the Provisions of the Agreement regarding challenge procedures. The Government Procurement Review Board (the •GPRB•), held under the OGPR, processes complaints in a fair and neutral manner with regard to procurements by the central government entities and other entities. The GPRB reviews complaints in accordance with the specific procedures set out by the OGPR by applying the provisions of the Agreement and the measures otherwise designated by the head of the OGPR.

(ix) Following the model of the procedures set out by the OGPR, the prefectural governments and the designated cities covered by the Local Autonomy Law have established their respective procedures to process complaints on procurement subject to the Agreement.

(3) Scope of the Application

The laws and regulations mentioned above in (1)(ii)(iii) and (iv) apply to all the central government entities, while those mentioned above in (1)(v) and (vi) apply to all sub-central government entities and the cabinet order mentioned above in (1)(vii) applies to all the prefectural governments and the designated cities covered by the Agreement. The above-mentioned laws and regulations have no provisions for exemptions to their application, except for the provisions accepted in the Agreement.

(b) Does the procurement regime distinguish between the procurement of goods and services? If so, then how is the application of rules determined in cases of joint procurement involving both goods and services?

There is no such distinction in our procurement regime.

Procurement procedures applied

4.(a) What procedures are followed in the procurement process?

The methods followed for procurement contracts by entities covered by the Accounts Law and the Local Autonomy Law are open tendering, selective tendering, and single or limited tendering.

i) Open Tendering

Under this method, each entity publishes public notices of intended procurements in the official gazette •Kanpo• or its equivalents at the local level, and normally invites qualified suppliers to participate in tendering procedures. The procurement contract is awarded to the supplier who submitted the lowest-priced tender. This serves as the principal method for government procurement contracts in Japan.

ii) Selective Tendering

Under this method, each entity publishes public notices of intended procurements in the official gazette •Kanpo• or its equivalents at the local level to the effect that applications to qualify for participation in competitive tendering will be accepted. Among those suppliers who have been identified by each entity as qualified through its qualification procedure, the entity designates the suppliers deemed to have the capacity to fulfil the contract. The contract is awarded to the supplier who submitted the lowest-priced tender among those designated. However, the conditions in this method are defined by laws and regulations, which provide for such cases as do not necessitate the use of open tendering, for example due to the limited number of suppliers competing because of the nature or the purpose of the contract.

iii) Single or limited Tendering

This method allows entities to conclude contracts with designated suppliers without following competitive tendering procedures. The single tendering method is used only exceptionally. With regard to procurement contracts subject to the Agreement, in particular, single tendering can be used only in accordance with the conditions stipulated in the Agreement --- such as cases in which no suppliers would respond even if competitive tendering procedures were applied and cases connected with the protection of exclusive rights including patents and copyrights.

(b) Under what circumstances are different procedures used? For instance, if the method used depends on the value of the procurement, the thresholds should be given.

As for the circumstances under which different procedures are used, see 4(a) above. The choice of a procedure does not depend on the value of the procurement contract concerned.

(c) What are the time limits for submission of bids?

Suppliers must submit their bids before the deadline mentioned in the notice for tenders in the gazette (the notice is published in principle 40 days in advance of the deadline.)

Publicity for inviting tenders**5.(a) How are intended procurements publicised? Are invitations to tender published? If so, where, and in what languages?**

A procuring entity publishes a notice in the official gazette, •Kanpo• or its equivalents at the local level, for the invitation to tender in principle 40 days in advance of the closing date of receipt for tenders. Therefore, it is very important to read notices on tenders in the gazette carefully. Information on tenders is also available through contact points on government procurement. As for the languages used for the invitations, see below 5(c)

(b) Do the extent and form of publicity differ according to tendering procedures applied and/or on the value of procurement?

With regard to procurement in Japan, the extent and form of publicity does not depend on tendering procedures or on the value of procurement.

(c) What details of the intended procurement are normally published? Is there a minimum set of information that is required to be published? If so, please specify.

A notice of invitations to tender includes such information as is indicated below. In the official gazette, the nature and quantity of services to be procured, the time-limits set for the submission of tenders, and the name and department of the official in charge of the contract are described in English, i.e. one of the official languages of the WTO. Public notices on selective tendering procedures contain, in addition to such information, requirements for being designated to participate in tenders.

- Subject matter of contract;
- In cases of recurring contracts, the nature and quantity of the services to be procured under all the remaining contracts after one of the series of recurring contracts, the estimated dated of the subsequent tender notices and the date of the notices and the date of the notices inviting the first tender;
- Qualifications required for participating in the tendering procedures;
- Place and time-limits set for the submission of tenders;
- Place for indicating contract provisions;
- Place and procedures for the delivery of tender documents;
- Name and department of the official in charge of the contract;
- Place, date and time of opening tenders;

- Language and currency to be used for the contract;
- Information on tender guarantee fees and contract guarantee fees;
- Obligations of tenderers;
- Confirmation that tenders made by non-qualified suppliers and tenders violating the conditions of the tender are invalid;
- Whether a written contract is required or not, and
- Method for determining the successful tenderer;

(d) Are there any charges for obtaining the full set of tender documents? If so, please specify and describe how these charges are set?

Those who intend to participate in competitive tendering procedures can obtain tender documents containing detailed information on the tender from the procuring entity concerned. Sometimes when it is necessary, expenses of the tender documents have to be paid for.

(e) Are electronic means used to advertise procurement opportunities? What is the nature of systems that are in place? Are different tendering provisions applied to contracts advertised in this manner? If so, please describe.

With a view to facilitating access to information about government procurement, an electronic data-base containing the information published in the official gazette, •Kanpo•, is available, either at such places as local branch offices and Business Support Centers of the Japan External Trade Organization (JETRO) and through on-line information and data base retrieval services on the Internet.

Requirements laid down for possible suppliers

6.(a) Are there registration, residence or other requirements for potential suppliers?

Usually, those who wish to participate in open tendering and selective tendering procedures must receive qualifications from procuring entities and be included in the permanent list of qualified suppliers which is prepared and updated by procuring entities.

In order to ensure the transparency, openness, and efficient use of allocations in the procedures for competitive tendering, competition through price alone serves as the principle. Therefore, in cases where suppliers are asked to participate in competitions and they do not consider their ability to implement contracts in advance, there is a risk that the designated supplier will not be able to implement the contract properly. Thus, while paying attention to not reducing the level of fairness in competition, qualifications for participating in competitions are determined and suppliers applying to participate in competitions are judged based on their scale of operations, record of achievements and other factors, and, after determining their ability to implement the contract, those suppliers deemed to have the capacity to carry out the requirements are designated as the suppliers qualified to

compete. In that way the transparency of contract procedures is secured while guaranteeing that suppliers with a certain level of ability to implement contracts are selected. No requirements except those mentioned above are imposed on suppliers for participating in qualification procedures.

(b) What is the nature of any conditions for participation required from suppliers - such as financial guarantees, commercial standing and technical qualifications? Do the conditions of participation vary according to the nature of the tender process and/or the value of the intended procurement?

For the first question, see 6(a) above. For the second question, the conditions of participation vary according to the types of procedures explained in the answer 4(a). The conditions, however do not depend on the value of the procurement.

(c) Do there exist lists of approved suppliers? If so, what are the procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists? Are lists of approved suppliers, if any, regularly reviewed/updated?

See 6.(a), the permanent list (hereinafter, •the list•) of qualified suppliers prepared by procuring entities is updated every one or two years in general. In addition, suppliers may apply to receive qualifications at any time. When they are identified as qualified, they will be enrolled on the list

Criteria for assessing bids and awarding contracts

7.(a) What criteria are taken into account in the award of tenders? Are criteria for award of contracts made available in advance to potential suppliers?

In order to ensure transparency and openness or efficient use of allocations in the procedures for competitive tendering, tenders submitted are evaluated on the basis of the least-priced-method, for which a procuring entity calculates a price which serves as the standard for awarding based on objective and reasonable specifications to be required. In some major sectors such as computer and related services, however, when tenders submitted are above the threshold, an overall-greatest-value-method is used for an objective evaluation of the quality of relevant services. These criteria are described in notices on tenders and suppliers are informed in advance.

(b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?

There are no offset provisions, such as local content, technology transfer or countertrade requirements in Japanese government procurement procedures.

(c) Is preference given to any particular enterprises or group of enterprises? If so, please specify.

Government Procurement in Japan places no restrictions on the place of origin or nationality of the supplier and is carried out on the principle of national treatment and non-discrimination. No preferential treatment is extended to specific suppliers.

(d) Do the procurement criteria differ according to sector or region of the economy?

In Government Procurement in Japan, competition through price alone serves as the principle and procurement criteria do not differ according to the sector or region of the economy.

(e) What is the margin of choice or discretion allowed to the purchasing authority? What does the extent, if any, of discretion allowed depend upon?

With regard to Government Procurement in Japan, the risk of arbitrary decisions by the officials in charge in determining the award of contracts are eliminated by qualifying suppliers in advance on a non-discriminatory basis, requiring suppliers to follow conditions on quality, specifications and other elements in a manner which do not preclude competition and making price-based competition serve as the principle.

Disclosure of bids received and contracts awarded

8.(a) How are tenders received, registered and opened?

Sealed tenders must be submitted at the time and place and specified in the notice in the official gazette •Kanpo• or its equivalents at the local level. Specifications of the services to be procured may be required to be submitted with the tenders in some cases.

Tenders are opened at the time and place specified in the notice in the official gazette, •Kanpo• or its equivalents at the local level, in the presence of tenderers or their proxies. Should no tenderers or their proxies be present, the staff of the procuring entity who are not involved in the tendering procedures are required to be witnesses.

(b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?

Each procuring entity notifies tenderers of the decision of the award of the contract in writing. Furthermore, each entity publishes a notice in the official gazette, •Kanpo• or its equivalents at the local level, containing the subject matter of the contract, date of award, name and address of winning tenderer, and value of winning award with a view to increasing opportunities for potential suppliers to participate in tendering procedures. Information on awarding of contracts is also available at contact points on each government procurement.

(c) Are entities required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected?

The notification which each entity gives to the tenderers concerned regarding its decision on the award of the contract does not include information about the reason for not being awarded. If requested, however, information is provided promptly.

Treatment granted to domestic and foreign services and/or suppliers

9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or accord services and/or suppliers of a Member more favourable treatment than those of another Member? Please specify how, if at all, more favourable treatment is accorded. Please also specify the working definition of 'domestic' in relation to domestic services and suppliers.

Government procurement in Japan has no discrimination on the place of origin or nationality of supplier and the principle of national treatment and non-discrimination is secured. In Japan 'domestic services' procured by government organizations is interpreted as services provided through commercial presence established in Japan and owned or controlled by persons of Japanese nationality or the services provided by Japanese who are residents in Japan.

Procedures for hearing and reviewing complaints/appeals

10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract? Please provide details.

The Japanese Government, pursuant to relevant provisions of the Agreement, has introduced a bid challenge system¹ which enables the suppliers interested to file complaints on the procurements covered by the Agreement and/or based on the voluntary measures which Japan has taken. With a view to processing complaints on procurement by entities other than sub-central government entities, Japan has established the Office of Government Procurement Review (OGPR) under the Prime Minister's Office based on a Cabinet Order of December 1995, and the Government Procurement Review Board held under OGPR has set out the specific procedures for reviewing complaints. The following is an outline of how to use those procedures. (Complaints on procurement by sub-central government entities can be processed in accordance with procedures which each entity concerned has established mutatis mutandis to those of the central government.)

Qualification of Complainants

Complaints may be filed by suppliers who either participated or are qualified to participate in specific and individual cases of procurement, subject to the procedures for complaint review.

Where to File Complaints

Complaints should be filed with the Secretariat of the Board in the Office for Government Procurement Challenge System (CHANS), Coordination Bureau, Economic Planning Agency.

Filing of Complaints

Complaints can be received in accordance with the form specified in Appendix 1, through a phone call, visit, mail or other means of communication.

Participation in Review Process

All suppliers that have interests in the procurement subject to the complaint may participate in the review process by attending or expressing their views at meetings of the Board. Those who wish to do so should notify the Secretariat, in accordance with the form in Appendix 2, within five days

¹ A supplier may file a complaint with the Board, if the supplier believes that the procurement has been carried out in a manner inconsistent with any provision of the Agreement or other applicable measures which Japan has taken voluntarily in order to increase access opportunities for foreign suppliers to the Japanese market.

after the public notice is given, through the official gazette •Kanpo• or the Internet.

II. MEMBERSHIP OF PLURILATERAL, REGIONAL AND/OR BILATERAL AGREEMENTS

11. Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement? If so, please describe the relevant provisions.

Japan is a party to the Agreement on Government Procurement which was reached on 15 April 1994 in Marrakesh, while remaining a party to the Agreement on Government Procurement which was reached on 12 April 1979 in Geneva and amended on 2 December 1986.

III. ECONOMIC IMPORTANCE OF SERVICES PROCUREMENT

12.(a) Please provide statistics (if available) on the number and value of services procurements

- *on both an aggregate and sectoral basis;*
- *by origin of services and suppliers.*

(b) Please provide statistics (if available) on the

- *share of services procurement in total procurement;*
- *share of procurement of each service in total domestic output of the service;*
- *share of procurement of each service in total domestic consumption of the service.*

No such statistical information on procurement of services has yet been made available. (With regard to procurement of the services covered by the Agreement, the Government of Japan will begin to compile from next year the relevant information on the procurement of this year.)

APPENDIX 1**Form for Filing Complaints**Information Required for Filing a Complaint

Complainant (No anonymous requests can be accepted)	Company name (the company must have something to do with the procurement in question)
	Address, postal code
	Telephone, fax no.
	Name (in the case of a company, include the name of the representing official)
	Name of the staff in charge
Procurement which is subject to the complaint	Officially announced as tender bidding • _____ (in the Official Gazette dated D/M/Y), to be procured (procured) by _____ (name of entity)
Description of complaint	(To ensure prompt handing, please describe as specifically as possible. Please enclose as many descriptive materials as possible as well.)
Have you consulted with the procuring entity up to now?	1)Yes (when, where?) 2)No

APPENDIX 2**Form for Indicating Desire to Participate in Complaint Review Process**Information Required to Indicate Desire to Participate in Board Meeting

Person (body) wishing to attend (No anonymous requests can be accepted)	Company name (the company must have some interests in the procurement in question)
	Address, postal code
	Telephone, fax no.
	Name (in the case of a company, include the name of the representing official)
	Name of the staff in charge
Complaint Review Process in which the person wishes to participate	Public notice • _____ of the Government Procurement Review Board
Description of interest involved	(Please describe specifically your interest in question)

Working Party on GATS Rules

COMMUNICATION FROM NORWAY

Response to the questionnaire on Government Procurement of Services

Corrigendum

Please note the following corrections to document S/WPGR/W/11/Add.1:

- 1) **Page 3, question 4.(a), second line:**replace •reject• with •project•;
- 2) **Page 6, question 6(c), last line:**replace •supplies• with •suppliers•;
- 3) **Page 7, question 10, sixth line:**replace •former• with •formal•;
- 4) **Page 8, question 12(a):**

Under *Construction works*:

fifth paragraph, third line:replace •NOD• with •NOK•;

last paragraph, first line: replace •any• with •only•.

Working Party on GATS Rules

COMMUNICATION FROM BRAZIL

Response to the questionnaire on government procurement of services

The following communication is being circulated at the request of Brazil to Members of the Working Party on GATS Rules.

I. EXISTING PROCUREMENT REGIMES

Where a Member's procurement regime is different for central government entities, sub-central government entities, and other entities, such as public undertakings (e.g. public utilities), it would be useful if these differences were specified under each of the headings indicated below.

Definition

1. What is the definition of government procurement employed in completing this questionnaire?

Bidding on Governmental Contracts is a formal administrative act, practised in any sphere of the Public Administration. Its objective is to guarantee the observance of the Constitutional principal of isonomy or equality before the law to permit the selection of the most advantageous proposal for the Administration (Sole Paragraph of Article 4 combined with Article 3 of Law No. 8666 dated 21 June 1993).

Administrative Structure

2. How are government procurement activities administered? To what extent are procurement activities centralized? Please specify the identity of any central procurement agencies and their respective responsibilities.

The bidding process is administered directly by the public Institutions interested, obeying the legislation in force established by the Union, in accordance with that provided for in the Federal Constitution, dated 5 October 1988, which says: •It falls to the Union exclusively to legislate on: General Norms for Bidding and Contracting, in all its forms for the Public Administration, direct and indirect, including the Foundations instituted and maintained by public authority, in the various spheres of the Government and enterprises under its control•. The Ministry of the Federal Administration and State Reform - MARE, is in charge of the elaboration of the Norms and Regulations about this material.

Laws and Regulations in Force

3.(a) Please specify the laws, regulations, rules, guidelines, decrees, decisions and other measures governing government procurement. What is the scope of their application? In particular, please describe any exemptions that exist. Please provide a brief summary of the content of each of these measures.

Oriented by the principles of legality, impersonality, morality, equality and publicity, defined by Article 37 of the Federal Constitution, Law No 8666 dated 21 June 1993, with the modifications made by Law No. 8883, dated 8 June 1994 establishes the general norms concerning this material in the context of the Federal Authority, the States, the Federal District and the Municipalities. Also subordinated to this law, besides the Organs of Direct Administration, are the Special Funds, the Autocracies, the Public Foundations, Public Enterprises, the Societies of Mixed Economy and other entities directly or indirectly controlled by the Union, States, Federal District, and Municipalities. The invitational instrument is defined and instructed by the institution interested in the bidding, serving as the public agent, constituting the normative division fundamental to the process, within the force of the law, hierarchically subordinated.

(b) Does the procurement regime distinguish between the procurement of goods and services? If so, then how is the application of rules determined in cases of joint procurement involving both goods and services?

The same legislation applies to the acquisition of goods and services, without distinction.

Procedures applying to Governmental Bidding

4.(a) What procedures are followed in the procurement process?

First of all, it should be underscored that the bidding process is a constitutional requirement, which aims to assure equal conditions to all competitors with

explicit clauses regarding payments, and with requirements for technical and economic qualification indispensable to guarantee the fulfilling of obligations (Clause XXI of Article 37 of the Federal Constitution). The bidding process is subordinated to the completion of stages with the following sequence:

- 1.basic project;
- 2.executive project;
- 3.execution of services.

In accordance with the first paragraph of Article 7 of Law No. 8666/93: •The execution of each stage shall be obligatorily preceded by the conclusion of the evaluation, by competent authority, of the work relative to the previous stages, the accomplishment of the executive project, which may be developed concomitantly with the execution of the works and services, whenever this is also authorized by the Administration. •

•Paragraph 2 - Works and Services may only be bid upon whenever:

- I - there is a basic project approved by competent authority and available for examination by the parties interested in participating in the bidding;
- II - there is a detailed budget in spreadsheet that express the composition of all the unitary costs;
- III - there is provision of budget resources that assure the payment of the obligations arising from the works and services to be executed in the fiscal year in course, according to the respective chronograph;
- IV - the product hoped for by the bidding is contemplated in the objectives established in the Multi-year Plan as treated in the Article 165 of the Federal Constitution, whenever this is the case.

Paragraph 3 of the same Article: •The inclusion in the object of the bidding, the obtainment of financial resources from whatsoever origin for its execution, is forbidden... •

Paragraph 4: •It is moreover forbidden, to include in the object of the bidding, the provision of materials and services without specifying quantities or when such quantities do not correspond to the actual projections of the basic or executive plan. •

Paragraph 5: The realization of competitive bidding whose object includes goods and services whose trademarks are not similar in characteristics and exclusive specifications is forbidden, except in the case in which it is technically justifiable, or whenever the provision of such materials and

services was made under a regime of contracted administration, foreseen and discriminated at the time of the invitational act.

The procedures for bidding on governmental services may differ in accordance with the degree of openness of the invitations:

- public: all interested parties may submit bids;
- selective: selected bidders may participate to present their offers; and
- private contract (one sole bidder); by which the authority contracts individual suppliers, and sometimes one sole supplier.

(b) Under what circumstances are different procedures used? For instance, if the method used depends on the value of the procurement, the thresholds should be given.

Public bids may take place in 5 (five) different forms.

- 1.Competition
- 2.Estimate taking
- 3.Invitation
- 4.Contest and
- 5.Auction (does not apply to services)

In accordance with Article 22 of Law No. 8666/93, these modalities are defined in the following way:

- Competition is the modality of bidding among any interested parties, which in the initial phase of qualification, prove that they have the minimum necessary requirements to meet those called for in the call for bids. •
- Estimate taking is the modality of competition among interested parties duly registered or who have qualifications to be registered by the third day before the proposals are received, observing the necessary qualifications.
- Invitation is the modality of bidding among interested parties of the branch pertinent to its object, registered or not, chosen and invited with a minimum number of three by the administrative unit, which shall fix in an appropriate place a copy of the call for bids and shall extend to all other registered parties in the corresponding specialty who manifest interest within 24 hours preceding the presentation of the proposals.
- Contest is the modality of competition between any interested parties for the selection of technical scientific, or artistic services, through the establishment of prizes or remuneration of the winners, according to the criteria in the published call for contestants in the Official Gazette with a minimum antecedence of 45 (forty-five) days. •

The present modalities are determined in function of the estimated value of the contract, discriminated in the following way:

-for works and engineering services:

invitation - up to R\$ 126,658.40 (one hundred twenty-six thousand, six hundred fifty-eight reais and forty centavos);

estimate taking - up to R\$ 1,266,584.03 (one million, two hundred sixty-six thousand five hundred eighty-four reais and three centavos); and

competition - above R\$ 1,266,584.03 (one million, two hundred sixty-six thousand five hundred eighty-four reais and three centavos).

-for purchases and other services:

invitation - up to R\$ 31,664.60 (thirty-one thousand, six hundred sixty-four reais and sixty centavos);

estimate taking - up to R\$ 506,633.61 (five hundred six thousand six hundred thirty-three reais and sixty-one centavos);

competition - above R\$ 506,633.61 (five hundred six thousand six hundred thirty-three reais and sixty-one centavos).

These values are corrected automatically by the General Index of Prices of the Market (•IGPM•), with the same periodicity and proportion as this, taking as the base point the month of December 1991. The new values are published by the Executive Powers in the Federal Gazette of the Union, without considering fractions smaller than R\$ 1.00 (One Real).

For some cases, the Law dispenses the bidding process, as described in the diverse paragraphs of Article 24 of the Law No. 8666/93.

By Article 25 of the same law: •It is not necessary to require the bidding process when competition is unfeasible, especially:

I-...

II - to contract the technical services enumerated in Article 13 of this law, of a singular nature, with professionals or businesses of well known specialization, ineligibility is forbidden for services of publicity and divulgation;

III - for contracting professionals of whatever artistic sector, directly or through an exclusive agent, as long as they are consecrated by specialized critics or by public opinion.

Paragraph 1 - The professional or business of well know specialization, is considered to be such in his or her field of specialization, depending on previous performance, studies, experiences, publications, organisation, equipment, technical staff, or other requirements related to such activities, permitting inference that his/her work is essential and unquestionably the most adequate for the full satisfaction of the object of the contract.

Paragraph 2 - in the case of this Article and in any event in which there is dispensation of the call for bids, if overpricing is proved, the provider of goods or services will respond jointly for damages caused to the Federal Treasury with the public agent responsible, without prejudice to other applicable legal sanctions. •

(c) What are the time limits for submission of bids?

The second paragraph of Article 21 of Law No. 8666 defines these limits, which vary from 5 to 45 days, in accordance with the modality of the bidding.

Publication of the Call for Bids

5.(a) How are intended procurements publicised? Are invitations to tender published? If so, where, and in what languages?

The proposed calls for bidding are made public by means of proclamations, instruments of invitation, published in the Official Gazette of the Union, of the State, or of the Federal District, and in a daily newspaper of wide circulation in the State or Municipality where there are interested parties.

Whenever the call for bids is of international ambit, the invitation is presented also in the language of the country where divulgation occurs.

(b) Do the extent and form of publicity differ according to tendering procedures applied and/or on the value of procurement?

For all modalities of bidding - except invitation - a resume of the proclamation should be published. The Law does not specify the content that should make up the resume of the proclamation which is to be circulated. Nevertheless, there are six elements that should be included: (I) The modality of the call for bids (competition, estimate taking, contests or auction); (II) a synthesis of its object, defining the nucleus; (III) the regime of execution; (IV) type of bid: (lowest price, best technique, technique and price, or highest offer) (V) date and hour of the judgement session; and (VI) the location where the interested parties may obtain the entire text of the invitation and other information regarding the competition.

(c) What details of the intended procurement are normally published? Is there a minimum set of information that is required to be published? If so, please specify.

The details referred to may include a description of services, initial and final dates of the offer, conditions for participation, identification of the acquiring organs, enquiry point, plans for the call for bids, with notices regarding contracts, etc.

See the reply contained in the previous item 5(b).

(d) Are there any charges for obtaining the full set of tender documents? If so, please specify and describe how these charges are set?

For the qualification of bidders, there are no costs, except relative to the provision of the Proclamation, when requested, and other documents which accompany it, limited to the value of the effective cost of graphic reproduction (Paragraph 5 of Article 32).

(e) Are electronic means used to advertise procurement opportunities? What is the nature of systems that are in place? Are different tendering provisions applied to contracts advertised in this manner? If so, please describe.

The present system of divulgation does not use these electronic means. Nevertheless, there is a project being elaborated by the Ministry of Federal Administration and Reform - MARE, that foresees the implantation of a System of Electronic Divulgation of calls for bids - SIDECA.

Requirements for Potential Bidders

6.(a) Are there registration, residence or other requirements for potential suppliers?

As per Article 34 of Law No. 8666/93, the organs and entities of the Public Administration should maintain organized registers of qualified potential bidders and providers of services, according to regulations, which register shall have a maximum validity of one year. Articles 34 to 37 and their paragraphs, of the cited law treat exclusively of organized registers.

Previous registry, however is required only for the •estimate taking modality•. In an effort to improve the present system of registry, the Government, through the Ministry of Federal Administration and Reform - MARE, is implanting the Unified Registry of Suppliers (•SICAF•)

(b) What is the nature of any conditions for participation required from suppliers - such as financial guarantees, commercial standing and technical qualifications? Do the conditions of participation vary according to the nature of the tender process and/or the value of the intended procurement?

For a candidate to qualify for the bidding it is necessary: (Article 27)

- juridical qualification;
- technical qualification;
- economic and financial qualification; and
- to be up to date fiscally.

(c) Do there exist lists of approved suppliers? If so, what are the procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists? Are lists of approved suppliers, if any, regularly reviewed/updated?

This question has already been partially answered by 6(a). In addition it should be observed that the qualification of new potential candidates is always possible, as long as the legal requirements of Law No. 8666/93 are met, some of which have already been mentioned in this questionnaire.

Criteria for assessing bids and awarding contracts

7.(a) What criteria are taken into account in the award of tenders? Are criteria for award of contracts made available in advance to potential suppliers?

The criteria utilized in the evaluation of proposals are established and divulged beforehand, observing the types of bidding, constituted according to the Law No. 8666/93, which are:

1. that of the lowest price - the bidder who presents the lowest price will be the winner, if all the specifications of the proclamation of the invitation are followed;
2. that of the best technique;
3. that of best technique and price; and
4. that of the best bid, or offer (only applies to cases of transfer of goods or concession of legal right to use).

(b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?

With respect to this, the law does not establish mechanisms with a view to obtaining compensation/correspondence between the government and third parties.

(c) Is preference given to any particular enterprises or group of enterprises? If so, please specify.

No.

(d) Do the procurement criteria differ according to sector or region of the economy?

There is no differentiation in the criteria of government bids, in function of geographic location.

(e) What is the margin of choice or discretion allowed to the purchasing authority? What does the extent, if any, of discretion allowed depend upon?

The margin of choice or free will may be related as such:

- (i) the importance given to each criterion;
- (ii) the margin of preference or specific criteria; and
- (iii) value of scope, above which higher authority must intervene.

The free will of the authority may vary if:

- (i) there are automatic bids, within which the contract is signed on the basis of predetermined criteria instead of simply price or price and another criterion;
- (ii) discretionary procedures that involve the acceptance of that offer most advantageous to the approval of the contract based on numerous criteria, some of which are predetermined, but which in general, leave the authority a certain degree of choice; and
- (iii) negotiated offers, in which the authority freely negotiates the conditions of the contract.

With reference to the margin of choice in the process of judging the proposals, the Law No. 8666/93 establishes that such should be objective, carried out in conformity to the preestablished criteria in the invitation proclamation, and in accordance with factors referred to exclusively in the proclamation, in order to permit transparency and the possibility of verification, on the part of the bidders and the organs of control (Article 45 of the Law cited).

Registration of Proposals and Approved Contracts

8.(a) How are tenders received, registered and opened?

The opening of the proposals of the qualified competitors in the bidding is done by public act, previously established, the minutes of which are registered with circumstances and is signed by members of the commission and by the competitors who are present. These proposals may only be revealed after the opening of the envelopes containing the documentation relative to the qualification of the competitors and its consideration has been made. In case of disqualification, the respective proposals are returned to the interested parties in closed envelopes.

(b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?

The contracts are published in summary form in the official press, a condition indispensable for its efficiency, by the fifth day of the subsequent month after signing, no matter what its value.

(c) Are entities required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected?

The actual judgement itself is a public act, accompanied by the interested parties without restrictions of access by the general public, without prejudice toward the formal explanations owed the competitors who were passed by.

Treatment conceded to National and Foreign Bidders for Rendering Services

9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or accord services and/or suppliers of a Member more favourable treatment than those of another Member? Please specify how, if at all, more favourable treatment is accorded. Please also specify the working definition of •domestic• in relation to domestic services and suppliers.

In that which refers to the treatment dispensed to foreign competitors, Law 8666/93 in Article 42 Paragraph 4 establishes that for purposes of judgement of proposals presented by foreign competitors, the proposals will be increased by the amount of tribute which would fall only on national competitors in the final stage sale operation.

Law No 8666/93 establishes yet, that in the case of equal conditions, as criteria for giving the tie breaking vote, preference will be given to goods and services produced in the country.

Procedures for Audiences and Consideration of Appeals and Complaints

10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract? Please provide details.

-institutional status: whether challenges are heard by an administrative tribunal, a court or any other review body;

-time limits for complaints or appeal;

-type of remedy, if any, that may be granted.

The Law No. 8666/93 foresees the possibility of administrative appeals against acts within the process of evaluating bids. Besides •appeals• there are also •representations•, and •solicitation for reconsideration•.

Article 109 of the cited law defines it in the following way:

•I- Appeals, within a limit of 5 (five) days counting from the summons of the act or the drafting of the act, in cases of:

a)qualification or disqualification of the bidder;

b)judgement of proposals;

c)annulment or cancelation of the bidding;

d)rejection of a request for enrolment in a registry, its alteration or cancelation;

e)cancelation of contract, that which is referred to in Clause I of Article 79 of this law;

f)application of the penalty of notification, temporary suspension, or fine;

II - representation, within the limit of 5 (five) working days from the citation of the decision related to the object of bidding or of the contract, of which there is no hierarchical appeal possible;

III - Request for reconsideration, a decision of the Minister of State, or State or Municipal Secretary, depending on the case, when Paragraph 4 of Article 87 of this Law applies, within ten working days of the summons of the act.

Paragraph 1 - The summons for the acts referred to in clause I, lines a, b, c, and e, of this Article, excluding those of notification and penalty for delay, and in Clause 111 shall be made by publication in the Official Gazette, except for the cases foreseen in lines a and b of Clause I, if the proposals of the bidders are present at the act in which the decision was adopted, when it could be made by direct communication to the interested parties and drafted in the act.

Paragraph 2 - The appeal foreseen in lines a and b of Clause I of this Article shall have effect of suspension, the competent authority being able to suspend further appeal, if there is present sufficient motive and if in the public interest to interpose such.

Paragraph 3 - Interposed, the appeal shall be communicated to the other bidders, who can contest it within 5 (five) working days.

Paragraph 4 - The appeal shall be directed to superior authority, through the one who practised the appealed act, and which may be reconsidered within 5 (five) days, or within this same time, cause it to be sent up, duly instructed, which decision shall be made within 5 (five) working days under penalty of responsibility.

Paragraph 5 - No appeal, representation, or request for consideration shall be initiated or take its course unless the documents of the process are available for viewing by the interested parties.

Paragraph 6 - When referring to bid effected in the modality of invitation, the time limits established in Clauses I and II and in Paragraph 3 of this Article shall be 2 (two) working days.

Beyond the administrative forum, any bidder, or contracted individual, or business may represent themselves before the Accounts Tribune or before the organs who make up the System of Internal Control, against any possible irregularities arising during the case in process. (Paragraph 1 of Article 113 of the cited Law.)

Besides this, the Law provides that any citizen is a legitimate party to oppose a proclamation for a bid which is irregular, and that this should occur at least five days before the date marked for the opening of the qualifying envelopes, and that the administration should judge this and respond within 3 (three) working days.

II. ADHESION TO MULTILATERAL, REGIONAL AND/OR BILATERAL TREATIES

11. Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement? If so, please describe the relevant provisions.

No, they do not participate.

III. ECONOMIC IMPORTANCE OF THE ACQUISITION OF SERVICES

12.(a) Please provide statistics (if available) on the number and value of services procurements

- *on both an aggregate and sectoral basis;*
- *by origin of services and suppliers.*

In order to enhance the comparability of the data, use the classifications of service sectors utilized in the following document: MTN.GNS/W/120 (10.7.91) in an appropriate aggregation level.

No information available.

(b) Please provide statistics (if available) on the

- *share of services procurement in total procurement;*
- *share of procurement of each service in total domestic output of the service;*

- ***share of procurement of each service in total domestic consumption of the service.***

No information available.

Working Party on GATS Rules Original: English

COMMUNICATION FROM SWITZERLAND

Response to the Questionnaire on Government Procurement of Services

The following communication is being circulated at the request of Switzerland to Members of the Working Party on GATS Rules.

I. EXISTING PROCUREMENT REGIMES

Definition

1. *What is the definition of government procurement employed in completing this questionnaire?*

Government procurement is defined as purchases made by the federal, cantonal or local government as covered by federal, cantonal and local legislation, including purchases of goods, services and construction services. Government procurement also includes purchases of goods, services and construction services by public authorities or entities controlled by the federal, cantonal or local authorities as far they exercise an activity in the field of electricity, drinking water and transport.

Administrative structure

2. *How are government procurement activities administered? To what extent are procurement activities centralized? Please specify the identity of any central procurement agencies and their respective responsibilities.*

Government procurement is administered by different federal, cantonal or local entities in charge. On the federal level, procurement of goods is centralized following the principle that similar goods are procured by the same agency.

Laws and regulations in force

3.(a) Please specify the laws, regulations, rules, guidelines, decrees, decisions and other measures governing government procurement. What is the scope of their application? In particular, please describe any exemptions that exist. Please provide a brief summary of the content of each of these measures.

Legislation for Government Procurement on the federal level

Horizontal Legislation

· *Law on National Budget of 6 October 1989 (SR 611.0)*

· *Ordinance on National Budget of 11 June 1990 (SR 611.01)*

Scope:

Principles for managing the budget such as legality, urgency, efficiency and economy.

· *Federal Law (SR 725.11) of 8 March 1960 and Ordinance on National Highways of 18 December 1995.*

Scope:

Principles for government procurement are laid down. Furthermore the cantonal legislation is applicable. Although the cantons are competent in this domain, they need the approbation by the Swiss Federal Highways Office (which is supervising the construction of national highways) before a contract is awarded.

Specific Legislation

· *Federal Law on Government Procurement of 16 December 1994 (SR 172.056.1) and Section 2 of the Ordinance of 11 December 1995 (SR 172.065.11).*

Scope:

Procurement of goods (i.e. supplies), services and construction services mentioned in Appendix I, Annex 4 and Annex 5 of the GPA:

By federal agencies mentioned in Appendix I, Annex 1 of the GPA with a value above the following thresholds: supplies: 263 000 Sfr., services: 263 000 Sfr., construction services: 10 070 000 Sfr. Threshold for procurement by PTT-Automobilservices in carrying out passenger transportation in Switzerland: 806 000 Sfr.

Exemptions:

The law does not apply to: (exemptions according to Article XXIII of the GPA).

Content:

The law provides for the implementation of the provisions of the WTO Agreement on Government Procurement (GPA) at the federal level. In line with these provisions, it guarantees non-discriminatory access to public procurement markets for suppliers established in Switzerland and in the signatories of the GPA or in other countries, as far as they grant reciprocity. Procurement above the thresholds has to be published and procured in an open or selective procedure. The award is given to the economically most advantageous offer, specified by objective criteria already in the publication. It furthermore provides for the possibility to challenge a procurement before an independent body for every relevant part of the procurement procedure. A tenderer whose offer has been rejected may claim damages.

*·Ordinance on Government Procurement of 11 December 1995 (SR 172.065.11),
Section 3*

Scope:

Procurement of goods, services and construction services by federal agencies mentioned in Appendix I, Annex 1 of the GPA and PTT-Automobilservices not falling under the scope of the law because they are not attaining the thresholds or for other reasons. Procurement of goods, services and construction services by all parts of PTT and SBB (Swiss Railway Company) and the group of armament regardless of the value of the procurement.

Exemptions:

The ordinance does not apply to PTT-Automobilservices, SBB and the Federal Group of Armament, if procurement is related to goods and services supplied in competition with market participants on which the GPA does not apply.

Content:

The ordinance aims at full competition for the procurement of goods, services and construction services by setting clear rules on publications, opening and treatment of offers. These rules apply to foreign suppliers only if reciprocity is granted.

Legislation for procurement by cantonal and local agencies

·Inter-Cantonal Agreement on Public Procurement of 25 November 1994¹

¹Cantons which are not parties to the Inter-Cantonal Agreement on Public Procurement of 25 November 1994 are obliged to implement the provisions of the GPA autonomously.

Scope

- Public Procurement of goods, services mentioned in Appendix I, Annex 4 and construction services mentioned in Appendix I, Annex 5 of the GPA by (a) cantonal entities mentioned in Appendix I, Annex 2 of the GPA and public enterprises where he participates; (b) communities and other corporations under public law; (c) private or public entities which are active in the field of supply of water, transport and energy or in the telecommunications sector and which are controlled by cantonal or local agencies mentioned under (a) and (b); (d) other organisations covered by GPA or by other international agreements, (d) any procurement that is subsidised to 50 per cent or more by the Swiss Federal government or by entities mentioned under a) Thresholds: 403,000 Sfr. for goods and services, 10,070,000 Sfr. for construction services, 806,000 Sfr. for procurement in the field of supply of water, energy, and transport, and telecommunication.

Exemptions:

(Same exemptions as Article XXIII of the GPA and the Federal Law on Government Procurement)

Content:

The agreement implements the provisions of the WTO Agreement on Government Procurement (GPA) on the sub-federal level. In line with these provisions, it guarantees non-discriminatory access to public procurement markets, through non-discriminatory tendering procedures, by setting clear rules on publications, opening and treatment of offers. It furthermore provides for the possibility to challenge the award of a procurement at an independent cantonal body.

·*Law on the Establishment of a Swiss Common Market of 6 October 1995*

Scope:

Persons domiciled in Switzerland in pursuit of their commercial activities, shall have, all over the Swiss territory, equal access to the market. In particular the law aims at improving professional mobility within Switzerland, strengthening the competitiveness of the Swiss economy, supporting Cantons in their efforts to harmonize conditions for market access. Concerning public procurement, Article 5 states the principle of non-discrimination and the obligation of public tendering of procurement of a •certain significance•. The law provides a challenge procedure against any restrictions of the market access.

Public procurement by cantons and local authorities outside the scope of the legislation mentioned is governed by existing relevant cantonal and municipal legislation.

(b) Does the procurement regime distinguish between the procurement of goods and services? If so, then how is the application of rules determined in cases of joint procurement involving both goods and services?

No.

Procurement procedures applied

4.(a) What procedures are followed in the procurement process?

Procurement procedures could differ according to the openness of the invitations to tender. At least three broad categories of procedures are commonly distinguished: (i) public or open tendering procedures under which all interested parties may submit a tender; (ii) selective or restricted tender procedures under which participation is limited to a certain number of selected suppliers, and only these suppliers are invited to submit a tender; (iii) private contract or single tender in which the awarding authority contracts suppliers individually, and sometimes only a single supplier.

Public Procurement on Federal Level

·Procurements governed by the Federal Law and Ordinance on Government Procurement

The following procedures are foreseen:

- public or open tendering procedure under which all interested suppliers may submit a tender;
- selective or restricted tender procedures: Upon public invitation all interested suppliers may submit an application for participation. Participation is limited to a certain number of selected suppliers (at least 3), and these suppliers are invited to submit a tender;
- private contract or single tender under the conditions mentioned in the GPA.
- invitation procedure (no publication, direct invitation; if possible three suppliers have to be invited); this procedure only applies to procurement under Section 3 of the Ordinance on Government Procurement which does not exceed the GPA-threshold.

Public Procurement on cantonal and local level

·Procurements governed by the Inter-Cantonal Agreement on Public Procurement

The following procedures are foreseen:

- public or open tendering procedure under which all interested suppliers may submit a tender;
- selective or restricted tender procedures: Upon public invitation all interested suppliers may submit an application for participation. Participation is limited to a certain number of selected suppliers, and only these suppliers are invited to submit a tender;
- private contract or single tender;
- invitation procedure (no publication, direct invitation; if possible three suppliers have to be invited); this procedure only applies for procurement below the GPA-thresholds.

Public procurement by cantons and local authorities outside the scope of the legislation mentioned is governed by existing relevant cantonal and municipal legislation. Procedures chosen may vary.

(b) Under what circumstances are different procedures used? For instance, if the method used depends on the value of the procurement, the thresholds should be given.

·Procurements governed by the Federal Law on Government Procurement (subject to the GPA)

The procuring entity may either choose between public or selective tender procedure. The procedure of private contracting may only be used in line with the provisions set up by the GPA. In particular, one of the following conditions has to be fulfilled: a) No satisfying offers result in the open or selective procedure, b) for reasons of protection of intellectual property there is only one supplier possible, c) as a result of unforeseen circumstances the procurement becomes too urgent to organise an open or selective procedure, d) unforeseen circumstances making additional construction services necessary which cannot be separated from the initial order. The value of such additional procurement must not exceed half of the value of the initial order.

·Procurements governed by the ordinance on Government Procurement (not covered by the GPA)

Procedure	Threshold for supplies and services	Threshold for construction services
Private contracting	below Sfr. 50,000.-	below Sfr. 100,000.-
Invitation procedure	above Sfr. 50,000.-	above Sfr. 100,000.-
Open and selective procedure	above Sfr. 263,000.- SBB & PTT Sfr. 806,000.- PTT-Telecom Sfr. 1,209,000.-	above Sfr. 2 mio.

·Procurements governed by the Inter-Cantonal Agreement on Public Procurement

Same procedures as in Federal law. Same criteria for the use of private contracting.

(c) What are the time limits for submission of bids?

The time limits are in line with the provisions of the GPA. Minimum limits are:
1) public or open tendering procedure: 40 days after publication; 2) selective tendering procedures: for submission of applications for participation: 25 days after publication; for submission of bids: 40 days after invitation to submit.

Publicity for inviting tenders

5.(a) How are intended procurement publicised? Are invitations to tender published? If so, where, and in what languages?

·Procurement under the Federal Law of Government Procurement and under the Ordinance on Government Procurement:

Invitations and awards in public or selective procedure are to be published. No publication necessary in private contracting procedure. Publication in at least two (of the three) official languages (except for construction services, where at least publication in the official language of the site is required). In case there is publication in Italian and German only, a summary in French, English or Spanish is attached. Publication in *•Swiss Official Trade Gazette•* and any other publication media in line with international agreements.

·Procurement under the Inter-Cantonal Agreement on Public Procurement:

Invitation is published. Publication of public or selective tenders at least in *•the official cantonal publication•*. Publication in at least one official language (German, French or Italian). Publications in Italian or

German have to be accompanied by a summary in French, Spanish or English.

(b) Do the extent and form of publicity differ according to tendering procedures applied and/or on the value of procurement?

See under (a).

(c) What details of the intended procurement are normally published? Is there a minimum set of information that is required to be published? If so, please specify.

Details could include a description of service to be procured, tender opening and closing dates, conditions of participation, procuring entity, enquiry point, procurement plans, procurement outcomes - contract award notices, etc.

·Procurement under the Federal Law and Ordinance on Government Procurement

The following minimum set of information is required to be published: procuring entity (name, address), description of the service to be procured, delivering place and time, conditions of participation (economic and technical conditions and required financial guarantees), place and time for submission of the tender, language used in the procurement procedure, the address where to get tender documentation and the amount payable for this documentation, awarding criteria (if there is no tender documentation) whether the entity intends to make negotiations, indication on whether the procurement falls under the provisions of the GPA.

Summary in English, French or Spanish contains the following information: the service to be procured, time limits for submission of applications for participation or for submission of bids, enquiry point.

·Procurement under the Inter-Cantonal Agreement on Public Procurement

Equivalent minimum set of information required as under the federal law, following the obligations of the GPA.

If the publication is not in French, a summary in French has to contain the following information: the service to be procured, time limits for submission of applications for participation or for submission of bids, enquiry points.

(d) Are there any charges for obtaining the full set of tender documents? If so, please specify and describe how these charges are set?

There may be charges for obtaining the full set of tender documents. These charges may not exceed costs.

(e) Are electronic means used to advertise procurement opportunities? What is the nature of systems that are in place? Are different tendering provisions applied to contracts advertised in this manner? If so, please describe.

Three Swiss entities participate in the project of the European Community called SIMAP on a voluntary basis.

Requirements laid down for possible suppliers

6.(a) Are there registration, residence or other requirements for potential suppliers?

· Procurement under the Federal Law on Government Procurement and the Ordinance on Government on Procurement

The law is applicable to tenders of suppliers from a) member countries of the GPA, as far as these countries grant reciprocity, b) other countries, as far as there exist contracture arrangements, or the Federal Council has acknowledged reciprocal treatment of Swiss suppliers in these countries. Residence in Switzerland is not required. For procurement not falling under the GPA or an international agreement, the access to the Swiss market may be granted only if reciprocal treatment to Swiss suppliers is guaranteed.

· Procurement under the Inter-Cantonal Agreement on Public Procurement

The agreement is applicable to tenders of suppliers resident in: a) a canton being member of the agreement; b) a member country of the GPA, as far as this country grants reciprocity; c) an other country, if contractual arrangements exist.

(b) What is the nature of any conditions for participation required from suppliers - such as financial guarantees, commercial standing and technical qualifications? Do the conditions of participation vary according to the nature of the tender process and/or the value of the intended procurement?

· Procurement under the Federal Law on Government Procurement and the Ordinance on Government Procurement

The procuring entity may require evidence regarding financial guarantees, professional and technical qualifications, extract from penal register, etc.

In addition, tenderers have to comply with working conditions and working protection regulation (if no General Employment Contract exists, local conditions are relevant), equal treatment of men and women concerning salaries.

·Procurement under the Inter-Cantonal Agreement on Government Procurement

Objective qualification criteria apply to financial, economic, professional, technical and organisational capacity.

In addition tenderers have to comply with working conditions and working protection regulation (if no General Employment Contract exists, local conditions are relevant), equal treatment of men and women.

(c) Do there exist lists of approved suppliers? If so, what are the procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists? Are lists of approved suppliers, if any, regularly reviewed/updated?

·Federal Law on Government Procurement

Yes, there exist lists of approved suppliers. Procurement entities may put up an examination system. Qualifying criteria have to be published annually together with the list. Suppliers may apply for admission to the list at any time. If the procuring entity refuses to accept a supplier on the list, it has to deliver a contestable decision. It is possible to challenge this decision before an independent body.

·Inter-Cantonal Agreement on Public Procurement

Lists have to be published annually as well as conditions for admission and methods of examination and period of validity. If the list remains valid for three years or less, one publication at the beginning of this period is sufficient. Suppliers may apply for admission to the list at any time. If the procuring entity refuses to accept a supplier on the list, it has to deliver a contestable decision.

Criteria for assessing bids and awarding contracts

7.(a) What criteria are taken into account in the award of tenders? Are criteria for award of contracts made available in advance to potential suppliers?

For instance, whether obtaining the best value for money spent is the aim and whether criteria other than price are taken into account.

Best value for money spent. To measure the value of an offer, criteria as delivery dates, quality, price, efficiency, overhead expenses, service to clients, environmental impact are considered. Criteria taken into account awarding tenders have to be published in advance. For standardized goods the award can be based on the lowest price only.

(b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?

No.

(c) *Is preference given to any particular enterprises or group of enterprises? If so, please specify.*

No.

(d) *Do the procurement criteria differ according to sector or region of the economy?*

No.

(e) *What is the margin of choice or discretion allowed to the purchasing authority? What does the extent, if any, of discretion allowed depend upon?*

The margin of choice or discretion could relate to (i) the relative weight/importance of each contract award criteria; (ii) margins of preference, if any, in respect of specific criteria; and (iii) threshold values, if any, above which referral to a higher level of purchasing authority is required.

The discretion allowed to the purchasing authority could vary according to whether there is (i) automatic tender, where the contract is awarded on the basis of predetermined criteria, either the simple criteria of price, or price and other criteria; (ii) discretionary tender procedures which involve acceptance of the bid which is most advantageous - the award of the contract is based on several criteria, some of which are predetermined, but which in general leave the awarding authority a certain measure of choice; and (iii) negotiated tender in which the awarding authority negotiates freely with the potential supplier or suppliers as to the conditions of the contract.

Within the scope of the Federal Law and the Ordinance and the Inter-Cantonal Agreement, no such margin of discretion is provided.

Disclosure of bids received and contracts awarded

8.(a) *How are tenders received, registered and opened?*

·Procurement under the Federal Law on Government Procurement

At least two representatives of the procuring entity register and open the tenders. In the case of procurement of construction services, the opening procedure has to be taken down. The record includes at least the following information: names of persons attending the opening procedure, names of tenderers, submission dates of offers, prices offered, variety of offers.

·Procurement under the Inter-Cantonal Agreement on Public Procurement

At least two representatives of the procuring entity open the offers. The opening procedure has to be taken down. The record includes at least the

following information: names of persons attending the opening procedure, names of tenderers, submission of dates of offers, prices offered. All tenderers have the right to examine the records.

(b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?

· Procurement under the Federal Law on Government Procurement

The procuring entity shall publish not later than 72 days after the award was given the following information: type of procedure, the nature and quantity of products or services procured, name and address of the procuring entity, date of award, name and address of the winning tenderer, price of the winning award or the highest and lowest offer taken into account in the award of the contract.

· Procurement under the Inter-Cantonal Agreement on Public Procurement

Same as above.

(c) Are entities required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected?

· Procurement under the Federal Law on Government Procurement

The procuring entity has to provide to the bidder the reasons why his tender was not selected. At least upon request, the procuring entity has to provide him promptly the following information: the type of procedure used, name of the winning tenderer, the price of the winning award or the highest and lowest offer taken into account in the award of the contract, the main reasons why the tender of the unsuccessful tenderer in question was not selected, the characteristics and relative advantages of the tender selected.

However, a procuring entity may decide that certain information on the contract award be withheld where release of such information would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interest of particular enterprises, public or private, or might prejudice fair competition between suppliers.

· Procurement under the Inter-Cantonal Agreement on Public Procurement

Upon request the procuring entity has to provide unsuccessful bidders the main reasons why their tender was not selected.

Treatment granted to domestic and foreign services and/or suppliers

9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or accord services and/or suppliers of a Member more favourable treatment than those of another Member? Please specify how, if at all, more favourable treatment is accorded. Please also specify the working definition of 'domestic' in relation to domestic services and suppliers.

Procurement under the Federal Law and Ordinance on Government Procurement

To the extent that reciprocity is granted domestic and foreign suppliers are treated equally.

Exception: for procurement in the framework of NEAT (*Neue Alpentransversale*, i.e. procurement in the context with the Federal Decision of 4 October 1991) all foreign and domestic suppliers are treated equally regardless of reciprocity.

Procurement under the Inter-Cantonal Agreement on Public Procurement

The provisions of the Agreement equally apply to domestic and to foreign suppliers to the extent that regulation on government procurement in the foreign home market treats Swiss enterprises in a way comparable to Swiss Regulation on Government Procurement.

Procedures for hearing and reviewing complaints/appeals

10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract? Please provide details.

Details could include:

-institutional status: whether challenges are heard by an administrative tribunal, a court or any other review body;

Federal level: Against decisions concerning a procurement falling under the scope of the Federal Law, complaint/appeal can be made to the *Federal Commission for Appeal*. This Commission is an independent authority which takes a final decision to the case.

Cantonal level: Cantonal authority (in most cases: administrative court).

-time limits for complaints/appeal;

Federal level: 20 days from publication of decision.

Cantonal level: 10 days from publication of decision

-type of remedy, if any, that may be granted.

Federal level: The Commission can take procedural decisions e.g. take precaution measures, such as giving suspensive effect to a complaint. It decides itself on the case or reverts the case for decision with binding recommendations to the contracting entity. If a contract has been already concluded, the award cannot be revoked and the Commission for appeal can only state that federal law has been violated. In case of financial damage, only expenses caused by the tender and the behaviour of the procuring entity are being reimbursed.

Cantonal level: Remedy equivalent to federal level.

II. MEMBERSHIP OF PLURILATERAL, REGIONAL AND/OR BILATERAL AGREEMENTS

11. Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement? If so, please describe the relevant provisions.

- Agreement on Government Procurement of 15 April 1994 (Marrakesh)

- Agreement on Government Procurement of 12 April 1979 (Tokyo)

III. ECONOMIC IMPORTANCE OF SERVICES PROCUREMENT

12.(a) Please provide statistics (if available) on the number and value of services procurement

- ***on both an aggregate and sectoral basis;***

Statistics not available.

- ***by origin of services and suppliers.***

Statistics not available.

In order to enhance the comparability of data provided, Members may choose to provide statistics according to the services sectoral classification in document MTN.GNS/W/120 (dated 10 July 1991) at the appropriate level of aggregation.

(b) Please provide statistics (if available) on:

- ***the share of services procurement in total procurement:***

1995: supplies approx. 8 100 million Sfr.; services approx. 450 million Sfr.

- ***the share of procurement of each service in total domestic output of the service:***

Unknown

- *share of procurement of each service in total domestic consumption of the service:*

Unknown

Total domestic consumption is defined as the sum of public and private consumption or the sum of domestic output and net imports (i.e. imports minus exports) of the service in question.

Working Party on GATS Rules

COMMUNICATION FROM NORWAY

Questionnaire on Government Procurement of Services

The following communication is being circulated at the request of Norway to Members of the Working Party on GATS Rules.

I. EXISTING PROCUREMENT REGIMES

Definition

1. Written contracts for pecuniary interest involving purchase, with or without options between a supplier and a public contracting entity.

All central, regional and local authorities are subject to procurement regulations concerning procurements above certain threshold values, as are entities operating in the utilities sector; energy-supply, water-supply, transport and telecommunications. As regards procurement of services, only 16 out of 27 categories of services are subject to all the obligations in the Service procurement regulation.

Administrative structure

2. How are government procurement activities administrated?

This varies according to the type of procurement and the contracting authority in charge of the procurement. Often the responsible officials in procuring entities are subject to approval by the governing board. Generally most procurements are decentralised. There are approximately 20 000 persons who procure for the state. Most of these undertake small and seldom purchases. We do not know how many persons take part in procurement activities at the regional level or in the utilities sector.

To what extent are procurement activities centralised?

Traditionally procurement has been undertaken near the end users of a service or product. In the recent years economic awareness and budget restrictions have lead to an increased centralisation of procurement, especially in municipalities and counties. Many towns and large municipalities have reorganised their procurement activities and have employed specialised procurement officers in order to make procurement more cost effective. At present the central government is in charge of a 3-year programme for increasing the efficiency of public procurement. Some major state entities conduct highly centralised procurement, such as the Directorate for public construction and property and the National Roads Directorate.

Central procurement agencies and their respective responsibilities

The Directorate of public construction and property is the single most important public body for the procurement of construction works. The directorate is responsible for constructing buildings for state entities, for universities, museums and other public bodies. The directorate is also responsible for letting premises for government bodies and for maintaining these premises. In the defence sector, the Norwegian defence construction service is responsible for constructing new buildings and for maintaining existing property.

Concerning procurement of other types of services, these are of much less economic importance than construction services, and there is no single public body that procures the majority of such services. These services are procured by different municipalities, counties and government bodies.

Laws and regulations in force

3.(a) Please specify the laws, regulations, rules, guidelines, decrees, decisions and other measures governing government procurement.

The Act of Public Procurement was adopted by Parliament on 27 November 1992. On the basis of this Act, government regulations transforming EEA (European Economic Area) directives on public procurement into Norwegian legislation became effective as the EEA Agreement entered into force on 1 January 1994. The EEA consists of the 15 EC members and the EFTA countries Norway, Iceland and Liechtenstein. On 1 January 1994 the Supplies directive (76/62/EEC) and the Works directive (71/305/EEC)

entered into force in Norway. On 1 July 1994, the Services directive (92/50/EEC) entered into force. The Utilities directive (93/38/EEC) entered into force on 1 January 1995. Norway has implemented all EEA directives on public procurement.

Norway is also a signatory to the GATT Agreement on Government Procurement, as well as the WTO Agreement on Government Procurement (GPA). The Act on Public procurement has been slightly amended to comply with the GPA.

Procurement - in principle all supplies, services and works contracts above certain threshold values - is effected under open, restricted or negotiated procedures. Negotiated tenders are only to apply in exceptional circumstances in the so called classical sector, whereas in the utilities sector, negotiations can be used freely after a call for competition has been published.

Concerning procurement below the EC/GPA threshold values, state entities are regulated by a Government Regulation on public procurement (REFSA.Regelverket for Statens anskaffelsesvirksomhet), which also covers procurement of services. This regulation was initially approved by Government on 17 March 1978, but has been amended 9 times, last time in 1994.

In the classical sector the threshold value for state entities will be 1,1 million NOK in 1996 and 1997, for regional bodies 1,65 million NOK and for the utilities sector 3,3 million NOK. In the telecommunication sector the threshold is 4,95 million NOK. All figures are excl. V.A.T.

Regarding public procurement below the threshold values in municipalities and counties, many local authorities have, on a voluntary basis, implemented Guidelines for municipal procurement (Normalinstruks for kommunal anskaffelsesvirksomhet). These guidelines are very similar to REFSA.

(b) Does the procurement regime distinguish between the procurement of goods and services, and how are the rules to be applied in cases of joint procurement involving both goods and services?

Norway has one regulation for the procurement of goods, one regulation for the procurement of services and one for the procurement of constructions and construction works. The threshold values for service contracts and for goods contracts are the same. The threshold for construction works is much higher. If an entity wishes to purchase something which is partly a service and partly a supply contract, the contract shall be regarded as a supply contract if the value of the goods exceeds the value of the service involved and vice versa. In order to be covered by the works regulation, the service has to bear the character of a works contract, i.e. concern work on buildings and similar. Services are the residual category, i.e. a contract that is neither a supply nor a works contract is deemed to be a service contract.

Procurement procedures applied

4.(a) What procedures are followed in the procurement process?

Pursuant to the EEA rules, contracting entities may choose between open tendering procedures, selective tendering procedures and reject competitions. In some exceptional cases negotiations may be conducted. In the utilities sector, negotiated procedures can always be used after the publication of calls for competition.

(b) What tendering procedures are applied?

Whether a contracting authority uses an open procedure, a selective procedure or a project competition depends on the type of service which is to be procured and the preferences of the authority. If evaluation of the tenders would be very time consuming, it can be practical for the entities to use selective procedure to ensure that the time spent on evaluation is limited. If there are tenders for basic goods that are easy to compare and for instance are awarded according to price only, it may be more convenient to use an open procedure.

(c) What are the time limits for submission of bids?

The time limits are the following:

Open procedure: 52 days from the date the tender notice was sent, i.e. at least 40 days from the day it was published in the Official Journal to the European Communities.

Selective procedure: 37 • 40 days

Negotiations: 37 days

Contract award notices: 48 days

Publicity for inviting tenders

5.(a) How are procurements publicised?

Due to the EEA-Agreement, all procurement above the EU/WTO-threshold levels must be publicised in English in the Official Journal to the European Communities. In Norway there is an official gazette - Norsk Lysningsblad - where notices for public procurement are publicised in Norwegian. It is compulsory for state entities to publicise notices in this gazette. Municipalities and counties can publicise notices in this gazette on a voluntary basis. The Ministry of Industry and Energy encourages regional and local entities to publicise notices in Norsk Lysningsblad. Calls for

tenders below the threshold values are usually publicised in newspapers or suppliers are invited on an individual basis to submit tenders.

(b) Do the extent and form of publicity differ according to tendering procedures applied and/or on the value of procurement?

Yes, notices in the Official Journal are usually only published for procurements above the threshold values. As stated in 5(a), notices for procurements below the threshold values are usually publicised in local, regional or national newspapers.

Tenders are awarded either on basis of lowest price or the economic most advantageous tender. Concerning the latter, different evaluation criteria must be specified in the tender documentation. Usually tenders are awarded based on price only when there are non-complex and homogeneous services/products, whereas it is more common to award according to the economic most advantageous bid when what is to be procured is complex and difficult to specify.

State entities can, according to the REFSA-regulation, use negotiated procedure for service procurement under the GPA threshold value when it is extremely difficult to specify the tender documentation to such an extent that bids can be compared.

(c) What details of the intended procurement are normally published?

According to the regulations, the contract notice for open procedures must contain the following information:

- i) Name, address, telephone, telex and fax number of the contracting authority.
- ii) Category of service and description. CPC reference number(s).
- iii) Place of delivery.
- iv) (a) Indication of whether the execution of the service is reserved by law, regulation or administrative provision to a particular profession.
(b) Reference of the law, regulation and administrative provision.
(c) Indication of whether legal persons should indicate the names and professional qualifications of the staff to be responsible for the execution of the service.
- v) Indication of whether service providers can tender for a part of the services concerned.
- vi) Where applicable, non-acceptance of variants.
- vii) Duration of contract or time limit for completion of the service.
- viii) (a) Name and address of the service from which the necessary documents may be requested.
(b) Final date for making such requests.
(c) Where applicable, the amount and terms of payment of any sum payable for such documents.
- ix) (a) Persons authorised to be present at the opening of tenders.

(b) Date, time and place of the opening.

x) Where applicable, any deposits and guarantees required.

xi) Main terms concerning financing and payment and/or references to the relevant provisions.

xii) Where applicable, the legal form to be taken by the grouping of service providers winning the contract.

xiii) Information concerning the service provider's own position, and information and formalities necessary for an appraisal of the minimum and technical standards required of him.

xiv) Period during which the tenderer is bound to keep open his tender.

xv) Criteria for the award of the contract and, if possible, their order of importance.

Criteria other than that of the lowest price shall be mentioned if they do not appear in the contract documents.

xvi) Other information.

xvii) Date of dispatch of the notice.

xviii) Date of receipt of the notice by the Office for Official Publications of the European Communities.

(d) *Are there any charges for obtaining the full set of tender documentation?*

Contracting entities may according to • 20 No. 8 (c) (see point 5c) charge payment for sending suppliers the tender documentation. This is normally not done in Norway.

(e) *Are electronic means used to advertise procurement opportunities?*

There are some pilot projects in Norway regarding electronic tendering and electronic use of framework contracts. At present these projects are not fully operational. All Norwegian tenders above the WTO/EC threshold values are publicised in the database Tenders Electronic Daily (TED) in Luxembourg, which is the electronic version of the Official Journal to the European Communities. Suppliers can search for tenders electronically through TED.

Requirements laid down for possible suppliers

6.(a) *Are there registration, residence or other requirements for potential suppliers?*

There are no registration systems for potential suppliers. In the utilities sector contracting entities may use lists of qualified suppliers.

There are no residence requirements for service contracts in Norway.

(b) *What is the nature of any conditions for participation required from suppliers such as financial guarantees, commercial standing and technical qualifications?*

All contracting state entities require a tax declaration from suppliers. This declaration is to show whether the supplier has fulfilled all his tax obligations. According to • 8 No. 13 in the Service regulation it is also possible to ask for information concerning a service provider's own position. Contracting authorities often opt to require such documentation when undertaking complex or economic significant procurements.

(c) Do there exist lists of approved suppliers?

As mentioned under 6(a) lists of qualified suppliers are only to be used in the utilities sector. In the classical sector state entities generally publish calls for competition for procurements exceeding 150 000 NOK. Some municipalities have not implemented guidelines for procurement, and these are more free to use lists of suppliers for procurements below the EC/GPA threshold values. In some cases, tenders are publicised and potential suppliers are informed about the tender notices in order to ensure that these supplies will bid.

Criteria for assessing bids and awarding contracts

7.(a) What criteria are taken into account in the award of tenders?

As already mentioned, contracts are awarded either on the basis of lowest price or the so called economic most advantageous tender. The latter shall be based on an evaluation of criteria such as price, quality, technical value, aesthetic and functional aspects, service and technical assistance, date of delivery et cetera. If a contracting authority is to base a contract on the economic most advantageous tender, it must state the evaluation criteria either in the tender notice or in the tender documents.

(b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?

No, apart from defence procurement.

(c) Is preference given to any particular enterprises or group of enterprises?

No.

(d) Do the procurement criteria differ according to sector or region of the economy?

No.

(e) What is the margin of choice or discretion allowed to the purchasing authority?

They generally stand quite free in applying the criteria mentioned above.

Disclosure of bids received and contracts awarded*8.(a) How are tenders received, registered and opened?*

The date, time and place of opening must be published in the tender notice - see 5(c). It shall also be stated in the notice what persons are authorised to be present at the opening. Tenders are kept in closed envelopes by the persons in charge of the procurement until they are publicly opened. A tender protocol is set up at the opening, and at least two persons sign it as official witnesses.

(b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?

Entities are required to publicise within 48 days after contract award in the Official Journal of the European Communities what supplier won the contract. Each supplier shall on written request from an unsuccessful tenderer provide pertinent information concerning the reasons why its tender was not selected and on the characteristics and relative advantages of the tender selected as well as the name of the winning tenderer.

Treatment granted to domestic and foreign services and/or suppliers*9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or award services and/or suppliers of a Member more favourable treatment than those of another Member?*

All service providers from the EEA countries and Norwegian suppliers are treated equally favourable. As regards service suppliers from the WTO/GPA - countries, these are treated as favourable as domestic service suppliers if their respective countries accord Norwegian tenderers the same rights. The latter is result of the bilateral nature of the GPA and the system of coverage lists.

Procedures for hearing and reviewing complaints/appeals*10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract?*

The Public Procurement Act provides for effective legal remedies in public procurement matter, and complaints about formal faults in a tendering procedure may be brought before the Norwegian Courts of Justice. Before it comes to this, any supplier from an EEA - or WTO/GPA - country who claims to be unfairly treated by a Norwegian contracting entity is first of all encouraged to take up the matter with the entity concerned directly. If this does not give any results, the former procedure is to bring any action against the contracting entity before the competent national Court of Justice. Service providers can both ask for interim measures in order to stop the alleged breach of the regulations, ask for the procedure to be annulled and restarted, ask for discriminatory clauses in tender documents to be changed or eliminated as well as sue for damages incurred in connection with participating in the competition for the contract in question. In cases concerning central government entities, local and regional authorities, a Norwegian Court of Justice may take interim measures that stop an ongoing procurement procedure before the contract has been awarded. In the utilities sector, procurement procedures cannot be stopped during the process, but the court may fine contracting entities who are found guilty in breaking the rules, and adjudge indemnities to the complaining enterprises.

Suppliers from Norway, Liechtenstein and Iceland have an additional possibility of launching complaints through the EFTA Surveillance Authority (ESA) in Brussels. The formal infringement procedure in ESA is divided into 5 stages; 1. Complain, 2. Formal notice, 3. Reasoned opinion, 4. Referred to the EFTA Court of Justice and 5. Court decision. There have been some complaints about infringements from Norwegian suppliers, mostly related to procurements undertaken by municipalities. Some of these have resulted in Formal notices, but so far solutions to all cases have been found without referring the cases to the EFTA Court.

II. MEMBERSHIP OF PLURILATERAL, REGIONAL AND/OR BILATERAL AGREEMENTS

11. *Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement?*

Norway is part of the European Communities• Single market for public procurement under the terms of the European Economic Area treaty.

Norway is also a signatory to the GATT Agreement on Government Procurement, as well as the WTO -Agreement on Government Procurement.

III. ECONOMIC IMPORTANCE OF SERVICES PROCUREMENT

12.(a) *Statistics on the number and value of services procurement*

Construction works

Construction works are classified as services in GATS. In Norway there is a separate Government regulation on procurement of construction works and constructions which corresponds to EC Directive 93/37/EEC.

The majority of state constructions are undertaken by the Directorate of public construction and property. The directorate is responsible for constructing and maintaining public buildings and for letting property to public bodies. At the end of 1994 the directorate was in charge of 34 ongoing construction projects that amounted to approximately 5,8 billion NOK.

The Defence Building Service is responsible for all construction works in the defence sector. In 1994 the Defence Building Service was responsible for construction projects of a total value of 1,3 billion NOK.

The value of many of the construction works undertaken by both the Directorate of public construction and property and the Defence construction service was below the threshold EC/GPA value and tenders for these contract awards were not publicised in the Official Journal.

Concerning construction works in the municipalities and counties, statistics based on published contract awards in the Official Journal show that the regional authorities awarded construction work contracts for 91 million NOD in 1994. The figure for regional construction works in 1995 is expected to be higher.

The contract awards in the Official Journal showed that any one of the construction projects was awarded to a foreign (Finnish) supplier.

Other Services

In Norway, the service directive (92/50 EEC) entered into force on July 1st 1994. All procurement of services above the 200 000 ECU threshold must be published in the Official Journal of the European Communities. Contract awards must also be published.

We have statistics of contract awards for services for the period 1.7.94 - 31.12.94. The statistics show that there were 10 contract awards concerning contract above the threshold value in this period, which amounted to a total of 75 million NOK. All the suppliers of these contracts were Norwegian companies. The figures for 1995 are expected to be significantly higher.

(b) Share of services procurement in total procurement

The Norwegian procurement statistics for 1994, which mainly are based on contract award notices in TED, show that the total number of contract awards for 1994 was 260. 76 of these contracts were works contracts and 10 service contracts. The value of the works contracts amounted to 30% of the value of all contracts whereas the value of the 10 service contracts constituted 2,5% of the value of all contracts for 1994.

Working Party on GATS Rules

LIMITATIONS IN MEMBERS' SCHEDULES RELATING TO SUBSIDIES

Note by the Secretariat

1) At its meeting on 28 March 1996, the Working Party on GATS Rules requested the Secretariat to extract entries in Members' schedules that provided for limitations on market access and national treatment in relation to subsidies. The attached tabulation presents the results of this exercise.

2) Two points may be made about the tabulation. First, the information contained in the table is not complete. Only those entries that made explicit reference to subsidies, grants, financial support, aid or assistance were included in the listing of measures. Many other entries that were less explicit may well involve subsidization, depending in some cases upon the definition of the term "subsidization". Second, subsidies may also be granted in cases where sectors or activities have been excluded from Members' schedules of specific commitments, or where a particular mode of supply has not been bound with respect to market access and/or national treatment.

Working Party on GATS Rules

PROVISIONS ON SUBSIDIES RELATING TO TRADE IN SERVICES
IN REGIONAL TRADE AGREEMENTS

Note by the Secretariat

Background

1) At its meeting on 28 March 1996, the Working Party on GATS Rules requested the Secretariat to prepare a note describing subsidy provisions relating to trade in services that already existed in regional trade agreements. Some 137 regional arrangements have been notified to the GATT/WTO under Article XXIV, and a further 15 under the Enabling Clause. Relatively few of these agreements contain provisions specific to trade in services, and even fewer deal with subsidy practices or remedies against subsidies. Among the Agreements reviewed, the following contained explicit provisions on subsidies and remedies in the area of services: The Protocol on Trade in Services to the Australia-New Zealand Closer Economic Relations Trade Agreement, the EC Treaty, the Europe Agreements, the European Economic Area Agreement, and the Customs Union between the Czech Republic and the Slovak Republic. Many other regional arrangements have general provisions relating to subsidies and remedies against subsidies, but these provisions are phrased in a manner that makes it difficult to argue that they might apply to trade in services, even though the agreements in question cover trade in services.

Relevant provisions

2) The Protocol on Trade in Services to the Australia-New Zealand Closer Economic Relations Trade Agreement (ANZCERTA). This Protocol envisages explicit obligations for new or expanded service subsidies. Article 11 of the Protocol states that •Member States shall not introduce new, or expand existing, export subsidies, export incentives and other assistance measures having a direct distorting effect on trade between them in services and shall work towards the elimination of any such measures by 30 June 1990.• These obligations are enforceable through the consultation (dispute settlement) provisions contained in Article 19 of the Protocol, and no specific remedy akin to a countervailing measure is contemplated within the framework of the ANZCERTA Services Protocol.

3) *The EC Treaty. Article 92 of the EC Treaty may be applicable to internal subsidies in the area of services. Article 92 states that unless otherwise provided, any aid granted by a Member State or through State resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the common market. As in the case of ANZCERTA, no mechanism exists for countervailing state aids. Rather, Article 93 provides the Commission with the authority to instruct the Member State concerned to abolish or alter a state aid. If the State concerned does not comply with this decision within the prescribed time, the Commission or any other interested State may, in derogation from the provisions of Articles 169 and 170, refer the matter to the Court of Justice directly. It may be noted that Article 92 has been applied in certain service sectors, including air transport and banking.*

4) *The Europe Agreements. Many of the free-trade agreements between the EC and East-European countries contain a provision, similar to that of Article 90 of the EC Treaty, prohibiting aids which may distort competition, and providing the injured party with a right to impose trade measures at the border. For instance, paragraph 1 of Article 33 of the Agreement with Hungary states that any public aid which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods is incompatible with the proper functioning of the Agreement. The Agreement envisages the establishment within three years of its entry into force of rules to implement provisions relating to state aids. In the meanwhile, the relevant national legislation is to apply in the event that measures are taken which are incompatible with Article 33 of the Agreement. If the Community or Hungary considers that a particular practice is incompatible with the terms of paragraph 1 of Article 33, the party concerned may, in prescribed circumstances, take appropriate measures which must be compatible with GATT or any other relevant instrument negotiated under its auspices which are applicable between the Parties. Since no rules exist yet in relation to measures that might be imposed against distorting subsidies in services, it may be safely argued that there is no question of incompatibility with international rules at the present time.*

5) *The European Economic Area (EEA) Agreement . Article 61 of the EEA Agreement states that unless otherwise provided, any aid granted by EC Member States,*

*EFTA
States or
through
State
resources
in any
form
whatsoever
which
distorts or
threatens
to distort
competition
by
favouring
certain
undertakings
or the
production
of certain
goods
shall, in so
far as it
affects
trade
between
contracting
parties,
be
incompatible
with
the
functioning
of this
Agreement
. • In the
event that
either
party to
the
Agreement
considers
that the
other is
applying
incompatible
measures,
the*

*provisions
of Article
64 will
apply.
These are
as follows:*

- 1. If one of the surveillance authorities considers that the implementation by the other surveillance authority of Article 61 is not in conformity with the maintenance of equal conditions of competition within the territory covered by this Agreement, exchange of views shall be held within two weeks*

If a commonly agreed solution has not been found by the end of this two-week period, the competent authority of the affected Contracting Party may immediately adopt appropriate interim measures in order to remedy the resulting distortion of competition.

Consultations shall then be held in the EEA Joint Committee with a view to finding a commonly acceptable solution.

If within three months the EEA Joint Committee has not been able to find such a solution, and if the practice in question causes or threatens to cause distortion of competition affecting trade between the Contracting Parties, the Interim measures may be replaced by definitive measures, strictly necessary to offset the effect of such distortion. Priority shall be given to such measures that will least disturb the functioning of the EEA.

- 6) Agreement between the Czech Republic and the Slovak Republic. This Agreement contains a provision for national treatment in the area of services and a separate section on aids (subsidies). Because of the broadness of the language concerning aids, one might argue that countervailing measures could be applied against subsidies in services. Article 19 of the Agreement states that •any aid granted by a Contracting Party or through state resources in any form whatsoever which distorts or threatens to distort economic competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between the Contracting Parties, be incompatible with the proper functioning of this Agreement.• The Agreement also establishes an Arbitration Commission responsible for settling disputes.*

Conclusions

- 7) It is clear from the above that relatively little has been done in regional agreements and arrangements as far as rule-making on subsidies in relation to trade in services is concerned. No examples were found of agreements that contemplate countervailing action against services traded with the benefit of a subsidy. Rather, a dispute settlement-related approach seems to be preferred, combined with substantive disciplines on the use of subsidies.*

Working Party on GATS Rules

COMMUNICATION FROM CHILE

The Subsidies Issue

The following communication is circulated at the request of Chile to members of the Working Party on GATS Rules.

The purpose of this document is to provide input for the analysis and discussion that the Working Party on GATS Rules is to begin at its next meeting. It contains initial thoughts on the problem of subsidies in the context of trade in services, which will certainly evolve as further contributions are made on the subject within this Group.

I. Subsidies in trade in services

Subsidies in the services sector may have distorting effects on the flows of international trade in services (as well as goods, directly and indirectly), including the possible nullification or impairment of concessions.

The possible distorting effects of subsidies on trade in services may take at least three forms: firstly, they may harm the competitiveness of foreign services or foreign service suppliers in the domestic or local market. Secondly, they may impair or nullify the competitiveness of national services or national service suppliers in other markets. Lastly, subsidy policies may affect the decisions of service suppliers as to the mode of supply by which they wish to provide a service.

II. Nature of subsidies in services

The study of these subjects requires a major analytical effort. In particular, we must try to get away from trade in goods and look at the reality of trade in services.

Subsidies in the services sector do not exclusively take the form of a direct or indirect financial contribution by a government or public body, as in the definition given in the Agreement on Subsidies and Countervailing Measures. For example, they may be embodied in incentives to commercial presence contained in legislation on direct foreign investment.

We also find monopoly rights or restrictive trade practices that afford an artificial advantage facilitating exports of services at •subsidized• prices as a result of the ability to discriminate in pricing on the domestic and on the foreign markets: it would therefore be necessary to elaborate or broaden the definition of a subsidy in the case of services.

It must be recognized that some subsidies are not necessarily aimed at fostering trade in services or obtaining a competitive advantage that would not otherwise exist. For example, they may be designed to attain various goals in such areas as social advancement, acquisition of technological capacity, or even security.

Social programmes in general, and educational incentives in particular, which seek to provide more equal opportunity to the more disadvantaged sectors, are another example of the above. Nevertheless, something that is a fundamental instrument for economic development might represent, for example, an indirect incentive to the export of professional services, even though that is not its aim: this kind of subject matter should be clearly excluded from the scope of the GATS. For this purpose an illustrative list of permitted subsidies could be drawn up: subsidies linked to social programmes for which ample international experience exists.

There is another category of subsidies in the services sector that seeks to correct market imperfections. This is the case, for example, of imperfections arising out of market shortcomings, the existence of high transaction costs caused by difficulties of access and information requirements (as in the case of penetration of new markets), or owing to the existence of indivisibilities in investment decisions.

How to deal with these cases, where we are not facing programmes which are explicitly designed to confer a trade advantage with respect to a foreign supplier, but the results of which may not be neutral with respect to foreign suppliers, is a difficult issue. However, normally such subsidies should be consistent with national treatment obligations (accessible to both foreign and national suppliers) and limited in terms of their incidence on trade in services proper (in particular, as regards their export value).

We must therefore develop and establish criteria that distinguish and separate **as precisely as possible** subsidy programmes and regulations aimed at attaining legitimate economic and social development objectives from programmes aimed at obtaining an unfair trade advantage. This Working Party should focus on the latter.

We should recall that the disciplines on transparency set out in GATS Article III oblige members to notify •all relevant measures of general application which pertain to or affect the operation of this Agreement ...•.

Accordingly, to make headway in the evaluation of this subject matter we should engage in an exchange of information on existing subsidy programmes affecting trade in services, so as to be able to determine their relevance and specify how they affect trade in services. A preliminary way of making progress could be through the obligations provided for in Article 25 of the Subsidies Agreement.

III. Injury and countervailing measures

Before thinking of developing disciplines to counter the adverse effects of subsidies on trade in services, we ought to concentrate on identifying them and adopting commitments to eliminate them or limit their effects. The creation of an instrument to deal with situations of unfair competition in the services sector is enormously complicated

from the standpoint of practical application, but it may also represent the creation of a protective instrument with unpredictable future consequences.

Owing to the existence of different modes of supply, and in so far as these are mutually complementary, it is hard to define injury or threat of injury, and still more so to identify the causal relationship in the terms defined in the context of trade in goods.

Furthermore, it may be impossible to distinguish what is causing injury, whether commercial presence or the cross-border supply of the service, not to mention the difficulty of determining what mode of supply will be open to a possible countervailing measure. This is assuming that the relevant statistical information is available for carrying out a serious investigation.

Another category of problems concerns the type of •countervailing• measures to correct the injury or threat of injury caused by the existence of subsidies. The GATS identifies quantitative measures, and not tax measures (such as tariffs), as market access restrictions. Consequently, any •countervailing• measures must be consistent with the instruments provided for in the GATS.

If we confine ourselves to the provisions of GATS Article XVI, we note that the instruments favoured are non-optimal from the economic standpoint, untransparent, and by definition discriminatory.

When considering the question of countervailing measures, we may perhaps reach the conclusion, that although the problem of subsidies is significant in trade in services, it is neither possible nor desirable to redress it through trade •instruments• and that we should favour disciplines entailing their elimination or limitation depending on whether they are, *de jure* or *de facto*, aimed at obtaining an unfair trade advantage (once again, subsidies related to social programmes would be outside the scope of the GATS).

IV. Conclusions

What the above discussion shows is the enormous difficulty inherent in dealing with subsidies in the services sector, both in terms of possible disciplines and as regards countervailing measures. Nevertheless, these difficulties do not diminish the importance of making a serious effort to gauge the problem and limit its possible adverse effects.

Working Party on GATS Rules

QUESTIONNAIRE ON GOVERNMENT PROCUREMENT OF
SERVICES

Note by the Secretariat

At the meeting of the Working Party on GATS Rules held on 23 February 1996, the Secretariat was requested to prepare a set of questions on information relevant to the negotiations on government procurement of services.

Members may wish to obtain information in at least three different areas along the lines indicated below.

I. EXISTING PROCUREMENT REGIMES

Where a Member's procurement regime is different for central government entities, sub-central government entities, and other entities, such as public undertakings (e.g. public utilities), it would be useful if these differences were specified under each of the headings indicated below.

Definition

1. What is the definition of government procurement employed in completing this questionnaire?

Administrative structure

2. How are government procurement activities administered? To what extent are procurement activities centralized? Please specify the identity of any central procurement agencies and their respective responsibilities.

Laws and regulations in force

- 3.(a) Please specify the laws, regulations, rules, guidelines, decrees, decisions and other measures governing government procurement. What is the scope of their application? In particular, please describe any exemptions that exist. Please provide a brief summary of the content of each of these measures.

- (b) Does the procurement regime distinguish between the procurement of goods and services? If so, then how is the application of rules determined in cases of joint procurement involving both goods and services?

Procurement procedures applied

- 4.(a) What procedures are followed in the procurement process?

Procurement procedures could differ according to the openness of the invitations to tender. At least three broad categories of procedures are commonly distinguished: (i) public or open tendering procedures under which all interested parties may submit a tender; (ii) selective or restricted tender procedures under which participation is limited to a certain number of selected suppliers, and only these suppliers are invited to submit a tender; (iii) private contract or single tender in which the awarding authority contracts suppliers individually, and sometimes only a single supplier.

- (b) Under what circumstances are different procedures used? For instance, if the method used depends on the value of the procurement, the thresholds should be given.

- (c) What are the time limits for submission of bids?

Publicity for inviting tenders

- 5.(a) How are intended procurements publicised? Are invitations to tender published? If so, where, and in what languages?

- (b) Do the extent and form of publicity differ according to tendering procedures applied and/or on the value of procurement?

- (c) What details of the intended procurement are normally published? Is there a minimum set of information that is required to be published? If so, please specify.

Details could include a description of service to be procured, tender opening and closing dates, conditions of participation, procuring entity, enquiry point, procurement plans, procurement outcomes - contract award notices, etc.

- (d) Are there any charges for obtaining the full set of tender documents? If so, please specify and describe how these charges are set?

- (e) Are electronic means used to advertise procurement opportunities? What is the nature of systems that are in place? Are different tendering provisions applied to contracts advertised in this manner? If so, please describe.

Requirements laid down for possible suppliers

- 6.(a) Are there registration, residence or other requirements for potential suppliers?
- (b) What is the nature of any conditions for participation required from suppliers - such as financial guarantees, commercial standing and technical qualifications? Do the conditions of participation vary according to the nature of the tender process and/or the value of the intended procurement?
- (c) Do there exist lists of approved suppliers? If so, what are the procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists? Are lists of approved suppliers, if any, regularly reviewed/updated?

Criteria for assessing bids and awarding contracts

- 7.(a) What criteria are taken into account in the award of tenders? Are criteria for award of contracts made available in advance to potential suppliers?

For instance, whether obtaining the best value for money spent is the aim and whether criteria other than price are taken into account.

- (b) Is procurement subject to any offset provisions, such as local content, technology transfer or countertrade requirements?
- (c) Is preference given to any particular enterprises or group of enterprises? If so, please specify.
- (d) Do the procurement criteria differ according to sector or region of the economy?
- (e) What is the margin of choice or discretion allowed to the purchasing authority? What does the extent, if any, of discretion allowed depend upon?

The margin of choice or discretion could relate to (i) the relative weight/importance of each contract award criteria; (ii) margins of preference, if any, in respect of specific criteria; and (iii) threshold values, if any, above which referral to a higher level of purchasing authority is required.

The discretion allowed to the purchasing authority could vary according to whether there is (i) automatic tender, where the contract is awarded on the basis of predetermined criteria, either the simple criteria of price, or price and other criteria; (ii) discretionary tender procedures which involve acceptance of the bid which is most advantageous - the award of the contract is based on several criteria, some of which are predetermined, but which in general leave the awarding authority a certain measure of choice; and (iii) negotiated tender in which the awarding authority negotiates freely with the potential supplier or suppliers as to the conditions of the contract.

Disclosure of bids received and contracts awarded

- 8.(a) How are tenders received, registered and opened?

- (b) Are entities required to publish details of the contracts awarded and/or notify unsuccessful tenderers?
- (c) Are entities required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected?

Treatment granted to domestic and foreign services and/or suppliers

9. What laws, regulations, procedures or practices accord domestic services and/or suppliers treatment more favourable than that accorded to foreign services and/or suppliers, or accord services and/or suppliers of a Member more favourable treatment than those of another Member? Please specify how, if at all, more favourable treatment is accorded. Please also specify the working definition of •domestic• in relation to domestic services and suppliers.

Procedures for hearing and reviewing complaints/appeals

10. What, if any, are the procedures available for parties, domestic and foreign, to lodge complaints against the award of a contract? Please provide details.

Details could include:

- institutional status: whether challenges are heard by an administrative tribunal, a court or any other review body;*
- time limits for complaints/appeal;*
- type of remedy, if any, that may be granted.*

II. MEMBERSHIP OF PLURILATERAL, REGIONAL AND/OR BILATERAL AGREEMENTS

11. Is the Member party to any plurilateral, regional and/or bilateral agreements with provisions on government procurement? If so, please describe the relevant provisions.

III. ECONOMIC IMPORTANCE OF SERVICES PROCUREMENT

- 12.(a) Please provide statistics (if available) on the number and value of services procurements
- on both an aggregate and sectoral basis;
 - by origin of services and suppliers.

In order to enhance the comparability of data provided, Members may choose to provide statistics according to the services sectoral classification in document MTN.GNS/W/120 (dated 10 July 1991) at the appropriate level of aggregation.

(b) Please provide statistics (if available) on the

- share of services procurement in total procurement;
- share of procurement of each service in total domestic output of the service;
- share of procurement of each service in total domestic consumption of the service.

Total domestic consumption is defined as the sum of public and private consumption or the sum of domestic output and net imports (i.e. imports minus exports) of the service in question.

Working Party on GATS Rules

EMERGENCY SAFEGUARD MEASURES IN GATS: THE APPLICABILITY OF CONCEPTS APPLIED IN THE WTO AGREEMENT ON SAFEGUARDS

Note by the Secretariat

Introduction

1. At its meeting on 23 February 1996, the Working Party on GATS Rules requested the Secretariat to prepare a note on the applicability of concepts used in the WTO Safeguards Agreement to trade in services. The following note examines what appear to be the most important concepts underlying the Agreement on Safeguards, and considers ways in which these concepts might have to be modified if they were to be applied in a GATS context. The note is divided into three main sections. The first considers the conditions and criteria governing the application of safeguard measures. The subsequent section looks at the nature of measures that may be applied. The final section considers the issue of compensation, and the rights of Members affected by safeguard measures applied by another Member. The relevance of the provisions of Article XXI to the issue of the withdrawal of commitments and compensation is also taken up in this context.

2. A general consideration of relevance to the design of any safeguard instrument for services concerns information requirements for the application of safeguard measures. Not only would information requirements be greater for a safeguard instrument under GATS than they are under the Agreement on Safeguards, but the attainment of the necessary information is also more difficult. The reason why information requirements are greater in services is because GATS covers different modes of supply -- cross-border transactions, consumption abroad, commercial presence, and the presence of natural persons. Typically, governments are simply not geared to collecting the relevant data to identify transactions under each of these categories. The relative difficulty of acquiring the necessary information for the application of a safeguards instrument is a reflection of the nature of trade in services. The "invisibility" of many service transactions and the simultaneity of production and consumption typical of much services trade help to account for the absence of reliable statistics. Moreover, an accepted detailed nomenclature for classifying service sectors does not yet exist at the international level. The absence of adequate information is a factor that would need careful

attention in the design of any emergency safeguard provision under GATS. In order to avoid repetition, this point will not be referred to every time it is relevant in the discussion that follows.

Conditions for the application of safeguard measures

3. Paragraph 1 of Article 2 of the Safeguards Agreement specifies that a Member “may apply a safeguard measure to a product only if that Member has determined ... that such product is being imported into its territory in such increased quantities, absolute or relative to domestic production, and under such conditions as to cause or threaten to cause serious injury to the domestic industry that produces like or directly competitive products.” Among the concepts of interest here are: i) importation; ii) increased quantities (absolute or relative) in relation to domestic production; iii) serious injury; iv) causality; and v) like or directly competitive products.

Importation

4. The notion of a product can be applied straightforwardly either to a good or a service. But the notion of “importation” is not necessarily equivalent as between goods and services. This is because the GATS deals with establishment and establishment trade as well as cross-border trade. Thus, importation in services may refer to a product crossing the frontier under Mode 1, consumption abroad under Mode 2, the entry or establishment of a service supplier under Mode 3 and Mode 4, and post-establishment trade under Mode 3 and Mode 4. The only notion of importation under GATS that is directly comparable with the Safeguards Agreement is cross-border trade under Mode 1.

Increased quantities in relation to domestic production

5. The Safeguards Agreement contemplates the possibility of safeguard action when imports that cause or threaten to cause serious injury increase in quantity terms, absolutely or relative to domestic production. The application of this criterion under GATS would require information on the quantity of imports, however defined, as well as on domestic production (where grounds for action constitute increased imports *relative* to domestic production). It is noteworthy that increased imports must be measured in quantitative or volume terms, and not simply in value terms, which implies more stringent information requirements.

6. The notion of domestic production is straightforward under the Safeguards Agreement. The closely related concept of domestic industry is defined in the Agreement to mean “producers as a whole of the like or directly competitive products operating within the territory of a Member, or those whose collective output of the like or directly competitive products constitutes a major proportion of the total domestic production of those products” (Article 4:1(c)). This definition could be applied without modification in GATS under Mode 1 and Mode 2. Under Mode 3 and Mode 4, the situation is more complicated, as “domestic” production involves two different concepts -- in one circumstance, domestic production refers both to national and foreign suppliers, and in another it refers only to national suppliers. Thus, at the establishment or entry stage, domestic production would

logically refer to all suppliers operating within the territory of a Member, whether national or foreign. Safeguard action would be taken to protect these suppliers against newly establishing suppliers or market entrants. By contrast, in the context of post-establishment operations, the only conceivable safeguard action would have to distinguish between national and foreign suppliers, defining domestic production in terms only of national suppliers.

Serious injury

7. Serious injury and the threat of serious injury are both defined in Article 4:1 of the Safeguards Agreement. Serious injury means “significant overall impairment in the position of a domestic industry.” The threat of serious injury means “serious injury that is clearly imminent ... [A] determination of the existence of a threat of serious injury shall be based on facts and not merely on allegation, conjecture or remote possibility.” Article 4:2(a) goes on to stipulate that an injury investigation must “evaluate all relevant factors of an objective and quantifiable nature having a bearing on the situation ... in particular the rate and amount of the increase in imports of the product concerned in absolute and relative terms, the share of domestic market taken by increased imports, changes in the level of sales, production, productivity, capacity utilization, profits and losses and employment.”

8. The obstacle of scarce information notwithstanding, these criteria would seem to translate quite straightforwardly into a services context. The focus of an injury investigation would be determined by the definition of industry, as discussed above. The determination of serious injury would centre upon cross-border service transactions under Mode 1 and upon the effects on domestic industry of consumption abroad under Mode 2. At the establishment stage under Mode 3 and Mode 4, the notion of increased “imports,” to be taken into account in assessing serious injury or threat thereof to a domestic industry, would presumably relate to an investment flow (Mode 3) or the movement of natural persons (Mode 4). If safeguard action were to be contemplated in the context of establishment trade, then the relevant consideration for the injury determination would be the situation of service suppliers of another Member in relation to service suppliers of national provenance producing like or directly competitive products.

Causality

9. According to Article 4:2(b), a determination of serious injury or threat thereof cannot be made unless an investigation “demonstrates, on the basis of objective evidence, the existence of a causal link between increased imports of the product concerned and serious injury or threat thereof.” If factors other than increased imports are also causing injury to domestic industry, this injury should not be attributed to increased imports. A causality requirement of this kind could in principle be developed in a services context, with the appropriate definitional changes to the notions of imports and domestic industry, upon which an injury determination would be made.

Application of safeguard measures

Choice of measures

10. Article 5:1 of the Safeguards Agreement states that safeguard measures are to be applied “only to the extent necessary to prevent or remedy serious injury and to facilitate adjustment”. The Agreement does not prescribe particular measures, but in practice two kinds of measures against imports have been used -- quantitative restrictions (quotas) and tariff increases. The Agreement states that if quantitative restrictions are used, these should not reduce the quantity of imports below the average level of imports of the product concerned over the last three representative years for which statistics are available, unless it can be shown that a different level of imports is required to prevent or remedy serious injury. Where import quotas are allocated, the Agreement states that a Member may seek agreement with respect to the allocation of shares with other Members that have a substantial interest in supplying the product. If this approach is not reasonably practicable, historical import shares may be used as a basis for quota allocation, taking account of any special factors that might have affected trade in the product. In narrowly specified circumstances (Article 5:2(b)), a discriminatory quota allocation may be permitted. If a provisional safeguard measure is taken under Article 6 (see paragraph 12 below), the Agreement creates a presumption in favour of using tariffs.

11. Essentially the same choice between quantity-based and price-based safeguard measures would exist in the case of a GATS safeguard instrument. Although safeguard measures may be expressed in regulatory terms in the field of trade in services, it would seem that such regulations would be conceptually equivalent to a quantity-based limitation. A safeguard measure under GATS could not always fall on “imports.” Under Mode 1, an equivalent concept of imports to that used in the Safeguards Agreement would apply. But under Mode 2, a safeguard measure would need to be a tax, a quantitative limitation or a regulation of some kind affecting consumption abroad. If consumption abroad were to involve the physical movement of consumers, then it might be the consumer who would be taxed or restricted in some way, or a regulation might seek to ration or restrict consumption abroad of the service concerned. If the physical movement of consumers were not involved, then the transaction itself might be the target. Under Mode 3 at the establishment stage, the investment flow would be taxed or restricted. Under Mode 4 at the establishment stage, the physical movement of a natural person would be taxed or restricted. In respect of establishment trade under Mode 3 or Mode 4, output would be the most likely target of safeguard action, although measures could conceivably be applied elsewhere (e.g. on purchases of inputs).

Critical circumstances

12. The Safeguards Agreement permits the adoption of provisional safeguard measures in “critical circumstances where delay would cause damage which it would be difficult to repair ... pursuant to a preliminary determination that there is clear evidence that increased imports have caused or are threatening to cause serious injury” (Article 6). Conceptually, there does not appear to be any reason why provisional safeguard measures could not apply to trade in services. The question to be considered is whether the nature of services transactions under any of the available modes of delivery is such as to warrant a “critical circumstance”

remedy. Indeed, this is part of the broader question whether the essential characteristics of services transactions are such as to necessitate the creation of a safeguard instrument, bearing in mind the existing structure of rules and commitments under GATS and the concept of progressive liberalization.

Duration, progressive liberalization, and review

13. The Safeguards Agreement contains detailed rules on the length of time for which safeguard measures might be applied, and the interval that must elapse before a new safeguard measure may be introduced on a product that has previously been the subject of safeguard action. These time limits vary according to the nature of the action, and are also different for developing countries.¹ The Agreement also requires that any safeguard measure lasting for more than one year shall be progressively relaxed over the period of its application. In addition, measures in place for more than three years must be reviewed by the mid-term of the measure, with a view to its possible removal or an accelerated pace of liberalization. It would seem that all these concepts could be applied straightforwardly in a GATS context.

Level of concessions and other obligations

14. Article 8:1 requires that a Member intending to apply a safeguard measure should “endeavour to maintain a substantially equivalent level of concessions and other obligations to that existing under GATT 1994 between it and the exporting Members which would be affected by such a measure.” This provision implies that Members taking measures must be prepared to compensate other Members for any adverse effects of safeguard actions. The Agreement provides for consultations on such compensatory arrangements. If consultations do not lead to a satisfactory outcome within 30 days, affected Members are entitled to suspend the application of substantially equivalent measures to the trade of the Member responsible for the safeguard action, provided the Council for Trade in Goods does not disapprove of such retaliatory action. However, this right to suspend equivalent concessions cannot be exercised during the first three years that a safeguard measure in conformity with the provisions of the Agreement is in effect, as long as the measure concerned has been taken as a result of an absolute increase in imports (as opposed to a situation in which the relative share of domestic production has declined in domestic consumption of a product). What this means, in effect, is that under the above set of circumstances, Members would be unlikely to offer to provide compensation to trading partners for any adverse effects arising from a safeguard measure during the first three years of its application.

15. It does not appear that any conceptual difficulties would arise if such provisions were to be applied to trade in services. The provisions of Article XXI of GATS, dealing with the modification of schedules, may be relevant in this context. Article XXI provides that a Member may modify or withdraw a scheduled commitment at any time after three years from the entry into force of the commitment concerned. The intention to take such action must be notified no

¹ One other element of special and differential treatment for developing countries under the Safeguards Agreement is the *de minimis* provisions exempting developing country exports below a certain threshold level of import share from safeguard action.

later than three months before the intended date of modification or withdrawal of the commitment. Consultations on compensation for affected parties are envisaged during this period, with a view to reaching agreement on any necessary compensatory adjustment. Compensatory adjustments should seek to maintain “a general level of mutually advantageous commitments not less favourable to trade than that provided for in Schedules of specific commitments” (Article XXI:2). If consultations fail to produce a satisfactory solution within the three month period provided for such consultations, affected Members may submit the matter to arbitration. Affected Members wishing to enforce their rights must participate in arbitration. If no Member seeks arbitration, the Member intending to modify its schedule is free to act. If there is arbitration, however, schedules must be modified in accordance with the arbitrator’s findings, failing which any affected Member may modify or withdraw substantially equivalent benefits in conformity with those findings.

16. From a procedural perspective, it is noteworthy that an arbitration provision was introduced in Article XXI. This approach has no precedent in the field of goods. Providing for arbitration reflects the realization of negotiators that the rights and obligations of Members seeking to modify their schedules and of Members affected by such action, are more complicated to deal with in the field of services. This additional degree of difficulty arises both as a result of the kinds of measurement difficulties and information shortfalls referred to above, as well as from the fact that compensatory adjustments in services can take different forms, relating both to market access and national treatment commitments. Presumably, these same considerations would apply in the context of a safeguard mechanism in services that provided for compensatory adjustments for Members adversely affected by safeguard actions.

17. An issue referred to in Working Party discussions is the relationship between the existing Article XXI provisions and a possible safeguard mechanism. In addition to the broader question as to whether an Article XXI-type scenario involving the indefinite withdrawal of commitments is comparable to the temporary withdrawal of commitments that would presumably be envisioned under an emergency safeguard provision, three other points about the nature of Article XXI as it stands seem to be relevant in this context. First, Article XXI action is only available three years after a commitment has been undertaken. Second, Article XXI action cannot be taken until three months after notification of the intention to act. Third, the obligation to provide compensation for the adverse effects of the modification of a commitment exists from the outset under Article XXI procedures. These characteristics of Article XXI would have to be taken into account in any consideration of the question whether the possibilities for modifying commitments provided under Article XXI might obviate the need for a safeguard mechanism in GATS.

Working Party on GATS Rules

SUBSIDIES AND TRADE IN SERVICES

Note by the Secretariat

I. Background

1) Article XV of the General Agreement in Trade in Services acknowledges that, in certain circumstances, subsidies may have distortive effects on trade in services, and states that Members shall enter into negotiations with a view to developing the necessary multilateral disciplines to avoid such trade-distortive effects. The negotiations are also to address the appropriateness of countervailing procedures. A footnote to paragraph 1 of Article XV states that a work programme is to be established to determine how, and in what time-frame, negotiations on multilateral disciplines are to be conducted.

2) Paragraph 1 of Article XV further states that the negotiations shall recognize the role of subsidies in relation to the development programmes of developing countries and take into account the needs of Members, particularly developing country Members, for flexibility in this area. Finally, the Article XV negotiating mandate stipulates that Members shall exchange information concerning all subsidies related to trade in services that they provide to their domestic service suppliers.

3) The present note, requested by the Council for Trade in Services at its first meeting on 1 March 1995, introduces a number of issues that may arise as Members focus on the Article XV mandate. Like previous secretariat notes presented to the Working Party, the objective of this note is to identify what appear to be salient issues, in order to stimulate discussion in the Working Party. It is not intended as an exhaustive or authoritative analysis of questions relating either to subsidies affecting trade in services or to the manner in which they might be addressed. The note does not attempt to address those aspects of the negotiating mandate dealing with the determination of a time-frame for negotiations, nor with the exchange of information among Members relating to subsidies. The note is organized under four main headings. Section II contains brief comments on the general question of subsidies affecting trade in services. Section III explores the approach to subsidy issues adopted on the goods side in the GATT, and subsequently in the WTO Agreement on Subsidies and Countervailing Measures, in order to assist Members considering how far this approach might be suitable as a model for developing disciplines under the GATS. Mention is made in Section III of how subsidies are dealt with under the Agreement on Agriculture. This section also considers countervailing procedures and other remedies against subsidy practices. This is followed in Section IV by an examination of certain provisions already contained in the General Agreement on Trade in Services that discipline subsidy practices. Finally, Section V

lists some questions that delegations may wish to examine in the context of the Article XV negotiating mandate.

II. Subsidies and trade in services

4) Past efforts to establish multilateral rules on subsidies have always attempted to define the middle ground between recognition that subsidies can distort trade in ways that undermine the objective of trade liberalization and acknowledgement that subsidies may also be an important tool of social and economic policy. This dualistic approach is explicit in the Article XV negotiating mandate. The need to define rules that address both the negative and positive aspects of subsidization has imparted considerable complexity to rule-making in this area. It has called for definitional and conceptual distinctions that are not always easy to make. A number of these difficulties are compounded in the case of trade in services, for reasons discussed below.

5) A second broad consideration relates to the element of choice which exists between emphasizing disciplines to regulate the use of subsidies and developing unilateral remedies (i.e. countervailing action) to be applied in the face of subsidization by trading partners. In the field of goods, the Uruguay Round was successful in shifting emphasis towards greater reliance on rules about the use of subsidies, but the remedy of countervailing action still plays a significant part in the overall approach. It may be the case that in light of the considerable difficulties of identification and measurement that are bound to exist even in the best of circumstances, an emphasis in GATS on rules about the acceptability or otherwise of subsidy practices, which would aim to discipline the use of subsidies *ex ante*, may be more viable than an approach which focuses on unilateral remedies.

Are subsidies commonly used in service sectors?

6) Detailed information about subsidies affecting trade in services is unavailable. Empirical work reveals, however, that the use of subsidies is commonplace in several service sectors,¹ although according to an OECD study of the incidence of subsidies in industrialized economies, some two-fifths to three-fifths of subsidies granted by governments were classified as sector-specific, and the bulk of these went to non-service industries such as steel, ship-building and mining.² A number of governments typically provide subsidies of one kind or another to certain transport sectors, utilities, health, education, entertainment services, and financial services. This listing is by no means exhaustive. In many countries, air transport services are subsidized, often with a view to supporting a national flag carrier. In the maritime sector, some governments provide operating subsidies as well as support for the non-service activity of shipbuilding. The public railway systems in many countries receive significant levels of subsidy. In the telecommunications sector, and to a degree in respect of other utilities such as water and electricity, governments may sanction or encourage cross-subsidization among product lines or categories of consumers, rather than providing direct injections of additional resources.

¹For a useful summary of some of this work, see UNCTAD, *The Impact of Subsidies on Trade in Services*, document UNCTAD/SDD/SER/3 (4 October 1993), upon which these paragraphs draw.

²Robert Ford and Wim Suyker, *Industrial Subsidies in the OECD Economies*, Department of Economics and Statistics Working Paper No. 74, OECD (January 1990), cited in a GATT Secretariat document on subsidies prepared for the Group of Negotiations on Services in the Uruguay Round (MTN.GNS/W/98, 20 April 1990).

7) Subsidies in sectors such as education and health generally underpin social objectives. On the other hand, as a recent UNCTAD study points out,³ some governments have developed export capacity in health and education services, and subsidies in these sectors may be viewed with concern from a trade perspective. Subsidies provided to entertainment services are typically predicated on cultural considerations, while subsidies in the financial sector may be justified on prudential grounds. Financial service sector subsidies have often taken the form of rescue operations designed to shore up public confidence in circumstances where a financial institution is faced with collapse. How, if at all, should subsidies of this nature be subject to multilateral disciplines? An important additional question is how far it is feasible to design general obligations relating to services. To what extent would subsidy disciplines need to be designed for specific sectors in order for them to be effective and workable?

The nature and definition of subsidies

8) Subsidies are not easy to define, as they can take many forms. It was not until the Uruguay Round that a definition of subsidies was established (see Section III below). Prior to this, the distinction between production subsidies and export subsidies had largely been relied upon to define rules governing subsidies. While subsidies may often be recognizable in terms of their effects on government revenue, either as outpayments or tax credits or exemptions of one kind or another, they can in fact take many other forms. From a services perspective, where regulatory interventions can be an important factor, regulations may have the more or less indirect effect of imparting a subsidy on services or service suppliers. An issue that Members may wish to consider, therefore, is how far the definition of subsidy should be taken into the regulatory domain. Clearly, problems associated with identifying and measuring subsidies will be greater when regulations are the source of subsidy. To some degree, a choice exists between attempting to address regulations as subsidies, and imposing disciplines on regulations *per se*, in the manner envisaged under many GATS provisions.

Particularities relating to services

9) Several references have already been made to conceptual and measurement challenges in the subsidy field. Difficulties are likely to arise in identifying subsidy practices, measuring the magnitude of subsidization, assessing the impact of foreign subsidies on domestic producers, and designing appropriate and appropriately targeted remedies. Many of these problems are likely to be more acute in the case of services than they have proved to be in goods.⁴ First, the absence of detailed statistics on trade in services greatly complicates any efforts to identify the impact of subsidies. Second, no detailed and internationally agreed nomenclature exists for service activities, which would permit a common understanding of how specific service activities are to be categorized in international services trade. Third, the “invisibility” of many service activities makes it difficult to monitor transactions. Fourth, the “customized” nature of many transactions, involving direct contact between producers and consumers, makes the identification of specific products and the unit prices of such products problematic. Assessing quality differences among “like” services is similarly difficult. More generally, the concept of likeness of products, which is essential for adequate subsidy rules, is more elusive in services than in goods. All these factors will need to be taken into account in the design of subsidy disciplines and in consideration of the possibility of developing countervailing remedies.

³UNCTAD, *op. cit.*

⁴See MTN.GNS/W/98 for a discussion of some of these problems.

10) The inseparability of the production and/or sale of some services from the production and/or sale of goods has been widely observed. A natural consequence of this “embodiment” phenomenon is that some subsidies affecting the supply of services appear, or are treated as, subsidies on goods. This may occur simply because a service is embodied in a good, as for example, the case of a compact disc on which music is recorded, or services may be inputs into the production of goods. An example of the latter is found in the illustrative list of prohibited export subsidies annexed to the Agreement on Subsidies and Countervailing Measures, which makes reference to transport and freight charges, as well as to the provision by governments of services more generally. Embodied services have often been countervailed in actions taken against goods. The embodiment of services in goods is yet another factor that may need to be taken into account when considering how to treat subsidies to trade in services.

III. Existing subsidy rules in the field of goods and available remedies

11) The earliest subsidy rules in GATT are different in important ways from what emerged in the Uruguay Round. Until the Uruguay Round, however, the essential features of the GATT subsidy rules had not evolved much since the mid-1950s. Production subsidies were exempted from the national treatment obligation by Article III:8(b) of the GATT, which states that “The provisions of this Article [national treatment] shall not prevent the payment of subsidies exclusively to domestic producers, including payments to domestic producers derived from the proceeds of internal taxes or charges applied consistently with the provisions of this Article and subsidies effected through governmental purchases of domestic products.” Article XVI made production subsidies the subject of consultation to discuss the possibility of limiting those subsidies found to cause or threaten serious prejudice to the interests of another party. Article XVI also entreated GATT contracting parties to seek to avoid the use of export subsidies on primary products, and required that any such subsidies should not give the subsidizing country more than an equitable share of world export trade in the product concerned. As far as export subsidies on manufactured products were concerned, these were eventually declared illegal in 1960 in an undertaking accepted by most industrial countries. Article VI of the GATT gave contracting parties the right to take countervailing action against injurious subsidies granted directly or indirectly on the manufacture, production or export of a product. The Tokyo Round Agreement on Interpretation and Application of Articles VI, XVI and XXIII fused and elaborated the substantive rules on subsidies and countervailing action into a single Agreement, and developed procedural rules relating to the conduct of countervailing investigations.

The Agreement on Subsidies and Countervailing Measures⁵

12) The Uruguay Round Agreement on Subsidies and Countervailing Measures (ASCM) changed the subsidy rules in important ways. Three aspects of these rules are particularly relevant to the present discussion. First, a definition of subsidy is provided for the first time. Second, subsidies are divided into three separate categories that specify both their legality and remedies available to parties affected by subsidies. Third, certain changes have also been made in the basis for seeking remedies. The many other changes

⁵It may be noted that the Agreement contains a number of provisions relating to special and differential treatment for developing countries (Article 27). Among the areas where these provisions are relevant are export subsidies rules, the determination of serious prejudice resulting from subsidization, and *de minimis* subsidy thresholds for the countervailability of certain subsidies. The Agreement also contains provisions for Members in the process of transformation from a centrally-planned into a market, free-enterprise economy (Article 29).

to the rules resulting from the Uruguay Round are not discussed here, as these are not relevant to the present general consideration of possible similarities of approach between current WTO subsidy disciplines and what might eventually emerge from the GATS Article XV negotiating mandate.

The definition of subsidies

13) The ASCM defines a •subsidy• and provides the conditions under which a subsidy would be deemed to be •specific•. A subsidy is defined as a financial contribution⁶ by a government or any public body within the territory of a Member, or any form of income or price support in the sense of Article XVI of GATT 1994, which confers a benefit. This approach would seem to make it easier to identify subsidies than in the previous situation, where multilateral subsidy rules were developed in the absence of a definition of subsidy. The question that arises in the GATS context, therefore, is whether it would be helpful to seek explicit definitions of what constitute subsidy measures.

14) Even when a measure is a subsidy according to the ASCM, it would not be subject to dispute settlement under the provisions of the Dispute Settlement Understanding (DSU) or countervailing measures unless it was a •specific• subsidy, i.e. unless it had been specifically provided to an enterprise or industry or group of enterprises or industries.

The classification of subsidies

15) The three-fold distinction in the ASCM between prohibited, actionable and non-actionable subsidies has also contributed to greater clarity with respect to subsidy rules. Prohibited subsidies are those contingent upon export performance or upon the use of domestic over imported goods, except as provided for in the Agreement on Agriculture. Non-actionable subsidies are those which are non-specific and those specific subsidies which, under certain conditions and limitations, are directed at industrial research and pre-competitive product development expenditures, regional development, and the adaptation of existing facilities to new environmental requirements imposed by laws or government regulations. The actionable subsidies category is defined by default to include all subsidies that are neither prohibited nor non-actionable. A question for the Working Party to consider is whether it would be worthwhile to attempt a comparable categorization of subsidies affecting trade in services. This would move disciplines in the direction of substantive rules about subsidies *per se*. It would also open up the possibility of using criteria linked to express policy objectives to place a range of subsidies beyond the reach of certain types of remedial action.

Remedies against subsidies

16) In the area of remedies, the ASCM provides for dispute settlement under the provisions of the Dispute Settlement Understanding (DSU) and countervailing action. Either of these remedies may be invoked in the case of prohibited and actionable subsidies, but non-actionable subsidies are neither subject to challenge under the DSU nor countervailable. However, if non-actionable specific subsidy programmes result in serious adverse effects to the domestic industry of a Member, such as to cause damage which would be difficult to repair, Article 9 of the ASCM provides for consultations

⁶The ASCM provides a list of the different forms of financial contribution.

between Members and remedies authorized by the Committee on Subsidies and Countervailing Measures.

17) The Agreement includes a specific definition of serious prejudice to a Member's interests which can arise as a result of adverse effects such as export displacement in the market of the subsidizing Member or in a third country market. A rebuttable presumption of serious prejudice is created where the total ad valorem subsidization of a product exceeds 5 percent, where subsidies cover operating losses,⁷ where direct debt forgiveness occurs and where grants are provided to cover debt repayment. Where serious prejudice is alleged and the matter cannot be resolved through consultations, a dispute settlement panel may be established. The ASCM also provides for recourse to the DSU in the case of adverse effects in the form of nullification or impairment of benefits accruing under GATT 1994.⁸

18) In sum, the Agreement on Subsidies and Countervailing Measures embodies a dual approach to rule-making about subsidies. On the one hand, certain subsidies are prohibited outright, and on the other, subsidies of a specified variety or value give rise to a presumption of serious prejudice and can lead directly to remedies via dispute settlement. This is a potentially powerful discipline on subsidies.

19) Countervailing action can only be taken if injury to domestic industry is caused by subsidized imports.⁹ Such duties can only be levied following a detailed investigation of the facts of the case, which include evidence of the existence of a subsidy and calculation of its value, together with evidence of actual or threatened material injury to a domestic industry, and the establishment of a causal link between subsidised imports and injury to domestic industry. The procedural and information requirements for countervailing duty investigations have become increasingly complex and detailed over the years, reflecting a perceived need to avoid, as far as possible, the misuse of this anti-subsidy remedy as a means of disguised protection. The information requirements for countervailing investigations in trade in services would be likely to prove difficult to meet, for all the reasons mentioned in paragraph 9 above.

The Agreement on Agriculture

20) The subsidy rules developed in the agricultural sector in the Uruguay Round are different from those of the subsidies agreement. In respect of both domestic support measures and export subsidies, benchmark levels of intervention have been established for Members with such subsidy levels in previous years. In the case of domestic support measures, an Aggregate Measure of Support (AMS) covering the whole sector has been established, on the basis of which Members have accepted reduction commitments from the specified benchmark level. The AMS calculation excludes certain types of subsidies whose impact on production and trade is regarded as minimal or non-existent ("green

⁷Subsidies to cover operating losses of an enterprise that are non-recurrent, one-time measures, and are given to allow time for adjustments and to avoid acute social problems are not deemed to be seriously prejudicial.

⁸The term "nullification and impairment" is used in the ASCM in the same sense as it is used in the relevant provisions of GATT 1994, and the existence of such nullification or impairment is to be established in accordance with the practice of application of these provisions.

⁹It should be borne in mind that countervailing remedies cannot provide relief in situations where subsidies cause injury with respect to sales in the export markets of a complainant (in the subsidizing country or a third country market), rather than to sales in its own market.

box” measures). Certain additional exclusions from the AMS calculation are allowed for developing countries and for measures of any country that are partially decoupled from production (blue box measures).¹⁰ The *ex ante* exclusion of certain measures is similar to the establishing of non-actionable subsidies under the ASCM. Export subsidies have been addressed in a comparable manner, and annual reduction commitments have been set, although in this case both budgetary outlay commitments and export quantity reduction commitments have been undertaken. Export subsidies are prohibited for those Members without reduction commitments (except for two measures in the case of developing countries). The domestic support and export reduction commitments extend for a six year implementation period (ten years for developing countries), beginning in 1995.

21) As far as remedies are concerned, the so-called “peace clause” contained in Article 13 of the Agreement on Agriculture determines the circumstances in which subsidies may be challenged during the implementation period. Domestic support measures falling within the “green box” are non-actionable for the purpose of countervailing action, exempt from challenge on grounds of serious prejudice (as provided for in Article XVI of GATT 1994 and the ASCM), and also exempt from non-violation nullification and impairment complaints. Domestic subsidies covered by the reduction commitment and permissible export subsidies may be subject to countervailing action, but “due restraint” must be shown in initiating countervailing duty investigations. Domestic subsidies cannot be challenged on serious prejudice or non-violation nullification and impairment grounds, unless they are applied to a specific product in excess of the level decided in the 1992 marketing year. Export subsidies fully in conformity with the provisions of the Agreement on Agriculture are exempt from actions based on Article XVI of GATT 1994 or Articles 3 (prohibition), 5 (adverse effects) and 6 (serious prejudice) of the ASCM. Any measures in excess of commitment levels may be addressed under WTO dispute settlement procedures.

22) Two aspects of the approach adopted in agriculture seem noteworthy from the perspective of possible subsidy disciplines in trade in services. First, in contrast to the ASCM, emphasis was placed on a commitment to reduce subsidy levels, in addition to establishing rules on the legal acceptability of various subsidy practices via the green box/blue box approach. Arguably, where the overall reduction commitments apply, they obviate the need to identify carefully the nature and impact of each and every subsidizing intervention -- an arduous task in the face of inadequate information. Secondly, restraints on the use of remedies against subsidies formed part of the package involving subsidy reduction commitments. It may be that subsidy disciplines structured in this manner fit well into a framework that envisages progressive liberalization, which is a defining feature of the Agreement on Agriculture. The question here is whether there might be a place for comparable step-by-step arrangements in the case of services.

¹⁰Non-exempt support levels for both Members with and without AMS reduction commitments are permitted up to a *de minimis* level of 5 percent (10 percent for developing countries).

IV. Existing subsidy and countervail disciplines in GATS

23) No systematic attempt was made to negotiate subsidy and countervail disciplines in the GATS prior to agreement on the Article XV negotiating mandate. However, the decision to postpone negotiations on this aspect of the framework of rules to govern trade in services was taken against the background of certain existing subsidy and countervail disciplines, which arose naturally from the conceptual structure of the Agreement. Before the need for additional disciplines and countervailing measures can be defined, it is necessary to develop a clear understanding of the scope of the existing disciplines. Such disciplines already exist as a result of the most-favoured-nation treatment obligation and the national treatment undertakings in the schedules of specific commitments, and under the Article VIII provisions dealing with monopolies and exclusive service suppliers. The nature of these disciplines is spelled out below.

Subsidies, most-favoured-nation treatment, and national treatment

24) Article II of the GATS requires that most-favoured-nation (MFN) treatment be extended to all services and service suppliers of any other Member in respect of all measures covered by GATS. This is a general requirement, modified only in cases where Members have inscribed MFN exemptions in their schedules. With regard to subsidies, the MFN principle plays a less important disciplining role than the national treatment principle (discussed below). However, in the absence of a national producer, and therefore, of a basis for comparison, the national treatment discipline is not operative, and hence the MFN discipline can be important in ensuring non-discrimination. The MFN discipline can also play such a role when it is possible for a foreign producer to be offered better treatment than a national producer, as, for instance, in certain investment regimes. The MFN principle significantly restricts the circumstances in which countervailing action may be applied, as is discussed in the following section.

25) When Members undertake specific commitments under Part III of GATS, they have the possibility, in accordance with Article XVII, of inscribing sectors in their schedules free of national treatment limitations under any or all modes of delivery. The national treatment obligation, as contained in Article XVII, says that •In the sectors inscribed in its Schedule, and subject to any conditions and qualifications set out therein, each Member shall accord to services and service suppliers of any other Member, in respect of all measures affecting the supply of services, treatment no less favourable than that it accords to its own like services and service suppliers.• Thus national treatment commitments free of subsidy-related limitations require that any subsidies granted are non-discriminatory as between national services and service suppliers and the like services and service suppliers of other Members.¹¹ While this rule does not impose any restraint on the level of subsidies that may be granted by Members, it is nevertheless a potentially powerful discipline with respect to the non-discriminatory use of subsidies. But realization of this potential depends on the degree to which Members schedule commitments, and the extent to which those commitments are free of national treatment limitations relating to subsidies. It is noteworthy that this approach to the relation between national treatment and subsidies differs sharply from that adopted in GATT 1994. As noted above, Article III.8(b) of GATT 1994 exempts subsidies from national treatment.

¹¹Several Members have inscribed in their schedules national treatment limitations applying to all subsidies across the board. Others have done so with respect to specific modes and specific sectors.

26) The main reason for this seemingly greater degree of subsidy discipline in GATS undoubtedly lies in the fact that GATT 1994 makes national treatment a basic, non-negotiable principle of the system, whereas national treatment is negotiable via the scheduling of specific commitments under GATS. As noted above, the realization of non-discrimination as a subsidy discipline under GATS depends on the propensity of Members to schedule unencumbered specific commitments. An interesting aspect of this situation is that certain subsidy disciplines become automatically tighter under GATS with progressive liberalization -- this is not a gain that requires specific attention to subsidy rules as such.

27) In the present context, it is important to define precisely the scope of the national treatment obligation in GATS as it currently applies to subsidies, and, in particular, to clarify the implications of the modes of supply approach. The "Scheduling of Initial Commitments in Trade in Services: Explanatory Note"¹² clarifies, to an extent, the territorial scope of the national treatment obligation. Paragraph 10 of the note states that: "There is no obligation in the GATS which requires a Member to take measures outside its territorial jurisdiction. It therefore follows that the national treatment obligation in Article XVII does not require a Member to extend such treatment to a service supplier located in the territory of another Member." This would imply that a Member is not obliged to extend a subsidy provided to suppliers located in its territory to suppliers located outside its territory. It should be noted, however, that the Explanatory Note addresses specifically the treatment of suppliers and does not deal with issues that may arise in relation to the treatment of services - especially with respect to the cross-border supply of a service, when the service is supplied within the territory of a Member while the supplier is located outside it.

28) There remains a crucial question: does the national treatment obligation extend across modes of supply, or do members retain the freedom to discriminate between identical services supplied in their territory through different modes? The text of Article XVII does not suggest that the mode of supply is a consideration in defining "likeness" of a service: different modes of supply could be used to provide a "like" service. The structure of the schedules, however, implies that a Member's commitments are mode-specific, i.e. a Member making a commitment to provide national treatment, does so within a specific mode but is allowed to discriminate between the same service supplied by different modes. This is most starkly evident in commitments on market access (Article XVI), where extreme discrimination between modes is permitted, in that Members may allow the supply of a service through one mode and not through another. Nevertheless, the question remains: once a Member has allowed the delivery of a service through different modes of supply, would it be consistent with national treatment to discriminate among them?

29) If "likeness" of a service is defined independent of the mode of supply, then there is built-in protection within the Agreement for foreign suppliers of services through all modes against national subsidization in a particular mode. In effect, if a Member were to subsidize its own service or service supplier, the national treatment obligation would make it necessary to provide an "equivalent" subsidy to the services of other Members supplied within its territory, irrespective of the mode of supply. Otherwise, it could be argued that the subsidy had modified the conditions of competition in favour of services or service suppliers of the Member. On the other hand, if likeness were held to depend

¹²MTN.GNS/W/164, 3 September 1993. The document warns that "the answers should not be considered as an authoritative legal interpretation of the GATS." It is, however, the basis on which many schedules of specific commitments have been drafted.

on the mode of supply, i.e. one service is like another service only if it is supplied by the same mode, then foreign suppliers through one mode would not be protected against the national subsidization of a particular mode. In this case, there would be a gap in the current disciplines which may need to be examined.

30) These and several other issues can be illustrated with respect to certain forms of subsidies.

Production subsidies

31) Say a Member, which has bound itself to provide national treatment under all four modes, provides a production subsidy to a national services producer. For instance, the subsidy may consist of partial payment of fuel costs for transporters serving a particular domestic route. Who else could claim a right to be subsidized, given the national treatment obligation? Non-national producers of the like service located in the territory of the Member would seem to be obvious claimants. In addition, it seems clear that a subsidy provided to a supplier leads to the production of a subsidized service. Thus, any subsidy provided under modes 3 or 4, would have an impact also on competitive conditions under mode 1, because cross border suppliers would be competing against subsidized local services. Could such suppliers also claim a right to the subsidy? The answer to this question will determine whether GATS already has rules which ensure non-discriminatory conditions for suppliers through all modes.

Investment subsidies

32) These subsidies are pertinent only to mode 3, i.e. commercial presence. The national treatment obligation would seem to suggest that both national and foreign investors would qualify for any such subsidy. However, the question that arises is how recipients would be selected. Since subsidy funds are not unlimited, how could a Member legitimately choose the set of successful claimants from among the pool of current and potential investors?

Export subsidies

33) As in the case of goods, it may be possible to distinguish between production and export subsidies for services, though the empirical significance of the distinction needs to be established. Export subsidies would be those contingent on export performance. Unlike in the case of GATT, these subsidies are not prohibited in the GATS, but a Member who had committed to provide national treatment would also be obliged to provide such subsidies to all foreign producers with commercial presence in its territory. However, this obligation would not seem to affect a Member who provides a subsidy to its producer located outside its territory.

Consumption subsidies

34) Unconditional consumption subsidies respect national treatment in the widest possible sense: the consumer decision to buy is not biased towards a particular source. However, consumption subsidies contingent upon purchase from a national source would seem to violate the national treatment obligation. An interesting question arises with respect to the •consumption abroad• mode of supply. Would GATS disciplines cover conditional subsidies granted for consumption abroad - conditional, for instance, on purchase from a national supplier located abroad or conditional on purchase in a particular country? Here a tension exists between the notion of territory and wider notions of jurisdiction. There may be no obligation in the GATS which requires a Member to take measures outside its territorial jurisdiction (as paragraph 10 of the Explanatory Note states), but if a Member does take such measures, is it free to act as it chooses - or should there be an obligation to take such measures consistently with GATS principles? In the absence of such an interpretation, it is not clear what the national treatment and MFN obligations would mean with respect to consumption abroad.

Countervailing action, most-favoured-nation treatment, and national treatment

35) It should be apparent from the previous discussion that the need to develop remedies will depend on the range of the existing disciplines on subsidies in the GATS. But how much scope is there already under existing GATS rules for a Member to respond to subsidization by another Member which affects its home or export markets?

36) As GATS rules stand, it would seem that a Member would be prevented by the MFN rule from taking countervailing action against services or service suppliers of another Member, unless such action were extended on a non-discriminatory basis in respect of like services or service suppliers. It is, of course, a logical absurdity that countervailing action should be taken against all Members in response to the subsidy practices of a single Member, and the essential point is that provision for countervailing action has so far not been made under GATS. This constraint on countervailing action applies to all services, and not only in respect of those that are subject to specific commitments (unless an Article II exemption is in force). Another point to consider is whether the national legislation of Members contemplates the possibility of levying taxes or taking other restrictive measures against a subset of producers in their territory. Unless such measures were to be applied at the •frontier• like trade taxes, it may be that existing domestic legislation would have to be altered in order to apply some of the countervailing remedies that might be developed under GATS.

37) Measures which are not inconsistent with the GATS, but nullify or impair the benefits of an existing concession may give rise to a so-called •non-violation• complaint under Article XXIII:3. This Article states that •If any Member considers that any benefit it could reasonably have expected to accrue to it under a specific commitment of another Member under Part III [specific commitments] of this Agreement is being nullified or impaired as a result of the application of any measure which does not conflict with the provisions of this Agreement, it may have recourse to the Dispute Settlement Understanding. If the measure is determined by the Dispute Settlement Body to have nullified or impaired such a benefit, the Member affected shall be entitled to a mutually satisfactory adjustment on the basis of paragraph 2 of Article XXI [modification of schedules], which may include modification or withdrawal of the measure. In the event an agreement cannot be reached between the Members concerned, Article 22 [compensation and the suspension of concessions] of the DSU shall apply.]

38) Most non-violation cases brought before GATT panels have involved the nullification or impairment of a negotiated tariff concession by the introduction of a subsidy. The standards for bringing a non-violation complaint may, however, be quite high: there must be a pre-existing scheduled commitment and a negation of reasonable expectations as to the value of the commitment. Two limitations are obvious: first, there would be no remedy in sectors where commitments have not been undertaken; secondly, remedies could not be sought against existing subsidies whose continuation could be reasonably expected.

39) It can be concluded that while the national treatment obligation does not impose any restraint on the level of subsidies that may be granted by Members, it is nevertheless a potentially powerful discipline with respect to the non-discriminatory use of subsidies. But realization of this potential depends, first of all, on the extent to which Members schedule commitments free of national treatment limitations relating to subsidies, and secondly, on whether the national treatment obligation is interpreted to extend across modes of supply. As far as scope for remedial action is concerned, the MFN obligation under GATS would seem to preclude countervailing action against a single Member, but there remains scope for Members to seek recourse to •non-violation• complaints if the benefits of an existing concession are nullified or impaired. In any case, there is no counterpart in the GATS to the prohibition of export subsidies in the case of goods. The importance of this gap can only be established by an assessment of the empirical significance of such subsidies.

Subsidy disciplines under the rules on monopolies and exclusive service suppliers (Article VIII)

40) Paragraph 1 of Article VIII requires Members to ensure that monopoly service suppliers do not use their monopoly power to negate the MFN commitment of Article II or to undermine any specific commitments inscribed in their schedules. Paragraph 2 states that where a monopoly competes in a sector outside the domain of its monopoly power, and the sector in question is the subject of a specific commitment, a Member must ensure that the monopolist does not abuse its monopoly position in a manner inconsistent with the scheduled commitment. Paragraph 5 makes clear that the above provisions also apply to exclusive service suppliers. Exclusive service suppliers are deemed to exist when a Member, formally or in effect authorizes or establishes a small number of service suppliers and substantially prevents competition among them within its territory. An important objective of these rules is to prevent cross-subsidization from occurring across activities or sectors. Moreover, since monopoly suppliers are defined in Article XXVIII to include both public and private monopolies, these disciplines also cover private pricing behaviour, or in other words, dumping situations involving monopolists and exclusive service suppliers. These kinds of dumping situations may differ from the more familiar GATT concept of dumping, in that the latter does not occur across activities or sectors.

V. Some issues for consideration

41) The Article XV negotiating mandate acknowledges that subsidies may distort trade, but also recognizes a positive role for subsidies and a need for flexibility, particularly for developing countries. Against this background, the present note has raised a number of issues relating to the nature of possible subsidy disciplines under GATS. In addition, the note has emphasized that difficulties relating to the identification of subsidy practices, the measurement of subsidization, the assessment of the impact of subsidies, and the design of appropriate remedies are likely to be even more acute in services than they have been in the field of goods. This is attributable, among other

factors, to the absence of adequate statistics and an agreed nomenclature of sufficient detail, the difficulty of defining unit prices for output of comparable quality for certain services, and the elusiveness of a workable concept of "likeness" among services. These kinds of problems will need to be taken into account. Some of the questions Members may wish to consider are summarized below.

- The GATT 1994 approach to subsidy disciplines defines subsidies and categorizes them in a fashion that imposes greater constraints on the use of those subsidies considered the most trade-distorting. Do Members see a role for developing rules beyond those existing already as a result of GATS disciplines on non-discrimination, which might rely on definitions and categories similar to those employed on the goods side?
- Certain aspects of subsidies in services may be quantifiable, such as the cost to the government. Do Members consider that quantitative subsidy reduction commitments of the kind applied in the agricultural sector might play a role in reducing distortions to trade in services arising from subsidies?
- If subsidies were to be defined in GATS, would Members seek to rely on a relatively narrow definition of subsidy, based on the revenue or fiscal effects of government intervention, or would Members prefer a broader definition of subsidy to take into account the subsidy-like effects of certain regulatory interventions?
- Do Members see scope for developing horizontally-based subsidy rules, or would any subsidy rules that might be developed have to be defined at the sectoral level in order to embody the desired degree of specificity and discipline?

42) The Article XV negotiating mandate talks of addressing the appropriateness of countervailing procedures, presumably with the implication that Members may or may not regard countervailing remedies as appropriate in the services context. In order for countervailing remedies to be feasible, it would be necessary to make provision for selective action, which at present would not be possible under the MFN rule (unless an MFN exemption had been taken). It is also the case that countervailing remedies cannot in any event be brought to bear when the injurious effects of a subsidy arise in respect of the exports of a complainant (i.e. in the market of the subsidizing country or of a third country).

- What role do Members see for a countervailing remedy under GATS?
- If a countervailing remedy were to be developed, how much reliance should be placed upon it in relation to the alternative approach to imposing discipline via *ex ante* control of certain subsidies, combined with multilateral enforcement through dispute settlement?

INFORMATION ON GOVERNMENT PROCUREMENT OF SERVICES

Note by the Secretariat

Addendum

Document S/WPGR/W/7 (issued on 2 February 1996) provided an illustrative list, in paragraph I.1, of the aspects of existing procurement regimes on which Members may wish to obtain information. This addendum provides a brief, and merely indicative, description of what each item on the list could include.

(i) *Laws and regulations in force*

Indication of whether there are uniform laws governing public procurement and references to relevant laws, regulations or directives.

(ii) *Procurement procedures applied*

Description of the procedures used. These could differ according to the openness of the invitations to tender, or the number of suppliers able to bid. At least three broad categories of procedures are commonly distinguished: (a) public or open tendering procedures under which all interested parties may submit a tender; (b) selective or restricted tender procedures under which participation is limited to a certain number of selected suppliers, and only these suppliers are invited to submit a tender; (c) private contract or single tender in which the awarding authority contracts suppliers individually, and sometimes only a single supplier.

A description of the circumstances in which different procedures are used. For instance, if the method used depends on the value of the procurement, the thresholds could be given.

(iii) *Publicity for inviting tenders*

Description of how intended procurements are publicised. Whether invitations to tender are published; if so, where, in what languages and the details of the intended procurement that are normally published. Whether time limits are clearly specified. Whether the extent and form of publicity differs according to tendering procedures.

(iv) *Requirements laid down for possible suppliers*

Pertains to whether there are registration, residence or similar requirements. Whether there exist lists of approved suppliers. The procedures for checking the capability of firms applying for inclusion on tenderers' mailing lists. Details on other conditions for participation required from suppliers, such as financial guarantees, commercial standing and technical qualifications. ./.

(v) *Criteria for assessing bids and awarding contracts*

Description of the criteria taken into account in the award of tenders. For instance whether obtaining the best value for money spent is the aim and whether criteria other than price are taken into account. Details of any offset provisions, such as local content, technology transfer or countertrade requirements. Whether criteria differ according to sector of the economy.

The margin of choice or discretion allowed to the purchasing authority. For instance, there could be (a) automatic tender, where the contract is awarded on the basis of predetermined criteria, either the simple criteria of price, or price and other criteria; (b) discretionary tender procedures which involve acceptance of the bid which is most advantageous - the award of the contract is based on several criteria, some of which are predetermined, but which in general leave the awarding authority a certain measure of choice; and (c) negotiated tender in which the awarding authority negotiates freely with the potential supplier or suppliers as to the conditions of the contract. The relationship between these methods and the procedures for tendering.

(vi) *Disclosure of bids received and contracts awarded*

Description of how tenders are received, registered and opened. Whether entities are required to publish details of the contracts awarded and notify unsuccessful tenderers. Whether entities are required to publish, or provide to unsuccessful bidders, pertinent reasons why their bid was rejected.

(vii) *Treatment granted to domestic and foreign products and services and/or suppliers*

Description of any law, regulation, procedure or practice through which domestic products and services and/or suppliers are accorded treatment more favourable than that accorded to foreign products and services and/or suppliers, or products and services and/or suppliers of a Member are granted more favourable treatment than those of another Member - as for instance, under the provisions of

a regional integration agreement. Whether the time limits for tendering are set so as to allow sufficient time for foreign tenderers to submit bids.

(viii) *Procedures for hearing and reviewing complaints*

Description of provisions for parties to lodge complaints against the award of a contract. Whether challenges are heard by an administrative tribunal, a court or any other review body.

Working Party on GATS Rules

INFORMATION ON GOVERNMENT PROCUREMENT OF SERVICES

Note by the Secretariat

At the meeting of the Working Party on GATS Rules held on 8 December 1995, the Secretariat was requested to prepare a paper on possible approaches to collecting information relevant to the negotiations on government procurement of services. Two questions need to be addressed. First, *what* information should be collected? Secondly, *how* should the information be collected? The views expressed by Members during the meeting suggest the following possibilities.

I. What information should be collected?

Members may wish to obtain information in at least four different areas.

1. *Existing procurement regimes*

The aspects of procurement regimes which may be of interest, include:

- Laws and regulations in force;
- Procurement procedures applied;
- Publicity for inviting tenders;
- Requirements laid down for possible suppliers;
- Criteria for assessing bids and awarding contracts;
- Disclosure of bids received and contracts awarded;
- Treatment granted to domestic and foreign products and services and/or suppliers;
- Procedures for hearing and reviewing complaints.

2. *Procurement in regional and other plurilateral agreements*

The treatment of government procurement in the EU, NAFTA and other regional agreements may be reviewed.

3. *Economic importance of services procurement*

In seeking to estimate the economic importance of services procurement, several indicators may be relevant. For instance, it may be possible to obtain statistics for some countries on the share of services procurement, on both an aggregate and sectoral basis, in:

- total procurement;
- total domestic demand;
- total domestic output.

4. *Perceived obstacles to creating multilateral disciplines on services procurement*

Additional information in this area may be important in helping to identify the level of multilateral disciplines acceptable to Members. It may also be useful to obtain information on how Members view the possibility of introducing a certain degree of flexibility in the application of national treatment and other disciplines (as discussed in Section IV.1 of document S/WPGR/W/3).

II. How should the information be collected?

The appropriate method of collecting information would clearly depend on the nature of information desired. The possibilities include:

1. *A standard questionnaire*

A questionnaire would probably be best suited to collecting information on existing procurement regimes, but could also help in obtaining estimates of the economic importance of services procurement and in identifying obstacles to creating multilateral disciplines on procurement. While it is possible to obtain comprehensive and uniform information on all Members through a standard questionnaire, the process of designing such a questionnaire, obtaining responses and compiling them, would necessarily take a significant amount of time.

2. *Voluntary provision of information*

Rather than go through the process of designing and responding to a questionnaire, certain information could be provided on a voluntary basis. Members may wish to limit individual discretion on content and time of provision by reaching an agreement on both issues.

3. *Bilateral or plurilateral discussions*

Such discussions may be best suited to identifying factors affecting the creation of multilateral disciplines on procurement and to addressing some of the other questions identified in document S/WPGR/W/3.

4. *Other research*

The Secretariat could examine selected provisions affecting services procurement in regional and other plurilateral agreements.

III. Some existing sources:

1. The OECD issued volumes on Government Purchasing in 1966 and 1976 describing regulations and procedures of OECD member countries (OECD, Paris, 1966, 1976). Even though the information contained in these volumes is now out of date, they may provide some idea of what information needs to be collected and how it should be presented.
2. The Committee on Government Procurement under the Tokyo Round decided to draw up a checklist of issues which would serve as a basis for the description by each Party of the main elements of its implementing legislation (30 January 1981, GPR/4). A new checklist, based on the one contained in document GPR/4, is currently under consideration in the Committee under the new Agreement on Government Procurement in the context of a larger debate on the modalities of notifying implementing legislation.
3. APEC has recently designed a format for a survey on government procurement systems and publication arrangements for procurement opportunities in member economies.
4. Article VI:9 of the GPA that entered into force on 1 January 1981 (Article VI:10 of the 1988 revised text) required Parties to collect and provide statistical information to the Committee on Government Procurement on contracts awarded by all procurement entities under the Agreement. Article XIX:5 of the new GPA that entered into force on 1 January 1996 widens the reporting requirements to include the services contracts which are now covered by the Agreement.
5. The Trade Policy Reviews of individual countries contain a brief section on procurement laws, regulations and procedures.

Working Party on GATS Rules

COMMUNICATION FROM THAILAND

A Discussion Paper on GATS Emergency Safeguards

The following communication is circulated at the request of Thailand to Members of the Working Party on GATS Rules.

Rationale for GATS Emergency Safeguards

1. One of the unfinished businesses of the Uruguay Round Multilateral Negotiations is the negotiations on emergency safeguard measures.
2. Article X of the GATS provides, *inter alia*, that “there shall be multilateral negotiations on the question of emergency safeguard measures based on the principle of non-discrimination. The results of such negotiations shall enter into effect on a date not later than three years from the date of entry into force of the WTO Agreement”. The question in this provision is not the question of whether or not there is a need to have a provision concerning emergency safeguard measures, but the question of how best to provide a provision on emergency safeguard measures that really effective for resolving the emergency situations of trade in services on a non-discriminatory basis.
3. It is true that there are a number of safety valves provided for in the GATS; such as a Member can choose to open the service sectors that it is ready to compete with foreign companies; it can also exempt itself from applying certain advantages, favours, privileges, or immunities to all GATS Members by means of the MFN Exemption. However, it is generally agreed that the Members have the obligation to progressively liberalize their trade in services. The developing Members may have certain leniency towards such liberalization, but still they have to increase their participation in this process. The MFN Exemptions are not eternal. In principle, the MFN Exemptions must be terminated within 10 years; and in fact, they are subject to review within 5 years. In addition, once a Member opens its service sectors, the Member must extend national treatment to all other Members in relation to these service sectors without exception. Consequently, in the foreseeable future, near or far, a Member may encounter a situation in which it needs to take emergency safeguard measures to alleviate or correct the situation.

4. It may also be argued that the GATS has already contained provisions concerning restrictions to safeguard the balance of payments, general exceptions, and security exceptions; however, those safeguard provisions may not in all cases provide relieve or solution to the emergency safeguard situations.

5. In this connection, it should be mentioned that the GATT also contains the provisions concerning these matters, but yet the GATT also has the Article XIX relating to emergency action on imports of particular products. Moreover, the Agreement on Textiles and Clothing not only provides for the situations whereby normal emergency safeguard measures under the Article XIX can be invoked, it also provides for the special situations whereby special emergency safeguard measures can be applied.

6. Therefore, there should be no valid reasons for not contemplating and providing for provisions in the GATS to take care of the situations whereby the emergency safeguard measures are needed, take into account the fact that the GATS is quite new to the Members, and thereby it could not in all circumstances be envisaged to cover all of its negative impacts.

Nature of GATS Emergency Safeguards

7. In the context of trade in services, unlike the context of trade in goods whereby the goods in questions may be stopped at the borders for emergency safeguard reasons, it may be argued that the same measures as employed in the case of trade in goods cannot be undertaken. However, the measures to be employed in the context of trade in services are not necessary be similar to or the same as the measures employed in the context of trade in goods.

8. The measures in the context of the former may take the forms of a temporary freezing of the expansion of commercial presence of foreign companies in certain sector of trade in services, or a temporary suspension of the application of national treatment to the new foreign companies in that sector while recognizing the acquired rights of those who had already established their commercial presence. These are just the measures that could be conceived of as the possible measures for the emergency safeguard situations. Further researches and works must be done in order to arrive at the best possible measures.

Actions to be taken

9. If it could be of any assistance, the WTO secretariat may be asked to provide a detail study on how best to provide the said rules, and in this context, the Secretariat should undertake to explore the rules, examples and precedents on this subject not only from recent multilateral treaties, but also from the old or existing bilateral treaties, as well as national legislations on the subject. The reason for this undertaking is that the subject of trade in services on a multilateral basis may be so new and innovation that rules, examples or precedents on the subject could not be found in the recent multilateral treaties. The attempt to find the rules, examples or precedents on this subject but circumscribed it to the recent multilateral treaties may be tantamount to the attempt to find the rules, examples and precedents on this matter in the places where they may not exist. Moreover, bilateral treaties and national legislations on the subject can be treated as a reflection of practice of states on the matter, and that could be served as a starting point of the process of negotiations on the provisions on emergency safeguard measures.

10. The Secretariat may also be requested to contemplate the new appropriate rules on this matter, since the matter may be so new and has never had rules, examples nor precedents before. However that does in no way mean nor imply that the matter is not important nor necessary. On the contrary, the absence of the rules for the matter of utmost important such as this does signify that the Members of this WTO should begin the negotiations and conclude them as soon as possible with the view to providing the rules to govern the undertaking of the measures within the period provided for in the Article X of the GATS.

Working Party on GATS Rules

COMMUNICATION FROM AUSTRALIA

Some Conceptual Issues Concerning the Application of Safeguards to Trade in Services

The following communication is circulated at the request of Australia to Members of the Working Party on GATS Rules.

The Working Party on Rules established by the Council for Trade in Services is now considering the question of emergency safeguards in trade in services. This paper offers a preliminary consideration of some of the conceptual issues participants in the negotiations may wish to consider.

The Negotiating Mandate

The mandate for the negotiations on emergency safeguards stems from Article X.1 of the *General Agreement on Trade in Services (GATS)* which states that there shall be multilateral negotiations on the question of emergency safeguard measures based on the principle of non-discrimination. The mandate also requires the results of these negotiations to enter into effect no later than three years from the date of the entry into force of the WTO Agreement, i.e. no later than 1 January 1998.

The Uruguay Round negotiators therefore have left it to the members of the working party to suggest rules for the imposition of emergency safeguards, subject only to the observance of the principle of non-discrimination.

The Characteristics of Services and Trade in Services

Services are intangible. For the most part, they cannot be stored. Usually there is a need for some interaction between the consumer and the producer. Many services can be traded electronically across national borders which makes the imposition of controls very difficult. Some services can only be traded through some form of commercial presence which may have an independent productive

capacity. Another way of trading services derives from the movement of people, either as consumers or as suppliers.

What all this means is that the normal border measures available under GATT Article XIX for the administration of trade in goods are available only indirectly or not at all in the case of services. It is possible also that the methods to be used would have to be fairly blunt to have any effect. The task of the working party is to determine whether alternative means to impose safeguards in trade in services are available and, indeed, practicable.

Members may also wish to consider the extent to which services are intermediate products in their economies. An inevitable effect of safeguards action is a rise in the cost of the affected product. This will give the relevant domestic industry some breathing space. However, where an imported service can serve equally as an intermediate or as a final product, and many are of this kind, an unintended result of safeguards action may be to make other industries less competitive. This is of course well understood from the experience of safeguards action in trade in goods.

Some Basic Issues

This paper accepts that countries might experience temporary import surges affecting domestic industry. It also accepts that countries might wish to have available to them a set of measures to deal with this phenomenon in order to set in train a process of domestic adjustment. This section of the paper therefore deals with some issues they will have to clarify before they can take effective safeguards action.

Emergency safeguards are temporary and selective measures designed to limit imports or limit growth in imports to enable a particular industry to adjust to heightened competition from foreign suppliers. They would require some temporary derogations from the GATS rules and commitments. In order for safeguards action to be effective, it must be relatively easy to impose, and it must have an impact within a reasonable time. Additionally, it must be applied on a non-discriminatory basis.

The *Agreement on Safeguards*, which represents the results of years of implementing and negotiating history on safeguards in the GATT for trade in goods, is the main model available to the members of the working party. It says that a country has the right to apply a safeguard measure if a product is being imported in such increased quantities, absolute or relative to domestic production, and under such conditions as to cause or threaten to cause serious injury to the domestic industry that produces like or directly competitive products.

Clearly, if the rules of the Agreement of Safeguards were adapted to trade in services, three possible threshold issues would immediately come to mind. The first is a definition of •import in increased quantities•. The official statistics for trade in services published in most countries do not at present permit an identification of import surges in most services because of their high level of aggregation, long

interval between releases and a lack of comparability. In order to overcome this statistical problem, it could be necessary to obtain data from firms in the affected industries or from industry associations. Such an approach might lead to the production of information lacking in objectivity, particularly as the least efficient firms are most likely to initiate safeguards action. Nor is it possible to look at the statistics of the supplying countries deemed to be part of the problem, since their statistics are likely to be equally deficient.

The second issue that would have to be looked at is that of *serious* injury or threat of injury. This is related to the statistical problem, except that in this case adequate domestic production and performance statistics would have to be available for a valid demonstration that there is indeed a threat of injury. There is probably sufficient material available to assist the working party with an understanding of the meaning of injury or threatened injury. Indeed, similar issues rise in the context of anti-dumping and countervailing duties.

Third, there would have to be some agreed definition of what constitutes a like or directly competitive product. Services production can be highly differentiated because the needs of consumers vary greatly. The problem becomes immeasurably more complex when services are sold as a package of activities or as part of, for example, a piece of machinery.

Consideration of the safeguards question will also have to include another set of issues which can be raised here in a preliminary way only. First, there is, for example, the question of what constitutes domestic industry and what its standing in any safeguards action will be. Second, an analysis of how the causal link between increased imports and the difficulties experienced by the domestic industry will be assessed is necessary. Third, to what extent should it be possible for a Member to institute safeguards action, and how should any limits be defined. Fourth, the imposition of safeguards action demands a right for compensation to affected trading partners.

Two Practical Examples

The following paragraphs briefly draw attention to the kind of complexity Members can expect once they consider imposing safeguard action.

There is no doubt that in the case of airline services, it would be easy to demonstrate that an economy seat on one airline is directly competitive with an economy seat on another if they fly exactly the same route. If, however, the two airlines fly on different long-distance routes to the same or nearly the same destinations, one could argue that the seats on offer are no longer directly competitive. Aviation hard rights are, of course, not covered by the GATS, but a similar case could be made for shipping routes and capacity.

In financial services, on the other hand, product differentiation has reached a very high degree. Banks, stockbrokers, insurance companies or funds managers would agree that their products are directly competitive, but only at an aggregated level. They probably would dispute, for example, that a share trust offering access

to European shares is the same as one offering participation in Asian equities. Similarly, the prospective investor would not view them the same and would not necessarily buy the one if the opportunity to buy in the other had disappeared. Yet it is quite possible that the same firms offer them both.

Imposing Safeguards Action in Trade in Services

A fundamental question is that of how safeguards action would be taken to deal with an occurrence likely to cause or threaten serious injury. In other words, what measures would a country take in order to influence the flow of imports? In trade in goods, countries can rely in the first instance on border measures, such as the imposition of quotas or the withdrawal of a tariff concession, to achieve their aim. Such border measures would be difficult to apply to many services because of their intangible nature. It appears therefore that in services, effective border measures are likely to be limited to restrictions on the movement of consumers and suppliers.

A measure with broader applicability would be the imposition of restrictions on foreign exchange transactions. However, such a measure may not be legal under Article XI and XII of the GATS which, while allowing members to safeguard their balance of payments by adopting or maintaining restrictions on trade in services on which they have undertaken specific commitments, including on payments and transfers for transactions related to such commitments, also specifically states that such restrictions shall not be adopted or maintained for the purpose of protecting a particular service sector (Article XII.3). Safeguards actions always would entail a derogation from one or more articles contained in the GATS, and it is possible, therefore, that restrictions on foreign exchange availability could be part of legitimate safeguards action in services.

Another way to impose safeguards action would be to institute some kind of turnover tax designed to increase prices. It is doubtful in many cases, however, that the impact of such a measure could be confined to imported services.

Emergency Safeguards Action by Modes of Supply

This section of the paper attempts to identify some general issues that could arise with the application of safeguards according to the four GATS modes of supply. It does not pretend to be in any way exhaustive.

- 1) Cross-border supply: this type of supply, where there is no necessity for the exporter and the importer to meet, takes place mainly through electronic means. Although the technology might be available to influence the import of services it is unlikely that members would consider this a useful approach. It would of course be possible to issue a regulation restraining cross-border trade, but it probably could only be enforced through the foreign exchange mechanism. In this context, it is worth noting that the UNCTAD/World Bank publication *Liberalizing International Transactions in Services: A handbook* makes the point that in most cases, no sound economic case for restricting cross-border services imports by means of quantitative restrictions can be made.
- 2) Consumption abroad: this mode involves residents going abroad to purchase services. The most important of these probably are tourism services. Non-discriminatory emergency safeguards are probably easier to institute in this case. Methods used might include travel restrictions, travel taxes, a quota on new passports and a limit on the foreign exchange persons leaving the country are allowed to take with them.
- 3) Commercial presence: two distinct situations need to be considered under this mode of supply: (a) the scope for applying emergency safeguards before a commercial presence is established, and (b) the scope for doing so after establishment has occurred. In the first situation, it would be possible for a country to prevent new companies from establishing if there was a surge in foreign companies seeking to establish, and if an assessment had been made that this was causing injury or threatening to cause injury. In the second case, further action would be very difficult. It would also entail a reversal or impediment of national treatment and market access commitments for companies already established.
- 4) Presence of natural persons: it would appear that there are three distinct situations under which natural persons supply a service, as defined in Article XXVIII(b) of the GATS. The first situation is one where business visitors enter a country to explore export opportunities. The second applies to a person actually supplying or delivering a service, and the third case covers natural persons who are employees of service providers. A surge in the number of entrants in the first two cases would be relatively easy to identify and deal with, even though it is not immediately obvious why a Member would want to place restrictions on the number of persons entering for the purpose of exploring business opportunities. The remedies for this situation could involve tightening the market access limitations on the number of natural persons that may be employed in a particular service sector through a temporary change to the horizontal commitments.

The third situation covers natural persons, such as executives, senior managers, specialists and technical advisers who enter as intra-corporate transfers. Denying entry to some key personnel could certainly affect the competitiveness of a foreign supplier, but this could be very much a delayed action because it would

have to be taken when temporary entry visas expire. Visas could also be cancelled, but this may be subject to domestic appeals procedures.

Where a country decides to impose safeguards on one mode of supply only, it would of course be quite easy to circumvent the measure by supplying through the other three modes, but this would depend on the service to be supplied and the type of commitment made by the Member taking the action. To be effective, therefore, safeguards action would have to cover all modes of supply.

Conclusion

The preceding discussion does not deny that temporary import surges in services likely to cause or threaten to cause injury to domestic industry may occur. It notes, however, that the statistical backing for such a claim would not be available in most countries, bearing in mind that statistical collection and dissemination covering services production and trade needs to be improved on the whole. Safeguard action therefore would have to be based on non-transparent anecdotal evidence.

Members will have to recognise that the history of safeguards action on goods has essentially left the process in the hands of the authorities of the importing country. The results of this have often led to concerns about objectivity and fairness. The WTO *Agreement on Safeguards* has tried to codify procedural rules and to increase transparency, but matters still are largely in the hands of the investigating authorities. In the case of services, the more amorphous nature of the issues may give even greater discretion to the importing country. Some of these issues may in fact not be capable of being dealt with through rules.

The second conclusion is that the imposition of emergency safeguards in trade in services poses challenges that are even greater than those experienced in safeguard action in goods trade. This is due mainly to the fact that services are intangible, that most services cannot be stored and the ways in which services are traded.

It appears in fact that in many cases the only effective action available to GATS Members to influence trade in services would lie in a policy of allocating foreign exchange based on supporting the safeguards objective.

One aspect worth considering is whether participants in the negotiations already have domestic safeguards legislation requiring or permitting them to initiate action on the basis of criteria set out in the relevant laws. If this were the case, the working party should be able to benefit from national experience acquired in this way.

Working Party on GATS Rules

SAFEGUARDS PROCEDURES IN REGIONAL TRADE AGREEMENTS

Note by the Secretariat

1. At its second meeting on 18 October 1995, the Working Party requested the Secretariat to provide information available on any instances where services safeguards had been invoked, and also on procedures and criteria established under various regional trade agreements for the invocation of services safeguards. The Secretariat was unable to identify any cases where service-related safeguards had been invoked. Information on procedures and criteria for invocation of such measures under different regional agreements is presented below.

2. The information provided in this note focuses on sector-specific or industry-specific emergency safeguards in the sense of GATT Article XIX, as distinct from general safeguard provisions such as those relating to balance-of-payments measures under GATS Article XII, or safeguards of a continuing nature which constitute exceptions to general obligations in the GATS Article XIV sense. It should be emphasized, however, that these different criteria for invoking safeguards are not always treated separately, and neither are the associated procedures. The note distinguishes between the *justification* for measures, the required *procedures* for invocation, and the nature of permissible *measures*.

Procedures and Criteria Established under Regional Trade Agreements for Invoking Services Safeguards

The Convention establishing the Europe Agreement (with Poland)

Article 51 envisages that during the transitional periods, specified therein, the signatory concerned² may introduce derogating measures - including emergency safeguard measures.

Justification

¹The agreement between the EU and Poland is used as an example of the genre. Very similar agreements have been signed between the EU and a number of other East European countries.

²There is an asymmetry in the Europe Agreements, in the sense that this safeguard mechanism is not available to the European Community.

A national industry may have the right of recourse to emergency safeguards if it is:

- (i) Undergoing restructuring;
- (ii) Facing serious difficulties, particularly where these entail serious social problems;
- (iii) Facing the elimination or drastic reduction in total market share held by national companies or nationals in a given sector or industry in the importing country;
- (iv) Newly emerging.

Procedures

- (i) Prior notification to the Association Council of the concrete measures to be introduced;
- (ii) The country taking the safeguard measure must consult the Association Council;
- (iii) Measures cannot be imposed during at least 30 days following notification to the Council;
- (iv) In the case of urgency in the face of a threat of irreparable damage, measures may be imposed without prior consultations but the country taking the measure must consult the Association Council immediately after the introduction of the measure.

N.B. After the transitional periods referred to above, these measures can only be introduced by the authorization of the Association Council and under conditions determined by the latter.

Measures

The measures shall :

- (i) Be reasonable and necessary in order to remedy the situation;
- (ii) Not apply to Community companies and nationals already established in the territory of the importing signatory;
- (iii) Whenever possible, grant preferential treatment to Community companies and nationals;
- (iv) Be removed in accordance with the established transition arrangements.

The North American Free Trade Area (NAFTA)

The NAFTA contains an emergency safeguard provision relating to financial services.

Justification

(i) If the sum of the authorised capital of foreign commercial bank affiliates (as defined in the Schedule of Mexico to Annex VII), measured as a percentage of the aggregate capital of all commercial banks in Mexico, reaches 25%, Mexico may request consultations with the other parties on the potential adverse effects arising from the presence of commercial banks of the other Parties in the Mexican market.

(ii) In considering the potential adverse effects, the Parties shall take into account:

a) the risk of undue control of the Mexican payments system by non-Mexican persons;

b) the effect foreign commercial banks established in Mexico may have on Mexico's ability to conduct monetary and exchange-rate policy;

c) the adequacy of the agreement in protecting the Mexican payments system.

Procedures

(i) A request for consultations to be completed expeditiously to the parties concerned;

(ii) If the consultations fail to achieve a consensus, any party may request the establishment of an arbitral panel which would present its determination within 60 days.

Measures

No indication is provided of the nature of so-called remedial action.

Agreement on the European Economic Area (EEA)

Emergency safeguard measures are permitted under the EEA.

Justification

The criteria for triggering safeguard measures are the following:

(i) Serious economic, societal or environmental difficulties of a sectoral or regional nature that are liable to persist.

Procedures

The invoking party shall:

- (i) Notify without delay the other party through the EEA Joint Committee and provide all relevant information;
- (ii) Immediately enter into consultations in the EEA Joint Committee;
- (iii) Not take any measure until one month has elapsed after the date of notification unless consultations have been concluded earlier;
- (iv) In case of exceptional circumstances requiring immediate action excluding prior examination, protective measures strictly necessary to remedy the situation may be imposed forthwith;
- (v) Notify the measure immediately after its imposition;
- (vi) Consult on the measures every three months from the date of its adoption, with a view to its early abolition or to the limitation of its scope of application;
- (vii) The EEA Joint Committee may be asked to review such measures at any time.

Measures

- (i) Such measures shall be restricted with regard to their scope and duration to what is strictly necessary in order to remedy the situation;
- (ii) Priority shall be given to such measures as will least disturb the functioning of the agreement.

The Andean Common Market

Emergency safeguard provisions are contemplated under the Cartagena Agreement.

Justification

A safeguard action may be taken if, as a result of compliance with Liberalization Program of the Agreement, a member suffers difficulties related to fiscal income.

Procedures

The member may request the Board to propose to the Commission measures to resolve the problem.

Measures

The measures are not specified, but the relative degree of economic development of the country concerned is to be taken into account.

European Community (EC)

The EEC safeguard provision under the general law of the EEC treaty encompasses a wide range of situations that might trigger safeguard action, including emergencies.

Justification

The grounds for safeguard measures are the following:

- (i) Economic difficulties resulting from commercial policy measures taken in accordance with the treaty obligations of any Member state.

Procedures

- (i) A request must be addressed to the Commission, which then decides whether or not to authorise the measure;
- (ii) In case of an emergency, during the transition period, a Member state may take the necessary measure and then notify it to affected member states and the Commission;
- (iii) The Commission is empowered to require abolition or amendment of the measure.

Measures

The types of protective measures permitted are not specified, but measures must:

- (i) Create the least possible disturbance to the functioning of the common market;
- (ii) Take into account the need to expedite, as far as possible, the introduction of the common customs tariff.

Working Party on GATS Rules

GOVERNMENT PROCUREMENT OF SERVICES

Note by the Secretariat

I. Introduction

1) The lack of multilateral rules covering government procurement has been perceived as a significant gap in the international trading system. Government procurement typically represents between 10 and 15 per cent of GNP. Procurement of services is a substantial part of this total. Currently, only the 22 signatories to the Agreement on Government Procurement (GPA) accept international disciplines on procurement in certain services sectors¹ while procurement of services in other countries is not subject to any multilateral disciplines.²

2) Article XIII:2 of the General Agreement on Trade in Services (GATS) stipulates that there shall be multilateral negotiations on government procurement in services under this Agreement within two years from the date of entry into force of the WTO Agreement. Accordingly, the Secretariat was asked to prepare this note by the Council for Trade in Services at its first meeting on 1 March 1995.

3) The next section of this note describes the treatment of government procurement in the GATS. Section III examines the GPA, highlighting the disciplines relevant to procurement of services. Section IV deals with certain issues that negotiators may need to address as they take up the GATS Article XIII mandate.

II. GATS and government procurement

4) Article XIII.1 exempts laws, regulations and requirements governing government procurement from the disciplines contained in Articles II (MFN Treatment), XVII

¹There are, in fact, two Agreements on Government Procurement. The first was negotiated during the Tokyo Round of Trade Negotiations and entered into force on 1 January 1981, and the second was negotiated simultaneously with the Uruguay Round negotiations and will enter into force on 1 January 1996. The signatories to the more recent Agreement are Canada, the 15 Member States of the European Union, Israel, Japan, Korea, Norway, Switzerland and the United States. The older Agreement includes Hong Kong and Singapore but does not include Korea. This paper focuses on the more recent Agreement which is the only one of the two to cover services as such.

²The Understanding on Commitments in Financial Services, described in Section II, does create certain disciplines for Members who have subscribed to it.

(National Treatment) and XVI (Market Access). Exempted government procurement is defined in the Article to include •services purchased for governmental purposes and not with a view to commercial resale or with a view to use in the supply of services for commercial sale. •

5) To an extent, Article XIII:1 of the GATS mirrors Article III:8a of the GATT which exempts government procurement of goods from the national treatment obligation.³ In both cases, the exemption reflects the continued desire of certain Members to favour local (or national) products and suppliers when awarding contracts. The MFN exemption in Article XIII of the GATS was included so that signatories to the GPA would not be obliged to extend the benefits of the national treatment and other obligations that they have agreed to under the GPA on an MFN basis to countries who have not accepted similar disciplines.⁴

³ There is no strict counterpart in the GATT for Article XVI of the GATS on Market Access, though this Article includes elements of what is contained in Articles II and XI of the GATT.

⁴Article XVII.2 of the GATT, which exempts government procurement from the provisions on state trading enterprises, states that "with respect to such imports, each contracting party shall accord to the trade of the other contracting parties fair and equitable treatment." The precise content of this obligation has never been tested.

6) Notwithstanding Article XIII of the Agreement, certain disciplines on procurement have already been created in the area of financial services. Section B:2 of the Understanding on Commitments in Financial Services states that •each Member shall ensure that financial service suppliers of any other Member established in its territory are accorded most-favoured-nation treatment and national treatment as regards the purchase or acquisition of financial services by public entities of the Member in its territory.• The Understanding has been accepted as a basis for making commitments by only 27 countries (see Annex 1 of this paper). Two aspects of the Understanding are noteworthy. First, the benefits of the Understanding are also extended to Members who have not subscribed to it, and second, the coverage of the obligations has been limited only to entities established in the territory of the Member.

III. The Government Procurement Agreement and Services

7) The new GPA, to which there are 22 signatories, will enter into force on 1 January 1996. Its objective, stated in the preamble, is to contribute to the liberalization and expansion of world trade. This is to be achieved by eliminating discrimination against, and between, foreign products, services and suppliers, by enhancing the transparency of laws and practices, and by ensuring fair, prompt and effective enforcement of international provisions on government procurement. The renegotiation of the GPA during the Uruguay Round focused on expanding its coverage to services contracts, sub-central government entities and public undertakings, and on strengthening its enforcement provisions.

8) This section attempts to highlight certain aspects of the GPA which may be relevant to the negotiations on government procurement of services. It is not intended here to provide an exhaustive description of the new GPA.⁵

⁵Blank (1995), Hoekman and Mavroidis (1995), and Messerlin (1994) contain useful discussions of the GPA.

1. *Scope and coverage*

9) The Agreement applies to any law, regulation, procedure or practice regarding any procurement, above a certain threshold value, by entities which are specifically listed by each party.⁶ Furthermore, only services expressly indicated by the signatory are covered by the GPA. Thus, the GPA generally adopts a positive list approach for services in line with the approach of the GATS.⁷

10) There are three entity annexes: Annex 1 lists covered central government entities; Annex 2 lists sub-central government entities; and Annex 3 lists •all other entities that procure in accordance with the provisions of this Agreement• which is meant to include entities such as public undertakings (e.g. public utilities). Since it was not possible to arrive at a common definition of entities, particularly public undertakings, the Agreement takes the flexible approach of allowing signatories to determine their lists of entities through the exchange of specific concessions.

11) The inclusion of sub-central entities is a major feature of the new GPA. Thus, the United States Annex contains, for instance, a list of 24 States which have accepted to open their tenders to foreign competition.⁸ The Annex of the European Communities includes all sub-central entities, such as state entities in the case of federal Member states like Germany and regional entities in the case of centralised Member states like France, as well as local authorities. The Japanese Annex includes many prefectorial governments and cities covered by the Local Autonomy Law.

12) The Agreement also addresses the issue of privatization and other circumstances where governments lose influence over decisions of public entities. Article XXIV:6(b) states that •where a party wishes, in exercise of its rights, to withdraw an entity from Appendix I on the grounds that government control or influence over it has been effectively eliminated, the party shall notify the Committee.• Thus, it is the end of public control or influence rather than the change of ownership which is deemed to be the relevant consideration.

13) The coverage of services procurement in the GPA is limited by certain factors. First, as noted above, only contracts above a certain threshold value are included (see Table 1). Secondly, most Parties have excluded from their lists a range of services sectors (see Table 2). These include postal services, basic telecommunication services, audiovisual services, distribution services, educational services, health-related and social services, tourism and travel, and recreational, cultural and sporting services. The empirical significance of these exclusions is not clear. Finally, there is a range of sectoral non-application and reciprocity provisions contained in the Annexes listing the services. The most general reciprocity provisions are of the form: •a service listed in Annex 4 is covered with respect to a particular Party only to the extent that such Party has included that service in Annex 4.• But there are also other specific non-application or reciprocity provisions pertaining to sectors, thresholds and the application of Article XX dealing with challenge procedures. Parties agreed with each other on the inclusion of such provisions presumably with a view to ensuring a balance of advantage in access to procurement

⁶Appendix 1 of the GPA contains five Annexes for each signatory. The first three Annexes contain lists of covered entities, the fourth an indication of covered services, and the fifth pertains to construction services.

⁷The United States is the only Party to the GPA to have included a negative list of services not covered by the Agreement.

⁸Once the main commitments in the bilateral agreement between the United States and the European Communities will have been officially notified to the signatories to the GPA and incorporated into their Annexes, the list of entities in Annex 2 of the United States will increase from 24 to 37.

opportunities (see Annex 2 of this paper for a discussion of the non-application and reciprocity provisions in the GPA).⁹

⁹These departures from the principle of MFN treatment were the reason given by Hong Kong, a signatory of the Tokyo Round procurement agreement, for declining to sign the new GPA.

2. *Basic disciplines: National Treatment and MFN*

14) Article III of the GPA states the fundamental principles of non-discrimination. National Treatment means that products, services and suppliers from other parties to the Agreement should benefit from a treatment •no less favourable• than domestic products, services and suppliers. MFN treatment prohibits discrimination between products, services and suppliers of other Parties to the Agreement. The two principles are stated both in terms of the country of origin (Article III:1) as well as in terms of the degree of foreign affiliation or ownership (Article III:2).¹⁰

15) Article III.3 states that •the provisions of paragraphs 1 and 2 shall not apply to customs duties and charges of any kind imposed on or in connection with importation, the method of levying such duties and charges, other import regulations and formalities, and measure affecting trade in services other than laws, regulations, procedures and practices regarding government procurement covered by this Agreement. •

16) This provision makes it clear that the GPA contains rules only on the government purchase of services, and does not deal with other measures affecting market access and competitive conditions for services and service suppliers. These measures remain subject to GATS rules. Thus, the benefit that may be gained from any concession on services in the context of the GPA is subject to the commitments on market access and national treatment under the GATS. It may be noted that while national treatment is a general obligation in respect of internal measures in the goods context, it is subject to all the limitations contained in a Member's schedule in the services context.

3. *Procedural disciplines: Transparency and other rules on tendering procedures*

17) In order to ensure the implementation of its basic principles, the GPA lays down detailed operational rules. There is particular emphasis on transparency at each step of the procurement process. *Ex ante* transparency requirements stipulate that adequate efforts be made to inform all interested bidders about relevant aspects of the procurement in question (Articles VII to XVII). *Ex post* transparency requirements stipulate that adequate information be provided regarding the decisions that are taken (XVIII and XIX). Article XVII specifies transparency rules vis-a-vis suppliers in countries not Parties to the Agreement on the basis of reciprocity. Article XIX lists the annual statistics that parties have to collect and provide to each other through the Committee on Government Procurement.

¹⁰Article III:1 states the principles of National Treatment and MFN in terms of the country of origin, and sets the treatment accorded to "domestic" (or local) products, services or suppliers as the standard for "National Treatment". Article III.2 prohibits discrimination within the category of "domestic" (or locally established) suppliers on the basis of foreign ownership or affiliation. The standard for "National Treatment" in Article III:2 is the treatment accorded to the "most national" of products, services or suppliers.

18) The GPA also contains an obligation to *justify* the decisions that are taken. Thus, Article XVIII:2 stipulates that each *entity* shall, if requested, provide to an unsuccessful tenderer information justifying its decision. Article XIX:2 imposes an obligation on the *procuring government* to provide, if requested by the government of an unsuccessful tenderer, information necessary •to ensure that the procurement was made fairly and impartially. •

19) Other disciplines on tendering procedure include those pertaining to: technical specifications (Article VI); qualification of suppliers (Article VIII); tender notices and their selection procedures (Article X); time-limits for tendering and delivery (Article XI); submission, receipt and opening of tenders and awarding of contracts (Article XIII);¹¹ conditions under which, and the manner in which, an entity may conduct negotiations with potential suppliers (Article XIV) and resort to limited tendering (Article XV).

4. *Enforcement mechanisms: Consultation, challenge procedures and dispute settlement*

20) Several features have been introduced in the GPA to adapt the dispute settlement rules to the specific nature of procurement - often a single event, costly to reverse, and where modifications to national rules of general application would not necessarily provide adequate guarantees of non-recurrence. One is that the signatories collectively acting as the Dispute Settlement Body may authorize consultations regarding remedies when withdrawal of measures found to be in contravention of the Agreement is not possible (Article XXII:3).

21) A second significant feature is the introduction of the challenge procedures (Article XX). Article XX:2 stipulates that •each Party shall provide non-discriminatory, timely, transparent and effective procedures enabling suppliers to challenge alleged breaches of the Agreement arising in the context of procurements in which they have, or have had, an interest. • Article XX:7(a) requires that challenge procedures must provide for rapid interim measures to correct breaches of the Agreement and to preserve commercial opportunities, which may result in suspension of the procurement process. The procedures must also provide for a correction of the breach of the Agreement or compensation for the loss or damages suffered, which may be limited to costs for tender preparation or protest (Article XX:7(c)).

5. *Developing Countries: Special and differential treatment*

22) Article V of the Agreement contains special provisions on special and differential treatment of developing countries - both in terms of providing them increased opportunities to export and in imposing less stringent disciplines on them. Article V:1 obliges Parties to take into account the development, financial and trade needs of developing countries, in particular least developed countries, in the implementation and administration of the GPA. Article V:2 and V:3 state that Parties shall, both in the application of laws, regulations and procedures affecting government procurement, and in the preparation of their coverage lists, facilitate increased imports from developing countries. Article V:4 of the GPA allows developing countries to negotiate mutually acceptable exclusions from the rules on national treatment with respect to certain entities, products or services that are included in their lists of entities. Article V:5 allows developing countries to request the Committee on Government Procurement to grant similar exclusions even after they have acceded to the Agreement. Articles V:4 and V:5 also allow for exclusions (presumably from the MFN rule) for developing countries participating in regional or global arrangements among developing countries. Article V also contains provisions on technical assistance for developing countries, and special provisions for least developed countries.

¹¹ It is stipulated in Article XIII:4(b) that the entity must make the award to the tenderer who is fully capable of undertaking the contract and whose tender is either the lowest or the most advantageous in terms of the specific evaluation criteria set forth in the notices or tender documentation.

23) While developed countries are forbidden the use of offsets, such as domestic content or counter-trade requirements, developing countries may continue to use them, provided they are negotiated during accession, clearly defined, and are applied non-discriminatorily (Article XVI). It is also stipulated that such offsets can only be used for qualification to participate in the procurement process and not as criteria for awarding contracts. This implies that offsets can be conditions that are specified in the tender documentation, but a firm cannot be awarded a contract on the basis of exceeding the minimum offset requirement.¹²

IV. Some issues for consideration

24) Given the GATS mandate and the existence of the GPA, a basic question to be answered is how Members would like to see the present situation regarding government procurement evolve. Would they wish to maintain the status quo, in which the GATS exemption of government procurement would coexist with the plurilateral GPA? Or is it possible to devise multilateral disciplines on government procurement within the GATS context? In the latter case, would Parties to the GPA extend its benefits on an MFN basis to all GATS Members or is a dual structure of commitments envisaged?

25) One aspect of the problem is the tension in the present context between the two fundamental principles of international trade law: national treatment and MFN. On the one hand, the elimination of the MFN exemption in Article XIII of the GATS with unchanged national treatment disciplines in countries not signatory to the GPA may not be acceptable to the GPA signatories. Even within the GPA, Parties have found it difficult to accept unconditionally an MFN obligation vis-a-vis other Parties. Most Parties have reserved the right to discriminate in particular sectors against other parties who, in their perception, have not accepted adequate disciplines. On the other hand, the countries who are not currently signatory to the GPA have generally revealed a reluctance to seek its membership.

26) Is it possible to devise disciplines on the propensity to protect in procurement which are acceptable to all countries and, at the same time, are not so weak as to prompt some to seek a derogation from the MFN principle? The next section examines alternative approaches to the question of national treatment and certain related disciplines. This is followed by a brief consideration of the extent to which these different approaches might accommodate an MFN-based set of procurement disciplines.

1. Variations on the theme of national treatment and related disciplines

¹²Israel, one of the two developing country signatories, specifies in its Annex that the maximum local content requirement is 35 per cent for the first five years of the Agreement, 30 per cent for the next four years, and 20 per cent thereafter.

27) Three possible approaches to national treatment and related disciplines for government procurement are identified below. This listing does not pretend to be exhaustive, and it should also be borne in mind that the various approaches could be combined in different ways.

(i) A basic national treatment obligation only

28) Under this scenario, Members would agree to apply national treatment in their procurement decisions. The question, then, is whether national treatment with respect to government procurement would be a general obligation for all sectors, would apply only to scheduled sectors, or would be subject to explicit limitations in scheduled sectors or with respect to certain modes of supply. Entity coverage and threshold values might also be issues needing attention.

(ii) A basic national treatment obligation reinforced by procedural and enforcement disciplines of the kind contained in the GPA

29) It has been observed that a simple national treatment requirement, as contained in Article III of the GATT, would not be enough to ensure equal treatment and non-discrimination in the area of government procurement. Signatories to the [Government Procurement] Agreement had found it necessary to develop procedural guarantees to ensure effective non-discrimination.¹³ It may, therefore, be useful to begin by asking: how do the existing GATS disciplines compare with those contained in the GPA? In other words, what would need to be added to the GATS to ensure that an elimination of the Article XIII exemption would lead to rules on procurement comparable to those in the GPA? It would seem that the GPA contains two crucial sets of disciplines: first, the procedural disciplines, which are important for making the non-discrimination obligation effective in the face of administrative discretion; and second, the enforcement mechanisms -- particularly the challenge procedures -- which are crucial for effective enforcement, given the one-shot and irreversible nature of many procurement contracts.

(iii) Diluted national treatment obligation together with acceptance of procedural and enforcement disciplines

30) Under this option the strict principle of national treatment would be temporarily sacrificed in return for increased transparency and strengthened enforcement (along the lines discussed in (ii) above). An immediate move to strictly non-discriminatory procurement may be difficult to achieve in some cases. In the present GPA, Governments are confronted with an •all or nothing• choice -- either a sector is not included at all or, if it is, procurement must be strictly non-discriminatory. If, in the GATS context, governments had the freedom to choose the degree of protection, would they be willing to include more sectors? Would other governments be willing to concede this freedom to induce greater coverage? One possibility would be for countries to maintain preference margins, but to bind them and make them subject to unilateral or negotiated reductions - in a manner analogous to tariffs.

¹³ GPA/IC/M/4

2. National treatment and MFN

31) The outcome of the discussion of procurement under the GATS Article XIII programme depends on two related questions. One concerns the level of disciplines acceptable to those Members whose procurement, in general or in specific sectors, is so far not subject to any multilateral disciplines. The second relates to the conditions under which Members who have already accepted certain disciplines under the GPA would be willing to extend MFN treatment to other Members.

32) The assumption of less stringent disciplines of the type described in the previous section may be considered by countries who have not accepted any disciplines in all or some sectors. The level of disciplines that are assumed is likely to influence the approach of Members who accept a higher standard of disciplines under the GPA. They could either extend MFN treatment towards all Members or, as is the case now, only towards those Members who accept comparable disciplines. In the former case, the outcome would be a multilateral agreement, while in the latter case, rules on procurement would retain their plurilateral character.

33) The previous discussion contains two examples of attempts to resolve the tension in the present context between national treatment and MFN. First, the GPA, in principle, already provides for the possibility of dual standards for developed and developing countries with MFN treatment for all signatories - subject, of course, to the various reciprocity provisions. Thus developing countries can negotiate mutually acceptable exclusions from the rules on national treatment with respect to certain entities, products or services that are included in their lists of entities. Developing countries may also continue to use offsets, forbidden to developed countries, provided they are negotiated during accession. Secondly, in the procurement of financial services, certain Members have accepted national treatment obligations towards suppliers established in their territories. The benefits of this national treatment obligation, albeit limited, have been extended unconditionally even to Members who have not accepted any disciplines on their procurement.

34) Finally, the willingness to accept disciplines on government procurement is likely to depend on future negotiations under the GATS on measures affecting trade in services. Foreign suppliers can only effectively contest the market for government procurement if they are not unduly handicapped by restrictive trade measures. In the case of both goods and services, foreign bidders may still be obliged first to cross the hurdle of trade restricting measures (see the discussion of Article III:3 of the GPA).¹⁴ The creation of genuine international competition for procurement contracts thus depends crucially on the liberalization of trade.

3. Certain questions which the Working Party may wish to address

¹⁴One of the most important services sectors in the context of government procurement is construction. All signatories to the GPA have accepted its disciplines in this sector above a certain threshold value. Yet in the GATS, Members have usually not bound themselves to grant market access to the supply of construction services through the presence of natural persons, except for certain limited categories of intra-corporate transferees. The lack of assurance that workers can be moved to construction sites is an example of how limitations on market access may reduce the benefit of non-discriminatory government procurement.

What do Members regard as the objective of negotiations under Article XIII of the GATS? In particular, how would members like to see the present situation concerning disciplines on government procurement evolve?

What level of disciplines is acceptable to Members who have so far not assumed any international obligations on procurement?

What relationship, if any, might be envisaged between the commitments under the GPA of those Members who are Party to it, and commitments under the GATS? Under what conditions would Members who are Party to the GPA be willing to extend its benefits on an MFN basis to those who are not?

How do Members view the possibility of introducing a certain degree of flexibility in the application of national treatment and related disciplines (as discussed in Section IV.1 of this paper)? How do Members assess the relative importance of the basic national treatment obligation, on the one hand, and procedural and enforcement disciplines, on the other?

How would Members propose to define the scope of agreed obligations - i.e. in general terms, on a sectoral basis, or with specific limitations?

ANNEX 2: THE NON-APPLICATION AND RECIPROCITY CLAUSES IN THE GPA

The reason for most of the sectoral non-application and reciprocity provisions in the Annexes of individual Parties to the GPA stems from the fact that on 15 December 1993, the time that the negotiations were concluded, certain participants, in particular the United States and the European Communities, could not reach agreement with each other on offers at the Annex 2 and Annex 3 levels (sub-central and public utilities). Moreover, the Canadians were not in a position to make, at that stage, any commitments in respect of their Provinces. The option that the negotiators were faced with was either to agree on a much smaller agreement, limited essentially to central government procurement of goods and services, or to keep on the table the rather extensive offers which countries were able to make at the Annex 2 and Annex 3 levels and to agree, at least for the time being, that countries could include in their Annexes country-specific non-application clauses and reciprocity provisions in order to provide for a mutually-agreed balance of advantage. The latter option was chosen, with the intention of using the period until the date of entry into force of the GPA, 1 January 1996, to negotiate improvements to the commitments in the Annexes that would enable a lifting of some, if not all, non-application and reciprocity clauses.

At the time of the conclusion of the GPA negotiations, on 15 December 1993, the European Communities and the United States declared their determination to expand their commitments under the GPA before 15 April 1994, and made it clear that any expansion in their respective commitments as a result of this understanding would be applied to other Parties whose offers had been accepted by them by 15 December 1993, subject to the conditions or qualifications contained in the respective Annexes of the EC and the US, and that they would not seek to rebalance the Annexes of other Parties on the strength of such expansion. As a result of further negotiations, the US and the EC negotiators reached a bilateral agreement in Marrakesh in April 1994 which was formally concluded between them in the middle of 1995. The incorporation of most of these additional commitments into the GPA, expected to take place before the entry into force of the Agreement at the beginning of next year, will mean that a substantial part, but not all, of the non-application and reciprocity provisions between these two Parties will be removed. In addition, the Canadian Annexes provided that Canada would make offers, on the basis of commitments from its Provincial Governments, to cover entities in all its Provinces within 18 months of the conclusion of the GPA. Successful negotiations between Canada and the other Members would lead to the removal, prior to the entry into force of the Agreement, of some or all non-application and reciprocity provisions between Canada and the other Members. Moreover, it should also be noted that, as a response to the use of reciprocity and non-application provisions in the Annexes, a paragraph was inserted, as Article XXIV:7(c) of the Agreement, under which the Parties shall seek to avoid introducing or prolonging discriminatory measures and practices which distort open procurement and shall, in the context of negotiations under subparagraph (b), seek to eliminate those which remain on the date of entry into force of this Agreement.

Working Party on GATS Rules

SAFEGUARD PROVISIONS IN REGIONAL TRADE AGREEMENTS

Note by the Secretariat

1. At its first meeting on 17 July 1995, the Working Party on GATS Rules requested the Secretariat to examine regional trade agreements with a view to identifying examples of safeguard provisions and measures in the field of services.
2. The Secretariat has examined a sample of regional trade agreements notified to the secretariat. The kinds of safeguards provisions encountered in these agreements are summarized below. It should be noted that the list below is not intended to be exhaustive. Moreover, provisions on trade in services are currently under negotiation, or have recently been agreed, in a number of regional agreements. These include the Association of South-East Asian States Free Trade Area, the Free Trade Agreement between Colombia, Mexico and Venezuela, and the Southern Cone Common Market agreement between Argentina, Brazil, Paraguay and Uruguay.

Safeguards provisions affecting trade in services contained in regional agreements

- *The Australia New Zealand Closer Economic Relations Trade Agreement (ANZCERTA)* - ANZCERTA contains a protocol on Trade in Services covering both cross-border and establishment trade. The services protocol contains no safeguard measures other than general exceptions of the kind found in Article XIV of GATS.
- *The Treaty of Rome establishing the European Economic Community* - The Treaty of Rome contains a number of safeguard provisions. Article 36 allows member states to impose restrictions on imports for public policy reasons (similar to GATS Article XIV). Articles 108-109 deal with balance-of-payments safeguards (similar to GATS Article XII). Article 115 allows the Commission to authorise member states to take protective measures in cases where implementation of the common commercial policy leads to economic difficulties. Article 226 allows member states to apply for authorization to take protective measures if, during the transitional period after entry into force of the Treaty, serious economic difficulties arise for a sector or area which are likely to persist. The 1993 Union Treaty does not alter the relevant provisions in the Treaty of Rome.

It may also be noted that EU secondary law contained in directives and regulations may entertain additional safeguards.

- *The Convention establishing the European Free Trade Association* - Article 19 of the Convention contains balance-of-payments safeguards and Article 20 envisages temporary safeguards if unforeseen and serious difficulties arise or threaten to arise in a particular sector or region.
- *The North American Free Trade Agreement (NAFTA)* - NAFTA contains safeguard provisions for trade in goods in Articles 801-802, but no similar measures for trade in services. NAFTA also contains safeguard provisions relating to general and national security exceptions (Articles 2101-2102), parts of which are relevant to trade in services, and safeguards for balance-of-payments purposes (Article 2104). One safeguard measure applicable exclusively to services trade is to be found in the financial services chapter. Annex 1413.6 Section B provides that if the sum of authorized capital of foreign commercial bank affiliates reaches 25 percent of the aggregate capital of all commercial banks in Mexico, Mexico may request consultations with the other NAFTA parties on the potential adverse effects arising from the presence of commercial banks of other parties and the possible need for remedial action, including further temporary limitations on market participation.
- *The Agreement on the European Economic Area* - Chapter 4 of the Agreement (Articles 112-114) provides for safeguard measures in the event of serious economic, societal or environmental difficulties of a sectoral or regional nature that are likely to persist. The nature of permissible safeguard measures is not specified, but their application is subject to strict supervision.
- *The Europe Agreements (agreements between the EU and various East European countries)* - These Agreements contain extensive safeguard provisions in respect of the free movement of goods. In the area of establishment trade for services, the agreements contemplate the possibility of prolonging transition periods for certain sectors. The agreements also provide that during the five-year and ten-year transitional periods envisaged in the agreements, the relevant East European country may introduce safeguard measures for certain domestic sectors undergoing restructuring, facing serious difficulties, losing significant market share, or that are newly emerging. These safeguards only apply with respect to new market entrants. They may not generate any discrimination between Community companies or nationals already established in relation to the companies or nationals of the East European country concerned.
- *The Cartagena Agreement, creating the Andean Common Market* - In addition to general, balance-of-payments and goods-related safeguards, the Andean Pact contains a safeguard in Article 90 of the agreement which envisages action by member countries to resolve any problems related to fiscal income which arise as a result of liberalization commitments. Permissible measures are not specified, but this provision might affect trade in services.

- *The Free Trade Agreement between Israel and the United States* - This agreement contains a Declaration on Trade in Services, but this declaration does not contain any safeguard provisions.
- *The Free Trade Agreement between Costa Rica and Mexico* - Chapter IX of this agreement contains provisions on trade in services. A safeguard instrument has been established to protect the public interest and national security (as in Article XIV and Article XIVbis of GATS). The safeguard also covers eventualities relating to the environment, the national patrimony, and fiduciary considerations.

3. The information summarized above indicates that while virtually all regional trade agreements appear to contain a number of general safeguard provisions that might apply to trade in services, not all of them contain safeguard provisions aimed specifically at trade in services. The NAFTA provisions for Mexico in the area of financial services and the Europe Agreements contain safeguards contingent upon market opening, but relatively few agreements appear to contain such provisions. It may be noted the services-specific safeguards contained in the Europe Agreements are of limited duration in the sense of only being available during transition periods.

Working Party on GATS Rules

EMERGENCY SAFEGUARD MEASURES UNDER ARTICLE X OF GATS

Note by the Secretariat

Background

1. Article X of the General Agreement on Trade in Services calls for negotiations on the question of emergency safeguard measures. The results of such negotiations are to take effect not later than three years from the date of entry into force of the WTO Agreement. The negotiating history of Article X suggests that the use of the phrase •negotiations on the *question* of emergency safeguard measures• (Article X.1) implies that prior to elaborating specific provisions, Members may wish to consider the broader question of whether or not it would be desirable to develop an emergency safeguard instrument in the field of trade in services.

2. The present note by the Secretariat, prepared at the request of the Council for Trade in Services at its first meeting on 1 March 1995, sets out some of the issues raised by the concept of emergency safeguards in the context of trade in services. It draws on earlier discussions that took place in the Group of Negotiations on Services, and on a previous Note by the Secretariat on this subject (MTN.GNS/W/70). This note relies heavily on comparisons with existing safeguard provisions in the field of goods. This does not imply, however, that the approach adopted in the WTO Safeguards Agreement is assumed to be the most appropriate for services, nor that comparisons will necessarily be relevant in every case.

3. The discussion of safeguards can be divided into four broad subject areas. The first relates to the objectives of safeguard action. In other words, what is it that an intervention of this kind would be designed to safeguard? Second, once the objective is clear, a definition is required of the circumstances that would constitute legal justification. This is akin to the injury test and causality determination in the Safeguards Agreement. The third question concerns the kind of measures that

might be applied, once the objectives of the action are clear and their justification has been established. In services, for example, a decision would be required as to whether specific commitments on modes of supply could be withdrawn or only modified, and whether a single safeguard action would warrant withdrawal or modification of specific commitments in more than one mode. Finally, having clarified the objectives of safeguards, established the circumstances in which safeguards may be applied, and determined the nature of safeguard measures that may be authorized, a series of questions would need to be answered about the precise modalities of safeguard action. These relate to such matters as investigations, use of provisional measures, duration, degressivity, degree of discriminatory application, compensation, and institutional provisions.

4. This note does not attempt to deal exhaustively with any of the above subject areas. Most of the discussion touches upon the first and second issues, relating to objectives and the nature of the circumstances that might call for safeguard actions. The main reason for setting aside detailed consideration of specific measures and modalities in the first instance is to avoid prejudicing prior examination of more fundamental questions relating to the rationale and feasibility of safeguard measures for trade in services. The note begins with a brief general discussion of safeguards in the services context, and then considers why and how safeguards might apply in respect of each of the four modes of supply under which specific commitments have been taken.

Safeguards in the Context of Trade in Services

5. Document MTN.GNS/W/70 discusses a very broad concept of safeguards. A distinction is made between safeguard actions that are temporary and contingent upon a particular occurrence or circumstance, and those that constitute permanent exceptions to generally applicable rules. Examples of actions falling into the first category include balance-of-payments measures, measures to counteract unfair trading practices such as dumping and subsidization, and measures to protect domestic industry from injurious foreign competition. The category of permanent safeguards includes general exceptions to address such considerations as the protection of public morals, health, safety, natural resources and national security. The GATS already contains provisions addressing a number of these matters, including Article XII (balance of payments), Article XIV (general exceptions), and Article XIV *bis* (security exceptions). In addition, Article IX of the Marrakesh Agreement provides for time-bound waivers, under exceptional circumstances, from WTO obligations, including those of the GATS.

6. It is assumed in this note that the emergency safeguard provisions envisaged in Article X would be available to service suppliers faced with unexpected adverse developments arising from Members' obligations under the GATS. It is also assumed that emergency safeguards would be temporary in nature, and that if a longer-term difficulty arose as a result of GATS commitments, these could be renegotiated under Article XXI. Defined in this manner, any Article X safeguard provisions that might be adopted would closely parallel, at least conceptually, what is contained in the Safeguards Agreement. The major difference between existing safeguards in goods and those that might be developed in services is that the latter would have to deal both with cross-border service supply and with establishment-

based service supply, whereas safeguards in the field of goods are only concerned with cross-border trade. In considering the circumstances that might give rise to a need for safeguard measures in services, it is important to note that the GATS as it stands, and pending the achievement of higher levels of liberalization, embodies considerable scope for limiting the extent of Members' obligations.

7. The GATS permits signatories to circumscribe their commitments in several ways. First, the GATS contains relatively few general obligations that apply in the absence of specific commitments. Moreover, the single most important general obligation -- the most-favoured-nation (MFN) rule of Article II -- will not apply if a Member exempts certain measures from MFN at the time of entry into force of the agreement. Secondly, specific commitments only apply if a sector has been scheduled, and all Members have omitted sectors from their positive lists of commitments. Even where a sector has been scheduled, particular modes of delivery may be excluded from any commitment, and the precise terms of commitments undertaken can be conditioned through market access limitations (Article XVI) and national treatment limitations (Article XVII). These opportunities for the *ex ante* circumscription of GATS obligations clearly influence the nature and scope of any safeguard measures that Members might wish to introduce. Indeed, it is this built-in capacity to limit the coverage of obligations that made it possible for governments to agree that their GATS obligations would enter into force before Article X safeguards became available.

8. These considerations suggest that the present discussion of safeguards is most relevant to future commitments. In other words, the desirability of a new GATS safeguard mechanism would be most appropriately assessed in the context of higher levels of commitment. Thus, the justification for designing any new safeguard mechanism would be its contribution to future market opening. The security of knowing that appropriate safeguards were available against unforeseen developments might induce higher levels of commitment than Members would otherwise be willing to assume. Viewed in this manner, it would seem essential that any safeguard measures be accessible enough to make Members confident that their commitments can be modified if extenuating circumstances so demand, but not flexible to the point where the value of the underlying commitments themselves is called into question. It should be emphasized that the argument here is not for excluding commitments already undertaken from eligibility for any safeguard remedies that Members might decide to establish, but rather to think of the design of an emergency safeguard mechanism in the context of what the GATS agreement might look like in the future.

Possible Safeguard Actions under Alternative Modes of Supply

Cross-border supply of services (Mode 1)

9. Of all the modes, cross-border supply of services is the one most analogous to the situation addressed by the Safeguards Agreement. The objective of a safeguard action under Mode 1 would be to provide relief to a domestic industry faced with competition from a like or directly competitive service supplied by an exporter from another country. Protection of a domestic industry in this fashion is

precisely what the Safeguards Agreement does in respect of goods, and similar considerations as to the desirability or otherwise of such action would apply.

10. As already noted, questions relating to injury, causality, available measures or modalities for their application will not be addressed in the present paper. Suffice it to note, however, that here, as elsewhere in services, complexities of a kind not encountered in the field of goods may arise as Members attempt to define available safeguard measures and the circumstances of their application.

Consumption abroad (Mode 2)

11. No parallel exists with the Safeguards Agreement under this mode. A government might wish to control consumption abroad in order to induce or force its consumers to purchase identical or similar services in their own countries. This would be a measure aimed at protecting a domestic industry. Among the measures that could be applied, depending on the activity involved, are quantitative controls or fiscal charges on foreign consumption, physical controls on travel, and exchange controls. The possibility of using exchange controls would, of course, be complicated by the provisions of Article XI and Members' obligations under the Articles of Agreement of the International Monetary Fund. Depending on the nature of the activity involved, Mode 2 safeguard measures could be quite direct (e.g. restricting the consumption of foreign financial services for which domestic substitutes are available). In other instances, Mode 2 safeguards would be an indirect and therefore relatively inefficient way of protecting a domestic industry (e.g. prohibiting consumption of foreign tourist services in the hope that consumers would consume domestic tourist services instead). In general, the effective implementation of safeguard measures under Mode 2 would be complex from an enforcement perspective, as transactions occur outside the jurisdiction of the Member concerned.

Commercial presence (Mode 3)

12. It is useful to consider commercial presence in terms of two separate aspects of commitments -- the commitment to allow a service supplier to enter the market and the post-establishment commitment relating to production in the territory of the host Member, for domestic consumption or export. The first part of the commercial presence commitment -- allowing foreign investment to occur or a service supplier to enter the market -- involves a cross-border transaction (i.e. a factor of production crossing the border in order to establish a local presence). If a commercial presence commitment has been made, and foreign penetration of the market occurs at a pace that creates difficulties for established service suppliers in the host country, a government might wish to apply a safeguard to slow down the entry of foreign service suppliers.

13. Commitments relating to post-establishment trade might also be attenuated by safeguard action. In this case, however, a safeguard measure would, by definition, have to distinguish between service suppliers of national origin and service suppliers of other Members. Otherwise, there would be no point in taking a safeguard measure in respect of post-establishment trade subject to commitments under GATS. The objective of such action would be to protect suppliers of national origin from competition with locally-established foreign suppliers, and the

action would introduce a departure from national treatment, or further extend such a departure already inscribed in the limitations columns of a Member's schedule of specific commitments. From the point of view of affected foreign suppliers, a basic question of profitability could arise, since a safeguard action against such suppliers would normally reduce production and eat into profitability. The prospect of being subject to such action may inhibit investors from establishing a commercial presence in the first place. A basic question to be considered, therefore, is whether it would make sense to protect national suppliers *vis a vis* established foreign suppliers operating under similar or identical conditions in the same market. Furthermore, it would be difficult to justify this kind of safeguard action on the basis of reduced employment levels or similar grounds, since the only beneficiaries would be suppliers of national origin, rather than all domestically-based suppliers (i.e. employers) in the industry concerned.

Movement of natural persons (Mode 4)

14. A safeguard action under Mode 4 would be designed to protect natural persons of national origin from competing with natural persons of another Member. The protection would apply in respect of natural persons who are employees of service suppliers as well as natural persons who are independent suppliers of services. In similar fashion to Mode 3, a distinction is useful between the authorization to establish a presence in the host country and the right to sell services once domestically located. The right of service suppliers to employ natural persons or of natural persons who are independent service suppliers to establish a presence could be circumscribed through a safeguard measure if a scheduled commitment created an unanticipated inflow of natural persons of other Members, and this were judged to cause injury to competing local service suppliers. Such action would effect the right of entry *per se* and not any rights during the temporary stay.

15. By contrast, safeguard actions affecting natural persons already residing and working in the host country would, as with the investment case under Mode 3, necessarily entail discrimination between national and foreign service suppliers. A similar question arises as to the desirability of subjecting such suppliers to restrictions of this nature, once they have established a physical presence in the territory of another Member. It may be noted, however, that in this case an argument based on employment considerations would carry more weight than under Mode 3.

Summary and Conclusions

16. This note has suggested that the discussion on safeguards might usefully be divided into different topics, as this would clarify issues and ensure that more basic questions about how to approach the subject matter were addressed prior to consideration of specific details relating to any safeguard mechanisms to be developed. A four-fold distinction was proposed:

- (i) *Objectives* -- The objective of safeguard action, or the target of relief from unforeseen circumstances arising as a result of commitments under GATS.

- (ii) *Circumstances triggering safeguard actions* -- The standards to be established for taking action, or in other words the definition of the circumstances that would trigger safeguard measures
- (iii) *Authorized measures* -- The nature and scope of authorized safeguard measures.
- (iv) *Modalities* -- The details of safeguard disciplines, including in relation to procedures.

17. Many alternative approaches to emergency safeguards for services could be envisaged. On the basis of the above distinctions, however, the present note has concentrated primarily on certain aspects of the first two categories above. Several broad questions arise from the foregoing discussion. These are summarized below.

- Most obligations under the GATS only arise in the context of specific commitments. The most significant exception to this is the general applicability of the MFN rule, but even here exemptions may be taken. Members also enjoy ample scope to limit the coverage of their specific commitments. They can omit sectors and modes within sectors from their specific commitments, and they can impose market access limitations and qualify national treatment in their schedules. Members may also renegotiate scheduled commitments under Article XXI. In view of these options, what additional safeguard mechanisms might be required in the GATS?
- If the justification for a safeguards mechanism is that it will permit Members to assume higher levels of commitment under GATS, then is it possible to conceive of a mechanism that is neither so rigid as to preclude its use, nor so flexible as to render meaningless the commitments it is designed to protect?
- Members were able to allow their GATS commitments to go into effect without having developed a safeguard mechanism. Is it valid to argue from this observation that any justification for safeguards should be predicated upon higher levels of commitment in the future?
- Is it possible to avoid distinguishing among modes of supply when contemplating a safeguard mechanism under GATS? If mode-specificity is essential, is there a risk that undesirable distortions may be introduced for service suppliers when choices are exercised among alternative modes in the application of a safeguard measure? Are safeguards less easy to justify or implement under some modes of supply than others?
- Does the case for safeguards vary depending upon the sector to which they might be applied?
- Under Modes 3 and 4, a choice must be made as to how the •domestic industry• is to be defined. The choice is between a definition encompassing both national suppliers and suppliers of other Members, or a definition covering only national suppliers. Are there circumstances in which the narrower definition might be justified?

Government procurement: the plurilateral agreement

The Government Procurement Committee oversees the work of the Agreement on Government Procurement (GPA). The GPA is a plurilateral agreement – only some countries (members of the WTO) are parties to this agreement.

For the most part, all WTO members subscribe to all WTO agreements. After the Uruguay Round, however, there remained four agreements, originally negotiated in the Tokyo Round, which had a narrower group of signatories and are known as “plurilateral agreements”. All other Tokyo Round agreements became multilateral obligations (i.e. obligations for all WTO members) when the World Trade Organization was established in 1995. The four were:

- [trade in civil aircraft](#)
- [government procurement](#)
- [dairy products](#)
- [bovine meat](#).

The bovine meat and dairy agreements were terminated in 1997.

More introductory information> [The WTO in Brief](#)> [10 benefits](#)> [10 misunderstandings](#)**Fair trade in civil aircraft** [back to top](#)

The [Agreement on Trade in Civil Aircraft](#) entered into force on 1 January 1980. It now has 30 signatories. The agreement eliminates import duties on all aircraft, other than military aircraft, as well as on all other products covered by the agreement – civil aircraft engines and their parts and components, all components and sub-assemblies of civil aircraft, and flight simulators and their parts and components. It contains disciplines on government-directed procurement of civil aircraft and inducements to purchase, as well as on government financial support for the civil aircraft sector.

Government procurement: opening up for competition [back to top](#)

In most countries the government, and the agencies it controls, are together the biggest purchasers of goods of all kinds, ranging from basic commodities to high-technology equipment. At the same time, the political pressure to favour domestic suppliers over their foreign competitors can be very strong.

An [Agreement on Government Procurement](#) was first negotiated during the Tokyo Round and entered into force on 1 January 1981. Its purpose is to open up as much of this business as possible to international competition. It is designed to make laws, regulations, procedures and practices regarding government procurement more transparent and to ensure they do not protect domestic products or suppliers, or discriminate against foreign products or suppliers.

The agreement has 28 members. It has two elements – general rules and obligations, and schedules of national entities in each member country whose procurement is subject to the agreement. A large part of the general rules and obligations concern tendering procedures.

The present agreement and commitments were negotiated in the Uruguay Round. These negotiations achieved a 10-fold expansion of coverage, extending international competition to include national and local government entities whose collective purchases are worth several hundred billion dollars each year. The new agreement also extends coverage to services (including construction services), procurement at the sub-central level (for example, states, provinces, departments and prefectures), and procurement by public utilities. The new agreement took effect on 1 January 1996.

It also reinforces rules guaranteeing fair and non-discriminatory conditions of international competition. For example, governments will be required to put in place domestic procedures by which aggrieved private bidders can challenge procurement decisions and obtain redress in the event such decisions were made inconsistently with the rules of the agreement.

The agreement applies to contracts worth more than specified threshold values. For central government purchases of goods and services, the threshold is SDR 130,000 (some \$185,000 in June 2003). For purchases of goods and services by sub-central government entities the threshold varies but is generally in the region of SDR 200,000. For utilities, thresholds for goods and services is generally in the area of SDR 400,000 and for construction contracts, in general the threshold value is SDR 5,000,000.

Dairy and bovine meat agreements: ended in 1997 [back to top](#)

The [International Dairy Agreement](#) and

International Bovine Meat Agreement were scrapped at the end of 1997. Countries that had signed the agreements decided that the sectors were better handled under the Agriculture and Sanitary and Phytosanitary agreements. Some aspects of their work had been handicapped by the small number of signatories. For example, some major exporters of dairy products did not sign the Dairy Agreement, and the attempt to cooperate on minimum prices therefore failed – minimum pricing was suspended in 1995.

GOVERNMENT PROCUREMENT: THE PLURILATERAL AGREEMENT

Overview of the Agreement on Government Procurement

Procurement of products and services by government agencies for their own purposes represents an important share of total government expenditure and thus has a significant role in domestic economies.

Introduction [Back to top](#)

Procurement of products and services by government agencies for their own purposes represents an important share of total government expenditure and thus has a significant role in domestic economies. While ensuring best value for money will be secured through an open and non-discriminatory procurement regime, governments sometimes seek to achieve certain other domestic policy goals through their purchasing decisions, such as promotion of local industrial sectors or business groups. Measures to this effect may be either explicitly prescribed in national legislations, for example prohibitions against the purchase of foreign goods or services or from foreign suppliers, preference margins, set-asides and offsets, or in the form of less overt measures or practices which have the effect of denying foreign products, services and suppliers the opportunity to compete in domestic government procurement markets, including excessive use of single or selective tendering, non-open technical specification requirements and, in particular, lack of transparency in tendering procedures including contract awards. Such discriminatory government procurement procedures and practices can lead to distortions in international trade.

Government procurement has been effectively omitted from the scope of the multilateral trade rules under the WTO, in the areas of both goods and services. In the General Agreement on Tariffs and Trade, originally negotiated in 1947, government procurement was explicitly excluded from the key national treatment obligation. More recently, government procurement has been carved out of main commitments of the General Agreement on Trade in Services. Since it is estimated that government procurement typically represents 10-15% of GDP, this represents a considerable gap in the multilateral trading system.

A growing awareness of the trade-restrictive effects of discriminatory procurement policies and of the desirability of fulfilling these gaps in the trading system resulted in a first effort to bring government procurement under internationally agreed trade rules in the Tokyo Round of Trade Negotiations. As a result, the first Agreement on Government Procurement was signed in 1979 and entered into force in 1981. It was amended in 1987, with this amended version entering into force in 1988. In parallel with the Uruguay Round, Parties to the Agreement held negotiations to extend the scope and coverage of the Agreement. The Agreement on Government Procurement (1994) (GPA)

was signed in Marrakesh on 15 April 1994 — at the same time as the Agreement Establishing the WTO. The new Agreement entered into force on 1 January 1996. The GPA is one of the "plurilateral" Agreements included in Annex 4 to the Agreement Establishing the WTO, signifying that [not all WTO Members](#) are bound by it.

According to the statistics collected under the Tokyo Round Agreement, that Agreement applied annually to a total value of contracts of around US\$30 billion in 1990-94. Under the new Agreement, the value of procurement that is opened up to international competition is estimated to have increased by ten times, with the extension of rules to cover procurement of services as well as goods and to cover sub-central entities and public utilities as well.

Main features

The GPA establishes an agreed framework of rights and obligations among its Parties with respect to their national laws, regulations, procedures and practices in the area of government procurement. The cornerstone of the rules in the Agreement is non-discrimination. In respect of the procurement covered by the Agreement, governments Parties to the Agreement are required to give the products, services and suppliers of any other Party to the Agreement treatment "no less favourable" than that they give to their domestic products, services and suppliers and not to discriminate among goods, services and suppliers of other Parties (Article III:1). Furthermore, each Party is required to ensure that its entities do not treat a locally-established supplier less favourably than another locally-established supplier on the basis of degree of foreign affiliation or ownership and do not discriminate against a locally-established supplier on the basis of country of production of the good or service being supplied (Article III:2). In order to ensure that the basic principle of non-discrimination is followed and that access to procurement is available to foreign products, services and suppliers, the Agreement lays heavy emphasis on procedures for providing transparency of laws, regulations, procedures and practices regarding government procurement.

Scope and coverage [Back to top](#)

The Agreement does not apply to all government procurement of the Parties. The obligations under the Agreement apply to procurement:

- by the procuring entities that each Party has listed in its schedule in Annexes 1 to 3 of Appendix I, relating respectively to central government entities, sub-central government entities and other entities such as utilities;
- of goods; and
- all services and construction services that are specified in positive lists, found respectively, in Annexes 4 and 5 of Appendix I;
- in respect of procurement contracts above certain threshold values. Each Party indicates [the levels of minimum thresholds](#) that apply to the procurement of goods and services under Annexes 1, 2 and 3 entities (Article I:4).

The Agreement authorizes Parties to modify the mutually agreed coverage of Appendices I to IV, subject to the procedures for rectification and modification specified in Article XXIV:6. Since its signature in April 1994, the Agreement's scope has been expanded

through the incorporation in it of the results of a series of bilateral agreements between individual Parties. A loose-leaf system for Appendices to the Agreement is designed to reflect the up-to-date status of the [Appendices](#) as such changes occur.

When reading the schedules in Appendix I to ascertain whether a particular procurement contract is covered by the Agreement, it is important to check not only whether the procuring entity is covered, the threshold level and, if the contract is for a service, whether that service is covered, but also the General Notes at the end of most Parties' schedules which provide for a number of exceptions. It should be noted that exceptions from the obligations of the Agreement are also allowed for developing countries in certain situations (Article V) and for non-economic reasons, for example to protect national security interests, public morals, order or safety, human, animal or plant life or health or intellectual property, etc. (Article XXIII).

The Agreement (Article IX:11) requires that notices of invitation to participate in an intended procurement make it clear, either in the notice itself or in the publication in which it appears, whether the procurement in question is covered by the Agreement.

Tendering procedures

The Agreement contains a number of detailed procedural obligations which procuring entities have to fulfil to ensure the effective application of its basic principles (Articles VII to XVI). The purpose of these procedural requirements is to guarantee that access to covered procurement is effectively open and that an equal opportunity is given to foreign suppliers and suppliers in competing for government contracts.

The Agreement allows the use of open, selective and limited tendering procedures, provided they are consistent with the provisions laid out in Articles VII to XVI.

- Under **open procedures** all interested suppliers may submit a tender (Article VII:3(a)).
- Under **selective tendering procedures** only those suppliers invited to do so by the entity may submit a tender (Articles VII:3 (b) and X). To ensure optimum effective international competition, purchasing entities are required to invite tenders from the maximum number of foreign suppliers. Safeguards to ensure that the procedures and conditions for qualification of suppliers do not discriminate against suppliers of other Parties are set out in Article VIII. For example, any conditions for participation in tendering procedures by suppliers shall be limited to those that are essential to ensure the firm's capability to fulfil the contract and shall not have a discriminatory effect. Once a year the entities using the selective tendering method are required to publish, in a publication indicated in Appendix III to the Agreement, their lists of qualified suppliers, and to specify the period of validity of those lists and the conditions that need to be met for inclusion of interested suppliers in the lists (Article IX:9).
- Under **limited tendering procedures** the entity contacts the potential suppliers individually (Article VII:3(c)). The Agreement closely circumscribes the situations in which this method can be used, for example in the absence of tenders in response to an

open tender or selective tender or in cases of collusion, when the product or service can be supplied only by a particular supplier, or for reasons of extreme urgency brought about by events unforeseeable by the entity (Article XV).

Entities may hold **negotiations** with suppliers making tenders, provided this is indicated in the initial tender notice or it appears from the tender evaluation that no one tender is the most advantageous and subject to safeguards to ensure that such negotiations do not discriminate between suppliers (Article XIV).

The Agreement prescribes certain minimum **deadlines** that must be allowed for the preparation, submission and receipt of tenders to enable responsive tendering (Article XI:2). These must be set long enough to allow all suppliers, domestic and foreign, to prepare and submit tenders before the closing of the tendering procedures. In general the minimum shall be 40 days from the date of publication of an invitation to tender. The minimum time-limits for receipt of tenders may be reduced to 25 or even 10 days in certain well-defined circumstances.

In the **tender documentation** the purchasing entity is required to give all necessary information related to the procurement in question to enable potential suppliers to submit responsive tenders, including information required to be published in tender notices and other important information, for example economic and technical requirements, financial guarantees and the criteria for awarding the contract and procedural information such as the closing date and time for receipt of tenders (Article XII).

The objective of the procedural rules for **submission, receipt and opening** of tenders is to ensure fairness, equity and transparency in the procurement process (Article XIII:1-3). All tenders solicited under open and selective procedures by entities shall be received and opened under procedures and conditions guaranteeing the regularity of the openings.

Only tenders that conform to the essential requirements of the tender notice or documentation and are from a supplier which complies with the conditions for participation can be considered for **award**. Entities have the obligation to award contracts to the tenderer who has been determined to be fully capable of undertaking the contract and whose tender is either the lowest tender or the tender which is determined to be the most advantageous in terms of the specific evaluation criteria set forth in the notices or tender documentation. An entity that has received a tender abnormally lower than other tenders may enquire with the tenderer to ensure that it can comply with the conditions of participation and be capable of fulfilling the terms of the contract (Article XIII: 4).

The modes of transmission of data foreseen under the relevant provisions of the Agreement are telex, telegram, facsimile. The Agreement recognizes the fact that its provisions do not take into account the rapidly emerging use of information technology in government procurement. In order to ensure that it does not constitute an obstacle to technical progress in this area, the Agreement calls for regular consultations in the Committee regarding developments in information technology and, if necessary, negotiation of modifications to the Agreement itself (Article XXIV:8).

Other provisions for open procurement [Back to top](#)

The use of offsets – measures to encourage local development or improve the balance-of-payments accounts by means of domestic content, licensing of technology, investment requirements, counter-trade or similar requirements – are explicitly prohibited in the Agreement. Notwithstanding this, developing countries may negotiate, at the time of their accession, conditions for the use of offsets provided these are used only for the qualification to participate in the procurement process and not as criteria for awarding contracts (Article XVI).

The Agreement contains obligations on **technical specifications** in order to prevent entities from discriminating against and among foreign goods and suppliers through the technical characteristics of products and services that they specify (Article VI). Technical specifications shall be in terms of performance rather than design, and be based on international standards, where they exist, or otherwise on national technical regulations, recognized national standards, or building codes.

Prior information

Prior to the actual tendering process, Parties are required to publish an invitation to participate in the form of a **tender notice** in a publicly accessible publication indicated in Appendix II to the Agreement. The purpose is to inform all interested suppliers about the procurement opportunity and the relevant aspects of the procurement in question. Entities at central government level in Annex 1 are required to use a notice of proposed procurement, whereas other entities in Annexes 2 and 3 may use a notice of planned procurement (Article IX).

Post-award information and publication [Back to top](#)

Information must also be provided, after the award of the contract, on the award decision in the form of a notice, giving information on such matters as the nature and quantity of the products and services in the contract award, the name and address of the winning tenderer, and the value of the winning award or the highest and the lowest offer taken into account in the award of the contract (Article XVIII:1).

Moreover, in response to a request from a supplier from a Party to the Agreement, the procuring entity must provide prompt and pertinent information on: its procurement practices; an explanation of the reasons why a supplier's application to qualify was rejected; why its existing qualification to tender was brought to an end; and on the characteristics and relevant advantages of the tender selected (Article XVIII:2). However, entities are entitled to withhold certain information on grounds of confidentiality (Article XVIII:4). The Agreement provides for the protection of confidential information (Article XIX:4). In addition, the government of an unsuccessful tenderer, Party to the Agreement, may seek such additional information on the contract award as is necessary to ensure that the procurement was made fairly and impartially (Article XIX:2).

There is a general requirement to publish laws, regulations, judicial decisions, administrative rulings of general application and any procedures regarding government procurement covered by the Agreement. The relevant publications are listed in Appendix IV (Article XIX:1). As a further element of transparency under the Agreement, each government must collect and provide to the other Parties, through the Committee, statistics on its procurement covered by the Agreement (Article XIX:5).

Special rules for developing countries [Back to top](#)

The Agreement recognizes the development, financial and trade needs of developing countries, in particular least-developed countries, and allows special and differential treatment in order to meet their specific development objectives (Article V:1). Development objectives of developing countries should be taken into account in the negotiation of coverage of procurement by entities in developed and developing countries (Article V:3-7). Article V also contains provisions on: technical assistance (Article V:8-11); establishment of information centres giving information on procurement practices and procedures in developed countries (Article V:11); special treatment for least-developed countries (Article V:12 and 13); and review of the application of Article V (Article V:14 and 15).

Enforcement [Back to top](#)

Disputes between Parties under the Agreement are subject to the procedures of the WTO Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU) (Article XXII:1). Because of the plurilateral nature of the Agreement, Article XXII contains a number of special rules or procedures (Article XXII:3, 5 and 6). Of particular interest is the provision disallowing so-called "cross-retaliation" – the suspension of concessions or other obligations under the GPA as a result of disputes arising under the other WTO Agreements as well as suspension of concessions or other obligations under any other WTO Agreement because of any dispute arising under the GPA (Article XXII:7). Moreover, under the Agreement the DSB has the authority to authorize consultations among parties to the dispute regarding remedies when withdrawal of violating measures is not possible (Article XXII:3).

As a new and unique feature of the enforcement procedures in the WTO system, Article XX of the GPA sets out mandatory requirements for the establishment of a domestic **bid challenge system**, giving suppliers believing that a procurement has been handled inconsistently with the requirements of the GPA a right of recourse to an independent domestic tribunal. Parties may confer the authority to hear challenges by suppliers on national courts or on an impartial and independent review body. In the event that a bid challenge is heard by a review body which does not have the status of a court of law, either its decisions must be subject to judicial review or it must follow the procedures/criteria laid down in detail in the Agreement (Article XX: 6(a)-(g)). The challenge body must have the authority to order the correction of a breach of the Agreement or compensation for the loss or damages suffered by a supplier, but this may be limited to costs for tender preparation or protest. Pending the outcome of the challenge, it must be able to order rapid interim measures, including the suspension of the procurement process, to correct breaches of the Agreement and to preserve commercial opportunities (Article XX:7 (a)-(c)).

Committee on Government Procurement

**REPORT OF THE COMMITTEE ON GOVERNMENT PROCUREMENT
(DECEMBER 2004 – OCTOBER 2005)**

I. GENERAL

1. This Report covers the period since the Committee's previous Annual Report¹, that is December 2004 – October 2005. It is issued pursuant to Article XXIV:7(a) of the Agreement on Government Procurement.

2. Since the last Annual Report, the Committee has held four formal meetings: on 16 December 2004, on 14 March, 21 July and 14 October 2005.² The first two of these meetings were chaired by Mr. Niklas Bergström (Sweden), and the latter two by Ambassador Tae-yul Cho (Korea).³

3. The Committee has also held a series of informal meetings, pursuing negotiations under Article XXIV:7 of the Agreement on Government Procurement, in the weeks of 14 March, 30 May, 18 July and 10 October 2005, respectively.

4. The following WTO Members are covered by the Agreement: Canada; the European Communities, including its 25 member States; Hong Kong, China; Iceland; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States.

5. Twenty WTO Members have observer status in the Committee on Government Procurement: Albania, Argentina, Armenia, Australia, Bulgaria, Cameroon, Chile, China, Colombia, Croatia, Georgia, Jordan, the Kyrgyz Republic, Moldova, Mongolia, Oman, Panama, Sri Lanka, Chinese Taipei and Turkey. Three intergovernmental organizations, IMF, OECD and UNCTAD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

A. THRESHOLDS

6. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies⁴, Korea notified its threshold figures expressed in national currencies for 2003-2004⁵, and

¹ GPA/82, dated 26 November 2004.

² GPA/M/25-27, dated 18 January, 13 April and 30 August 2005, respectively.

³ At the meeting of 14 March 2005, the Committee elected Ambassador Tae-yul Cho (Korea) as its Chairman with effect as of the end of the week of 14 March 2005 (GPA/M/26, dated 13 April 2005, para. 2).

⁴ GPA/1, dated 5 March 1996, Annex 3.

⁵ GPA/W/251, dated 18 February 2003.

Switzerland notified its threshold figures expressed in national currencies for 2004.⁶ The following Parties have provided information on their threshold figures expressed in national currencies for 2004-2005: Canada; the European Communities; Hong Kong, China; Israel; Korea; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States.⁷ Japan has notified its threshold figures expressed in national currencies for 2004-2006.⁸

B. NOTIFICATION AND REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

7. The responses to questionnaire in the Decision on Procedures for the Notification of National Implementing Legislation⁹ were submitted by the Kingdom of the Netherlands with respect to Aruba on 23 November 2004, based on its present legislation, which was being amended.¹⁰ Given that Aruba has not submitted the text of its legislation, either current or new, as yet, at its meeting of 21 July 2005 the Committee on Government Procurement agreed to postpone the review of the national implementing legislation of the Kingdom of the Netherlands with respect to Aruba until all required documents have been made available to Parties.¹¹

8. In line with Article XXIV:5(b) of the Agreement on Government Procurement, Japan notified a change in its respective national implementing legislation.¹²

C. STATISTICAL REPORTING

9. Article XIX:5 of the Agreement on Government Procurement requires Parties to collect and provide, on an annual basis, statistics on their procurements covered by the Agreement. During the period under review, Japan has reported statistics for 2001¹³ and 2002¹⁴, Norway has reported statistics for 2002¹⁵ and 2003¹⁶, Switzerland has reported statistics for 2002¹⁷ and 2003¹⁸, and Hong Kong, China has reported statistics for 2004.¹⁹

D. CONSULTATIONS AND DISPUTE SETTLEMENT

10. There were no matters raised under Article XXII of the Agreement on Government Procurement during the reporting period.

⁶ GPA/W/285/Add.7, dated 30 March 2004.

⁷ GPA/W/285, dated 18 November 2003, GPA/W/285/Add.1-4, dated 28 November 2003, 10 December 2003, 8 January 2004 and 29 January 2004, respectively, GPA/W/285/Add.6, dated 15 March 2004 and GPA/W/285/Add.8-9, dated 17 June 2004 and 8 July 2004, respectively.

⁸ GPA/W/285/Add.5, dated 4 February 2004.

⁹ GPA/1/Add.1, dated 27 June 1996.

¹⁰ GPA/81, dated 23 November 2004.

¹¹ GPA/M/27, dated 30 August 2005, para. 20.

¹² GPA/37/Add.2, dated 21 March 2005. See also GPA/M/27, dated 30 August 2005, para. 21.

¹³ GPA/70/Add.3, dated 5 July 2005.

¹⁴ GPA/76/Add.3, dated 5 July 2005.

¹⁵ GPA/76/Add.4, to be issued.

¹⁶ GPA/80/Add.2, to be issued.

¹⁷ GPA/76/Add.2, dated 9 February 2005.

¹⁸ GPA/80/Add.1, dated 9 February 2005.

¹⁹ GPA/84, dated 23 September 2005.

III. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(a) *Modification by Israel regarding Offsets*

11. In November 2004, Israel submitted a communication²⁰ with proposed modifications to its Note on offsets pursuant to Article XXIV:6(a) of the Agreement on Government Procurement. Following informal consultations between interested delegations, a draft decision was presented for adoption by the Committee. At its meeting of 16 December 2004, pursuant to Article XXIV:6(a) of the Agreement on Government Procurement, the Committee adopted²¹ that Decision.²² The Decision modifies Israel's Note to its Appendix I to the Agreement on Government Procurement: it extends by one year the original deadline of 1 January 2005 for Israel's commitment to reduce the value of offsets from a maximum of 30 per cent to a maximum of 20 per cent of procurement contracts covered by the Agreement on Government Procurement.²³ Following the adoption of the Decision, the representative of Israel stated that his delegation intended to continue the discussion on its offset rights in the course of 2005 with the objective of reaching a mutually agreed solution that would take into account the needs of Israel and all Parties with a view to reaching a new balance of rights and obligations.²⁴ Several other Parties made statements on the Decision.²⁵

12. At the meeting of the Committee on 14 March 2005, the representative of Israel made a statement²⁶ on offsets and on the Decision adopted on 16 December 2004.²⁷ At the meeting of the Committee on 21 July 2005, the representative of Israel said that the Government of Israel had decided to renew its request to make modifications in Israel's Note in Appendix I.²⁸ His delegation intended to enter into negotiations with Parties on this matter. It wished to maintain its right to require offsets at the level of 30 per cent for an additional period of time, and then to gradually reduce it to a specific, agreed upon level. His delegation understood that this could disrupt the balance of rights and obligations. Bearing this in mind and respecting the need to maintain an appropriate balance, his delegation stood ready to explore the possibility of making additional commitments in the framework of the market access negotiations of the GPA on issues such as coverage of entities, goods and services, thresholds, and on other elements subject to negotiation.²⁹ This was followed by statements by Canada and the United States.³⁰ At the Committee's meeting on 14 October 2005, Israel indicated that, following discussions with other Parties, it intended to submit a new proposal for an interim period, for the purpose of modifying, under Article XXIV:6(a) of the Agreement, its commitments regarding offsets. This proposal would be intended to serve as an interim arrangement as of 1 January 2006 and would be based on the following parameters:

- (a) the level of offsets in the proposal would not undermine the starting point of negotiations for the long-term solution in the future;

²⁰ GPA/MOD/ISR/1, dated 19 November 2004.

²¹ GPA/M/25, dated 18 January 2005, para. 3.

²² Subsequently circulated as GPA/83, dated 17 December 2004.

²³ The modification of Israel's Note on Offsets to its Appendix I to the Agreement on Government Procurement took effect on 16 December 2004, and was certified in document WT/Let/485, dated 10 January 2005.

²⁴ GPA/M/25, dated 18 January 2005, para. 5.

²⁵ GPA/M/25, dated 18 January 2005, paras. 6-10.

²⁶ GPA/M/26, dated 13 April 2005, paras. 3-6.

²⁷ GPA/83, dated 17 December 2004.

²⁸ GPA/M/27, dated 30 August 2005, paras. 23-26.

²⁹ GPA/M/27, dated 30 August 2005, para. 25.

³⁰ GPA/M/27, dated 30 August 2005, paras. 26 and 27, respectively.

- (b) the new interim regime regarding offsets would be in place either until the lapse of a transitional period of [X] number of years, or until the conclusion of the ongoing market access negotiations pursuant to Article XXIV:7, whichever would come first;
- (c) the above-mentioned period of [X] years would be longer than one year; and
- (d) it would be framed as an interim arrangement in anticipation of a long-term solution that would take into account the interests of Israel as well as of other Parties, and the need to find a balance between the two.³¹

(b) *Other Modifications*

Modifications that have been certified since the meeting of 17 November 2004

13. During the reporting period, the following modifications have been certified, given that no objections were made in the 30-day period set out in Article XXIV:6 of the Agreement on Government Procurement or because the objections that had been made have been withdrawn subsequently with regard to all or some specific entities listed in such modifications:

(i) modifications by Hong Kong, China:

- GPA/MOD/HKG/2³², effective as of 9 March 2005³³, given that no objections were made within 30 days;
- GPA/MOD/HKG/3³⁴, effective as of 15 August 2005³⁵, given that no objections were made within 30 days;

(ii) modifications by Japan:

- GPA/W/274³⁶, as regards all entities other than Japan Consumer Information Center³⁷, effective as of 7 October 2005³⁸, given that the objections by the European Communities³⁹ and the United States⁴⁰ have been withdrawn⁴¹;
- GPA/MOD/JPN/16⁴², effective as of 10 December 2004⁴³, given that no objections were made within 30 days;

³¹ GPA/M/28, to be issued.

³² Dated 7 February 2005.

³³ WT/Let/491, dated 1 April 2005.

³⁴ Dated 15 July 2005.

³⁵ WT/Let/496, dated 23 September 2005.

³⁶ Dated 23 September 2003.

³⁷ The modification concerning Japan Consumer Information Center, also proposed in document GPA/W/274, was certified as of 29 January 2004 in WT/Let/469, dated 11 May 2004.

³⁸ WT/Let/500, dated 27 October 2005.

³⁹ GPA/W/279, dated 16 October 2003 and GPA/W/279/Corr.1, dated 29 October 2003.

⁴⁰ GPA/W/280, dated 17 October 2003.

⁴¹ GPA/MOD/JPN/19, dated 3 June 2005 and GPA/MOD/JPN/22, dated 7 October 2005, respectively.

⁴² Dated 10 November 2004.

⁴³ WT/Let/486, dated 10 January 2005.

- GPA/W/276⁴⁴, effective as of 31 May 2005⁴⁵, given that the objection by the European Communities⁴⁶ has been withdrawn⁴⁷; and
 - GPA/MOD/JPN/21⁴⁸, effective as of 12 October 2005⁴⁹, given that no objections were made within 30 days; and
- (iii) modification by Korea⁵⁰, effective as of 26 May 2005⁵¹, given that the objection by Canada⁵² has been withdrawn.⁵³

Proposed modifications that remain outstanding

14. As to outstanding proposed modifications, the following developments, if any, have taken place in the reporting period:

- (i) Notifications by Japan concerning proposed modifications relating to:
- NTT⁵⁴
No developments in the reporting period.
 - East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company⁵⁵
No developments in the reporting period.
 - Railway Construction Public Corporation and Corporation for Advanced Transport and Technology⁵⁶
No developments in the reporting period.
 - National Aerospace Laboratory⁵⁷
No developments in the reporting period.

⁴⁴ Dated 8 October 2003.

⁴⁵ WT/Let/495, dated 24 June 2005.

⁴⁶ GPA/W/282, dated 7 November 2003.

⁴⁷ GPA/MOD/JPN/20, dated 3 June 2005.

⁴⁸ Dated 12 September 2005.

⁴⁹ WT/Let/501, dated 27 October 2005.

⁵⁰ GPA/W/207, dated 11 September 2002.

⁵¹ WT/Let/494, dated 24 June 2005.

⁵² GPA/W/217, dated 7 October 2002.

⁵³ GPA/MOD/KOR/8, dated 30 May 2005.

⁵⁴ GPA/W/91, dated 6 September 1999.

⁵⁵ GPA/W/144, 145 and 146, dated 29 August 2001 and GPA/W/152 and Corr.1, dated 20 September and 10 October 2001.

⁵⁶ GPA/W/272 and GPA/W/272/Rev.1, dated 23 September and 8 October 2003, respectively.

⁵⁷ GPA/W/275, dated 23 September 2003.

- Proposed modification to Annex 3 of Japan's Appendix I⁵⁸

On 3 June 2005, the European Communities posed additional questions⁵⁹ with regard to this proposed modification.

As to developments prior to the reporting period, the European Communities objected to this proposed modification and posed questions⁶⁰, which Japan responded to in September 2004.⁶¹

- (ii) Notification by the United States concerning proposed modifications to reflect changes in the administrative structure of the Federal Government⁶², as regards the Uranium Enrichment Corporation

No developments in the reporting period.

IV. ACCESSIONS

15. Nine WTO Members are in the process of acceding to the Agreement on Government Procurement: Albania, Bulgaria, Georgia, Jordan, the Kyrgyz Republic, Moldova, Oman, Panama and Chinese Taipei. A further five WTO Members have provisions in their respective Protocols of Accession to the WTO regarding accession to the Agreement on Government Procurement: Armenia, China, Croatia, the Former Yugoslav Republic of Macedonia, and Mongolia.

16. During the reporting period, the following developments have taken place with regard to accessions. Based on the approach agreed upon at the meeting of the Committee on 17 November 2004⁶³ to the accession process of Jordan to the Agreement on Government Procurement, the European Communities submitted questions and requests⁶⁴ regarding Jordan's revised market access offer⁶⁵, and the United States submitted requests for improvements⁶⁶ in Jordan's revised market access offer. Jordan responded to those submissions on 13 June 2005.⁶⁷

17. At the meeting of the Committee on 14 March 2005, Jordan made a statement reporting on developments in its accession process to the Agreement on Government Procurement.⁶⁸ Jordan noted that, in light of those developments, it had turned out to be impossible to finalize and submit Jordan's second revised offer within the agreed time-frame. Jordan looked forward to submitting the second revised offer to the Committee once the official approval of the Government and other internal procedures had taken place. As to the review of Jordan's government procurement legislation, the draft unified procurement law had been completed by the relevant committee, and had been submitted to the Government prior to undergoing the relevant constitutional procedures. Further details on Jordan's accession process are noted in the minutes of the meeting of the Committee on 21 July 2005.⁶⁹ At the Committee's meeting of 14 October 2005, Jordan made a further statement

⁵⁸ GPA/MOD/JPN/7, dated 26 July 2004.

⁵⁹ GPA/MOD/JPN/18, dated 3 June 2005.

⁶⁰ GPA/MOD/JPN/10, dated 23 August 2004.

⁶¹ GPA/MOD/JPN/14, dated 20 September 2004.

⁶² GPA/W/153, dated 25 September 2001.

⁶³ GPA/M/24, dated 8 December 2004, paras. 51-57.

⁶⁴ GPA/ACC/JOR/5, dated 20 December 2004.

⁶⁵ GPA/ACC/JOR/4, dated 30 September 2004.

⁶⁶ GPA/ACC/JOR/6, dated 20 December 2004.

⁶⁷ GPA/ACC/JOR/8, dated 13 June 2005 and GPA/ACC/JOR/7, dated 13 June 2005, respectively.

⁶⁸ GPA/M/26, dated 13 April 2005, paras. 19-22.

⁶⁹ GPA/M/27, dated 30 August 2005, paras. 15-16.

indicating that constructive bilateral discussions had been held with various Parties on its offer and legislative developments and that it hoped to present a revised offer in the coming months.⁷⁰

18. During the reporting period, no developments have been reported in relation to the respective accessions of Albania, Armenia, Bulgaria, China, Croatia, Georgia, the Kyrgyz Republic, the former Yugoslav Republic of Macedonia, Moldova, Mongolia, Oman, Panama and Chinese Taipei.

V. NEGOTIATIONS

19. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. During the reporting period, Parties pursued their negotiations at informal meetings in the weeks of 14 March, 30 May, 18 July and 10 October 2005.

20. The negotiations focused on the simplification and improvement of the non-market-access-related provisions in the text of the Agreement, based on proposals made by delegations. Following each informal meeting, proposals have been consolidated into a single revised draft text, which formed the basis of the drafting work at the subsequent meeting. During 2005, the Committee made substantial progress on the revision of the non-market-access-related provisions of the text. The main issues on which further work is needed in respect of these revisions were set out in the Chairman's statement on stocktaking and future work of 14 October 2005.⁷¹

21. As regards the work pertaining to elements 2 and 3 of the work programme, namely the extension of coverage and the elimination of discriminatory measures and practices the Committee, at its formal meeting of 16 July 2004, adopted a Decision on negotiating modalities⁷², taking into account earlier submissions and discussions on elements 2 and 3 of the work programme. In accordance with such modalities, Parties tabled their initial requests around the end of 2004.⁷³ Since the preparation of initial offers has taken longer than foreseen in the initial Modalities Decision, at its meeting of 21 July 2005 the Committee adopted a further Decision⁷⁴ (copy attached) postponing the dates for submission of initial offers. In addition, the Decision postponed the target date for the overall conclusion of the negotiations pursuant to Article XXIV:7 of the Agreement to the end of 2006.

22. At the informal meetings in the weeks of 14 March, 30 May, 18 July and 10 October 2005, delegations also conducted informal discussions on the so-called "horizontal" coverage matters that, pursuant to the original Modalities Decision, are to be discussed by the Committee as a whole. The discussions touched upon written submissions by Canada⁷⁵, Japan⁷⁶ and the United States⁷⁷ concerning certain aspects of horizontal coverage matters as well as various drafting proposals

⁷⁰ GPA/M/28, to be issued.

⁷¹ Job No. 7591, dated 18 October 2005.

⁷² GPA/79, dated 19 July 2004.

⁷³ At the end of 2004, a special document series GPA/O/... has been created for the circulation, through the Secretariat, of participants' official submissions relating to bilateral coverage negotiations, such as requests and offers. For more information on the creation and circulation of these documents, see the Committee's discussion on the circulation of requests in the bilateral coverage negotiations to participants, held at its meeting of 16 December 2005 (GPA/M/25, dated 18 January 2005, para. 18).

⁷⁵ Job No. 3228, dated 13 May 2005.

⁷⁶ Job No. 5105 dated 15 July 2005.

⁷⁷ Job No. 3373, dated 20 May 2005

relating to market-access-related provisions in the revised draft text of the Agreement. Upon the request of delegations, the discussions have been summarized by the Secretariat.⁷⁸

23. Pursuant to the Modalities Decision, two observers, Jordan⁷⁹ and Chinese Taipei⁸⁰, have become participants in the bilateral coverage negotiations in addition to Parties to the Agreement on Government Procurement. At its meeting of 14 March 2005, the Committee discussed the issue of future work with regard to negotiations pursuant to Article XXIV:7 of the Agreement.⁸¹ At its meeting of 21 July 2005, the Committee discussed the state of play of coverage negotiations⁸² and adopted the above-mentioned revised timetable for negotiations.⁸³

⁷⁸ Job No. 2909/Rev.1 (3343), dated 19 May 2005; Job No. 4321/Rev.2 (5082), dated 15 July 2005; and Job No. 5848/Rev.1 (6177), dated 5 September 2005.

⁷⁹ GPA/O/JOR/1, dated 23 December 2004.

⁸⁰ GPA/O/TPKM/1, dated 11 March 2005.

Committee on Government Procurement

**MODALITIES FOR THE NEGOTIATIONS ON EXTENSION OF COVERAGE AND
ELIMINATION OF DISCRIMINATORY MEASURES AND PRACTICES**

Decision of 21 July 2005

Addendum

The Committee on Government Procurement,

Noting that the preparation of initial offers as called for by the Committee's Decision on Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices (GPA/79) requires extensive research and internal consultation and, therefore, is taking longer than initially foreseen;

Reaffirming the importance it attaches to the successful completion of these negotiations;

Decides that:

- (i) each Party shall table its initial offer prior to the October meeting of the Committee (week of 10 October 2005) but not later than the Hong Kong Ministerial Conference (13-18 December 2005); and
 - (ii) the negotiations on extension of coverage and elimination of discriminatory measures as well as other aspects of the Article XXIV:7 negotiations aim to be concluded by the end of 2006.
-

Committee on Government Procurement

**REPORT (JULY 2003 – NOVEMBER 2004) OF THE
COMMITTEE ON GOVERNMENT PROCUREMENT**

I. GENERAL

1. This Report covers the period since the Committee's previous Annual Report (GPA/75), that is July 2003 – November 2004. It is issued pursuant to Article XXIV:7(a) of the Agreement on Government Procurement.

2. Since the last Annual Report, the Committee has held four formal meetings – on 22 August 2003 and on 23 April, 16 July and 17 November 2004 (GPA/M/21-24). The first of these meetings was chaired by Mr. Jan-Peter Mout (the Netherlands), and the subsequent meetings by Mr. Niklas Bergström (Sweden).

3. The Committee has also held a series of informal meetings, pursuing negotiations under Article XXIV:7 of the Agreement on Government Procurement, in August and November 2003 and in February, April, June, October and November 2004.

4. The following WTO Members are covered by the Agreement: Canada; the European Communities, including its 15 member States as well as, since 1 May 2004, its 10 new member States; Hong Kong, China; Iceland; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States.

5. Twenty WTO Members have observer status in the Committee on Government Procurement: Albania, Argentina, Armenia, Australia, Bulgaria, Cameroon, Chile, China, Colombia, Croatia, Georgia, Jordan, the Kyrgyz Republic, Moldova, Mongolia, Oman, Panama, Sri Lanka, Chinese Taipei and Turkey. Requests for observer status by Sri Lanka (GPA/W/292, dated 6 April 2004) and Armenia (GPA/W/293, dated 18 June 2004) were approved by the Committee at its meetings of 23 April (GPA/M/22, para. 3) and 16 July 2004 (GPA/M/23, paras. 7-10), respectively. Three intergovernmental organizations, IMF, OECD and UNCTAD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

A. THRESHOLDS

6. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Korea notified its threshold figures expressed in national currencies for 2003-2004 (GPA/W/251), and Switzerland notified its threshold figures expressed in national currencies for 2004 (GPA/W/285/Add.7). Further, the following Parties have provided information on their threshold figures expressed in national currencies for 2004-2005: Canada; the European Communities; Hong Kong, China; Israel; Japan; Korea; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States (GPA/W/285, GPA/W/285/Add.1-6 and GPA/W/285/Add.8-9).

B. NOTIFICATION AND REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

7. In accordance with the Decision on Procedures for the Notification of National Implementing Legislation (GPA/1/Add.1), Hong Kong, China (GPA/27/Add.1, dated 20 August 2003) and Japan (GPA/37/Add.1, dated 7 April 2004) have notified a change in their respective national implementing legislation. The Committee addressed those notifications at its meetings of 22 August 2003 (GPA/M/21, para. 62) and 23 April 2004, (GPA/M/22, paras. 61-62), respectively.

8. As regards the Kingdom of the Netherlands with respect to Aruba, at the meeting of 22 August 2003, the Committee was informed that there were no new developments concerning the eventual submission of implementing legislation (GPA/M/21, para. 61). At the meeting of 23 April 2004, the Kingdom of the Netherlands with respect to Aruba said that the Government of Aruba had originally intended to introduce new implementing legislation and to subsequently answer the questions in GPA/1/Add.1 on the basis of such newly introduced legislation (GPA/M/22, paras. 63-64).

C. STATISTICAL REPORTING

9. Article XIX:5 of the Agreement on Government Procurement requires Parties to collect and provide, on an annual basis, statistics on their procurements covered by the Agreement. During the period under review, Hong Kong, China has reported statistics for 2002 (GPA/76, dated 30 September 2003) and for 2003 (GPA/80, dated 20 September 2004), and Korea has reported statistics for 2002 (GPA/76/Add.1, dated 7 January 2004).

D. CONSULTATIONS AND DISPUTE SETTLEMENT

10. There were no matters raised under Article XXII of the Agreement on Government Procurement during the reporting period.

E. PROCEDURAL MATTERS

11. In accordance with the revised Decision on Procedures for the Circulation and Derestriction of Documents of the Committee on Government Procurement (GPA/72, dated 23 October 2002), Parties agreed to the derestriction of the documents listed in document GPA/77 (dated 29 January 2004).

III. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

A. ENLARGEMENT OF THE EUROPEAN COMMUNITIES

12. The coverage of the Agreement on Government Procurement has been extended to the ten new member States of the European Communities (Estonia, Cyprus, the Czech Republic, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia) as of 1 May 2004, the date of their accession to the European Communities. In line with the Decision made by the Committee (GPA/78, dated 4 May 2004) at its meeting of 23 April 2004 (GPA/M/22, paras. 14-28), the modification to Appendices I-IV of the European Communities (GPA/MOD/EEC/1 and Add.1) took effect as of 1 May 2004 (WT/Let/472). As a consequence, four of the ten new member States of the European Communities (Estonia, Latvia, Lithuania and Slovenia) that had submitted applications for accession (GPA/41, GPA/SPEC/5, GPA/66 and GPA/56, respectively) and had ongoing accession processes before 1 May 2004, have withdrawn their applications for accession (GPA/41/Rev.1, GPA/SPEC/5/Rev.2, GPA/66/Rev.1 and GPA/56/Rev.1, respectively).

B. OTHER MODIFICATIONS

13. Since the last annual report, the following additional modifications to Parties' respective Appendices became effective:

- (a) modification by Canada (GPA/W/203), effective as of 9 December 2003 (WT/Let/454);
- (b) modifications by Hong Kong, China:
 - (i) notification GPA/269, effective as of 6 August 2003 (WT/Let/453);
 - (ii) notification GPA/MOD/HKG/1, effective as of 5 August 2004 (WT/Let/476);
- (c) modifications by Japan:
 - (i) notification GPA/W/255, effective as of 14 October 2003 (WT/Let/452/Rev.1);
 - (ii) notification GPA/W/273 as well as, although only with respect to National Consumer Information Center of Japan, notification GPA/W/274, effective as of 29 January 2004 (WT/Let/469);
 - (iii) notification GPA/MOD/JPN/1, effective as of 4 March 2004 (WT/Let/463);
 - (iv) notification GPA/MOD/JPN/2, effective as of 14 April 2004 (WT/Let/470);
 - (v) notification GPA/MOD/JPN/3, effective as of 16 April 2004 (WT/Let/471);
 - (vi) notification GPA/MOD/JPN/4, effective as of 7 May 2004 (WT/Let/473);
 - (vii) notification GPA/MOD/JPN/5, effective as of 20 May 2004 (WT/Let/475);
 - (viii) notifications GPA/MOD/JPN/8 and GPA/MOD/JPN/9, effective as of 17 September 2004 (WT/Let/478);
 - (ix) notification GPA/MOD/JPN/11, effective as of 17 October 2004 (WT/Let/483)*;
 - (x) notification GPA/MOD/JPN/15, effective as of 20 October 2004 (WT/Let/484)*;
- (d) modifications by Korea:
 - (i) notification GPA/W/250, as regards Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd, as well as notification GPA/MOD/KOR/1, effective as of 6 October 2004 (WT/Let/481/Rev.1);
 - (ii) notification GPA/W/284, effective as of 12 December 2003 (WT/Let/455);

* Official certification document not yet circulated.

- (e) modifications by the United States:
 - (i) notification GPA/W/153, as regards all relevant entities, except for the Uranium Enrichment Corporation, effective as of 1 October 2004 (WT/Let/482/Rev.1); and
 - (ii) notification GPA/MOD/USA/1, effective as of 14 February 2004 (WT/Let/457).

14. The following proposed modifications are outstanding:

- (a) proposed modifications by Japan relating to:
 - (i) NTT (GPA/W/91, dated 6 September 1999)

No developments in the period under review.
 - (ii) East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company (GPA/W/144, 145 and 146, dated 29 August 2001, and GPA/W/152 & Corr.1, dated 20 September and 10 October 2001)

In October 2003 the European Communities submitted additional questions (GPA/W/271 and Corr.1), which Japan responded to in June 2004 (GPA/MOD/JPN/6).
 - (iii) Railway Construction Public Corporation and Corporation for Advanced Transport and Technology (GPA/W/272 and Rev.1, dated 23 September and 8 October 2003, respectively)

In October 2003 the European Communities placed an objection to the proposed deletion of both entities (GPA/W/279 and Corr.1) and raised questions thereon subsequently (GPA/W/291). The United States did not object to the deletion of Japan Railway Construction Public Corporation but it objected to the deletion of the Corporation for Advanced Transport and Technology and asked questions in that regard (GPA/W/280).
 - (iv) Japan Consumer Information Center, Water Resources Development Public Corporation, Japan Green Resources Corporation, the Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, the Association for Welfare of the Mentally and Physically Handicapped, and National Agriculture Research Organization (GPA/W/274, dated 23 September 2003)

In October 2003 the European Communities placed an objection to all proposed modifications (GPA/W/279 and Corr.1). After further study, the European Communities did not object to the deletion of the Japan Consumer Information Center, but put questions to Japan in respect of the other entities (GPA/W/291). The United States also did not object to the deletion of the Japan Consumer Information Center, it was silent on the proposed modification concerning the National Agriculture Research Organization; however, it objected to the proposed withdrawal of the other entities and posed questions thereon (GPA/W/280). Accordingly, the modification

concerning Japan Consumer Information Center was certified as of 29 January 2004 (WT/Let/469, dated 11 May 2004).

As to the other entities, Japan responded to the questions by the European Communities and the United States in September 2004 (GPA/MOD/JPN/13).

- (v) National Aerospace Laboratory (GPA/W/275, dated 23 September 2003)

In October 2003 the European Communities objected to the proposed deletion (GPA/W/279 and Corr.1) and asked questions thereon (GPA/W/291). The United States also placed an objection and posed questions (GPA/W/280).

- (vi) Social Welfare and Medical Service Corporation and Japan Institute of Labour (GPA/W/276, dated 8 October 2003)

In November 2003 the European Communities objected to the proposed modification (GPA/W/282) and later posed questions (GPA/W/291), number 9 and 10 of which Japan answered in September 2004 (GPA/MOD/JPN/12).

- (vii) Annex 3 of Japan's Appendix I (GPA/MOD/JPN/7, dated 26 July 2004)

In August 2004 the European Communities objected to this proposed modification and posed questions thereon (GPA/MOD/JPN/10), which Japan responded to in September 2004 (GPA/MOD/JPN/14).

- (viii) National Center for Industrial Property Information and Training (GPA/MOD/JPN/16, dated 10 November 2004)

- (b) proposed modification by Korea relating to Korea Telecom (GPA/W/207, dated 11 September 2002):

The European Communities withdrew its objection to this proposed modification (GPA/W/214) in October 2003 (GPA/W/278 and Corr.1). In June 2004 the United States also withdrew (GPA/MOD/KOR/3) its objection (GPA/W/210). The objection by Canada (GPA/W/217) remains valid.

- (c) Notification by the United States concerning proposed modifications to reflect changes in the administrative structure of the Federal Government (GPA/W/153, dated 25 September 2001), as regards the Uranium Enrichment Corporation:

Canada withdrew its objection (GPA/W/167) to this proposed modification with regard to all entities concerned (GPA/MOD/USA/2). However, at the Committee meeting of 23 April 2004, the European Communities withdrew its objection (GPA/W/163) only concerning the entities in that notification other than the Uranium Enrichment Corporation (GPA/M/22, para. 40), and on 1 October 2004 Japan withdrew its objection (GPA/W/162) only concerning the entities in that notification other than the Uranium Enrichment Corporation (GPA/MOD/USA/3). Accordingly, the proposed modifications have been certified only concerning the entities in that notification other than the Uranium Enrichment Corporation (WT/Let/482), while the objections by the European Communities and Japan concerning the Uranium Enrichment Corporation remain valid.

15. With respect to items (a)(i) and (ii) of the preceding paragraph, Japan submitted to the Committee's November 2004 meeting a document relating to its pending notifications pursuant to Article XXIV:6(b) of the Agreement on Government Procurement (GPA/MOD/JPN/17, dated 15 November 2004). This document was the subject of an exchange of views at that meeting.

16. At the formal meeting of 17 November 2004, Israel raised the issue of its commitment in relation to offsets. During the discussion, Israel announced its intention to formally notify a proposed modification to the relevant Note to its Appendix I pursuant to Article XXIV:6(a) of the Agreement on Government Procurement. The Committee agreed to hold a meeting on 16 December 2004 to address that notification.

IV. ACCESSIONS

17. Nine WTO Members are in the process of acceding to the Agreement on Government Procurement: Albania, Bulgaria, Georgia, Jordan, the Kyrgyz Republic, Moldova, Oman, Panama and Chinese Taipei. A further five WTO Members have provisions in their respective Protocols of Accession to the WTO regarding accession to the Agreement on Government Procurement: Armenia, China, Croatia, the Former Yugoslav Republic of Macedonia, and Mongolia.

18. The following developments have taken place with regard to accessions:

- (a) Georgia submitted its entity offer in December 2003 (GPA/SPEC/34), and in June 2004 it responded (GPA/ACC/GEO/3) to questions from the European Communities (GPA/W/232) and Japan (GPA/ACC/GEO/1) as well as to comments from Hong Kong, China on Georgia's entity offer (GPA/W/290). Hong Kong, China replied to this response in June 2004 (GPA/ACC/GEO/4). In April 2004 Korea submitted questions and comments regarding Georgia's entity offer (GPA/ACC/GEO/2, dated 21 April 2004), and the United States also posed questions regarding Georgia's entity offer in September 2004 (GPA/ACC/GEO/5). In November 2004 Japan submitted responses (GPA/ACC/GEO/6) to Georgia's replies in document GPA/ACC/GEO/3. At the meeting of the Committee on Government Procurement on 17 November 2004 the Committee agreed that the Chairman would consult with Parties about the possibility of holding plurilateral consultations on Georgia's accession process back to back with the first meeting of the Committee in 2005, scheduled for the week of 14 March 2005.
- (b) Jordan submitted its original entity offer in February 2003 (GPA/SPEC/29). The United States submitted a first set of questions thereon (GPA/SPEC/30), to which Jordan responded in August 2003 (GPA/SPEC/31). Additional questions on Jordan's original entity offer were received from Canada (GPA/ACC/JOR/2, dated 16 April 2004), the European Communities (GPA/SPEC/32, dated 27 August 2003 and GPA/SPEC/32/Corr.1, dated 29 October 2003) and the United States (GPA/SPEC/33, dated 22 October 2003). Jordan responded to those additional questions in documents GPA/ACC/JOR/3 (dated 12 August 2004), GPA/ACC/JOR/1 (dated 3 March 2004) and GPA/W/289 (dated 8 January 2004), respectively.

Two rounds of informal plurilateral consultations between Parties and Jordan took place on 23 April and 7 October 2004. The consultations in October 2004 addressed Jordan's revised entity offer (GPA/ACC/JOR/4, dated 30 September 2004). Jordan informed Parties that its new comprehensive legislation was expected to be finalized by the end of 2004 and would hopefully pass the legislative process by summer 2005. It was agreed that Parties should submit their comments on Jordan's revised offer by

15 December 2004 through the Secretariat. In turn, Jordan agreed to prepare a further revised offer by 15 February 2005. This would allow holding another round of plurilateral consultations at the first Committee meeting in 2005.

For further details on Jordan's accession process, reference is made to the minutes of the meetings of the Committee on 22 August 2003 (GPA/M/21, paras. 37-45) and on 23 April 2004 (GPA/M/22, paras. 50-56 and Annex B).

- (c) With respect to the accession of Chinese Taipei, all bilateral consultations have been successfully concluded with interested delegations on the substantive issues. However, the issue of nomenclatures remains outstanding. For further details of efforts to resolve that issue, reference is made to the minutes of the meetings of the Committee on 22 August 2003 (GPA/M/21, paras. 46-59) and on 23 April 2004 (GPA/M/22, paras. 57-60); and
- (d) Based on the commitment made in its Protocols of Accession to the WTO (WT/ACC/ARM/23, paragraph 153), Armenia submitted a request for observer status in the Committee on Government Procurement (GPA/W/293, dated 18 June 2004), which the Committee approved at its meeting of 16 July 2004 (GPA/M/23, paras. 7-10).

19. No developments have been reported in relation to the respective accessions of Albania, Bulgaria, China, Croatia, the Kyrgyz Republic, the former Yugoslav Republic of Macedonia, Moldova, Mongolia, Oman and Panama.

20. With regard to work pertaining to streamlining the accession process, at its meeting of February 2003 the Committee agreed to take up this issue within the wider context of its work on the revision of the Agreement. Further information on how this issue was addressed in the period under review is available in the minutes of the Committee meeting of 22 August 2003 (GPA/M/21, paras. 31-35) and 23 April 2004 (GPA/M/22, paras. 4-13), as well as in the versions of the revised texts of the Agreement as at the end of the various informal meetings held by the Committee during the period under review in accordance with Article XXIV:7 of the Agreement on Government Procurement.

V. NEGOTIATIONS

21. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. During the period under review, Parties pursued their negotiations at informal meetings in August and November 2003, and in February, April, June, October and November 2004.

22. This work focused primarily on simplification and improvement of the non-market-access-related provisions in the text of the Agreement, on the basis of proposals made by delegations. Since the meeting of June 2003, proposals have been consolidated after each meeting into a single revised draft text, which formed the basis of the drafting work at the subsequent meeting. The discussions at the meetings usually addressed all provisions of the revised draft text, with special attention to certain issues, such as developing countries, electronic tendering, conditions for participation, notices of intended procurement, dispute settlement and modifications and rectifications to Parties' Appendices to the Agreement.

23. As regards the work pertaining to elements 2 and 3 of the work programme, namely the extension of coverage and the elimination of discriminatory measures and practices, at its formal meeting of 16 July 2004 the Committee adopted a Decision on negotiating modalities (GPA/79, dated 19 July 2004, copy attached), taking into account earlier submissions and discussions on elements 2 and 3 of the work programme. In accordance with such modalities, Parties shall table in writing their initial requests by 30 November 2004, and their initial offers by 1 March 2005, but not later than 1 May 2005. Parties also agreed that the Committee as a whole will address the provisions in the draft revised text of the Agreement referred to as "market access issues", as well as issues relating to the presentation and structure of the appendices to the Agreement. One submission has been made in this connection (Job No. 5582, dated 26 August 2004), which was discussed at the informal sessions of 8 October and 17 November 2004.

Committee on Government Procurement

**MODALITIES FOR THE NEGOTIATIONS ON EXTENSION OF COVERAGE AND
ELIMINATION OF DISCRIMINATORY MEASURES AND PRACTICES**

Decision of 16 July 2004

The Committee agrees on the following modalities for the negotiations on the extension of coverage and elimination of discriminatory measures and practices:

Objectives

In accordance with Article XXIV:7(b) and (c), the negotiations on these matters shall aim at:

- (i) the greatest possible extension of coverage among all Parties on the basis of mutual reciprocity, having regard to the provisions relating to developing countries; and
- (ii) the elimination of discriminatory measures and practices which distort open procurement.

The Parties recognize the interdependence between these two objectives, as well as the need to maximize clarity with regard to coverage and any remaining discriminatory measures and practices.

Matters to be negotiated in the Committee as a whole

The Committee as a whole will address the provisions in the draft revised text of the Agreement referred to as "market access issues", as well as issues relating to the presentation and structure of the appendices to the Agreement, including:

- whether there should be further harmonization of thresholds;
- whether there should be a uniform level of coverage of the entities covered by the Agreement;
- whether Annex 1 should follow a positive or negative list approach;
- whether there should be greater harmonization of the way entities are described, in particular whether Annexes 2 and 3 should be structured on the basis of categories of

entities, for example as defined in the legislation of individual Parties or in terms of lists of individual entities;

- whether, in regard to services coverage in Annexes 4 and 5, further commonality of presentation is desirable and feasible, taking into account coverage and presentation under the GATS;
- whether the General Notes in the Annexes can be simplified and made more easily understandable;
- other issues that may be raised by delegations.

The Committee shall initiate work on the above issues in autumn 2004. Participants are invited to submit initial proposals relating to these matters by 31 August 2004.

Matters to be largely negotiated bilaterally

Negotiations on the extension of coverage of each Party's Appendix I as well as on the elimination of discriminatory measures and practices in such Appendices will be largely pursued bilaterally but subject to monitoring by the Committee as a whole.

These negotiations shall be pursued as follows:

- (i) by 30 November 2004, each Party shall table in writing its initial requests to any other Party and each Party shall aim to table its initial offer by 1 March 2005 but not later than 1 May 2005;
- (ii) provision would then be made for rounds of bilateral negotiations, leading to the presentation of revised and improved offers by the end of October 2005. These rounds of bilateral negotiations will normally be arranged to take place back-to-back with meetings of the Committee.

The basis for these negotiations shall be the existing coverage of Parties as reflected in their respective Appendix I, subject to any rectifications and modifications notified pursuant to Article XXIV:6 of the GPA. Parties concerned will make every effort to resolve pending notifications.

Parties agree on the need to ensure collective monitoring of the above bilateral negotiating process. To this end:

- (i) the Secretariat shall circulate as restricted documents to all other Parties initial official requests and offers as well as subsequent official revisions; and
- (ii) regular stocktaking and review of the bilateral process will take place in the Committee.

Any observer government which has submitted an offer with a view to participating in the revised Agreement may participate in this aspect of the negotiations and receive copies of requests and offers circulated by the Secretariat.

Conclusion of the negotiations

Parties agree that the negotiations on extension of coverage and elimination of discriminatory measures as well as other aspects of the Article XXIV:7 negotiations aim to be concluded by the beginning of 2006.

Committee on Government Procurement

REPORT (NOVEMBER 2002 – JUNE 2003) OF THE COMMITTEE ON GOVERNMENT PROCUREMENT

I. GENERAL

1. This Report is submitted as an update to the 2002 Annual Report issued in November 2002 pursuant to Article XXIV:7(a) of the Agreement on Government Procurement. The period covered in this Report is November 2002 - June 2003.

2. Since the 2002 Annual Report, the Committee has held one formal meeting on 6 February 2003, and a series of informal meetings in February, May and June 2003. At its meeting on 6 February 2003, the Committee considered the following agenda: Modifications to the Appendices to the Agreement; Accessions; Review of National Implementing Legislation; Negotiations under Article XXIV:7; and Other Business. At the informal meetings, Parties pursued their work pertaining to the negotiations under Article XXIV:7. A further formal and informal meeting is foreseen in the week of 18-22 August 2003 to pursue this work.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications to the Appendices to the Agreement

3. Since the 2002 Report, modifications pertaining to their respective Appendices notified by Switzerland (GPA/W/225) became effective on 7 February 2003 (WT/Let/437); by the European Community, Iceland and Norway (GPA/W/226, 227 and 228, respectively) became effective on 11 January 2003 (WT/Let/438); by Hong Kong, China (GPA/W/256) became effective on 4 April 2003 (WT/Let/444); and by Japan (GPA/W/252-254) became effective on 9 May 2003 (WT/Let/446). Modifications have also been notified by Korea (GPA/W/250); Japan (GPA/W/255); Switzerland (GPA/W/268); and Hong Kong, China (GPA/W/269). In respect of Korea's modifications, the European Community (GPA/W/257) and the United States (GPA/W/258) sent communications objecting to the proposed modifications going into effect, and the United States submitted questions in GPA/W/264. With respect to Japan's proposed modifications, the European Community raised an objection in GPA/W/262.

4. With regard to the proposed modification by Japan to its Appendix I notified in GPA/W/91 pertaining to the NTT Communications Corporation, the United States had withdrawn its objection in October 2001 (GPA/W/166) and Canada in October 2002 (GPA/W/213). In a statement at the February 2003 meeting, Japan reported that, despite further consultations with the European Community, it had not been able possible for the two Parties to reach a consensus, and the European Community confirmed that it maintained its objection to the proposed modifications going into effect.

5. With regard to the proposed modifications by Japan to its Appendix I in GPA/W/144, 145 and 146 in respect of the three Japanese railway companies, namely East Japan Railway Company, Central Japan Railway Company, and West Japan Railway Company, Canada withdrew its objections in October 2002 (GPA/W/211) and February 2003 (GPA/W/246). The United States (GPA/W/151) and the European Community (GPA/W/155) continue to maintain their objections to the entry into force of the modifications. Japan's replies to follow-up questions put by the European Community in GPA/W/245 were circulated in GPA/W/263.

6. With respect to Korea's proposed modifications to its Appendix I (GPA/W/207), replies by Korea to further questions put to it by the United States (GPA/W/242) and the European Community (GPA/W/244) were circulated in GPA/W/266 and 267, respectively.

7. With respect to the proposed modifications to Annexes 1 and 3 of Appendix I by the United States (GPA/W/153), replies by the United States to further questions put by Japan (GPA/W/195) and the European Community (GPA/W/216) were circulated in GPA/W/223 and 243, respectively.

Thresholds

8. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Korea (GPA/W/251) notified its threshold figures for 2003-2004.

Notification and review of national implementing legislation

9. The Committee completed its review of Iceland's national implementing legislation submitted in GPA/69.

Consultations and dispute settlement

10. There were no matters raised under Article XXII of the Agreement during the reporting period.

Procedural matters

11. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add.2), Parties agreed to the derestriction of the documents listed in GPA/74, dated 13 March 2003.

III. ACCESSIONS

12. Jordan submitted its entity offer on 6 February 2003. Questions and requests for information received from the United States regarding this offer have been circulated.

13. With regard to the accession of Chinese Taipei, the Committee was informed at its February 2003 meeting that all bilateral consultations had been successfully concluded with interested delegations on the substantive issues in December 2002. The issue of nomenclatures remained outstanding.

14. Estonia reported at the February 2003 meeting that its Public Procurement Act was being reviewed, and was invited to duly communicate the changes, at the conclusion of the review, to the Committee with an explanation of their impact on its offer.

15. Latvia reported at the February 2003 meeting that bilateral consultations were ongoing with the European Community.

16. With respect to the accession of Bulgaria, Bulgaria's replies to follow-up questions put by Canada (GPA/W/219), were circulated in GPA/W/249. Bulgaria also provided further clarification in respect of a follow-up question by Canada to a reply it had previously given. Furthermore, at the February 2003 meeting, Bulgaria reiterated its request for information pertaining to export opportunities in the markets of GPA Parties for Bulgarian suppliers.
17. With respect the accession of Georgia, questions received from Canada and the European Community regarding Georgia's replies to the Checklist of Issues were circulated in GPA/W/230 and GPA/W/232, respectively. Georgia's replies to Canada's questions were circulated in GPA/W/237.
18. With regard to its accession, Slovenia reported at the February meeting that necessary changes were being drafted in order to streamline its Public Procurement Act.
19. With regard to its accession, Albania's replies to questions put by Hong Kong, China; Switzerland; and Canada were circulated in GPA/W/238-241, respectively.
20. With respect to the accession of Moldova, questions were submitted by Hong Kong, China (GPA/W/206) and the European Community (GPA/W/231).
21. The Kyrgyz Republic submitted replies (GPA/W/248) to questions put by the United States (GPA/W/201).
22. Since the October 2002 meeting, no developments have been reported in relation to the respective accessions of Oman, China, Croatia, Lithuania, Mongolia, and Panama.
23. With regard to work pertaining to streamlining the accession process, the Committee considered at its February 2003 meeting a communication circulated by Chinese Taipei (GPA/W/224) as well as a note by the Secretariat summarizing the points made at the October 2002 meeting. The Committee agreed to take up this issue within the wider context of its work on the revision of the Agreement.

IV. NEGOTIATIONS

24. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. During the period covered by this report, Parties pursued their consultations at their formal meeting in February 2003, and in further informal meetings held in February, May and June 2003, on the basis of proposals made by delegations. This work focused primarily on simplification and improvement of the Agreement, but also discussed the other two elements. An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties.
25. At its meeting in May 2003, the Group considered in detail and heard comments made by Parties on a joint submission by Canada, the European Community, Japan and the United States (Job No. 3166). It also had a preliminary discussion on a proposal by Norway dealing with conflict of interest (Job No. 7935). At its meeting in June, the Group considered a revised joint submission (Job No. 4479) by Canada, the European Community, Japan and the United States incorporating comments and feedback by other Parties. The Group further had a preliminary discussion based on submissions by the European Community on challenge procedures (Job No. 4654) and consultations and dispute settlement (Job No. 4655), and by Switzerland on accession and developing countries (Job No. 4287).

26. Following the June 2003 meeting, all the available proposals have been consolidated into a single revised draft text which is to form the basis of further consultations in the period up to the Cancun Ministerial Conference.

27. As regards the work pertaining to elements 2 and 3 of the work programme, namely the elimination of discriminatory measures and the expansion of coverage, the Group agreed at its informal meeting in May 2003 to pursue this after the Cancun Ministerial Conference.

28. The Committee has set target dates of the Cancun Ministerial Conference for provisional agreement on the revision of the provisions of the Agreement (other than coverage related issues) and of 1 January 2005 to conclude the negotiations as a whole.

REPORT (2002) OF THE COMMITTEE ON GOVERNMENT PROCUREMENT

I. GENERAL

1. This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform the General Council of developments during the periods covered by such reviews.

2. The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is November 2001-October 2002, but the Report also reflects, where necessary, the work of the Committee up to November 2001 (GPA/8 and Add.1, GPA/19, GPA/25, GPA/30, GPA/44 and GPA/58). The Committee on Government Procurement held three meetings in 2002 on 21 February, 31 May and 8 October 2002 (GPA/M/17, 18 and 19¹).

3. The following WTO Members are Parties to the Agreement: Canada; the European Community and its fifteen member States; Hong Kong, China; Iceland; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States. Twenty-seven WTO Members have observer status: Albania, Argentina, Australia, Bulgaria, Cameroon, Chile, China, Colombia, Croatia, the Czech Republic, Estonia, Georgia, Hungary, Jordan, the Kyrgyz Republic, Latvia, Lithuania, Malta, Moldova, Mongolia, Oman, Panama, Poland, the Slovak Republic, Slovenia, Chinese Taipei and Turkey. Three intergovernmental organizations, IMF, OECD, and UNCTAD also have observer status; the ITC also attends Committee meetings.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4. Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article. Since the 2001 Report of the Committee, modifications relating to their respective Appendices were made by Canada (GPA/W/203); Hong Kong, China (GPA/W/198); Japan (GPA/W/186 and GPA/W/196); Korea (GPA/W/207); Singapore (GPA/W/200); and the United States (GPA/W/153, GPA/W/154 and GPA/W/208). The modifications proposed by Japan in GPA/W/186 and GPA/W/196 became effective and entered into force on 14 April 2002 (WT/Let/419) and 27 June 2002 (WT/Let/425/Rev.1) respectively; by Hong Kong, China in GPA/W/198 on 6 July 2002 (WT/Let/425/Rev.1); by Singapore in GPA/W/200 on 11 August 2002 (WT/Let/429); and by the

¹ To be circulated shortly.

United States in GPA/W/154 and GPA/W/208 on 25 October 2001 (W/Let/407) and on 16 October 2002 (WT/Let/431), respectively.

5. With regard to the proposed modifications to Annex 1 of Appendix I by Canada in GPA/W/203, Hong Kong, China made a communication seeking further clarification on the proposed changes (GPA/W/218).

6. With regard to the proposed modifications to Annexes 1 and 3 of Appendix I by the United States in GPA/W/153, dated 25 September 2001, the delegations of Canada, the European Community and Japan made communications seeking further information and objecting to the proposed modifications going into effect (circulated in GPA/W/167, GPA/W/163 and GPA/W/162, respectively). The responses by the United States to the questions raised by the three Parties have been circulated in GPA/W/183-185, respectively. Further questions were put to the United States by Japan and the European Community on 4 October 2002 (GPA/W/195 and GPA/W/216).

7. With regard to the proposed modifications to Annex 3 of Appendix I by Korea in GPA/W/207, dated 11 September 2002, the United States, the European Community and Canada made communications objecting to the entry into effect of the proposed modifications and requesting additional time to study and to seek clarification regarding the proposed changes (GPAW/210, 214 and 217, respectively).

8. With respect to the proposed modification by Japan to Annex 3 of Appendix I notified in GPA/W/91 relating to NTT, consultations were held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100, GPA/W/100/Add.1 and GPA/W/104/Add.2/Rev.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107, GPA/W/108). Japan's responses to the additional questions from Canada were circulated in GPAW/199. The United States withdrew its objection to the modifications proposed by Japan on 19 October 2001 (GPA/W/166) and Canada on 1 October 2002 (GPAW/211).

9. With respect to the proposed modification by the delegation of Japan to its Appendix I in GPA/W/144, 145 and 146 relating to three Japanese Railway companies, namely East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company, dated 29 August 2001, communications have been received from the delegations of the United States, Canada and the European Community (GPA/W/151, 155 and 156) seeking clarification and objecting to the proposed withdrawal of the three Japanese Railway companies from the coverage of the Agreement. Communications received from Japan providing clarifications regarding the notifications in GPA/W/144 to 146 have been circulated in GPA/W/152 and Corr.1 and GPA/W/179. Additional questions received from the European Community and the United States have been circulated in GPA/W/164 and 165, respectively. Japan's responses to the latter questions have been circulated in GPA/W/180 and GPA/W/181, respectively. Since the May 2002 meeting, the delegations of the United States and the European Community have submitted further questions, circulated respectively in GPA/W/204 and GPA/W/205. An additional question received from Canada relating to Central Japan Railway Company and West Japan Railway Company has been circulated in GPA/W/212. In a communication, dated 1 October 2002, Canada withdrew its objection to the modification to Appendix I of the Agreement related to the East Japan Railway Company (GPA/W/211).

Loose-leaf system for Appendices

10. Pursuant to the Decision of the Committee of 4 June 1996, the Appendices to the Agreement have been certified in the form of a loose-leaf system (WT/Let/330). In accordance with the procedures for future changes to the loose-leaf system agreed by the Committee on 24 February 1997, subsequent modifications notified by Parties are certified and issued as replacement pages to be inserted in the loose-leaf system once they become effective in accordance with the procedures of Article XXIV:6. In addition to being made available in hard copy form, the loose-leaf system is circulated to Parties and other WTO Members in electronic form through the WTO Documents On-line database. An up-to-date copy of the loose-leaf system is also available to the general public through the government procurement site on the WTO Home Page on the Internet (http://www.wto.org/english/tratop_e/gproc_e/loose_e.htm).

Thresholds

11. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Hong Kong, China (GPA/W/168); Singapore (GPA/W/168/Add.1); Canada (GPA/W/168/Add.2); Switzerland (GPA/W/168/Add.3); Japan (GPA/W/168/Add.4); European Community (GPA/W/168/Add.5); and the United States (GPA/W/168/Add.6) notified their threshold figures for 2002-2003.

Notification and review of national implementing legislation

12. Pursuant to the Decision on the Procedures for the Notification of National Implementing Legislation (GPA/1/Add.1), Canada; the European Community; Hong Kong, China; Iceland; Israel; Japan; Liechtenstein; Korea; Norway; Singapore; Switzerland; and the United States have notified national implementing legislation including their responses to the Checklist of Issues (GPA/13, GPA/20, GPA/27, GPA/69, GPA/34, GPA/37, GPA/46, GPA/12/Rev.1, GPA/10, GPA/39, GPA/15 and Add.1 and GPA/23, respectively). The Committee has completed the reviews of the national implementing legislation of Canada; the European Community; Hong Kong, China; Israel; Japan; Korea; Liechtenstein; Norway; Singapore; Switzerland; and the United States (GPA/51, GPA/32, GPA/54, GPA/59, GPA/61, GPA/47, GPA/60, GPA/53, GPA/52, GPA/33 and GPA/50, respectively). In accordance with the arrangements and the schedule for the review agreed by the Committee, these reviews were conducted on the basis of responses provided by the Parties being reviewed to written questions put by other Parties in advance of the review meeting at which their respective national legislation was taken up. At its first meeting in 2003, the Committee will take up the review of the implementing legislation of Iceland (GPA/69).

13. During the period under review, Japan has communicated information on modifications to Japan's regulations concerning government procurement (GPA/67).

Statistical reporting

14. Article XIX:5 requires Parties to collect and provide, on an annual basis, statistics on their procurements covered by the Agreement. During the period under review, the United States has reported statistics for 1998 (GPA/29/Add.4); Norway; Japan; and the United States for 1999 (respectively in GPA/40/Add.2, GPA/W/40/Add.3 and GPA/40/Add.4); Hong Kong, China; Norway; and Japan for 2000 (respectively in GPA/62; GPA/62/Add.1; and GPA/62/Add.2); and Hong Kong, China for 2001 (GPA/70).

Consultations and dispute settlement

15. There were no matters raised under Article XXII of the Agreement during the period under review.

Procedural matters

16. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add.2), Parties have agreed to the derestriction of the documents listed in GPA/64 of 14 January 2002 and considered the derestriction of documents in GPA/W/221 as of 20 December 2002.

17. Furthermore, the Committee agreed to the revision of its Decision on Circulation and Derestriction of Documents (GPA/1/Add.2) in order to reflect the WTO procedures adopted on 14 May 2002 (WT/L/452). The revised decision was adopted on 8 October 2002 (GPA/72).

III. ACCESSIONS

18. Latvia applied for accession on 16 June 1999. During the period under review, bilateral consultations have been held with interested Parties regarding outstanding issues. The Committee was informed by the United States, Switzerland and Canada that they had concluded negotiations with Latvia on the terms of its accession. Latvia informed the Committee that bilateral consultations with the European Community were continuing. Following the plurilateral consultations conducted with Latvia on 8 October 2002, the Committee was informed that Latvia would be making certain adjustments to its legislation and that its consultations with a Party had not yet been completed.

19. Estonia applied for accession on 6 September 2000. During the period under review, Estonia submitted a revised offer on 12 February 2002 (GPA/SPEC/9/Rev.1). Estonia's responses to the follow-up questions put by the United States have been circulated in GPA/SPEC/24/Rev.1 and GPA/190/Rev.1. The United States has put additional questions to Estonia in GPA/W/202 regarding its replies in GPA/W/190/Rev.1. Estonia's answers thereto have been circulated in GPA/W/215. Following the plurilateral consultations held with Estonia on 8 October 2002, the Committee was informed that Estonia would need time to assess the impact of its forthcoming legislative changes on its GPA accession. Moreover, there were a number of issues that were outstanding in their bilateral consultations with a Party.

20. Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5). During the period under review, Chinese Taipei submitted a second revised offer in GPA/SPEC/1/Rev.2, dated 1 February 2002. At the February 2002 meeting a number of delegations informed the Committee that they required more time to further review the offer tabled by Chinese Taipei and that some delegations had remaining substantive concerns. At the October meeting, the Committee was informed that consultations between Chinese Taipei and interested Parties had made significant progress and were continuing on outstanding issues. At the February meeting the observer from China made a statement on the issue of nomenclatures in the offer of Chinese Taipei. Consultations are being carried out between Chinese Taipei and interested Parties.

21. Panama applied for accession to the Agreement and tabled an initial offer on 24 June 1997 (GPA/W/53). No developments have been reported with regard to Panama's accession since the 2001 report.

22. The Kyrgyz Republic applied for accession to the Agreement and tabled an initial offer on 11 May 1999 (GPA/SPEC/4). During the period under review, the Kyrgyz Republic submitted its replies to the Checklist of Issues (GPA/W/197). Further questions put by the United States have been circulated in GPA/W/201.
23. Bulgaria applied for accession on 27 September 2000. During the period under review, informal plurilateral consultations were held with Bulgaria on 21 February 2002 on the basis of Bulgaria's replies to the questions received from Hong Kong, China; Switzerland; Canada; and the United States (circulated in GPA/SPEC/22/Rev.1, GPA/SPEC/21/Rev.1, GPA/SPEC/23/Rev.1 and GPA/W/171/Rev.1). Follow-up questions and comments from the United States and Bulgaria's answers thereto have been circulated in GPA/W/189/Rev.1. Follow-up questions received from Canada have been circulated in GPA/W/219.
24. Slovenia applied for accession on 24 September 2001. During the period under review, Slovenia's answers to the questions received from the European Community, the United States and Switzerland have been circulated in GPA/SPEC/28/Rev.1, GPA/W/172/Rev.1 and GPA/W/175/Rev.1, respectively. Follow-up questions put by the United States to Slovenia have been circulated in GPA/W/192. Informal plurilateral consultations have been held between Slovenia and interested Parties on 21 February 2002.
25. Albania applied for accession on 28 September 2001. During the period under review, the European Community; Hong Kong, China; the United States; Switzerland; and Canada have submitted questions to Albania in GPA/SPEC/26, GPA/W/169, GPA/W/170, GPA/W/174 and GPA/W/178, respectively. Albania's replies to the questions submitted by the United States have been circulated in GPA/W/170/Rev.1. Additional questions put by the United States to Albania have been circulated in GPA/W/209.
26. Moldova applied for accession on 8 January 2002 (GPA/63). Moldova's replies to the Checklist of Issues have been circulated in GPA/W/177. The questions forwarded by Hong Kong, China to Moldova have been circulated in GPA/W/182 and Moldova's replies thereto in GPA/W/193. Further questions received from the United States and Hong Kong, China have been circulated respectively in GPA/W/191 and GPA/W/206.
27. Jordan applied for accession on 12 July 2000. During the period under review, Jordan reported on the work carried out at the domestic level regarding Jordan's accession. At the May 2002 meeting, the Committee was informed that Jordan anticipated submitting its initial offer before the end of 2002.
28. Lithuania applied for accession on 8 March 2002 (GPA/66).
29. Georgia applied for accession on 8 October 2002 (GPA/71). Georgia's replies to the Checklist of Issues have been circulated in GPA/W/187. Questions received from the United States and Canada regarding these replies have been circulated in GPA/W/194 and GPA/W/220, respectively. Also, Georgia has transmitted its national legislation in a communication circulated in GPA/68.
30. The Protocols of Accession to the WTO of four other countries, namely China (WT/ACC/CHN/49), Croatia (WT/ACC/HRV/59), Mongolia (WT/ACC/MNG/9) and Oman (WT/ACC/OMN/26) include commitments regarding the Agreement on Government Procurement. Over the period under review, Oman's replies to the Checklist of Issues have been circulated in GPA/W/191. Questions received from the United States, the European Community and Canada regarding these replies have been circulated in GPA/SPEC/25, GPA/SPEC/27 and GPA/W/176,

respectively. As provided for in its Protocol of Accession to the WTO, China became an observer on 21 February 2002.

31. At an informal meeting held on 8 October, the Committee addressed the question of how procedures on accessions could be improved. In 2001, the Committee had agreed to proceed with the accessions process in accordance with the Indicative Time-Frame for Accession Negotiations and Arrangements for Reporting on the Progress of Work in GPA/W/109/Rev.2. It had also adopted a checklist of issues for the provision of information by applicant governments (GPA/35). At the meeting held on 8 October, the Committee had an exchange of views on how to improve the accession procedures including modalities that could accelerate the process in the case of countries with economies in transition and developing countries. The Committee agreed to revert to a number of suggestions made in this connection at its next meeting.

32. A Workshop on Accession to the Agreement on Government Procurement was held in Geneva on 27-28 May 2002, in which more than 45 capital-based officials from acceding and other observer countries participated.

IV. NEGOTIATIONS UNDER ARTICLE XXIV:7

33. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council (GPA/8), the Committee agreed to undertake an early review which was initiated in February 1997 in informal consultations, with an examination of modalities. This review has covered, in particular, the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; expansion of the coverage of the Agreement; and elimination of discriminatory measures and practices which distort open procurement. During the reported period, Parties focused primarily on simplification and improvement of the Agreement and also discussed the other two elements. An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties.

34. During the period covered by this report, Parties pursued their consultations in informal meetings held in February, May and October 2002 on the basis of proposals made by delegations, including new proposals by the European Community, the United States, Japan, Korea, Norway and Chinese Taipei. These have been incorporated in successive versions of an informal note reflecting the discussions on the draft texts of the modifications to the Articles of the Agreement proposed by various Parties "Suggested Drafting Changes to the Text of the Agreement", the latest revision of which was circulated on 23 September 2002. At each of the informal meetings held during the period under review, Parties also considered the other aspects of the Article XXIV:7 negotiations, namely the elimination of discriminatory measures and the expansion of coverage.

35. At the meeting held 21 February 2002, the Committee considered a suggestion by the Chairman regarding a timetable and work programme for negotiations under Article XXIV:7 of the Agreement reflecting the outcome of the informal consultations on this matter. The Committee agreed to the way of proceeding proposed by the Chairman which is set out in the attachment to this report.

36. At the informal meeting held on 30 May 2002, the informal group had a detailed discussion of the proposed drafting changes to the Articles of the Agreement relating to basket 1 items in the work programme, namely basic principles, scope and coverage and related definitions, exceptions, developing countries, and accessions on the basis of the issues raised in the Annotated Agenda. The

group also took up briefly basket 2 items which include tendering procedures and technical specifications and related definitions.

37. At the informal meeting held on 7 October 2002, the Group had a focused discussion on basket 2 issues, relating to tendering procedures (Articles VII–XV and Article XVIII, paragraphs 1, 3, and 4), technical specifications (Article VI) and related definitions, and on basket 3 issues (enforcement, institutions, and statistical reporting) on the basis of annotated agendas circulated respectively on each of these baskets. It also reverted to the discussion of developing countries, and other issues in basket 1. The next informal meeting on Article XXIV:7 negotiations will be held in the week of 9 December 2002. At that meeting, the Group will revert to basket 1 and 2 issues on the basis of new draft texts.

38. As agreed by the group in the context of its discussion on developing countries and accessions, the Chairman of the Committee wrote a letter on 21 August 2002 to the countries with observer status in the Committee inviting them to make written contributions on how the relevant provisions and decisions could be improved. A further letter was sent by the Chairman to all WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to the work carried out under Article XXIV:7 and inviting them to participate as observers in the meetings of the Committee.

39. With regard to the work on the other two elements of the Article XXIV:7 negotiations, namely the expansion of coverage and the elimination of discriminatory measures, the Work Programme agreed to at the February 2002 meeting provided for a preparatory phase in 2002, aimed at the identification and study of the areas to be negotiated, and agreeing on a detailed programme for the negotiations by the end of 2002. Delegations were invited to put forward possible approaches regarding these negotiations, including the request for tabling of offers, by 15 October 2002. Japan has put forward a paper on this matter and Canada expects to do so in the near future.

V. OTHER MATTERS

40. In response to a request from the Chairman of the Committee on Trade and Development requesting that the Committee on Trade and Development be kept informed of any discussions pertaining to special and differential treatment for developing countries, the Chairman, on behalf of the Committee, replied to the Chairman of CTD on 15 July 2002 reporting on the relevant discussions in the Committee.

ATTACHMENT

Timetable and Work Programme for the Negotiations under Article XXIV:7 of the Agreement

"Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties on the basis of mutual reciprocity, having regard to the provisions relating to developing countries and eliminating any remaining discriminatory measures and practices which distort open procurement.

Modalities for the negotiations

- The further negotiations under Article XXIV:7 shall be undertaken and completed as a whole on all elements (i.e. improvement of the text, expansion of coverage and elimination of discriminatory measures and practices), but there may need to be differences in modalities and timing among the elements.
- The negotiations shall be completed by 1 January 2005.
- The general view has been that the work on the revision of the coverage-related areas in the text of the Agreement and the negotiations on the other two elements are interdependent.
- Building on the work in the informal consultations that has been done since the review of the Agreement was launched in 1997, the aim is to have provisional agreement on the revised text of the Agreement by the 5th Ministerial Conference, recognizing that it may not be possible to conclude some of the elements of the text before the work on the other two aspects of the negotiations are concluded. In any event, the revised text will not take effect until all elements of Article XXIV:7 negotiations have been completed.
- The negotiations on the expansion of the coverage and the elimination of discriminatory measures and practices shall start with an exploratory phase until the end of 2002. These negotiations are to be concluded by 1 January 2005.
- The work programme could be modified in light of any new developments.
- A minimum of four informal meetings shall be foreseen for 2002 and for 2003 and, where possible, two to three days shall be allocated for each session.

Arrangements for the revision of the text

- The discussion at each of the meetings in 2002 shall focus on selected categories of issues, respectively those in basket 1 (basic principles, scope and coverage and related definitions, exceptions, developing countries and accessions), basket 2 (tendering procedures, technical specifications and related definitions), and basket 3 (enforcement, institutions, statistical reporting). All proposals relating to these issues should be tabled no later than 1 September 2002.
- Key substantive issues and drafting options shall be identified with respect to each Article or group of Articles by the end of the third meeting in 2002. Starting at the fourth meeting in 2002, the discussion shall focus on ways of bridging the remaining gaps on the basis of a text by the Chairman.

Arrangements for the other two elements

- Regarding the work on the other two elements, a preparatory phase will take place in 2002 aimed at the identification and study of the areas to be negotiated and agreeing on a detailed programme for the negotiations by the end of the year. Delegations who wish to put forward ideas on the possible approaches regarding the negotiations on the expansion of the coverage and the elimination of discriminatory measures including the procedures for tabling of offers and requests should do so by 15 October 2002.²
- The negotiations on these elements shall be initiated in 2003 with the aim of concluding them by 1 January 2005.

Note

- In 1996, the Committee agreed to undertake an early review, starting in 1997 with an examination of modalities, with a view to the implementation of Article XXIV:7(b) and (c) of the Agreement. The review will, in particular, cover the following elements: expansion of the coverage of the Agreement; elimination of discriminatory measures and practices which distort open procurement; and simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology. It was also agreed that the review shall seek the expansion of membership of the Agreement by making it more accessible to non-Parties (GPA/8)."

² Related to these aspects of the negotiations, the Group already has before it, for reference, the submissions by Canada (Job No. 6604-2001); Hong Kong, China (Job No. 5270-1998); and the United States (Job No. 3843-1998).

REPORT (2001) OF THE COMMITTEE ON GOVERNMENT PROCUREMENT

I. GENERAL

1. This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform the General Council of developments during the periods covered by such reviews.

2. The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is November 2000-October 2001, but the Report also reflects, where necessary, the work of the Committee up to November 2000 (GPA/8 and Add.1, GPA/19, GPA/25, GPA/30 and GPA/44). The Committee on Government Procurement held two meetings in 2001 on 3 May and 2 October 2001 (GPA/M/15 and 16¹).

3. The following WTO Members are Parties to the Agreement: Canada; the European Community and its fifteen member States; Hong Kong, China; Iceland; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States. Twenty-five WTO Members have observer status: Albania, Argentina, Australia, Bulgaria, Cameroon, Chile, Colombia, Croatia, the Czech Republic, Estonia, Georgia, Hungary, Jordan, the Kyrgyz Republic, Latvia, Lithuania, Malta, Moldova, Mongolia, Oman, Panama, Poland, the Slovak Republic, Slovenia and Turkey. One non-WTO Member, Chinese Taipei and three intergovernmental organizations, the IMF, the ITC and the OECD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4. Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article. Since the 2000 Report of the Committee, modifications relating to their respective Appendices were made by Japan (GPA/W/123, GPA/W/129, GPA/W/144, GPA/W/145 and GPA/W/146); Hong Kong, China (GPA/W/122/Rev.1); and Korea (GPA/W/128 and Corrs. 1 and 2 and GPA/W/140). The modifications proposed by Japan in GPA/W/123 and Hong Kong, China in GPA/W/122/Rev.1 entered into force on 29 December 2000 (WT/Let/367) and 6 January 2001 (WT/Let/370), respectively.

5. With respect to the notification by Japan in GPA/W/129, the United States and Canada made communications objecting to these modifications (GPA/W/132 and 134) and Hong Kong, China requesting further information (GPA/W/135 and 143). Japan's responses were circulated in document

¹ GPA/M/16 will be circulated shortly.

GPA/W/137. The United States and Canada subsequently indicated that they had withdrawn their objection to the proposed modifications (GPA/W/139 and 147) and the modifications proposed by Japan in GPA/W/129 entered into force on 5 September 2001 (WT/Let/400).

6. With respect to the notification by Korea in GPA/W/128 and Corrs. 1 and 2, Korea's responses to the clarification of the proposed modifications sought by the United States (GPA/W/133) were circulated in document GPA/W/142. The United States subsequently indicated that it had withdrawn its objection (GPA/W/150). The modifications proposed by Korea in GPA/W/128 and Corrs. 1 and 2 and additional modifications proposed by Korea to its Appendix I (GPA/W/140) entered into force on 14 September 2001 (WT/Let/401).

7. With regard to the proposed modifications notified by Japan on 6 September 1999 in document GPA/W/91, Canada, the European Community and the United States communicated their objection to the proposed modifications taking effect pending further consultations with Japan regarding the withdrawal of an entity from its Annex 3, Appendix I. Since the Committee's previous report, consultations have been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/104/Add.2/Rev.1, GPA/W/107, GPA/W/108 and GPA/W/160).

8. With regard to proposed modifications notified by Japan on 29 August 2001 in documents GPA/W/144, 145 and 146, the United States, Canada and the European Community communicated their objection to the proposed modifications taking effect upon expiration of the 30-day review period (GPA/W/151, 155 and 156).

Loose-leaf system for Appendices

9. Pursuant to the Decision of the Committee of 4 June 1996, the Appendices to the Agreement have been certified in the form of a loose-leaf system (WT/Let/330). In accordance with the procedures for future changes to the loose-leaf system agreed by the Committee on 24 February 1997, subsequent modifications notified by Parties are certified and issued as replacement pages to be inserted in the loose-leaf system once they become effective in accordance with the procedures of Article XXIV:6. In addition to being made available in hard copy form, the loose-leaf system is circulated to Parties and other WTO Members in electronic form through the WTO Documents On-line database. An up-to-date copy of the loose-leaf system is also available to the general public through the government procurement site on the WTO Home Page on the Internet (http://www.wto.org/english/tratop_e/gproc_e/loose_e.htm).

Thresholds

10. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), the United States (GPA/W/101/Add.5); Israel (GPA/W/101/Add.6); Liechtenstein (GPA/W/101/Add.7); and the Kingdom of Netherlands with respect to Aruba (GPA/W/101/Add.9) notified threshold figures in their national currency for 2000-2001 and Switzerland (GPA/W/101/Add.8) for 2001 and Korea for 2001-2002 (GPA/W/130 and Corr.1).

Notification and review of national implementing legislation

11. Pursuant to the Decision on the Procedures for the Notification of National Implementing Legislation (GPA/1/Add.1), Canada; the European Community; Hong Kong, China; Israel; Japan; Liechtenstein; Korea; Norway; Singapore; Switzerland; and the United States have notified national implementing legislation including their responses to the Checklist of Issues (GPA/13, GPA/20, GPA/27, GPA/34, GPA/37, GPA/46, GPA/12/Rev.1, GPA/10, GPA/39, GPA/15 and Add.1 and GPA/23, respectively). The Committee has completed the reviews of the national implementing legislation of Canada; the European Community; Hong Kong, China; Korea; Norway; Singapore; Switzerland; and the United States (GPA/51, GPA/32, GPA/54, GPA/47, GPA/53, GPA/52, GPA/33 and GPA/50, respectively). In accordance with the arrangements and the schedule for the review agreed by the Committee, these reviews were conducted on the basis of responses provided by the Parties being reviewed to written questions put by other Parties in advance of the review meeting at which their respective national legislation was taken up. At its meeting on 3 May 2001, the Committee continued the reviews by taking up the implementing legislation of Israel (GPA/34) on the basis of questions from Korea, the United States and Canada and Israel's answers thereto; the implementing legislation of Japan (GPA/37) on the basis of questions from Switzerland; the United States; Hong Kong, China; and Canada and Japan's replies thereto; and the implementing legislation of Liechtenstein (GPA/46) on the basis of questions from the United States and Liechtenstein's answers thereto. At its meeting on 2 October 2001, the Committee completed the review of the national legislation of Israel, Japan and Liechtenstein. At its next meeting, the Committee will take up the review of the legislation of the Kingdom of the Netherlands with respect to Aruba and Iceland.

Statistical reporting

12. Article XIX:5 requires Parties to collect and provide, on an annual basis, statistics on their procurements covered by the Agreement. During the period under review, Switzerland has reported statistics for 1998-1999 (GPA/29/Add.3 and GPA/40/Add.1). Japan will submit its statistical report for 1999 and the United States for 1996-2000 in the near future.

Consultations and dispute settlement

13. There were no matters raised under Article XXII of the Agreement during the period under review.

Procedural matters

14. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add.2), Parties are considering a proposal for the derestriction of the documents listed in document GPA/W/159 as of 15 December 2001.

III. ACCESSIONS

15. Following the Committee Decision of 29 September 2000 providing for the accession of Iceland (GPA/43), Iceland deposited its instrument of accession on 29 March 2001. The Agreement entered into force for Iceland on 28 April 2001 (GPA/48 and WT/Let/388).

16. Latvia applied for accession on 16 June 1999. During the period under review, informal plurilateral consultations were conducted with Latvia on 31 January 2001 on the basis of Latvia's written answers to the questions received from the United States, Switzerland, and Canada. In parallel, intensive bilateral consultations have been held with interested Parties regarding the outstanding issues. In light of those consultations, Latvia will submit a revised offer in the near future. Moreover, Latvia updated, in document GPA/W/149, the information that it had previously

provided on its national legislation and procurement practices in GPA/28 and Add.1 by responding to the checklist of issues in document GPA/35.

17. Estonia applied for accession on 6 September 2000. Estonia's replies to the Checklist of Issues in document GPA/35, first circulated on 5 December 2000 (GPA/W/127), were revised on 17 August 2001 (GPA/W/127/Rev.1 and GPA/W/127/Rev.1/Add.1). Estonia also provided an English translation of the Public Procurement Act of 1 April 2001 (GPA/55). Informal plurilateral consultations were conducted with Estonia on 31 January 2001 on the basis of Estonia's replies to the questions received from Switzerland, Japan, the United States and Canada. A follow-up question received from Japan in April 2001 and Estonia's answers thereto have also been circulated. In parallel, bilateral consultations have been held with interested Parties. Estonia will submit a revised offer in the near future.

18. Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5) and submitted a draft offer which was subsequently revised on 19 March 1997. Parties have held bilateral consultations with Chinese Taipei since 1996. The legislation of Chinese Taipei of 1998 was circulated in document GPA/36. Chinese Taipei will submit a revised offer in the near future.

19. Panama applied for accession to the Agreement and tabled an initial offer on 24 June 1997 (GPA/W/53). Panama has had bilateral consultations with interested Parties since 1999 on the basis of a revised offer submitted on 10 December 1998.

20. The Kyrgyz Republic applied for accession to the Agreement and tabled an initial offer on 11 May 1999. Written questions and comments were received from the United States.

21. As for the other acceding countries, namely Jordan, Bulgaria, Oman, Slovenia and Albania, Jordan applied for accession on 12 July 2000, Bulgaria on 27 September 2000, Slovenia on 24 September 2001 and Albania on 28 September 2001. These countries have not yet tabled an initial offer. Jordan's replies to the checklist of issues in document GPA/35 were circulated on 6 December 2000 (GPA/W/124). Informal plurilateral consultations were conducted between Jordan and interested Parties on 31 January 2001 on the basis of the replies by Jordan to the written questions received from Switzerland, the United States and Canada. Jordan also replied to a number of follow-up questions forwarded subsequently by the European Community. Bulgaria's replies to the checklist of issues were circulated on 2 May 2001 (GPA/W/136). In addition, Bulgaria submitted an English translation of the Law on Government Procurement enacted on 25 June 1999 (GPA/49) as well as of two recently issued procurement regulations. Questions received from Switzerland; Hong Kong, China; and Canada to Bulgaria in September 2001 were circulated. Oman, Slovenia and Albania responded to the checklist of issues (GPA/W/141, GPA/W/158 and GPA/W/161, respectively). Moreover, the Protocols of Accession to the WTO of five countries, namely Croatia (WT/ACC/HRV/59), Georgia (WT/ACC/GEO/31), Lithuania (WT/ACC/LTU/52), Moldova (WT/ACC/MOL/37) and Mongolia (WT/ACC/MNG/9) include commitments regarding the Agreement on Government Procurement.

22. By way of streamlining the accession process, the Committee agreed to proceed with the accessions process in accordance with the Indicative Time-Frame for Accession Negotiations and Arrangements for Reporting on the Progress of Work in document GPA/W/109/Rev.2. The Committee had previously adopted a checklist of issues for provision of information by applicant governments (GPA/35).

IV. NEGOTIATIONS UNDER ARTICLE XXIV:7

23. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council (GPA/8), the Committee agreed to undertake an early review which was initiated in February 1997 in informal consultations, with an examination of modalities. This review has covered, in particular, the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; expansion of the coverage of the Agreement; and elimination of discriminatory measures and practices which distort open procurement. An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties. In this connection, a communication was sent in April 1997 by the Chairman of the Committee to the WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to this work and inviting them to participate as observers in the meetings of the Committee (WT/L/206). During the period covered by this report, Parties pursued their consultations in three informal meetings held in January, May and October 2001 on the basis of proposals made by delegations, including new proposals by Switzerland, the European Community, Japan and the United States. These have been incorporated in successive versions of an informal note reflecting the discussions on the draft texts of the modifications to the Articles of the Agreement proposed by various Parties "Suggested Drafting Changes to the Text of the Agreement", the latest revision of which was circulated on 2 August 2001. At each of the informal meetings held during the period under review, Parties also considered the other aspects of the Article XXIV:7 negotiations, namely the elimination of discriminatory measures and the expansion of coverage. Canada submitted an informal note on Discriminatory Provisions in the Agreement at the 1 October 2001 meeting. The group also had before it a list of submissions that had been previously made by various delegations as well as the notes by the Secretariat relating to these elements. The Secretariat also made available a note on the Modalities Used in the Past for Negotiating Schedules to the Agreement.

24. At the informal meeting held on 1 October 2001, regarding the Article-by-Article review of the Agreement, delegations had available to them an explanatory note by the United States relating to its proposals for the revision of the Agreement and another submission by the United States on ""Build-Operate-Transfer" Contracts and "Concessions for Public Works" under the Agreement on Government Procurement". Detailed comments were made seeking clarification of or suggesting further drafting changes to the revised texts proposed by the United States in April 2001. The delegation of the United States indicated that it would further revise the texts of some of the proposed amendments to take account of the comments that had been made so far. It also informed the group that it was reviewing its ideas on exceptions to the Agreement. A number of other delegations expected to put forward drafting suggestions on the review of the text of the Agreement: Hong Kong, China on several articles; the European Community on tendering procedures; Canada on time-periods regarding contract award notices; and Japan on Article XXIV:6(b). With regard to the possible use of the term "measures" in defining the scope of an agreement, the Secretariat was asked to prepare a note on the use of this term in the GATT/WTO jurisprudence. Regarding the status of work on the revision of the text of the agreement, the view was expressed that the proposals on the table constituted a good basis for the negotiations on the revision of the text of the Agreement, it being understood that delegations were free to make proposals at any time. Finally, delegations had an exchange of views regarding the development of a plan of action for carrying forward work on all elements of the review. Some delegations informed the Group that intensive consultations were being pursued internally on GPA-related issues and that they needed more time before they could agree to a time-frame for further work on the negotiations under Article XXIV:7. It was also suggested that the discussion on the revision of the text at each of the future meetings would focus on a selected category of issues. Some delegations suggested that the possibility of early results in some areas

should be considered. Some delegations stressed that the elements of the review regarding the elimination of discriminatory provisions and expansion of coverage would be taken up in parallel with the work on the revision of the text.

**REPORT (2000) OF THE COMMITTEE ON
GOVERNMENT PROCUREMENT**

I. GENERAL

1. This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform annually the General Council of developments during the periods covered by such reviews.

2. The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is November 1999-October 2000, but the Report also reflects, where necessary, the work of the Committee up to November 1999 (GPA/8 and Add.1, GPA/19, GPA/25 and GPA/30). The Committee on Government Procurement held two meetings in 2000: on 8 March and 29 September 2000 (GPA/M/13 and 14).¹

3. The following WTO Members are Parties to the Agreement: Canada; the European Community and its fifteen member States; Hong Kong, China; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States. Eighteen WTO Members have observer status: Argentina, Australia, Bulgaria, Chile, Colombia, the Czech Republic, Estonia, Georgia, Iceland, Jordan, the Kyrgyz Republic, Latvia, Mongolia, Panama, Poland, the Slovak Republic, Slovenia and Turkey. Four non-WTO Members, Croatia, Lithuania, Chinese Taipei and Moldova and three intergovernmental organizations, the IMF, the ITC and the OECD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4. Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article. Since the 1999 Report of the Committee, modifications relating to their respective Appendices were made by Hong Kong, China (GPA/W/102, 105 and 116) with entry into force respectively on 4 February 2000 (WT/Let/328), 17 February 2000 (WT/Let/332) and 26 August 2000 (WT/Let/355) and by Japan (GPA/W/115) with entry into force on 22 August 2000 (WT/Let/354). Furthermore, Switzerland proposed modifications to its Annex 1 of Appendix I in document GPA/W/106 and Corr.1. In response to a request for clarification received from the delegation of the United States (GPA/W/111), an explanatory note was subsequently submitted by the delegation of Switzerland identifying the differences between the proposed modifications and the existing Annex 1 (GPA/W/114). The

¹ GPA/M/14 will be circulated shortly.

modifications by Switzerland entered into force with effect on 29 September 2000 (WT/Let/356). With regard to the proposed modifications notified by Japan on 6 September 1999 in document GPA/W/91, Canada, the European Community and the United States communicated their objection to the proposed modifications taking effect pending further consultations with Japan regarding the withdrawal of an entity from its Annex 3, Appendix I. Since the Committee's previous report, consultations have been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107 and GPA/W/108).

Loose-leaf system for Appendices

5. The Appendices to the Agreement in the form of a loose-leaf system, pursuant to the Decision of the Committee of 4 June 1996, were certified on 1 March 2000 (WT/Let/330). In accordance with the procedures for future changes to the loose-leaf system agreed by the Committee on 24 February 1997, subsequent modifications notified by Parties are certified and issued as replacement pages to be inserted in the loose-leaf system once they become effective in accordance with the procedures of Article XXIV:6. In addition to being made available in hard copy form, the loose-leaf system is circulated to Parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up-to-date copy of the loose-leaf system is also available to the general public through the government procurement site on the WTO Home Page on the Internet (<http://www.wto.org/wto/govt/loose.htm>).

Thresholds

6. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Canada (GPA/W/101/Add.1) and Hong Kong, China (GPA/W/101) notified threshold figures in their national currency for the period 2000-2001, Japan (GPA/W/101/Add.2) for 2000-2002 and Switzerland (GPA/W/101/Add.3) and Norway (GPA/W/101/Add.4) for 2000.

Notification and review of national implementing legislation

7. Pursuant to the Decision on the Procedures for the Notification of National Implementing Legislation (GPA/1/Add.1), Canada; the European Community; Hong Kong, China; Israel; Japan; Korea; Norway; Singapore; Switzerland; and the United States have notified national implementing legislation including their responses to the Checklist of Issues (GPA/13, GPA/20, GPA/27, GPA/34, GPA/37, GPA/12/Rev.1, GPA/10, GPA/39, GPA/15 and Add.1 and GPA/23, respectively). At its meeting on 8 March 2000, the Committee continued the review of national implementing legislation, initiated in October 1998 (GPA/25), by taking up the legislation of Hong Kong, China; and Norway in addition to taking up outstanding points relating to the legislation of Canada, Korea and the United States. At its meeting on 29 September 2000, it initiated the review of Singapore as well as completing the reviews of the national implementing legislation of Canada; Hong Kong, China; Korea; and Norway. In accordance with the arrangements and the schedule for the review agreed by the Committee, these reviews were conducted on the basis of responses provided by the Parties being reviewed to written questions put by other Parties in advance of the review meeting at which their respective national legislation was taken up. At the next meeting, the Committee will revert to the outstanding points relating to the legislation of the United States and Singapore and take up the review of the legislation of Israel, Japan, Liechtenstein and the Kingdom of the Netherlands with respect to Aruba.

8. The Committee discussed the follow-up to Canada's offer, contained in its Appendix I, Annexes 2 and 3, to cover sub-central government entities and enterprises in all 10 Provinces, on the basis of commitments received from the Provinces, with a final listing to be provided within 18 months after the conclusion of the Agreement. Canada's stated position since the entry into force of the Agreement, linking the tabling of its schedule at the sub-central level to achieving increased market access in sectors of priority interest to Canadian suppliers and improving security of market access through circumscribing the use of small business and other set-aside exceptions under the Agreement, remained unchanged. Some other Parties expressed their disappointment over the situation, they stressed the need for Canada to honour its commitments and considered that the problems raised by Canada with respect to expanded coverage of the Agreement could only be addressed once Canada had come forward with offers pursuant to its commitments in its Annexes 2 and 3. Canada has asserted that it did not undertake obligations regarding Annexes 2 and 3, and has reiterated that its coverage was to be based on commitments received from the Provinces. Canada has also asserted that, as no commitments have been received, it is under no obligation to put forward an offer under these Annexes.

Statistical reporting

9. Article XIX:5 requires Parties to collect and provide on an annual basis statistics their procurements covered by the Agreement. During the period under review, Switzerland provided statistics for 1997 (GPA/22/Add.3), Japan for 1997 and 1998 (GPA/22/Add.2 and GPA/29/Add.1), Norway for 1998 (GPA/29/Add.2), and Hong Kong, China for 1999 (GPA/40).

Consultations and dispute settlement

(i) United States – Measures Affecting Government Procurement

10. In July 1997, the European Communities and Japan requested, respectively, consultations with the United States pursuant to Article XXII of the Agreement on Government Procurement and Article 4 of the Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU), regarding the Act Regulating State Contracts with Companies Doing Business with or in Burma (Myanmar) enacted by the Commonwealth of Massachusetts on 25 June 1996 (WT/DS88/1-GPA/D2/1 and WT/DS88/2; WT/DS95/1-GPA/D3/1 and WT/DS95/2). On 21 October 1998, pursuant to the requests of the European Communities (WT/DS88/3 of 8 September 1998) and Japan (WT/DS95/3 of 8 September 1998), the DSB established a single panel in accordance with Article 9 of the DSU and with standard terms of reference pursuant to Article XXII:4 of the Agreement on Government Procurement (WT/DSB/M/49). The Panel was constituted on 6 January 1999. In a communication to the Chairman of the DSB, dated 10 February 1999, the Chairman of the Panel stated that, in the context of a United States court ruling barring the implementation of the measure at issue, the European Communities and Japan had requested the Panel to suspend its work in accordance with Article 12.12 of the DSU and that the Panel had agreed to this request (WT/DS88/5 and WT/DS95/5). Since the Panel had not been requested to resume its work within 12 months, pursuant to Article 12.12 of the DSU, the authority for the establishment of the Panel lapsed as of 11 February 2000 (WT/DS88/6 and WT/DS95/6).

(ii) Korea – Measures Affecting Government Procurement

11. In a communication dated 16 February 1999, the United States requested consultations with Korea pursuant to Article 4 of the DSU and Article XXII of the GPA (WT/DS163/1 and GPA/D4/1) with respect to certain procurement practices of the Korean Airport Construction Authority and other entities concerned with the procurement of airport construction in Korea. Pursuant to the request by the United States, dated 11 May 1999 (WT/DS163/4), the DSB established a panel on 16 June 1999 in accordance with the provisions of Article 6 of the DSU and Article XXII of the Agreement, with the

standard terms of reference provided for in Article XXII:4 of the GPA (WT/DSB/M/64). The European Community participated as a third party in the Panel proceedings in relation to the complaint raised by the United States and Japan reserved its rights in this respect. The Panel was constituted on 30 August 1999 (WT/DS163/5). Its report, circulated on 1 May 2000 in document WT/DS163/R, was adopted at the meeting of the Dispute Settlement Body held on 19 June 2000 (WT/DSB/M/84).

Procedural matters

12. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add.2), Parties are considering a proposal for the derestriction of the documents listed in document GPA/W/119 as of 15 November 2000.

III. ACCESSIONS

13. Iceland applied for accession to the Agreement on 22 June 1998. Following the bilateral consultations held between Iceland and Parties over the period 1998 to 2000, the Committee adopted, at its meeting on 29 September 2000, a Decision providing for the accession of Iceland to the Agreement on the basis of the terms attached to that Decision (GPA/43). Under that Decision, Iceland has one year to deposit its instrument of accession.

14. During the period under review, Jordan, Estonia and Bulgaria applied for accession on 12 July 2000, 4 September 2000 and 27 September 2000, respectively (GPA/38, GPA/41 and GPA/42). Estonia also submitted a draft offer on 4 September 2000 (GPA/SPEC/9).

15. Latvia applied for accession to the Agreement on 16 June 1999 and initiated bilateral consultations with interested Parties in February 2000 on the basis of its draft offer (GPA/SPEC/5). Information on Latvia's national legislation on government procurement has been made available to Parties in document GPA/28. Latvia has also provided written responses to the questions and comments that have been previously received from the United States (GPA/SPEC/8/Rev.1). At each of its meetings during the review period, the Committee took note of the status of bilateral consultations with respect to the accession of the Kyrgyz Republic, Panama and Chinese Taipei.² Informal plurilateral consultations will be held between Latvia and interested Parties in January 2001 and, if appropriate, with Jordan, Panama and Estonia.

16. During the period under review, the Committee has also carried out work on the streamlining of the accession process. This led to the adoption of a Checklist of Issues for the provision of information by applicant governments relating to accession to the Agreement (GPA/35). Work is under way on the establishment of an indicative time-frame for accession negotiations and of arrangements for reporting on the progress of work (GPA/W/109/Rev.1).

² Panama applied for accession to the Agreement and tabled an initial offer on 24 June 1997 (GPA/W/53 and GPA/SPEC/3). Panama pursued bilateral consultations with interested Parties in 1999 and 2000 on the basis of a revised offer submitted on 10 December 1998 (GPA/SPEC/3/Rev.1).

Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5) and submitted a draft offer which was subsequently revised on 19 March 1997 (GPA/SPEC/1/Rev.1). The domestic legislation of Chinese Taipei of 1998 was circulated in document GPA/36.

The Kyrgyz Republic applied for accession to the Agreement and tabled an initial offer on 11 May 1999 (GPA/SPEC/4). The written questions and comments received from the United States were circulated in GPA/SPEC/7.

IV. NEGOTIATIONS UNDER ARTICLE XXIV:7

17. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council (GPA/8), the Committee agreed to undertake an early review which was initiated in February 1997 in informal consultations, with an examination of modalities. This review has covered, in particular, the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; expansion of the coverage of the Agreement; and elimination of discriminatory measures and practices which distort open procurement. An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties. In this connection, a communication was sent in April 1997 by the Chairman of the Committee to the WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to this work and inviting them to participate as observers in the meetings of the Committee (WT/L/206). During the period covered by this report, Parties pursued their consultations in three informal meetings held in March, June and September 2000 on the basis of proposals by delegations. These have been reflected in successive versions of an informal note reflecting the discussions on the draft texts of the modifications to the Articles of the Agreement proposed by various Parties "Suggested Drafting Changes to the Text of the Agreement" (the latest revision of which was circulated as Job No. 5749).

18. During the review period, Parties have also considered the time-frame for carrying forward the negotiations provided for under Article XXIV:7 and the overall work programme that should be envisaged within that time-frame. On the issue of time-frame, there is a general view that delegations should be guided by a target date of mid-2001 or the Fourth Ministerial Conference if that is held around that time and that intermediate time-frames should be set for the different stages of work. Based on a categorization of issues agreed to at the June 2000 meeting, Parties had extensive discussions under the Article-by-Article review relating to Articles VII-XV and XVIII, paragraphs 1, 3 and 4 (June meeting), the basic principles of the Agreement (Articles XIX:1, III, IV, XVI, XVII:1), technical specifications (Article VI), and bid review (Articles XVIII:2, XX) (September meeting). In addition, at the September meeting, Parties had a further exchange of views on the basis of the proposals put forward earlier on Articles VII-XV and Article XVIII, paragraphs 1, 3 and 4, including those presented by the United States at the June meeting (GPA/W/112 and GPA/W/113), taking into account the written questions of other Parties and the United States' answers relating to these proposals that had been circulated as Job No 5595 and Job No. 4954/Add.1. At both the June and September meetings, Parties also considered the other aspects of the Article XXIV:7 negotiations - the elimination of discriminatory measures and the expansion of coverage. It was noted that, at the next informal meeting to be held in the last week of January 2001, when issues of coverage and scope would be discussed, Parties would have a special focus on these other aspects. As agreed at the June meeting, the Parties will consider at that time, in addition to the issues of scope and coverage (Articles I, II and Annexes), exceptions (Articles XXIII, V), institutional provisions (Articles XIX:2, XIX:5, XXI, XII, XXIV, XVII:2) and statistical reporting (Article XIX:5).

REPORT (1999) OF THE COMMITTEE ON GOVERNMENT PROCUREMENT

I. GENERAL

1. This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform annually the General Council of developments during the periods covered by such reviews.

2. The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is November 1998-October 1999, but the Report also reflects, where necessary, the work of the Committee up to November 1998 (GPA/8 and Add.1, GPA/19 and GPA/25). The Committee on Government Procurement held two meetings in 1999: on 23 February and 5 October 1999 (GPA/M/11 and 12).¹

3. The following WTO Members are Parties to the Agreement: Canada; the European Community and its fifteen member States; Hong Kong, China; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States. Fourteen WTO Members have observer status: Argentina, Australia, Bulgaria, Chile, Colombia, Estonia², Iceland, the Kyrgyz Republic, Latvia, Mongolia, Panama, Poland, Slovenia and Turkey. Four non-WTO Members, Chinese Taipei, Croatia, Georgia and Lithuania, and three intergovernmental organizations, the IMF, the ITC and the OECD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4. Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article. Since the 1998 Report of the Committee, modifications relating to their respective Appendices, in accordance with the procedures of Article XXIV:6, were made by the European Community (GPA/W/51/Add.2) with entry into force on 8 October 1998 (WT/Let/294), by Japan (GPA/W/78, 79 and 88) with entry into force respectively on 13 November 1998 (WT/Let/274), on 27 November 1998 (WT/Let/275), and on 8 August 1999 (WT/Let/308) and by Singapore (GPA/W/82) with entry into force on 19 March 1999 (WT/Let/297). Proposals for modifications relating to Appendix I have also been notified by Japan in documents GPA/W/91, 93, 94 and 98. With regard to the proposed modifications notified by Japan in document GPA/W/91, Canada, the European Community and the United States communicated their objection to the proposed modifications taking effect pending further consultations with Japan regarding the withdrawal of an entity from its Annex 3, Appendix I. Hong Kong, China and Switzerland also asked for further clarifications from Japan with regard to the proposed modification.

¹ GPA/M/12 will be circulated shortly.

² Estonia will become a WTO Member as of 13 November 1999.

Loose-leaf system for Appendices

5. At its meeting of 4 June 1996, the Committee agreed to establish a loose-leaf system with legal effect to maintain up to date the Appendices to the Agreement. With a view to providing a starting point for the loose-leaf system, the Secretariat circulated in February 1997 a draft of the loose-leaf system of Appendices reflecting the Appendices attached to the Agreement as signed at Marrakesh and the subsequent rectifications, modifications and new concessions made under the procedures adopted by the Interim Committee and under the Agreement itself (GPA/W/35). This draft was subsequently updated incorporating all the modifications effective on 1 July 1999 (GPA/W/35/Rev.1) and circulated to Parties for comments concerning the accuracy and completeness of the consolidation of the Appendices. The loose-leaf system for Appendices to the Agreement will be certified by the Director-General in accordance with the normal procedures in respect of rectifications under WTO instruments. Subsequent modifications to the loose-leaf system will be made following the procedures agreed by the Committee (GPA/W/35/Rev.1, paragraph 4 and GPA/M/5, paragraph 20). In addition to being made available in hard copy form, the loose-leaf system was circulated to Parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up-to-date copy of the loose-leaf system is also available to the general public through the government procurement site on the WTO Home Page on the Internet (<http://www.wto.org/wto/govt/loose.htm>). Any future new or replacement pages will be circulated in electronic as well as hard copy form.

Thresholds

6. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), during the period under review, Korea notified threshold figures in its national currency for the period 1999-2000 (GPA/W/81).

Notification and review of national implementing legislation

7. Pursuant to the Decision on the Procedures for the Notification of National Implementing Legislation and the Checklist of Issues (GPA/1/Add.1), seven delegations – Canada; the European Community; Hong Kong, China; Korea; Norway; Switzerland; and the United States - have notified their national implementing legislation including their responses to the Checklist of Issues (GPA/10, GPA/20, GPA/27, GPA/12/Rev.1, GPA/13, GPA/15 and Add.1 and GPA/23, respectively). At its meetings on 23 February and 5 October 1999, the Committee continued the review of the national implementing legislation, initiated in October 1998 (GPA/25), by taking up the legislation of Switzerland, the United States and Canada, in addition to taking up the outstanding points relating to the review of the national implementing legislation of the European Community and Korea. In accordance with the arrangements and the schedule for the review agreed by the Committee, the review was conducted on the basis of responses provided by the Parties being reviewed to written questions put by other Parties in advance of the review of the respective national legislation.

8. The Committee discussed the follow-up to Canada's offer, contained in its Appendix I, Annexes 2 and 3, to cover sub-central government entities and enterprises in all ten Provinces, on the basis of commitments received from the Provinces, with a final listing to be provided within 18 months after the conclusion of the Agreement. Canada's stated position since the entry into force of the Agreement, linking the tabling of its schedule at the sub-central level to achieving increased market access in sectors of priority interest to Canadian suppliers and improving security of market access through circumscribing the use of small business and other set-aside exceptions under the Agreement, remained unchanged. Some other Parties expressed their disappointment over the situation, stressed the need for Canada to honour its commitments and considered that the problems raised by Canada with respect to expanded coverage of the Agreement could only be addressed once Canada had come forward with offers pursuant to its commitments in its Annexes 2 and 3. Canada has asserted that it did not undertake obligations regarding Annexes 2 and 3, and has reiterated that its

coverage was to be based on commitments received from the Provinces. Canada has also asserted that, as no commitments have been received, it is under no obligation to put forward an offer under these Annexes.

Statistical reporting

9. Article XIX:5 requires Parties to collect and provide on an annual basis statistics on their procurements covered by the Agreement. During the period under review, Switzerland provided statistics for 1996 (GPA/21/Add.2), Norway for 1997 (GPA/22/Add.1) and Hong Kong, China for 1998 (GPA/29).

Consultations and dispute settlement

(i) United States – Measures affecting government procurement

10. In July 1997, the European Communities and Japan requested respectively consultations with the United States, pursuant to Article XXII of the Agreement on Government Procurement (GPA) and Article 4 of the Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU), regarding the Act Regulating State Contracts with Companies Doing Business with or in Burma (Myanmar) enacted by the Commonwealth of Massachusetts on 25 June 1996 (WT/DS88/1-GPA/D2/1 and WT/DS88/2; WT/DS95/1-GPA/D3/1 and WT/DS95/2). On 21 October 1998, pursuant to the requests of the European Communities (WT/DS88/3 of 8 September 1998) and Japan (WT/DS95/3 of 8 September 1998), the DSB established a single panel in accordance with Article 9 of the DSU and with standard terms of reference pursuant to Article XXII:4 of the Agreement on Government Procurement (WT/DSB/M/49). The Panel was constituted on 6 January 1999. In a communication to the Chairman of the DSB, dated 10 February 1999, the Chairman of the Panel stated that, in the context of a United States court ruling barring the implementation of the measure at issue, the European Communities and Japan had requested the Panel to suspend its work in accordance with Article 12.12 of the DSU and that the Panel had agreed to this request (WT/DS88/5 and WT/DS95/5).

(ii) Korea – Measures affecting government procurement

11. In a communication dated 16 February 1999, the United States requested consultations with Korea pursuant to Article 4 of the DSU and Article XXII of the GPA (WT/DS163/1 and GPA/D4/1) with respect to certain procurement practices of the Korean Airport Construction Authority and other entities concerned with the procurement of airport construction in Korea. The European Community and Japan requested to join these consultations (WT/DS163/2 of 4 March 1999 and WT/DS163/3 of 9 March 1999). These requests were not accepted by Korea. Pursuant to the request by the United States, dated 11 May 1999 (WT/DS163/4), the DSB established a panel on 16 June 1999 in accordance with the provisions of Article 6 of the DSU and Article XXII of the GPA, with the standard terms of reference provided for in Article XXII:4 of the GPA (WT/DSB/M/64). The European Community participates as a third party in the Panel proceedings in relation to the complaint raised by the United States and Japan reserved its rights in this respect. The Panel was constituted on 30 August 1999 (WT/DS163/5).

Other matters raised in the Committee

12. During the period under review, the Committee considered the adoption of a declaration by Parties extending the benefits of the Agreement to all the least developed WTO Members.

Procedural matters

13. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add.2), Parties are considering a proposal for the derestriction of the documents listed in document GPA/W/92 as of 20 November 1999.

Government procurement site at the WTO home page

14. A site on government procurement was established at the WTO home page on the Internet in order to provide information to the public at large on WTO activities relating to the area of government procurement. The section of the site on the Agreement on Government Procurement includes an overview, the text of the Agreement, an up-to-date copy of the loose-leaf system for Appendices, a list of Parties and observers, a table of thresholds of individual Parties and notifications of threshold figures as expressed in national currencies, information on the work of the Committee (decisions of the Committee on procedural matters, notifications of national implementing legislation, annual report to the General Council), statistics provided under Article XIX:5 and information on dispute settlement. Other sections on this site relate to the activities of the Working Group on Transparency in Government Procurement and of the Working Party on GATS Rules. Moreover, hyperlinks have been established with international and national websites containing information on government procurement. The site address is <http://www.wto.org/wto/govt/govt.htm>.

III. ACCESSIONS

15. Iceland applied for accession to the Agreement on 22 June 1998. During the period under review, Iceland carried out bilateral consultations with interested Parties on the basis of its draft offer (GPA/W/73). A communication received from Iceland containing responses to questions put to Iceland in connection with its accession and information on national legislation on government procurement will be made available to Parties.

16. In accordance with a commitment undertaken by Panama in the Report of the Working Party on the Accession of Panama to the WTO (WT/ACC/PAN/19, paragraphs 68 and 116 and Protocol, Part I, paragraph 2), Panama applied for accession to the Agreement and tabled an initial offer on 24 June 1997 (GPA/W/53 and GPA/SPEC/3). During the period under review, Panama pursued the bilateral consultations with interested Parties on the basis of a revised offer submitted on 10 December 1998 (GPA/SPEC/3/Rev.1).

17. Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5) and submitted a draft offer which was subsequently revised on 19 March 1997 (GPA/SPEC/1/Rev.1).

18. In accordance with a commitment undertaken by the Kyrgyz Republic in the Report of the Working Party on the Accession of the Kyrgyz Republic to the WTO (WT/ACC/KGZ/26, paragraph 120), the Kyrgyz Republic applied for accession to the Agreement and tabled an initial offer on 11 May 1999 (GPA/SPEC/4).

19. In accordance with a commitment undertaken by Latvia in the Report of the Working Party on the Accession of Latvia to the WTO (WT/ACC/LVA/32, paragraph 99), Latvia applied for accession to the Agreement and tabled an initial offer on 16 June 1999 (GPA/SPEC/5). Information on Latvia's national legislation on government procurement was made available to Parties in document GPA/28.

20. During the period under review, the Committee discussed streamlining the overall process of accessions. At its request, the Secretariat drew up, for the consideration of the Committee, a draft Checklist of Issues that the acceding countries could use in providing information on the main

features of their national legislation and procurement regimes. The Committee has requested the Secretariat to prepare a draft indicative time-frame for the accession proceedings.

IV. NEGOTIATIONS UNDER ARTICLE XXIV:7

21. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council, the Committee agreed to undertake an early review which was initiated in February 1997 in informal consultations, with an examination of modalities. This review has covered, in particular, the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; statistical reporting; expansion of the coverage of the Agreement; and elimination of discriminatory measures and practices which distort open procurement. An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties. In this connection, a communication was sent by the Chairman of the Committee to the WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to this work and inviting them to participate as observers in the meetings of the Committee (WT/L/206). During the period covered by this report, Parties pursued their consultations in six informal meetings held between December 1998 and October 1999 on the basis of an informal Checklist of Issues (the latest revision of which was circulated as Job No. 5189) and an informal note reflecting the draft texts of the modifications to the Articles of the Agreement proposed by various Parties side-by-side with the text of the Agreement (circulated as Job No. 5713).

22. Parties have also considered the timetable for the completion of the negotiations and the overall work programme that should be envisaged within that time-frame. There is agreement that good progress has been made on improving the text of the Agreement, that the momentum of the work needs to be maintained and that all three elements need to be covered. Parties will revert to this matter at their next meeting, to be held in March 2000. At that time, Parties will also focus on: framework and similar types of contracts, statistical reporting and the Article-by-Article review of the Agreement. In addition, Parties will continue monitoring progress in the elimination of discriminatory measures.

Committee on Government Procurement

**REPORT (1998) OF THE COMMITTEE ON
GOVERNMENT PROCUREMENT**

I. GENERAL

1. This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform annually the General Council of developments during the periods covered by such reviews.

2. The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is November 1997 - October 1998, but the Report also reflects, where necessary, the work of the Committee up to November 1997 (GPA/8 and Add.1 and GPA/19). The Committee on Government Procurement held three meetings in 1998: on 18 February, 25 June and 7 October (GPA/M/8-10).

3. The following WTO Members are Parties to the Agreement: Canada; the European Community and its fifteen member States; Hong Kong, China; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States. Ten WTO Members have observer status: Argentina; Australia; Bulgaria; Chile; Colombia; Iceland; Panama; Poland; Slovenia; and Turkey. Four non-WTO Members, Chinese Taipei, Estonia, Latvia and Lithuania, and two intergovernmental organizations, the IMF and the OECD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4. Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article.

5. Since the 1997 Report of the Committee, Canada (GPA/W/61); Hong Kong, China (GPA/W/57 and 69); Israel (GPA/W/68); Japan (GPA/W/60, 63 and 74); Korea (GPA/W/59); and Singapore (GPA/W/70 and 72) made rectifications of a formal nature relating to their respective Appendices. In accordance with the procedures of Article XXIV:6, these rectifications were certified respectively on 5 December 1997 (WT/Let/209); 23 November 1997 and 24 April 1998 (WT/Let/206 and 218); 8 March 1998 (WT/Let/214); 23 November 1997, 31 December 1997 and 14 August 1998 (WT/Let/208, 211 and 238); 23 November 1997 (WT/Let/207); and 9 May and 15 July 1998 (WT/Let/243 and 232). Pursuant to the accession of Singapore to the Agreement on 20 October 1997, Switzerland and Norway made modifications to their respective General Notes to Appendix I reflecting the derogations from the provisions of Article III of the Agreement as regards the award of contracts by entities listed in Annex 3 with respect to suppliers and service providers from Singapore,

respectively in the electricity and water sectors (GPA/W/58) and in the electricity sector (GPA/W/62). These modifications entered into force for Switzerland on 19 November 1997 (WT/Let/205) and for Norway on 20 December 1997 (WT/Let/210). Proposals for modifications relating to Appendices 1-IV have also been notified by the European Community (GPA/W/51). Following the clarifications sought by the United States in September 1997, consultations have been held between the two Parties regarding these proposed modifications (GPA/W/51/Add.1 and Add.2). The procedures are under way for putting these modifications by the European Community into effect in accordance with Article XXIV:6.

6. During the period under review, the Committee also discussed the follow-up to Canada's offer, contained in its Appendix I, Annexes 2 and 3, to cover subcentral government entities and enterprises in all ten Provinces, on the basis of commitments received from the Provinces, with a final listing to be provided within 18 months after the conclusion of the Agreement. Canada's stated position since the entry into force of the Agreement, linking the tabling of its schedule at the subcentral level to achieving increased market access in sectors of priority interest to Canadian suppliers and improving security of market access through circumscribing the use of small business and other set-aside exceptions under the Agreement, remained unchanged. Some other Parties expressed their disappointment over the situation, stressed the need for Canada to honour its commitments and considered that the problems raised by Canada with respect to expanded coverage of the Agreement could only be addressed once Canada had come forward with offers pursuant to its commitments in its Annexes 2 and 3. Canada has asserted that it did not undertake obligations regarding Annexes 2 and 3, and has reiterated that its coverage was to be based on commitments received from the Provinces. Canada has also asserted that, as no commitments have been received, it is under no obligation to put forward an offer under these Annexes.

Loose-leaf System for Appendices

7. As agreed at its meetings of 4 June 1996 and 24 February 1997, the Committee will establish a loose-leaf system with legal effect to maintain up to date the Appendices to the Agreement. Subsequent modifications to the loose-leaf system will be made in accordance with the procedures agreed to by the Committee. In addition to being made available in hard copy form, the loose-leaf system and future new or replacement pages will be circulated to Parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up-to-date copy of the loose-leaf system will also be available to the general public through the government procurement site on the WTO Home Page on the Internet. At its meeting of 29 September 1997, the Committee agreed to postpone the first issue of the loose-leaf system until after the entry into force of the extensive modifications that had been notified by the European Community in document GPA/W/51 (c.f. paragraph 5 above and GPA/M/7, paragraphs 9-10). Meanwhile, a draft of the loose-leaf system of Appendices has been available since 15 May 1998 on the government procurement site at the WTO Home Page in order to provide information on the Appendices including the modifications that have been certified since the signature of the Agreement on 15 April 1994 (<http://www.wto.org/wto/govt/loose.htm>). The procedures agreed by the Committee concerning certification and circulation of the loose-leaf system of schedules will be carried out after the certification of the proposed modifications to the Appendices of the European Community (GPA/W/35, paragraph 4 and GPA/M/5, paragraph 20).

Accessions

8. Iceland applied for accession to the Agreement on 22 June 1998. During the period under review, Iceland initiated bilateral consultations with interested Parties on the basis of its draft offer (GPA/W/73).

9. In accordance with a commitment undertaken by Panama in the Report of the Working Party on the Accession of Panama to the WTO (WT/ACC/PAN/19, paragraphs 68 and 116 and Protocol, Part I, paragraph 2), Panama applied for accession to the Agreement and tabled an initial offer on 24 June 1997 (GPA/W/53 and GPA/SPEC/3). During the period under review, Panama pursued the bilateral consultations with interested Parties.

10. Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5). During the period under review, Chinese Taipei continued and, in some cases, completed bilateral consultations with interested Parties on the basis of its offer of March 1997 (GPA/SPEC/1/Rev.1).

Notification and Review of National Implementing Legislation

11. Pursuant to the Decision on the Procedures for the Notification of National Implementing Legislation and the Checklist of Issues (GPA/1/Add.1), as of [5 October] 1998, six delegations - Canada, the European Community, Korea, Norway, Switzerland and the United States - have notified their national implementing legislation including their responses to the Checklist of Issues (GPA/10, GPA/20, GPA/12/Rev.1, GPA/13, GPA/15 and GPA/23). At its meeting on 7 October 1998, the Committee initiated the review of national implementing legislation by taking up the legislation of the European Community and Korea. In accordance with the arrangements and the schedule for the review agreed to by the Committee at its February and June 1998 meetings, the review is being conducted on the basis of responses provided by the European Community and Korea to written questions put by other Parties in advance of the review.

Thresholds

12. In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Canada; the European Community; Hong Kong, China; Israel; Japan; Norway; Singapore; and the United States have notified threshold figures in their respective national currencies for the periods 1998-1999 (GPA/W/66 and Addenda 1-7).

Request for Information under Article XIX

13. At its February, June and October 1998 meetings, the Committee took note of statements concerning the coverage of the Korea Airport Construction Authority under the Agreement (GPA/M/8, paragraphs 27 and 28 and GPA/M/9, paragraph 16). A request for information by the United States, pursuant to paragraphs 1 and 2 of Article XIX of the Agreement and dated 11 September 1998, was circulated in document GPA/W/76.

Statistical Reporting

14. Article XIX:5 requires Parties to collect and provide on an annual basis statistics on their procurements covered by the Agreement. During the period under review, Norway and Canada have provided statistics for 1996 (GPA/21 and Add.1) and, Hong Kong, China for July-December 1997 (GPA/22).

Derestriction of Documents

15. In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add 2), the Committee agreed to derestrict the documents listed in document GPA/24 as of 10 March 1998.

Demonstrations on the Use of Information Technology in Government Procurement

16. Demonstrations of the application of information technology to the area of government procurement and panel discussions on related policy issues were held on 24 June 1998 with the participation of experts from Canada, the European Community, Finland, Japan, Mexico, Norway, Poland, Singapore and the United States.

Government Procurement Site on the WTO Home Page

17. A site on Government Procurement was established at the WTO Home Page on the Internet in order to provide information to the public at large on WTO activities relating to the area of government procurement. The section of the site on the Agreement on Government Procurement includes an overview, the text of the Agreement, an up-to-date copy of the loose-leaf system of Appendices, a list of Parties and observers, a table of thresholds of individual Parties and notifications of threshold figures as expressed in national currencies, information on the work of the Committee (decisions of the Committee on procedural matters, notifications of national implementing legislation, annual report to the General Council) and information on dispute settlement. Where appropriate, linkage is provided to WTO documents on-line. Other sections on this site relate to the activities of the Working Group on Transparency in Government Procurement and of the Working Party on GATS Rules. Links are also provided to other sites on government procurement, for instance to those providing information on procurement opportunities and contract awards. The site address is <http://www.wto.org/wto/govt/govt.htm>.

Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement

18. At its meetings in February and June 1998, the Committee discussed the legal and procedural aspects of the relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement on the basis of a note prepared by the Secretariat in response to the Committee's request (GPA/M/8, paragraphs 5-10, GPA/M/9, paragraphs 3 and 4). The Committee took note of the following legal opinion expressed in the note by the Secretariat circulated in document GPA/W/65 while also noting that any delegation could revert to the matter at a future meeting: "It seems clear from the provisions of Article XXIV:3(c) of the 1994 Agreement on Government Procurement, which relates to the same subject-matter as the Tokyo Round Agreement (plus some additional subject-matter), that all the Parties to the Tokyo Round Agreement intend that the matters covered should be governed by the 1994 Agreement. Therefore, in the light of the provisions of Article 59.1(a) of the Vienna Convention on the Law of Treaties, 1969, it would appear that the Tokyo Round Agreement has been considered as terminated with effect from the time that all its Parties became Parties to 1994 Agreement, that is to say 20 October 1997. In the light of the above, it would not appear necessary for any specific further action to be taken, whether in the form of individual countries withdrawing from the Tokyo Round Agreement or in the form of a decision of the Committee of the Tokyo Round Agreement formally terminating its existence".

Consultations and Dispute Settlement

19. At its meetings in 1997 and February and June 1998, the Committee took note of statements concerning the legislation enacted by the State of Massachusetts regulating State contracts with companies doing business with or in Myanmar (GPA/M/5, paragraphs 47-52 and GPA/M/6, paragraphs 19-21, GPA/M/7, paragraph 26 and GPA/M/8, paragraph 29 and GPA/M/9, paragraph 17). A request for information by Japan, pursuant to paragraphs 1 and 3 of Article XIX of the Agreement and dated 10 March 1997 (GPA/W/39) was responded to by the United States on 8 August 1997 (GPA/W/52). A request for consultations by the European Community was communicated on 20 June 1997 pursuant to Article XXII of the GPA and Article 4 of the DSU

(WT/DS88/1-GPA/W/D2/1). Japan requested to join these consultations under Article 4:11 of the DSU on 27 June 1997 (WT/DS88/2). In a subsequent communication dated 18 July 1997, Japan also requested consultations regarding this matter pursuant to Article XXII of the GPA and Article 4 of the DSU (WT/DS95/1-GPA/W/D3/1). The European Communities requested to join those consultations under Article 4.11 of the DSU on 23 July 1997, (WT/DS95/2). In a communication dated 8 September 1998, the European Community requested the establishment of a panel pursuant to Article XXII of the GPA, with the terms of reference provided for in Article XXII:4 of the GPA (WT/DS88/3). In a communication dated 8 September 1998, Japan requested the establishment of a panel pursuant to Articles 4.7 and 6 of the DSU and to Article XXII of the GPA, with the terms of reference provided for in Article XXII:4 of the GPA (WT/DS95/3).

20. At its February and May 1997 meetings, the Committee took note of statements concerning a procurement tender published by the Ministry of Transport of Japan to purchase MTSAT Satellite-based Augmentation System (MSAS) (GPA/M/5, paragraphs 53-55 and GPA/M/6, paragraph 22). A request for consultations by the European Community was communicated on 26 March 1997 pursuant to Article 4.4 of the DSU (WT/DS73/1-GPA/D1/1). The United States request of 9 April 1997 to join the consultations (WT/DS73/2) pursuant to Article 4.4 of the DSU was accepted by Japan on 14 April 1997 (WT/DS73/3). In a communication dated 31 July 1997, the European Community notified that it had found a mutually agreed solution with Japan within the meaning of Article 3.6 of the DSU (WT/DS73/4/Rev.1 and GPA/D1/2/Rev.1). In response to the request for information by the United States, the European Community, in a statement made jointly with Japan at the meeting of 18 February 1998, provided information regarding the mutually agreed solution reached between the two Parties (GPA/M/8, paragraph 31).

III. NEGOTIATIONS UNDER ARTICLE XXIV:7

21. Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council, the Committee agreed to undertake an early review which was initiated in February 1997 in informal consultations, with an examination of modalities. This review has covered, in particular, the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; expansion of the coverage of the Agreement; and elimination of discriminatory measures and practices which distort open procurement (GPA/8 and Add.1 and GPA/19). An objective of the negotiations under Article XXIV:7 is the expansion of the membership of the Agreement by making it more accessible to non-Parties. In this connection, a communication was sent by the Chairman of the Committee to the WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to this work and inviting them to participate as observers in the meetings of the Committee (WT/L/206). During the period covered by this report, Parties pursued their informal consultations in December 1997, February, June and October 1998 on the basis of an informal checklist of issues, the latest version of which is dated 8 September 1998 (circulated with footer "gpa60") and the proposals by various Parties. At the meeting on 25 June 1998, the Committee agreed to a time-frame for the negotiations under Article XXIV:7 and the overall work programme that should be envisaged within that time-frame on the basis of a proposal by the Chair, the text of which is attached to this report. In the consultations to be held in December 1998, the Committee will focus discussions on: issues of information technology, statistical reporting, monitoring and enforcement and procurement methods. It will also continue its Article-by-Article examination of the Agreement and will discuss the types of discriminatory provisions in the Appendices and coverage of services.

ATTACHMENT

Time-frame and the Work Programme for the Negotiations under Article XXIV:7

The Committee agreed to proceed in accordance with the following proposals by the Chair regarding a time-frame for the negotiations under Article XXIV:7 and the overall work programme that should be envisaged within that time-frame, the text of which incorporates suggestions by delegations agreed to by the Committee:

"I sense a widespread view that we should aim to complete the negotiations, at least in respect of the simplification and improvement of the Agreement, by the third WTO Ministerial to be held at the end of next year with a view to, in particular, increasing the attractiveness of the Agreement to new members.

"If this is to be done, we would need to reserve the whole of the fall of next year to an intensive negotiating process. This, in turn, would require that by the summer of next year there would be in existence a document, reflecting the outstanding proposals, that could constitute the basis for these negotiations. The preparation of such a document would require that all the proposals and suggestions for improvement of the text would have been thoroughly discussed and digested by that time. In order for this to be done, we might wish to set a target date of the end of April next year for the tabling of all such proposals and suggestions – without, of course, prejudice to the right of participants to put forward at a later date modified or additional proposals where necessary.

"To sum up therefore I would suggest the following key elements of a timetable and work programme:

- The tabling of suggestions and proposals no later than the end of April 1999.
- The preparation of a document reflecting all outstanding proposals and suggestions, as a basis for the final negotiating phase, no later than the summer of 1999. I would, of course, hope that in the course of the review and discussion of the proposals and suggestions that would already have been undertaken by that time a considerable measure of agreement would already have been reached on many points and that the number of outstanding points left for the final negotiating phase would be kept to a manageable minimum.
- A target of the third WTO Ministerial for the completion of the negotiations, at least on the simplification and improvement of the Agreement.

"We would in parallel continue work on the other elements of the negotiations, namely on the elimination of discriminatory measures and practices which distort open procurement and the expansion of the coverage of the Agreement. We will revert at our next meeting to the timetable and work programme for these parts of the negotiations. To the extent that the objective of the elimination of discriminatory measures could be achieved through modifications to the Agreement itself, this work would also have the target date of the third Ministerial Meeting.

"If this way of proceeding were to be acceptable to you, we would need to give some thought to the sort of meeting schedule that should be envisaged for the remainder of this year and for next year. My own suggestion would be that you might consider two meetings in the fall of this year (our October meeting already scheduled and maybe one in mid-December), and three meetings in the first part of next year (for example February, May and July). In the

autumn period of 1999, we would need to envisage a semi-continuous process of negotiation, i.e. the Group would need to be on call for the whole period.

"WTO Members, not parties to the GPA, and other observer governments to the GPA would be invited to participate fully in the work, it being understood that the final decision on the outcome would remain with Parties to the GPA."

(97-4747)

Committee on Government Procurement

REPORT (1997) OF THE COMMITTEE ON GOVERNMENT
PROCUREMENT

I. GENERAL

1) This Report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform annually the General Council of developments during the periods covered by such reviews.

2) The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this Report is January-September 1997, but the Report also reflects, where necessary, the work of the Committee in 1996 (GPA/8 and Add.1). The Committee on Government Procurement held three meetings in 1997: on 24 February, 21 May and 29 September (GPA/M/5-7).

3) The following WTO Members are Parties to the Agreement: Canada; the European Communities and fifteen member States; Hong Kong, China; Israel; Japan; Korea; Liechtenstein; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland and the United States. Nine WTO Members have observer status: Argentina; Australia; Bulgaria; Chile; Colombia; Iceland; Panama; Poland; and Turkey. Two non-WTO members, Chinese Taipei and Latvia, and two intergovernmental organizations, IMF and the OECD, also have observer status.

II. IMPLEMENTATION OF THE AGREEMENT

Modifications of Appendices to the Agreement

4) Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article.

5) Since the 1996 Report of the Committee, the European Community and the United States have notified modifications to Appendix I consequent on the enlargement of the European Communities on 1 January 1995 to include Austria, Finland and Sweden. These modifications entered into force on 16 January 1997 (WT/Let/135). Following an agreement reached between Switzerland and the United States, the General Notes to Appendices I of Switzerland and of the United States have been modified (GPA/W/41 and 42) to reflect the reciprocal extension of the scope of the Agreement. These modifications entered into force on 22 June 1997 (WT/Let/146). Israel and the European Community modified their respective Appendices I reflecting an agreement reached between the two Parties (GPA/W/54 and GPA/W/55). The modifications entered into force on 28 September 1997 (WT/Let/184) and on 29 September 1997 (WT/Let/185). Pursuant to the accession of Hong Kong to the Agreement on 19 June 1997, Norway, the European Community and Switzerland made consequential modifications to their respective General Notes to Appendix I reflecting the extension of the scope of the Agreement to Hong Kong (GPA/W/43, GPA/W/44 and GPA/W/47 and Add.1). These modifications entered into force on 29 June 1997 (WT/Let/152), on 9 July 1997 (WT/Let/162) and on 23 October 1997 (WT/Let/194). During the review period, Japan (GPA/W/27 and GPA/W/31), Switzerland (GPA/W/45), Norway (GPA/W/46) and Hong Kong, China (GPA/W/56) made rectifications of a formal nature relating to their Appendices. In accordance with the procedures of Article XXIV:6, these rectifications were certified respectively on 5 November 1996 in WT/Let/119, on 4 January 1997 in WT/Let/134, on 16 August 1997 in WT/Let/164, on 12 July 1997 in WT/Let/163, and on 5 October 1997 in WT/Let/183). Proposals for modifications relating to Appendices I-IV have also been notified by the European Community (GPA/W/51). The procedures are under way for putting these modifications into effect in accordance with Article XXIV:6.

6) The Committee also discussed the follow-up to Canada's offer, contained in its Appendix I, Annexes 2 and 3, to cover sub-central government entities and enterprises in all ten Provinces, on the basis of commitments received from the Provinces, with a final listing to be provided within 18 months after the conclusion of the Agreement. Canada's stated position since the entry into force of the Agreement, linking the tabling of its schedule at the sub-central level to achieving increased market access in sectors of priority interest to Canadian suppliers and improving security of market access through circumscribing the use of small business and other set-aside exceptions under the Agreement, remained unchanged. Some other Parties expressed their disappointment over the situation, stressed the need for Canada to honour its commitments and considered that the problems raised by Canada with respect to expanded coverage of the Agreement could only be addressed once Canada had come forward with offers pursuant to its commitments in its Annexes 2 and 3. Canada has asserted that it did not undertake obligations regarding Annexes 2 and 3, and has reiterated that its coverage was to be based on commitments received from the Provinces. Canada has also asserted that, as no commitments have been received, it is under no obligation to put forward an offer under these Annexes.

Loose-leaf System for Appendices

7) *As agreed at its meeting of 4 June 1996, the Committee will establish a loose-leaf system with legal effect to maintain up to date the Appendices to the Agreement. At its meeting on 24 February 1997, the Committee agreed to the procedures for subsequent modifications to the loose-leaf system (GPA/W/35). In addition to being made available in hard-copy form, the loose-leaf system and future new or replacement pages will be circulated to Parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up-to-date copy of the loose-leaf system will also be available to the general public through the government procurement site on the WTO Home Page on the Internet.*

Government Procurement Site on the WTO Home Page

8) *A site on Government Procurement was established at the WTO Home Page on the Internet in order to provide information to the public at large on developments relating to the Agreement on Government Procurement. The section of the site on the Agreement on Government Procurement includes an overview, the text of the Agreement, a list of Members and observers, a table of thresholds of individual Parties, information on the work of the Committee (Decisions of the Committee, Annual Report to the General Council) and information on dispute settlement. Where appropriate, linkage is provided to WTO documents on-line. An up-to-date copy of the loose-leaf system of Appendices will also be accessible on this site. Other sections on this site relate to the activities of the Working Group on Transparency in Government Procurement and of the Working Party on GATS Rules. Links are also provided to other sites on government procurement. The site address is <http://www.wto.org/wto/govt/govt.htm>.*

Accessions

9) *Pursuant to the Committee's Decision on the Accession of Hong Kong of 5 December 1996 (GPA/9), Hong Kong deposited its instrument of accession on 20 May 1997. The Agreement entered into force for Hong Kong on 19 June 1997 (GPA/14 and WT/Let/141). As foreseen in paragraph 3 of the Decision, Hong Kong will delay the application of paragraphs 2-8 of Article XX of the Agreement on challenge procedures for a period of no more than one year after the entry into force of the Agreement for Hong Kong. Before its accession to the Agreement, Hong Kong forwarded a communication to the Committee concerning a commitment with respect to procurement by two electrical utility companies which were not subject to government control in Hong Kong (GPA/11). As indicated in paragraph 5 above, the European Community, Norway and Switzerland notified modifications to the General Notes to their respective Appendices I to reflect the extension of the Agreement as regards the award of contracts in the electricity sector with respect to the suppliers and service providers in Hong Kong (GPA/W/44, GPA/W/43 and GPA/W/47 and Add.1).*

10) *Pursuant to the Committee's Decision on the Accession of Liechtenstein of 24 February 1996 (GPA/3), of which the one-year validity period was extended*

for a period of six months, i.e. until 27 August 1997 at the request of Liechtenstein (GPA/W/34 and GPA/M/5, paragraph 35), Liechtenstein deposited its instrument of accession on 19 August 1997. The Agreement entered into force for Liechtenstein on 18 September 1997 (GPA/16 and WT/Let/166).

11) Pursuant to the Committee's Decision on the Accession of Singapore of 20 September 1996, inviting Singapore to accede on the terms attached to that Decision (GPA/6), Singapore deposited its instrument of accession on 20 September 1997. The Agreement entered into force for Singapore on 20 October 1997 (GPA/18 and WT/Let/179).

12) Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5). At its May 1997 meeting, the Committee was informed of the improvements that Chinese Taipei had made in the second revision of its offer of March 1997 following bilateral consultations held with interested Parties (GPA/SPEC/1/Rev.1).

13) In accordance with a commitment undertaken by Panama in the Report of the Working Party on the Accession of Panama to the WTO (WT/ACC/PAN/19, paragraphs 68 and 116 and Protocol, Part I, paragraph 2), Panama applied for accession to the Agreement and tabled an initial offer of its entities on 24 June 1997 (GPA/W/53 and GPA/SPEC/3).

Decisions on Procedural Matters

14) In accordance with the Decision on the Procedures for the Notification of National Implementing Legislation and the Checklist of Issues (GPA/1/Add.1), Parties agreed to notify their legislation no later than 31 December 1996. As of 1 November 1997, four delegations - Canada, Korea, Norway and Switzerland - have notified their national implementing legislation including their responses to the Checklist of issues (GPA/10, GPA/12/Rev.1, GPA/13 and GPA/15).

15) In accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), all Parties have notified thresholds in their respective national currencies for the periods 1996-97 (GPA/W/12 and Addenda 1-8).

16) In accordance with its Decision on Procedures for the Circulation and Derestriction of Documents (GPA/1/Add 2), the Committee agreed to derestrict the documents listed in document GPA/16 on 20 May 1997.

Statistical Reporting

17) Article XIX:5 requires Parties to collect and provide on an annual basis statistics on their procurements covered by the Agreement. No Parties have provided statistics on their procurements covered by the Agreement in 1996.

Other Matters Raised by Parties

18) *At its February and May 1997 meetings, the Committee took note of statements concerning the legislation enacted by the State of Massachusetts regulating State contracts with companies doing business with or in Myanmar (GPA/M/5, paragraphs 47-52 and GPA/M/6, paragraphs 19-21). A request for information by Japan, pursuant to paragraphs 1 and 3 of Article XIX of the Agreement and dated 10 March 1997 (GPA/W/39) was responded to by the United States on 8 August 1997 (GPA/W/52). A request for consultations by the European Communities was communicated on 20 June 1997 pursuant to Article 4.4 of the DSU (WT/DS88/1-GPA/D2/1). In a communication dated 27 June 1997, Japan requested to join those consultations under Article 4.11 of the DSU (WT/DS88/2). In a subsequent communication dated 18 July 1997, Japan also requested consultations regarding this matter (WT/DS95/1-GPA/D3/1). In a communication dated 23 July 1997, the European Communities requested to join those consultations under Article 4.11 of the DSU (WT/DS95/2).*

19) *At its February and May 1997 meetings, the Committee took note of statements concerning a procurement tender published by the Ministry of Transport of Japan to purchase MTSAT Satellite-based Augmentation System (MSAS) (GPA/M/5, paragraphs 53-55 and GPA/M/6, paragraph 22). A request for consultations by the European Communities was communicated on 26 March 1997 pursuant to Article 4.4 of the DSU (WT/DS73/1-GPA/D1/1). The United States request of 9 April 1997 to join the consultations (WT/DS73/2) pursuant to Article 4.4 of the DSU was accepted by Japan on 14 April 1997 (WT/DS73/3). In a communication dated 31 July 1997, the European Community notified that it had found a mutually agreed solution with Japan within the meaning of Article 3.6 of the DSU (WT/DS73/4/Rev.1 and GPA/D1/2/Rev.1). Pursuant to Article 3.6 of the DSU, the United States has requested information regarding the mutually agreed solution reached between the two Parties.*

20) *At its May 1997 meeting, the Committee took note of a statement concerning a recent supercomputer procurement by the United States (GPA/M/6, paragraphs 23-26).*

III. MODALITIES FOR THE REVIEW OF THE AGREEMENT

21) *Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. As stated in its 1996 Report to the General Council, the Committee agreed to undertake an early review, starting in 1997 with an examination of modalities. The review will, in particular, cover the following elements: simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology; expansion of the coverage of the Agreement; and elimination of*

discriminatory measures and practices which distort open procurement (GPA/8 and Add.1). An objective of the review is the expansion of the membership of the Agreement by making it more accessible to non-Parties. In this connection, a communication was sent by the Chairman of the Committee to the WTO Members, drawing their attention, as well as the attention of governments which are in the process of acceding to the WTO, to the review and inviting them to participate as observers in the meetings of the Committee (WT/L/206). The work was initiated in February, May and September 1997 in informal consultations and on the basis of proposals by various Parties. In the next such consultations, to be held in November 1997, the Committee will have focused discussions on: issues of non-discrimination in connection with information technology; improvements to the structure and presentation of the Agreement; and discriminatory provisions in Appendices on the basis of written proposals from Parties. The status of the discussion of the elements of the review is contained in an informal Checklist of issues which is regularly updated.

Committee on Government Procurement

REPORT (1996) OF THE COMMITTEE ON GOVERNMENT
PROCUREMENT (1994 AGREEMENT)¹

Addendum

On 5 December 1996 the Committee on Government Procurement held a meeting which approved Hong Kong's application for accession to the Agreement (GPA/W/28 and Corr.1). Accordingly, after paragraph 10 of the Committee's 1996 Report, an additional paragraph should be added to take account of the Committee's Decision at that meeting. This paragraph should read:

•Hong Kong applied for accession to the Agreement by a communication dated 31 October 1996 (GPA/W/28 and Corr.1). Following bilateral consultations held between Hong Kong and Parties, the Committee adopted, at its meeting of 5 December 1996, a Decision inviting Hong Kong to accede to the Agreement on the terms attached to that Decision (GPA/9).•

¹ This report has been communicated to the General Council under the symbol WT/L/190/Add.1.

Committee on Government Procurement

REPORT (1996) OF THE COMMITTEE ON GOVERNMENT
PROCUREMENT (1994 AGREEMENT)¹

I. General

1) This report is submitted pursuant to Article XXIV:7(a) of the Agreement on Government Procurement, which requires the Committee to review annually the implementation and operation of the Agreement and to inform annually the General Council of developments in the implementation and operation of the Agreement during the periods covered by such reviews.

2) The Agreement on Government Procurement entered into force on 1 January 1996. The period covered in this first Report is January-September 1996, but the report also reflects, where necessary, the preparatory work of the Interim Committee on Government Procurement prior to the Agreement's entry into force. The Committee on Government Procurement held three meetings in 1996: on 27 February, 4 June and 20 September (GPA/M/1-3). The Interim Committee on Government Procurement held six meetings in 1994 and 1995 (GPA/IC/M/1-6). Its report to the Committee was circulated in document GPA/IC/9.

3) The following WTO Members are Parties to the Agreement: Canada, the European Communities and fifteen Member States, Israel, Japan, Korea, Netherlands with respect to Aruba², Norway, Switzerland and the United States. Seven WTO Members have observer status: Australia, Colombia, Iceland, Liechtenstein, Singapore and Turkey. Two non-WTO members have observer status: Chinese Taipei and Latvia.

II. Implementation of the Agreement

Modifications of Appendices to the Agreement

¹ This report has been communicated to the General Council under the symbol WT/L/190.

² As of 25 October 1996

4) *Article XXIV:6 of the Agreement requires Parties to notify rectifications of a purely formal nature or other modifications relating to Appendices I through IV, which set out the mutually agreed coverage provided under the Agreement. Consequential rectifications or modifications become effective once they are agreed to pursuant to the procedures under this Article.*

5) *Prior to the entry into force of the Agreement, the United States and Norway made rectifications of a purely formal nature pursuant to the relevant Decision of the Interim Committee (GPA/IC/M/1, Annex 2). The United States rectification to its Appendix II regarding State Publications with effect as of 23 December 1994 was accompanied by a list of such publications (GPA/IC/W/10) and Norway's rectification with effect as of 15 December 1994 related to the change of names of entities in Appendix I, Annex 1 (GPA/IC/W/8).*

6) *At the time of the signature of the Agreement in Marrakesh in April 1994, the European Communities and the United States negotiated a bilateral agreement extending their mutual benefits under the Agreement, the relevant details of which, including the intended modifications, were circulated to the Interim Committee on 15 June 1994. At its meeting of 7 December 1995 the Interim Committee accepted that the European Communities and the United States had met the procedural requirements, in terms of the relevant Decision of the Informal Group on Negotiations (GPA/IC/3), necessary for the incorporation of modifications to the respective Annexes to Appendix I, which were subsequently submitted on 22 December 1995 (GPA/IC/10).*

7) *After the entry into force of the Agreement, Japan and the United States notified modifications to Appendix I which followed their bilateral agreement reached on the enlargement of the coverage of the Agreement (GPA/W/1 and GPA/W/2). Consequential modifications to Appendix I entered into force on 25 February 1996. Following the bilateral agreement reached between Norway and the United States, further modifications to Appendix I entered into force on 17 August 1996 (GPA/W/22 and GPA/W/23). Discussions currently being held between some other Parties may result in further expansion of the coverage of the Agreement.*

8) *The Committee also discussed the follow-up to Canada's offer, contained in its Appendix I, Annexes 2 and 3, to cover sub-central government entities and enterprises in all ten Provinces, on the basis of commitments received from the Provinces, with a final listing to be provided within 18 months after the conclusion of the Agreement. At the last two meetings of the Interim Committee, Canada linked the tabling of its schedule at the sub-central level to achieving increased market access in sectors of priority interest to Canadian suppliers and improving security of access through circumscribing the use of small business and other set-aside exceptions under the Agreement (GPA/IC/M/5-6). Canada maintained this position at the first three meetings of the Committee held in 1996 (GPA/M/1-3). Some other Parties expressed their disappointment over the situation, stressed the need for Canada to honour its commitments and considered that the problems raised by Canada with respect to expanded coverage of the Agreement could only be addressed once Canada had come forward with offers pursuant to its*

commitments in its Annexes 2 and 3. Canada has asserted that it did not undertake obligations regarding Annexes 2 and 3, and has reiterated that its coverage was to be based on commitments received from the Provinces. Canada has also asserted that, as no commitments have been received, it is under no obligation to put forward an offer under these Annexes.

Accession

9) At its first meeting on 27 February 1996, the Committee concluded the accession process of two additional WTO Members to the Agreement, which had been initiated prior to the entry into force of the Agreement, by adopting the Decisions on the accession of Liechtenstein and the Kingdom of the Netherlands with respect to Aruba on the basis of the reports of the Interim Committee (GPA/IC/6 and GPA/IC/7), and inviting these Members to accede to the Agreement on the terms for accession attached to the respective Decisions (GPA/2 and GPA/3). The Kingdom of the Netherlands for Aruba has deposited its instrument of accession on 25 September 1996 (WT/Let/111 and GPA/7). Liechtenstein has not yet deposited its instrument of accession.

10) Singapore applied for accession in November 1995. Following bilateral consultations held between Singapore and Parties in 1996, the Committee adopted, at its meeting on 20 September 1996, a Decision inviting Singapore to accede on the terms attached to that Decision (GPA/6). Singapore has not yet deposited its instrument of accession.

11) Chinese Taipei applied for accession to the Agreement in June 1994 (GPA/IC/5). At its February and June 1996 meetings, the Committee was informed of the bilateral consultations held between the delegation of Chinese Taipei and Parties to the Agreement on Chinese Taipei's revised offer in view of its wish to conclude this process in the latter part of 1996. At its September meeting, the Committee was informed of further improvements that Chinese Taipei had made to its offer.

Decisions on Procedural Matters

12) At its first meeting on 27 February 1996, the Committee on Government Procurement adopted the following Decisions on procedural matters: Participation of Observers in the Committee; Accession to the Agreement; and Interim Procedures on the Circulation of and on the Derestriction of Documents, Pending Definitive Procedures (GPA/1). These Decisions, which concern, *inter alia*, possibilities for Members of the WTO not Parties to the Agreement to participate as observers in the Committee, to receive Committee documents and to accede to the Agreement, were transmitted to the General Council for the information of all Members of the WTO (WT/L/146). At its September meeting, the Committee agreed to align its procedures on circulation and derestriction of documents with those adopted by the General Council on 18 July 1996 (WT/L/160/Rev.1).

13) *At its meeting on 27 February 1996, the Committee adopted a Decision on modalities for notifying threshold figures in national currencies (GPA/1). All Parties have notified thresholds in their respective national currencies for the periods 1996-97 and the methods employed for determining them (GPA/W/12 and Addenda 1-6).*

14) *At its meeting on 4 June 1994, the Committee adopted a Decision on Procedures for the Notification of National Implementing Legislation, including responses to a checklist of issues (GPA/1/Add.1). This sets a time-limit of 31 December 1996 for such notifications.*

Establishment of a Practical Guide to the New Agreement

15) *Pursuant to its discussion on the desirability, the structure and presentation of a practical guide to the Agreement directed towards the private sector, the Interim Committee considered it appropriate to postpone active consideration of the establishment of such a guide in view of its linkages with various other outstanding issues, such as the procedures for notifying national implementing legislation and the use of information technology in procurement procedures.*

Loose-leaf System for Updating Appendices

16) *The Committee agreed, at its meeting on 4 June 1996, to establish a loose-leaf system, with legal effect, to ensure that the Appendices to the Agreement are kept up to date. The Committee requested the Secretariat to produce and distribute an updated set of Appendices, with a view to providing a starting point for the loose-leaf system. The Committee agreed to make this loose-leaf system, once established, available to the public at large through the Internet.*

Statistical Reporting

17) *Article XIX:5 requires Parties to collect and provide on an annual basis statistics on their procurements covered by the Agreement. With a view to ensuring that such statistics are comparable, Article XIX:5 requires the Committee to provide guidance on the methods to be used. The Interim Committee established a Working Group on Statistical Reporting to propose guidelines for meeting the statistical reporting requirements of Article XIX:5, in particular in respect of the adoption of uniform classification systems and methods to be used for providing statistics on the country of origin of products and services.*

18) *Based on the report of this Working Group (GPA/IC/8), the Committee agreed, at its first meeting on 27 February 1996, that the rules of origin of products used for the purposes of statistical reporting in Article XIX:5 of the Agreement should be the same as those applied under Article IV, which were those used in the normal course of trade. As for the requirement to report statistics on the origin of services, the Committee postponed application of this requirement until practicable rules for determining the origin of services had been defined. At its meeting on 4 June 1996, the Committee adopted classification systems for goods and services to be used in statistical reporting under the Agreement (GPA/4).*

Some Parties asserted that the objective of establishing statistics, i.e. to provide information and enable review as regards obligations of Parties, might be more appropriately met through alternative means.

Other Matters

19) In accordance with the provisions of the Understanding on Rules and Procedures Governing the Settlement of Disputes (Annex 2 of the WTO Agreement), the Committee notified the Dispute Settlement Body (DSB) of special or additional rules or procedures on dispute settlement in the Agreement on Government Procurement, namely Article XXII, paragraphs 2 through 7 (GPA/5).

III. Work under the Built-In Agenda

Information Technology

20) Article XXIV:8 of the Agreement calls on Parties to consult regularly in the Committee on developments in the use of information technology in government procurement and, if necessary, to negotiate modifications to the Agreement itself. In preparation for the implementation of the future responsibilities of the Committee in regard to these provisions, the Interim Committee gathered information on the use of information technology in government procurement in the various Signatories in reply to a questionnaire (GPA/IC/W/4/Rev.1) as well as through discussion in the Interim Committee (GPA/IC/M/1-6). This information raised a number of policy issues concerning, on the one hand, issues both of access to procurement opportunities on on-line databases and electronic tendering or commerce and, on the other hand, questions both of cooperation between and coordination of national systems (GPA/IC/W/18). The work on information technology has focused on the need to ensure that access to procurement opportunities through the use of information technology takes place on a non-discriminatory basis and also on considering what modifications, if any, may be necessary to the Agreement to enable the benefits of information technology to be harnessed. The United States, the European Communities and Norway submitted communications identifying a number of areas that might require examination to accommodate the developments in information technology (GPA/IC/W/36, GPA/W/13 and GPA/W/14). In addition the Secretariat prepared a compilation of issues relating to the implications of the developments of information technology which also identified options for carrying forward the work in this area (GPA/W/15). The Committee's discussion of these options at its second meeting on 4 June 1996 had the following outcome. First, the Secretariat revised the questionnaire on information technology (GPA/IC/W/4/Rev.1) as proposed in document GPA/W/15 (GPA/W/24). Second, the Secretariat prepared a factual note on the aspects of the Agreement that it had been suggested might need to be re-examined in the light of information technology, setting out the relevant provisions of the Agreement and drawing attention to any pertinent information on their negotiating history (GPA/W/25). Third, the delegation of the United States provided information on the pilot project launched in the APEC framework on

access to national databases (GPA/M/3). Fourth, the European Community, in coordination with Norway, would prepare a paper identifying, inter alia, the technical issues relating to information technology that might need to be examined by experts. The Committee is determined to pursue its work on information technology expeditiously, so as to ensure that the benefits of information technology are harnessed while at the same time protecting and, where possible, enhancing non-discriminatory access.

Three-year Review

21) Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties and eliminating any remaining discriminatory measures and practices. At the Committee's meeting on 4 June 1996, suggestions were made that, with a view to facilitating accession by the widest possible number of countries and to adjusting the Agreement to newly-emerging technologies, such negotiations should be initiated in 1997 and could include the following main elements: (i) expansion of the coverage of the Agreement, notably extending it to sectors not presently covered; (ii) increased security of market access under the Agreement; (iii) elimination of discriminatory measures and practices; and (iv) simplification and improvement of the Agreement. Some Parties expressed the view that further experience with the operation of the Agreement should be gained before initiating negotiations aimed at increased coverage.

IV. Issues to be brought to the attention of the Ministerial Conference

22) The Committee has agreed to undertake an early review, starting in 1997 with an examination of modalities, with a view to the implementation of Article XXIV:7 (b) and (c) of the Agreement. The review will, in particular, cover the following elements:

-expansion of the coverage of the Agreement;

-elimination of discriminatory measures and practices which distort open procurement; and

-simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology.

23) This review shall seek the expansion of membership of the Agreement by making it more accessible to non-Parties.

24) Members of the Committee note the work under way under the Council for Trade in Services on government procurement and the proposals for the Singapore Ministerial for a multilateral work programme on government procurement. The Parties to the Agreement on Government Procurement intend to support and

actively contribute to any multilateral work on government procurement that may be decided upon by the Ministerial Conference, without prejudice to their own efforts to improve and extend the Agreement on Government Procurement and to encourage more WTO Members to become Parties to it.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 14 OCTOBER 2005

Chairman: Ambassador Tae-yul Cho (Korea)

1. The Chairman said that, in preparation for the meeting, delegations had received an Airgram (WTO/AIR/2678 of 4 October 2005) and an annotated agenda (Job No. 7115 of 5 October 2005). He noted that, under the last item of the proposed agenda, "Other business", Jordan would make a short statement on its accession process. In addition, he suggested that the dates for the Committee's meetings in 2006 be taken up under this item.
2. The Committee adopted the following agenda, as outlined in the Airgram:
 - A. Negotiations under Article XXIV:7
 - B. Israel's request regarding offsets
 - C. Adoption of the Committee's annual report
 - D. Other business.
- A. NEGOTIATIONS UNDER ARTICLE XXIV:7
3. The Chairman noted that the meeting had been preceded by several days of informal drafting sessions focusing on the revision of the outstanding non-market-access-related provisions in the draft revised text of the Agreement. This work had been based on:
 - (a) the updated draft revised text of the Agreement as at 21 July 2005¹;
 - (b) informal written submissions by Canada and by the United States²;
 - (c) a joint non-paper by the European Communities and the United States; and
 - (d) drafting proposals and suggestions made by delegations throughout the week.

The results of the drafting work had been introduced in the clean text, the updated version of which would be circulated by the Secretariat the following week.³

¹ Job No. 5398, 26 July 2005.

² Job Nos. 6763 and 7104, 26 September and 4 October 2005, respectively.

³ Job No. 7713, 20 October 2005.

4. Continuing, the Chairman said that, as discussed at the informal closing session earlier that afternoon, good progress had been made during the week in moving toward agreement on a number of the outstanding non-market-access-related provisions in the draft revised text of the Agreement. Nonetheless, significant further work was required in a number of other areas. To facilitate this work, the Chairman suggested that the more detailed statement that he had made during the informal closing session on stocktaking and future work be attached to the minutes of the meeting.

5. It was so agreed. Accordingly, the Chairman's statement is attached to these minutes.⁴

6. The Chairman said that further progress towards the goal of reaching provisional agreement on the non-market-access-related provisions would require, first and foremost, intensive reflection and consultations, both in capitals and between them, in regard to the issues that he had mentioned at the informal closing session and on ways to bridge the remaining gaps in participants' positions. It would also require the preparation of written proposals reflecting agreed positions and language.

7. Regarding the bilateral coverage negotiations, the Chairman reminded delegations of the revised deadline for the submission of offers that had been agreed at the formal meeting in July 2005, namely: prior to the meeting of the Committee in October 2005 but in any case not later than the Hong Kong Ministerial Conference (13-18 December 2005).⁵ To date, no offers had been received. Parties would, therefore, need to give attention to this critical aspect of the Article XXIV:7 negotiations in the next few weeks, in addition to their positions on the outstanding non-market-access-related provisions of the Agreement.

8. The representative of the European Communities requested that consideration be given to the scheduling of another meeting of the Committee before the Hong Kong Ministerial Conference, to facilitate the reaching of agreement on the remaining non-market-access-related provisions of the text. At a minimum, the possibility of such a meeting should not be excluded pending consultations with Parties.

9. The Chairman expressed his hope that delegations would further discuss this issue among themselves. He said that, through the Secretariat, he would also consult with interested delegations, and would communicate to delegations the outcome of such consultations in November.

B. ISRAEL'S REQUEST REGARDING OFFSETS

10. The Chairman noted that, in advance of the meeting, Israel had made a request to include on the agenda of the meeting an item entitled Israel's request regarding offsets. Prior developments regarding Israel's offset commitments, including at the Committee's meeting of 21 July 2005, were summarized in the annotated agenda for the meeting.⁶

11. The representative of Israel said that, as Parties would recall, in November 2004, his delegation had submitted a formal request to the Committee to modify the timetable for a gradual reduction of the level of Israel's offset rights. Due to the urgent nature of the matter and the need for more time to study Israel's request, the decision had been taken to extend Israel's right to require offsets at a level of 30 per cent for an additional one year, i.e. until 31 December 2005.⁷ As reflected in the minutes of the Committee's meeting of 16 December 2004⁸, it had been understood at the time that Israel, as well as the rest of the Parties, would use this one-year period to further explore and negotiate the issue.

⁴ This statement has also been circulated as Job No. 7591, 18 October 2005.

⁵ GPA/79/Add.1, 22 July 2005.

⁶ Job No. 7115, 5 October 2005.

⁷ GPA/83, 17 December 2004.

⁸ GPA/M/25, 18 January 2005.

12. At the Committee's meeting of 21 July 2005, his delegation had signalled its intention to renew its request regarding offsets. In addition, his delegation had submitted a non-paper summarizing an independent study on the implications and consequences of the Agreement on Government Procurement on Israel's economy and industry. The findings of that study highlighted the vital importance of offsets for the overall balance of benefits and costs arising from Israel's participation in the plurilateral Agreement on Government Procurement.

13. As had been the case in 2004, once again, his delegation wished to find a long-term solution that would redefine Israel's rights and obligations under the Agreement of the Government Procurement. For this purpose, his delegation had been ready, prior to the current meeting, to submit an initial offer in the framework of the market access negotiations. Reaching a long-term solution was the best alternative for Israel as well as for the rest of the Parties. However, following informal consultations with some other Parties earlier in the week, his delegation had understood that most Parties preferred, at this stage, to implement an appropriate short-term solution before a long-term agreement could be discussed and agreed upon. He expressed his delegation's hope that the latter would happen in the course of 2006.

14. As a result, his delegation intended to submit a new proposal for a further interim period, with the view of modifying its current commitments regarding offsets. This proposal, which would be shared with the Parties informally prior to its submission, would be intended to be effective as of 1 January 2006. The proposal would be based on the following parameters:

- (a) the level of offsets in the proposal would not undermine the starting point of negotiations for the long-term solution in the future;
- (b) the new interim regime regarding offsets would be in place either until the lapse of a transitional period of [X] number of years, or until the conclusion of the ongoing market access negotiations pursuant to Article XXIV:7, whichever would come first;
- (c) the above-mentioned period of [X] years would be longer than one year; and
- (d) it would be framed as an interim arrangement in anticipation of a long-term solution that would take into account the interests of Israel as well as of other Parties, and the need to find a balance between the two.

15. His delegation intended to submit this proposal in accordance with Article XXIV:6(a) in a timely manner, in order to allow the Committee to take a decision on the matter before the end of 2005. During the transitional period and in the context of the market access negotiations, which were expected to gain momentum in the course of next year, Israel intended to negotiate with other Parties a mutually agreeable long-term solution regarding its schedule of commitments, including the Note on offsets. This would be done with the view of reaching a new balance of Israel's rights and obligations under the Agreement on Government Procurement. In conclusion, he expressed his delegation's appreciation for the good will demonstrated by other Parties on this issue of importance to Israel. He reaffirmed his delegation's readiness to continue to work closely with other Parties in a constrictive manner and in good faith to achieve a satisfactory result.

16. The representative of the United States said that her delegation was also looking forward to finding a long-term solution to Israel's use of offsets. For her delegation, such a solution included a provision for the phase-out of the offsets. As her delegation had stated many times before, it believed that offsets were not a permanent feature but a transitional measure - a point which had also been reflected in the positions taken by her delegation in the discussions on the revision of the text of the Agreement. Her delegation was looking forward to working with the delegation of Israel in the coming weeks to find common ground for a short-term solution, which would lead to a final resolution of this matter.

17. The representative of the European Communities said that his delegation was looking forward to working with the Committee and with Israel to find a solution to the question of offsets. He was glad to see that it had been understood that in the short time remaining before the end of the year it would not be possible to reach agreement on a long-term solution. He urged the delegation of Israel to submit its request as soon as possible. The kind and duration of the extension to be granted could not be prejudged without knowing all the parameters. As in the case of the delegation of the United States, one of the parameters important for his delegation was having a phase-out of offsets. This parameter would help in finding an agreeable solution and should be one of the criteria for deciding on the level of offsets. This was also in line with the position his delegation had maintained in the context of the revision of the Article on Developing Countries in the draft revised text of the Agreement.

18. The representative of Japan said that her delegation was looking forward to working with Israel to find an appropriate solution to its concern. Given the short time remaining before the end of the year, her delegation also wished to find a short-term solution. In 2006, her delegation would work with the Committee and Israel to find a long-term solution.

19. The representative of Canada said that her delegation was prepared to work with Israel to find a short-term solution, which could lead to an appropriate long-term solution at a later stage. Her delegation's views on the role of offsets were consistent with the views that other delegations had expressed.

20. The representative of Korea said that his delegation also wished to consult with Israel to reach a long-term solution to this issue, although at this stage, there was not enough time to find such a solution. Like other delegations, his delegation would therefore work toward a short-term solution before the end of the year, and would continue working in 2006 to find a long-term solution.

21. The representative of Switzerland said that the phase-out of offsets was also important for his delegation, both in the context of free trade agreements and under the Agreement on Government Procurement.

22. The representative of Israel thanked all Parties for their comments and said that his delegation was looking forward to negotiating both a short- and a long-term solution with the other Parties in good faith and in a constructive manner.

23. As to the procedure for adopting the desired short-term solution, the Chairman noted that the Committee could follow the procedure used in 2004. At the discretion of delegations, the required formal meeting of the Committee could be handled by Geneva-based delegates.

24. The representative of the European Communities pointed out that the necessary meeting to implement the desired solution regarding Israel's use of offsets reinforced the feasibility of holding a further substantive meeting before the end of the year, which could also continue the negotiations pursuant to Article XXIV:7.

C. ADOPTION OF THE COMMITTEE'S ANNUAL REPORT

25. The Chairman noted that Article XXIV:7(a) of the Agreement on Government Procurement required the Committee to review annually the implementation and operation of the Agreement and to inform the General Council of developments during the period covered by the review. The deadline for the submission of this year's report to the General Council was 18 November 2005. A draft of the Committee's Annual Report for the period since its last report⁹ had been circulated by the Secretariat

⁹ GPA/82, 26 November 2004.

on 26 September 2005.¹⁰ As foreseen at the Committee's meeting of 21 July 2005, the Committee should now discuss and adopt the draft report with any necessary modifications.

26. The representative of the United States said that in the light of the week's work, delegations might wish to look again at the section in the draft annual report describing the negotiations pursuant to Article XXIV:7. Delegations should be given an opportunity to submit relevant suggestions or other corrections to the report. Other delegations agreed with this proposal.

27. Following discussion, the Committee agreed that drafting suggestions, if any, could be provided by delegations to the Secretariat up to 28 October, following which a revised draft of the report incorporating relevant suggestions would be circulated by the Secretariat in early November.¹¹ If no objections were made to the changes incorporated in the revised report within one week of its circulation, the revised draft report would be considered adopted and would be made available to the General Council.

D. OTHER BUSINESS

(i) *Jordan's Accession to the Agreement*

28. The representative of Jordan said that since the Committee's meeting in March 2005, Jordan had continued to work relentlessly towards resolving outstanding issues and concerns in regard to the preparation of its second revised offer and the conclusion of its accession to the Agreement. Constructive and fruitful bilateral consultations had been held with the European Communities, Japan, Canada and the United States concerning both its offer and relevant legislative developments. His delegation had had to face various difficulties in moving ahead with its accession:

- (a) One of the basic difficulties was to convince the private sector and the associations that accession to the Agreement on Government Procurement would not affect their work negatively, taking into consideration the small size and limited resources of the Jordanian economy and industry. In this regard, his delegation had embarked on a series of meetings with the private sector and other government institutions to respond to their concerns and facilitate acceptance of the Agreement. Meanwhile, the Ministry of Industry and Trade had developed a definition for small- and medium-sized enterprises, which had been submitted to the Cabinet for approval.
- (b) In regard to non-sensitive procurement by the Ministry of Defence and the Ministry of Interior, a number of joint committees were working towards coming up with responses to the questions and requests put forward by Parties.
- (c) Negotiations with the Aqaba Special Economic Zone Authority (ASEZA) were in progress, and it was hoped that a common understanding could be reached regarding the inclusion of Aqaba Special Economic Zone in Jordan's Annex II. In principle, ASEZA did not object to being covered by the Agreement on Government Procurement five years from the date of Jordan's accession, the details of which needed to be worked out in due course.

29. Continuing, he said that the work required to reform Jordan's procurement legislation had almost been completed. The final draft had been submitted to the Cabinet as a first step towards its approval through Jordan's legislative process. The draft was being translated into English in order to be reviewed by the World Bank and the UNCITRAL, upon their request. In completing the process

¹⁰ Job No. 6773, 26 September 2005.

¹¹ The requested revised draft report has subsequently been circulated as Job No. 6773/Rev.1 (8178), 2 November 2005.

of its accession to the Agreement, Jordan needed Parties' support and understanding. The accession could not be done successfully unless the particular situation of the Jordanian economy was taken into consideration. Transitional periods, a reasonable set of thresholds, grace periods and the gradual phasing out of transitional periods for a list of goods and services would help in convincing the Jordanian private sector about the merits of accession. Jordan should be an attractive model for other developing countries and small economies in joining the Agreement on Government Procurement without negative effects on different economic sectors and institutions. This could be achieved only with more tolerance and better understanding by Parties. In conclusion, preparing the second revision of the Jordan's revised offer would take some time because Jordan needed to respond to all the requests received from Parties. His delegation hoped that, in the coming months, it could present a second revised offer that would respond to all relevant requests.

30. The representatives of the United States, the European Communities, Japan, Canada and Israel thanked the representative of Jordan for the update that he had provided and the efforts that were being made to bring its accession process to a conclusion. Continuing, the representative of the United States indicated that her delegation stood ready to assist Jordan in whatever way it could, and was looking forward to seeing Jordan's second revised offer in the coming months. The representative of the European Communities expressed his delegation's appreciation for the positive developments reported by the representative of Jordan in regard to the inclusion of the Aqaba Special Economic Zone. His delegation wished to see Jordan's second revised offer brought forward as soon as possible and was ready to work closely with Jordan to help in overcoming any remaining obstacles in this regard. Successful conclusion of the accession process would also facilitate Jordan's full participation in the pending coverage negotiations. The representative of Japan said that her delegation was also ready to provide support to, and share expertise with, Jordan, if and when necessary. She agreed that Jordan could be a model for the accession of other developing countries to the Agreement on Government Procurement. The representative of Israel expressed his delegation's full support for Jordan's accession to the Agreement on Government Procurement, and called upon Parties to work closely with Jordan and to show flexibility in order to accommodate its needs and to expedite the accession process.

31. In response to an observation of the Chairman about China's participation as an observer at the meeting, the representative of China said that China had revised its government procurement law only in 2002, and had much to learn in this area. The size and complexity of the Chinese government sector and China's status as a developing country would necessitate a cautious step-by-step approach to any eventual negotiations on its accession to the Agreement on Government Procurement. The representative of the United States expressed her delegation's hope that China would also participate in future meetings and that progress would soon be forthcoming on China's accession to the Agreement on Government Procurement. Her delegation stood ready to assist China in whatever ways it could as China began its accession process. The representative of the European Communities indicated that his delegation had taken note of the special importance for China of some issues, such as the issue of developing countries, and that it, too, stood ready to work together with China on its accession to the Agreement.

(ii) *Dates of the Committee's meetings in 2006*

32. The Committee agreed to the following meeting dates for 2006:

- (a) the week of 6 February 2006;
- (b) the week of 27 March 2006;
- (c) a week to be determined in the second half of May (subsequently, the Chairman has proposed that the meeting be held in the week of 15 May);

- (d) the week of 10 July 2006; and
- (e) the week of 16 October 2006,

with the understanding that, if the number of meetings needed to be reduced, the meeting scheduled for the week of 10 July 2006 could be considered optional.

ATTACHMENT

INFORMAL CLOSING SESSION, FRIDAY, 14 OCTOBER 2005

Chairman's (Ambassador Tae-yul Cho, Korea) Statement on Stocktaking and Future Work (Made at the Informal Closing Session, 14 October 2005)¹

On Monday afternoon, we agreed to hold an informal closing session at the conclusion of our drafting work this week, in order to take stock of progress and to consider next steps in the negotiations pursuant to Article XXIV:7.

A. Stocktaking

The drafting work completed this week focused on the review of the non-market access related provisions of the Agreement. The work was based on:

- the latest draft revised text circulated by the Secretariat on 26 July (Job No. 5398);
- submissions provided by Canada and by the United States (Job Nos. 6763 and 7104, respectively);
- a joint non-paper by the European Communities and the United States; and
- proposals and suggestions by delegations during the drafting sessions.

In regard to most provisions of the text, the drafting work took a sequential approach. On Thursday, the Articles dealing with Modifications and Rectifications to Coverage, and Consultations and Dispute Settlement were discussed with the benefit of participation by some Parties' legal experts.

The discussions on all these elements of the text has led to the inclusion in the clean text of relevant written proposals and suggested wording by delegations. These will be reflected in the updated version of the draft revised text of the Agreement which will be circulated by the Secretariat early next week.

Overall, I believe it is important to recognize that, during the week's drafting work, delegations showed increased flexibility on some key issues which enabled us to streamline the text and achieve good progress in a number of areas. However, in other areas, our discussions also showed a need for significant new flexibility if we are to achieve our goal of reaching provisional agreement on the non-market-access provisions in a timely fashion. It may facilitate further progress if I mention some of these areas now. Without purporting to be exhaustive, some of the issues that come to mind are as follows:

- definitional issues, including with respect to the definitions of:
 - commercial goods and services; and
 - electronic means and electronic auctions;

(Of course, the foregoing definitions need to be considered in light of the relevant operative provisions.)

¹ Also circulated as Job No. 7591 of 18 October 2005.

- various issues relating to Article II (Scope and Coverage), including with respect to:
 - the application of the Agreement;
 - compliance; and
 - valuation;
- with regard to Article III (General Principles), issues concerning:
 - conflicts of interest; and
 - offsets;
- as regards Article V:
 - the contents of various types of notices;
 - the procedures relating to their publication; and
 - the types of entities to which the various requirements apply;
- a number of issues concerning time-periods (Article VI);
- the final wording of the provision relating to use of technical specifications to promote the conservation of natural resources and to protect the environment (Article VII:9);
- a number of substantive issues relating to Article VIII (Conditions for Participation);
- as regards limited tendering (Article X):
 - the scope of this tendering method with regard to construction and other services (paragraphs (c), (g) and (h)); and
 - the question of any reference to proprietary information;
- the language regarding the prohibition of cancellation of procurements and potentially the modification of awarded contracts (Article XI);
- the need for Article XII and the question of whether it should extend beyond electronic auctions;
- issues concerning the requirements for collection of statistics, particularly in regard to the possible use of estimates for procurement by Annex I entities;
- finalization of the Article regarding Developing Countries;
- a number of issues concerning Modifications and Rectifications to Coverage;
- a number of issues regarding Domestic Review Procedures for Supplier Challenges;
- as regards Consultations and Dispute Settlement:
 - the availability of non-violation claims;
 - the extent of specific rules for the handling of government procurement disputes as compared to reliance on the DSU; and
 - the EC proposal for special remedies.

B. Future work

I turn now to the question of how we move forward from here. It seems to me that further progress toward the goal of reaching provisional agreement on the non-market access related provisions will require, first and foremost, intensive reflection and consultations both in capitals and between them, in particular in regard to the areas that I have mentioned earlier, and on ways to bridge the remaining gaps in participants' positions. It will also require the preparation of written proposals reflecting agreed positions and language.

As has been suggested to me by a delegation, if the Committee so wishes, I am prepared to call a further meeting prior to the end of this year to finalize provisional agreement on the non-market-access-related provisions. However, given the extent of remaining divergences in viewpoints, I frankly am not sure that, without extraordinary efforts by delegations, a single meeting before the Hong Kong Ministerial Conference will be sufficient. The alternative is that we would allow the drafting work to continue into the next year – something which, of course, we all would prefer to avoid, if we can. In this context, it is for the Committee to decide how it wishes to proceed from here. In any case, as I have mentioned, further progress will depend on Parties' own efforts to identify new areas of flexibility and bridges between their respective positions.

As to the bilateral coverage negotiations, I would like to take this opportunity to remind delegations of the revised deadline for submission of offers that was agreed to at our formal meeting in July, namely prior to the October meeting of the Committee (i.e. this week) but in any case not later than the Hong Kong Ministerial Conference (13-18 December 2005). To date, no offers have been received. Parties will, therefore, need to give attention to this critical aspect of the Article XXIV:7 negotiations in addition to their positions on the outstanding non-market access related provisions of the Agreement in the coming weeks.

As to the "horizontal" coverage negotiations, it will be important to build on the progress made so far in terms of both the market-access-related provisions in the text and other horizontal coverage matters listed in the Decision on Modalities. Delegations are encouraged to come forward with additional new submissions on these matters.

Note: In the subsequent discussion, the European Communities stated its preference that a further meeting be held before the end of 2005, to carry forward the renegotiation of the non-market access related provisions of the Agreement. The Chairman indicated that he would consult with interested delegations regarding this possibility in two to three weeks' time, taking account of progress made by delegations in capitals on identifying potential areas of flexibility and ways of bridging remaining differences in positions regarding the text.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 21 JULY 2005

Chairman: Ambassador Tae-yul Cho (Korea)

1. The Committee adopted the following agenda, as outlined in Airgram WTO/AIR/2621/Rev.1 of 11 July 2005:

- A. Negotiations under Article XXIV:7
- B. Modifications to the Appendices to the Agreement
- C. Accessions
- D. Review of national implementing legislation
- E. Israel's request regarding offsets
- F. Other business.

A. NEGOTIATIONS UNDER ARTICLE XXIV:7

2. The Chairman noted that since the last formal meeting at which this item had been discussed, held on 17 November 2004, specific issues relating to the negotiations had been raised at two formal meetings. At the meeting of 16 December 2004, the Committee had discussed the status of GPA observers in the context of bilateral coverage negotiations¹ and the circulation of requests in bilateral coverage negotiations.² At the meeting of 14 March 2005, the Committee had discussed issues relating to future work with regard to negotiations pursuant to Article XXIV:7(b) and (c) of the Agreement.³ At its meetings on 17 November⁴ and 16 December 2004⁵, the Committee had agreed to hold four meetings in 2005 in order to continue negotiations pursuant to Article XXIV:7 of the Agreement: in the weeks of 14 March, 30 May, 18 July and 10 October 2005, respectively. The Chairman's statement on stocktaking and future work made at the end of the informal meeting held in the week of 30 May 2005 had been circulated on 3 June 2005⁶, and was included in the set of materials for the meeting. The results of drafting work at that meeting had been reproduced in the updated "clean"⁷ and "side-by-side"⁸ versions of the draft revised text of the Agreement. In addition,

¹ GPA/M/25, paras. 13-17.

² GPA/M/25, para. 18.

³ GPA/M/26, paras. 8-18.

⁴ GPA/M/24, paras. 99-100 and 104.

⁵ GPA/M/25, para. 12.

⁶ Job No. 3794.

⁷ Job No. 4035 of 10 June 2005.

⁸ Job No. 4297 of 20 June 2005.

based on comments by delegations on two earlier drafts, the final version of the summary of negotiations on so-called "horizontal" coverage issues had been circulated on 15 July 2005.⁹

(i) *Stocktaking and future work*

3. The Chairman said that, based on his suggestions in the fax of 12 July 2005 and on proposals by delegations, the current formal meeting had been preceded by informal negotiations held over several days on outstanding non-market-access-related provisions in the draft revised text of the Agreement, and on coverage matters pursuant to the Decision on the Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices.¹⁰ As discussed at the informal closing session of the week's negotiations which had taken place before the meeting, he suggested that his statement on stocktaking of the week's negotiations and suggestions for future work made during that session be included in the minutes of the meeting.

4. It was so agreed. Accordingly, the Chairman's statement is attached to these minutes.¹¹

(ii) *State of play of coverage negotiations and revised timetable for the negotiations*

5. The Chairman recalled that, according to the Decision on the Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices¹², initial offers had been originally scheduled to be submitted by 1 March 2005 but not later than 1 May 2005. However, no offers had been tabled thus far. Given this, and as had been discussed informally during the week, the Committee could now adopt, if deemed appropriate, the draft decision on the deadlines for the submission of offers and conclusion of the negotiations pursuant to Article XXIV:7 of the Agreement that delegations had seen and commented on earlier in the week. The draft decision would extend the deadlines both for submission of initial offers and for the overall completion of the negotiations.

6. The Committee adopted the Decision.¹³

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Modifications certified since the meeting in November 2004*

7. The Chairman noted that, since the last meeting of the Committee discussing this item, on 17 November 2004, various modifications had become effective and had been certified. Detailed information on these modifications was available in paragraph 4 of the annotated agenda for the meeting.¹⁴

(ii) *Outstanding modifications*

8. The Chairman said that the following proposed modifications remained outstanding:

- (a) a notification by *Hong Kong, China* concerning proposed modifications to its Appendix III¹⁵;

⁹ Job No. 4321/Rev.2 (5082).

¹⁰ GPA/79 of 19 July 2004.

¹¹ This statement has also been circulated as Job No. 5340 of 22 July 2005.

¹² GPA/79 of 19 July 2004.

¹³ Subsequently circulated in document GPA/79/Add.1 of 22 July 2005.

¹⁴ Job No. 5051 of 14 July 2005.

¹⁵ GPA/MOD/HKG/3 of 15 July 2005.

- (b) notifications by *Japan* concerning proposed modifications relating to:
- NTT¹⁶;
 - East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company¹⁷;
 - Railway Construction Public Corporation and Corporation for Advanced Transport and Technology¹⁸;
 - Japan Consumer Information Center, Water Resources Development Public Corporation, Japan Green Resources Corporation, the Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, the Association for Welfare of the Mentally and Physically Handicapped, and National Agriculture Research Organization¹⁹;
 - National Aerospace Laboratory²⁰;
 - Annex 3 of Japan's Appendix I²¹; and
- (c) a notification by the *United States* concerning proposed modifications to reflect changes in the administrative structure of the Federal Government, as regards the Uranium Enrichment Corporation.²²

9. Continuing, he said that the details of notifications with regard to these outstanding modifications, as well as the developments, if any, since the meeting of the Committee in November 2004, were contained in paragraph 5 of the annotated agenda for the meeting.²³

10. The representative of Japan said that her delegation had submitted a number of notifications to the Committee. Regarding some of those notifications, questions had been received from certain Parties. Her delegation needed some time to answer to those questions, and was in the process of preparing its answers. As regards long outstanding issues, one of which concerned the three Japan Railway companies, her delegation had received a fourth set of questions from the European Communities, and her delegation had submitted its answers to those questions. She requested clarification by the European Communities of the status of its response to her delegation's answers, given that quite some time had passed since her delegation had sent its answers. She reiterated her delegation's request for the expeditious withdrawal of the European Communities' objection to this proposed modification. As regards the proposed modification concerning NTT, her delegation had submitted its answers to the European Communities' questions. She had the impression that the European Communities had reacted in a quite favourable manner to those answers. In the meantime, her delegation had submitted additional documents requested by the European Communities, and she wished to know where the European Communities stood on that issue. She asked for the expeditious withdrawal of the European Communities' objection to that proposed modification too. She noted that her delegation had submitted to the Committee a paper on its long-standing non-resolved

¹⁶ GPA/W/91 of 6 September 1999.

¹⁷ GPA/W/144, 145 and 146 of 29 August 2001, and GPA/W/152 & Corr.1 of 20 September and 10 October 2001.

¹⁸ GPA/W/272 and Rev.1 of 23 September and 8 October 2003, respectively.

¹⁹ GPA/W/274 of 23 September 2003.

²⁰ GPA/W/275 of 23 September 2003.

²¹ GPA/MOD/JPN/7 of 26 July 2004.

²² GPA/W/153 of 25 September 2001.

²³ Job No. 5051 of 14 July 2005.

modifications.²⁴ As discussed in that paper, her delegation's position was that those long-standing non-resolved notifications should not be carried over to a new agreement but should be resolved expeditiously.

11. The representative of the European Communities thanked Japan for its replies and the additional information on NTT. He asked Japan for its understanding that processing this new information, which was not older than a month, needed some more time. Accordingly, his delegation was not in a position to give a definitive response at that stage, although he said that his delegation believed that the new information submitted by Japan was going into the right direction. He said that the modification concerning the three Japan Railway companies was a long-standing issue. His delegation was ready to continue discussing it with Japan. He pointed out that his delegation had waived a number of objections against proposed modifications by Japan, and Japan had submitted a large number of modifications, which were not always easy to process. His delegation had tried to accommodate, and respond to, Japan's need to have the relevant objections waived as soon as possible. He said that, as regards several notifications by Japan, his delegation was still awaiting Japan's answers to questions some of which had been posed more than a year ago. In particular, the European Communities had not received any answers to its questions on Japan's notification concerning the National Aerospace Laboratory. He also drew Japan's attention to the new, additional question posed by his delegation concerning Japan's Urban Renaissance Agency²⁵, which his delegation believed was a particularly sensitive notification, given that there had been a transfer of activities from that entity, which could have an effect on the agreed balance of coverage. His delegation understood that this new entity did not provide any railway services and, thus, should not be subject to the derogation on operational safety contained in Appendix I of Japan. Having said that, his delegation was ready to work with Japan to resolve outstanding issues as fast as possible.

12. The representative of Japan said that her delegation had no additional information at that stage, but was making every effort to provide information and answers to the European Communities as soon as possible. She said that her delegation had received the new questions by the European Communities a month or two earlier, and needed some more time to respond to those.

C. ACCESSIONS

(i) *Developments since the meeting in November 2004*

13. The Chairman noted that since the last meeting that comprehensively addressed this item, on 17 November 2004, the following developments have occurred.

Georgia

14. The Chairman said that, at the Committee's meeting on 17 November 2004, it had been agreed that, with the assistance of the Secretariat, he would contact the delegation of Georgia to see when it might be able to respond to the questions received, and that on that basis he would further consult with Parties as to the idea of holding plurilateral consultations with Georgia.²⁶ Since no responses had been submitted by Georgia, no plurilateral consultations had been held. He recalled that Georgia had sought accession in October 2002²⁷, had replied to the GPA/35 checklist in April 2002²⁸, and submitted its entity offer in December 2003.²⁹

²⁴ GPA/MOD/JPN/17 of 15 November 2004.

²⁵ GPA/MOD/JPN/18 of 3 June 2005.

²⁶ GPA/M/24, para. 49.

²⁷ GPA/71.

²⁸ GPA/W/187.

²⁹ GPA/SPEC/34.

Jordan

15. The Chairman said that, at the meeting of the Committee on 17 November 2004, Jordan had informed Parties that its new comprehensive legislation was expected to be finalized by the end of 2004 and would hopefully pass the legislative process by summer 2005. It had been agreed that Parties should submit their comments on Jordan's revised offer by 15 December 2004 through the Secretariat. In turn, Jordan had agreed to prepare a further revised offer by 15 February 2005.³⁰ He had noted that Parties might wish to see the developments before taking a decision on holding another round of plurilateral consultations, and he had indicated that, through the Secretariat, he would consult with Parties on the relevant arrangements. Based on that agreed approach, the European Communities had submitted questions and requests regarding Jordan's revised market access offer³¹, and the United States had submitted requests for improvements in Jordan's revised entity offer.³² Jordan had responded to those submissions on 13 June 2005.³³ At the meeting of the Committee on 14 March 2005, Jordan had made a statement reporting on developments in its accession process to the Agreement on Government Procurement.³⁴ It had noted that, in light of those developments, it had turned out to be impossible to finalize and submit its second revised offer within the agreed time-frame. Jordan had indicated that it was looking forward to submitting its second revised offer to the Committee once domestic procedures, including the official approval of the Government, had taken place. As to the review of Jordan's legislation, the draft unified procurement law had been completed by the relevant committee, and had been submitted to the Government prior to undergoing the relevant constitutional procedures. The Chairman recalled that Jordan had sought accession in July 2000³⁵, had replied to the GPA/35 checklist in December 2000³⁶, had submitted its entity offer in February 2003³⁷ and its revised entity offer in September 2004.³⁸

16. The representative of Jordan said that work was taking place on the second revised offer that his delegation had promised to submit. He expressed the hope that, sometime in the course of 2005, if the relevant internal procedures had sufficiently progressed, his delegation would be able to submit its second revised offer.

(ii) *Other accession processes*

17. The Chairman noted that, in addition to the above two WTO Members, accession negotiations were under way with Albania, Bulgaria, the Kyrgyz Republic, Moldova, Oman, Panama and Chinese Taipei. However, in the case of these WTO Members, no new developments had taken place recently. Basic information on earlier developments relating to their accession processes had been included in Annex 1 of the annotated agenda for the meeting.³⁹ The following additional WTO Members had provisions in their respective Protocols of Accession to the WTO regarding accession to the GPA: Armenia, China, Croatia, the Former Yugoslav Republic of Macedonia and Mongolia. Information concerning the commitments of those WTO Members had been included in Annex 2 of the annotated agenda for the meeting.⁴⁰

³⁰ GPA/M/24, para. 51.

³¹ GPA/ACC/JOR/5 of 20 December 2004.

³² GPA/ACC/JOR/6 of 20 December 2004.

³³ GPA/ACC/JOR/8 and GPA/ACC/JOR/7, respectively.

³⁴ GPA/M/26, paras. 19-21.

³⁵ GPA/38.

³⁶ GPA/W/124.

³⁷ GPA/SPEC/29.

³⁸ GPA/ACC/JOR/4.

³⁹ Job No. 5051 of 14 July 2005.

⁴⁰ Job No. 5051 of 14 July 2005.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

18. The Chairman noted that at the Committee's meeting of April 2004, the Kingdom of the Netherlands with respect to Aruba had said that the Government of Aruba had originally intended to introduce new implementing legislation and to subsequently answer the questions in GPA/1/Add.1 on the basis of such legislation. Since that would be a lengthy process, the Government of Aruba had decided to answer the questionnaire on the basis of the current legislation. The responses to the questionnaire in GPA/1/Add.1 had been submitted on 23 November 2004⁴¹; however, Aruba had not submitted the text of its legislation, either current or new, as yet. Further, as indicated by Aruba at the meeting of 17 November 2004, the answers were based on the present legislation, which was being amended.

19. The Chairman said that, in those circumstances, Parties might wish to consider whether to go ahead with the review of Aruba, based on the procedures agreed upon at the Committee meeting of February 1998⁴², or to postpone the review until Aruba had submitted all the documents required in GPA/1/Add.1.

20. The Committee agreed to postpone the review of the national implementing legislation of the Kingdom of the Netherlands with respect to Aruba until the required documents had been made available to Parties.

21. The Chairman recalled that, pursuant to Article XXIV:5(b) of the Agreement, Parties should inform the Committee of any changes in their relevant laws and regulations and in the administration of such laws and regulations. In line with that provision, Japan had submitted a notification.⁴³ He reminded Parties that had amended their laws implementing the Agreement to notify such laws in accordance with Article XXIV:5(b).

E. ISRAEL'S REQUEST REGARDING OFFSETS

22. The Chairman noted that, on 11 July 2005, Israel had submitted a request to include on the agenda of this meeting an item entitled "Israel's request regarding offsets". Accordingly, the revised Airgram for the meeting⁴⁴ had been circulated adding the proposed agenda item on this issue. On 15 July 2005, Israel had made a submission regarding its level of offset rights⁴⁵, which had been circulated on 18 July 2005. As to earlier developments on Israel's offset commitments, at its meeting of 16 December 2004⁴⁶, he recalled that the Committee had adopted a Decision pursuant to Article XXIV:6(a) of the Agreement on Government Procurement.⁴⁷ The Decision had modified Israel's Note to Appendix I to the Agreement: it had extended by one year the original deadline of 1 January 2005 for Israel's commitment to reduce the value of offsets from a maximum of 30 per cent to a maximum of 20 per cent of procurement contracts. At the meeting of the Committee on 14 March 2005, Israel had made a statement on the modification of its Appendix I and on related issues.⁴⁸ The Chairman noted that, in addition to its formal submission to the Committee, Israel had provided a room document which it had asked to have circulated to delegations participating in the meeting.

⁴¹ GPA/81.

⁴² GPA/M/8, para. 23.

⁴³ GPA/37/Add.2 of 21 March 2005.

⁴⁴ WTO/AIR/2621/Rev.1 of 11 July 2004.

⁴⁵ GPA/W/294.

⁴⁶ GPA/M/25, para. 3.

⁴⁷ GPA/83 of 17 December 2004.

⁴⁸ GPA/M/26, paras. 3-6.

23. The representative of Israel said that, as Parties might recall, in November 2004 Israel had submitted a formal request to the Committee requesting to modify the timetable for a gradual reduction of its level of offset rights. Subsequently, due to the urgent nature of the matter and the need for more time to study Israel's request, it had been decided to grant Israel an extension of one year for its rights to require offsets at the level of 30 per cent. It had been understood that Israel as well as the rest of the Parties would use this period to further explore and negotiate this issue. The Government of Israel had conducted a study of the implications of Israel's participation in the GPA on the Israeli economy and industry. The assignment had been given to a leading market research and consulting firm in Israel. The objectives and findings of the study were detailed in his delegation's two recent submissions: (i) the formal submission circulated on 18 July 2005⁴⁹; and (ii) the informal submission handed over to delegations in the room yesterday, including more details about the study and its findings. He asked delegations to keep this latter document confidential, since it contained commercial data.

24. Continuing, he indicated that the four main findings of the study were as follows:

- (a) Israel's participation in the GPA had led Israeli companies neither to greater participation, nor to win public contracts in other Parties' markets;
- (b) the Israeli public procurement market had been further opened to competition from abroad since Israel had acceded to the GPA. In fact, Israel's market had been open even before accession to the GPA; however, in the light of the need to apply the non-discrimination principles, the market had been further opened;
- (c) the offset provisions in place had neither hindered nor discouraged foreign suppliers from competing and winning public tenders in Israel;
- (d) business opportunities resulting from offset rights constituted the main, if not the only, benefit for the Israeli industry from Israel's participation in the GPA. These benefits were reflected in direct business contracts, transfer of technology, know-how, creation of long-term business relations as well as in other forms of benefits.

25. In the light of these findings, which were elaborated in detail in his delegation's submission, the Government of Israel had decided to renew its request to make modifications in Israel's Note in Appendix I. His delegation intended to enter into negotiations with Parties on this matter. It wished to maintain its right to require offsets at the level of 30 per cent for an additional period of time, and then to gradually reduce it to a specific, agreed upon level. His delegation understood that this could disrupt the balance of rights and obligations. Bearing this in mind and respecting the need to maintain an appropriate balance, his delegation stood ready to explore the possibility of making additional commitments in the framework of the market access negotiations of the GPA on issues such as coverage of entities, goods and services, thresholds, and on other elements subject to negotiation. He hoped that this mechanism would allow Parties to reach a new balance of rights and obligations for Israel. He noted that his delegation had already started to conduct bilateral meetings with a number of Parties. His delegation intended to complete the first round of bilateral meetings with the rest of the Parties within the next few weeks.

26. In conclusion, he stressed that maintaining offset rights was crucial for Israel so as to make the GPA a balanced and economically viable instrument for the Israeli industry and economy. His delegation hoped that this fact would be taken into account and accommodated in the framework of relevant discussions and negotiations. He was looking forward to working with other Parties on this matter in a constructive way.

⁴⁹ GPA/W/294.

27. The representative of the United States said that her delegation would review carefully the materials that Israel had provided and would consider Israel's request. She said that her delegation regarded offsets as a transitional measure, not as a permanent fixture to a Party's market access commitments. Her delegation would examine whatever proposals Israel would put forward in that light.

28. The representative of Canada thanked Israel for having provided the background information during the week and for having come forward in considerable time before the agreed extension deadline established in December 2004. She encouraged Israel to come forward with its specific proposal as soon as possible so that Parties had sufficient time to consider it fully. She reiterated her delegation's position expressed in December 2004 that offset provisions should be transitional in nature and that a proposal should come forward for their phase-out.

29. On the Chairman's suggestion, the Committee agreed to revert to this issue at its next meeting.

F. OTHER BUSINESS

(i) *Statistics*

30. The Chairman noted that, in line with the requirements of Article XIX:5 of the Agreement, statistics for 2001 and 2002 had been submitted by Japan⁵⁰, and that statistics for 2002 and 2003 had been submitted by Switzerland.⁵¹

(ii) *Thresholds*

31. The Chairman noted that, in accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies⁵², the following Parties had provided information on their threshold figures expressed in national currencies for the current year: Canada; the European Communities; Hong Kong, China; Israel; Japan; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; and the United States.⁵³

(iii) *Dates of meetings in 2006*

32. The Chairman suggested that, with the help of the Secretariat, he would start consulting with delegations on the dates for the Committee's meetings in 2006, and would table a proposal on this at the meetings scheduled for the week of 10 October 2005.

33. The representative of the European Communities said that he was grateful for the Chairman's proposal but that his delegation would first like to see how much progress could be achieved in the current year in order to determine at least the number of meetings in 2006.

34. The representative of the United States agreed with that point by the European Communities but said that, in order to be able to plan ahead, delegations would need to consider at least indicative dates at the meeting of October 2005.

⁵⁰ GPA/70/Add.3 and GPA/76/Add.3 of 5 July 2005, respectively.

⁵¹ GPA/76/Add.2 and GPA/80/Add.1 of 9 February 2005, respectively.

⁵² GPA/1, Annex 3.

⁵³ GPA/W/285-series.

35. The Chairman, in concluding the meeting, said that, as had been agreed at the meetings of 17 November 2004⁵⁴ and 16 December 2004⁵⁵, the Committee would hold its next meetings in the week of 10 October 2005. At that time, the Committee would have to adopt its annual report to the General Council, in which he hoped that it would be possible to record provisional agreement on the non-market-access-related portions of a revised text of the Agreement. He thanked all delegations for their contributions and for having sincerely engaged in the negotiations earlier during the week. He hoped that delegations could come to the meeting in October 2005 with clearer and more flexible positions on the remaining outstanding issues so that substantial further progress could be made at that meeting.

⁵⁴ GPA/M/24, paras. 99-100 and 104.

⁵⁵ GPA/M/25, para. 12.

ATTACHMENT

Chairman's Statement on Stocktaking and Future Work at the Informal Closing Session of 21 July 2005

At the opening session on Monday afternoon, we agreed to have an informal closing session at the conclusion of our work on negotiations this week, in order to take stock of progress and to consider next steps in the negotiations pursuant to Article XXIV:7.

A. Stocktaking

Let me now provide a brief overview of the work completed this week. We have dealt with two main items:

- (i) In regard to coverage issues, an informal meeting on Monday afternoon held a useful discussion on two subjects:
 - the state of play of the bilateral coverage negotiations and the question of a new time-frame for the submission of initial offers; and
 - so-called "horizontal" coverage matters, including the drafting of relevant provisions in the text of the Agreement.

On the state of play of the bilateral coverage negotiations and the question of a new time-frame for the submission of initial offers, it was noted that the deadlines for submission of initial offers have passed without any offers being received. Furthermore, there was a recognition that the preparation of offers has proven to be a more complex and time-consuming process than some Parties had foreseen. Recognizing this, the Secretariat was asked to prepare a draft decision amending the Committee's original decision on the modalities of coverage negotiations (GPA/79 of 19 July 2004). The draft decision would extend the deadlines both for submission of initial offers and for the overall completion of the negotiations. A first draft was circulated on Tuesday and, on Wednesday afternoon, comments were provided by delegations. On the basis of these comments, a revised draft of the decision has been circulated and will be considered for adoption in the formal meeting that will follow this informal closing session.

On horizontal coverage matters, delegations had before them a note by the Secretariat summarizing the discussion on horizontal issues held on 30 May 2005 (Job No. 4321/Rev.2(5082) of 15 July 2005). The discussion first considered a submission by Japan (Job No. 5105 of 15 July 2005) and related issues concerning thresholds and other matters that were raised by delegations. This was followed by drafting work on various market-access-related provisions throughout the revised text of the Agreement, including, but not limited to, the structure and content of Appendix I as proposed by the United States and attached to Job No. 4035, as well as certain provisions in the text of the Agreement relating to its coverage. The results of this work will be reflected in a new "clean text" which will be circulated by the Secretariat to serve as a basis of our further work.

The discussion on horizontal coverage matters was focused and showed a clear desire by delegations to make further progress in this area at our meeting in October. To facilitate this, it was agreed that the Secretariat would prepare a brief informal note summarizing the points made by delegations during the discussion.

- (ii) In regard to the second main area of focus of our work this week, namely the review of the non-market-access-related provisions of the Agreement, we have had intensive discussions over the last three days. The drafting work was based on the latest draft revised text circulated by the Secretariat (Job No. 4035 of 10 June 2005) as well as on a submission by the United States (Job No. 4948 of 11 July 2005) containing revised drafting proposals on two decisions to be adopted by the Committee pursuant to what is now Article XVI/XVII of the revised text of the Agreement (Modifications and Rectifications to Coverage). In addition, several delegations provided detailed and useful drafting proposals relating to various provisions of the Agreement, including Article VII (Information on Intended Procurements), Article XII (formerly *XIbis* on the Use of Electronic Means), and Article XVI/XVII (Modifications and Rectifications to Coverage). A number of these permitted us to eliminate brackets on portions of the text and to simplify the remaining "NBs" in the text.

In regard to most provisions of the revised draft of the Agreement, the drafting work took a sequential approach. On Wednesday afternoon, Articles XVI/XVII (Modification and Rectifications to Coverage) and Articles XVIII/XIX (Consultation and Dispute Settlement) were discussed with the benefit of participation by some Parties' legal experts.

The discussions on all these elements of the text led to the inclusion in the "clean text" of new written proposals in addition to comments and suggested wording by delegations. These developments will be reflected in the updated version of the draft revised text of the Agreement to be prepared by the Secretariat.

Overall, I believe it is important to recognize that the text has been streamlined and simplified in a number of areas, even though it is also true that our discussions seem to show in some areas the need for the input of significant new flexibility for further progress to be made. The preparatory discussions that took place between key delegations in advance of the meeting were essential to our progress.

As I have mentioned, there appear to be a number of specific provisions regarding which further flexibility will be needed if Parties are to reach an eventual agreement on the revised text. For example, and without purporting to be exhaustive, some of the specific issues concerning procurement rules and procedures where additional flexibility is needed would include:

- the way in which compliance with the Agreement or specific provisions thereof should be spelt out in Article II:6/7, including the question of whether the onus on Parties should or should not be explicitly limited to measures deemed to be reasonably available in the circumstances;
- the application of the requirement to publish a summary notice in circumstances where full information is already provided in an official WTO language (Article V:3);
- a number of points concerning the provisions on technical specifications (Article VII);

- deadlines and their reduction in various circumstances (Article VI); and
- the question of how and where issues concerning electronic procurement should be addressed in the revised agreement.

In all of these areas, I think it is important to recognize that the differences in viewpoints expressed by delegations reflect legitimate differences in their perceptions of how the Agreement should work and, in many cases, also differences in national practices. In some cases, delegations have already gone some distance to highlight the linkages between provisions in various parts of the text and to signal the ways in which changes in particular areas would make it possible to reach agreement in others.

Finally, as mentioned at the beginning of the week, delegations have had an opportunity to continue their bilateral discussions on coverage issues pursuant to the Decision on Modalities in the margins of the week's work.

B. Future work

As to the future, it will be important to continue to make further progress on all fronts of our negotiations if we are to conclude the negotiations in a timely fashion.

There seems to be a general will on the part of delegations to reach provisional agreement on the non-market-access-related provisions of the revised text of the Agreement before the Hong Kong Ministerial Conference. In this regard, I would remind delegations that only one meeting, the one scheduled for the week of 10 October, remains to meet this objective. To achieve the desired result at that meeting, it will be necessary for interested delegations to build on the progress made at this meeting and to undertake further intensive consultations in advance of the meeting, both in capitals and between them. Wherever possible, proposed solutions should be reflected in written submissions.

As regards the bilateral coverage negotiations and the submission of initial offers, at the formal meeting which will take place after this informal session, we will consider the revised version of the draft decision on relevant deadlines. This draft decision would require that "each Party shall table its initial offer prior to the October meeting of the Committee (week of 10 October 2005) but not later than the Hong Kong Ministerial Conference (13-18 December 2005)". Furthermore, it would stipulate that overall negotiations pursuant to Article XXIV:7 "aim to be concluded by the end of 2006". Assuming that the decision is adopted, it will be of vital importance to the success of the negotiations that delegations respect the new deadline for the submission of initial offers.

As to the horizontal aspects of the coverage negotiations, it will be important to build on the progress made so far in terms of both the market-access-related provisions in the text and other horizontal coverage matters listed in the Decision on Modalities. Delegations are encouraged to come forward with new submissions on these matters.

As to the organization and structure of our next meeting, which is scheduled for the week of 10 October, I would suggest that the Committee continue in a way broadly similar to that we have used so far. In particular, it would be important to have a further discussion of the horizontal coverage matters. In addition, substantial further progress is needed in the review of the outstanding non-market-access-related provisions. To achieve this, I propose that at least four full days of the week of 10 October be allocated to drafting work on the non-market-access-related provisions. Delegations should also have an opportunity for bilateral consultations on coverage issues, at least on the margins of the meeting.

With the help of the Secretariat, I will consult further with you on these matters as we get closer to the meeting and, following the usual procedure, will circulate more detailed suggestions in advance. Let me also ask delegations to submit any new proposals sufficiently in advance of our next meeting so that other delegations will have an adequate opportunity to reflect on them.

I of course stand ready to conduct consultations and take initiatives as may be appropriate, to help ensure that the text is as far advanced as possible ahead of the Hong Kong Ministerial Conference.

13 April 2005

(05-1521)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 14 MARCH 2005

Chairman: Mr. Niklas Bergström (Sweden)

1. The Committee adopted the following agenda, as outlined in Airgram WTO/AIR/2519 of 25 February 2005:

A. Election of Chairman for 2005

B. Other Business.

A. ELECTION OF CHAIRMAN FOR 2005

2. The Committee elected Ambassador Tae-yul Cho (Korea) as its Chairman for 2005, with effect as of the end of the week.

B. OTHER BUSINESS

(i) *Statement by Israel*

3. The representative of Israel thanked all Parties of the GPA Committee for the constructive way in which they had dealt with the issue of offsets and Israel's needs in that regard. The Decision taken by the Committee in December 2004¹ had given all Parties extra time to reflect on their needs regarding offset requirements and how the Agreement on Government Procurement should address this issue.

4. Israel's statement to the Committee at the meeting of 17 November 2004² had outlined the main features of the structure of the Israeli economy and the fact that the vast majority of firms in Israel were small and medium-size enterprises (SMEs). Studies undertaken for the preparation of that submission had generally shown that, due to their size, Israeli SMEs were effectively excluded from the government procurement tenders of other GPA Parties. Entering into the tenth year of Israel's participation in the GPA, his delegation was under the impression that government procurement markets were dominated by large corporations and firms. Israeli authorities had recently decided to initiate a thorough research project in order to study the effects of participation in the GPA on the Israeli economy, in particular on Israel's trade balance, industry, employment and development.

¹ GPA/83 of 17 December 2004.

² GPA/M/24, paras. 65-80.

5. Similarly to other Parties, Israel recognized the importance of the GPA as an agreement securing more transparency and efficiency in procurement processes. At the same time, Israel also recognized that, when dealing with public needs and funding, all aspects and interests had to be duly addressed. An agreement on government procurement that did not reflect a balance of interests for all Parties would never be able to expand its membership. His delegation felt that the Committee should be aware of this reality and should put in place appropriate instruments that would enable Parties with economies dominated by SMEs to benefit from the Agreement. The use of limited and transparent offset requirements in government tenders was one example of such an appropriate instrument. As his delegation had explained several times, it viewed offsets as a means to facilitate industrial cooperation between world-class foreign bidders and capable local industry, to the benefit of both Parties. At the same time, his delegation did not exclude the possibility of using other instruments and mechanisms besides offsets.

6. During the process of renegotiating the provisions of the Agreement on Government Procurement, the Committee had an opportunity and an obligation to deal with the inherent imbalance in the Agreement. The Committee should not ignore the fact that membership in the Agreement had remained virtually unchanged during the years. By incorporating the appropriate measures into the Agreement, the Committee would send a positive signal to WTO Members that had hitherto not joined this important Agreement. Israel was working in this direction and was open to working together with other Parties in order to find constructive solutions to the current situation. His delegation considered it to be essential to find such solutions, and hoped that all Parties understood the urgency of this issue for Israel and the Agreement in general, and would join Israel in trying to find an acceptable way to deal with the requirements of Parties such as Israel with respect to offsets, so that a balanced Agreement could be achieved for all Parties.

7. The Committee took note of the statement made by Israel.

(ii) *Future work with regard to negotiations pursuant to Article XXIV:7(b) and (c)*

8. The representative of the European Communities said that the Committee had made much progress in the negotiations pursuant to Article XXIV:7(b) and (c) of the Agreement, and that it needed to maintain that momentum in order to finish the review of the text of the Agreement as soon as possible. Parties should aim at finishing the review of the text of the Agreement by summer 2005 but, in any event, not later than October 2005 in view of the Ministerial Conference to be held in Hong Kong, China at the end of 2005.

9. The representative of the United States agreed that Parties should aim to finish the revision of the text of the Agreement by the summer, although she noted that there were some issues that it might not be possible to resolve by that time. With regard to the overall timetable for the negotiations pursuant to Article XXIV:7, she emphasized the importance of completing the negotiations no later than the end of 2006, in line with the scheduled conclusion of the Doha Round. Accordingly, while ideally the Committee would focus on market access negotiations after it had finished revision of the text, the text work was sufficiently advanced that the two processes could proceed in parallel, if necessary.

10. The representative of Japan supported the proposals made by the representatives of the European Communities and the United States. He noted that the bilateral request/offer negotiations had now begun in earnest, and that without political impetus no progress would be achieved in that process. This was a reality of trade negotiations. A realistic view had to be taken with regard to negotiations on the Agreement on Government Procurement.

11. The representative of Israel said that he would convey the proposals of the European Communities and the United States to his authorities. His delegation had some concerns in regard to making too strong a link with the Ministerial Conference to be held in Hong Kong, China as prior to the Conference most of his delegation's resources would be focused on preparations for the Conference and on the Doha Development Round, which would accelerate towards July 2005 and in particular in the second half of 2005. While recognizing the importance of the GPA negotiations, a small delegation like his could not necessarily keep up with the proposed pace of the negotiations.

12. The representative of Korea agreed with the European Communities, the United States and Japan as to the proposed schedule of work. It was reasonable to follow the timing of the DDA negotiations even if the renegotiation of the Agreement on Government Procurement was not part of the DDA.

13. The representative of Canada agreed that Parties should strive to complete the review of the text of the Agreement by summer 2005, while recognizing that this might not mean that Parties were able to reach an agreement on every single item as there were several that were linked to the outcome of the market access negotiations. Accordingly, the Committee should have a renegotiated text by July, even if it included some issues that would need to be set aside pending the market access negotiations, as all Parties would by then have their resources focused on the upcoming Ministerial Conference. As to the market access negotiations, which by 2007 would have been under way for a decade, she noted that the current deadline was January 2006, and that the proposal by the United States constituted an extension of that timetable. If the Committee believed that such additional time was needed, her delegation was prepared to agree to that. In any event, the Committee needed to redouble its efforts to produce a result in a suitable time-frame.

14. The representative of Switzerland supported the proposals by the European Communities and the United States, and said that the proposed time-frame was reasonable.

15. The representative of the European Communities said that he was pleased to hear Parties' positive response to the proposed deadline of summer 2005 for completing the renegotiation of the text of the Agreement. In response to the concerns of Israel, he said that his delegation was willing to address any problem that Parties might raise during the renegotiation process. He added that the proposal by the United States regarding the timing of the negotiations was understandable as it might be difficult to conclude the overall negotiations pursuant to Article XXIV:7 of the Agreement by January 2006, as foreseen in the Decision on Modalities.³ However, he suggested that, for the time being, the Committee make all possible efforts to meet that agreed deadline, and that if it arrived at a point where the situation had to be reassessed, the Committee consider the proposal of the United States regarding a revised overall deadline of the end of 2006 at that stage.

16. The representative of the United States said that her delegation also continued to favour the deadline of January 2006 for the overall completion of the negotiations pursuant to Article XXIV:7 of the Agreement. However, she pointed out the need to be realistic. The Committee had failed to meet several deadlines over the years, and her delegation was of the view that all aspects of the negotiations pursuant to Article XXIV:7 of the Agreement had to be completed at the very latest by the conclusion of the Doha Round. She suggested that without a commitment to finish the negotiations by the end of the Doha Round; it was not clear when the Committee would be able to conclude the negotiations.

³ GPA/79 of 19 July 2004.

17. The representative of the European Communities said that it fully agreed with the United States that the negotiations pursuant to Article XXIV:7 had to be completed by the end of the Doha Round at the very latest, that being the ultimate deadline.

18. The Committee took note of the proposals made by the European Communities and the United States, and of the comments made by other Parties.

(iii) Jordan's statement on its accession to the Agreement

19. The representative of Jordan said that, since the last meeting of the Committee, his delegation had worked hard to complete its second revised offer, which it had intended to submit prior to the current meeting. Regrettably, his delegation had not been able to finalize that offer, although it had made good progress in that direction:

- (a) His delegation had been working on the comments and questions raised at the last plurilateral consultations, and had responded to most of these in a positive way.
- (b) In the context of the deliberations of Jordan's National Committee, the private sector, in particular the pharmaceutical industry, the Chamber of Commerce, the Chamber of Industry and various contractors had expressed serious concerns regarding the possible negative impact of the Agreement on their businesses and on the Jordanian economy. Additional discussions were necessary to address such concerns.
- (c) The issue of including in Jordan's second revised offer non-sensitive procurement by the Ministry of Defense and the Ministry of the Interior had led to some complications, given the overlap between sensitive and non-sensitive material. This question was still under consideration by the relevant ministerial committee.
- (d) The legal status of the Aqaba Special Economic Zone also was not a straightforward issue, since there were multiple organizations involved in handling business in that zone. This issue would be addressed by competent authorities and progress would be reported to the Committee.
- (e) A regional workshop on government procurement had been organized by the WTO Secretariat and the Government of Jordan in Amman. It was attended by more than 50 delegates representing 19 Arab States and others from the region. The Jordanian experience in acceding to the GPA had been presented and a number of Arab delegates had requested that workshops be held in their countries to further discuss the Jordanian experience.

20. In the light of the above developments, it had turned out to be impossible to finalize and submit Jordan's second revised offer prior to the meeting. Jordan looked forward to submitting the second revised offer to the Committee in the near future, once the official approval of the Government and other internal procedures had taken place, which his delegation hoped would occur in the coming weeks. As to the review of Jordanian government procurement legislation, he said that the draft unified procurement law had been completed by the relevant committee, and had been submitted to the Government prior to undergoing the relevant constitutional procedures.

21. He concluded by mentioning that his delegation would take advantage of its stay in Geneva to hold bilateral consultations with some interested Parties.

22. The Committee took note of the statement made by Jordan.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 16 DECEMBER 2004

Chairman: Mr. Niklas Bergström (Sweden)

1. The Committee adopted the following agenda, as outlined in Airgram WTO/AIR/2458 of 29 November 2004:

- A. Israel's Proposed Modification Pursuant to Article XXIV:6(a) (GPA/MOD/ISR/1)
- B. Other Business

A. ISRAEL'S PROPOSED MODIFICATION PURSUANT TO ARTICLE XXIV:6(a) (GPA/MOD/ISR/1)

2. The Chairman noted that Document GPA/MOD/ISR/1, dated 19 November 2004, contained a communication from Israel with proposed modifications to Israel's Note on offsets pursuant to Article XXIV:6(a). He understood that there had been informal consultations between interested delegations, leading to the presentation of a draft decision for adoption by the Committee.

3. With the Chairman's introduction, the Committee adopted the Decision.¹

4. The Chairman opened the floor for statements on the Decision.

5. The representative of Israel expressed his appreciation to all Parties for the co-operation and good will shown during this process, considering particularly the short time Parties had had to analyse Israel's notification. He thanked the Chairman and the Secretariat for their assistance and availability. He said that the decision gave a short-term relief to an immediate need of Israel and, as such, it was an important step that showed how the evolving needs of Parties were taken into account in the context of the Agreement on Government Procurement. His delegation intended to continue the discussion on its offset rights in the course of 2005 with the objective of reaching a mutually agreed solution that would take into account the needs of Israel and all Parties with a view to reaching a new balance of rights and obligations.

6. Other delegations also expressed their thanks to Israel and the other Parties for the good co-operation over the previous weeks. The representative of the United States said that his delegation, as an exceptional measure, did agree to the one-year extension of Israel's commitments to reduce its offsets from a 30 per cent level to 20 per cent level on 1 January 2005. His delegation recognized that it had the right to seeking compensatory adjustment from Israel for the one-year extension of Israel's obligation to reduce its offsets from 30 per cent to 20 per cent. However, his delegation would not seek such an adjustment at this time. He said that, with the Committee's approval of the one-year extension of Israel's offset obligation, Israel would have been allowed to maintain offsets for 15 years.

¹ Subsequently circulated as document GPA/83, dated 17 December 2004.

Thus, it was appropriate that after the end of the one-year extension Israel finally end its use of offsets. As offsets undercut core objectives of the Agreement on Government Procurement, they should be used only as transitional measures, and not as permanent fixtures of a procurement regime. An indefinite maintenance of offsets did not set a helpful precedent for other WTO Members that might accede to the Agreement on Government Procurement.

7. The representative of Canada said that his delegation was agreeing on an exceptional basis to this extension for one year, a fact which was noted in the preamble of the Decision. His delegation was looking forward to Israel coming forward sufficiently in advance of the end of 2005 with a plan to address the future of this provision, with a view to establishing a clear phase-out of the offset in accordance with the commitments in Israel's Appendix I.

8. The representative of Japan welcomed the Committee's Decision based on mutual agreement between Israel and other Parties regarding Israel's Note to Appendix I. His delegation hoped that Israel could overcome any difficulties and move towards a stable economic situation, so as to implement the agreed commitment.

9. The representative of Korea said that his delegation had determined to join the consensus for this measure, and hoped that Israel would make all efforts to conform to the Decision. He believed that this case had some implications for non-Parties to the Agreement on Government Procurement. His delegation wished to see a more positive and constructive discussion in 2005, when the Committee would consider again Israel's offset matters.

10. The representative of the European Communities said that his delegation had agreed to join this consensus on the terms set out in the Decision, which accurately reflected the state of the discussions and the state of his delegation's view of the matter. His delegation expected to be discussing this whole subject during the course of 2005, in the context of the Committee's wider discussions. He hoped that Parties could undertake these discussions in a more measured and less stressful way than had been the case. The co-operation that had taken place between Parties in the previous weeks had enabled that situation to be overcome, but this time in 2005 delegations would perhaps not be in quite the same situation.

11. The Committee took note of the statements made.

B. OTHER BUSINESS

Meetings in 2005

12. Turning to other business, the Chairman noted that at the previous meeting, the Committee had discussed the meeting dates for 2005, and had agreed on the weeks of 14 March, 30 May and 10 October 2005. However, the date of the meeting proposed for July 2005 had been left outstanding. The third meeting in 2005 was now scheduled for the week of 18 July, since consultations had confirmed that no delegation had a problem with that date.

Status of GPA observers in the context of bilateral coverage negotiations

13. Taking up the status of GPA observers in the context of bilateral coverage negotiations, the Chairman noted that, according to the Decision on Modalities, "[a]ny observer government which has submitted an offer with a view to participating in the revised Agreement may participate in this aspect

of the negotiations and receive copies of requests and offers circulated by the Secretariat.”² In light of this, it might be useful for any observer so wishing to clarify whether they wished to participate in the bilateral coverage negotiations.

14. The representative of Jordan said that his delegation was wondering about the status of WTO Members negotiating their accession to the Agreement on Government Procurement in the bilateral coverage negotiations; in particular, whether participation by GPA observers in accession to the Agreement on Government Procurement would entail the possibility of making requests to Parties or just to receive requests and offers from Parties.

15. The Chairman said that GPA observers participating in the bilateral coverage negotiations would be able to put forward requests but also receive requests.

16. The Secretariat said that it would circulate copies of the requests that were going to be submitted with regard to any observer that had opted to participate in the bilateral coverage negotiations. He was wondering whether the representative of Jordan suggested that the offer that Jordan had already submitted in the context of its accession to the Agreement on Government Procurement should be considered an offer with a view to participating in the revised Agreement, and whether, therefore, Jordan would want to be a participant in this aspect of the coverage negotiations.

17. The representative of Jordan said that the preliminary answer was in the affirmative, and he expected to be sending a note saying that Jordan would be participating in the bilateral coverage negotiations.

Circulation of requests in the bilateral coverage negotiations

18. As a related issue, the Chairman noted that requests and offers were circulated in a new document series (GPA/O/country code/number). This would facilitate access to negotiating documents in the future, as well as compliance with the Decision on Modalities, which reserved bilateral coverage negotiations to 'participants', i.e. to Parties and to only those observers that "ha[ve] submitted an offer with a view to participating in the revised Agreement."³ Further, he said that it was planned to circulate requests only in the language(s) in which they had been submitted to the Secretariat. Thus, the Secretariat was not intending to systematically translate requests into all official WTO languages. However, the Secretariat would be ready to arrange for the translation of such documents based on specific requests from any participant in the bilateral coverage negotiations.

² GPA/79, dated 19 July 2004.

³ *Id.*

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 17 NOVEMBER 2004

Chairman: Mr. Niklas Bergström (Sweden)

1. The Committee adopted the following agenda, as outlined in Airgram WTO/AIR/2427/Rev.1 of 5 November 2004:

- A. Negotiations under Article XXIV:7
- B. Modifications to the Appendices to the Agreement
- C. Accessions
- D. Review of National Implementing Legislation
- E. Israel's Commitment in Relation to Offsets
- F. Adoption of the Annual Report
- G. Other Business

A. NEGOTIATIONS UNDER ARTICLE XXIV:7

2. Summarizing work undertaken since the formal meeting of the Committee on 23 April 2004, the Chairman reported that the Committee had held two informal meetings, in June and October 2004, addressing non-market-access-related provisions in the text of the Agreement. The results of drafting work at the latter meeting were reproduced in the updated 'clean' version (Job No. 7315 of 28 October 2004) and 'side-by-side' version (Job No. 7317 of 28 October 2004) of the revised text of the Agreement. His summary of negotiations during that meeting had been circulated electronically on 8 October 2004.

3. As to elements 2 and 3 of the work programme, on 8 October 2004 the Committee had held a first session of negotiations on the extension of coverage and the elimination of discriminatory measures and practices. In accordance with the Decision on the Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices (GPA/79 of 19 July 2004), that session had taken up matters that were to be addressed in the Committee as a whole. In particular, the session had provided an opportunity to hold a preliminary discussion on a submission by Japan (Job No. 5582 of 26 August 2004). Delegates had also had before them a List of Papers Relating to the Elimination of Discriminatory Measures and Expansion of Coverage, which the Secretariat had been requested to prepare (Job No. 6685 of 7 October 2004), and which had been subsequently updated (Job No. 6685/Rev.1 (7734) of 11 November 2004). Upon the request of Parties, the Secretariat had prepared a summary of that first session (Job No. 6910/Rev.1 (7076) of 20 October 2004).

4. As indicated in the Airgram and the Chairman's communication sent to delegates by fax on 19 October 2004, the formal meeting had been preceded by a second informal session on matters that, pursuant to the Decision on Modalities, were to be addressed in the Committee as a whole. Further to the request made at the informal session, a summary of the discussions would be prepared by the Secretariat in due course. These matters would be next taken up at the first Committee meeting in 2005. The Chairman proposed that the Committee reserve sufficient time during that meeting for an in-depth discussion of those horizontal matters.

5. The representative of Japan believed that the Committee had had a good discussion on that item at the informal session earlier that day. Although there had been divergent views on some points, his delegation believed that all Parties shared the importance of the horizontal issues to be negotiated in the Committee as a whole. Those issues were essential to facilitate the upcoming bilateral negotiation process. His delegation thanked the Chairman for holding the morning informal session and the Secretariat for preparing a summary of that informal meeting, which would be helpful in sharing the discussions with capital-based experts. He hoped that after reflection on the meeting, the Committee would be able to make progress in market access negotiations as a whole.

6. He went on to emphasize three points. First, his delegation would make every effort and continue to actively participate in ongoing negotiations. Second, he reiterated that Parties concerned would need to make every effort to resolve pending notifications pursuant to Article XXIV:6, as set out in the Decision on Modalities. His delegation continued to make its best effort and urged all Parties concerned to co-operate in solving the long-pending issues as soon as possible. The matter was not merely a case of individual notification but the Committee as a whole was facing a systemic issue. Third, his delegation was looking forward to having some model format for requests and offers and appreciated that the Chairman was willing to provide an informal paper regarding possible headings of requests.

7. The representative of the United States agreed with Japan that the horizontal issues were important and he was looking forward to a discussion on them and to them being addressed by some, if not all, of the Parties in their initial requests. His delegation felt that after seeing those requests, the Committee would be in a better position to determine, not on an abstract or educational, but on a practical basis, the most effective way of addressing concerns as they arose. To reiterate a few points that he had made at the informal session, he said that, while uniform coverage would be an objective, it should not be an obligation. With respect to the structure of Annexes, he supported the notion of a common approach, but the lack of such an agreement or any guidelines at that point should not deter progress in the negotiations. He suggested that each Party use the format that would work best for it at that time, thus making it easier for Parties to submit their requests and offers on time.

8. The representative of Canada said that his delegation shared Japan's interest in the Committee addressing horizontal issues as that was going to be an important part of market access negotiations. As to the interest of Japan in getting some ideas on what other Members were doing in terms of format for their requests and offers, he noted that the Committee would have an opportunity to talk about the format of offers at future meetings. Nevertheless, it would not have that opportunity as regards requests before the deadline for submitting initial requests at the end of the month. If Japan could benefit from any assistance that the Chairman could provide them, it would certainly be welcome for Japan. His delegation's process for preparing its requests was well under way. Thus, his delegation would not be able to benefit from any proposed models or formats, which might come from the Chairman or the Secretariat, as timing would simply not allow that. That said, his delegation would be willing at any time to consult informally with Japan or any other delegation if they were seeking advice on questions as to how his delegation intended to formulate its requests. His delegation expected to submit its request by 30 November, and hoped that other Members would also; in the meantime, his delegation was more than willing to speak to any Party if they had specific questions.

9. The representative of Korea appreciated the Chairman's initiative to suggest a short informal list to be taken into account in the preparation of requests. His delegation wished to participate in the market access negotiations. Raising a few specific points to be taken into account in future negotiations, he said that, although there was no consensus on the idea of guidelines, Parties had to bear in mind that a common understanding of some points, such as a uniform level of coverage or at least some direct criteria for including local government in Annexes, was an important factor to be taken into account in negotiations. Further, to enhance transparency and to strike a balance of rights and obligations, there was a need to address the presentation of each Annex, and to have some common understanding on using a positive list approach at least in Annexes 1-3.

10. The representative of the European Communities emphasised the importance of all the horizontal issues listed in the Decision on Modalities. Her delegation was looking forward to discussing them at forthcoming Committee meetings. She stressed the need to be ambitious in the forthcoming coverage negotiations because ample room for improvement remained under the existing Agreement. Her delegation had taken this ambitious position since it had started to discuss the forthcoming coverage negotiations.

11. In conclusion, the Chairman suggested that, as the representative of Canada had pointed out, it might be perhaps too late to try to agree on some kind of a model format for requests because the deadline was coming up soon. Nevertheless, he was available as a facilitator if any delegation felt he could help. He reiterated that, if delegations had written comments on horizontal matters, those would be most welcome, so that more papers would be available for future discussions, which could take place in parallel with market access negotiations.

12. The Committee took note of the Chairman's report and of the statements made.

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Modifications certified since the meeting in April*

13. The Chairman noted that since the last meeting of the Committee discussing modifications to the Appendices to the Agreement on 23 April 2004, various modifications had become effective. Detailed information on these modifications was available in paragraphs 5 and 6 of the annotated agenda for the meeting (Job No. 7843 of 2 November 2004).

(ii) *Outstanding modifications*

14. The Chairman noted that proposed modifications by Japan remained outstanding with respect to the following entities:

- (a) NTT;
- (b) East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company;
- (c) Railway Construction Public Corporation and Corporation for Advanced Transport and Technology;
- (d) Japan Consumer Information Center, Water Resources Development Public Corporation, Japan Green Resources Corporation, the Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, the Association for Welfare of the

Mentally and Physically Handicapped, and National Agriculture Research Organization;

- (e) National Aerospace Laboratory;
- (f) Social Welfare and Medical Service Corporation and Japan Institute of Labour; and
- (g) proposed modification to Annex 3 of Japan's Appendix I.

15. The Chairman pointed out that the details of notifications with regard to such outstanding modifications, as well as the developments, if any, since the meeting of the Committee in April 2004, were contained in the annotated agenda. He also mentioned that since the annotated agenda had been circulated, Japan had notified a further proposed modification, namely concerning the National Center for Industrial Property Information and Training (GPA/MOD/JPN/16 of 9 November 2004). He noted that Japan had submitted a paper relating to the first two of the above proposed modifications (GPA/MOD/JPN/17 of 15 November 2004).

16. Upon the request of the representative of Japan, the Committee discussed these outstanding proposed modifications by Japan item-by-item.

NTT-Communications

17. As to the proposed modification concerning NTT-Communications, the representative of Japan pointed out that his delegation had submitted the proposed modification in 1999. It was unusual that such a long-pending issue had not been resolved, and there had not been any progress since February 2003. His delegation strongly requested that the objecting Party provide updated information and withdraw its objection immediately.

18. The representative of the European Communities, in response to the request by Japan, said that the NTT-Communications file was still under consideration. She expected to have a more positive view on this file in the light of new developments in the sector but such a decision would need to be based on mutual agreement with Japan.

19. The representative of Japan thanked the European Communities for the explanation. His delegation had carefully taken note of the comments made by the European Communities, and wished to continue conducting bilateral talks with the European Communities. He noted that he would convey the points made by the European Communities to his capital-based experts and come back to this issue in the future.

East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company

20. As to Japan's proposed modification concerning the three railway companies, another representative of Japan introduced his delegation's recent submission on pending modifications (GPA/MOD/JPN/17). The Decision on Modalities adopted on 16 July 2004 stated that "Parties concerned will make every effort to resolve pending notifications." He stressed that there were long-pending notifications despite the provision of ample information to Parties concerned through the numerous questions & answers sessions and a series of oral explanations. These issues should not be carried over to the revised Agreement.

21. He noted that the proposed modifications concerning the three Japanese railway companies and NTT-Communications were typical examples in this context. He stressed that the influence of the Government of Japan on the three railway companies and NTT-Communications had already been effectively eliminated, and was considered as being at the same level as that of other private

companies. Even if it was necessary to examine the notifications carefully, too much time and effort had been spent in order to respond to endless questions and it was too much of a burden for the notifying Party.

22. His delegation believed that one reason for having such long-pending notifications was the way those were addressed in the current Agreement. Therefore, his delegation sought to establish new, speedy and effective procedures, such as arbitration procedures, in order to prevent these pending issues from arising under the revised Agreement.

23. Carrying over these pending issues to the revised Agreement was not appropriate. He stressed that his delegation had been and would be making every effort to solve these issues. Should these four long-standing notifications unfortunately not be effected by the time the revised Agreement came into force, his delegation would be obliged to understand that it would be most appropriate to consider these four pending cases as cases that had been withdrawn from the relevant Annex.

24. He reiterated the firm determination of his delegation to make its best effort to solve this issue and wished to ask other Parties to make the same effort and sought their co-operation in solving these long-pending issues.

25. As an additional specific comment on the Japanese railway companies, he mentioned that the position of his delegation was clearly stated in the paper that he had just introduced. His delegation was convinced that it had provided sufficient information in good faith to settle this matter. His delegation requested the United States and the European Communities to seek a speedy solution to this extremely long-standing issue. His delegation believed that it had been most sincere and forthcoming in answering all questions to the full – repeatedly over three years. Nevertheless, his delegation had been placed under extreme duress by not receiving appropriate responses over these three years. Especially, as regards the European Communities, although his delegation had requested it to specify the reasons for its objection, the European Communities had only reiterated questions, including ones that were not necessarily relevant to government control and influence. He noted that last June his delegation had submitted written answers to the fourth set of questions from the European Communities. Moreover, a responsible official from the relevant Ministry had visited Brussels in person to provide the European Communities with all the necessary information. Four months had passed since then, and his delegation considered that there had been already enough time for the European Communities to assess the responses and clarifications provided by Japan. His delegation expected no more questions from the European Communities and requested the European Communities to let it know the exact situation as regards its consideration of this critical matter. In order not to carry over this issue to the revised Agreement, his delegation strongly requested the European Communities and the United States to withdraw their objections expeditiously.

26. The representative of the European Communities thanked Japan for its recent submission. Her delegation shared the position expressed by Japan about the need to work as expeditiously as possible on Article XVI in the draft revised text of the Agreement and to come up with an improved Article as regards both substance and procedural guarantees. She emphasized that as long as an objection on a specific notification had not been lifted, her delegation understood that the entity in question was still included in the relevant Annex of the Party concerned.

27. Commenting on the specific case of the Japanese railway companies, she noted that her delegation had exchanged views, questions and answers with Japan on this. The European Communities had also conducted an extensive round of internal consultations. Her delegation still believed that the conditions under Article XXIV:6 of the Agreement for the withdrawal of the Japanese railway companies from the relevant Annex were not met, but it was willing to co-operate and further discuss this matter with Japan.

28. The representative of the United States also thanked Japan for its recent paper and said that his delegation was still reviewing it.

29. The representative of Japan thanked interested Parties for their explanations and clarifications. He requested the European Communities to provide concrete reasons for not withdrawing its objection to this issue. He noted that his delegation was willing to engage in further discussions or negotiations with interested Parties.

Other outstanding modifications proposed by Japan

30. As regards the other outstanding notifications, the representative of Japan mentioned that his delegation had submitted responses to the questions in September and hoped that the Parties concerned would finalize their examinations expeditiously. He was looking forward to receiving positive responses from objecting Parties, and urged Parties concerned to focus on the essential questions, should they seek further clarifications.

31. As regards other Japanese entities that had yet to submit answers to objecting Parties, his delegation was preparing responses and hoped to submit responses as soon as those were finished.

32. In any event, his delegation wished to sound the alarm that any pending notifications would be a serious problem. Therefore, his delegation urged all relevant Parties, including Japan itself, to make further efforts and co-operate towards the resolution of these pending issues. His delegation hoped that all Parties as well as the relevant experts in capitals shared this important message.

33. The representative of the European Communities thanked Japan for its answers to the questions posed by her delegation. Her delegation was examining the answers, and would come back to Japan as soon as possible. Her delegation wished to show its willingness to come up with a satisfactory solution on the overall set of notifications from Japan.

34. The representative of the United States thanked Japan for its most recent answers and said that his delegation was in the process of examining those answers.

Outstanding modifications proposed by other Parties

35. Turning to outstanding modifications proposed by other Parties, the Chairman noted that there was a proposed modification by Korea concerning Korea Telecom as well as a notification by the United States concerning proposed modifications to reflect changes in the administrative structure of the Federal Government as regards the Uranium Enrichment Corporation. The details of notifications concerning such outstanding modifications, as well as the developments, if any, since the meeting of the Committee in April 2004, were contained in the annotated agenda.

36. The representative of Japan said that the previous month his delegation had withdrawn its objections with regard to the notification by the United States concerning proposed modifications to reflect changes in the administrative structure of the Federal Government, except for the Uranium Enrichment Corporation. His capital-based experts were carefully examining the notification as regards this latter, remaining entity. As stated earlier, his delegation would try to make its best effort to conclude this matter as soon as possible.

37. The representative of the United States said, following up on Japan's comments, that his delegation was looking forward to Japan's favourable decision on this matter. Should Japan need additional information, his delegation would be happy to respond. The same applied to the European Communities, which was the other Party that was still objecting to the withdrawal of the Uranium

Enrichment Corporation. If the European Communities had additional questions, his delegation would be happy to answer those.

38. The representative of Korea, concerning the proposed modification relating to Korea Telecom, noted that since his delegation had circulated its notification in September 2002, it had conducted constructive bilateral negotiations with interested Parties, especially with the United States, the European Communities and Canada. As a result, almost all concerns had been resolved, and the United States and the European Communities had withdrawn their objections concerning Korea Telecom, which his delegation appreciated. There was still one remaining objection from Canada, which his delegation had tried to resolve on many occasions. While not wishing to reiterate the details of the process, he said that his delegation had submitted the proposed withdrawal of Korea Telecom from Appendix I on the grounds that government control and influence had been effectively eliminated. His delegation was urging Canada's early responses to that. He also noted that the General Notes to Appendix I of Korea stated that "for goods and services (including construction services) of Canada and suppliers of such goods and services, this Agreement does not apply to procurement by the entities listed in Annexes 2 and 3." For this reason, his delegation believed that Canada did not have a substantial interest in the withdrawal of Korea Telecom from Annex 3 and that it was inappropriate for Canada to maintain its objection given the absence of its substantive interest in this entity. His delegation was ready to discuss this matter on every possible occasion and was looking forward to an early conclusion.

39. The representative of Canada, in response to the intervention by Korea, noted, as a point of principle, that his delegation did believe that its objection was based both on interest and on principle. This was an important issue for the Government of Canada. His delegation had received information from Korea in mid-October, and had had regular and frequent contacts with the Korean Government, as recently as the previous day, when in Ottawa a member of the Korean Embassy had come to speak to Canadian technical experts. A further meeting was scheduled for 7 December. His delegation was actively engaged with Korea on this issue and was proceeding expeditiously with the information received from Korea. The frequency of meetings was evidence of his delegation's commitment to engage with Korea to try to find a mutually satisfying resolution to this issue.

40. The representative of Korea thanked Canada for its response. He was concerned that Canada might be linking the withdrawal of Korea Telecom to the bilateral Telecommunications Equipment Procurement Agreement. His delegation appreciated Canada's constructive approach to resolving this bilateral agreement, but believed that the matter of Korea Telecom could be tackled on the grounds of the relevant provisions of Article XXIV:6(b) of the Agreement, notably whether government control and influence had been effectively eliminated. Accordingly, his delegation could not accept any kind of linkage between other bilateral agreements and this issue.

41. In response, the representative of Canada said that he did not consider it appropriate for Korea and Canada to engage in bilateral negotiations during a plurilateral meeting.

42. The Committee took note of the statements made.

C. ACCESSIONS

Georgia

43. The Chairman noted that Georgia had sought accession in October 2002 (GPA/71), had replied to the GPA/35 checklist in April 2002 (GPA/W/187), and had submitted its entity offer in December 2003 (GPA/SPEC/34). The Parties and Georgia had exchanged a number of questions and answers, the most recent of which were listed in paragraph 9 of the annotated agenda. Since the

circulation of the annotated agenda, Japan had submitted responses (GPA/ACC/GEO/6) to Georgia's replies in document GPA/ACC/GEO/3.

44. The Chairman invited comments on the accession process of Georgia and on the idea, raised at the last informal meeting of the Committee in October, of holding plurilateral consultations on Georgia's accession process at the first meeting of the Committee in 2005. He proposed that he would contact the delegation of Georgia if Parties wished to organize such plurilateral consultations.

45. In response to the Chairman's question and proposal, the representative of the United States noted that in September his delegation had submitted questions to Georgia relating to Georgia's market access offer. As far as the process was concerned, his delegation was looking forward to Georgia's response to those questions and to working with Georgia towards accession.

46. The representative of Korea noted that his delegation did not have any strong view on the process of Georgia's accession and would follow the Chairman's initiative and any consensus that might emerge among Parties on this issue. As to the process, he recalled that his delegation had submitted a special questionnaire to Georgia in April 2004 but had not yet received an answer. He was expecting Georgia to respond quickly to those questions, especially to the ones relating to General Notes 8 and 9 of Georgia's draft initial offer.

47. The representative of Japan noted that, although the delegation of Georgia was not present at the meeting, his delegation wished to express its appreciation for Georgia's prompt response to Japan's questions. Having carefully examined Georgia's reply, his delegation had just submitted new comments, hoping that Georgia would consider those positively as soon as possible. As regards the Chairman's proposal, his delegation was open to meet with the delegation of Georgia at a plurilateral session.

48. The representative of the European Communities stressed that her delegation was still waiting for Georgia's replies to some further questions posed by her delegation. As to the Chairman's suggestion, her delegation was open to meeting with Georgia on a plurilateral basis in early 2005.

49. In conclusion, the Chairman suggested that he would contact the delegation of Georgia to see when it might be able to respond to the questions received, and on that basis he would further consult with Parties as to whether the first meeting of the Committee in 2005 would be a good opportunity to hold plurilateral consultations with Georgia.

50. The Committee so agreed.

Jordan

51. With regard to Jordan, the Chairman noted that two rounds of informal plurilateral consultations between Parties and Jordan had taken place on 23 April and 7 October 2004. The consultations in October 2004 had addressed Jordan's revised market access offer (GPA/ACC/JOR/4 of 30 September 2004). Jordan had informed Parties that its new comprehensive legislation was expected to be finalized by the end of 2004 and would hopefully pass the legislative process by summer 2005. It had been agreed that Parties should submit their comments on Jordan's revised offer by 15 December 2004 through the Secretariat. In turn, Jordan had agreed to prepare a further revised offer by 15 February 2005. This would allow holding another round of plurilateral consultations at the first Committee meeting in 2005.

52. The representative of the European Communities welcomed the revised offer submitted by Jordan during the last round of negotiations in October as a significant improvement. Her delegation

would submit its questions and remarks on that revised offer, and was looking forward to meeting with Jordan in early 2005.

53. The representative of the United States expressed appreciation for Jordan's revised offer, and was looking forward to working with Jordan towards accession.

54. The representative of Japan noted that, although his delegation had not had bilateral consultations with Jordan, it was interested in Jordan's accession process; it was watching the process as a whole positively and was looking forward to hearing good news in due course.

55. The representative of Israel thanked Jordan for its revised offer and regretted that his delegation was not available during the last plurilateral consultations. His delegation welcomed the opportunity next year to discuss it with Jordan. He also reiterated his delegation's support for the offer and the quick accession of Jordan.

56. In conclusion, the Chairman said that before taking a decision on holding another round of plurilateral consultations at the first occasion in 2005, Parties may wish to see the developments first and then take a decision on holding another plurilateral round on Jordan's accession. He suggested that he would consult with Parties, possibly through the Secretariat, on the relevant arrangements.

57. The observer of Jordan noted that her delegation was making all efforts to meet the agreed deadline of 15 February 2005 for preparing the newly revised offer. She welcomed the plan to hold another round of consultations.

Chinese Taipei

58. With respect to the accession of Chinese Taipei, the Chairman noted that all bilateral consultations had been successfully concluded with interested delegations on the substantive issues. However, the issue of nomenclatures remained outstanding. He believed that there was a continued interest in resolving the last outstanding issue, and said that he remained fully committed to assisting this process as much as possible in his capacity as Chairman, and took it that his successor would do the same.

59. The representative of Japan noted that nearly two years had passed since all Parties had completed the bulk of the substantive issues. His delegation was looking forward to the day when Chinese Taipei would become Party to the Agreement. He encouraged the Chairman to contribute to the resolution of this long-pending issue.

60. The Committee took note of the statements made.

Other accession processes

61. The Chairman noted that, in addition to the above three WTO Members, accession negotiations were under way with Albania, Bulgaria, the Kyrgyz Republic, Moldova, Oman and Panama. However, in the case of these WTO Members, no new developments had taken place since the meeting of April 2004. Basic information on earlier developments on their accession processes was included in Annex 1 of the annotated agenda. Further, the following additional WTO Members had provisions in their respective Protocols of Accession to the WTO regarding accession to the GPA: Armenia, China, Croatia, the Former Yugoslav Republic of Macedonia, and Mongolia. Information concerning the commitments of those WTO Members was contained in Annex 2 of the annotated agenda.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

62. The Chairman noted that at the meeting of 23 April 2004, the Kingdom of the Netherlands with respect to Aruba said that the Government of Aruba had informed it that it had originally intended to introduce new implementing legislation and to subsequently answer the questions in GPA/1/Add.1 on the basis of such newly introduced legislation. Since that would be a lengthy process, the Government of Aruba had now decided to answer the questionnaire on the basis of the current legislation. The responses had been finalized but were awaiting the final signature of the Minister of Economic Affairs of Aruba.

63. The representative of the Netherlands with respect to Aruba said that his delegation had recently received the answers to the questionnaire from Aruba and would be transmitting them to the Secretariat. These answers were based on the present legislation, which was being amended.

E. ISRAEL'S COMMITMENT IN RELATION TO OFFSETS

64. The Chairman said that on 4 November 2004 Israel had submitted a formal request to include on the agenda of the meeting an item entitled 'Israel's commitment in relation to offsets'. Accordingly, a revised Airgram had been circulated adding an agenda item on this issue. Subsequently, Israel had informed him that it had had consultations with Parties.

65. The representative of Israel thanked Parties for their attention to a matter that was of great importance to his delegation. He also thanked the Secretariat for its assistance, and expressed appreciation to all Parties for the constructive approach that had prevailed in the bilateral consultations held thus far.

66. According to his delegation's Note to its Appendix I to the Agreement, the level of offsets invoked by Israeli procuring entities should be set at 20% of the value of the contract, beginning on 1 January 2005.

67. His delegation intended to submit shortly a notification in accordance with Article XXIV:6(a) of the Agreement requesting the modification of its Note to Appendix I concerning the level of offsets, in order to maintain its current level of offsets at 30% for a defined period of time and to incorporate a gradual process to reduce the level to 20%.

68. He mentioned the following reasons behind Israel's request.

69. As an economy, highly reliant on international trade, Israel attached great importance to its integration into the global market and the multilateral trading system. In addition to the mandatory multilateral trade agreements embodied in the WTO, Israel had been participating in other plurilateral initiatives under the auspices of the WTO in recent years, such as the Information Technology Agreement and the Agreement on Government Procurement. By doing so, while ensuring its economic and industrial development needs, Israel had demonstrated its commitment to the multilateral trading system as well as to progressively liberalizing its economy.

70. Israel had been a Member of the Government Procurement Code since 1985 and had been a Party to the Agreement on Government Procurement since its entry into force on 1 January 1996.

71. In recent years, the Government of Israel had been facing severe criticism by the domestic industry concerning Israel's membership in the GPA. The domestic industry held that the GPA had failed to meet expectations in terms of its contribution to the Israeli economy. The industry claimed that, on the one hand, the GPA had not led to the expected results of increased gains for Israeli

companies in foreign public tenders, and, on the other hand, the domestic industry had lost its advantages and share of the local government procurement market.

72. He stressed that the Israeli procurement market was open and competitive. The offset provision had not at all hindered foreign enterprises from bidding and winning tenders in Israel. For instance, the two major public procuring entities in Israel, the Israel Electric Company and the Israel Railway Company, purchased an estimated 80% of their annual procurements from foreign suppliers. The procurement of the above mentioned entities was estimated to constitute more than 50% of the total procurement of Israeli public entities that were subject to the GPA.

73. At the same time, the offset provisions to which Israel was entitled under the GPA had played a major role in developing the Israeli industry in recent years. Furthermore, the offset provisions still stood to serve as a vital instrument in promoting industrial co-operation between foreign companies and Israeli small and medium-sized enterprises, which constituted a major component of the Israeli economy, in terms of contribution to both GDP and employment. Small and medium-sized enterprises (employing 1-100 workers) comprised 96% of the total number of industrial plants in Israel, employed 47% of the industrial labour force and contributed 30% to total annual industrial revenue.

74. In light of the above-mentioned structure of the Israeli industry, in which SMEs played such a major role, the vast majority of Israeli enterprises, due to their size, were incapable of bidding as prime contractors in most of the public tenders issued in Israel and in other GPA Parties.

75. At the same time, Israeli companies had proved to be successful in acting as sub-contractors in such tenders. Hence, a development-oriented instrument, such as offsets, was essential in creating the opportunities for industrial co-operation between foreign prime contractors and Israeli SMEs. Experience had shown that industrial cooperation between foreign and Israeli enterprises had led in many cases to long term business relationships for the benefit of both sides involved.

76. Israeli industry was exposed to the practices, standards and methods of leading global companies. Foreign enterprises, which were awarded government contracts in Israel, had been introduced to the capabilities and innovative technologies of Israeli industry. Several foreign enterprises that had been awarded public contracts in Israel had recognized the importance of maintaining offsets at the current level as a means to develop industrial co-operation.

77. A further important factor was that during the last couple of years the Israeli economy had been undergoing a recession and had been facing economic difficulties. This was reflected *inter alia* in an unemployment rate of almost 11%, in a decrease in the level of GDP per capita and, last but not least, in the closing down of companies. Israeli small and medium-sized companies were particularly vulnerable and they were the first to suffer in this situation, since they were often the beneficiaries of the offsets mechanism.

78. In conclusion, he pointed out that, in light of the above circumstances and at that point in time, it was of utmost importance for his delegation to maintain its level of offsets at 30% for an additional well-defined period of time, after which his delegation would be ready to incorporate a gradual process of reducing the level of offsets to 20%, as appeared in Israel's Note.

79. In order to move forward with this process, he proposed that a tentative date for a meeting be set before the end of 2004 in order to allow Parties to follow up on the process prescribed in Article XXIV:6(a) of the Agreement and to arrive at a positive conclusion.

80. His delegation stood willing to consult with interested Parties on matters concerning this issue. He thanked the Parties for having worked with his delegation in this short time and for their willingness to continue working together with his delegation in the coming weeks.

81. The representative of the United States thanked Israel for its presentation as well as for Israel agreeing with his delegation that it was premature for the Committee to make a decision in such a short time, i.e. in the two weeks since Israel had first proposed this concept for consideration. His delegation, as a Party to the Agreement, would need more time to examine Israel's request and its economic effects and other implications. His delegation appreciated Israel providing better explanation of the legal context in which Parties would be moving forward with this request, namely Article XXIV:6(a). His delegation was looking forward to receiving Israel's formal request as soon as possible and it was prepared to work with Israel and any other Party between now and the end of 2004 to address Israel's request.

82. The delegation of Korea thanked Israel for its introductory remarks. His delegation believed that the formal process of notification pursuant to Article XXIV:6(a) was an appropriate one. His delegation expected more detailed information and data for the maintenance of the present level of offsets and was closely examining this notification. His delegation was looking forward to constructive consultations and dialogue with Israel, and thus to an early conclusion of this matter. Further, while his delegation took note of all the difficulties faced by Israel, this matter concerned the exceptions to the implementation of its commitments; so his delegation preferred that a more detailed proposal be submitted, specifying a certain period of time for maintaining the 30% offset ratio and what would happen after that specific period, which would allow his delegation to consider the request in a favourable manner.

83. The representative of the European Communities thanked Israel for its presentation. She noted that her delegation had taken note of Israel's request, was reflecting on it, and understood the importance of the issue for Israel.

84. The representative of Canada said that his delegation believed that the process put forward by Israel was the right one as it allowed his delegation to consider Israel's proposal in detail. He thanked Israel for putting that idea forward. He was certain that his delegation would be in touch with the delegation of Israel over the coming weeks to discuss questions and comments once the notification was received.

85. The representative of Japan expressed his delegation's appreciation for the presentation made by a capital-based Israeli expert. Japan had experienced economic crisis in the 1990's and had faced a long recession. His delegation felt sympathy with the economic situation that Israel was facing.

86. As a general remark, he considered it reasonable to ask the Party in question for a clarification on the necessity to provide S&D measures because developing country Parties differed from economy to economy. Since the one-size-fits-all approach did not apply to Parties that needed an offset, a transitional period of offsets should be decided on a case-by-case basis, depending on the situation.

87. With specific regard to Israel's case, his delegation had appreciated clarifications from the delegation of Israel at bilateral meetings. His delegation needed more information in writing, which should be legitimate enough to convince his capital of the proposal. Further, his authorities needed more time to carefully examine the proposal because this was a matter of legal obligations. If Israel could provide his delegation with reasonable and convincing explanations, including some data concerning the government procurement market and the relevant economic situation, his delegation would be able to examine the paper expeditiously. His delegation urged Israel to provide justifiable reasons for its proposal.

88. The representative of Switzerland thanked Israel for its presentation and for its willingness to meet his delegation informally and to explain the situation that Israel was facing. His delegation found it premature to have a decision on such short notice and it needed more time for his capital-based experts to make a precise assessment of Israel's request. His delegation was looking forward to receiving Israel's request through the Article XXIV:6 process as soon possible and it would keep in close touch with the delegation of Israel to obtain the additional information his delegation needed to make its assessment. His delegation was ready to work constructively towards finding a mutually satisfactory solution by the end of 2004.

89. The representative of Israel, in response to the above comments, thanked Parties for their constructive approach to this important issue for Israel. He reiterated that his delegation was expecting to submit a notification the following morning. His delegation stood ready to continue its consultations with all interested Parties and hoped to successfully conclude such consultations before the end of 2004.

90. In conclusion, the Chairman noted that a notification on a proposed modification pursuant to Article XIIV:6(a) could be expected from Israel shortly. Article XXIV:6(a) called for the Committee to be convened promptly in such cases to try to resolve the matter. He suggested that a Committee meeting be held in the morning of Thursday, 16 December 2004.

91. The Committee so agreed.

F. ADOPTION OF THE ANNUAL REPORT

92. The Chairman noted that Article XXIV:7(a) of the Agreement required the Committee to review annually the implementation and operation of the Agreement and to inform the General Council of developments during the periods covered by such reviews. A draft of the Committee's Annual Report to the General Council for the period since the Committee last reported to the General Council in July 2003 (GPA/75 of 15 July 2003) had been circulated by the Secretariat on 5 November (Job No. 7563).

93. The Chairman proposed that the necessary modifications be made to the draft Annual Report. He suggested that the Secretariat make the necessary changes in the light of the present meeting of the Committee and circulate the updated draft Annual Report by the end of the week. Subsequently, Parties would have until Wednesday, 24 November to provide comments and to suggest any further changes.

94. The Committee so agreed.

G. OTHER BUSINESS

Statistics

95. The Chairman noted that, in line with the requirements of Article XIX:5 of the Agreement, statistics for 2003 had been submitted by Hong Kong, China (GPA/80, dated 29 September 2004).

96. The representative of Hong Kong, China said that her delegation's submission on statistics was available both in hard copy and electronically, and Parties were welcome to consult it.

Thresholds

97. The Chairman noted that, in accordance with the Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3), Korea had notified its threshold figures

expressed in national currencies for 2003-2004 (GPA/W/251), and Switzerland had notified its threshold figures expressed in national currencies for 2004 (GPA/W/285/Add.7). Further, the following Parties had notified their threshold figures expressed in national currencies for 2004-2005: Canada; the European Communities; Hong Kong, China; Israel; Japan; Korea; the Kingdom of the Netherlands with respect to Aruba; Norway; Singapore; Switzerland; and the United States (GPA/W/285, GPA/W/285/Add.1-6 and GPA/W/285/Add.8-9).

Date of the meetings in 2005

98. The Chairman said that, as to the first Committee meeting in 2005, at the end of the informal meeting in October 2004 delegates had discussed the week of 14 March 2005 as a possible date. Although no objections had been made to that date, no decision had been made at that point either. In the meantime, the Secretariat had tentatively reserved a meeting room for that week. Given the heavy demand on meeting rooms, the Committee should try to agree on the date of this meeting.

99. As to the structure of the first meeting in 2005, beyond the usual items, it should elect a new Chairman. Further, as discussed at the informal meeting in October, the Committee should continue the drafting work on the text of the agreement and take up the horizontal matters that were to be discussed by the Committee as a whole according to the Decision on Modalities. Also, in line with the Decision on Modalities, the Committee could take stock of the bilateral processes relating to initial requests, which were to be submitted by the end of the month. Finally, as discussed, Parties could hold plurilateral consultations with Jordan, and possibly with Georgia, on their accession processes. In the light of the potential workload, the Chairman suggested to schedule a full week's meeting from 14 to 18 March 2005.

100. The Committee so agreed.

101. As to subsequent Committee meetings in 2005, the Chairman noted that the previous week Parties had received a fax indicating growing constraints on the availability of meeting rooms for the remainder of 2005 and suggesting the following meeting dates:

- (a) the week of 30 May 2005;
- (b) the week of 25 July 2005; and
- (c) the week of 10 October 2005.

102. In response to that fax, one delegation had pointed out that, for religious reasons, it would have difficulties attending a meeting during the month of October 2005, and had asked for rescheduling that meeting for a later date. The Chairman was, however, informed by the Secretariat that rescheduling the October meeting for sometime in the last two months of 2005 seemed virtually impossible, given the vicinity of the Hong Kong, China Ministerial Conference. Further, since the Decision on Modalities provided for the presentation of revised and improved offers by the end of October 2005, he believed that it was essential to offer another opportunity for bilateral negotiations back-to-back with a meeting of the Committee beforehand.

103. The representative of Israel said that the unavailability of rooms pointed to the heavy workload of the organization as a whole. He reiterated the concern of his small delegation with overloading the agenda. While his delegation could accept the dates put forward, it would be rather wary of adding further dates to the work programme of the Committee.

104. The Committee took note of the statement made by Israel, and agreed on the meeting dates of the weeks of 30 May and 10 October 2005.

105. As to the meeting scheduled for the week of 25 July 2005, the representative of the European Communities said that her delegation would find it easier to hold that meeting one or two weeks earlier.

106. The Chairman said that the Secretariat would explore if the week of 18 July 2005 was possible and, if yes, he would consult with Parties to see whether they had any serious problems with holding a meeting that week.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 16 JULY 2004

Chairman: Mr. Niklas Bergström (Sweden)

1. The Committee adopted the following agenda, as outlined in Airgram WTO/AIR/2356/Rev.1 of 14 July 2004:

- A. Draft Decision on Modalities for the Negotiations on Extension of Coverage and Elimination of Discriminatory Measures and Practices
- B. Request for Observer Status
- C. Other Business

A. DRAFT DECISION ON MODALITIES FOR THE NEGOTIATIONS ON EXTENSION OF COVERAGE AND ELIMINATION OF DISCRIMINATORY MEASURES AND PRACTICES

2. The Chairman noted that, at informal consultations on 13 July, delegations had had another brief exchange of views on the draft decision on modalities for the negotiations on extension of coverage and elimination of discriminatory measures and practices. In the light of these consultations, he proposed adoption of the draft decision set out in Job No. 3067/Rev.1 (4741), dated 13 July.

3. The Committee adopted the Decision.¹

4. The representative of Israel welcomed the Decision on modalities adopted by the Committee. Although his delegation was a small delegation representing a developing country with limited resources, it allocated a lot of resources to the issue of government procurement. It would have hoped to have finished negotiations on the text and the horizontal issues regarding specific commitments before entering into bilateral negotiations on the extension of coverage. This would have not only reflected a logical process but would have better enabled his delegation to manage its resource constraints. He assured the Chairman and other delegations that his delegation would continue to work with them in order to reach a successful conclusion to the negotiations.

5. The representative of the European Communities also welcomed the decision on modalities. He recalled that under the mandate provided for in Article XXIV:7(b) and (c) of the Agreement on Government Procurement, a significant increase of coverage should be achieved. All necessary efforts should be made by Parties to meet this objective rapidly. His delegation considered that the Decision on modalities adopted by the Committee should be understood as aiming at attaining this objective.

¹ Subsequently circulated as document GPA/79, dated 19 July 2004.

6. The Committee took note of the statements made.

B. REQUEST FOR OBSERVER STATUS

7. The Chairman noted that the Republic of Armenia had submitted a request for observer status (GPA/W/293, dated 18 June 2004), having regard to the commitment it had made, in the context of its accession to the WTO, to initiate negotiations on accession to the Agreement on Government Procurement.

8. The Committee approved Armenia's request for observer status.

9. The representative of the United States welcomed Armenia as an observer and looked forward to its accession to the GPA.

10. The representative of the European Communities also welcomed Armenia as an observer.

11. The Committee took note of the statements made.

C. OTHER BUSINESS

12. The Chairman noted that during its recent informal meetings the Committee had had several opportunities to look into the question of meeting dates for the second half of 2004. There was agreement on the principle of holding two meetings. As regards the precise dates of the first meeting, it looked as if all delegations' preferences could not be accommodated. However, there was a willingness to show flexibility, for which he thanked one delegation in particular. He proposed that the Committee agree on the following dates: 5 to 8 October and 16 to 19 November.

13. The Committee so agreed.

14. The representative of Israel said that his delegation would not be able to participate fully in the meeting scheduled for 5-8 October, and hoped that the meeting would be kept in a more formal mode, so that full and substantive records of the meeting would be available.

15. The Committee took note of the statement made.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 23 APRIL 2003

Chairman: Mr. Niklas Bergström (Sweden)

1. The Committee adopted the following agenda:
 - A. Request for Observer Status
 - B. Negotiations under Article XXIV:7
 - C. Modifications to the Appendices to the Agreement
 - (i) *Notification from the European Communities*
 - (ii) *Other modifications*
 - D. Accessions
 - E. Review of National Implementing Legislation
 - F. Other Business
2. The Chairman noted that the provisional agenda had been circulated in Airgram WTO/AIR/2283 of 5 April 2004, and that Parties had been sent an Annotated Agenda (Job No. 2372, dated 7 April 2004).
 - A. REQUEST FOR OBSERVER STATUS
3. As the first item, the Chairman referred to Sri Lanka's request for observer status (GPA/W/292, dated 6 April 2004). The Committee approved that request.
 - B. NEGOTIATIONS UNDER ARTICLE XXIV:7
4. Summarizing work undertaken since the previous formal meeting of the Committee in August 2003, the Chairman reported that the Informal Group of the Committee had met three times: on 26-28 November 2003, 17-20 February 2004 and 21-23 April 2004. The work consisted of two elements: (i) renegotiation of the text of the Agreement; and (ii) negotiations on the expansion of coverage and elimination of discriminatory measures/practices.
5. At all meetings, delegations had carried forward work on the non-market access-related provisions of the Agreement. Many proposals or comments from delegations had been presented in writing, but he chose not to enumerate them all, especially as they did not necessarily reflect the positions of delegations at the time of his report. The most recent consolidated draft of the revised text, reflecting positions as at the end of the meeting in February 2004, was contained in Job No. 1350 (dated 27 February 2004), and would be updated.

6. At the most recent meetings, in addition to the usual article-by-article approach, a particular focus had been given to the text relating to developing countries, modifications and rectifications of schedules, and conditions for participation in procurement. On dispute settlement, which had been discussed at some length in February 2004, the Secretariat had attempted to identify issues in the revised draft text of the GPA that were related to the review of the Dispute Settlement Understanding (Job No. 2527, dated 15 April 2004).

7. As to the work on the revision of the text undertaken earlier that week, he stated that with regard to Article XIV on Developing Countries, participants had had a detailed discussion on the basis of the consolidated text prepared by the European Communities, Switzerland and the United States (Job No. 1142, dated 20 February 2004). A large number of detailed suggestions had been made, and the three Parties had undertaken to produce a revised draft, taking into account the proposals made and views expressed. A number of other delegations had indicated their interest in being associated with this work.

8. As regards rectifications and modifications to coverage, participants had had a detailed discussion on the basis of a new proposal put forward by Japan (Job No. 2522, dated 15 April 2004), a room document presented by the United States and a note prepared by the Secretariat (Job No. 2133, dated 30 March 2004). Japan and the United States had indicated that they would work together to develop their thinking on this issue with a view to presenting a revised text to the next meeting. A number of other delegations had indicated their interest in being associated with this work.

9. Conditions for participation had been further discussed on the basis of new proposals by the European Communities (Job No. 2381, dated 7 April 2004) as well as proposals put forward earlier by Canada and other Parties, as reflected in Job No. 1350 (dated 27 February 2004). The updated version of the revised draft text of the Agreement would reflect all of these proposals.

10. With respect to the negotiations on expansion of coverage and elimination of discriminatory measures and practices, delegations had intensively discussed the modalities for how these negotiations should proceed and had requested the Secretariat to prepare a revised draft decision by 5 May 2004. Delegations had agreed to present their written comments on this by the end of May 2004, so that the Committee could take a decision on this matter at its meeting in June 2004.

11. Concluding his report, the Chairman noted that in the period since the Committee last met, further important progress had been made on the revised draft text of the Agreement and on developing modalities for the other aspects of the negotiations. A considerable number of differences had been resolved and important new ideas put forward for bridging the remaining gaps. He thanked all delegations for their constructive participation and the flexibility that they had shown. However, much work needed to be done if provisional agreement was to be reached on the non-market access-related provisions before the summer break of 2004. It was also important that a decision be taken on the modalities for the market access-related negotiations at the next meeting of the Committee.

12. The representative of Israel, commenting on the Chairman's report, pointed out that, with respect to the issue of developing countries, his delegation did not see the paper by the European Communities, Switzerland and the United States (Job No. 1142, dated 20 February 2004) as a basis. His delegation was prepared to work on a common paper on that issue, which he hoped could become the basis for the discussion and the direction that the Committee would work towards.

13. The Committee took note of the Chairman's report and agreed to the course of action outlined therein. It also took note of the statement made by Israel.

C. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Notification from the European Communities*

14. The Chairman noted that document GPA/MOD/EEC/1, dated 26 March 2004, contained a communication from the European Communities dated 22 March 2004, with proposed modifications pursuant to Article XXIV:6(a) to Appendices I, II and IV of the European Communities relating to the enlargement of the European Communities. An addendum to this document contained translated versions of Appendices II and IV in French and Spanish (GPA/MOD/EEC/1/Add.1, dated 30 March 2004).

15. On the same date as this proposed modification, communications from Estonia (GPA/41/Rev.1), Latvia (GPA/SPEC/5/Rev.2), Lithuania (GPA/66/Rev.1) and Slovenia (GPA/56/Rev.1) had been circulated, withdrawing those countries' applications for accession. The Chairman pointed out that these four communications would be addressed separately under Item D.

16. The Chairman added that intensive consultations had taken place earlier that week, leading to the preparation of a draft decision on the modification proposed by the European Communities, which had been circulated to Parties. He understood that, based on those consultations, the European Communities would make a statement to be put on the record.

17. The representative of the European Communities made the following statement to further clarify the content of its modifications made in view of its enlargement:

The European Communities clarifies that the coverage of its new member States has been organized in the same manner as the coverage of its existing member States. The European Communities considers that no central government entities of its new member States have been omitted; it stands ready to correct any omissions. All entities of the new member States that meet the criteria of the EC's offer in Annexes 2 and 3 are covered.

The European Communities clarifies that subordinate entities of the ministries of the new member States are generally covered in two ways. Subordinate entities that can be considered as part of a ministry are covered under the relevant ministry in Annex 1. Subordinate entities that may not be considered as part of a ministry, in particular because they have separate legal personality, are generally covered as a body governed by public law in Annex 2. Due to the particular administrative structure of Latvia and Lithuania, subordinate ministerial entities of those member States are explicitly included in Annex 1.

The European Communities stands ready to provide any further necessary clarification.

Finally, the European Communities would like to thank the other Parties for the constructive spirit in which they have worked with the European Communities in order to achieve the full integration of the ten new member States into the GPA.

18. With the Chairman's introduction of this modification and the statement made by the European Communities, the Committee adopted the decision.¹

¹ Subsequently circulated as document GPA/78 (dated 4 May 2004).

19. The representative of Switzerland stated that the decision on the addition of ten new countries to the Agreement on Government Procurement was a historic day for the Agreement. His delegation noted with great satisfaction that the membership of the Agreement was going to increase significantly on 1 May 2004. It very much looked forward to having the new members of the European Communities represented in the Committee and to the extended overall coverage of government procurement with those ten new members.

20. The representative of Hong Kong, China welcomed the enlargement of the European Communities and the European Communities' notification pursuant to Article XXIV:6(a) on the proposed modifications to its Appendices arising from the enlargement. Her delegation recognized that the adoption of the decision by the Committee in recognition of the enlargement and modifications would signify that the coverage of the Agreement on Government Procurement would be extended to cover the ten new countries, which would, as member States of the European Communities, form part of the European Communities for the purposes of the Agreement and were bound by the Agreement with effect from 1 May 2004. In this regard, her delegation had examined the modifications proposed by the European Communities arising from the enlargement as well as the subsequent changes proposed, and was satisfied that there was an expansion of reciprocal procurement opportunities under the Agreement. On this basis, her delegation supported the decision and welcomed with great pleasure the enlarged application of the Agreement. Her delegation appreciated the constructive approach adopted by the European Communities on this matter.

21. The representative of Japan welcomed the consensus reached among Parties. His delegation strongly supported the enlargement of the European Union as a political and economic undertaking contributing to stability and security in Europe, and looked forward to the ten new EU members joining the Committee in the near future.

22. Having said that, he noted that his delegation had been expressing its concerns over the European Communities' notification and had addressed specific questions regarding the European Communities' annexes through bilateral meetings. His delegation wished to reiterate its concern over the notification since it was still examining it and not yet fully convinced, in particular due to a lack of clarity in the European Communities' annexes, as to whether the list of entities enabled Japan enough market access.

23. With respect to his delegation's written questions submitted to the European Communities, he was expecting to receive written answers in due course. His delegation would continue its work in the most expeditious manner; however, in the course of this work his delegation would have some further questions. He expected the European Communities to give answers and necessary clarification to his delegation's concerns in an expeditious and sincere manner, and also to make an adequate modification when necessary.

24. Finally, he made reference to the last paragraph of the written statement of the European Communities, which said that "the European Communities would like to thank the other Parties for the constructive spirit in which they have worked with the European Communities". He wished also that the European Communities could work with his delegation on other issues in the same spirit.

25. The representative of the United States welcomed the ten new EU members as part of the GPA. Agreeing with the comment made by the representative of Switzerland, she noted that this was a historic date substantially increasing the number of countries covered by the Agreement. Her delegation was looking forward to working with those countries as after 1 May 2004. She commended the spirit of cooperation that the European Communities had expressed in working with her delegation to address the concerns that her delegation had had as it was reviewing the entity list. Her delegation had been back and forth with the European Communities a number of times, and was grateful for the European Communities' willingness to provide explanations, clarification and, in a couple of cases, corrections. Her delegation was satisfied that the entity list for each of the countries

that were going to be covered by the GPA was consistent with the coverage of the other member States and the other Parties. Her delegation was satisfied and welcomed the new EU members.

26. The representative of Israel welcomed the ten new EU members as part of the Agreement. His delegation also saw this as an historic date leading to the extension of the Agreement to a substantial number of countries. His delegation hoped that this was the beginning of a process whereby Parties to the Agreement would bring in more countries, and not stop at a one-time historic moment.

27. The representative of Canada welcomed the ten new EC member States to the Agreement. Her delegation was pleased to note that the ten new countries had chosen to adopt a comprehensive coverage and that they had undertaken to fully adopt open, transparent and non-discriminatory procurement. Her delegation was looking forward to working with the expanded European Communities in the future.

28. The representative of Korea welcomed the ten new members of the European Communities. He agreed with the delegations of Switzerland and the United States that this was an historic event. His delegation was certain that expansion to these ten new countries would contribute to further market access of existing Parties and would contribute to the final goal of market access of all Parties. His delegation noted the statement of the European Communities and understood that it had the same status – legally and practically – as the decision made by the Committee. His delegation wished to commit itself to close cooperation with the European Communities in moving forward.

(ii) *Other modifications*

29. The Chairman noted that details of all proposed modifications which were outstanding or new and the five that had come into force since the last meeting, were contained in the Annotated Agenda (Job No. 2372, dated 7 April 2004). Instead of reading out all those historical details, which are reproduced in Annex A to these minutes, he invited such comments as delegations might wish to make. Only notifications subject to comments are dealt with below.

- *Notification by Japan concerning proposed modifications relating to Nippon Telephone & Telegraph (GPA/W/91, dated 6 September 1999)*

30. The representative of Japan thanked Parties that had submitted questions. His delegation was still working on the response and might come up with oral responses one-by-one in the near future. He requested Parties concerned to withdraw their objections.

- *Notification by Japan concerning proposed modifications relating to East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company (GPA/W/144, 145 and 146, dated 29 August 2001 and GPA/W/152 and Corr.1, dated 20 September and 10 October 2001)*

31. The representative of Japan noted that the preceding month an official of the Government of Japan had visited Brussels with a view to expediting the process and had provided the European Communities with an elaborated clarification and explanation on this matter. His delegation's answer to the full set of questions from the European Communities (GPA/W/271 and Corr.1, dated 23 September 2003) would follow soon. It counted on the European Communities to have a good understanding of the matter and to withdraw its objection in due course, upon receipt of Japan's written answers.

32. The representative of the European Communities stated that his delegation was looking forward to receiving the written answers of Japan and would give them appropriate consideration.

- *Notification by Japan concerning proposed modifications relating to Japan Nuclear Energy Safety Organization (GPA/W/273, dated 23 September 2003)*

33. The Chairman noted that since the European Communities had placed an objection to this proposed modification, which it had subsequently withdrawn (GPA/W/291, dated 29 January 2004), the Secretariat would proceed to send this modification for certification.

- *Notification by Japan concerning proposed modifications relating to Japan Consumer Information Center, Water Resources Development Public Corporation, Japan Green Resources Corporation, the Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, the Association for Welfare of the Mentally and Physically Handicapped, and National Agriculture Research Organization (GPA/W/274, dated 23 September 2003)*

34. The Chairman noted that there was no outstanding objection with respect to one of these entities, namely, the modification concerning Japan Consumer Information Center. The modification in its regard was therefore being sent for certification.

- *Notification by Korea concerning proposed modifications relating to Korea Telecom (GPA/W/207, dated 11 September 2002)*

35. The representative of Korea, reiterating his delegation's position, pointed out that his delegation had been conducting bilateral negotiations with Parties. It was expecting Parties concerned to expedite the review and was looking forward to their favourable consideration at the earliest possible date.

36. The representative of the United States noted that her delegation was not yet satisfied that government control and influence had been effectively eliminated and was still examining the proposed withdrawal of Korea Telecom.

37. The representative of Canada noted that her delegation was also still considering Korea's proposal to withdraw Korea Telecom and continued to carry out internal consultations on this matter.

- *Notification by Korea concerning proposed modifications relating to Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. (GPA/W/250, dated 17 February 2003)*

38. The representative of the European Communities thanked Korea for the responses to questions put by his delegation. The European Communities had completed the first review of the notification and was further consulting internally. He hoped that his delegation would be able to have a final position the latest before the next meeting.

- *Notification by the United States to reflect changes in the administrative structure of the Federal Government (GPA/W/153, dated 25 September 2001)*

39. The representative of the United States stated that this modification had been pending for some time. A number of proposed changes to entities had been proposed in the modification, reflecting administrative restructuring. She noted that there were many entities that no Party had asked questions about and asked whether Parties that had objections could narrow such objections to the entities that they were really concerned about and withdraw their objection on the others. She would welcome any more questions on the relevant entities.

40. The representative of the European Communities specified that their objection only related to the deletion of the Uranium Enrichment Company, and that this objection was maintained. His delegation had never asked questions on the deletion of other entities and could accept their withdrawal.

41. The representative of Canada noted that her delegation still continued to analyse the proposal of the United States and thought that it was a reasonable request that her delegation be precise about the scope of its objection. Her delegation would take that request back and try to act upon it immediately.

42. The representative of Japan noted that her delegation was still working on the modifications from the United States but, as suggested, would try to narrow down its objection and try to give an answer to the United States as soon as possible.

43. The Chairman referred to five additional notifications that had been received that since the last meeting in August 2003: notifications by Japan concerning proposed modifications relating to Labour Welfare Corporation (GPA/MOD/JPN/2, dated 15 March 2004), Environment Corporation and Pollution-Related Health Damage Compensation Association (GPA/MOD/JPN/3, dated 17 March 2004), National Hospital Organization (GPA/MOD/JPN/4, dated 7 April 2004) and New Tokyo International Airport Authority and Teito Rapid Transit Authority (GPA/MOD/JPN/5, dated 20 April 2004) as well as a notification by Korea concerning proposed modifications relating to Kookmin Bank (GPA/MOD/KOR/1, dated 19 March 2004), to which the United States made an objection (GPA/MOD/KOR/2, dated 19 April 2004).

44. The Chairman noted that within the relevant 30-day deadline no objections had been submitted as regards the new modifications by Japan concerning the Labour Welfare Corporation and the Environment Corporation and Pollution-Related Health Damage Compensation Association. Accordingly, those two modifications were being sent for certification. He opened the floor on the other three new notifications.

45. The representative of Korea stated that the proposed deletion of Kookmin Bank from Annex 3 had been submitted pursuant to Article XXIV:6(b) of the Agreement. This was based on the fact that Kookmin Bank had been privatised and that the Government of Korea had completely sold all its shares in December 2003. Consequently, Kookmin Bank was a fully privatised company. His delegation expected that the United States would expedite the study and if any further clarification was necessary, his delegation stood ready to respond.

46. The representative of the United States replied that her delegation would expeditiously review this proposed withdrawal and submit questions to Korea for clarifications.

47. The Committee took note of the statements made regarding the above modifications.

D. ACCESSIONS

48. The Chairman noted that Parties had received the withdrawals of their respective applications for accession to the GPA from Estonia (GPA/41/Rev.1), Latvia (GPA/SPEC/5/Rev.2), Lithuania (GPA/66/Rev.1) and Slovenia (GPA/56/Rev.1), all documents dated 26 March 2004. He recalled that these withdrawals were to be seen in the light of these countries' accession to the European Communities on 1 May 2004 (*cf.* Item C(i) of the agenda).

49. Turning to ongoing accession negotiations, the Chairman noted that the situation with respect to these was contained in the Annotated Agenda and concerned nine WTO Members: Albania, Bulgaria, Georgia, Jordan, the Kyrgyz Republic, Moldova, Oman, Panama and Chinese Taipei. In addition, the following WTO Members had provisions in their respective Protocols of Accession to

the WTO regarding accession to the GPA: Armenia, China, Croatia, the Former Yugoslav Republic of Macedonia, and Mongolia.

50. Since the preceding Committee meeting in August 2003, the only development with respect to accessions was the informal plurilateral consultations between Parties and Jordan held earlier that day. Reporting on those plurilateral consultations, the Chairman said that comments, questions and explanations had been exchanged and that delegations had generally welcomed improvements and clarifications relating to Jordan's offer, legislation and practices. Some new questions and points of clarification had been voiced and replies given. It was agreed that Parties that wished to address new or revised questions relating to the offer of Jordan should do so by 30 June 2004. Questions with respect to new legislation under way in Jordan would be taken up in due course. A plurilateral meeting was expected in conjunction with the GPA meeting in autumn 2004.

51. The observer of Jordan stated that there had been a fruitful plurilateral meeting earlier that day, and all ideas at that meeting would be of great help to his delegation to push the process further. He proposed that the opening statement of his delegation in the plurilateral meeting be reflected in the minutes. Accordingly, that statement is attached to these minutes as Annex B.

52. The representative of the United States expressed her delegation's appreciation to Jordan for the great efforts Jordan had been making to move this accession process along. The plurilateral meeting earlier that day had been very productive and her delegation stood ready to assist Jordan in whatever way it could as Jordan was moving forward in its accession process.

53. The representative of Switzerland thanked Jordan for the very useful exchange of views earlier that day. He was looking forward to the forthcoming new legislation of Jordan, so that his delegation could see in detail how it matched with the GPA. His delegation also looked forward to a revised offer by Jordan in the near future.

54. The representative of the European Communities also thanked Jordan for its constructive work in the accession process. He hoped to be able to welcome Jordan on board quickly and reiterated his delegation's willingness to take the specific needs of Jordan as a developing country into account.

55. The representative of Canada thanked Jordan for its participation in the plurilateral process and in the ongoing bilateral negotiations. Her delegation welcomed the progress made by Jordan and encouraged Jordan to work towards coming forward with a further draft of its revised offer based on the discussions held earlier that week.

56. The Committee took note of the statements made.

57. The observer of Chinese Taipei thanked and commended the Chairman for his outstanding leadership and guidance. He noted that in the course of the accession of Chinese Taipei to the WTO, his delegation had made a commitment to join the GPA. In order to honour its commitment since WTO entry in January 2002, his delegation had shown strong willingness to become a Party to the GPA. In December 2002, it had successfully completed the bilateral talks on all substantive issues. It regretted that non-economic factors continued to be the stumbling block in its efforts to join the GPA. The situation was disappointing, not only for Chinese Taipei but also for the private industries among GPA Parties, which were eagerly awaiting the further liberalization of government procurement markets. He reiterated that his delegation had demonstrated its utmost flexibility on this matter in order to bring about accession, and it looked forward to continued support from all GPA Parties in making Chinese Taipei's accession an early reality.

58. The representative of the United States noted that her delegation had worked hard on Chinese Taipei's accession to the GPA for many years, and was looking forward to the day when it could actually welcome Chinese Taipei into membership. Its accession to the GPA would bring significant commercial opportunities for US companies. Her delegation encouraged the Chairman to continue efforts to work with Chinese Taipei to bring it into the GPA.

59. The representative of Japan fully recognized that all the Parties had completed the work on the substantive matters. His delegation hoped that the remaining issue could be resolved so that Chinese Taipei could accede to the GPA soon.

60. The Committee took note of the statements made.

E. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

61. The Chairman said that Japan had notified a change in its national regulations (GPA/37/Add.1, dated 7 April 2004).

62. The representative of Japan explained that the notification was a revision to a basic policy for the promotion of eco-friendly goods and services. The content of the revision was the addition of 23 procurement items as eco-friendly goods and services. This was going to be added to Japan's Basic Policy and had been adopted as a Cabinet Decision in March 2004.

63. The Chairman recalled that, at the meeting in October 2002, the delegation of the Kingdom of the Netherlands with respect to Aruba had been invited to submit its notification of national implementing legislation. At the meeting of February 2003 there had been no new developments to report. He wondered whether there were any news at that stage.

64. The representative of the Kingdom of the Netherlands with respect to Aruba replied that the Government of Aruba had first intended to introduce new legislation and to subsequently answer the questions in GPA/1/Add.1 on the basis of such newly introduced legislation. Since that would be a lengthy process, the Government of Aruba had decided to answer the questionnaire on the basis of the current legislation. The responses had been finalized but were waiting for the final signature of the Minister of Economic Affairs of Aruba.

F. OTHER BUSINESS

- *Statistics*

65. The Chairman noted, for the information of Parties, that statistics for 2002 had been submitted by Hong Kong, China; and Korea (GPA/76 and GPA/76/Add.1, respectively). Statistics for 2001 had been submitted by Norway and Switzerland (GPA/70/Add.1 and GPA/70/Add.2, respectively). All other statistical notifications were of earlier dates.

- *Thresholds*

66. The Chairman noted that the following Parties had provided thresholds for 2004: Canada; the European Communities; Hong Kong, China; Japan; Korea; Norway; Singapore; Switzerland; and the United States (GPA/W/285-series; and GPA/W/251 for Korea).

- *Date of the next meeting*

67. The Committee exchanged views on dates of further meetings. In conclusion, it decided to meet on 21 June (p.m.) – 25 June. Those would be informal meetings and, if necessary, there could be a formal meeting at the end of that week to take decisions as necessary. Parties would also pencil in 19-20 July for further informal meetings, unless it was necessary to hold a formal meeting. The aim was to adopt a decision on modalities and to be able to conclude the article-by-article review of the text before the summer break.

68. As regards autumn 2004, the Chairman noted that depending on progress in the negotiations, there was a need for at least one meeting in autumn 2004, at the end of October or at beginning of November, but there might be a need to hold two meetings. He noted that Parties had agreed to have further plurilateral consultations on Jordan's accession that would take place during the autumn. Date(s) would be considered by Parties in June.

ANNEX A

Excerpts from the Annotated Agenda (Job No. 2372, dated 7 April 2004) concerning outstanding modifications and modifications that have come into force since the last meeting in August 2003

The following are outstanding proposed modifications to Appendix I of the GPA, and any developments in their regard since the last meeting in August 2003. [...]

(a) Notifications by Japan concerning proposed modifications relating to:

- NTT (GPA/W/91, 6 September 1999)

No developments since the last meeting.

- East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company (GPA/W/144, 145 and 146, 29 August 2001 and GPA/W/152 & Corr.1, 20 September / 10 October 2001)

Further questions from the EC on GPA/W/144-146 were circulated on 29 October 2003 (GPA/W/271 & Corr.1).

- Railway Construction Public Corporation and Corporation for Advanced Transport and Technology (GPA/W/272 & Rev.1, 23 September / 8 October 2003)

The EC placed an objection to the proposed deletion of both entities (GPA/W/279, 16 October 2003) and raised questions thereon subsequently (GPA/W/291, 29 January 2004). The United States did not object to the deletion of Japan Railway Construction Public Corporation but it objected to the deletion of the Corporation for Advanced Transport and Technology and asked questions in that regard (GPA/W/280, 17 October 2003).

- Japan Nuclear Energy Safety Organization (GPA/W/273, 23 September 2003)

The United States stated no objection (GPA/W/280, 17 October 2003). The EC placed an objection to the proposed modification (GPA/W/279, 16 October 2003), which it subsequently withdrew (GPA/W/291, 29 January 2004). Accordingly, *the modification is being sent for certification.*

- Japan Consumer Information Center, Water Resources Development Public Corporation, Japan Green Resources Corporation, the Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, the Association for Welfare of the Mentally and Physically Handicapped, and National Agriculture Research Organization (GPA/W/274, 23 September 2003)

Originally, the EC placed an objection on all proposed modifications (GPA/W/279 & Corr.1, 16 / 29 October 2003). After further study, the EC did not object to the deletion of Japan Consumers Information Center, but put questions to Japan in respect of the other entities (GPA/W/291, 29 January 2004). The United States also did not object to the deletion of the Japan Consumer Information Center, it was silent on the proposed modification concerning the

National Agriculture Research Organization; however, it objected to the proposed withdrawal of the other entities and posed questions in GPA/W/280 (17 October 2003). Accordingly, *the modification concerning Japan Consumer Information Center is being sent for certification.*

- National Aerospace Laboratory (GPA/W/275, 23 September 2003)

The EC objected to the proposed deletion (GPA/W/279, 16 October 2003) and asked questions (GPA/W/291, 29 January 2004). The United States also asked questions (GPA/W/280, 17 October 2003).

- Social Welfare and Medical Service Corporation and Japan Institute of Labour (GPA/W/276, 8 October 2003)

The EC objected to the proposed modifications (GPA/W/282, 7 November 2003) and later put questions (GPA/W/291, 29 January 2004).

- (b) Notifications by Korea concerning proposed modifications relating to:

- Korea Telecom (GPA/W/207, 11 September 2002)

The EC withdrew their objection (GPA/W/278, 14 October 2003) originally set out in GPA/W/214, 2 October 2002. (The earlier objections by Canada (GPA/W/210, 26 September 2002) and the United States (GPA/W/217, 7 October 2002) are still in force.)

- Housing & Commercial Bank, Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. (GPA/W/250, 17 February 2003)

The modification concerning Housing & Commercial Bank had been certified as of 18 March 2003 (WT/Let/456). As regards Korea Tobacco & Ginseng Corporation and Daehan Printing Co. Ltd, the EC presented a number of questions (GPA/W/281, 24 October 2003). Korea's responses were circulated in GPW/W/286, 28 November 2003. Following Korea's earlier replies (GPA/W/270, 28 July 2003), the United States withdrew its objections concerning Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd (GPA/W/283, 11 November 2003) originally set out in GPA/W/258, 19 March 2003.

- (c) Notification by the United States

- to reflect changes in the administrative structure of the Federal Government (GPA/W/153, 25 September 2001)

No developments since the last meeting.

Since the last meeting in August 2003, [five additional] new notifications have been received.

- (a) Notifications by Japan concerning proposed modifications relating to:

- Labour Welfare Corporation (GPA/MOD/JPN/2, 15 March 2004)
- Environment Corporation and Pollution-Related Health Damage Compensation Association (GPA/MOD/JPN/3, 17 March 2004)

- National Hospital Organization (GPA/MOD/JPN/4, 7 April 2004)
 - [New Tokyo International Airport Authority and Teito Rapid Transit Authority (GPA/MOD/JPN/5, 20 April 2004)]
- (b) Notification by Korea concerning proposed modifications relating to:
- Kookmin Bank (GPA/MOD/KOR/1, 19 March 2004).

Since the last meeting in August 2003, the following proposed modifications have been certified:

- (a) notification by Japan (GPA/W/255, 4 March 2003) certified as of 14 October 2003 (WT/Let/452/Rev.1);
- (b) notification by Canada (GPA/W/203, 12 September 2002) certified as of 9 December 2003 (WT/Let/454);
- (c) notification by Korea (GPA/W/284, 13 November 2003) certified as of 12 December 2003 (WT/Let/455);
- (d) notification by the United States (GPA/MOD/USA/1, 15 January 2004) certified as of 14 February 2004 (WT/Let/457); and
- (e) notification by Japan (GPA/MOD/JPN/1, 4 February 2004) certified as of 4 March 2004 (WT/Let/463).

ANNEX B

Opening statement by Jordan at the plurilateral consultations held on 23 April 2004

Mr. Chairman
Distinguished delegations
Ladies and Gentlemen
Good morning,

It is my pleasure to address this gathering of the members of the GPA Committee in this plurilateral meeting. This is the second meeting that we have to gather in connection with Jordan's accession to the GPA. It is my intention to provide the member states with a brief overview of the developments, and the current situation before opening the discussion and listening to questions, queries and comments. In addition to that, to shed some light on the steps that have been taken by my Government to push further the reforms in the procurement regime:

1. Based on comprehensive consultation with the World Bank, Jordan developed jointly with World Bank experts a CPAR document with special concentration on procurement legislation and reforms of our procurement regime.
2. In view of the findings of the report, an action plan was developed focusing on the following aspects:
 - (a) legal reform;
 - (b) organizational reform;
 - (c) procedural reform;
 - (d) staff development and enhancing information technology in the system.
3. In the course of implementation of the above-mentioned action plan, a governmental steering committee and a national committee comprising public and private sectors, were established. The results of the work of both Committees could be summarized as follows:
 - (a) A new unified draft procurement legislation (works, goods, services) was produced taking into consideration all the remarks mentioned by the CPAR, the requirements of the GPA and the UNCITRAL Procurement Model Law.
 - (b) The draft legislation will be presented to all concerned bodies including the Private Sector for their comments in a national workshop. It is expected to have it approved in a form of a by-law within the coming few months, after the internal legislative procedures are done.
 - (c) The organizational reform would be taking place gradually in the direction of decentralization, by raising gradually the ceiling of the tenders for the tender committees in the various governmental entities, so that reasonable percentage of the total tenders of high value will find its way to the two central procurement entities (GSD & GTD).
 - (d) The new legislation is expected to stipulate for the establishment of high procurement commission that would act as a regulatory body to procurement processes without involvement in day-to-day work of the procurement committees.

4. While the internal process of reform was taking place, Jordan submitted its initial entity offer to the GPA Committee on 6/2/2003. This offer was a result of a joint work between the Government and the private sector which took into consideration the concerns and the obligations.

5. Private sector representatives included those of Chamber of Commerce, Chamber of Industry, Engineers Association, Contractors Association, Union of Pharmaceutical Producers, Jordan Computer Society and other different entities.

6. A series of studies that cover different industrial sectors were conducted by the Government to measure the impact of the agreement on the relevant sectors.

7. During the past few months, my delegation had the opportunity to meet and discuss the details of our initial offer with interested members, also we received several sets of questions from the US and the EC, and we responded in writing to those questions, our answers were circulated to GPA members in due time. And we received a couple of days ago questions from Canada, which will be answered in writing very soon.

8. It is worth mentioning that many of the remarks and questions we received were quite valuable.

Mr. Chairman, Ladies and Gentlemen,

Here we are, fully devoted to listen to the comments of the distinguished delegates: before I conclude, let me thank you, Mr. Chairman, for your outstanding efforts and to all the distinguished delegates for the member states.

Thank you.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 22 AUGUST 2003

Chairman: Mr. Jan-Peter Mout (the Netherlands)

1. The Chairman proposed the following agenda:
 - A. Negotiations under Article XXIV:7
 - B. Modifications to the Appendices to the Agreement
 - C. Accessions:
 - (i) *Streamlining the Accession Process*
 - (ii) *Applications*
 - *Jordan*
 - *Chinese Taipei*
 - *Other Specific Accessions*
 - D. Review of National Implementing Legislation
 - E. Other Business
 - (i) *Date of Next Meeting*
 - F. Election of Chairman for the Remainder of 2003 and for 2004
2. The Chairman noted that the provisional agenda of the meeting had been circulated to Parties in Airgram WTO/AIR/2149, and Parties had been sent an Annotated Agenda for the meeting (Job No. 5700, dated 25 July 2003).
3. The Committee adopted the agenda of the meeting as set out above and in that Annotated Agenda.
 - A. NEGOTIATIONS UNDER ARTICLE XXIV:7
4. The Chairman reported on the meeting of the Informal Group of the Committee on Government Procurement that had been held on 18-21 August 2003, during which negotiations had been pursued under Article XXIV:7 of the Agreement on Government Procurement. He said that the Group had carried forward work on the revision of the text of the Agreement by taking up the revised interim draft of the Agreement dated 8 August 2003, contained in a communication received from the

delegation of the United States (Job No. 6119). That communication incorporated comments that had been received on the previous draft text of 23 July 2003 (Job No. 5693) from the European Community; Hong Kong, China; Japan; Korea; Switzerland; and the United States.

5. In addition, during the informal meeting, the Group had had available to it the following documents:

- (a) a submission by Switzerland on Article V - Accession and Treatment for Developing and Least-developed Countries: Synthesis of Positions Drafted by Switzerland as Coordinator for Article V (Job No. 6028 (4287/Rev.1));
- (b) a submission by the European Community on Switzerland's Article V submission (Job No. 6054);
- (c) a submission by Chinese Taipei on Quad Responses to Chinese Taipei's Comments on 20 June 2003 GPA Review Text (Job No. 6117);
- (d) a submission by Canada on Revision of the Agreement on Government Procurement (GPA): Comments on the Revised Interim Draft of 8 August 2003 (Job No. 6160);
- (e) a submission by Chinese Taipei: Revision of the Agreement on Government Procurement (GPA): Comments on the Revised Interim Draft of 8 August 2003 (Job No. 6247);
- (f) a submission by Japan on Article XVI: Modifications and Rectifications to Coverage (Job No. 6322); and
- (g) a submission by Israel on Article V: Accession and Treatment of Developing and Least-Developed Countries: Israel's Comments on the Submission by Switzerland (informally distributed).

6. In addition to proposals for revision of the text that had been submitted in writing, a number of proposals to amend the revised text of 8 August 2003 had been made orally during the informal meeting. These had been incorporated into the revised text.

7. In reviewing the text of the Agreement, the Group had proceeded Article-by-Article through the whole Agreement. The Group had left aside those provisions that had been identified in the revised text as market access issues on the basis that such issues would be reverted to when the related elements of the Article XXIV:7 negotiations, namely those elements relating to expansion of coverage and elimination of discriminatory measures, would be the subject of discussion.

8. Overall, the Group had made significant progress in revising the text of the Agreement. Such progress made over the previous four days was reflected in the text of 21 August 2003, which was being circulated as a Note by the Chairman entitled "Revision of the Agreement on Government Procurement (GPA) as at 21 August 2003" (Job No. 6343).

9. The Group had provisionally agreed on the basic structure and drafting style of the Agreement. The text of 21 August 2003 reflected a significant re-organisation of the current Agreement. As part of the revision, the Group had consolidated within single Articles all of the provisions on related matters, which in the current Agreement were to be found in several Articles. At its meeting earlier that week, the Group had resolved differences on a substantial number of provisions.

10. In considering the next steps, the Group had noted that significant progress had been made in revising the text since intensive work had begun in late 2002. It was clear that some additional time would be necessary to complete the work. In order to capitalize on the efforts invested by all Members, it had been agreed that the work on the text should be completed as expeditiously as possible.

11. The Group had agreed that the aim should be to have provisional agreement on a revised text by spring 2004. It had been further agreed that the Group would meet on at least two more occasions before finalizing the text, starting with a meeting in the second half of November 2003. Finally, with regard to elements 2 and 3 of the work programme, the Group had agreed that a work programme to complete negotiations in accordance with the timetable of February 2002 for the review would be developed at the meeting of November 2003 based on submissions on hand and any new submissions. In this regard, Parties were invited to submit new inputs by 31 October 2003.

12. The Committee endorsed the report of the Chairman on the progress made on the revision of the text of the Agreement undertaken pursuant to Article XXIV:7 of the Agreement during the meeting of 18–21 August 2003.

13. Following suggestions respectively by the representatives of the United States and of Canada and a subsequent brief discussion, the Committee agreed that the Secretariat would prepare a side-by-side text showing the text of the existing agreement and the corresponding (clean) text from the just issued 21 August 2003 interim draft text. This document would be circulated both electronically and in hard copy as a Note by the Chairman.

14. The representative of Switzerland said that, given that the next informal meeting was sometime away, it might be helpful for Parties to submit their comments on the revised (21 August 2003) draft text in advance, as they had done in the past - for instance, by an agreed deadline - so as to permit advance circulation and prior internal consultations by Parties before the next meeting.

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Modifications that had become effective*

15. The Chairman noted that the details of all proposed modifications to the Appendices to the Agreement were contained in Annex 2 of the Annotated Agenda circulated on 25 July 2003 (Job No. 5700). He said that since the previous meeting of the Committee, two proposed modifications had become effective:

- (a) proposed modification by Hong Kong, China to Annex 1 of Appendix I in document GPA/W/256, dated 5 March 2003, which became effective on 4 April 2003 (WT/Let/444); and
- (b) proposed modifications by Japan to Annex 3 of Appendix I in documents GPA/W/252, GPA/W/253 and GPA/W/254, all dated 25 February 2003, which became effective on 9 May 2003 (WT/Let/446).

(ii) *Outstanding Modifications*

16. With respect to outstanding proposed modifications to Parties' Appendices, the Chairman said that since the meeting of February 2003, there had been further developments in respect of the proposed modification by Korea to Annex 3 of Appendix I. However, no new communications had been made as regards other outstanding modifications. He opened the discussions on this item of the

agenda with the said proposed modification by Korea, and invited Parties to comment on any other outstanding modifications.

- *Modifications by Korea to Annex 3 of Appendix I*

17. With regard to the proposed modification by Korea to Annex 3 of its Appendix I regarding Housing & Commercial Bank, Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. (GPA/W/250, dated 17 February 2003), the Chairman said that the United States had posed questions relating to the proposed withdrawal of Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. (GPA/W/264 dated 30 April 2003). Korea's responses to those questions had been circulated in GPA/W/270.

18. The representative of the United States said that her delegation was reviewing those responses and anticipated completing its review as soon as possible, and to sending any follow-up questions that it might have. The representative of the European Community said that his delegation was also reviewing those responses, and anticipated putting complementary questions to Korea in September 2003.

19. The Chairman said that the Committee would revert to this item at its next meeting.

- *Modifications by Korea relating to Korea Telecom*

20. The representative of Korea said that since the last meeting, Korea had received questions from Canada, the United States and the European Community with respect to Korea's notification to withdraw Korea Telecom from Annex 3 of its Appendix I. She noted that the Annotated Agenda did not reflect the fact that her delegation had provided full responses to the questions put by the United States and the European Community – in documents GPA/W/266 and GPA/W/267, respectively. Her delegation had been satisfied with the bilateral consultations that it had had with Parties during that week, and was looking forward to the final decisions of the United States, Canada and the European Community in respect of the proposed modification.

21. The representative of Canada said that her delegation was continuing to examine, as expeditiously as possible, the helpful responses by Korea to Canada, the United States and the European Community with respect to Korea Telecom.

- *Modification by the United States to reflect changes in the administrative structure of its Federal Government*

22. The representative of the United States said that her delegation had made proposed modifications two years earlier (GPA/W/153), and was still awaiting the completion of their review by some Parties. She inquired of such Parties whether they had any indications as to when they anticipated completing their review.

23. The representative of Japan said that his delegation was continuing its review of the responses provided by the United States, and anticipated being in a position to withdraw its objections to some of the entities, about which it saw no problems, by the time of the next meeting of the Committee.

24. The representative of the European Community said that his delegation was also continuing its review, and if found necessary, it would put further complementary questions to the United States.

25. The representative of Canada said that her delegation was continuing to examine, as expeditiously as possible, the responses of the United States to her delegation's questions, and would consider the suggestion by Japan in this context.

26. The representative of the United States thanked Japan for its forward-looking response. She noted that her delegation's notification covered a number of entities, and it would be helpful if other Parties could also withdraw their objections at least to those entities with which they had no further concerns. In this process, Parties needed to make sure that – as with all modifications – they tried to focus on those that were of real concern and not hold up overall notifications if there were some entities with which they had no concerns.

- *Modifications by Japan relating to railway companies*

27. The representative of Japan noted that since 2001 his delegation had provided extensive information on its proposed modifications relating to railway companies (GPA/W/144, 145 and 146), and had conducted a series of bilateral consultations with the United States and the European Community, with a view to exploring a mutually satisfactory solution in an expeditious manner. To expedite the process, Japan had requested those Parties to present their positions as to whether they would maintain their objections and to specify their reasons, with a focus on any remaining concerns that they might have in the light of Article XXIV:6(b) of the GPA. Responding to that request, the United States had notified its position to Japan after re-examining all the information provided by his delegation. Japan was carefully reviewing that response. The European Community had submitted a third set of questions in February 2003 in document GPA/W/245. Japan's responses to those questions had been circulated in April 2003 in document GPA/W/263. In June 2003, Japan had requested the European Community again to re-examine all the relevant information submitted by Japan and to present its clear position on this matter. The European Community had notified Japan of its intention to submit another set of follow-up questions; however, the delegation of Japan had not yet received these.

28. Japan was convinced that it had already provided detailed explanations which proved that the proposed modifications were consistent with Article XXIV:6 (b) of the Agreement, and believed that the European Community had had enough time to conduct a careful review of the information provided. Japan requested the European Community to submit its final set of questions, if any, and to withdraw its objections in an expeditious manner after Japan responded to those questions. Japan also called upon the European Community to specify in writing the reasons why it wished to maintain its objections if the European Community was not in a position to withdraw its objections. Further cooperation with a view to achieving a speedy solution would be highly appreciated.

29. In response, the representative of the European Community noted that, as provisionally indicated to Japan, his delegation was preparing questions, which it would shortly submit to Japan. Those questions would be self-explanatory and would contain the reason why the European Community was continuing to maintain its objection.

30. With respect to these outstanding proposed modifications, the Chairman welcomed the positive intentions expressed by Parties to speed up their examinations of questions and answers, respectively, and their intention to submit further contributions on this issue before the next formal meeting of the Committee.

C. ACCESSIONS

(i) *Streamlining the Accession Process*

31. The Chairman recalled that, at the meeting of February 2003, Parties had agreed to take up the issue of streamlining the accession process within the wider context of the revision of the Agreement, particularly with regard to the provisions of the Agreement dealing with accessions and developing countries. Parties had earlier heard a report on this under the agenda item "Negotiations under Article XXIV:7". The Chairman added that Parties had had very interesting discussions on accessions and developing countries, including the issues of asymmetric approaches and transitional

time-frames. One of the questions that Parties had been dealing with was which items might be taken up in the context of the Agreement itself, and which issues might be dealt with in a specific accession decision of the Committee. This discussion showed the interrelation between this particular agenda item and the negotiations on the revision of the GPA.

32. The representative of Switzerland emphasized that a speedy resolution of the new Article V in the revised Agreement could prove to be extremely useful by providing guidelines for both current and future accessions. His delegation would therefore commend the drafting Group and the Committee to give a high priority to this issue as the negotiations of the revised Agreement were now extending into spring 2004. His delegation considered that there were quite a large number of acceding Members that depended on the key policy decisions that would have to be taken. Without making further progress in the revision on that particular area, it would be difficult to speed up the accession process for the benefit of acceding Members. This was one of the most important issues of the revision on which other issues depended.

33. The representative of the European Community supported the statement made by Switzerland. In reference to the communication his delegation had submitted on the current Article V on the accession and the regime to be foreseen for developing countries (Job No. 6054), he reiterated the importance his delegation attached to that Article, and hoped that that document could serve as a basis for the current negotiations.

34. The representative of the United States also supported the statement by Switzerland on the need to move forward on that Article as quickly as possible. With regard to streamlining the accession process, she suggested that that be deferred until Parties had completed the work on the Article, as that might provide important information. The United States was fully committed to finding ways in the Agreement that would assist developing countries in their accession to the Agreement. The United States appreciated the work that Switzerland and the European Community had done and the ideas that they had brought forward on this issue.

35. The Chairman echoed the statements made by the delegations of Switzerland, the European Community and the United States, with particular regard to the special importance of this issue to Members discussing accession to the Agreement.

(ii) *Applications*

36. The Chairman said that the details of the current status of all accessions could be found in the Annotated Agenda (Job No. 5700). There were two accessions on which there had been developments to report on since the February 2003 meeting: respectively those of Jordan and Chinese Taipei.

- *Jordan*

37. With respect to the accession process of Jordan, the Chairman noted that Jordan had submitted its entity offer on 6 February 2003 (GPA/SPEC/29). In a communication circulated on 30 April 2003, the United States had submitted questions and a request for information to Jordan in relation to that offer (GPA/SPEC/30). Jordan had submitted its responses to the questions and request for information from the United States in document GPA/SPEC/31.

38. The representative of Jordan made reference to the negotiations under Article XXIV:7 that had taken place in the informal meeting preceding the present meeting, at which his delegation had taken careful note of the suggestions and proposals made by, and views exchanged among, the Parties. In the view of his delegation, these had enhanced and enriched the original Agreement. They provided a helpful guide to countries whose legislation were under review to make such legislation compatible with the GPA, as in the case of Jordan. Jordan was moving towards the final stages of

modernising its legislation, and the deliberations at the informal meeting had been of great help and would be utilized whenever needed to ensure compliance of the provisions of the legislation with the Agreement.

39. Jordan had, as a developing country, sought accession to the GPA and had earlier submitted its initial offer. The negotiations with the Committee had been very encouraging as they indicated to his delegation that developed countries were taking into consideration the developmental aspects of government procurement. Any understanding supporting Jordan's offer would send a very positive signal to other developing countries to follow similar steps. He thanked all Parties that had shown interest in Jordan's offer and had asked for clarifications. He noted that his delegation had received questions on its initial offer from the United States, and had submitted replies in due time. Referring to the discussions earlier that week in the informal meeting, he thanked Parties that had recommended special and differential treatment for developing countries other than the flexibilities provided for in the current Agreement.

40. The representative of the United States thanked Jordan for its prompt responses, and said that the United States looked forward to engaging in further discussions on Jordan's offer. She encouraged all other Parties to also give close and quick consideration to Jordan's offer and its responses, and to do everything they could to move this accession process forward expeditiously.

41. The representative of the European Community said that his delegation would shortly be submitting questions to Jordan¹ and looked forward to having further discussion with Jordan and to receiving their answers thereafter. He emphasized the importance of Jordan's accession to the Agreement, and hoped that it was a step that would lead towards further accessions by other developing countries.

42. The representative of Canada thanked Jordan for its efforts and for responding promptly to the questions put to it by the United States. She said that her delegation had held discussions with, and expected to provide further feedback to, Jordan. Her delegation had found Jordan's responses to the questions put by the United States to be helpful. Her delegation would be examining those responses, and it would do its best not to duplicate the questions and answers that had already been provided.

43. The Chairman noted that, in accordance with the GPA accession timeline, a period of four months of further bilateral and plurilateral consultations was foreseen with regard to Jordan's accession. For the time being, he would not set a specific deadline for submission by Jordan of a revised offer, and invited all Parties to engage expeditiously in the consultations with Jordan.

44. The representative of the United States suggested that the Committee might consider holding a plurilateral meeting on Jordan's accession at the time of the next informal meeting of the Committee in November 2003 (see Item E, Other Business). After some discussion, the Committee accepted this suggestion. Since, however, the proposed date of the next informal meeting conflicted with the start of Ramadan, as advised by the representative of Jordan, the Chairman proposed that the Committee schedule an alternative date for the plurilateral meeting on Jordan's accession process in conjunction with the subsequent cluster of informal meetings that the Committee would decide upon.

45. The Committee agreed to proceed as the Chairman had proposed.

¹ Subsequently submitted in document GPA/SPEC/32 circulated on 27 August 2003.

- *Chinese Taipei*

46. With regard to the accession process of Chinese Taipei, the Chairman recalled that at the February 2003 meeting, the delegations of Singapore and Israel had reported that they had concluded their respective market access negotiations with Chinese Taipei; in consequence, the process of bilateral market access negotiations between Chinese Taipei and GPA Parties that had lasted for seven years had come to an end. While these negotiations had not always been easy, this positive conclusion had been made possible thanks to a strong commitment on the part of both Chinese Taipei and GPA Parties.

47. There remained, however, one outstanding issue regarding Chinese Taipei's accession, namely the issue of nomenclature used by Chinese Taipei in its Appendix I. The Chairman said that he had held intensive consultations with all delegations involved with a view to resolving this issue, both before the meeting of February 2003 and the present one. Nevertheless, he had to report that, despite his very best efforts, these consultations had not yielded a positive result. Therefore, it would not be possible to conclude the accession process of Chinese Taipei at the present meeting.

48. This situation was frustrating for all involved, not least for Chinese Taipei, given that almost eight months had elapsed since the substantive market access negotiations had been concluded. The situation was also disappointing for companies both in Chinese Taipei and in GPA Parties, which were still waiting for the mutual opening of procurement markets.

49. On a personal note, the Chairman paid tribute to the delegation of Chinese Taipei for its very active and constructive contribution to the review of the Agreement, despite the lack of progress in concluding their accession process. This, amongst other things, clearly demonstrated Chinese Taipei's strong commitment to the GPA.

50. He noted that he would no longer be able to contribute to Chinese Taipei's accession process, since he would be leaving Geneva at the end of August 2003. He had, however, discussed the matter with his designated successor (see Item G), and was pleased to indicate that his designated successor had offered his good offices to help resolve this issue. He appealed to all Parties involved to do their utmost so that the final hurdle in Chinese Taipei's accession process might be overcome.

51. The representative of Chinese Taipei thanked the Chairman for his outstanding leadership as Chair of the Committee over the previous year. He expressed his delegation's profound gratitude for the Chairman's unreserved support and great efforts in trying to complete Chinese Taipei's accession process during the period of his chairmanship. He drew attention to the preamble to the GPA, which recognised that an international framework of rights and obligations regarding government procurement would contribute to greater liberalisation and the extension of world trade. Based on his delegation's commitment to be a positive Member of the WTO, even in the knowledge that accession to the Agreement was likely to adversely affect Chinese Taipei's domestic suppliers to a certain extent, Chinese Taipei was determined to accede to the Agreement on Government Procurement in the more general framework of acceding to the WTO. Thanks to the support of the Parties involved, Chinese Taipei had successfully completed bilateral consultations on all the substantive issues and had sought to get its accession adopted in December 2002. In spite of so much good work, however, it was a non-economic issue that had prevented the conclusion of its accession at that time.

52. As further evidence of Chinese Taipei's continued determination to accede to the GPA, its responsible Minister had come to Geneva earlier that week and had been consulting very closely with the Chairman. However, despite the unreserved efforts and utmost flexibility from his delegation's side, regretfully, the non-economic issue had continued to be a stumbling-block. While expressing his delegation's great disappointment at the current stage of its GPA accession, he urged all GPA signatories to redouble their efforts so as to overcome that last outstanding hurdle as soon as possible. He took the opportunity to offer his delegation's best wishes to the Chairman in his future endeavours.

53. The representative of Japan said that his delegation looked forward to the accession of Chinese Taipei at the earliest possible date, and to that end, it would continue to work with the incoming Chairman and support his role.

54. The representative of the United States joined Japan in its statement. Her delegation had worked for many years to assist the accession of Chinese Taipei to the GPA, and had a strong interest in the commercial opportunities that this accession would bring to all Parties. The United States would welcome Chinese Taipei's accession as soon as it could be worked out. She encouraged the Chairman to continue his efforts to bring this issue to a resolution. She thanked the representative of Chinese Taipei, who had been very active in the discussions on the revision of the Agreement, and said this showed the clear commitment of Chinese Taipei to accede to the Agreement.

55. The representative of Canada joined Japan and the United States in thanking Chinese Taipei for its efforts to pursue accession and for its contribution to the review of the Agreement. Canada looked forward to the accession of Chinese Taipei at the earliest possible date, and encouraged the Chairman to continue working on finding a resolution.

56. The representative of Korea echoed the previous speakers who had supported the early resolution of the remaining issues and conclusion of the accession of Chinese Taipei as soon as possible.

57. The representative of China expressed his delegation's appreciation for the Chairman's excellent work during his chairmanship, and thanked him for his efforts in the relevant consultations to bridge differences. He noted that the Chairman's mediating efforts had helped to improve understanding among all Members concerned. The Chairman's skilfulness had enabled the exercise to be conducted in a positive way. He expressed his delegation's hope that this would continue in future consultations.

58. The Chairman stated that he had taken note of the commitments of all delegations to resolve this issue as soon as possible, and would convey to his successor the Parties' wish as regards his successor's involvement in the resolution of this issue. He proposed that the Committee revert to this issue at its next meeting, but also that the Committee could convene an additional formal meeting to deal with the issue if it had been resolved before the next scheduled formal meeting.

59. The Committee so agreed.

- *Other Accessions*

60. The Chairman noted that there were no comments by Parties with regard to the other ongoing accession processes, and said that the Committee would revert to this item at its next formal meeting.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

61. The Chairman noted that at the meetings October 2002 and February 2003, the delegation of the Netherlands with respect to Aruba had been invited to submit its notification of the implementing legislation in accordance with the requirements in document GPA/1/Add.1. The representative of the Netherlands with respect to Aruba noted that there had been no new developments on that issue.

62. The Chairman said that Hong Kong, China had sent a notification concerning its national implementing legislation (GPA/27/Add.1 circulated on 20 August 2003). The representative of Hong Kong, China informed the Committee that the communication her delegation had sent concerned an updated version of Hong Kong, China's basic procurement regulations, namely the Stores and Procurement Regulations.

E. OTHER BUSINESS

(i) *Date of Next Meeting*

63. The Chairman said that there were two meeting dates that the Committee needed to deal with: (i) the date of the informal meeting, which would also be an opportunity to discuss the plurilateral meeting with respect to the accession of Jordan (see Item C); and (ii) the date of the next formal meeting.

64. Following a brief discussion, the Committee agreed to hold its next informal meeting during week commencing 24 November 2003, and further that the incoming Chairman (see Item F below) would consult with Parties to determine appropriate days in that week to hold that meeting. Some Parties pointed out that the duration of the meeting can be shortened to three days. The representative of Japan expressed that his delegation would prefer the latter half of that week to hold that meeting.

65. As regards the date for the following formal meeting, the Chairman suggested that it might be practical that this coincided with the completion of the revision of the text of the Agreement, for which the Committee had agreed a deadline of spring 2004. He suggested that his successor consult with Parties to determine an appropriate date.

66. The Committee agreed to proceed as the Chairman had proposed.

F. ELECTION OF CHAIRMAN FOR THE REMAINDER OF 2003 AND FOR 2004

67. The Chairman recalled that in a fax dated 20 January 2003 he had informed Parties that he would be leaving Geneva at the end of August 2003 and that, accordingly, the Committee would need to elect a Chairperson for the remainder of 2003 and for 2004. In consequence, he had undertaken consultations with delegations and on the basis of those consultations, he understood that there was general support for the election of Mr. Niklas Bergström from the delegation of Sweden as Chairman.

68. The Committee duly elected Mr. Niklas Bergström (Sweden) as Chairman for the remainder of 2003 and for 2004.

69. The outgoing Chairman thanked the Committee for the very good cooperation and the pleasant atmosphere in which he had been able to do his work as Chairman. He also thanked the Secretariat for its support. He wished success to his successor.

70. The incoming Chairman thanked the Committee for the confidence it had placed in him. He said that he looked forward to working with the Committee, and was confident that there would be a good working atmosphere. He noted that he would also depend on the Secretariat in carrying out his work on the Committee. He thanked his predecessor for his skill and efficiency in chairing the Committee, and wished him best of luck in his future career.

71. The representatives of Canada; China; Chinese Taipei; the European Community; Hong Kong, China; Israel; Japan; Jordan; Korea; Singapore; Switzerland; and the United States thanked the outgoing Chairman for his work and conveyed their best wishes to him for the future. They welcomed the incoming Chairman and assured him of their support for his work.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 6 FEBRUARY 2003

Chairman: Mr. Jan Peter Mout (the Netherlands)

ELECTION OF CHAIRMAN FOR 2003

1. The Committee re-elected Mr. Jan-Peter Mout of the Netherlands as Chairman for 2003 until the end of his term in Geneva.¹

2. The Chairman proposed the following agenda:

A. Modifications to the Appendices to the Agreement

B. Accessions:

(i) *Applications:*

- *Jordan*

- *Estonia*

- *Latvia*

- *Chinese Taipei*

- *Panama*

- *Bulgaria*

- *Slovenia*

- *Albania*

- *Moldova*

- *Kyrgyz Republic*

- *Georgia*

- *Lithuania*

(ii) *Other newly acceded WTO Members*

¹ By fax, dated 20 January 2003, the Chairman, Mr. Jan-Peter Mout, advised that he was to be recalled to the capital with effect from August 2003.

(iii) *Streamlining of the accession process*

- C. Review of National Implementing Legislation
- D. Negotiations under Article XXIV:7
- E. Other Business

3. On a point of order, the representative of Bulgaria reiterated the request of his delegation for information from GPA Parties pertaining to export opportunities to their markets for Bulgarian suppliers. He drew attention to the absence of a reference to this in the annotated agenda and the 2002 annual report and requested that it be reflected in the annotated agenda in future. After a brief discussion, Bulgaria confirmed that it was not seeking a separate agenda item on this issue.

4. The Chairman noted that his request would be reflected in the minutes of the present meeting. With regard to the annotated agenda, the Chairman clarified that this was issued on his own responsibility, and he would make a judgement at the appropriate time as to what was suitable for its contents.

5. The Committee adopted the agenda as proposed.

A. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Modifications by the United States to Appendix I*

6. The Chairman said that the proposed modifications to Annex 2 of Appendix I by the United States which had been circulated in GPA/W/208 had become effective on 16 October 2002 (WT/Let/431).

(ii) *Modifications by Switzerland to Appendix I*

7. The Chairman said that Switzerland had proposed modifications to Annex 2 and the General Notes of its Appendix I in GPA/W/225, dated 12 December 2002. In a document circulated on 13 January 2003, Hong Kong, China had communicated its reservations on the proposed changes (GPA/W/236).

8. The representative of Hong Kong, China said that her delegation had submitted a notification expressing reservations on the grounds that the proposed modifications had a discriminatory effect, having regard to paragraph 7(c) of Article XXIV of the Agreement on Government Procurement (GPA), as Hong Kong, China had no sub-central entities and had been maintaining a non-discriminatory government procurement regime. Following satisfactory bilateral consultations, Hong Kong, China had received written confirmation from Switzerland informing it of Switzerland's decision to grant Hong Kong, China the benefit of access to its public authorities and public bodies at the level of cities and districts; she said this decision would be confirmed by Switzerland through a written notification to the WTO Secretariat after Switzerland had gone through its relevant internal procedures by June 2003. On this basis, Hong Kong, China was pleased to lift its reservations on the proposed modifications by Switzerland.

9. The Chairman said that the objection was accordingly lifted as of 6 February 2003 and the modifications would become effective on 7 February 2003 (WT/Let/437.)

(iii) *Modifications by the European Community to Appendix I*

10. The Chairman recalled that the European Community had proposed modifications to the General Notes of its Appendix I in GPA/W/226, dated 12 December 2002. The modifications had entered into force on 11 January 2003 (WT/Let/438).

(iv) *Modifications by Iceland to Appendix I*

11. The Chairman said that Iceland had proposed modifications to the General Notes of its Appendix I in GPA/W/227, dated 12 December 2002. The modifications had entered into force on 11 January 2003 (WT/Let/438).

12. In respect of the modifications by the European Community and Iceland, the representative of Japan suggested that the two Parties also consider reviewing and updating their Annexes 1, 2 and 3 in due course.

(v) *Modifications by Norway to Appendix I*

13. The Chairman said that Norway had proposed modifications to the General Notes of its Appendix I in GPA/W/228, dated 12 December 2002. The modifications had entered into force on 11 January 2003 (WT/Let/438).

(vi) *Modifications by Canada to Appendix I*

14. The Chairman said that Canada had sent a communication proposing modifications to Annex 1 of Appendix I, dated 12 September 2002 (GPA/W/203). In a communication, dated 7 October 2002, Hong Kong, China had sought clarification and further information regarding the proposed modifications (GPA/W/218). Canada's replies to the questions from Hong Kong, China had been circulated in GPA/W/229. The representative of Hong Kong, China referred to two further follow-up questions, which had been transmitted to Canada, to which Canada's replies were awaited.

15. The representative of Canada said that her delegation anticipated providing responses in due course.

(vii) *Modifications by Korea to Appendix I*

16. The Chairman said that Korea had proposed modifications to Annex 3 of its Appendix I in GPA/W/207. The United States, the European Community and Canada had made communications objecting to the entry into force of the proposed modifications and requesting additional time to study and to seek clarification (GPA/W/210, GPA/W/214 and GPA/W/217, respectively). Korea's response to the communication from Canada had been circulated in GPA/W/222. Further questions submitted by the European Community had been circulated in GPA/W/244.

17. Referring to his delegation's statement at the October 2002 meeting, the representative of Korea reiterated the point that a private entity should not be subject to the procedural requirements of the GPA on account of its previous existence as a government entity. He said that, with the conclusion of the sale of the Government's remaining shares in May 2002, Korea Telecom was now a wholly-owned private company, which conducted its procurement solely on commercial considerations. Korea had provided specific written clarification in response to a specific question put by Canada, and would also provide responses to additional questions recently raised by the United States and the European Community in due course. With the completion of Korea Telecom's privatization in August 2002, Korea sincerely hoped that this process would be expedited and concluded as soon as possible.

18. The representative of Canada confirmed that Canada was reviewing Korea's response and was not yet in a position to make a decision regarding the status of its objections. The representatives of the United States and the European Community drew attention, respectively, to the questions they had submitted and looked forward to receiving and reviewing Korea's responses in due course.

(viii) Modifications by Japan relating to NTT

19. With respect to the proposed modification by Japan to its Appendix I notified in document GPA/W/91, the Chairman recalled that consultations had been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107 and GPA/W/108). The United States had withdrawn its objection to the modifications proposed by Japan in October 2001 (GPA/W/166), and Canada in October 2002 (GPA/W/213). At the October 2002 meeting, the representative of the European Community had informed the Committee that his delegation wished to maintain its objection for the time being and that it would provide written confirmation of its position to Japan in this respect. On 5 February 2003, Japan had made a communication regarding the status of the consultations with the European Community (GPA/W/247).

20. The representative of Japan said that Japan had had ongoing consultations with the European Community and deeply regretted not being able to report an agreement with this Party at the present meeting, despite efforts made during consultations over the past three years. Japan realised that it would be quite difficult to solve the matter bilaterally, and was submitting this report to enable other Parties to better understand the matter at issue between it and the European Community regarding interpretation of the current Article XXIV:6. By submitting this communication to the Committee, Japan reserved its right to solve the matter through all procedures possible under the Agreement on Government Procurement.

21. Since the submission of the notification relating to NTT in September 1999, Japan had had a number of bilateral consultations with representatives of the European Community in Geneva, Brussels and Tokyo. After the withdrawal of objections to this notification by the United States in October 2001, Japan had intensified its bilateral contacts with the European Community with a view to solving the matter as soon as possible. Since October 2001 both delegations had conducted intensive consultations – three times in Geneva, and once in Tokyo. In August 2002, Japan had requested, by way of a letter from Ambassador Haraguchi to Ambassador Trojan, that the European Community present its position in writing, together with reasons for maintaining its objection, should this be the case. In October 2002, the European Community had replied, by way of a letter from Ambassador Trojan, that the European Community maintained its objections to Japan's notification for the time being. As for the reasons for its objections, the European Community had raised three issues: shareholding; NTT law; and the market situation – particularly concerning the independence of the telecommunications regulator in Japan, and on the lack of dominant carrier regulations over NTT Communications Corporation.

22. In December 2002, Japan had presented its position on the issues addressed in Ambassador Trojan's letter, and had requested the European Community to review its position and to consider withdrawing its objection. It had also called upon the European Community to present its final position by 25 January 2003. In January 2003, both parties had made additional efforts in order to explore ways for a mutually satisfactory solution. However, a deal had not proved possible due to the gap in the views regarding the level of market liberalization that should be proved by a Party wishing to withdraw an entity from its Appendix I. In the end, both Parties had recognized that neither could accept the position of the other.

23. On 30 January 2003, Japan had received a reply by way of a letter from Mr. Carl, Director General for Trade, European Commission, that the European Community was obliged for the time being to maintain its objection, seeing as the concerns raised in its letter of October 2002 had not been satisfactorily addressed, despite the additional clarifications provided by Japan in its letter of December 2002. In conclusion, Japan had proposed accordingly that the Committee consider the following issues in order to clarify and improve the procedures under the current Article XXIV:6: (a) an objecting Party should not prevent a proposed notification from becoming effective for reasons that were outside the scope of the GPA; (b) an objecting Party should not utilise its position to link the withdrawal of its objection to a solution or to progress in other trade issues; and (c) as the GPA was not a sector-specific agreement, but a general agreement on procurement, all entities notified under Article XXIV:6 should be treated equally under the Agreement and examined under equivalent criteria (for example, legal oversight, ownership of shares, voting rights, appointment of the managing board, financial support, special or exclusive rights), and, therefore, an objecting Party should not place sector-specific requirements on any entity notified under Article XXIV:6 which were not equally applicable to entities in other sectors.

24. The representative of the European Community confirmed that his delegation maintained its objection to the withdrawal of NTT Communications Corporation from the GPA. He said it was clear from the extensive discussions with Japan that the European Community and Japan had divergent views on the meaning of Article XXIV:6. The European Community maintained that its interpretation was correct, and that its concerns in respect of NTT Communications Corporation were within the scope of the GPA. The European Community was willing to continue discussions with Japan on this matter. With regard to the issues for consideration at the end of Japan's statement, the European Community viewed them to be matters of a general nature that did not affect the matter of NTT Communications Corporation.

25. The representative of Korea recalled that the current GPA Article XXIV:6 provided that a Party in exercise of its rights could withdraw an entity from Appendix I on the grounds that government control or influence over it had been effectively eliminated, and that allowance should be made for the market opening effects of the removal of government control or influence. Even though the current provision did not provide the detailed criteria regarding the elimination of government control or influence, it appeared that Japan had provided sufficient information to prove that government control and influence had been eliminated, and that there had been market opening effects from the privatisation of NTT Communications Corporation.

26. The issue of independent regulator and dominant carrier regulations raised by the European Community, however, seemed to have different characteristics from the criteria stipulated in the GPA. He said objecting Parties should not place undue burden and demands that went beyond the rights and obligations in the GPA, and it seemed more appropriate to tackle this issue in relation to the implementation of the concessions and obligations under the GATS. In addition, the privatization process of Parties should be further encouraged as a means of enhancing its market opening effects, and any burden of obligation on the process may rather impede the eager participation of other developing and newly acceded Members of the WTO to the GPA, considering that they were the ones likely to be privatizing government-owned or government-controlled entities in the future. Korea reserved its right to revert to the matter after closer examination, given the specific concerns and significance of the current situation.

(ix) *Modifications by Japan relating to railway companies*

27. With respect to the proposed modification by the delegation of Japan to its Appendix I in GPA/W/144, 145 and 146, dated 29 August 2001, the Chairman said that communications had been received from the delegations of the United States, Canada and the European Community (GPA/W/151, GPA/W/155 and GPA/W/156) seeking clarification and objecting to the proposed withdrawal of the three Japanese railway companies, namely East Japan Railway Company, Central

Japan Railway Company and West Japan Railway Company from the coverage of the GPA. Relevant notifications received from Japan had been circulated in GPA/W/152, GPA/W/152/Corr.1 and GPA/W/179. Additional questions had been received from the European Community and the United States in 2001 (circulated in GPA/W/164 and GPA/W/165, respectively). Japan's responses to these questions were contained in GPA/W/180 and GPA/W/181. In 2002, the delegations of the United States and the European Community had submitted further questions, which had been circulated in GPA/W/204 and GPA/W/205, respectively. An additional question received from Canada relating to Central Japan Railway Company and West Japan Railway Company had been circulated in GPA/W/212. Japan's responses to these questions were circulated in GPA/W/233, GPA/W/234 and GPA/W/235, respectively, dated 7 January 2003. Follow-up questions had been communicated by the European Community in GPA/W/245.

28. In a communication dated 1 October 2002, Canada had withdrawn its objection to the modification of Appendix I of the GPA related to the East Japan Railway Company (GPA/W/211) and in a further communication dated 1 February 2003, had also withdrawn its objection to the modifications related to the Central Japan Railway Company and the West Japan Railway Company (GPA/W/246).

29. The representative of Japan thanked Canada for its decision to withdraw its objection to the proposal concerning all three railway companies. She said Japan had, during the week, held bilateral meetings with the United States and the European Community, respectively. Japan believed that the remaining two Parties objecting to its notification had come to an adequate assessment of its proposal, and hoped that a mutual understanding could be reached as early as possible that the proposed withdrawal of the three railway companies was consistent with Article XXIV:6(b) of the GPA. Japan believed that it had provided the Parties concerned with extensive information on its proposal and a time long enough for them to carefully review it. To expedite this process, Japan had requested these Parties to specify in writing the reasons for their continued objection to the proposal, and expected to receive their replies in due course. Japan also hoped to be able to focus on any remaining issues of concern that an objecting Party might have in the light of Article XXIV:6(b).

30. The representative of the United States said that her delegation was carefully reviewing all the relevant material with a view to reaching a conclusion as to whether government control had been effectively eliminated, but at present wished to maintain its objection (GPA/W/151).

31. The representative of the European Community said that his delegation looked forward to receiving Japan's responses to the questions it had submitted recently, and wished to maintain its objection for the time being (GPA/W/155).

32. The representative of Canada confirmed the withdrawal of Canada's objection to the removal of the two entities West Japan Railway Company and Central Japan Railway Company from Japan's Annex 3. Canada noted that Japan had provided extensive assurances that it would not exercise control over these two companies. However, in Canada's view, Japan continued to have effective control over these companies through its 100 per cent ownership of Japan Railway Public Construction Corporation, which in turn was the single largest shareholder in the otherwise widely held West Japan Railway Company and Central Japan Railway Company. Although Japan had not undertaken to put in place legal measures to ensure that control was not exercised in the future, Canada noted, and appreciated, the assurances that Japan would not exercise control of these companies.

33. The Committee agreed to revert to this issue at its next meeting.

(x) *Modification by the United States to reflect recent changes in the administrative structure of its Federal Government*

34. The Chairman said that, with respect to the proposed modifications of Appendix I by the United States in GPAW/153, dated 25 September 2001, the delegations of Canada, the European Community and Japan had made communications seeking further information from the United States and objecting to the proposed modifications entering into force at the end of the 30-day period (circulated in GPA/W/167, GPA/W/163 and GPA/W/162, respectively). The responses by the United States to the questions raised by the three Parties had been circulated in GPA/W/183-185. Further questions had been put by Japan (GPA/W/195) and the European Community (GPA/W/216). The responses of the United States had been circulated in GPA/W/223 and 243.

35. The representative of the United States made reference to bilateral discussions that the United States had had with Japan during the week. She said her delegation hoped that its responses would satisfy the Parties but was otherwise happy to answer other questions with the view to bringing this matter to a speedy conclusion.

36. The representatives of Japan and Canada said that they were reviewing the United States' responses.

37. The Chairman said that the Committee would revert to this matter at its next meeting.

B. ACCESSIONS

(i) *Applications:*

- *Jordan*

38. The Chairman announced that Jordan had submitted its entity offer on 6 February 2003 (GPA/SPEC/29).

39. The representative of Jordan said that his country's offer had been previously approved both by the National Committee set up for the purpose and also by the Cabinet. Jordan looked forward to a quick and favourable acceptance of its offer by Parties but was nevertheless ready to provide any clarifications. Jordan had set up a team to carry out the necessary negotiations. If its offer was accepted, Jordan would be one of the very few developing countries to accede to the GPA and the first Arab country to do so.

40. The representatives of the United States, the European Community, Israel, Canada, Japan, Switzerland and Korea, congratulated Jordan for the submission of its offer and said they looked forward to giving it their careful consideration and entering into discussions with Jordan at an appropriate stage. The representative of Switzerland drew attention to certain aspects of the offer, including the fact that Jordan had broadly the indicative timetable for accession negotiations (GPA/W/109/Rev.2), and also that the offer had been approved by the Jordanian Cabinet, and hoped that on its part, Parties to the GPA would move swiftly to respond to this offer. This offer from Jordan should also provide useful background information in the context of the ongoing negotiations under Article XXIV:7 of the GPA.

41. The Chairman said that, in accordance with the indicative timetable for accession negotiations, comments on the offer should be communicated to Jordan within two months, i.e. by 20 April 2003.²

- *Estonia*

42. The representative of Estonia said that Estonia's Public Procurement Act was being reviewed and it was expected that the changes would be adopted by the end of the third quarter of 2003, following approval by the Government and debate and adoption by Parliament. These changes concerned mainly definition of contracting authority, exception procedures for procurement, and dispute settlement.

43. The Chairman invited Estonia to communicate the changes to the Committee with an explanation of their impact on Estonia's offer.

- *Latvia*

44. The representative of Latvia said that, since the October 2002 meeting, Latvia had continued to have bilateral consultations with the European Community, during which several issues had been raised. These issues involved substantial technical effort on the part of Latvia, as well as modifications to its national legislation. Following the election of a new Parliament, as previously reported, the legislative process was now gaining speed, and Latvia's capital-based experts were involved in the process of alignment of the relevant national legislation to that of the European Union. The representative assured the Committee that Latvia continued to progress all issues raised in the bilateral consultations.

- *Chinese Taipei*

45. The Chairman said that, since the October 2002 meeting, Chinese Taipei had held bilateral consultations with interested delegations. Furthermore, in his capacity as Chair, he had also held informal consultations with Chinese Taipei and interested delegations regarding the issue of nomenclatures in Chinese Taipei's draft offer. These consultations had not yet been completed.

46. The representative of Chinese Taipei said that, in order to honour its WTO accession commitment, the Government of Chinese Taipei had shown very strong readiness to accede to the GPA since its accession to the WTO. In December 2002, with the support of the Chairman and other GPA Parties, his delegation had successfully completed all the bilateral consultations on the substantive issues. Chinese Taipei regretted that the issue of nomenclature had become a barrier for completing its accession, and took the opportunity to reiterate its policy of utmost flexibility on this matter, with the view to achieving adoption of its accession decision as soon as possible. He said that this issue should not continue to be a barrier, and called on the Chairman to use his good offices – and solicit all GPA Parties to render the necessary support – so as to facilitate the satisfactory and speedy conclusion of Chinese Taipei's accession.

47. The representatives of Singapore and Israel confirmed that their delegations had completed bilateral consultations with the delegation of Chinese Taipei in December 2002. The representative of Israel expressed disappointment that Chinese Taipei's accession could not be completed at the present meeting, and hoped that this would be achieved at the next meeting.

² Questions and requests for information received subsequently from the United States have been circulated in GPA/SPEC/30.

48. The representative of China said that any concerns relating to any accession of Parties to the GPA were relevant to the process, and hoped that all such issues could be solved through the bilateral and plurilateral consultations.

49. The Chairman drew attention to the important progress achieved in this accession, leading to the satisfactory conclusion of the bilateral market access negotiations. It was unfortunate that there had not been enough progress on the issue of nomenclatures to complete this process at the present meeting. If, however, the outstanding issue was resolved, a meeting of the Committee could be convened at short notice to approve the accession of Chinese Taipei. The Chairman, on his own behalf, expressed the hope that this moment would come soon, and also echoed the views that had been made by various delegations, that all necessary efforts should be made to resolve the outstanding issue.

- *Panama*

50. The Chairman said that no developments had been reported in relation to Panama's accession process since 2001.

- *Bulgaria*

51. The Chairman said that, at the October 2002 meeting, the Committee was informed that Bulgaria expected to be able to provide additional detailed information shortly regarding amendments to the national public procurement legislation, which had been passed in April 2002. A follow-up question by Canada in respect of Bulgaria's accession had been circulated in GPA/W/219.³

52. The representative of Bulgaria reiterated the request of his delegation for relevant information from GPA Parties pertaining to export opportunities in their markets for Bulgarian suppliers. He said that, as part of its GPA accession process, Bulgaria had liberalized autonomously, aligning its procurement legislation to the requirements of the Agreement, and opening its government procurement market to foreign suppliers. By the same token, to ensure that this delivered mutual benefits, it sought, through its accession process, to gain access to the government procurement markets of Parties, and the information it was requesting was to help it to assess the benefits.

53. The representative of Switzerland, supported by the representatives of the United States and Canada, provided guidance to Bulgaria by reference to available information sources such as the statistics on government procurement reported under Article XIX:5 of the GPA, and published trade statistics. The representative of Switzerland said that the export opportunities open to Bulgaria was dependent on that country's export potential. He offered the bilateral assistance of Switzerland in providing relevant statistics pertaining to Switzerland to Bulgaria. The representative of Canada drew attention to the wealth of information available from its schedules and also offered to meet with Bulgaria on a bilateral basis to review the schedules and other data.

54. The representative of Bulgaria said that his authorities would have technical difficulties in making this assessment and sought practical assistance, for instance in the form of a technical assistance project.

55. The Chairman said the Committee would revert to this issue at its next meeting.

³ Bulgaria's answer thereto has been circulated in GPA/W/249.

56. With regard to the follow-up question by Canada to a reply previously given by Bulgaria in GPA/SPEC/23/Rev.1, dated 29 January 2002, the representative of Bulgaria clarified that Article 41(4) of the Public Procurement Law did not provide for automatic extension of preferences to SMEs participating in public procurement. Such enterprises had the same rights to participate in public procurement procedures as other Bulgarian or foreign natural or legal persons. Priority was accorded if and only if, at the evaluation stage, two or more tenders were ranked equal including in price and one of those tenderers was either an SME or had an SME as a subcontractor. He said the national statistics showed that this preference did not have substantial practical meaning and value, given that contracting authorities applied it in only 0.1 per cent of the procurement procedures conducted over the last three years.

- *Slovenia*

57. The representative of Slovenia reiterated the interest of his Government to accede to the GPA, and apologized for the delay in the process. He said that, though the national legislation was in full accord with the both the Agreement and EU Directives, it did not give a mandate to the Government to prepare the initial offer that would meet expectations of Parties in its scope – namely, that a number of entities that performed public utilities and other activities in the national interest with exclusive rights both at central government and local community levels were established in Slovenia under private law, irrespective of whether they had public or private ownership or government arrangements. The legislative changes and amendments which were deemed necessary in order to streamline the practice based on the Slovenian Public Procurement Act were being drafted and were expected to be submitted for the consideration of the Parliament shortly, and Parties would be kept abreast of subsequent developments.

- *Albania*

58. The Chairman said that Albania's responses to questions put by the European Community; Hong Kong, China; Switzerland; and Canada had been circulated in GPA/W/238-241.

- *Moldova*

59. The Chairman said that the questions received from Hong Kong, China; and the European Community had been circulated in GPA/W/206 and GPA/W/231, respectively.

- *Kyrgyz Republic*

60. The Chairman said that the replies to the Checklist of Issues had been circulated in GPA/W/197, dated 10 June 2002. Further questions raised by the delegation of the United States and the European Community had been circulated in GPA/W/201 and GPA/W/230, respectively. The replies of the Kyrgyz Republic to the questions raised in GP/W/201 had been circulated in GPA/W/248.

61. The representative of the Kyrgyz Republic said that the questions received from the European Community were under review by capital-based experts. While the Government of the Kyrgyz Republic attached due importance to the work of the Committee concerning the accession of the Kyrgyz Republic, his delegation wished to stress the need for adequate time for the necessary work to be done in order to bring its national legislation into conformity with the requirements of the GPA. On the basis of the questions posed by the United States and the European Community, as a follow-up to the Checklist of Issues, it appeared that delegations were concerned about some measures found in several articles of the Law on Government Procurement of Works and Services – especially those contained in Articles 3, 41 and 39 and 40 concerning the method of quotations and procurement from a single source. In this respect, his delegation wished to echo the statement made by its Korean counterpart that some flexibility needed to be accorded to developing countries and those economies

in transition to accommodate the necessary requirements to their national legislation so as to avoid any ambiguity between the GPA requirements and their national law.

- *Georgia*

62. The Chairman said that questions received from Canada and the European Community regarding Georgia's replies to the Checklist of Issues had been circulated in GPA/W/220 and GPA/W/232, respectively. Georgia's responses to Canada's questions had been circulated in GPA/W/237.

63. In respect of the answer to question 1 in Georgia's replies to Canada's question, Hong Kong, China noted that Georgia's law providing 15 per cent preferential privilege to Georgian suppliers constituted discriminatory treatment in favour of local goods and suppliers. Similarly, in respect of the answer to question 2, the requirement that 70 per cent of the personnel be citizens of Georgia offended against the non-discrimination principle in Article III of the Agreement and prohibition against offsets in Article XVI. Hong Kong, China considered, accordingly, that these should be rectified before Georgia's accession to the GPA, and, in that connection, was pleased to note that Georgia had confirmed its willingness to consider making appropriate amendments in the Georgian state procurement legislation if so requested during the accession process.

64. The representative of Canada said that her delegation may have additional follow-up questions. The representative of the United States said that her delegation looked forward to receiving the responses of Georgia to its questions.

- *Lithuania*

65. The Chairman said that no developments had been reported in relation to the accession of Lithuania since the May 2002 meeting.

(ii) *Other newly acceded WTO Members*

- *Oman*

66. The Chairman said that no developments had been reported in respect of Oman's accession to the GPA since the February 2002 meeting.

67. The representative of the United States said that the United States had submitted questions to Oman in GPA/SPEC/25 and looked forward to receiving responses as soon as possible.

- *Croatia*

68. The Chairman said that no developments had been reported in respect of Croatia's accession to the GPA since the February 2002 meeting.

- *China*

69. The Chairman said that no developments had been reported in respect of China's accession to the GPA since the October 2002 meeting.

- *Mongolia*

70. The Chairman said that no developments had been reported in respect of Mongolia's accession to the GPA since the September 2001 meeting.

(iii) *Streamlining of the accession process*

71. The Chairman said that informal consultations on streamlining of the accession process had been held in October 2002. For the present meeting, he drew attention to a communication circulated by Chinese Taipei (GPA/W/224) and a note by the Secretariat summarizing the points made at the October 2002 meeting (Job No. 967).

72. Referring to paragraph 5 of GPA/W/224, which read: "Any pending issues that cannot be resolved during bilateral and plurilateral consultations shall be set aside for further consultations, provided that the issues are related to a specific Party only. The acceding country's offer may be adopted by setting such pending issues aside.", the representative of China said that the proposal involved changing the GPA accession procedure as well as impacting on the overall accession procedures of the WTO, and required clarification. In the view of his delegation, there was no basis yet for changing the accession procedure in this way.

73. The representative of Chinese Taipei clarified that, as a plurilateral Agreement, some of the market access provisions were concluded on the basis of reciprocity, and this proposal was meant to deal with that.

74. The representative of the United States, supported by the representative of Switzerland, suggested that the Committee's work pertaining to the streamlining of the accession process be undertaken in the context of the revision of the Agreement, and scheduled, accordingly, as part of that ongoing work. The representative of Switzerland added that it would shortly be necessary to translate the outcome of the streamlining work into an appropriate text in the context of the revision of the Agreement, taking into account the accession of countries at different levels of economic development, given the fact that, as compared with several other WTO agreements, the Agreement had a very substantial impact on domestic legislation.

75. The Committee agreed to revert to the issue of streamlining of the accession process in the wider context of its work on the revision of the Agreement.

C. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

76. The Chairman recalled that Iceland had notified its national implementing legislation on 7 October 2002 (GPA/69). In accordance with the procedures agreed for the review of implementing legislation, the Committee had agreed at its October 2002 meeting that delegations that wished to put questions to Iceland should do so by 16 December 2002, and that Iceland should provide its answers by 16 February 2003. No questions had been put to Iceland to date.

77. The Committee agreed that the review of Iceland's implementing legislation had been completed.

78. At the October 2002 meeting, the delegation of the Kingdom of the Netherlands with respect to Aruba had been invited to submit its notification of national implementing legislation in accordance with the requirements in GPA/1/Add.1.

79. The representative of the Kingdom of the Netherlands with respect to Aruba said that there were no new developments to report.

80. The Committee agreed to revert to this matter at its next meeting.

D. NEGOTIATIONS UNDER ARTICLE XXIV:7

81. The Chairman reported on the informal meeting held on the Article XXIV:7 negotiations on 4 February 2003. The Group had carried forward the work on the revision of the text of the GPA by taking up the issues in basket 1 (basic principles, scope and coverage and related definitions, exceptions, developing countries and accessions) followed by a discussion of the issues in basket 3 (information and review as regards obligations of entities, information and review as regards obligations of Parties, enforcement, institutions, and statistical reporting) and basket 2 (tendering procedures, technical specifications and related definitions), respectively.

82. On basket 1 issues, the Group had had before it a joint submission by the European Community, the United States and Canada (Job No. 746); a proposal by Norway on the Note to Article I, paragraph 1 (Job No. 10232); and the latest revision of the Secretariat document "Suggested Drafting Changes to 1994 Agreement" (Job No. 8957), dated 7 November 2002. The group had had a detailed discussion on the Articles related to basket 1 focusing mainly on the joint proposal. A revised text for the Preamble contained in the joint proposal had also been taken up. Moreover, there had been a preliminary exchange of views on the proposal by Norway suggesting the deletion of the Note to Article I on tied aid.

83. On basket 3 issues, the discussion on each of the relevant Articles had been carried out on the basis of a draft text by the Chairman suggesting possible revised provisions relating to the issues in this basket (Job No. 341).

84. As regards basket 2, the delegation of Canada had introduced a submission commenting on the Article on negotiation procedures (Job No. 826). The Group had been informed by a number of delegations that, since the last meeting, they had been working together in order to seek to narrow the differences between the drafting proposals that had been made on basket 2 and that they would share the results of their work in the near future with other delegations.

85. The Group had also considered elements 2 and 3 of the work programme, relating to expansion of coverage and elimination of discriminatory measures. Pursuant to the requirement in the work programme on this aspect of the Article XXIV:7 negotiations (GPA/M/17, Annex), the delegations of Japan and Canada had introduced non-papers entitled "Expansion of Coverage and Elimination of Discriminatory Measures and Practices" (Job No. 8223) and "Modalities - Questions for Consideration" (Job No. 825) that they had tabled, respectively. Clarifications had been sought by a number of delegations on a number of issues covered in these papers.

86. The Group had also held an informal drafting meeting on 5 February to consider further comments of the Parties on the joint submission on basket 1 made by Canada, the European Community and the United States (Job No. 746). At the request of the Chairman, the representative of the United States provided a brief report to the Committee on this informal drafting meeting.

87. The representative of the United States said that this meeting had allowed Parties to exchange views on a number of issues and to continue to narrow their differences. Three sets of issues had been addressed in the drafting session. First, issues had been identified that Parties had concluded could only be taken up after the Cancun Ministerial Conference, and which would be considered as part of the market access discussions on elements 2 and 3 of the work programme. Those issues included references to build-operate-transfer or public concession contracts, found in both the definition in Article I and in a provision in Article II:1; a threshold proposal in Article II, labelled *Iibis*; and the definition of procurement in Article I.

88. Continuing on his report on the informal meeting, the Chairman said that a second category of issues pertained to provisions currently in basket 1 that, due to linkage, could not be resolved until those in baskets 2 and 3 had been appropriately addressed. One such area involved standards that

related to the technical specifications provisions in basket 2, whilst definitions proposed in Article I in basket 1, included international standards, standards, technical regulations, and technical specifications. A second area concerned a number of bracketed definitions of tendering procedures (selective, limited and open tendering) in the definitions section in basket 1. Other areas concerned the definition of conditions for participation in Article I, which would have to be taken up in the context of the qualification and conditions for participation provisions in basket 2; and references in Article III:1 and III:2 to procuring entities that related to the national treatment obligations of entities, and which linked back to basket 2. Finally, the current Article IV "Publication of Laws and Regulations", needed to be integrated with basket 3 issues; this was more by way of re-location, rather than a substantive issue. All of these would have to be addressed in the context of the work on basket 2.

89. A third category related to specific drafting proposals in basket 1. These included changes in several definitions, as well as in various provisions in Articles II-IV.

90. Overall, Parties had had good discussions and made progress in terms of the drafting of definitions, work on Article II in the valuation provisions, as well as some drafting in Articles III and IV. Several issues had been raised in the course of the meeting which would require further consideration in the context of the revision of the text.

91. The Chairman said that The Group had agreed to hold further informal meetings to further progress the work pertaining to this agenda item – during the periods of 5-8 May 2003, 16-18 June 2003 back-to-back with the meetings on transparency in government procurement, and in the week of 28 July 2003.⁴

92. As regards elements 2 and 3 of the work programme, the Chairman suggested that the Group revert to these at its May 2003 meeting. In addition to the papers that the delegations of Canada and Japan had already submitted, he encouraged other delegations to put forward, before the May meeting, any further ideas on possible approaches to the negotiations in these areas. Given the difficulties they would encounter in devoting adequate time to both the work on the revision of the text and to the other two elements and to undertaking substantive work on all the elements in a balanced way, the Group would need to give priority to the revision of the Agreement in the period up to the Cancun Ministerial Conference. Notwithstanding this, delegations had agreed that the Group would need to come back to these issues on a regular basis in order to maintain the momentum of work if the objectives of the negotiations on the other two elements were to be met within the time-frame of the work programme.

93. The Committee agreed to proceed as set out above.

E. OTHER BUSINESS

(i) *Date of next meeting*

94. The Committee agreed to hold its next meeting in the week of 28 July 2003.⁵

⁴ Subsequently postponed to 11 August 2003.

⁵ Subsequently postponed to the week of 11 August 2003.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 8 OCTOBER 2002

Chairman: Mr. Jan Peter Mout (the Netherlands)

1. The following agenda was adopted:
 - A. Election of Chairman for the Remainder of 2002
 - B. Modifications to the Appendices to the Agreement
 - C. Accessions:
 - (i) *Applications:*
 - *Estonia*
 - *Latvia*
 - *Chinese Taipei*
 - *Panama*
 - *Bulgaria*
 - *Slovenia*
 - *Albania*
 - *Moldova*
 - *Jordan*
 - *Kyrgyz Republic*
 - *Georgia*
 - *Lithuania*
 - (ii) *Other newly acceded WTO Members*
 - (iii) *Streamlining of the accession process*
 - D. Review of National Implementing Legislation

- E. Negotiations under Article XXIV:7
- F. Other Business:
 - (i) *Revision of the Decision on Procedures for Circulation and Derestriction of Documents*
 - (ii) *Response to the letter received from the Chairman of the Committee on Trade and Development*
 - (iii) *Letter from the Chairman of the Committee to WTO Members with observer status in the Committee*
 - (iv) *Letter from the Chairman of the Committee to WTO Members*
- G. Annual Report
- H. Date of the next meeting

A. ELECTION OF CHAIRMAN FOR THE REMAINDER OF 2002

2. Following the resignation of the Chairman for 2002, Mr. Martin Loken, with effect from 2 August 2002, the Committee elected Mr. Jan-Peter Mout of the Netherlands as Chairman for the remainder of 2002.

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Modifications by Japan to Annex 3 of Appendix I*

3. The Chairman said that the proposed modifications to Annex 3 of Appendix I by Japan in GPA/W/196 had become effective on 27 June 2002. The document containing the certification of the modifications had been circulated as WT/Let/425. That document had subsequently been revised and circulated as WT/Let/425/Rev.1 to indicate a technical error related to the effective date of the modifications.

(ii) *Modifications by Singapore to Appendices I, II, III and IV*

4. The Chairman said that the proposed modifications to Appendices I, II, III and IV by Singapore in GPA/W/200 had become effective on 11 August 2002 (WT/Let/429).

(iii) *Proposed modifications by the United States to Annex 2 of Appendix I*

5. The Chairman said that the United States had proposed modifications to Annex 2 of Appendix I which had been circulated in document GPA/W/208, dated 16 September 2002.¹

(iv) *Proposed modifications by Canada to Annex 1 of Appendix I*

6. The Chairman said that Canada had sent a communication proposing modifications to Annex 1 of Appendix I, dated 12 September 2002 (GPA/W/203). In a communication dated 7 October 2002,

¹ These modifications became effective on 16 October 2002 (WT/Let/431).

Hong Kong, China had sought clarification and further information regarding the proposed modifications (GPA/W/218).²

(v) *Proposed modifications by Korea to Annex 3 of Appendix I*

7. The Chairman said that Korea had proposed modifications to Annex 3 of Appendix I, dated 11 September 2002, to withdraw Korea Telecom (KT) from Annex 3 of Appendix I, on the grounds that the Korean Government's control or influence over KT had effectively been eliminated (GPA/W/207). The United States, the European Community and Canada had sent communications objecting to the entry into effect of the proposed modifications and requesting additional time to study and to seek clarification regarding the proposed changes (GPA/W/210, GPA/W/214 and GPA/W/217, respectively).

8. The representative of Korea said that, in August 2002, KT had announced the completion of the privatization of KT that had been carried out since 1993. KT was no longer a government invested entity, and its rights and obligations as a government invested entity had expired. With the sale of its remaining government shares in May 2002, no Korean Government or Korean Government-owned institutions held shares in KT. KT was now owned completely by the private sector, and was thus fully private from both a legal and practical point of view. KT was therefore entitled to conduct its procurement solely on commercial considerations. As a company operated purely by its private shareholders, of which 49 per cent were foreign investors, KT was not subject to any government control or influence, both in legal and practical terms. Before privatization, KT had been subject to both the Commercial Act and the Privatization Act. However, with the completion of the sale of its remaining government shares, KT had been transformed into a fully private company excluded from coverage of the Privatization Act, and only subject to the Commercial Act. Korea had recently held bilateral consultations with the United States and the European Community and was ready to further consult with them in order to expedite the modification process. Those Parties who continued to object to the proposed modifications should specify their concerns or questions in writing as soon as possible.

9. Concerning the confirmation requested by Canada (GPA/W/217) regarding the application of national treatment and MFN obligations of the GATT and the GATS to "any measures taken by the Government of Korea pertaining to purchases by KT", the representative of Korea reiterated that since it was completely privatized earlier this year, KT was free from any government control or influence in making its business decisions including purchasing decisions. The Korean Government accordingly did not have any legal or other means to intervene in KT's purchasing decisions, and it did not envisage taking any measure pertaining to purchases by KT because KT was free to make its purchasing decisions solely in accordance with commercial considerations.³

10. The representative of the United States noted that her delegation had had extensive bilateral discussions with Korea, and that Korea had provided a considerable amount of information. The United States, however, expected to have a few remaining questions to put to Korea. The representative of the European Community said that his delegation had had bilateral discussions with Korea, and that it would be submitting further questions to Korea as soon as possible.⁴

11. The representative of Korea said that the situation in which a private entity was subjected to the procedural requirements of the Agreement was not justified. The Agreement was not intended to discipline the purchasing decisions of private entities which made business decisions solely in accordance with commercial considerations and totally free from the control and influence of the government.

² Canada's replies to questions from Hong Kong, China were subsequently circulated in GPA/W/229.

³ Response subsequently circulated in writing in document GPA/W/222.

⁴ Subsequently circulated in document GPA/W/244.

(vi) *Japan's proposed modifications relating to NTT*

12. With respect to the proposed modification by Japan to its Annex 3 of Appendix I notified in GPA/W/91, the Chairman recalled that consultations had been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107 and GPA/W/108). Japan's responses to the additional questions from Canada had been circulated in document GPAW/199. The United States had withdrawn its objection to the modifications proposed by Japan on 19 October 2001 (GPA/W/166), and Canada on 1 October 2002 (GPAW/211).

13. The representative of Canada said that Canada had withdrawn its objection based on the particular circumstances relating to NTT Communications and without prejudice to Canada's views in any other circumstances (GPA/W/213).

14. The representative of Japan said the European Community was now the only Party objecting to the withdrawal of the proposed modifications. Japan had requested the European Community to forward written comments before this meeting but that the European Community had been unable to do so due to their own internal consultations. The European Community would not lose any trade benefits accruing to it under the Agreement by the withdrawal of NTT Communications from Annex 3 of Japan's Appendix I because there was no discriminatory treatment against European Community goods and services or suppliers in actual procurement operations by NTT Communications. NTT Communications remained committed to a policy of open, fair and non-discriminatory procurement and in practice had procured telecommunications products from a number of foreign suppliers in various countries including the countries in the European Community. She therefore hoped that the European Community would withdraw its objection to the proposed modifications.

15. The representative of the European Community said that the European Community maintained its objection to the withdrawal of NTT Communications for the time being and would provide written confirmation of its position to Japan in the near future.

(vii) *Japan's proposed modifications relating to railway companies*

16. The Chairman said that, with respect to the proposed modification by the delegation of Japan to its Annex 3 of Appendix I in documents GPA/W/144, 145 and 146, dated 29 August 2001, communications had been received from the delegations of the United States, Canada and the European Community (GPA/W/151, GPA/W/155 and GPA/W/156, respectively) seeking clarification and objecting to the proposed withdrawal of the three Japanese railway companies, namely East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company from the coverage of the Agreement. Communications received from Japan providing clarifications regarding the proposed modifications had been circulated in GPA/W/152 and Corr.1 and GPA/W/179. Additional questions had been received from the European Community and the United States in 2001 (GPA/W/164 and GPA/W/165, respectively). Japan's responses to these questions were contained in GPA/W/180 and GPA/W/181, respectively. In 2002, the delegations of the United States and the European Community had submitted further questions, circulated in GPA/W/204 and GPA/W/205, respectively.⁵ An additional question received from Canada relating to Central Japan Railway Company and West Japan Railway Company had been circulated in GPA/W/212.⁶

⁵ Japan's responses thereto were subsequently circulated in documents GPA/W/233 and GPA/W/234, respectively.

⁶ Japan's responses thereto were subsequently circulated in document GPA/W/235.

17. The representative of Japan said that her delegation had held a series of bilateral meetings with the delegations of Canada, the European Community and the United States which had involved an extensive exchange of questions and answers. Japan believed that the three objecting Parties had come to an adequate assessment of the proposal. Her delegation hoped that Japan could reach a mutual understanding as soon as possible with the three Parties concerned regarding its proposed withdrawal of the three railway companies in accordance with Article XXIV:6(b) of the Agreement. Japan requested the three objecting Parties to proceed with the matter expeditiously.

18. The representative of the European Community said that the responses received from Japan were being reviewed by his delegation and that it hoped to proceed with the matter in an expeditious manner.⁷

19. The representative of the United States said that her delegation would examine closely Japan's responses to its questions. Meanwhile, the United States maintained its objection.

20. The representative of Canada said that in a communication, dated 1 October 2002, Canada had withdrawn its objection to the modification to Appendix I of the Agreement related to the East Japan Railway Company (GPA/W/211). Canada had been holding consultations with Japan with regard to West Japan Railway Company and Central Japan Railway Company respectively.

(viii) Proposed modification by the United States to reflect recent changes in the administrative structure of its Federal Government

21. The Chairman said that, with respect to the proposed modifications to Appendix I by the United States in GPA/W/153, dated 25 September 2001, the delegations of Canada, the European Community and Japan had made communications seeking further information from the United States with respect to the notification in GPA/W/153 and objecting to the proposed modifications going into effect at the end of the 30-day period (circulated in GPA/W/167, GPA/W/163 and GPA/W/162, respectively). The responses by the United States to the questions raised by the three Parties had been circulated in GPA/W/183-185, respectively. Further questions had been put by Japan (GPA/W/195) and the European Community (GPA/W/216).⁸

22. The Chairman said that the Committee would revert to this matter at its next meeting.

C. ACCESSIONS

(i) Applications:

- *Estonia*

23. The Chairman said that the questions raised by the United States regarding replies from Estonia in GPA/W/190/Rev.1 had been circulated in GPA/W/202, dated 22 August 2002. Estonia's replies thereto had been circulated in GPA/W/215. As agreed at the May 2002 meeting, further plurilateral consultations had been held between interested Parties and Estonia on 8 October 2002. At these consultations, the Parties had been informed that Estonia needed additional time to assess the impact on its accession of the forthcoming legislative changes. There also appeared to be a number of issues outstanding in their bilateral consultations with the European Community.

⁷ Follow-up questions received from the European Community have been subsequently circulated in document GPA/W/245.

⁸ The replies of the United States to the questions submitted by the European Community have been subsequently circulated in GPA/W/243.

24. The representative of Estonia said that, since the May 2002 meeting, Estonia had had bilateral consultations with the European Community and an exchange of information with Canada.

- *Latvia*

25. The Chairman said that, as agreed at the May 2002 meeting, further plurilateral consultations had been held between interested Parties and Latvia on 8 October 2002. At these consultations, the Committee had been informed that Latvia would make certain adjustments to its legislation and also that its bilateral consultations with the European Community had been continuing.

26. The representative of Latvia said that Latvia had had bilateral consultations with the European Community during which several issues had been raised relating to the adjustments in the national legislation both in the basic law and in the secondary legislation. Because of the recent elections in Latvia, it was very difficult to give any specific time-frame for the legislative changes.

- *Chinese Taipei*

27. The Chairman said that the former Chairman had held informal consultations with interested Parties in mid-July 2002 to review the status of their bilateral consultations with the delegation of Chinese Taipei regarding the outstanding points on both substance and presentational matters related to the offer of Chinese Taipei.

28. The representative of Chinese Taipei said that bilateral consultations had been concluded with the European Community and Japan. Bilateral consultations with Israel and Singapore were continuing. His delegation hoped that, through greater flexibility, Chinese Taipei's accession process could be expedited.

29. The representative of the European Community confirmed that his delegation had concluded negotiations on issues of substance, and hoped that the accession of Chinese Taipei could take place in the near future.

30. The representative of Singapore said that his delegation was pursuing the bilateral consultations with the delegation of Chinese Taipei. Singapore also wished to see the early accession of Chinese Taipei to the Agreement. At the same time, however, Parties would recognize that the concerns and considerations of different Parties also needed to be addressed in the accession process. He confirmed that there remained a couple of outstanding issues that needed to be further clarified. Singapore looked forward to a positive response from Chinese Taipei in resolving the outstanding issues.

31. The representative of Japan confirmed that Japan had finalized the bilateral consultations with Chinese Taipei on 7 October 2002. Japan hoped that Chinese Taipei would soon become a Party to the Agreement following resolution of any remaining issues with other Parties.

32. The representative of Israel said that the conclusion of bilateral negotiations between Chinese Taipei and Japan and the European Community was a positive development. In general, Israel considered the accession of new Parties to the Agreement as essential for the Agreement and as an important step for the newly acceded WTO Members. In October 2002, Israel had had substantive bilateral consultations with Chinese Taipei which could move towards a mutual agreement in the near future. He hoped that this would be an agreement that could be accepted by Israel's authorities and industries, and at the same time be supported by the Parties to the Agreement.

33. Concluding this sub-item, the Chairman noted that Parties were making good progress in their consultations with Chinese Taipei and that, though some further work needed to be done, he hoped that Chinese Taipei's accession process would be concluded shortly. He encouraged delegations which still had outstanding issues to try to make as much progress as possible in their consultations with the delegation of Chinese Taipei. He was available to consult and offer his good offices to facilitate the process.

- *Panama*

34. The Chairman recalled that the Committee had agreed at the May 2002 meeting to seek plurilateral consultations with Panama before the present meeting. The Secretariat had been informed by the delegation of Panama that it should not be included in the plurilateral consultations that were scheduled for 8 October 2002.

- *Bulgaria*

35. The representative of Bulgaria said her delegation expected to be able to provide additional detailed information shortly regarding amendments to the national public procurement legislation. At the February 2002 plurilateral meeting held on Bulgaria's accession to the Agreement, her delegation had made a request that Parties provided information pertaining to export opportunities in their markets so as to enable Bulgaria to assess its existing and potential export capabilities. This request had been made pursuant to the Marrakesh Decision on Accession to the Agreement on Government Procurement of 1994 and the Protocol of Accession of Bulgaria to the WTO. Since then, it had been reiterated in the Committee on Government Procurement, in bilateral contacts with Parties to the Agreement, in the Workshop on Accession to the Agreement on Government Procurement, and also in the context of the preparation of the Technical Assistance Plan of the Secretariat for 2003. So far, no such information had been provided by Parties. Bulgaria continued to expect the provision of this information, which would facilitate its accession to the Agreement. Her delegation was ready to work with Parties towards that objective.

36. The representative of Canada said that her delegation had one further follow-up question for Bulgaria.⁹ The representative of the United States said it had a couple of further questions which would be submitted shortly.

- *Slovenia*

37. The representative of Slovenia said that his Government considered it important that the legislative amendments be adopted by the Parliament before Slovenia submitted its offer. Among other things, the amendments would involve the definition of the entities in Slovenia. This would contribute to a clear understanding of the entities that would be listed in Slovenia's offer.

- *Albania*

38. The Chairman said that Albania had received questions from the European Community; Hong Kong, China; Switzerland; Canada; and the United States (GPA/SPEC/26, GPA/W/169, GPA/W/174, GPA/W/178 and GPA/W/209, respectively).¹⁰

⁹ Subsequently circulated in document GPA/W/219.

¹⁰ Albania's replies to the questions put by the European Community; Hong Kong, China; Switzerland; and Canada have been subsequently circulated in documents GPA/W/238-241, respectively.

- *Moldova*

39. The Chairman said that the questions received from Hong Kong, China had been circulated in GPA/W/206.

- *Jordan*

40. The representative of Jordan said that a study assessing the impact of Jordan's accession to the Agreement and using statistical data for the years 1997-2000 had been finalized in August 2002. Concurrently, the Engineers Association and the Contractors Association, both private sector institutions, had also submitted an impact assessment study, as related to their respective sectors. Both studies had been reviewed and analysed by a national committee consisting of members from both the private and public sectors. The national committee would be responsible for preparing the initial entity offer after coordination with different stakeholders. After its completion, the initial entity offer would be presented to the Prime Minister's office for final approval. Concerning modernization of procurement system, he said that the proposed public procurement legislation was to take the form of a bye-law; that the Government Tenders Directorate and the General Supplies Department would remain independent entities; and that a high-level procurement committee, linked to the Prime Minister's office, would be established.

41. The representatives of the United States, Israel, Canada, and the European Community, noted the good progress being made by Jordan in its accession process, and said they looked forward to receiving Jordan's initial entity offer before the end of 2002.

- *Kyrgyz Republic*

42. The Chairman said that the replies to the Checklist of Issues had been circulated in GPA/W/197, dated 10 June 2002. Further questions raised by the delegation of the United States had been circulated in GPA/W/201. The representative of the European Community said that his delegation would be submitting questions to the Kyrgyz Republic in the near future.

- *Georgia*

43. The Chairman said that no developments had taken place with regard to Georgia's accession since the May 2002 meeting.¹¹ The representative of Canada said that her delegation would submit questions to Georgia in the near future.¹²

- *Lithuania*

44. The Chairman said no developments had taken place with respect to the accession of Lithuania since the May 2002 meeting.

(ii) *Other newly acceded WTO Members*

- *Oman*

45. The Chairman said no developments had been reported in respect of Oman's accession to the Agreement since the February 2002 meeting.

¹¹ In a communication dated 8 October 2002, Georgia applied for accession (GPA/71).

¹² Subsequently communicated in GPA/W/220, dated 6 November 2002.

- *Croatia*

46. The Chairman said that no developments had been reported in respect of Croatia's accession to the Agreement since the February 2002 meeting.

- *China*

47. The representative of China said that new legislation on government procurement had been adopted in June 2002 and would be enacted on 1 January 2003.

- *Mongolia*

48. The Chairman said that no developments had been reported regarding the accession of Mongolia since the September 2001 meeting.

(iii) *Streamlining of accession process*

49. The Chairman said that, as agreed at the May 2002 meeting, the Committee had held informal consultations on streamlining the accession process at which Parties had an exchange of views on how to improve and accelerate the procedures for acceding countries, including those with economies in transition and developing countries. It had been agreed to revert to a number of suggestions made in this context at the next Committee meeting. The issues raised at the informal meeting could form the basis of further discussions on this matter.

50. The Committee agreed to revert to the matter of accessions at its next meeting.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

51. The Chairman said that Iceland had recently notified its implementing legislation (GPA/69). In accordance with the procedures agreed for the review of implementing legislation, the Committee agreed that delegations that wished to put questions to Iceland should do so by 16 December 2002¹³, and that Iceland should provide its answers by 16 February 2003.

52. The Chairman recalled that at the May 2002 meeting, the delegation of the Kingdom of Netherlands with respect to Aruba had been invited to submit its notification of the implementing legislation in accordance with the requirements in GPA/1/Add.1. The representative of the Netherlands said that he had been informed by the Aruban authorities that no progress had been made in this respect.

E. NEGOTIATIONS UNDER ARTICLE XXIV:7

53. The Chairman reported on the informal meeting held on the Article XXIV:7 negotiations on 7 October 2002. The Group had pursued the Article-by-Article review of the Agreement on the basis of the proposals by various delegations compiled in the Secretariat note "Suggested Drafting Changes to the 1994 Agreement", dated 23 September 2002 (Job No. 7423). Delegations also had available to them a non-paper by Korea relating to amendment to Article XXIV:6(b) (Job No. 5669); a non-paper by Japan proposing amendments to a number of Articles (Job No. 6846); a non-paper by Chinese Taipei suggesting drafting changes to selected Articles of the Agreement (Job No. 7872); a non-paper by Norway on amendments to Article VII (Job No. 7935); an explanatory note by Japan relating to its proposal on Article XXIV:6(b) circulated earlier in Job No. 6846 (Job No. 7823); and an explanatory note by Japan relating to its proposal on Article I:2 concerning BOT or equivalent contracts also circulated earlier in Job No. 6846 (Job No. 7790). Furthermore, the informal Group had before it a

¹³ No questions had been put to Iceland as of the date of issue of this document.

note by the Secretariat summarizing the discussion of the issues in relation to basket 1 of the work programme (Job No. 7496); an annotated agenda relating to basket 2 issues (Job No. 7478); and annotated agenda relating to basket 3 issues (Job No. 7448). The Group had a focused discussion on basket 2 issues, relating to tendering procedures, technical specifications and related definitions, and basket 3 issues relating to information and review as regards obligations of entities, information and review as regards obligations of Parties, enforcement, institutions, and statistical reporting. It also had reverted briefly to basket 1 issues relating to basic principles, scope and coverage and related definitions, exceptions, developing countries and accessions. The Group had also considered elements 2 and 3 of its work programme, relating to expansion of coverage and elimination of discriminatory measures. It had been informed by the delegations of Canada and Japan that they expected shortly to be in a position to table ideas on possible approaches regarding the negotiations in these areas, as envisaged in the decision on timetable and work programme of February 2002.¹⁴ As regards documentation regarding the work done at this meeting, the Chairman had suggested that the Secretariat be requested, once more to update the two-column text, namely "Suggested Drafting Changes to the 1994 Agreement", in the light of the proposals recently submitted and the detailed comments made and clarifications sought at the present meeting¹⁵; update the note on the discussion of the issues in relation to basket 1 of the work programme; and prepare notes on the discussion of the issues in relation to baskets 2 and 3, based on the responses given by delegations at the present meeting to the issues raised in the annotated agendas relating to each of these baskets.¹⁶ The work programme encouraged the tabling of all proposals relating to the review of the text of the Agreement no later than 1 September 2002. The delegation of Norway had foreshadowed tabling, in the near future, a non-paper relating to the note in the Agreement on tied aid and Japan on electronic procurement. A number of delegations had reserved the right to come forward with further proposals or respond to future proposals. Regarding the next steps, the Chairman recalled that the Committee had agreed at the February 2002 meeting that it would hold four informal meetings in 2002 and suggested the week of 9 December 2002 for the fourth informal meeting in 2002.¹⁷ As regards the work on the text of the Agreement, the Chairman recalled that it had been envisaged at the February meeting that work would start at the fourth meeting of 2002 on the basis of a text by the Chairman. However, a number of delegations had indicated that it would be their intention to work intensively together in the coming weeks on issues in baskets 1 and 2 in order to seek to narrow differences. Given the very large number of proposals still on the table and the many outstanding differences, some more important than others, the Chairman had encouraged such work. It was important that delegations were in a position to share the fruits of this further work in good time before the next meeting in order to make that meeting productive. With regard to basket 3, the Chairman had said that it was his plan to seek to prepare a text for the consideration of the Group on all the elements other than that concerning Article XXIV:6, where further discussion was clearly necessary. With regard to elements 2 and 3 of the work programme the Chairman had said that in addition to the papers that the delegations of Canada and Japan had already foreshadowed, he encouraged other delegations to put forward, before the next meeting, their ideas on possible approaches to the negotiations in these areas. Finally, as regards the meeting schedule for 2003, the Chairman had suggested that it would be necessary to step up the intensity of activity and to use different formats in addition to the informal Group if the Committee was to have provisional agreement on the text by the Cancun Ministerial Conference next September, as the Committee had previously agreed. He had said delegations would have to be ready to make themselves available at relatively short notice and, at times, for extended consultations. Nonetheless, he had considered it useful if the Secretariat were to pencil in at least three meetings for the Committee prior to Cancun, to be coordinated as usual with meetings of the Working Group on Transparency in Government Procurement, and had suggested that the Committee revert to this matter at the next meeting.

¹⁴ The submission by Japan was subsequently circulated as Job No. 8223.

¹⁵ Subsequently circulated as Job No. 8957.

¹⁶ Subsequently circulated as Job Nos. 7496/Rev.1, 9018 and 9034, respectively.

¹⁷ This meeting was subsequently postponed to February 2003.

54. The representative of Korea said his delegation had no objection in principle to working intensively on the issues in baskets 1 and 2 in order to seek to narrow differences and to help to expedite work. With regard to basket 3, he sought clarification as to whether there was any plan to actually discuss Article XXIV:6 in the 2003 meetings, since further discussion on this article was clearly necessary. The Chairman said that he believed it was important that the next meeting should focus on baskets 1 and 2, as otherwise there was the risk that discussions would develop too broadly. He noted that some progress had been made at this informal meeting on the issue of Article XXIV:6, with papers tabled, for instance, by the delegations of Korea and Japan (Job Nos. 5669 and 7823, respectively). Noting that this was one of the difficult issues, he encouraged delegations to continue to work on it and to revert to it in 2003.

55. The Chairman said that at the next meeting the Group should try to put together a list of the more substantive issues that would require further discussion. He encouraged delegations to give due consideration to the issues that might appear on that list.

56. The Committee agreed to proceed as suggested by the Chairman.

F. OTHER BUSINESS

(i) *Revision of the Decision on Procedures for Circulation and Derestriction of Documents*

57. The Chairman said that at the May 2002 meeting, it was agreed that the Committee would update its Decision on Circulation and Derestriction of Documents (GPA/1/Add.2) in order to reflect the WTO procedures adopted on 14 May 2002 (WT/L/452). After a brief discussion, the Committee adopted the revised Decision on the basis of a draft text circulated by the Secretariat (GPA/72).

(ii) *Response to the letter received from the Chairman of the Committee on Trade and Development*

58. The Chairman drew attention to his response, on behalf of the Committee, to a letter that he had received from the Chairman of the Committee on Trade and Development (CTD) requesting that the CTD be kept informed of discussions or developments relating to special and differential treatment taking place in the Committee on Government Procurement.

(iii) *Letter from the Chairman of the Committee to WTO Members with observer status in the Committee*

59. The Chairman said that, as agreed by the Committee at the May 2002 meeting, he had written a letter, on behalf of the Committee, to the WTO Members with observer status in the Committee inviting them to make written contributions on how the relevant provisions and decisions on developing countries and accessions could be improved.

(iv) *Letter from the Chairman of the Committee to WTO Members*

60. The representative of Israel, supported by the representative of the European Community, suggested that the Chairman send a letter to all WTO Members informing them about the Article XXIV:7 negotiations and encouraging them to become observers to the Committee. Since the beginning of the review, the atmosphere had changed in the WTO because of the Doha Development Round and there might be more interest by other WTO Members to join in this process.

61. After a brief discussion, the Committee agreed that the Chairman would write a letter to all WTO Members, with a view to bringing them up to date on the Article XXIV:7 negotiations and inviting any contributions they might have with respect to this process.

G. ANNUAL REPORT

62. The Committee considered its report to the General Council on the basis of a draft text prepared by the Secretariat which was revised in light of comments by delegations and subsequently adopted (GPA/73).

H. DATE OF THE NEXT MEETING

63. The Committee agreed to hold its next meeting in early 2003.¹⁸

¹⁸ Subsequently scheduled for 6 February 2003.

WORLD TRADE ORGANIZATION

RESTRICTED

GPA/M/18
5 August 2002

(02-4312)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 31 MAY 2002

Chairman: Mr. Martin Loken (Canada)

1. The following agenda was adopted:
 - A. Application for Observer Status
 - B. Modifications to the Appendices to the Agreement
 - C. Accessions:
 - (i) *Chinese Taipei*
 - (ii) *Estonia*
 - (iii) *Latvia*
 - (iv) *Bulgaria*
 - (v) *Slovenia*
 - (vi) *Albania*
 - (vii) *Moldova*
 - (viii) *Jordan*
 - (ix) *Kyrgyz Republic*
 - (x) *Panama*
 - (xi) *Lithuania*
 - (xii) *Newly Acceded WTO Members*
 - (xiii) *Workshop on GPA Accession*
 - (xiv) *Streamlining of the Accession Process*
 - D. Review of National Implementing Legislation
 - E. Negotiations under Article XXIV:7

F. Other Business:

- (i) *Notification under Article XXIV:5*
- (ii) *Letter from the Chairman of the Committee on Trade and Development relating to the Committee's work on special and differential treatment*
- (iii) *Procedures for circulation and derestriction of documents*
- (iv) *The date of the next meeting and Chairmanship.*

A. APPLICATION FOR OBSERVER STATUS

2. The Committee agreed to grant observer status to UNCTAD in response to a request received from the UNCTAD Secretariat (GPA/W/188) and pursuant to the decision it had taken on the matter of observership (GPA/1, Annex 1).

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

- (i) *Recent modifications by Japan relating to Annex 3 of Appendix I*

3. The Chairman said that the proposed modifications to Annex 3 of Appendix I by Japan dated 15 March 2002 (GPA/W/186) had become effective on 15 April 2002 (WT/Let/419).

4. The Chairman said that Japan had proposed further modifications to Annex 3 of Appendix I circulated in document GPA/W/196 dated 28 May 2002.¹

- (ii) *Modifications by Hong Kong, China*

5. The Chairman said that Hong Kong, China has made a communication proposing changes to its Appendix II which would be circulated to Parties shortly.²

- (iii) *Japan's proposed modifications relating to NTT*

6. The Chairman said that, with respect to the proposed modification by Japan to its Annex 3 of Appendix I notified in document GPA/W/91, consultations had been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107 and GPA/W/108). In a communication dated 19 October 2001, the delegation of the United States had withdrawn its objection to the modifications proposed by Japan (GPA/W/166).

7. The representative of Japan said that Japan's responses to the questions put by Canada during the bilateral consultations held in October 2001 had been circulated to Parties (GPA/W/199). Further bilateral consultations had recently been held with Canada and the European Community. Her delegation had responded promptly to a request for clarification by Canada and hoped that Canada would shortly be in a position to reach a decision regarding the withdrawal of its objection. The delegation of the European Community had made some new comments on the responses received from Japan, in particular concerning conditions of competition and liberalization in the Japanese telecommunications market. Discussions with Canada and the European Community had been ongoing for a considerable period of time. Her delegation was reviewing the situation seriously and expected to report its position *vis-à-vis* these Parties before the next meeting.

¹ These modifications subsequently became effective on 29 June 2002 (WT/Let/425).

² Subsequently circulated in document GPA/W/198 and became effective on 6 July 2002 (WT/Let/425).

8. The representative of the European Community said that constructive consultations had taken place with the delegation of Japan. The representatives of the European Community and Canada said that their delegations were not in a position to withdraw their objections to the proposed modifications in GPA/W/91 for the time being.

9. In concluding the discussion, the Chairman encouraged the Parties involved to continue consultations in order to resolve the issue as soon as possible and said that the Committee would revert to this matter at its next meeting.

(iv) Japan's proposed modifications relating to railway companies

10. The Chairman said that, with respect to the proposed modification by the delegation of Japan to its Annex 3 of Appendix I in documents GPA/W/144, 145 and 146, dated 29 August 2001, communications had been received from the delegations of the United States, Canada and the European Community (GPA/W/151, 155 and 156) seeking clarification and objecting to the proposed withdrawal of the three Japanese railway companies, namely East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company from the coverage of the Agreement. Relevant notifications received from Japan had been circulated in documents GPA/W/152, GPA/W/152/Corr.1 and GPA/W/179. Additional questions had been received from the European Community and the United States on 19 October 2001 (GPA/W/164 and 165, respectively). Japan's responses to these questions were contained in documents GPA/W/180 and GPA/W/181, respectively.

11. The representative of Japan said that her delegation had held a series of bilateral meetings with Canada, the European Community and the United States which had involved an extensive exchange of questions and answers. Japan believed that the three objecting Parties had had sufficient time to conduct a careful review of the proposal and come to an adequate assessment thereof. Her delegation hoped that a mutual understanding could be reached as soon as possible that Japan's proposed withdrawal of the three railway companies was consistent with Article XXIV:6(b) of the Agreement. In order to expedite the process, Japan also hoped that the Parties objecting to the entry into force of the proposed modifications could specify in writing any outstanding concerns in regard to the Japanese proposal before the next meeting. This would allow Japan to clearly understand the reasons for the objections which could then be addressed in consultations with concerned Parties.

12. The representative of the European Community thanked Japan for the information that had been provided and for the useful explanations relating to the status of Japan railway companies and the organization of the rail sector in Japan in general. His delegation expected to submit further questions before the next meeting. Regarding Japan's suggestion that delegations' specific concerns be expressed, the European Community would seek to achieve a clearer picture of the status of the market and the situation of Japanese railway companies before it could do so in writing. The representative of the United States said that her delegation was considering the matter and might have additional questions to put to Japan. Joined by the representative of Canada, she said that, for the time being, no commitments could be undertaken with respect to the suggestion by Japan that her delegation's concerns be explained in writing.

13. In concluding the discussion, the Chairman encouraged the Parties to continue consultations with a view to resolving the issue soon and said that the Committee would revert to this matter at its next meeting in the light of further developments.

(v) Proposed modification by the United States to reflect recent changes in the administrative structure of its federal Government

14. The Chairman said that, with respect to the proposed modifications to Appendix I by the United States in document GPA/W/153, dated 25 September 2001, the delegations of Canada, the

European Community and Japan had made communications seeking further information from the United States with respect to the notification in GPA/W/153 and objecting to the proposed modifications going into effect at the end of the 30-day period (respectively circulated in documents GPA/W/167 of 24 October 2001, GPA/W/163 of 19 October 2001 and GPA/W/162 of 22 October 2001). The responses by the United States to the questions raised by the three Parties had been circulated in documents GPA/W/183-185. A further set of questions had been put by Japan in document GPA/W/195.

15. The representatives of the European Community and Canada said that the responses to their questions received from the United States were currently being reviewed. The delegation of the European Community said that his delegation expected to submit further questions before the next meeting. The representative of Canada said that her delegation was not in a position to withdraw its objection to the modification at the present time.

16. The representative of the United States said that her delegation was in the process of answering the latest questions received from Japan in GPA/W/195 and would respond to the questions to be put by the European Community in due course.

17. The Chairman said that the Committee would revert to this matter at its next meeting.

C. ACCESSIONS

(i) *Chinese Taipei*

18. Reporting on the developments regarding the accession of Chinese Taipei, the Chairman said that, at the February 2002 meeting, many delegations had required more time to further review the offer of Chinese Taipei in document GPA/SPEC/1/Rev.2 and that some delegations had remaining substantive concerns. Since that meeting, he had held informal consultations with the Parties so as to review the status of their bilateral consultations with the delegation of Chinese Taipei. There had also been several bilateral meetings between the delegation of Chinese Taipei and concerned Parties but some substantive issues remained to be resolved. Moreover, a letter elaborating on the issue of nomenclatures that had been raised by the observer from China at the Committee's February 2002 meeting had been received from the delegation of China on 2 April 2002. The letter, addressed to the Chairman, had been circulated informally to Parties.

19. The representative of Singapore said that, at the February 2002 meeting, Singapore had raised a number of concerns in regard to the revised offer of Chinese Taipei. Since then, her delegation had held two bilateral meetings with the delegation of Chinese Taipei, at which no progress had been made. Among other concerns relating to the offer by Chinese Taipei, her delegation considered that the exclusion of Singapore from a list of goods such as electricity machinery and rail transport equipment and services and construction relating to the electricity sector, contained in paragraph 6 of the General Notes, constituted discrimination against Singapore; the language contained in Note 4 to Annex 3 concerning procurement by Chunghwa Telecom could be open to arbitrary interpretation and hence should be reviewed; and the word 'leased' contained in Note 3 to Annex 4 should be deleted. Singapore was not in a position to endorse Chinese Taipei's accession to the Agreement at the present meeting and expected a positive response from the delegation of Chinese Taipei in addressing its concerns. Finally, Singapore noted the commitments undertaken by Chinese Taipei to accede to the Agreement after its accession to the WTO, and urged Chinese Taipei to adopt a more forthcoming attitude in order to achieve this end expeditiously.

20. The representative of the European Community said that his delegation had a concern with regard to the Note 4 to Annex 3 concerning Chunghwa Telecom.

21. The representative of Japan said that his delegation had not yet concluded bilateral negotiations with the delegation of Chinese Taipei and had concerns similar to those raised by Singapore regarding Chunghwa Telecom.

22. Regarding the next steps in the accession of Chinese Taipei, the Chairman urged delegations who had not yet completed the bilateral consultations with Chinese Taipei to do so as soon as possible, and added that he would continue to be available to consult and use his good offices in order to facilitate final agreement. He suggested that the Committee revert to this matter at the next meeting.

(ii) *Estonia*

23. The Chairman said that the revised offer of Estonia was contained in GPA/SPEC/9/Rev.1 dated 12 February 2002. Further questions received from the United States regarding Estonia's offer and Estonia's replies thereto had been circulated in document GPA/W/190/Rev.1.

24. The representative of Estonia said that, in addition to the exchange of information with the United States, consultations had recently been held with the delegations of Canada and the European Community, in which domestic legislation and certain aspects of the revised offer from Estonia had been discussed.

25. The representative of Canada said that her delegation would continue to review the revised offer and expected to give some comments to the delegation of Estonia prior to the next meeting.

26. The representative of Israel said that Estonia's revised offer was currently under review and reserved the right to make comments to or requests of the delegation of Estonia.

27. As a means of moving the process of accession of Estonia forward, the Chairman suggested that further plurilateral consultations be held between Estonia and interested Parties before the October 2002 meeting of the Committee. The Committee so agreed.

(iii) *Latvia*

28. The representative of Latvia said that, since the previous Committee meeting, bilateral consultations had continued with the European Community, in the course of which issues that warranted further reflection had been raised. Most of these issues were very detailed in character and involved substantial technical work on behalf of Latvia. His delegation continued to work on all concerns raised in the course of bilateral consultations and would provide a report on the status of the negotiations at the next meeting.

29. The representative of Switzerland said that, despite the completion of discussions between Switzerland and Latvia, a number of issues between other delegations and Latvia that remained unresolved created uncertainty as to the future of Latvia's accession. It was not encouraging in terms of the accession process that the developments reported were the same at every meeting.

30. The Chairman said that, in order to expedite the accession of Latvia, further plurilateral consultations could be held between Latvia and interested Parties at the time of the October 2002 meeting which would, among others, address certain systemic issues related to Latvia's accession. The Committee so agreed.

(iv) *Bulgaria*

31. The Chairman said that, pursuant to the informal plurilateral consultations that had been held between Bulgaria and interested Parties on 21 February 2002, a number of follow-up questions and comments from the United States and Bulgaria's answers thereto had been circulated in document GPA/W/189/Rev.1.

32. The representative of Bulgaria said that, in April 2002, the Parliament had passed the new amendments to the Public Procurement Law, which were published in the State Gazette on 26 April 2002. In response to a question by the Chairman whether the amendments made to the Procurement Law would alter the substance of the responses of Bulgaria to the Checklist of Issues, the representative of Bulgaria said that her delegation was engaged in reviewing whether the Checklist needed to be updated in light of the recent amendments. She reiterated a request that her delegation had made at the informal plurilateral consultations held in February 2002 that Parties provide information pertaining to export opportunities in their markets so as to enable Bulgaria to assess its existing and potential export capabilities. She said that that request had been made pursuant to the Marrakesh Decision on Accession to the Agreement and the Protocol of Accession of Bulgaria to the WTO. Her delegation considered that the provision of technical assistance and information from Parties pertaining to potential export capabilities and domestic market opportunities would enable Bulgaria to make an assessment of the content of an eventual offer and the conditions under which Bulgaria would accede to the GPA. With regard to the submission of an initial offer, she said that, while intensive domestic consultations were taking place, her delegation was unable to provide a date for the submission of an offer.

(v) *Slovenia*

33. The Chairman said that, pursuant to the informal plurilateral consultations that had been held between Slovenia and interested Parties on 21 February 2002, a number of follow-up questions and comments from the United States had been circulated in GPA/W/192 dated 25 April 2002.

34. The delegation of Slovenia said that the Slovenian Public Procurement Legislation was under substantive revision in order to ensure its adherence to the rules and procedures of international agreements to which Slovenia was acceding, notably the GPA and the relevant EC Directives, and achieve fine-tuning with practices in Slovenia. Further, the amendments were also aimed at setting out criteria defining the various categories of entities that would reflect the broad coverage of the Agreement, while capturing national specificities. She said that GPA Parties would be regularly informed of progress concerning legislative harmonization which was deemed to be an essential precondition for undertaking an international commitment that required ratification by Parliament. Her delegation reiterated the importance of the process of accession to the Agreement in terms of both the development of the domestic public procurement market and the opening of opportunities for national bidders in the markets of GPA Parties.

(vi) *Albania*

35. The Chairman said that, at the last meeting Albania had been invited to reply to the questions received from the European Community; Hong Kong, China; Switzerland; and Canada (GPA/SPEC/26, GPA/W/169, GPA/W/174 and GPA/W/178, respectively). Since the February 2002 meeting, Albania had communicated additional information on its national legislation in GPA/65/Add.1 dated 17 April 2002.

(vii) *Moldova*

36. The Chairman said that Moldova's replies to the questions put to it by Hong Kong, China and questions put by the United States had been circulated in documents GPA/W/191 and GPA/W/193 respectively. The representative of the European Community said that his delegation was currently reviewing the information that had been provided, and its questions would be submitted before the next meeting.

37. The representative of Moldova said that the Ministry of Economy had undergone some structural adjustment which included strengthening of the capacity of the structure responsible for government procurement. Officials responsible for accession to the Agreement would initiate the relevant work shortly.

(viii) *Jordan*

38. Reporting on the progress of Jordan's accession, the representative of Jordan highlighted the following information. First, the national committee comprised of members from both the private and public sectors was working on the preparation of an initial entity offer. Several working groups had been formed and were currently collecting and analysing data related to procurement of works, goods, and services in order to assess the impact of accession to the Agreement on local industries. Positive progress had been made in assessing technical assistance needs in this context. Second, data regarding procurement of goods, works and services in 1997 to 2000 had been compiled and delivered to serve as a database for comprehensive studies. These studies were designed to cover eight out of a possible 14 industrial sectors which might be affected by the requirements under the GPA. Independent studies were also being carried out by the chambers of commerce and industry, and engineers' and contractors' associations. The findings of these studies would be considered in the preparation of the initial entity offer, which was anticipated to be submitted before the end of the year. Third, legislative bodies were working on the new version of the procurement legislation. Regarding the organizational structure of the procurement entities of goods, works and services, a decision had been taken by the government on 8 May 2002 to maintain the two central procurement entities in operation as two independent bodies. One entity would be specialized in the procurement of goods and services and the other specialized in the procurement of works and engineering services. Moreover, the decision advised the issuance of a by-law in order to guarantee harmonization of the procurement process between the two entities and other governmental departments.

39. The representative of the United States, joined by the representative of Canada, said that her delegation looked forward to receiving Jordan's offer, hopefully by the end of the year. With regard to the market studies under way in Jordan, the representative of Switzerland said that procurement data analysis and the studies on the impact of public procurement liberalization were very difficult to conduct, partly due to the lack of an accepted general methodology. In the experience of Switzerland, a major consequence of accession to the Agreement had been the creation of an internal market for public procurement which resulted in greater competition among local firms.

(ix) *Kyrgyz Republic*

40. The Chairman said that the Kyrgyz Republic had recently submitted its replies to the Checklist which had been circulated in document GPA/W/197. Any questions to be put to the Kyrgyz Republic, in respect of its responses to the Checklist of Issues, should be submitted by 2 August 2002.

41. The representative of the Kyrgyz Republic said that major work was currently under way in the Kyrgyz Republic aimed at bringing national legislation into conformity with the standards of international instruments including requirements pertaining to local content and bidding procedures. He said that technical assistance in the form of plurilateral or bilateral consultations with delegations,

or sharing views and experiences on the implementation of the Agreement on a bilateral basis would be welcome. His delegation anticipated fruitful and mutually beneficial negotiations, and was looking forward to receiving questions pertaining to its replies to the Checklist.

(x) *Panama*

42. The Chairman said that there had been no recent reports regarding Panama's accession to the Agreement. He suggested that plurilateral consultations could be held with Panama before the October Committee meeting in order to move the process of accession forward. The Committee so agreed.

(xi) *Lithuania*

43. The representative of Lithuania said that Lithuania had applied for accession to the Agreement on 8 March 2002 (GPA/66). His authorities were proceeding with the revision of the relevant national legislation in the field of government procurement.

44. On behalf of the Committee, the Chairman invited Lithuania to submit its replies to the Checklist as soon as possible.

(xii) *Newly Acceded WTO Members*

- *Oman*

45. The Chairman said that Oman's replies to the Checklist of Issues had been circulated in GPA/W/141. Questions put by the European Community, the United States and Canada to Oman in November and December 2001 had been circulated in documents GPA/SPEC/27, GPA/SPEC/25 and GPA/W/176, respectively. In the informal discussions he had held with the delegation of Oman, he had urged it to apply for accession formally, and hoped that this would be achieved soon.

- *Georgia*

46. The Chairman said that the replies of Georgia to the Checklist had been circulated in document GPA/W/187. The United States had put questions to Georgia in document GPA/W/194. Georgia had provided information on its national legislation in document GPA/68.

- *Croatia*

47. The Chairman said that he had been informed by the delegation of Croatia that work under way on its procurement legislation was continuing.

- *Other WTO Members with commitments in respect of the Agreement*

48. The representative of China said that the achievement of observer status in February 2002 demonstrated the willingness of China to implement commitments they had undertaken in relation to the GPA on accession to the WTO. Following the progress made over the last few years in the establishment of the government procurement legislative regime, the new government procurement legislation had entered the final stage of preparation and was expected to enter into force in the near future.

(xiii) *Workshop on Accession*

49. The Chairman said that a WTO Workshop on Accession to the Agreement had been held in Geneva on 27-28 May 2002, in which more than 45 capital-based officials from acceding and other observer countries had participated. He thought that the event had been useful to acceding countries as well as to the Parties to the Agreement. He noted the relevance of the Accessions Workshop not only to the accessions currently under way, but also to the work on the review of the Agreement in which the question of how to optimize the accession procedures, among other issues, was being dealt with.

50. The representatives of the United States, Switzerland, the European Community, Canada, the Kyrgyz Republic, China and Lithuania expressed their appreciation of the Workshop. The representative of Bulgaria said that the Workshop had been timely and useful. The representative of the Kyrgyz Republic said that officials had been trained in the course of the Workshop and had acquired some useful and fruitful knowledge. The representative of China considered that further training programmes would prove useful. The representative of Lithuania said that the Workshop constituted a valuable input into the process of accession.

51. The representative of the United States said that the Workshop had provided a good opportunity to discuss issues on a broader basis than was sometimes possible in the Committee, and that the Committee should consider the possibility of following up on the initiative through holding small group discussions with acceding countries focused on particular issues, which could take place possibly on an informal basis and in the margins of formal Committee meetings.

52. The representative of Switzerland emphasized the importance of technical assistance provided by multilateral development banks as well as Parties, such as the European Community and the United States, in relation to the ongoing accession processes. He said that the Committee should be able to draw useful lessons from the Workshop and sharpen the link between technical assistance and the process of accessions. In regard to procedures for accession, he noted the possibility that individual Parties might provide counsel and advise to individual acceding countries in preparing or modifying their offers.

53. The representative of the European Community said that a number of issues had been raised in the Workshop with regard to the accession process that warranted consideration. His delegation had noted that countries initiating the accession process had found it useful to have an exchange of information with countries at a more advanced stage in the accession process. In that regard, the European Community believed that the Committee should consider ways in which a more informal exchange of information on practical issues on accession could be organized.

(xiv) *Streamlining of the Accession Process*

54. In response to a point raised by the representative of the Kyrgyz Republic, that economies in transition that are acceding to the Agreement could be allowed certain flexibility in the process, the representative of Switzerland said that the situation of economies in transition differed substantially from that of long standing Parties to the Agreement, and therefore urged the Committee to find appropriate solutions, so that accession process was not unduly slowed down. The notion that an economy in transition must undergo a period of adaptation would suggest that there would be recurring changes in the government procurement regime. His delegation recognized that such a period of transition may take between five and eight years and structures of ownership within the government may be modified, and functions rearranged. He suggested that the Committee adopt an appropriate methodology in the light of the particular circumstances of economies in transition.

55. The European Community suggested that the Committee examine in the informal discussions on the review of the text of the Agreement the appropriateness of a definitions-based approach to the preparation of an offer. He noted that, although positive lists allowed a certain clarity, continued changes in the entity lists as a consequence of the evolution of government structures were undesirable.

56. The Chairman suggested that the Committee take up the question of how procedures on accessions could be improved at an informal meeting in October. The Committee so agreed.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

57. The Chairman said he had been informed by the delegation of Iceland that the preparation of Iceland's replies to the Checklist were in progress.

58. The representative of the Kingdom of Netherlands with respect to Aruba said that Aruba was not yet in a position to submit the notification given the current revision of the major procurement regulation. The authorities in Aruba preferred to base the review of the implementing legislation on the most recent regulations and the notification of complementary legislation would be submitted upon completion of the legal process.

E. NEGOTIATIONS UNDER ARTICLE XXIV:7

59. The Chairman said that an informal meeting on Article XXIV:7 negotiations had been held on 30 May 2002. The group had pursued the Article-by-Article review of the Agreement on the basis of the proposals by various delegations compiled in the Secretariat's Note 'Suggested Drafting Changes to the 1994 Agreement', dated 1 May 2002 (Job 3576). Delegations also had available to them a non-paper by the European Community entitled 'Drafting Proposals on the Preamble and Articles I, II, III, XVI, XVII and XXIV of the Agreement' (Job 4312), a proposal by Korea on amendments to Article XXIV:6(b) of the Agreement; a communication from Japan entitled 'Japan's comments on the United States' proposals in Jobs 2667 and 1051 and the proposal by the European Community in Job 876' (Job No. 5474); and a Note by the Chairman 'Annotated Agenda on Basket 1 Issues' (Job 3893). The Group had a detailed discussion of the proposed drafting changes to the Articles of the Agreement relating to basket 1 items in the work programme, namely basic principles, scope and coverage and related definitions, exceptions, developing countries, and accessions. The main focus of discussions had been on the issues raised in the Annotated Agenda. In the context of the discussion on developing countries and accessions, the group had agreed that the Chairman would write a letter to the countries with observer status in the Committee inviting them to make written contributions on how the relevant provisions and decisions could be improved. The group had also reverted, briefly, to the basket 2 items which included tendering procedures and technical specifications and related definitions. The Secretariat would update the side-by-side document 'Suggested Drafted Changes to the 1994 Agreement' in light of the proposals recently submitted, and the detailed comments made and clarifications sought at the meeting. Delegations were reminded that the work programme discussed and agreed at the February meeting foresaw the tabling of all proposals relating to the review of the text of the Agreement no later than 1 September 2002. Regarding the next informal meeting to be held on 7 October 2002, the Chairman suggested that the Group have a focused discussion on basket 2 issues, relating to tendering procedures (Articles VII–XV and Article XVIII, paragraphs 1, 3, and 4), technical specifications (Article VI) and related definitions, and also have a focused discussion on basket 3 issues (enforcement, institutions, and statistical reporting). He proposed that, at the next informal meeting, the group revert to the discussion of developing countries and accessions. To facilitate the discussion on basket 2 and basket 3 issues, an Annotated Agenda would be circulated which would set out the issues that the group might discuss in relation to those baskets. Delegations would also have an opportunity at that time to revert to the basket 1 issues. With regard to the work on the other two elements of the Article XXIV:7 negotiations, namely the

expansion of coverage and the elimination of discriminatory measures, the Work Programme agreed to at the February 2002 meeting provided for a preparatory phase in 2002, aimed at the identification and study of the areas to be negotiated, and agreeing on a detailed programme for the negotiations by the end of 2002. In this connection, he reminded delegations that possible approaches regarding these negotiations should be put forward, including the request for tabling of offers, by 15 October 2002.

60. The Committee agreed to proceed as proposed by the Chairman.

F. OTHER BUSINESS

(i) *Notification under Article XXIV:5*

61. The representative of Japan said that information on modifications to Japan's regulations concerning government procurement had been communicated in document GPA/67 dated 15 April 2002. The new notification related to modifications notified by Japan in April 2001. Her delegation therefore considered that the basic notification had already been made, and that the new submission reflected only minor changes to the modification.

(ii) *Letter from the Chairman of the Committee on Trade and Development relating to Special and Differential Treatment*

62. The Chairman drew the attention of the Committee to a letter that had been received from the Chairman of the Committee on Trade and Development requesting that the Committee be kept informed of discussions or developments relating to special and differential treatment taking place in the Committee. The Chairman proposed to answer the letter on behalf of the Committee, drawing attention to the provisions of the Agreement relating to developing countries as well as pointing out relevant work of the group in the context of the review of the Agreement. He also suggested that it would be useful to point out that WTO Members could become observers in the Committee and therefore participate in discussions. In that regard, he said that the involvement of as wide a group of Members as possible in the review of the Agreement would be useful in terms of hearing ideas and suggestions relating to special and differential treatment provisions, and other provisions of interest to developing countries.

(iii) *Procedures for circulation and derestriction of documents*

63. The Chairman drew attention to the General Council Decision of 14 May 2002 on Procedures for the Circulation and Derestriction of WTO Documents (WT/L/452). He proposed that the Committee update its Decision on Circulation and Derestriction of Documents (GPA/1/Add.2) in order to reflect the new WTO procedures. He suggested that the Secretariat would prepare a draft decision for adoption by the Committee. It was so agreed.

(iv) *The date of the next meeting and Chairmanship*

64. The Committee agreed to hold its next meeting on 8 October 2002.

65. The Chairman said that, as he had indicated was a good possibility at the meeting in February 2002, he would indeed be returning to Ottawa in August, but was prepared to continue to serve as Chair and carry out consultations until his departure.

66. The representatives of the United States; Switzerland; Jordan; Korea; the European Community; Chinese Taipei; Japan; Canada; Bulgaria; Hong Kong, China; and Norway thanked the Chairman for his Chairmanship of the Committee. The Chairman thanked the Committee members

for the confidence they had shown in him and for their cooperation, and noted that the achievements of the Group had largely been due to its acting collectively.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 21 FEBRUARY 2002

Chairman: Mr. Martin Loken (Canada)

1. The following agenda was adopted:
 - A. Election of the Chairperson for 2002
 - B. Application for Observer Status
 - C. Modifications to the Appendices of the Agreement
 - D. Accessions:
 - (i) *Chinese Taipei*
 - (ii) *Estonia*
 - (iii) *Latvia*
 - (iv) *Bulgaria*
 - (v) *Slovenia*
 - (vi) *Albania*
 - (vii) *Moldova*
 - (viii) *Jordan*
 - (ix) *Kyrgyz Republic*
 - (x) *Panama*
 - (xi) *Lithuania*
 - (xii) *Newly Acceded Countries*
 - (xiii) *Streamlining the Process of Accessions*
 - E. Review of National Implementing Legislation
 - F. Negotiations under Article XXIV:7
 - G. Other Business

A. ELECTION OF THE CHAIRPERSON FOR 2002

2. The Committee elected Mr. Martin Loken (Canada) as Chairman for 2002. The Chairman expressed his appreciation to the Committee for re-electing him but noted that his posting to Geneva may end before the end of 2002.

B. APPLICATION FOR OBSERVER STATUS

3. The Committee agreed to grant observer status to the Government of China, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/173).

C. MODIFICATIONS TO THE APPENDICES OF THE AGREEMENT

(i) *Modifications by the United States to reflect recent changes in the administrative structure of the Federal Government (GPA/W/153)*

4. The Chairman said that the delegations of Canada, the European Community and Japan had submitted communications seeking further information from the United States with respect to the proposed modifications by the United States to Appendix I in document GPA/W/153 dated 5 September 2001 and objecting to the proposed modifications going into effect at the end of the 30-day period. These communications had been respectively circulated in documents GPA/W/167, GPA/W/163 and GPA/W/162. The responses by the United States to the questions raised by the three Parties had been circulated in documents GPA/W/183-185.

5. The representatives of Japan and the European Community said the responses from the United States would be reviewed soon and any further questions would be indicated at a later stage. The representative of Canada said that her delegation would determine its next steps on the basis of a careful consideration of the responses received from the United States.

6. In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting.

(ii) *Japan's Notification Relating to NTT*

7. With respect to the proposed modification by Japan to its Appendix I notified in document GPA/W/91, the Chairman said that consultations had been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1, GPA/W/107 and GPA/W/108). In a communication dated 19 October 2001, the delegation of the United States had withdrawn its objection to the modifications proposed by Japan (GPA/W/166). No developments had been reported by the delegations of Canada and the European Community since the October 2001 meeting.

8. The representative of Canada said that further bilateral consultations had recently been held with Japan on the matter. The representative of the European Community said that his delegation had held bilateral meetings with Japan and was currently reviewing all the information provided. The

representative of Japan said that he hoped that his delegation would be able to report positive developments on the issue at the next meeting.

9. In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting.

(iii) Japan's Notifications Relating to Railways

10. With respect to the proposed modification by the delegation of Japan to its Appendix I in documents GPA/W/144, 145 and 146 dated 29 August 2001, the Chairman said that communications had been received from the delegations of the United States, Canada and the European Community (GPA/W/151, 155 and 156) seeking clarification and objecting to the proposed withdrawal of the three Japanese railway companies, namely East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company from the coverage of the Agreement. Relevant notifications received from Japan had been circulated in documents GPA/W/152, GPA/W/152/Corr.1 and GPA/W/179. Additional questions received from the European Community and the United States had been circulated in documents GPA/W/164 and 165 respectively and Japan's responses in documents GPA/W/180 and GPA/W/181 respectively.

11. The representative of the United States said that his delegation was currently in the process of reviewing Japan's responses in documents GPA/W/180 and GPA/W/181. Bilateral consultations had recently been held with Japan and his delegation had followed up with some additional questions relating to the discussions. The United States continued to reserve its position and hence could not agree to the proposed modification to Appendix I taking effect. The representative of the European Community said that his delegation had met with Japan and also continued to reserve its position. It would return to the issue once a more thorough review had been carried out. The representative of Canada said that her delegation had recently held further discussions with Japan and was reviewing the responses to its questions.

12. The representative of Japan said that Japan would continue its bilateral discussions with the delegations of the United States, the European Community and Canada and hoped that a positive result could be achieved in the near future.

13. In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting in the light of further developments.

(iv) Modifications by the United States to Appendices II and III (WT/Let/407)

14. The Chairman said that the proposed modifications to Appendices II and III by the United States dated 25 September 2001 (GPA/W/154) had become effective on 25 October 2001 (WT/Let/407).

D. ACCESSIONS

(i) Chinese Taipei

15. Reporting on the developments regarding Chinese Taipei's accession, the Chairman said that Chinese Taipei had submitted a second revised offer which had been circulated in GPA/W/SPEC/1/Rev.2 dated 28 January 2002. The delegation of Chinese Taipei had made a further revision to this document, copies of which had been made available to delegations at the present meeting.

16. The representative of Chinese Taipei expressed the appreciation of his delegation to the Parties to the Agreement for their support for Chinese Taipei's accession to the WTO. His delegation hoped that the process of accession to the Agreement could be completed at the present Committee meeting, so that Chinese Taipei could commence the fulfilment of its commitments in this respect under the WTO. The process of application to accede to the Agreement had been initiated at the Interim Committee on Government Procurement in June 1994. The application for accession to the Agreement and the initial offer were contained in document GPA/IC/SPEC/1 dated 17 March 1995. Following the submission of the latest revised offer contained in document GPA/W/SPEC/1/Rev.2 dated 1 February 2002, several interested Parties, including Japan; the European Community; Hong Kong, China; Switzerland; Canada and Israel had raised concerns in respect of Note 4 in Annex 3 and General Note 6. Bilateral consultations with these Parties had resolved their concerns and the documents reflecting the revisions made pursuant to the consultations were being made available to Parties at the present meeting. Chinese Taipei requested that, having regard to its application for accession and the consultations held with the Parties, the Committee agree to its offer and take a decision in accordance with Article XXIV:2 of the Agreement regarding the terms of accession of Chinese Taipei based on this offer.

17. The representative of Singapore said that his delegation would require more time in order to study the second revised offer circulated on 1 February 2002 which had been recently revised. Singapore had several serious concerns. First, Chinese Taipei had proposed to exclude a list of goods such as electricity machinery and rail transport equipment and services and construction relating to the electricity sector from its commitments under the Agreement. It was also specified in the offer that these carve-outs would not apply to selected Parties. Special treatment would therefore be accorded to these Parties by allowing their suppliers exclusive access to the procurement market for the aforementioned goods and services, while not extending the same benefits to several other Parties, including Singapore. His delegation had strong reservations to such an approach which ran counter to the letter and spirit of the WTO. Second, Singapore was of the view that all goods were to be covered by the Agreement. Although Article V:4 on Special and Differential Treatment for Developing Countries permitted exclusion of certain goods, Chinese Taipei in its accession to the WTO had declared that it would not claim any right granted under the WTO agreements to developing country Members. Third, the list of services sectors from which Singapore had been excluded contained sectors of particular interest to Singapore. Fourth, Note 4 to Annex 3 provided that, with respect to procurement by one of the listed entities, Chunghwa Telecom, the Agreement shall apply only to suppliers and service providers of the Parties that provided access to their own telecommunication markets for Chinese Taipei's suppliers and service providers under the condition of reciprocity. Furthermore, this reciprocity requirement would not apply in the case where the telecommunications sector of a Party was run by its private sector without government influence or control over the procurements conducted by it. It was not clear which Parties and which entities would be covered by that provision. His delegation had concerns about the reciprocity requirement contained in the offer and requested Chinese Taipei to further clarify what the provision would entail. Singapore looked forward to receiving a positive response from Chinese Taipei in its next revised offer and hoped that these issues of concern to his delegation would be resolved.

18. The representative of the European Community said that his delegation had a continuing and strong interest in completing the accession negotiations with Chinese Taipei. It had had fruitful bilateral consultations in the course of the present week with Chinese Taipei and it appreciated the progress that had been made as a result of these consultations. His delegation needed more time for a final screening of the latest version of the offer which had just been received. A few important technical questions might need further clarification. It was not expected that those clarifications would alter the substance of the offer.

19. The representative of the United States said that his delegation appreciated the efforts made by the delegation of Chinese Taipei in the course of negotiations and the intensive effort made during

the present week to conclude the negotiations as soon as possible. The initial agreement reached between the United States and Chinese Taipei a number of years ago had recently been reconfirmed. His delegation appreciated the important commercial benefits to all Parties of concluding the negotiations for accession as soon as possible. It had hoped that a decision on the accession of Chinese Taipei could have been taken at the present Committee meeting on the basis of the understanding that negotiations had resolved issues that had been raised to date. However, given concerns raised by other Parties at the meeting, he hoped that remaining outstanding issues could be resolved very quickly. His delegation encouraged all Parties to work with Chinese Taipei to that end. It understood that there might be some technical modifications or technical corrections that might be necessary in Appendix I. With any such modifications, it expected to retain the substantive basis of the negotiations and the commercial agreements that had been reached in those negotiations. It hoped that those issues could be resolved quickly and a final offer could be circulated to the Parties within 30 days, so that the Committee could take a decision to approve the accession of Chinese Taipei at the earliest possible date.

20. The representative of Canada said that her delegation welcomed the application for accession of Chinese Taipei. Canada had had extensive, detailed and fruitful discussions with Chinese Taipei concerning its offer over the past few years. Her delegation was pleased with the efforts of Chinese Taipei to develop an offer which reflected the commercial interests of both countries. Based on the latest revised offer circulated on 21 February 2002, Canada joined others in supporting the accession of Chinese Taipei and appreciated the benefits of proceeding with this matter as expeditiously as it was feasible.

21. The representative of Switzerland said that his delegation appreciated the efforts made by the delegation of Chinese Taipei in the course of accession negotiations. Switzerland had concluded negotiations with Chinese Taipei recently and looked forward to its accession in the near future.

22. The representative of Japan said that his delegation did not have any substantive objection to the offer circulated on 21 February 2002. Her delegation hoped that the decision on accession would be taken soon.

23. The representative of Israel said that his authorities were close to finalizing consultations with Chinese Taipei. They hoped that the process could be completed soon.

24. The representative of Norway said that his delegation had reached an agreement with Chinese Taipei on the basis of some modifications to the second revision of the offer. His delegation hoped that soon Chinese Taipei would become a Party to the Agreement.

25. The representative of Hong Kong, China said that the informal discussions with the delegation of Chinese Taipei on issues of concern to his delegation had had a fruitful outcome. More time would, however, be needed in order to consult with authorities in Hong Kong, China.

26. The representative of China said that China was neither opposed to the accession of Chinese Taipei to the Agreement nor intent on delaying the process of accession. However, document GPA/SPEC/1/ Rev. 2 contained some nomenclatures which were not consistent with both the Report of the Working Party on the Accession of Chinese Taipei to the WTO and the Protocol of Accession which were the basic legal documents for the accession of Chinese Taipei as a separate customs territory. China requested that this problem be resolved before a decision were taken by the Committee on Chinese Taipei's accession to the Agreement.

27. The representative of Chinese Taipei thanked the Parties to the Agreement for their support of the accession of Chinese Taipei as expeditiously as possible. With regard to Singapore's request regarding General Note 6 and Note 4 to Annex 3 related to Chunghwa Telecom, she said that the offer

to Singapore could be adjusted through bilateral consultations under the condition of reciprocity. With regard to comments made by the observer from China, the negotiation process for accession to the Agreement which had been initiated in March 1995 was currently drawing to a close. She expressed the regret of her delegation that some non-economic issues had been raised with regard to the accession. Her delegation believed that under the rules of procedure for the participation of observers in the Committee, any request or statement made by a non-Party to the Agreement should not have an impact on the decision made by the Committee on the accession. Chinese Taipei emphasized that it would be against the interests of Parties if a *bona fide* accession case, which had involved the work of many Parties for many years, were to be turned down or affected by political elements unrelated to the substance of the Agreement. Moreover, the concern raised by China was related to the English translation of the entity list. Within the context of the Agreement, the entities listed were legal subjects for tendering purposes. Any amendment to the nomenclature of those entities would cause legal confusion and severely jeopardize legal clarity and certainty. Any legal disputes related to this matter would greatly complicate Chinese Taipei's participation in the Agreement and would ultimately hurt the commercial interests of all Parties to the Agreement. Chinese Taipei considered that a further delay caused by a problem of this nature would set a bad precedent for the accessions to the Agreement and hoped that this could be prevented.

28. The Chairman said that all decisions in the Committee, including decisions on accessions, were taken by the Parties. He noted the appreciation of Parties for the hard work and efforts of the Chinese Taipei delegation and said that it was clear from the comments made by the Parties that the accession was at a very advanced stage. It was also clear that many delegations needed more time to further review the latest revised offer and that some delegations had remaining substantive concerns. He encouraged all Parties to complete the outstanding work on the accession of Chinese Taipei and said that he hoped that the Committee would be in a position to take a decision by the time of its next meeting.

(ii) *Estonia*

29. The Chairman drew the attention of the Committee to the revised offer recently received from Estonia and circulated in GPA/SPEC/9/Rev.1 on 12 February. In addition, document GPA/SPEC/24/Rev.1 contained Estonia's replies to the follow-up questions put by the United States¹. (Further follow-up questions put by the United States were circulated in GPA/W/XXX)

30. The representatives of the United States; Japan; Canada; Switzerland; and the European Community said that the revised offer from Estonia was still under review by their respective delegations. The representative of the United States encouraged all Parties to hold consultations with Estonia and to pursue any interests they may have relating to the accession with a view to moving forward as quickly as possible.

31. The Chairman encouraged all interested Parties to intensify their bilateral contacts with Estonia so as to enable the Committee to take a decision on Estonia's accession at the next meeting.

(iii) *Latvia*

32. The representative of Latvia said that, since the last meeting, bilateral consultations had continued with interested Parties, namely the European Community and Israel. Consultations with the European Community towards the end of last year were believed to have been very fruitful, although a number of issues had been raised that warranted further reflection. As a result of its bilateral consultations, Latvian authorities had started to prepare an amended offer. However, due to reorganization of the national public procurement administration it had not been possible to complete

¹ Further follow-up questions put by the United States were circulated in GPA/W/190

the revised offer. The revised offer was expected to be circulated in the near future and subsequently consultations would be undertaken with all interested Parties.

33. The representative of the United States said that an agreement with Latvian authorities had been reached late last year on the terms of Latvia's accession. The United States looked forward to Latvia's accession as soon as possible. However, if the revised offer were found to contain significant changes, it would have to be reviewed so as to ensure consistency with the earlier bilateral agreement.

34. The representative of Switzerland said that his delegation had concluded negotiations with Latvia last year and had hoped that its accession could have been completed by the date of the present Committee meeting. His delegation was concerned about the delays to Latvia's accession. Switzerland hoped that the future revisions to Latvia's offer would not have major implications in terms of the substance covered, so that negotiations with Latvia would not have to be reinitiated.

35. The representative of Canada said that her authorities had almost concluded their bilateral consultations with Latvia. She encouraged Latvia to submit its revised offer as soon as possible, noting, however, that her authorities would need to review the revised offer before reaching a final conclusion.

36. The Chairman urged interested Parties to complete bilateral discussions with Latvia as soon as possible so that a decision on Latvia's accession could be taken by the time of the next Committee meeting.

(iv) *Bulgaria*

37. The Chairman said that information on Bulgaria's national legislation had been circulated in GPA/49 and its replies to the Checklist of Issues in GPA/W/136. Bulgaria's replies to the questions received from Hong Kong, China; Switzerland; Canada and the United States had been circulated in documents GPA/SPEC/22/Rev.1, GPA/SPEC/21/Rev.1, GPA/SPEC/23/Rev.1 and GPA/W/171/Rev.1 respectively. Any follow-up questions should be forwarded to Bulgaria by 8 April 2002 and Bulgaria should answer such questions by 24 May 2002.² Informal plurilateral consultations had been held between Bulgaria and interested Parties on 21 February 2002 which had focused mainly on the examination of Bulgaria's national legislation.

38. The representative of Bulgaria said that intensive domestic consultations had taken place regarding the preparation of an initial offer. In this regard, Bulgaria had to take into account the new situation after Doha and the work of the Committee on Article XXIV:7 negotiations, and had also to assess Bulgaria's export opportunities to markets of countries Parties to the Agreement.

39. The representative of the United States said that his delegation appreciated the work done by Bulgaria in respect of following up its commitment with regard to the Agreement and understood that domestic work was an important element of the accession process. His delegation was however disappointed that greater progress had not been made and hoped that Bulgaria could submit an offer as soon as possible.

(v) *Slovenia*

40. The Chairman said that Slovenia's replies to the Checklist of Issues had been circulated in document GPA/W/158, dated 5 October 2001. Slovenia's answers to the questions received from the European Community, the United States and Switzerland had been circulated in documents GPA/SPEC/28/Rev.1, GPA/W/172/Rev.1 and GPA/W/175/Rev.1, respectively. The Chairman said

² Follow-up questions put by the United States to Bulgaria were circulated in GPA/W/189

that any follow-up questions should be forwarded to Slovenia by 8 April 2002 and Slovenia should answer such questions by 24 May 2002.³ Informal plurilateral consultations had been held between Slovenia and interested Parties on 21 February 2002.

41. The representative of Slovenia emphasized the importance of the field of government procurement to his country. Internal consultations had been initiated in Slovenia with regard to the preparation of the offer and the Committee would be informed of any developments.

42. The representatives of the United States, supported by the representative of Switzerland, said that his delegation appreciated Slovenia's detailed responses to the Checklist and hoped that an offer would be submitted soon. The representative of the United States believed that the process for accession could proceed in parallel with internal discussions relating to revision of domestic laws and hoped that this would continue to be the case with Slovenia's preparations for accession. The representative of Switzerland said that the information on national legislation submitted by Slovenia had been reviewed by his delegation and Slovenia's procurement regime appeared to be consistent with requirements under the Agreement.

(vi) *Albania*

43. The Chairman said that Albania had submitted its replies to the Checklist of Issues in document GPA/W/161, dated 12 October 2001, and information on its national legislation in GPA/65. The European Community; Hong Kong, China; the United States; Switzerland; and Canada had submitted questions to Albania in documents GPA/SPEC/26, GPA/W/169, GPA/W/170, GPA/W/174 and GPA/W/178, respectively. Albania's replies to the questions submitted by the United States had been circulated in document GPA/W/170/Rev.1.

44. Regarding next steps, the Chairman said that Albania should submit its replies to the questions it has received from other Parties by 22 March 2002.

(vii) *Moldova*

45. The Chairman said that Moldova had applied for accession on 8 January 2002 (GPA/63). Moldova's replies to the Checklist of Issues had been circulated in GPA/W/177 dated 9 January 2002. The questions forwarded by Hong Kong, China to Moldova had been circulated in document GPA/W/182.

46. In accordance with the indicative time-table, the Chairman invited Parties to submit any questions to Moldova by 9 March 2002 and Moldova would answer any such questions by 9 May 2002.⁴

(viii) *Jordan*

47. The representative of Jordan said that a national committee comprised of members from both private and public sectors had been formed. Its tasks included developing Jordan's programme for accession; preparing the final entity offer; and forming working groups charged with collecting and analysing data related to procurement of works, goods and services in the light of the potential interest of local industries. The resulting study would serve as a guide for the preparation of the entity offer. The national committee had held several meetings during the last two months with concerned parties from the public and private sectors regarding Jordan's accession. It had also formed a working group

³ Follow-up questions put by the United States to Slovenia were circulated in GPA/W/192.

⁴ Moldova's replies to the questions put by Hong Kong, China were circulated in GPA/W/193 on 25 April 2002. The questions put by the United States were circulated in GPA/W/177.

focused on studying the status of the industrial and services sectors in order to help with the preparation of the entity offer. Private sector members of the national committee had appointed local consultants to analyse the effects of accession on specific sectors in order to identify possible offsets and threshold levels that might be included in Jordan's initial offer. Jordan expected to submit the initial entity offer prior to the end of 2002. Jordanian authorities were currently engaged in the review and updating of national procurement legislation. A decision had been taken by the Cabinet to merge the Government Tenders Directorate and the General Supplies Directorate into one entity. Bilateral consultations with the United States, the European Community and Canada had been held on 21 February 2002 in the course of which technical assistance needs had also been discussed.

48. The representative of the United States said that his delegation had held a series of consultations on the issue of Jordan's preparations for accession. The United States was looking forward to receiving an initial offer as soon as possible.

49. The representative of Canada encouraged Jordan to proceed with work on a draft offer in parallel with the work regarding the review of its procurement system and assessment of its compliance with the provisions of the Agreement.

50. The representative of the European Community encouraged Jordan to intensify work on modifying domestic legislation in order to bring it into line with the Agreement. Jordanian requests with regard to technical assistance had been taken note of and the European Community would consider appropriate action.

51. The representative of Switzerland commented that the close cooperation between private and public sectors outlined by Jordan was very important. Referring to the Jordanian studies on the impact on domestic sectors of participation in the GPA regime, he said that Switzerland had encountered great difficulty in carrying out similar studies and that therefore some limitations should be expected as to what could be achieved through sectoral impact studies.

(ix) Kyrgyz Republic

52. The Chairman said that the Kyrgyz Republic had applied for accession and had submitted its initial offer on 11 May 1999 (GPA/SPEC/4). The written questions and comments received from the United States had been circulated in document GPA/SPEC/7. The Chairman had been informed that there had been some delay in the preparation of replies to the Checklist due to technical and human resource challenges, but that they would be submitted to the Committee before the next meeting.

(x) Panama

53. The Chairman said that at the May 2001 meeting the Committee had been informed of the status of bilateral consultations with Panama (GPA/M/16, paragraph 37), but since then there had been no further developments in that respect.

(xi) Lithuania

54. The representative of Lithuania said that her Government would implement all commitments undertaken during its accession to the WTO. Lithuania fully acknowledged the importance and overall benefits of joining the Agreement on Government Procurement. The decision to join the Agreement had been recently approved by her Government and the formal application would be submitted shortly.⁵ Lithuanian authorities were currently analysing and preparing both the draft offer

⁵ Subsequently circulated in document GPA/66

and the responses to the Checklist. However, some delay may be unavoidable due to the revision of the national government procurement law currently under way in the Lithuanian Parliament.

55. The representative of the United States said that it would be useful to maintain contact and continue consultations between acceding countries and Parties to the Agreement during the development of new legislation so that acceding Parties could ensure that any revisions were consistent with the requirements of the Agreement. The United States looked forward to receiving an offer from Lithuania.

56. The representative of Switzerland said that his delegation hoped that Lithuania would soon submit its replies to the Checklist of Issues. This would be especially important in the light of the Parliamentary process which had been continuing for some time, as the Checklist would provide information on the major aspects of the Lithuanian practice.

(xii) Newly Acceded Countries

57. The Chairman said that Oman's replies to the Checklist of Issues had been circulated in GPA/W/141. Questions put by the European Community, the United States and Canada to Oman in November and December 2001 had been circulated in documents GPA/SPEC/27, GPA/SPEC/25 and GPA/W/176, respectively.

58. The representative of Oman said that a seminar on government procurement had been held in Muscat on 5 and 6 February 2002. It had been largely attended by representatives of the public and private sector and had served the purpose of making authorities aware of the intricacies of the Agreement on Government Procurement. On behalf of her authorities, she thanked the WTO Secretariat for organizing the seminar and the government of Switzerland for providing the services of an expert. Following the seminar, a governmental task force responsible for pursuing matters relating to government procurement had held its first organizational meeting. Oman would soon be applying for accession to the GPA.

59. The representative of Croatia said that a new public procurement law had entered into force at the beginning of 2000. Pursuant to the changes the new law had brought to the public procurement system Croatian authorities had started an internal consultation process in order to assess all issues and different aspects related to accession to the Agreement. They expected to be able to initiate the procedures and submit the application for accession shortly.

60. With respect to the other newly acceded countries, the Chairman recalled that China, Georgia and Mongolia had commitments regarding the Agreement on Government.

(xiii) Streamlining the Process of Accessions

61. The representative of Israel said that his delegation was concerned with a systemic issue. The process of negotiations amounted to a set of offers which was being passed from one Party to another and which then had to be taken as a de facto result, without negotiations between all Parties having effectively ever taken place. Israel believed that the Committee should consider in more general terms how an offer was built and the nature of the negotiation process, especially with regard to the participation of smaller Parties in these negotiations.

62. The Chairman said that Parties may pursue their interests bilaterally with each of the acceding countries and that the accession process would not be completed until all Parties had been satisfied. It was in the interest of all Parties that the accession process worked to the benefit of all Parties.

E. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

63. The Chairman said that, at the last meeting, the delegations of the Kingdom of the Netherlands with respect to Aruba and Iceland had been invited to submit their notification of the implementing legislation in accordance with the requirements in GPA/1/Add.1. No such submissions had been made as yet.

64. The representative of the Kingdom of the Netherlands said that he had been informed by the authorities of Aruba that work was still in progress on the notification and that a specific time-frame for submission could not be indicated. He said that the issue had the fullest attention of the authorities and hoped that the notification could be submitted as soon as possible.

F. NEGOTIATIONS UNDER ARTICLE XXIV:7

65. The Chairman said that an informal meeting on Article XXIV:7 negotiations had been held on 19-20 February 2002. The group had pursued the Article-by-Article review of the Agreement on the basis of the proposals by various delegations compiled in the Secretariat note "Suggested Drafting Changes to the 1994 Agreement", dated 14 November 2001 (Job No. 8599). Delegations also had available to them: a non-paper by the European Community "Drafting Proposals on Tendering Procedures and Technical Specifications" (Job No. 876); three communications by the United States, namely "Review of the Agreement on Government Procurement - Revised US Proposals" (Job No. 1051), "Drafting Proposals Relating to Article V" (Job No. 1235) and "Explanatory Note with Examples of Coverage of 'Build-Operate-Transfer' Contracts and 'Concessions for Public Works' Under the Agreement" (Job No. 1043); a communication by Japan "Japan's Comments on the US Proposal in Job No. 2867" (Job No. 1141); and a note by the Secretariat on "The Meaning of the Term 'measures' under GATT/WTO Jurisprudence" (Job No. 1158). The group had a detailed discussion of the proposed drafting changes to the Articles of the Agreement relating to tendering procedures (Articles VII-XV and Article XVIII, paragraphs 1, 3 and 4), technical specifications (Article VI), and developing countries (Article V), and of the proposals for new definitions related to tendering procedures, technical specifications and BOT contracts. The Secretariat would update the "Suggested Drafting Changes to the 1994 Agreement" in light of the proposals recently submitted and the detailed comments made and clarifications sought at this meeting. As agreed at the October 2001 meeting, he had had a series of informal consultations with a view to making a proposal for a timetable and work programme for all elements of the work under Article XXIV:7 at the present meeting. A draft timetable and work program reflecting the outcome of the informal consultations including an informal session held with the Parties on 19 February was contained in Job No.696/Rev.1 dated 19 February 2002. In light of these consultations, he suggested the following timetable and work programme for the negotiations under Article XXIV:7 of the Agreement:

"Article XXIV:7(b) and (c) of the Agreement calls on the Parties, not later than the end of the third year from the date of its entry into force, to undertake further negotiations, with a view to improving the Agreement and achieving the greatest possible extension of its coverage among all Parties on the basis of mutual reciprocity, having regard to the provisions relating to developing countries and eliminating any remaining discriminatory measures and practices which distort open procurement.

Modalities for the negotiations

- The further negotiations under Article XXIV:7 shall be undertaken and completed as a whole on all elements (i.e. improvement of the text, expansion of coverage and elimination of discriminatory measures and practices), but there may need to be differences in modalities and timing among the elements.

- The negotiations shall be completed by 1 January 2005.
- The general view has been that the work on the revision of the coverage-related areas in the text of the Agreement and the negotiations on the other two elements are interdependent.
- Building on the work in the informal consultations that has been done since the review of the Agreement was launched in 1997, the aim is to have provisional agreement on the revised text of the Agreement by the 5th Ministerial Conference, recognizing that it may not be possible to conclude some of the elements of the text before the work on the other two aspects of the negotiations are concluded. In any event, the revised text will not take effect until all elements of Article XXIV:7 negotiations have been completed.
- The negotiations on the expansion of the coverage and the elimination of discriminatory measures and practices shall start with an exploratory phase until the end of 2002. These negotiations are to be concluded by 1 January 2005.
- The work programme could be modified in light of any new developments.
- A minimum of four informal meetings shall be foreseen for 2002 and for 2003 and, where possible, two to three days shall be allocated for each session.

Arrangements for the revision of the text

- The discussion at each of the meetings in 2002 shall focus on selected categories of issues, respectively those in basket 1 (basic principles, scope and coverage and related definitions, exceptions, developing countries and accessions), basket 2 (tendering procedures, technical specifications and related definitions), and basket 3 (enforcement, institutions, statistical reporting). All proposals relating to these issues should be tabled no later than 1 September 2002.
- Key substantive issues and drafting options shall be identified with respect to each Article or group of Articles by the end of the third meeting in 2002. Starting at the fourth meeting in 2002, the discussion shall focus on ways of bridging the remaining gaps on the basis of a text by the Chairman.

Arrangements for the other two elements

- Regarding the work on the other two elements, a preparatory phase will take place in 2002 aimed at the identification and study of the areas to be negotiated and agreeing on a detailed programme for the negotiations by the end of the year. Delegations who wish to put forward ideas on the possible approaches regarding the negotiations on the expansion of the coverage and the elimination of discriminatory measures including the procedures for tabling of offers and requests should do so by 15 October 2002.⁶
- The negotiations on these elements shall be initiated in 2003 with the aim of concluding them by 1 January 2005.

⁶ Related to these aspects of the negotiations, the group already has before it, for reference, the submissions by Canada (Job No. 6604-2001), Hong Kong, China (Job No. 5270-1998) and the United States (Job No. 3843-1998).

Note

- In 1996, the Committee agreed to undertake an early review, starting in 1997 with an examination of modalities, with a view to the implementation of Article XXIV:7(b) and (c) of the Agreement. The review will, in particular, cover the following elements: expansion of the coverage of the Agreement; elimination of discriminatory measures and practices which distort open procurement; and simplification and improvement of the Agreement, including, where appropriate, adaptation to advances in the area of information technology. It was also agreed that the review shall seek the expansion of membership of the Agreement by making it more accessible to non-Parties (GPA/8)."

66. With regard to the next informal meeting in May, the Chairman suggested that that the group have a focused discussion on issues in basket 1 in the work programme (basic principles, scope and coverage and related definitions, exceptions, developing countries and accessions) and that the group revert to the discussion of the issues in basket 2 (tendering procedures, technical specifications and related definitions). To facilitate the discussion of basket 1 issues, an annotated agenda would be circulated setting out some of the issues that the group might discuss in relation to this basket.

67. The Committee agreed to the way of moving forward proposed by the Chairman.

G. DATE OF THE NEXT MEETING

68. The Committee agreed to hold its next meeting on 30 May 2002⁷.

⁷ Subsequently postponed to 31 May 2002.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 2 OCTOBER 2001

Chairman: Mr. Martin Loken (Canada)

1. The following agenda was adopted:
 - A. Applications for Observer Status
 - B. Modifications to the Appendices to the Agreement
 - C. Accessions:
 - (i) *Latvia*
 - (ii) *Estonia*
 - (iii) *Chinese Taipei*
 - (iv) *Jordan*
 - (v) *Bulgaria*
 - (vi) *Slovenia*
 - (vii) *Albania*
 - (viii) *Kyrgyz Republic*
 - (ix) *Panama*
 - (x) *Oman*
 - (xi) *Other Newly Acceded Countries*
 - D. Review of National Implementing Legislation
 - E. Negotiations under Article XXIV:7
 - F. Annual Report for 2001 to the General Council
 - G. Date of the Next Meeting

A. APPLICATIONS FOR OBSERVER STATUS

2. The Committee agreed to grant observer status to the Governments of Albania and Hungary, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the requests received from those countries (GPA/W/157 and 148, respectively).

3. Welcoming the two new observers, the representatives of the United States and the European Community said that they hoped that the observers would participate in the work of the Committee in a substantive way. The representative of the United States encouraged the observers to consider their accession to the Agreement as early as possible.

4. The observer from the Slovak Republic said that, as part of the ongoing process of the approximation of its legislation with the EU Directives, the Public Procurement Law of 1 January 1994 had been improved. Also, the Office of Public Procurement, an independent central government authority, had been established on 1 January 2000.

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

5. The Chairman said that, since the May meeting, the delegation of the United States had proposed modifications to Appendix I and Appendices II and IV in documents GPAW/153¹ and 154² respectively, dated 25 September 2001; and the delegation of Japan to its Appendix I in documents GPA/W/144, 145 and 146, dated 29 August 2001. As regards the proposed modifications by Japan, communications had been received from the delegations of the United States, Canada and the European Community (GPA/W/151, 155 and 156) seeking clarification and objecting to the proposed withdrawal of the three Japanese Railway companies, namely East Japan Railway Company, Central Japan Railway Company and West Japan Railway Company from the coverage of the Agreement. A relevant notification received from Japan had been circulated in document GPA/W/152 and Corr.1.

6. The representative of Japan said that, first, Japan was convinced that regulatory control or influence over the three Japanese Railway (JR) companies had been effectively eliminated. The three JR companies had been incorporated as a commercial company in 1987 when the Japanese National Railways services had been divided into six regional passenger services. The Government had subjected these passenger railway companies to extensive regulations concerning their management in order to ensure the smooth transition of the railway services which had previously been provided by the national railways. An amendment to the Law on Passenger Railway Companies and Japan Freight Railway Company would remove the three JR companies from the coverage of regulations provided for in that Law. The Amendment had passed in the Diet in June 2001 and would come into force on 1 December 2001. Second, government control or influence over the three JR companies through ownership was no longer in place. The shares of the three JR companies were listed and traded on the Tokyo Stock Exchange Market and a majority of the shares were already privately held. Although the Japan Railway Construction Public Corporation, a 100 per cent government-owned entity, still held a certain percentage of the shares, it held them merely to pay the annuity debt to former employees of the national railway out of their sales revenues. Therefore, it was in the interest of the Corporation to sell them as quickly as possible in order to keep up with the payment of bills. Third, the three JR companies were operating without special aid from the Government and were competing fiercely with other private operators and other modes of transportation. For these reasons, the representative of

¹ The delegations of Canada, the European Community and Japan have made communications seeking further information from the United States with respect to the notification in GPA/W/153 and objecting to the proposed modifications going into effect at the end of the 30-day period (respectively circulated in documents GPA/W/167 of 24 October 2001, GPA/W/163 of 19 October 2001 and GPA/W/162 of 22 October 2001).

² The proposed changes to Appendices II and III have become effective on 25 October 2001 (WT/Let/407).

Japan was quite confident that the three JR companies fulfilled the requirements set forth in Article XXIV:6(b) of the Agreement and said that his delegation considered that their proposed withdrawal from the Agreement should be approved.

7. The representatives of the United States; the European Community; Canada; Hong Kong, China; and Switzerland said that their respective delegations were currently studying the information that had been provided by Japan and that they intended to provide written questions to Japan regarding certain specific issues.³ The representatives of the European Community and Canada said that their delegations had held bilateral consultations with Japan regarding this issue. In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting in the light of discussions between Japan and interested Parties.

8. With regard to the proposed modifications notified by Japan on 6 September 1999 in document GPA/W/91, the Chairman said that consultations had been held between Japan and the delegations of the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, GPA/W/99, GPA/W/100 and GPA/W/100/Add.1) and Japan's answers thereto (GPA/W/104, GPA/W/104/Add.1 and GPA/W/104/Add.2/Rev.1, GPA/W/107, GPA/W/108 and GPA/W/160).

9. The representative of Japan said that, following the submission of Japan's notification regarding the reorganization of the NTT in 1999, Japan had held consultations with Parties who had opposed the proposed modifications to Appendix I. It had become clear to Japan that certain points regarding independence, competition and volume of procurement relating to NTT should be explained further in order to convince Parties that this modification was justified under Article XXIV:6 of the GPA. First, all NTT-C stocks were owned by the NTT Holding Company, some of whose stocks were owned by the Government of Japan. This fact could lead to the assumption that the Government could exert influence on NTT-C through the NTT Holding Company. To counter any such assumptions, Japan would give the following explanation to indicate the independence of NTT-C. First, the authorization by the Government to the NTT Holding Company to release the share of NTT-C was to be abolished in December 2001 when the amendment of the NTT Law of June 2001 would come into effect. As a result of this amendment, there would be no stipulation concerning the NTT-C in the NTT Law and the autonomy of the management of the NTT-C would be more clear. Second, the ratio of NTT Holding Company stocks held by the Government had fallen to less than 50 per cent. At present, the ownership of NTT stocks by the Government was 46 per cent. As for competition, the market share related to long-distance services, which was one of the main businesses undertaken by the NTT-C, had been steadily decreasing year by year. The market share of international telephony and Internet access services for individual use provided by NTT-C was also quite small. Finally, the volume of procurement by NTT-C above the threshold under Japan's Action Programme on Government Procurement (SDR 100,000) had been nil in 2000. Given the aforementioned, the conditions for modifications to Appendix I under Article XXIV:6 should be considered as satisfied. In the past two years, the Government of Japan had responded to the questions put by interested Parties and had provided all the relevant data. Japan believed that Parties should be able to decide soon on the matter.

10. The representative of the United States asked whether Japan had plans for selling the shares of NTT-C by the NTT Holding Company or whether the NTT Holding Company would maintain all the shares of the NTT-C company. The representative of Japan said that, based on the three-year programme for promoting regulatory reform and other recommendations, the Ministry of Public Management, Home Affairs, Posts and Telecommunications requested in May 2001 that the NTT Holding Company develop and publish a voluntary action plan which would aim at providing

³ The questions received from the European Community and the United States, dated 19 October 2001, have been circulated in documents GPA/W/164 and 165, respectively.

improved management and ensuring fair competition. In that sense, maintaining NTT-C shares was a question of management by the NTT Holding Company.

11. The representatives of the European Community and Canada said that their delegations would study the information that had been provided.

12. In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting in the light of discussions between Japan and other Parties.⁴

13. With respect to the notification by Japan in GPA/W/129, dated 19 March 2001, the Chairman said that the United States and Canada had made communications objecting to these modifications (GPA/W/132 and 134) and Hong Kong, China had requested further information (GPA/W/135 and 143). Japan's responses had been circulated in document GPA/W/137. The United States and Canada had indicated subsequently that they had withdrawn their objection to the proposed modifications (GPA/W/139 and 147). Accordingly, the modifications proposed by Japan in GPA/W/129 had entered into force on 5 September 2001 (WT/Let/400).

14. With respect to the notification by Korea in GPA/W/128 and Corrs. 1 and 2, the Chairman said that Korea's responses to the clarification of the proposed modifications sought by the United States (GPA/W/133) had been circulated in document GPA/W/142. The United States had indicated subsequently that it had withdrawn its objection (GPA/W/150). The modifications proposed by Korea in GPA/W/128 and Corrs. 1 and 2 and additional modifications proposed by Korea to its Appendix I (GPA/W/140) had entered into force on 14 September 2001 (WT/Let/401).

C. ACCESSIONS

(i) *Latvia*

15. The Chairman said that Latvia had updated the information that it had previously provided on its government procurement regime by replying to the Checklist of Issues in document GPA/W/149, dated 13 September 2001.⁵

16. The representative of Latvia said that Latvia had concluded its bilateral consultations with Canada, Switzerland and the United States. She hoped that the ongoing bilateral consultations with the European Community and Israel would be finalized soon in order to enable the Committee to take a decision on Latvia's accession by the next meeting.

17. The representative of the European Community said that her delegation hoped to conclude its bilateral consultations with Latvia soon.

18. The representative of the United States said that the United States would be prepared to agree to the terms that had been offered by Latvia during the bilateral consultations. The representative of Canada said that her delegation looked forward to receiving Latvia's final draft offer following the conclusion of Latvia's consultations with some other delegations. The representative of Switzerland said that his delegation looked forward to Latvia's accession to the Agreement.

⁴ In a communication, dated 19 October 2001, the United States has withdrawn its objection to the modifications proposed by Japan in GPA/W/91 (GPA/W/166).

⁵ A further communication by Latvia transmitting the Law on Procurement for State or Local Government Needs was circulated on 22 November 2001 (GPA/28/Add.2).

19. The Chairman urged those delegations that had not yet completed their bilateral consultations with Latvia to do so as soon as possible. With regard to the next steps in Latvia's accession process, he suggested that Latvia should submit a revised offer as soon as possible. Parties would then have six weeks from the date of circulation of the offer to advise the Secretariat whether or not they would be able to accept the terms of the offer. If no objections had been raised within that time-period, the Secretariat would circulate a draft Decision containing the terms providing for the accession of Latvia which the Parties could consider for adoption at the next meeting. The Committee so agreed.

(ii) *Estonia*

20. Reporting on the developments regarding Estonia's accession since the meeting of the Committee held in May 2001, the Chairman said that a revised version of Estonia's replies to the Checklist of Issues had been circulated in document GPA/W/127/Rev.1 and Add.1. In addition, a copy of the Revised Public Procurement Act of 1 April 2001 was circulated in document GPA/55.

21. The representative of Estonia said that, since the May 2001 meeting, Estonia had held bilateral consultations with the delegations of the United States and Canada and a revised offer would be submitted in the near future.

22. The representative of Japan said that Estonia had replied to a follow-up question that had been put by his delegation relating to the registration and qualification of suppliers of construction services (GPA/SPEC/19/Rev.1). Japan looked forward to receiving Estonia's revised offer. The representative of the United States said that his delegation appreciated the progress that had been made in Estonia's accession process. His delegation had held bilateral consultations with Estonia and hoped that Estonia would be able to complete its accession process in the near future.⁶ The representative of Canada said that her delegation had held bilateral consultations with Estonia and looked forward to receiving Estonia's revised offer.

23. In concluding the discussion on Estonia's accession, the Chairman invited those Parties who had not yet completed the bilateral consultations with Estonia to do so in the near future. He suggested that Estonia should submit a revised offer as soon as possible. Parties would then have six weeks from the date of circulation of the offer to advise the Secretariat whether or not they would be able to accept the terms of the revised offer. The Committee so agreed.

(iii) *Chinese Taipei*

24. The representative of Japan said that her delegation had recently sought some further clarification from the delegation of Chinese Taipei. The representatives of the European Community and Switzerland said that their delegations were examining the information that had been received recently from the delegation of Chinese Taipei.

25. The representative of Chinese Taipei said that, in the process of its WTO accession negotiations, Chinese Taipei had undertaken a commitment to accede to the Agreement on Government Procurement following its accession to the WTO. Chinese Taipei had completed the bilateral negotiations with all interested Parties. Chinese Taipei's offer in document GPA/SPEC/1/Rev.1, dated 19 March 1997, would be revised pursuant to those negotiations. Chinese Taipei's WTO accession was expected to be approved at the time of the Fourth Ministerial Conference and would become effective after the completion of domestic ratification procedures and the deposit of the instrument of accession. Chinese Taipei's final offer would be submitted for the consideration and adoption of the Committee once the WTO accession process had been completed.

⁶ The questions received from the United States, dated 23 October 2001 have been circulated in document GPA/SPEC/24.

(iv) *Jordan*

26. The representative of Jordan said that her delegation had pursued bilateral consultations with the delegations of the European Community and the United States. Reporting on the domestic work under way regarding Jordan's accession to the Agreement, she said that, in cooperation with the AMIR (Access to Microfinance and Improved Implementation of Policy Reform) programme, a technical assistance project funded by the USAID (United States Agency for International Development), a comprehensive study on government procurement was being conducted for the benefit of the Jordanian government authorities. The main purpose of the study was to estimate the size of Jordan's procurement market and to assess the possible impact of the opening of Jordan's procurement market to international competition on domestic suppliers. The first stage of the study consisted of the gathering of data on the procurement of goods and services by various central and sub-central government entities over the past four years. Most government entities' procurement records were paper-based and in loosely organized files and documents which meant that the collection and organization of data took time. The second stage of the study which involved an economic analysis had been delayed until after data from the relevant government entities had been collected and compiled in a usable format. However, some initial findings, based on the available data, were expected to be presented to the Jordanian Government in the near future. The study under way was considered to be essential to the preparation of Jordan's entity offer. Turning to the basic law under preparation, she said that the relevant authorities in the public and private sectors were reviewing the draft law and that the legislative work was not expected to be completed before next year. Moreover, consultations were under way at the intergovernmental level and with the private sector regarding the restructuring of the main procuring entities.

27. The representative of the United States said that his delegation welcomed the information that the domestic preparatory work on Jordan's accession was moving forward. He hoped that Jordan would be in a position to submit an initial offer at the earliest date possible. The representative of the European Community said that her delegation had received Jordan's replies to its questions (GPA/SPEC/20/Rev.1) and had also had bilateral consultations. Her delegation was ready to consider, jointly with the delegation of Jordan, how assistance could be provided regarding the drafting of the new legislation. The representative of Switzerland said that Jordan had made substantial efforts regarding its internal consultations and the preparation of the legislation on public procurement. He looked forward to moving to the next steps in the accession process of Jordan.

(v) *Bulgaria*

28. The Chairman said that the questions related to Bulgaria's replies to the Checklist of Issues (GPA/W/136) that had been received from the delegations of Switzerland; Hong Kong, China; and Canada had been circulated in documents GPA/SPEC/21, 22 and 23, respectively. He added that, according to the indicative time-frame, Bulgaria was expected to provide its responses to those questions by 1 December 2001.

29. The representative of Switzerland said that, in light of Bulgaria's replies to the Checklist of Issues, it seemed that the public procurement regime in Bulgaria, as it stood currently, would generally meet the requirements under the Agreement.

30. With regard to the negotiation of Bulgaria's Schedules, the representative of Bulgaria referred to the ongoing work on the preparation of the initial offer and said that her delegation hoped to be able to submit the offer as soon as the internal consultations on the offer had been finalized.

31. As regards the next phase in Bulgaria's accession process, the Chairman invited the delegation of Bulgaria to submit its initial offer as soon as possible. Also, he suggested that informal plurilateral consultations could be held between Bulgaria and interested Parties in February 2002, back to back with the formal meeting. The Committee so agreed.

(vi) *Slovenia*

32. The Chairman said that Slovenia had applied for accession on 24 September 2001 (GPA/56). It had also submitted its replies to the Checklist of Issues in document GPA/W/158. He suggested that, in accordance with the indicative timetable, any Party wishing to put questions to Slovenia should do so by 1 December 2001. Slovenia should reply to these questions by 1 February 2002. Plurilateral consultations between Slovenia and interested Parties could be envisaged at the time of the next meeting provided that the exchange of questions and answers was completed in advance of the next meeting.

(vii) *Albania*

33. The Chairman said that Albania had applied for accession on 18 September 2001 (GPA/57). He had been informed that Albania would submit its replies to the Checklist of Issues in document GPA/35 in the near future.⁷ He suggested that any Parties wishing to put questions to Albania should do so by 15 December 2001. Albania should provide its responses to any such questions by 15 February 2002.

(viii) *Kyrgyz Republic*

34. The Chairman said that the Kyrgyz Republic had applied for accession and had submitted its initial offer on 11 May 1999 (GPA/SPEC/4). The written questions and comments received from the United States had been circulated in document GPA/SPEC/7.

35. The representative of the United States said that there was need for more input from the Kyrgyz Republic and that his delegation looked forward to receiving the replies to the Checklist of Issues in document GPA/35.

36. The Chairman invited the Kyrgyz Republic to respond to the Checklist of Issues in GPA/35 as soon as possible.

(ix) *Panama*

37. The representative of the United States said that, since the May 2001 meeting, his delegation had had further consultations with Panama in Panama. It had, however, been unable to resolve some of the remaining problems, the principal one of which was his delegation's request relative to the coverage of the Panama Canal Authority in Panama's offer. The United States considered that procurement by the Panama Canal Authority was an important part of the overall government procurement market in Panama. His authorities continued to encourage Panama to consider the listing of that entity in its offer. The authorities in Panama had indicated that they were still considering the matter but had not yet been able to reach an agreement. It was the United States' understanding that the procurement practices of the Panama Canal Authority were, in general, consistent with the requirements under the Agreement. His delegation had suggested to Panama that its accession to the Agreement could be a significant demonstration of that fact. He hoped that Panama would be able to reconsider its position and would be able to actually include that entity in its offer.

⁷ Subsequently circulated in document GPA/W/161, dated 12 October 2001

(x) *Oman*

38. Referring to Oman's replies to the Checklist of Issues that had been circulated in document GPA/W/141 on 12 July 2001, the Chairman said that, in accordance with the indicative time-frame, Parties were to address any questions to Oman by 12 September 2001 but, to date, no questions had been received.

39. The representative of the United States said that his delegation's questions would be submitted in the near future.⁸

40. The representatives of Canada, the European Community and Switzerland said that their delegations had held bilateral consultations with the delegation of Oman.

41. The representative of Oman said that, in order to enable her authorities to have a better understanding of the commitment that they had undertaken regarding the Agreement, her delegation had asked the Secretariat to hold a seminar for the officials of the tender board and other concerned Ministries in Muscat early next year. Oman was facing the problems that were typical of developing countries with small administrations. Because of logistical constraints, the preparation of Oman's entity offer had taken time.

42. The representative of the United States said that his delegation had taken note of the challenges that developing countries might face in acceding to the Agreement and expressed its willingness to work with the Government of Oman to address any particular issues. In his view, informal consultations between the Parties to the Agreement and the acceding countries could be the most beneficial aspect of the accession work.

(xi) *Other Newly Acceded Countries*

43. The representative of Lithuania said that Lithuania had undertaken a commitment to initiate negotiations for membership in the Agreement following its accession to the WTO (WT/ACC/LTU/52). Lithuania had become a WTO Member on 31 May 2001. Lithuania's replies to the Checklist of Issues in document GPA/35 was under preparation and would be submitted in due course. The representative of the United States said that his delegation hoped to receive the replies as soon as possible, preferably prior to the next meeting.

44. The representative of Moldova said that Moldova had undertaken a commitment to initiate negotiations for membership in the Agreement by tabling an entity offer immediately after accession. Moldova had acceded to the WTO on 26 July 2001 (WT/ACC/MOL/37). He said that Moldova had recently adopted its legislation on government procurement. His authorities were currently preparing the replies to the Checklist of Issues in document GPA/35 as well as the initial offer and hoped to be able to submit them shortly.

45. The representative of Croatia said that Croatia had undertaken a commitment that it would initiate negotiations for membership in the Agreement on Government Procurement upon accession by tabling an entity offer at that time (WT/ACC/HRV/59, paragraph 155). Croatia had acceded to the WTO on 30 November 2000. The preparation of a new legislation on public procurement was currently under discussion among different government agencies. Croatia would initiate the procedures regarding the application for accession to the Agreement after the conclusion of the legislative work and once the new law had been passed by the Cabinet and had been approved by the Parliament.

⁸ The questions submitted by the United States on 21 November 2001 have been circulated in document GPA/SPEC/25.

46. Referring to the question of whether it was necessary to complete the domestic work relating to the preparation of new or revised legislation in an acceding country before that country could move forward with the process of accession to the Agreement, the representative of the United States, joined by the representative of Canada, said that acceding countries should be encouraged to consult with the Parties to the Agreement closely and to submit any drafts of the laws in preparation for the consideration of the Parties to the Agreement prior to the conclusion of the domestic procedures. Consultations with the Parties would be beneficial in evaluating any legislation under preparation from the perspective of an acceding country's future commitments under the Agreement. He therefore encouraged Croatia to share with the Parties information on the draft legislation and to enter into informal consultations during the phase of the development of the legislation. The representative of Switzerland referred to Croatia's commitment to accede to the Agreement and said that Croatia should consider the preparation of its offer without waiting to have its domestic legislation fully in place.

47. As regards the other newly acceded countries, the Chairman said that the Protocols of Accession of two WTO Members, namely Georgia (WT/ACC/GEO/31) and Mongolia (WT/ACC/MNG/9) also included commitments regarding the Agreement on Government Procurement.

D. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

48. Taking up the review of the implementing legislation of Japan, the Chairman said that, the replies to the questions put by Canada; Hong Kong, China; Switzerland; and the United States had been circulated in Job No. 5549 and Corr.1.

49. The representatives of Canada; Hong Kong, China; and Switzerland thanked Japan for the replies received. The representative of the United States said that, although his delegation was prepared to agree to the conclusion of the review of Japan's implementing legislation, it was somewhat disappointed that Japan's responses to some of the questions of the United States had not been very detailed. In particular, his delegation had concerns relating to the existence of meaningful competition in Japan's construction market. This question was, in some ways, related to extremely low market penetration of foreign suppliers in that market.

50. The representative of Japan said that his delegation was prepared to discuss construction and related procurement matters, if necessary, on a project basis, with any interested delegation. He believed that Japan's procurement system was open and competitive.

51. As there were no outstanding points with respect to the review of the national implementing legislation of Israel and Liechtenstein on the basis of the replies received from those Parties (Job Nos. 5773, 2923 and 7113 and Job No. 4731), the Chairman suggested that the Committee consider that the review of the implementing legislation of Israel, Japan and Liechtenstein had been completed, it being understood that the Committee might revert to any matter relating to the legislation of these Parties at any time. The full record of the review of the legislation of these Parties would be circulated in the GPA/- series of documents. The Committee so agreed.

52. With regard to the two Parties whose review of the legislation had not yet been initiated, namely the Kingdom of the Netherlands with respect to Aruba and Iceland, the Chairman invited these delegations to submit notifications of their implementing legislation by responding to the Checklist of Issues in GPA/1/Add.1.

E. NEGOTIATIONS UNDER ARTICLE XXIV:7

53. Reporting on the informal consultations held on 1 October 2001 on the Article XXIV:7(b) negotiations, the Chairman said that the informal group had continued its Article-by-Article review of the Agreement on the basis of the proposals by various delegations compiled in the Secretariat note "Suggested Drafting Changes to the 1994 Agreement" (Job No. 5765). Delegations also had available to them an explanatory note by the United States relating to its proposals for the revision of the Agreement (Job No. 2867) and another submission by the United States on "'BOT' Contracts and 'Concessions for Public Works' under the GPA" (Job No. 6800). Detailed comments had been made seeking clarification of or suggesting further drafting changes to the revised texts proposed by the United States in Job No. 2867. As a way of moving forward the discussion on the proposed definitions, the delegation of the United States had been asked to provide some examples of BOT contracts and concessions for public works. Those delegations who had questions regarding the extent to which the proposed definition of "BOT" contracts covered certain types of government procurement had also been invited to forward examples of such situations. The delegation of the United States had indicated that it would further revise the texts of some of the proposed amendments in Job No. 2867 to take account of the comments that had been made so far. It also informed the Group that it was reviewing its ideas on exceptions to the Agreement. A number of other delegations expected to put forward drafting suggestions on the review of the text of the Agreement: Hong Kong, China on several Articles; the European Community on tendering procedures; Canada on time-limits regarding contract award notices; and Japan on Article XXIV:6(b). With regard to the possible use of the term "measures" in defining the scope of an agreement, the Secretariat had been asked to prepare a note on the use of this term in GATT/WTO jurisprudence. The Group had reverted also to other aspects of Article XXIV:7 negotiations, namely the elimination of discriminatory measures and the expansion of coverage. The delegation of Canada introduced a submission on Discriminatory Provisions in the Agreement (Job No. 6604). The Group also had before it a list of documents containing the submissions that had been made previously by various delegations as well as the notes by the Secretariat relating to these elements. The Secretariat had made available a note on the Modalities Used in the Past for Negotiating Schedules to the Agreement (Job No. 7055). Under this item, the view had been expressed by some delegations that coverage issues should be addressed in a broad manner. Regarding the status of work on the revision of the text of the Agreement, the view had been expressed that the proposals on the table constituted a good basis for the negotiations on the revision of the text of the Agreement, it being understood that delegations were free to make additional proposals at any time. Finally, delegations had had an exchange of views regarding the development of a plan of action for carrying forward work on all elements of the review. Some delegations had informed the Group that intensive consultations were being pursued internally on GPA-related issues and that they needed more time before they could agree to a time-frame for further work on the negotiations under Article XXIV:7. It had also been suggested that the discussion on the revision of the text at each of the future meetings would focus on selected categories of issues. Some delegations suggested that the possibility of early results in some areas should be considered. Some delegations stressed that the elements of the review regarding the elimination of discriminatory provisions and expansion of coverage would be taken up in parallel with the work on the revision of the text.

54. Regarding the next informal meeting which would be held on 20 February 2002, the Secretariat note, "Suggested Drafting Changes to the 1994 Agreement" would be revised to incorporate the comments made at the present meeting. Those delegations who expected to suggest new draft texts or amendments to earlier proposals had been invited to do so by 20 January 2002. The Group would have a focused discussion on tendering procedures (Articles VII-XV and Article XVIII, paragraphs 1, 3 and 4); technical specifications (Article VI); definitions related to these two issues (the United States proposal in Job No. 2867); and provisions on developing countries (Article V and the proposal by Switzerland in Job No. 1274). The Group would revert to the discussion of BOT contracts (the United States proposal in Job No. 2867 and Job No. 6800). The Group would continue

its discussion on how to move forward on the other elements of the negotiations. Prior to this meeting, the Chair would have informal consultations with a view to making a proposal for a timetable and work programme for all elements of the work under Article XXIV:7.

F. ANNUAL REPORT FOR 2001 TO THE GENERAL COUNCIL

55. The Committee agreed to the arrangements for the adoption of its Annual Report for 2001 to the General Council on the basis of a draft prepared by the Secretariat. The report was subsequently adopted and circulated as document GPA/58.

G. DATE OF THE NEXT MEETING

56. The Committee agreed to hold its next meeting on 21 February 2002.

WORLD TRADE ORGANIZATION

RESTRICTED

GPA/M/15
12 July 2001

(01-3477)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 3 MAY 2001

Chairman: Mr. Martin Loken (Canada)

1. The following agenda was adopted:
 - A. Election of the Chairman for 2001
 - B. Applications for Observer Status
 - C. Modifications to the Appendices to the Agreement
 - D. Streamlining the Accessions Process
 - E. Accessions:
 - (i) *Latvia*
 - (ii) *Estonia*
 - (iii) *Jordan*
 - (iv) *Bulgaria*
 - (v) *Panama*
 - (vi) *Chinese Taipei*
 - (vii) *Newly Acceded Countries*
 - F. Review of National Implementing Legislation
 - G. Negotiations under Article XXIV:7
 - H. Date of the Next Meeting
- A. ELECTION OF THE CHAIRMAN FOR 2001
2. The Committee elected Mr. Martin Loken (Canada) as its Chairman for 2001.
- B. APPLICATIONS FOR OBSERVER STATUS
3. The Committee agreed to grant observer status to the Governments of Cameroon, Malta and Oman, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the requests received from those countries (GPA/W/121, 139 and 126, respectively).

4. Welcoming the three new observers, the representatives of the United States, the European Community and Switzerland said that they looked forward to an active participation of observers in the Committee's work. The representative of Switzerland encouraged observers to come forward with any views on how the on-going negotiations under Article XXIV:7 could take into account the needs of developing countries, in particular in relation to the amendments to Article V on special and differential treatment. The representative of Oman said that the review of the Agreement should focus on the needs and the difficulties of developing countries acceding to the Agreement which might include provisions allowing flexibility in the implementation of the Agreement and on technical cooperation for capacity building. The representative of the European Community said that, while the general view had been that developing countries might need flexibility related to implementation, the views of developed countries as to what type of flexibility would be appropriate might not be shared by developing countries. An active contribution from developing countries to the discussion of these matters in the context of the review of the Agreement would benefit both developed and developing countries.

C. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

5. The Chairman said that, since the September 2000 meeting, Japan; Hong Kong, China; and Korea had proposed modifications to their respective Appendices I (GPA/W/123 and GPA/W/129, GPA/W/122/Rev.1 and GPA/W/128 and Corrs. 1 and 2). The modifications proposed by Japan in GPA/W/123 and Hong Kong, China in GPA/W/122/Rev.1 had entered into force on 29 December 2000 (WT/Let/367) and 6 January 2001 (WT/Let/370), respectively.

6. With respect to the notification by Japan in GPA/W/129, the Chairman said that communications had been received from the delegations of the United States; Canada; and Hong Kong, China (GPA/W/132, 134 and 135) requesting further information from Japan and objecting to the proposed changes going into effect. Japan's responses had been circulated in document GPA/W/137. The representatives of Hong Kong, China, the United States and Canada said that their authorities were currently studying Japan's responses. The representative of the United States said that her authorities had some specific concerns with respect to the proposed transfer of independent administrative units from Annex 1 to Annex 3 and a more general concern about the complexity of the changes to the list of entities in Annex 3. The representative of Japan said that Japan hoped that the information provided on the proposed modifications to Annex 1 would improve the understanding of the proposed modifications to Annex 3 so that their objections could be withdrawn in the near future.¹ In concluding the discussion, the Chairman said that the Committee would revert to this matter at its next meeting in the light of discussions between Japan and other Parties.

7. Referring to the notification by Korea in GPA/W/128 and Corrs. 1 and 2, the representative of Korea said that a communication had been received from the delegation of the United States requesting further information on the proposed changes (GPA/W/133). His authorities would respond to the questions by the United States in the near future.

8. As regards the modifications proposed to Japan's Annex 3 of Appendix I, notified in document GPA/W/91, the representative of Japan said that bilateral consultations had been held with the delegations of the United States, the European Community and Canada in early May. The representative of the United States said that, on the basis of the information that Japan had provided in the recent consultations and some additional information that the delegation of Japan would provide, the United States hoped to reach a conclusion of this matter. The representative of the European Community said that the bilateral discussions held with Japan had given his authorities a

¹ In a communication, dated 16 June 2001, the United States indicated that it has withdrawn its objection (GPA/W/139).

more clear picture of the evolution of the Japanese market and the circumstances in which the relevant entities operated. The European Community would submit a few additional questions to Japan and hoped to resolve the issue soon.

9. The Chairman said that, due to a technical error which had occurred in the preparation of the Loose-leaf System of Appendices circulated in document WT/Let/330, the proposed new entity names by Japan in GPA/W/91 in Appendix I, Annex 3 with respect to NTT had been reflected in the Appendices to the Agreement in the form of a loose-leaf system circulated in document WT/Let/330, dated 1 March 2000. Once these errors had been discovered, document WT/Let/386 had been issued on 19 March 2001 indicating the rectification that should be made to WT/Let/330. Since there had been no objections within thirty days, the corrections had been certified by a Procès-Verbal of Rectification (WT/Let/391).

D. STREAMLINING THE ACCESSIONS PROCESS

10. Referring to the note on the Establishment of an Indicative Time-Frame for Accession Negotiations and Arrangements for Reporting on the Progress of Work, the representative of the European Community said that the revised note circulated in GPA/W/109/Rev.2 would give the right signal to potential candidates for accession, to the external world as well as to the Parties to the Agreement as regards the importance that Parties attached to the accession process.

11. The representative of Canada said that it was important to recognize that time-frames were indicative. With the increasing number of acceding countries, the work on accessions had become a challenge for small delegations. In Canada's view, the time-frames outlined in the note were ambitious. For example, the period of two months provided for the receipt of questions from Parties after the submission of an acceding country's offer in the indicative timetable for negotiation of Appendices was very short for the consideration of all aspects of an offer and necessary internal consultations. Canada remained concerned that, by having such tight timetables, the Committee might be raising expectations that Members would have difficulty achieving.

12. The representative of Switzerland said that the timetables and the reporting procedures in the note would be a useful guide for the accession process. Delegations would recall that the delegation of Iceland had found that its accession process had taken far too long. It was clear that those Parties who were interested in negotiating detailed conditions of accession would need to allocate additional resources to the work in order to ensure the smooth running of the overall process. It would be regrettable if the work on the expansion of membership was slowed down because of the difficulties that Parties themselves might have in following the pace of negotiations. Joined by the representative of the United States, he said that Parties should make every effort to meet the expectations of a number of countries who had shown an interest in joining the Agreement.

13. The representative of the United States said that his delegation appreciated the amount of work that the acceding countries had undertaken notwithstanding the resource issues that they also faced. This showed their commitment to the process. While recognizing that the time-frames were indicative and that, in certain cases, it might not be possible to keep to certain specific deadlines, Parties should ensure that they had the resources available to allow them to respond promptly to the information and offers received from acceding countries.

14. The representative of the European Community said that Parties should be coherent in the message that they delivered regarding their ambitions for the enlargement of the membership of the Agreement. Parties had declared on many occasions that one of the objectives of the negotiations under Article XXIV:7 was to make the Agreement more attractive for potential candidates. It would be contradictory to try to make the Agreement more attractive but take a long time in discussing offers and procurement regimes of the acceding countries. On account of the level of ambition that Parties

had for the enlargement of the Agreement and recognizing the resource problems of applicant countries, it was worthwhile for the Parties to make the effort to try to finalize the accessions within the time-frames. What was meant by an indicative timetable was clear. There might be negotiations where 18 months might not be necessary, whereas in other situations the negotiation of an offer might require more time.

15. In concluding the discussion of this agenda item, the Chairman suggested that the Committee proceed with the accessions process in accordance with the Indicative Time-Frame for Accession Negotiations and Arrangements for Reporting on the Progress of Work in paragraphs 4 to 9 in the note in GPA/W/109/Rev.2. The indicative time-frame would be kept under review and could be revised, if necessary, in light of the experience gained with its application.

16. The Committee so agreed.

E. ACCESSIONS

(i) *Latvia*

17. Reporting on the developments regarding Latvia's accession since the meeting of the Committee held on 29 September 2000, the Chairman said that informal plurilateral consultations had been held between Latvia and interested Parties on 31 January 2001 on the basis of Latvia's written answers to the questions received from the United States (GPA/SPEC/8/Rev.1), Switzerland, (GPA/SPEC/10) and Canada (GPA/SPEC/18/Rev.1) as well as an exchange of oral questions and answers during the consultations.

18. Referring to the developments since the plurilateral meeting of 31 January 2001, the representative of Latvia said that Latvia had submitted a revised offer on 26 April 2001 (GPA/SPEC/5/Rev.1) which had been prepared in the light of the consultations that had been held on the initial offer. Moreover, translated copies of the Law on Construction Work, Supply, Leasing and Services for the Needs of Public Service Undertakings of 4 November 1999 and the Regulations relating to the Procedure of Selection of Tenderers and Application of Methods for Choice of Tenders of 31 October 2000 had been circulated in document GPA/28/Add.1. Information relating to Latvia's public administration reform and the national competition legislation had also been made available to the delegation of the United States. Latvia would soon submit a status report on the steps needed to align its procurement regime with the requirements of the Agreement which would reflect all the recent developments relating to the procurement legislation. Latvia was ready to pursue bilateral discussions with interested delegations with a view to finalizing any outstanding issues.

19. The representatives of the United States, Canada and Switzerland said that their delegations would hold further bilateral consultations with Latvia regarding the remaining outstanding issues, in particular regarding the coverage of the revised offer. The representative of the European Community said that his delegation was in the process of examining the revised offer. The representative of Israel said that his delegation had been concerned about the influence that Latvia's external obligations had on the negotiation of its accession offer and the way in which the results of certain issues relating to the offer had been known in advance of the negotiations. His delegation would continue the bilateral consultations so as to resolve the outstanding issues regarding Latvia's offer.

20. With regard to the question of the conclusion of Latvia's accession process, the representative of the United States said that his delegation hoped that Latvia would be able to accede to the Agreement before the end of the year. The representative of the European Community said that there seemed to be no main reason why Latvia could not complete its accession process before the end of the year. The representative of Switzerland said that Parties should try to complete the clarification of any outstanding issues with Latvia before the next meeting, if necessary by communicating through

fax and e-mail. The representative of Canada said that the indicative time-frame did not preclude the submission of a second revised offer, if necessary.

21. In concluding the discussion on Latvia's accession, the Chairman suggested that Parties should pursue their bilateral consultations in the coming months with a view to completing Latvia's accession process before the end of the year. Depending on the outcome of those bilateral consultations, there might be a need for the submission of a further revised offer by Latvia. Unless advised otherwise by Latvia or any other Party by 15 September 2001, the Secretariat would circulate a draft Decision on the Terms of Accession of Latvia for the consideration of Parties at the next meeting.

(ii) Estonia

22. Reporting on the developments regarding Estonia's accession since the meeting of the Committee held on 29 September 2000, the Chairman said that Estonia's replies to the Checklist of Issues had been circulated on 5 December 2000 (GPA/W/127). Informal plurilateral consultations had been held between Estonia and interested Parties on 31 January 2001 on the basis of Estonia's replies to the questions received from Switzerland (GPA/SPEC/12/Rev.2), Japan (GPA/SPEC/14/Rev.1), the United States (GPA/SPEC/15/Rev.1) and Canada (GPA/SPEC/16/Rev.1) as well as oral questions and answers exchanged during the consultations. A follow-up question received from Japan in April 2001 and Estonia's answers thereto had been circulated in document GPA/SPEC/19/Rev.1.

23. The representative of Estonia said that Estonia's replies to the Checklist of Issues circulated in document GPA/W/127 would be revised in the near future to reflect the provisions of the recently amended Law on Government Procurement which had entered into force on 1 April 2001. During the course of the current week Estonia had had bilateral consultations with Switzerland and the United States. His delegation from the capital was available for further bilateral consultations with any other interested Parties.

24. The representative of Canada said that her delegation was reviewing Estonia's offer and would be contacting Estonia in the near future.

25. On concluding the discussion on Estonia's accession, the Chairman suggested that Parties should pursue their bilateral consultations with Estonia. Should the submission of a revised offer by Estonia prove to be necessary on the basis of these consultations, Estonia should submit such an offer before the next meeting of the Committee.

(iii) Jordan

26. Reporting on developments regarding Jordan's accession since the meeting of 29 September 2000, the Chairman said that Jordan's replies to the Checklist of Issues had been circulated on 6 December 2000 (GPA/W/124). Informal plurilateral consultations had been held between Jordan and interested Parties on 31 January 2001 on the basis of oral replies by Jordan to the written questions received from Switzerland (GPA/SPEC/11), the United States (GPA/SPEC/13) and Canada (GPA/SPEC/17). Jordan's written replies to these questions had been circulated on 8 March 2001 (GPA/SPEC/11/Rev.1, GPA/SPEC/13/Rev.1 and GPA/SPEC/17/Rev.1, respectively). Further questions had been received from the European Community on 3 May 2001 (GPA/SPEC/20).

27. Referring to the domestic work on government procurement that had recently been undertaken by Jordan, the representative of Jordan said that research had been carried out recently to evaluate the impact of Jordan's accession to the Agreement on the different national economic sectors and also to assess the scope of procurement by entities subject to the procurement regime. In

cooperation with the World Bank, the Government of Jordan had prepared a draft procurement legislation which had been intensively debated with interested stakeholders in Jordan including the private sector. The new unified legislation which would incorporate all the disciplines of the Agreement on Government Procurement would contribute to the work on the finalization of Jordan's offer.

28. The representative of the United States said that the intensive work that Jordan had undertaken domestically was a good indication of its commitment to the process of accession to the Agreement. The United States had indicated bilaterally to Jordan that it was ready to consider any specific needs it might have in this respect and to provide, as appropriate, any support that the United States might be able to give to help to facilitate the accession process. He hoped that other Parties would be ready and willing to do the same. The representative of Israel congratulated Jordan on the progress that it had made regarding the process of accession. The representatives of the United States, Canada, the European Community and Switzerland said that they looked forward to the submission of an offer from Jordan as soon as possible so that the negotiation of the offer could proceed in parallel with the on-going examination of the national procurement system.

29. As regards the next steps in Jordan's accession process, the Chairman suggested that Jordan should submit its initial offer as soon as possible. In accordance with the Indicative Time-Frame for Accession Negotiations, within two months of its receipt, Parties should submit their questions to Jordan regarding the offer.

(iv) *Bulgaria*

30. The representative of Bulgaria said that Bulgaria's replies to the Checklist of Issues in document GPA/35 had been circulated on 2 May 2001 (GPA/W/136). In addition, Bulgaria had submitted an English translation of the Law on Government Procurement enacted on 25 June 1999 (GPA/49) as well as of two procurement regulations that had been issued in 2000, namely "Keeping the Public Procurement Register" and "Regulation on Awarding of Public Procurement Contracts below the Thresholds Set Out in the Law". The draft offer was at an advanced stage of preparation and would be submitted shortly.

31. Regarding the next steps in Bulgaria's accession process, the Chairman suggested that delegations should put in writing any questions they might have regarding Bulgaria's procurement regime by 1 July 2001. Bulgaria should reply to any such questions by 1 September 2001.

(v) *Panama*

32. The Chairman recalled that, in response to a suggestion that the Chair had made at the September 2000 meeting regarding the holding of informal plurilateral consultations between Panama and interested Parties in January 2001, the representative of Panama had said that he would ask for instructions from his authorities before giving a definitive answer on this point. Since subsequently the Chair had been informed by the delegation of Panama that, in its view, such consultations might be useful after an evaluation of renewed contacts with interested Parties, no plurilateral consultations had been scheduled in January 2001 regarding Panama's accession.

33. The representative of the United States said that the United States had had a number of contacts with the authorities in Panama both before and since the September 2000 meeting. His delegation considered that, pursuant to these consultations on Panama's offer, it would not be difficult to conclude the consideration of Panama's accession on the basis of a couple more decisions which his delegation hoped would be taken soon by Panama. If there was an indication of movement from Panama over the coming months with respect to the outstanding issues, plurilateral consultations could be held before the next meeting. The representative of Canada said that her delegation had one

remaining issue with Panama. The representative of the European Community said that a resolution of the United States' outstanding issues with Panama would have an important impact on the Community's consultations with Panama given that the substance of the issues was similar.

(vi) *Chinese Taipei*

34. The representative of the United States said that, following the clarification of some outstanding issues in the agreement reached between the two delegations in 1998, the bilateral discussions with Chinese Taipei had been concluded. Chinese Taipei had indicated that its offer would be revised as a result of these consultations.

35. The representative of Canada said that her delegation had had a series of discussions with the delegation of Chinese Taipei and looked forward to receiving a response to the information that Canada had provided. Her delegation looked forward to reaching a rapid solution to a few outstanding issues with respect to the offer.

36. The representative of the European Community said that his delegation had concluded the remaining issues with Chinese Taipei and looked forward to receiving a revised offer.

(vii) *Newly Acceded Countries*

37. The representative of Oman said that, in the Report of the Working Party on Accession of Oman to the WTO, Oman had confirmed that, upon accession to the WTO, it would initiate negotiations for membership in the Agreement on Government Procurement by tabling an entity offer. If the results of the negotiations were satisfactory to the interests of Oman and to the Parties to the Agreement, Oman would complete its negotiations for membership in the Agreement within a year of its accession to the WTO (WT/ACC/OMN/26, paragraph 121). Oman had become a WTO Member on 9 November 2000. As a first step in its accession process, Oman had responded to the Checklist of Issues in document GPA/35 (GPA/W/141). The representative of the United States said that his delegation looked forward to receiving Oman's application for accession. The United States would be prepared to discuss any specific issues that might need to be addressed in order to facilitate Oman's accession to the Agreement.

38. Referring to Slovenia's commitment to accede to the GPA (L/7492), the representative of Slovenia said that the entry into force of the new legislation on public procurement since November 2000 would enable Slovenia to fulfil the main internal legislative requirements relating to its accession to the Agreement. Slovenia was in the process of preparing its responses to the Checklist of Issues in GPA/35 and had also initiated work on its offer. Slovenia would apply for accession in the near future.

39. As regards the other newly acceded countries, the Chairman said that the Protocols of Accession of five countries, namely Albania (WT/ACC/ALB/51), Croatia (WT/ACC/HRV/59), Georgia (WT/ACC/GEO/31), Lithuania (WT/ACC/LTU/52) and Mongolia (WT/ACC/MNG/9), included commitments regarding the Agreement on Government Procurement.

F. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

40. In accordance with the agreed procedures and the schedule for the review of national implementing legislation, the Committee initiated the review of the implementing legislation of Israel (GPA/34) on the basis of the questions put by Korea (Job No. 4434), the United States (Job No. 6051) and Israel's answers thereto (Job No. 5773 and Job No. 2923, respectively), and the questions put by Canada (Job No. 3414).

41. Taking up the implementing legislation of Japan (GPA/37), the Committee carried out the review on the basis of the questions put to Japan by Switzerland; the United States; Hong Kong, China; and Canada (Job Nos. 2244, 2877, 3033 and 3416, respectively).

42. Finally, the Committee initiated the review of the implementing legislation of Liechtenstein (GPA/46) on the basis of the questions from the United States (Job No. 2878) and Liechtenstein's answers thereto (Job No. 4371).

43. In concluding the discussion on the review of Israel, Japan and Liechtenstein, the Committee agreed that it would take up any outstanding points with respect to the legislation of these three Parties at its next meeting. In accordance with the agreed procedures for the review, any further questions should be made available by 1 August 2001 and Israel, Japan and Liechtenstein should respond to these questions by 10 September 2001.

44. Reverting to the on-going review of the legislation of the United States, the representative of Canada said that her delegation had difficulty in understanding the responses received from the United States in October 2000 regarding the two questions that had been put by Canada previously (Job No. 6053). Her delegation would pursue this issue bilaterally.

45. With regard to Singapore and the United States, the Chairman suggested that the Committee consider that the review of these two Parties had been completed, it being understood that the Committee might revert to any matter relating to the legislation of these Parties at any time. The full record of the review of the legislation of Singapore and the United States would be circulated in the GPA/- series of documents.² It was so agreed.

46. With regard to two Parties whose legislation had not yet been initiated, namely the Kingdom of the Netherlands with respect to Aruba and Iceland, the Committee took note of a statement by the representative of the Kingdom of the Netherlands with respect to Aruba that the notification of the implementing legislation of Aruba would be submitted in the near future. In addition, the Committee invited Iceland to notify its implementing legislation by responding to the Checklist of Issues in GPA/1/Add.1.

G. NEGOTIATIONS UNDER ARTICLE XXIV:7

47. Reporting on the informal consultations held on 30 January and 2-3 May 2001 on the Article XXIV:7(b) negotiations, the Chairman said that the informal group had continued its Article-by-Article review of the Agreement on the basis of the note by the Secretariat "Suggested Drafting Changes to the 1994 Agreement". At the 2-3 May meeting there had been detailed discussions on a new submission by the United States containing a comprehensive revision of the Agreement (Job No. 2867). Participants had made it clear that, given its scope, their reactions to the United States' proposal were preliminary. Delegations had been invited to submit their additional comments and questions relating to the draft articles proposed by the United States prior to the next meeting. Moreover, the United States had agreed to submit explanatory notes on its proposed changes to the existing Articles. In addition, the group had a further discussion of the existing proposals by other delegations relating to amendments to the Articles of the Agreement based on the Secretariat note "Suggested Drafting Changes to the 1994 Agreement" (Job No. 2057), in particular, a proposal by Switzerland on Article V (Job No. 1274) and the proposals and suggestions by the European Community (Job No. 443), Japan (Job Nos. 860 and 3289) and the United States (Job No. 3152) on Article XXIV:6(b). As it had appeared that some of the proposals in the side-by-side text might require further clarification and fine-tuning, delegations who had tabled such proposals had been invited to inform the group whether those proposals should be maintained in the draft text or whether

² GPA/52 and GPA/50.

they had the intention of amending them. It had been agreed that any new or amended proposals should be submitted by 30 June 2001. Regarding the future documentation for the article-by-article review of the Agreement, it was agreed that the new proposal by the United States would replace the proposals by this delegation in the document "Suggested Drafting Changes to the Text of the Agreement". Comments relating to replaced United States' proposals could be removed. The proposals by Switzerland and the United States would also be reproduced as attachments to the side-by-side text. The comments on the specific articles in the United States proposal would be incorporated either in the side-by-side text or in the relevant attachment, depending on whether the comments related to substantive or structural elements of the proposals. At its meetings of 30 January and 2-3 May 2001, the group had also considered other aspects of the Article XXIV:7 negotiations – the elimination of discriminatory measures and the expansion of coverage. At the 2-3 May meeting, in addition to a paper that Canada was expected to submit in the near future, delegations had been invited to come forward with papers expressing their views on these elements of the negotiations. A list of papers that had been made available to the group by various delegations as well as the notes by the Secretariat relating to these elements would be circulated to the group. Moreover, the Secretariat would prepare a brief note on the modalities that had been used in the past for negotiating Schedules in the GATT/WTO. Finally, the group would resume informal consultations in the autumn at which time delegations would have a further exchange of views, seek to take stock of the work on the review of the text over the past three years, and try to develop a plan for carrying forward work on all elements of the review.

H. DATE OF THE NEXT MEETING

48. The Committee agreed to hold its next meeting on 2 October 2001.

WORLD TRADE ORGANIZATION

RESTRICTED

GPA/M/14
3 January 2001

(01-0006)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 29 SEPTEMBER 2000

Chairman: Mr Dick Mak (Hong Kong, China)

1. The following agenda was adopted:
 - A. Applications for Observer Status
 - B. Modifications to the Appendices to the Agreement
 - C. Streamlining the Accessions Process
 - D. Accessions:
 - (i) *Iceland*
 - (ii) *Latvia*
 - (iii) *Panama*
 - (iv) *Estonia*
 - (v) *Kyrgyz Republic*
 - (vi) *Jordan*
 - (vii) *Bulgaria*
 - (viii) *Chinese Taipei*
 - (ix) *Newly Acceded Countries*
 - E. Review of National Implementing Legislation
 - F. Negotiations under Article XXIV:7
 - G. Other Business
 - H. Annual Report for 2000 to the General Council
 - I. Date of the Next Meeting

A. APPLICATIONS FOR OBSERVER STATUS

2. The Committee agreed to grant observer status to the Governments of the Czech Republic, Moldova and the Slovak Republic, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from those countries (GPA/W/115, W/120 and W/116, respectively).

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Notifications*

3. The Chairman said that, since the March 2000 meeting, Japan and Hong Kong, China had proposed modifications to their respective Appendices I (GPA/W/115 and W/116). These modifications had entered into force on 22 August 2000 (WT/Let/354) and 26 August 2000 (WT/Let/355), respectively.

4. Regarding the modifications proposed by Switzerland to Annex 1 of Appendix I, notified in documents GPA/W/106 and Corr.1 of 16 March 2000, the representative of Switzerland said that, in response to a request for clarification received from the delegation of the United States (GPA/W/111), his delegation had provided a note identifying the differences between the proposed new Annex 1 and the existing Annex 1 of Switzerland and giving the reasons for the proposed modifications (GPA/W/114). The names of various Ministries and units in Annex 1 had been altered because of certain constitutional changes. In addition, "Services du Parlement", being no longer a part of the central government, had been deleted. He confirmed that the units and entities that were listed under each of the Ministries in the modified Annex 1 continued to be the entities that were referred to in the heading of the earlier Annex 1 relating to the coverage at the Federal Government level in Switzerland. The representative of the United States said that, on the basis of the explanations that had been provided by the delegation of Switzerland and the confirmation regarding the coverage of entities in Annex 1, his delegation had no objection to the proposed modifications. The Committee agreed that the modifications by Switzerland would enter into force on 29 September 2000 (WT/Let/356).

5. Reverting to the modification proposed by Japan to its Annex 3 of Appendix I, notified in document GPA/W/91, the representative of Japan said that, since October 1999, consultations had been held with the United States, the European Community and Canada on the basis of the questions put to Japan by these delegations (GPA/W/97, W/99, W/100 and W/100/Add.1, respectively) and Japan's responses thereto (GPA/W/104 and Add.1, GPA/W/107 and 108, respectively). His delegation regretted that, in spite of these efforts, those Parties had not been able to withdraw their objections regarding the proposed modifications. As Japan had explained before, the NTT Communications Corporation was a private company that had been established in accordance with the Japanese Commercial Law and was not regulated by any special law. Therefore, according to Japan, the Government no longer had control or influence over the company and the operation of the Corporation was subject to the conditions of effective competition. His delegation considered that, as the present case had shown, the lack of adequate guidance in Article XXIV:6(b) concerning the withdrawal of an entity from Appendix I might lead to different interpretations of privatization or effective competition. He recalled that Japan had made a suggestion attempting to clarify the notion of effective elimination of government control or influence in order to avoid possible disputes over the situation of entities that were considered to be free of government control or influence (Job No. 860).

6. The Committee took note of the statements made and agreed to revert to this matter at its next meeting.

C. STREAMLINING THE ACCESSIONS PROCESS

7. The Chairman said that the Checklist of Issues for Provision of Information by Applicant Governments Relating to Accession to the Agreement had been revised in light of the comments made by delegations during and after the March meeting. It had subsequently been adopted by the Committee in accordance with the arrangements made at that meeting (GPA/35). The representatives of the United States, the European Community and Hong Kong, China said that the Checklist would

be a useful tool for improving the efficiency of the accession process. They encouraged all acceding countries to provide their responses to the Checklist as soon as possible.

8. As regards the revised note on the Establishment of an Indicative Time-frame for Accession Negotiations and of Arrangements for Reporting on the Progress of Work (GPA/W/109/Rev.1), the representative of the European Community said that his delegation could support the thrust of the procedures suggested in the note. Commenting on the specific elements of the note, the representative of the United States said that the indicative time-frame should allow for the past practice of the submission of initial offers by an acceding country at the same time as its application for accession in order to avoid the lapse of a period of six months between the two initial steps in the accession process. The initiation of the Parties' review of an applicant's offer as early as possible would contribute to the acceleration of the subsequent steps for the evaluation of the offer. The representative of Switzerland, joined by the representatives of Israel and the European Community, said that a period of two years' wait for the completion of every accession process would send the wrong message to acceding countries about the efficiency of the procedures and would not be a good incentive for joining the Agreement. The representatives of the European Community and the United States said that any agreed indicative time-frames should be treated as maxima and should recognize that certain countries might require a shorter time for the completion of their accession procedures. Also, in some cases, more than one informal plurilateral consultation might be necessary. However, Parties should not rely only on plurilateral consultations for exchange of information and the bilateral process should be pursued in parallel. The representative of the United States said that Parties to the Agreement should also be encouraged to accelerate the procedures by responding to initial offers and holding bilateral consultations with acceding countries as rapidly as possible. The representative of Panama said that the dynamics involved in bilateral and plurilateral consultations were different. Setting some parameters might be useful for the conduct of plurilateral consultations. The representative of the United States said that, while a rigid approach to consultations was not warranted, an exchange of written questions and answers between the acceding country and Parties, in advance of the consultations, might contribute to the predictability of the discussions on matters of horizontal interest.

9. The representatives of the United States and the European Community said that consultations on procurement regimes and Appendices were independent of each other and therefore each process should have a separate time-frame.

10. The representative of Switzerland said that, in his view, the designation of a facilitator to each acceding country might be one way of running the accession process more smoothly. The representative of Latvia said that a neutral facilitator might be helpful in the streamlining of the fragmented bilateral work. The representative of the European Community said that the role of a facilitator would not need to be formalized. Most delegations already played some kind of facilitator role on an informal basis in finding solutions to any problems encountered by the acceding countries. The representative of the United States said that a country representative's involvement in negotiations with the acceding country might be prejudicial to his role as a facilitator.

11. The representative of Bulgaria said that the procedures might envisage the examination of the applicable legislation before the application for accession and the submission of the initial offer. The representative of the United States said that, contrary to the presumption by some countries that had undertaken commitments to join the Agreement, it was not necessary to adopt new legislation and to complete the internal legislative work before they initiated the accession process. Sequencing the process in that order might lead to the adoption of legislation that might not be entirely consistent with the requirements of the Agreement. It might be more desirable to have the accession process in parallel with the domestic process of the preparation of necessary legislation.

12. The Committee took note of the statements made and agreed that the Secretariat would revise the note on the indicative time-frame for accession negotiations in light of the comments made at the present meeting.

D. ACCESSIONS

(i) *Iceland*

13. The representatives of the United States, Canada and Israel said that the bilateral consultations that had been held with Iceland on the basis of the offer in document GPA/W/73/Rev.2 had been concluded. Joined by the representatives of the European Community, Switzerland and Singapore, they welcomed Iceland's accession to the Agreement.

14. The Committee adopted a Decision providing for the accession of Iceland to the Agreement on the basis of the terms attached to that Decision (GPA/43). The representative of Iceland expressed the appreciation of his authorities for the Committee's Decision which had been achieved pursuant to the bilateral consultations that Iceland had held with the Parties to the Agreement over the past two years.

(ii) *Latvia*

15. The representative of Latvia said that her delegation had been engaged in bilateral discussions with the delegations of the United States, the European Community, Switzerland and Israel since the submission of the initial offer in June 1999 (GPA/SPEC/5). Although slow at the start, the accession negotiations had now entered a decisive phase. Since moving forward through bilateral consultations only had proved difficult, it might be desirable to consolidate the existing fragmented bilateral work through a plurilateral process. Moreover, the collective effort of interested delegations was the only way to proceed with the work on substantive issues, for instance the issue of how to address the changes in the structure of State institutions in Latvia and in transitional economies in general; systemic issues stemming from the reciprocity provisions in the Agreement; and certain technical issues, for instance the provision of statistical information and any legislative changes that might be required for accession.

16. Joined by the representatives of the European Community, Switzerland and Israel, the representative of the United States said that it would be more efficient for acceding countries not to have to repeat the same points with every single delegation. He said that significant progress had been made in the bilateral consultations with Latvia, but a number of issues remained outstanding. It would be useful to arrange informal plurilateral consultations between interested Parties and Latvia to discuss certain horizontal issues that had been addressed in bilateral consultations. Some issues would continue to be raised separately in bilateral consultations.

17. On concluding the discussion on Latvia's accession, the Committee agreed that informal plurilateral consultations would be held between Latvia and interested Parties in January 2001, back to back with the informal meeting on Article XXIV:7 negotiations. These consultations would be prepared in accordance with the following arrangements: (i) any Parties wishing to put questions to Latvia regarding the applicable legislation and procedures as well as Latvia's offer should provide such questions, in writing, by 30 October; (ii) Latvia should provide written answers to any such questions by 21 December; (iii) unless advised otherwise by Latvia or the Party putting the questions, any questions and answers should be circulated to all Parties in advance of the plurilateral consultations.

(iii) *Panama*

18. The representative of the United States said that his delegation had met a number of times with the delegation of Panama in their respective capitals. His delegation was disappointed with the lack of progress made in these consultations and with the substance of the responses received from Panama in respect of Panama's position on PCA (the Panama Canal Authority). He encouraged Panama to respond to various issues raised by the Parties concerning the coverage of this entity in Panama's offer.

19. The representative of Panama said that Panama had bilateral meetings with the United States in March and September 2000. The coverage of PCA had been the main topic of all the recent contacts with the delegation of the United States. While his delegation had made every effort to respond to their concerns that had been repeatedly expressed, the United States delegation might not have been satisfied with the responses received to its repeated questions because of the difference of opinion between the two delegations on this issue. In recognition of the importance attached to this issue by the Parties, the Vice-Ministry of Commerce in charge of foreign trade negotiations had undertaken a series of consultations with PCA at the highest level as well as with other relevant bodies. However, at this point in time, Panama held to its position that it would not be possible to include PCA in its offer. By way of explanation of the substance of the problem, he said that PCA had been established by a constitutional provision in December 1993 to ensure that the transfer of administration and operation of the Canal would proceed in a smooth, efficient, profitable and secure manner. This body had been accorded administrative independence in order to enable it to carry out the task of maintaining the Canal open to uninterrupted passage by ships of all countries without any discrimination and of guaranteeing the operational efficiency of the Canal in the best interest of the users. The Government of Panama and the Panamanian people had felt these measures were necessary to ensure that there would be no political interference in the work done by the Canal authorities as provided in the Constitution and international treaties as well as in other relevant legislation. Subjecting the Canal Authority to the rules of the Agreement would be a violation of the autonomous nature of this body and a limitation to its freedom of taking purchasing decisions. He added that the procedures administered by the PCA were the same as those that had been previously used by the United States. PCA authorities would most likely hold consultations with interested Parties on any changes to these procedures. Once this obstacle of the PCA had been overcome, he believed that Panama and Parties could focus on other less difficult issues.

20. The representative of the United States said that the coverage of a major procuring entity such as PCA was important for maintaining the balance of commitments under the Agreement. In another context, Panama had undertaken broad commitments on ensuring transparency and non-discrimination in government procurement. It would therefore appear odd not to include PCA within the GPA commitments. The procedures of PCA, for the most part, appeared to be consistent with the requirements of the Agreement. If that were the case, presumably no new requirements would be imposed on PCA. His delegation wondered how its coverage under the Agreement would be taken to imply political interference with the PCA. Rather, it would help to demonstrate the independence and objectiveness of the procurement process of PCA and to reinforce the message that the Government of Panama had sought to convey in this respect. His authorities would continue the consultations with the Panamanian authorities with a view to finding a way to resolve this matter of high importance to them.

21. The representative of the European Community said that, for the United States as well as for other Parties, the coverage of PCA was a major obstacle to progress in Panama's accession to the Agreement. His delegation considered that, in principle, there should not be any problems of incompatibility between the Agreement and the rules that applied to procurement for the Panama Canal. This entity had been included in Appendix I of the United States before its transfer to Panama. The constitutional difficulties that had been referred to by the representative of Panama should be addressed in a way satisfactory to all Parties.

22. In concluding the discussion on the accession of Panama, the Chairman suggested that informal plurilateral consultations could be held between Panama and interested Parties in late January 2001. The representative of Panama said that, while his delegation would like to keep open the possibility of holding informal consultations, he would have to ask instructions from his authorities before giving a definitive answer on this point.

(iv) *Estonia*

23. The representative of Estonia said that Estonia had applied for accession on 6 September 2000 (GPA/41). Estonia's initial offer was submitted on the same date (GPA/SPEC/9). Estonia had held preliminary bilateral consultations with the delegations of the European Community and the United States. The representatives of the European Community, Canada, Switzerland and the United States welcomed the application for accession by Estonia. The representative of the United States said that his delegation would provide written questions to Estonia in the near future.

24. Regarding the next steps on Estonia's accession, the Chairman suggested that informal plurilateral consultations could be held between Estonia and interested Parties in late January 2001, provided that Estonia made available its answers to the Checklist in GPA/35 well in advance of the January consultations.

(v) *Kyrgyz Republic*

25. The representative of the United States recalled that his delegation had put questions to the Kyrgyz Republic (GPA/SPEC/7) regarding its draft offer of 11 May 1999 (GPA/SPEC/4). Joined by the representative of the European Community, he said that the initial offer of the Kyrgyz Republic would require further work and encouraged the delegation of the Kyrgyz Republic to make a revised offer as soon as possible.

26. Regarding the next steps on the accession of the Kyrgyz Republic, the Committee agreed to invite the Kyrgyz Republic to provide responses to the Checklist as soon as possible.

(vi) *Jordan*

27. The representative of Jordan said that Jordan had applied for accession on 12 July 2000 (GPA/38). As part of an information-gathering exercise, his delegation had established informal contacts with the delegations of several Parties. With a view to creating public awareness on Jordan's accession, two workshops had been held in Amman on 2 and 3 June 2000 for public and private sector participants. These workshops had been organized in cooperation with the WTO Secretariat and with the assistance of USAID in Jordan. Work was currently under way for the collection of information on the Jordanian procurement regime and government procurement statistics and the responses to the Checklist were expected to be submitted by the end of October. The representatives of Canada, the European Community, Israel, Switzerland and the United States welcomed the application for accession of Jordan. In response to a question by the representative of the European Community regarding the time-frame for the submission of its initial offer, the representative of Jordan said that the internal consultations for the preparation an entity offer had been initiated but the consultations with the relevant entities were still at a preliminary stage.

28. On the matter of technical cooperation, the representative of Jordan said that his country would be seeking assistance in areas such as the upgrading of human skills for the implementation, the use of electronic procurement methods and the sharing of practical experiences of other countries. The representative of the United States said that his country had had a bilateral exchange of views with Jordan on technical assistance and capacity building in the area of government procurement. The Chairman invited Jordan to communicate to Parties, through the Secretariat, its specific needs for technical assistance relating to accession to the Agreement and its future implementation. A suitable

programme would then be formulated by the Secretariat to address Jordan's needs and to find suitable sources.

29. Regarding the next steps on Jordan's accession, the Chairman suggested that informal plurilateral consultations could be held between Jordan and interested Parties in late January 2001, provided that Jordan made available its answers to the Checklist in GPA/35 well in advance of the January consultations.

(vii) Bulgaria

30. The representative of Bulgaria said Bulgaria had applied for accession on 27 September 2000 pursuant to a decision of the Bulgarian Council of Ministers of 21 September 2000 (GPA/42). Bulgaria would submit information on its legislation and the responses to the Checklist shortly. Its offer would be submitted subsequently.

31. The representative of the United States, joined by the representative of the European Community, welcomed Bulgaria's application for accession. His delegation had been disappointed with the length of time that Bulgaria had taken before it applied for accession pursuant to its WTO commitments in this respect. He invited Bulgaria to make every effort to submit an offer before the informal plurilateral consultations in late January.

32. Regarding the next steps on Bulgaria's accession, the Committee agreed Bulgaria should provide its responses to the Checklist in document GPA/35 and submit an initial offer as soon as possible.

(viii) Chinese Taipei

33. The representative of Chinese Taipei said that bilateral consultations had been held with Canada and the European Community. Joined by the representative of Korea, he said that consultations with Korea had been concluded. The representatives of Japan, the European Community and Canada said that their delegations were in the process of considering the responses received from Chinese Taipei. The representative of the United States said that the delegation of Chinese Taipei had made efforts to clarify certain issues regarding coverage as well as procedural commitments relating to the Agreement. The representative of Switzerland said that Switzerland had received information about the structure of the Government of Chinese Taipei. His delegation was considering the whole package offered and hoped to be able to move forward soon on this matter. The Committee took note of the statements made.

(ix) Newly Acceded Countries

34. The Chairman recalled that the respective Protocols of Accession of four newly acceded countries, namely Albania (WT/ACC/ALB/51), Georgia (WT/ACC/GEO/31), Mongolia (WT/ACC/MNG/9) and Slovenia (L/7492) included commitments regarding the Agreement on Government Procurement.

E. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

35. In accordance with the agreed procedures and the schedule for the review of national implementing legislation, the Committee initiated the review of the legislation of Singapore (GPA/39 and Add.1) on the basis of the written questions put by the United States (Job No. 6052). Parties were invited to submit any further questions that they wished to put to Singapore and Israel by 15 November 2000. The delegation of Singapore would provide written responses to these questions by 15 January 2001.

36. Regarding the review of national implementing legislation of Israel (GPA/34), the Chairman said that the questions put by Korea to Israel were circulated as Job No. 4434 and Israel's answers thereto as Job No. 5773. The United States questions to Israel had been circulated as Job No 6051. Upon a request by the representative of Israel, the Committee agreed to defer the review of the national implementing legislation of Israel until the next meeting.

37. The Committee reverted to the on-going review of the national legislation of Canada; Hong Kong, China; Korea; Norway; and the United States. Written replies from Hong Kong, China to questions put by Canada (Job No. 1458) and the United States (Job No. 3825) were circulated, respectively, as Job No. 4437 and Job No. 6050. With respect to Korea, its response to a follow-up question from Canada was circulated as Job No. 4248. As for Norway, questions from Canada and the United States were circulated, respectively, as Job Nos. 4527 and 5689. Finally, the responses of the United States to follow-up questions from Canada were circulated as Job No. 6053. The Chairman suggested that the Committee consider that the review of the legislation of Canada; Hong Kong, China; Korea; and Norway had been completed, it being understood that the Committee might revert to any matter relating to the legislation of these Parties at any time. The full record of the review of the legislation of Canada; Hong Kong, China; Korea; and Norway would be circulated as addenda to documents GPA/13, GPA/27, GPA/12/Rev.1 and GPA/10, respectively. It was so agreed.

38. The Committee also agreed that, at its next meeting, it would take up any outstanding points with respect to the legislation of Singapore and the United States. It would also initiate the review of the national implementing legislation of Israel (GPA/34), Japan (GPA/37), Liechtenstein and the Kingdom of the Netherlands with respect to Aruba.¹ In accordance with the agreed procedure for the review, Parties would be invited to submit their written questions to these delegations by 15 December 2000 and copies would be made available to the Secretariat which would circulate them to other Parties.² Israel, Japan and Liechtenstein would provide written responses to these questions by 15 February 2001.

39. The representative of the European Community said that the Community had initiated a review of its internal legislation on government procurement, the objective of which was the simplification of the existing Directives. For instance the separate Directives for goods, services and works would be consolidated in a single Directive. The Committee would be notified of the outcome of this work.

F. NEGOTIATIONS UNDER ARTICLE XXIV:7

40. Reporting on the informal consultations held on 28 September 2000 on Article XXIV:7(b) negotiations, the Chairman said that Parties had taken up the Article-by-Article review relating to the basic principles of the Agreement (Articles III, IV, XVI, XVII:1, XIX:1), technical specifications (Article VI), bid review (Articles XVIII:2 and XX) and gave further consideration to Articles VII to XV and XVIII, paragraphs 1, 3 and 4. While specific comments and suggestions had been made on many of these Articles, on the basis of the Secretariat note, "Suggested Drafting Changes to the 1994 Agreement" (Job No. 5749), the new proposals that had been submitted by the United States on Articles VIII and XX and by the European Community on Article VI had been the subject of particularly extensive discussions. In addition, the group had had a further exchange of views on the basis of the proposals put forward earlier on Articles VII-XV and XVIII, including those presented by the United States at the June meeting (GPA/W/112 and GPA/W/113), taking into account the written questions of other Parties and the United States answers relating to these proposals (Job No. 5595 and Job No. 4954/Add.1). The group had also considered the other aspects of the Article XXIV:7 negotiations – the elimination of discriminatory measures and the expansion of coverage. It had noted that, at its next meeting, when it would discuss issues of coverage and scope, it would have a special

¹Responses to GPA/1/Add.1 not yet submitted by Aruba and Liechtenstein.

² Questions from Korea to Israel were circulated as Job No. 4434.

focus on these issues. As agreed at its June 2000 meeting, the group would consider at that time issues of scope and coverage (Articles I, II and Annexes); exceptions (Articles XXIII and V); institutional provisions (Articles XIX:2, XIX:5, XXI, XII, XXIV, XVII:2); and statistical reporting (Article XIX:5). Delegations intending to make proposals on these Articles had been urged to make every effort to submit them by 5 January 2001 so as to facilitate their discussion at the group's next meeting. With regard to statistical reporting, the Secretariat, as agreed at the March 2000 meeting, would circulate a paper setting out the main points of divergence. The group would also revert to the Articles that it had already considered, giving particular attention to those proposals which had been presented only shortly before the present meeting as well as earlier proposals in regard to which delegations had indicated that more study was necessary. It had been noted that the United States delegation intended to submit additional information regarding the concept of denial of benefits. The next informal meeting on Article XXIV:7 consultations would be held in late January 2001.

G. OTHER BUSINESS

41. The representative of the United States said that his delegation continued to have concerns about Canada's failure to resolve the issue of its sub-central coverage. Canada had not pursued a commitment that it had undertaken during the negotiation of the Agreement in 1994 in this respect. His delegation had raised this matter bilaterally with the delegation of Canada in different venues. Some major States in the United States that offered non-discriminatory access to Canadian suppliers to their State procurement markets unilaterally were interested in making progress on this issue as they were concerned that their suppliers were not receiving similar treatment in Canada. The representative of the European Community, sharing the concerns expressed by the United States, said that the Community would reconsider its position regarding this issue. The conditions that had been advanced by Canada to justify its position did not apply to the situation in the European Community. The representative of Switzerland said that his delegation looked forward to efforts by Canada to adhere to the commitments that it had made in the negotiations. The representative of Canada said that her delegation took note of the concerns expressed by Parties but the position that Canada maintained on this matter since the entry into force of the Agreement had not changed.

H. ANNUAL REPORT FOR 2000 TO THE GENERAL COUNCIL

42. The Committee agreed to the arrangements for the adoption of its Annual Report for 2000 to the General Council on the basis of a draft prepared by the Secretariat. The report was subsequently adopted and circulated as document GPA/44.

I. DATE OF THE NEXT MEETING

43. The Committee agreed to hold its next meeting in March 2001.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 8 MARCH 2000

Chairman: Mr Dick Mak (Hong Kong, China)

1. The following agenda was adopted:
 - A. Election of the Chairman for 2000
 - B. Application for observer status
 - C. Modifications to the Appendices to the Agreement
 - (i) *Notifications*
 - (ii) *Loose-leaf system of Appendices*
 - D. Least Developed Countries
 - E. Accessions:
 - (i) *Kyrgyz Republic*
 - (ii) *Latvia*
 - (iii) *Iceland*
 - (iv) *Chinese Taipei*
 - (v) *Panama*
 - F. Newly acceded WTO Members
 - (i) *Bulgaria*
 - (ii) *Estonia*
 - (iii) *Slovenia*
 - G. Streamlining the Accessions Process
 - H. Review of National Implementing Legislation
 - I. Negotiations under Article XXIV:7
 - J. Date of the Next Meeting
- A. ELECTION OF THE CHAIRMAN FOR 2000
2. The Committee elected Mr. Dick Mak (Hong Kong, China) as its Chairman for 2000.
3. In expressing appreciation for the Committee's confidence in him, the Chairman said that he was honoured to accept his election to the chairmanship of the Committee but wished to inform the

Parties that he could only do so on the understanding that he might have to step down in the autumn when he expected to be posted to Hong Kong, China.

B. APPLICATION FOR OBSERVER STATUS

4. The Committee agreed to grant observer status to the Government of Jordan, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/103).

C. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) *Notifications*

5. The Chairman said that, since the October 1999 meeting, Hong Kong, China had proposed modifications to its Appendix I (GPA/W/102 and 105). These modifications had entered into force on 4 February 2000 (WT/Let/328) and 17 February 2000 (WT/Let/332), respectively.

6. Regarding the proposed modification by Japan to its Appendix I, notified in document GPA/W/91, the Chairman said that the delegations of the United States, the European Community and Canada had each communicated their objection to the modifications taking effect (GPA/W/95, 96 and 97, respectively). The questions put to Japan by these delegations regarding this modification (GPA/W/97, 99 and GPA/W/100 and Add.1, respectively) and Japan's responses thereto (GPA/W/104 and Add.1, GPA/W/107 and 108, respectively) had been circulated to all Parties.

7. The representative of Japan said that his delegation had held consultations with the delegations of the United States, the European Community and Canada regarding this matter.

8. The representative of the United States said that his delegation hoped to conclude the consultations on this matter once the evaluation of the answers received from Japan had been completed.

9. The Committee took note of the statements made and agreed to revert to this matter at its next meeting.

(ii) *Loose-leaf system of Appendices*

10. The Chairman said that the Loose-leaf System of Appendices had been certified on 1 March 2000 and circulated to all WTO Members (WT/Let/330). In addition, the Secretariat had circulated a note describing the procedures for future changes to the loose-leaf system (GPA/W/110).

D. LEAST DEVELOPED COUNTRIES

11. The Chairman said that, pursuant to a request by the Committee on 8 October 1999, the Secretariat had circulated a note containing a draft declaration on the treatment of least developed countries. The declaration had not been adopted as some delegations had indicated that they needed more time to consider it. In the light of the larger initiative regarding least developed countries under consideration in the context of the General Council, he suggested that the Committee could come back to this matter in the light of developments and at the request of any delegation. The Committee so agreed.

E. ACCESSIONS

(i) *Kyrgyz Republic*

12. The representative of the Kyrgyz Republic said that discussions had been held with some Parties regarding the draft offer of 11 May 1999 (GPA/SPEC/4). His delegation would provide further information relating to its offer and would also respond to questions put by the United States (GPA/SPEC/7).

(ii) *Latvia*

13. The representative of Latvia said that her delegation had received comments from two Parties since the submission of the initial offer in June 1999 (GPA/SPEC/5). Her delegation would appreciate receiving comments from other interested delegations as soon as possible.

14. The representative of the United States said that Parties' delay in responding to the offer from Latvia was disappointing and showed the need for improving the accession procedures.

15. The representatives of the European Community and Switzerland said that the Latvian offer was a good basis for initiating bilateral consultations.

(iii) *Iceland*

16. The representative of Iceland said that his delegation had held bilateral consultations with the delegation of the United States on the basis of the revised offer submitted on 18 February 2000 (GPA/W/73/Rev.1). Consultations would also be held with the delegations of Canada and Switzerland on the offer. Iceland's answers to the questions put by these delegations had been circulated in document GPA/SPEC/6.

17. The representatives of the United States and Canada said that Iceland's revised offer was a major improvement over the initial offer and that their delegations looked forward to resolving a few outstanding concerns as soon as possible.

(iv) *Chinese Taipei*

18. The representative of Chinese Taipei said that his delegation had held bilateral consultations with Korea in January 2000 and would also hold consultations with Canada in the near future. His delegation hoped that the issues pending with these Parties would be resolved in the near future.

19. The representative of Korea said that his delegation hoped to reach a conclusion on the outstanding issues as soon as possible.

20. The representative of the United States said that Chinese Taipei had recently adopted new domestic legislation. The provision of information on this legislation in a WTO language would be a useful input to the work on the accession of Chinese Taipei.¹

(v) *Panama*

21. The representative of Panama said that some delegations were still considering the responses that his delegation had provided in the context of the bilateral consultations. The bilateral consultations with some other Parties would continue on the basis of Panama's current offer (GPA/SPEC/3/Rev.1).

¹ Circulated subsequently in document GPA/36.

22. The representative of the European Community said that a number of points remained outstanding regarding sub-central level government entities, in particular, regarding the Panama Canal Authority which used to be included in the offer of the United States until it was transferred to Panama. Her delegation felt that the bilateral negotiations had progressed as far as was possible on the basis of the present offer. They expected to receive a revised offer from Panama before resuming the bilateral negotiations.

23. The representative of the United States said that his delegation had had several rounds of consultations with Panama and felt that the submission of a revised offer by Panama would be useful. His delegation looked forward to making progress on a number of issues which it had raised with Panama including the coverage of the offer relating to the Panama Canal Authority.

F. NEWLY ACCEDED WTO MEMBERS

(i) *Bulgaria*

24. The Chairman said that he had written a letter to the delegation of Bulgaria on 24 February 2000, seeking information regarding the steps envisaged by the Bulgarian authorities with a view to initiating the process of accession to the Agreement in accordance with the commitment that Bulgaria had undertaken in the context of its accession to the WTO (WT/ACC/BGR/5, paragraph 79 and Protocol, Part I, paragraph 2).

25. The representative of Bulgaria said that the recent reforms involving the drawing up of new procurement legislation and the restructuring of government administration had affected the preparation of Bulgaria's initial offer. The process of internal consultations had been initiated in early 1998 by the circulation of an initial draft entity list to the Bulgarian government agencies concerned but this process had been interrupted by legislative or governmental changes. In November 1998, a new Law on Government Administration, providing for major restructuring of the government administration, had been passed. In June 1999, a new Law on Government Procurement had been adopted, replacing the Law on Government and Municipal Procurement of 1997. As a result of legislative reforms, the number of institutions and agencies listed as primary users or recipients of budget allocations had been reduced. A major government restructuring had taken place at the end of 1999. Some ministries had been merged, their functions had been changed, readjusted or redistributed and new government agencies had been set up as subsidiary bodies to the ministries. The work on the preparation of the draft offer had been resumed in early 2000. The draft offer would be submitted to the Committee once it had been approved by the Council of Ministers.

26. The representatives of the European Community and the United States said that, while they appreciated the difficulties faced by Bulgaria in preparing a draft entity list, Bulgaria should submit its application for accession together with information on the new law on government procurement so as to initiate the accession process without further delay.

(ii) *Estonia*

27. The Chairman said that the Protocol of Accession of Estonia to the WTO included a commitment that, upon accession to the WTO, Estonia would initiate negotiations for membership in the Agreement on Government Procurement by tabling an entity offer. If the results of the negotiations were satisfactory to the interests of Estonia and the Parties to the Agreement, Estonia would complete negotiations for membership in the Agreement by 31 December 2000 (WT/ACC/EST/28). Estonia became a WTO Member on 13 November 1999.

28. The representative of Estonia said that the preparations for initiating the accession negotiations, including the drafting of an offer, were in their final phase. Moreover, the new

government procurement law was currently being redrafted. Information on the legislation would be provided as soon as it had been passed by the Parliament.

(iii) *Slovenia*

29. The Chairman recalled that the Working Party on the Accession of Slovenia to GATT had taken note of a commitment by the representative of Slovenia that his Government would accede to the Agreement on Government Procurement as soon as national legislation dealing with the subject had been enacted, but not later than three years after the date of accession (L/7492). Slovenia became a Contracting Party to GATT on 30 July 1995. He had written a letter to the delegation of Slovenia seeking information on developments regarding Slovenia's accession to the Agreement.

30. The representative of Slovenia said that he reaffirmed his Government's commitment regarding the accession to the Agreement. His delegation was of the view that, in order to fulfil its commitments under the Agreement, it was necessary to bring the domestic legislation into compliance with the Agreement. A revision of the Procurement Law of 1997 was currently before the Parliament. The adoption of the new law would enable Slovenia to apply the requirements and obligations under the provisions of the Agreement. The Slovenian authorities would begin the preparatory work regarding Slovenia's accession to the Agreement immediately after the adoption of the Law. His authorities envisaged the submission of the relevant information on the procurement regime of Slovenia as well as the draft offer within the next few months.

G. STREAMLINING THE ACCESSIONS PROCESS

31. The Chairman said that, at the request of the Committee, the Secretariat had prepared two notes relating to the streamlining the accessions process, respectively on the establishment of an indicative time-frame for accession negotiations and reporting on the progress of work (GPA/W/109) and on the provision of information relating to accession to the Agreement based on a checklist of issues (Job No. 5761).

32. The representative of Latvia said the establishment of an indicative time-frame for the accession negotiations and reporting on the progress of work would be very helpful in reducing the duration of the accessions process which, as the case of Latvia had shown, could be unnecessarily long. For instance, the indication of a time-frame for the provision of comments on offers might give Parties an impetus to provide their comments more rapidly than had been the case in the past accession negotiations.

33. The representative of the United States, joined by the representatives of Canada and Switzerland, said that the present practice of accessions involved duplication of efforts and waste of time in between meetings. The procedures suggested in the two notes were an excellent starting-point for looking at the question of accession procedures from the standpoint of Parties as well as of acceding countries. They would be an important contribution in terms of both developing and implementing an agreed framework for the accession process. By agreeing on an indicative timetable, Parties would implicitly commit themselves to make an effort to move the process along according to that time-frame.

34. Regarding the overall time-period suggested in the note on an indicative time-frame (GPA/W/109), the representative of the United States, joined by the representatives of Canada, the European Community, Latvia and Switzerland, said that the suggested 15-month period for the overall process was unrealistic. The representative of the European Community, joined by the representatives of Canada and the United States, said that the time-frame would be indicative and would have to be applied with flexibility to individual accessions. Her delegation preferred a period of two years as a general rule with exceptions depending on the complexity of the accession and the size of the procurement market. The representative of Latvia said that the time-frame should take into account

the frequency of the meetings of the Committee, the main opportunity available to delegations of acceding countries to meet and discuss with Parties' experts.

35. The representative of Latvia, joined by the representative of the European Community, said that the proposed time-frame might not be sufficient for the preparation of offers on Annex 2 and 3 entities. Consultations with domestic authorities at sub-central levels, particularly in countries that had federal structures, and gathering information on their activities took time.

36. Regarding the specific points in the suggested indicative timetable, the representative of the United States, supported by the representatives of Canada, the European Community and Switzerland, said that it might be useful to have informal plurilateral consultations on the basis of the responses to the checklist of issues by the acceding country and before the tabling of its offer. The purpose of these consultations would be to share information on the scope of the initial offer, to outline the expectations of the Parties and to hear the views of the acceding country. Plurilateral consultations would also be useful in terms of assessing the needs and identifying any specific actions that should be taken by the acceding country. The representative of the European Community said that it would be useful to the acceding country to meet and discuss with all the Parties at the same time instead of having to go over the same ground individually with each of the interested Parties. The representative of Switzerland said that the holding of plurilateral consultations before the submission of the offer could give the acceding country a sense of what the Parties to the Agreement expected to see in the offer.

37. Regarding the draft checklist of issues for provision of information (Job No. 5761), the representative of the United States said that the list of suggested questions was useful. His delegation would provide its specific comments, for instance as regards the addition of an introductory paragraph on any legal or administrative actions that would need to be taken by the acceding country and any relevant technical cooperation needs.

38. The representative of Canada said that the list of questions should be shorter. The questions should be put in a way which would allow countries to provide some broad open-ended descriptions of their procurement system. While it was important to have a description of a country's actual system in sufficient detail, the focus of the questions in the checklist should be forward-looking and should be aimed at eliciting information on the action plan envisaged by a prospective party regarding the way in which it would make its procurement system consistent with the provisions of the Agreement. Her delegations comments would be provided in writing.

39. The representative of the European Community said that the approach of having a large number of detailed questions in the checklist would help in completing the preparatory work as much as possible by charting out up front the existing situation. It would not be appropriate to formulate the questions in a manner which would require acceding countries to speculate on matters on which they had not yet drawn up legislation. One of the purposes of the plurilateral discussion would be to discuss the changes that would be needed to ensure compliance with regard to the specific provisions of the Agreement.

40. The representative of the United States said that the checklist was a tool for the development of a concrete and effective work plan for the accession process and for implementing the Agreement effectively. It was therefore important for the checklist to have sufficient details and precision to allow an acceding country to understand what was required of it. In the recent accessions, individual Parties had submitted long lists of questions, sometimes repeating the same questions or putting redundant questions. The present proposal would allow an acceding country to look at a consistent set of questions, responses to which all Parties would have access. This would not add any burden to the accession process beyond what already existed and would make the process more systematic.

41. The representative of Hong Kong, China enquired whether the original Parties to the GPA had been asked to provide the detailed information as was required in the proposed checklist.

42. The representative of the European Community said that the process of review of national implementing legislation (GPA/1/Add.1) involved the provision of the same level of information from the Parties to the Agreement. The answers to the checklist would assist acceding countries to also fulfil this requirement after their accession to the Agreement.

43. With regard to technical cooperation relating to accessions, the representatives of the United States and Canada said that any needs of acceding countries and the appropriate action that would be required regarding the effective implementation of the Agreement could be identified during accession negotiations.

44. The Committee took note of the statements made and agreed to revert to the matter at its next meeting. It was also agreed that the Secretariat would revise the note on an indicative time-frame for accession negotiations in light of the comments made at the present meeting. As for the checklist of issues, Parties would have a month to submit any specific comments.² After this, the Secretariat would revise the draft checklist of issues and circulate it to delegations.³ A period would be allowed for comments by Parties and, if no comments were received by the given date, the checklist of issues would be considered as adopted by the Committee.⁴

H. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

45. In accordance with the agreed procedures and the schedule for the review of national implementing legislation, the Committee reviewed the legislation of Hong Kong, China (GPA/27); and Norway (GPA/10) on the basis of the written questions put by Canada to these Parties (Job Nos. 1458 and 1459, respectively). It was agreed that the oral replies of Norway and Hong Kong, China provided at the meeting would be circulated in writing. Parties were invited to submit any further questions that they wished to put to Hong Kong, China and Norway by 1 May 2000.⁵ The delegations of Hong Kong, China and Norway would provide written responses to these questions by 15 July 2000.⁶

46. The Committee also reverted to the on-going review of the national legislation of Canada, Korea and the United States. The written replies from Korea to questions put by Canada (Job No. 5328) were circulated as Job No. 617. It was agreed that Korea and the United States would provide replies to the follow-up questions that had been put to them by Canada (Job Nos. 1456 and 1460, respectively).⁷

47. The Committee agreed that, at its next meeting, it should take up any outstanding points with respect to the legislation of Canada; Hong Kong, China; Korea; Norway; and the United States. It would also initiate the review of the national implementing legislation of Israel (GPA/34) and Singapore.⁸ In accordance with the agreed procedure for the review, Parties would be invited to submit their written questions to these delegations by 1 July 2000 and copies would be made available

² Comments received from the delegations of the United States, the European Community and Canada were circulated as Addenda 1, 2 and 3 to Job No. 5761.

³ Circulated as Job No. 5761/Rev.1.

⁴ Issued as GPA/35.

⁵ Questions from the United States to Hong Kong, China and Norway were circulated as Job Nos. 3825 and 3824, respectively.

⁶ Replies from Hong Kong, China to questions put by Canada were circulated as Job No. 4437.

⁷ The reply from Korea to a follow-up question from Canada was circulated as Job No. 4248.

⁸ Notification of implementing legislation not yet submitted.

to the Secretariat which would circulate them to other Parties.⁹ Israel and Singapore would provide written responses to these questions by 15 August 2000.

I. NEGOTIATIONS UNDER ARTICLE XXIV:7

48. Reporting on the informal consultations held on 7 March 2000 on the Article XXIV:7(b) negotiations, the Chairman said that Parties had taken up the questions of procurement methods, statistical reporting, the Article-by-Article review of the Agreement and elimination of discriminatory measures and expansion of coverage as well as the work programme and time-frame for the completion of these negotiations. As regards the time-frame and work programme that should be established to carry forward the negotiations, the discussion had highlighted, in particular, two points. One was the need for a time-frame to guide the work which recognized that Parties had ambitious expectations of the review and the second was the need for more focus in the work. On the issue of time-frame, there had been a general view that delegations should be guided by a target date of mid-2001 or the Fourth Ministerial if that was held around that time. The point had also been made that intermediate time-frames should be set for the different stages of work, but this would depend on how the work was organized in detail. As regards organizing the work in such a way as to provide greater focus, a number of suggestions were made about the categorization of the issues before Parties. There had been a view that this matter should be discussed further on the basis of specific suggestions from delegations. It had been agreed that, at the next meeting, delegations would focus on Articles VII-XV, together with paragraphs 1, 3 and 4 of Article XVIII. It had also been agreed that the deadline of end May would be set for the submission of written suggestions on both the categorization and the specific provisions selected for focus at the next meeting. At the next informal meeting to be held in June, Parties would also attempt to map out in more detail subsequent work on the basis of the categorization discussion. In doing so, Parties would also have to address the other aspects of work – on the elimination of discriminatory measures and the expansion of coverage.

J. DATE OF THE NEXT MEETING

49. The Committee agreed to hold its next meeting in late September 2000.

⁹ Questions from Korea to Israel were circulated as Job No. 4434.

(00-0369)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 5 OCTOBER 1999

Chairman: Mr Dick Mak (Hong Kong, China)

1. The following agenda was adopted:
 - A. APPLICATIONS FOR OBSERVER STATUS
 - B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT
 - (i) *Notifications*
 - (ii) *Loose-leaf system*
 - C. LEAST DEVELOPED COUNTRIES
 - D. ACCESSIONS:
 - (i) *Kyrgyz Republic*
 - (ii) *Latvia*
 - (iii) *Iceland*
 - (iv) *Chinese Taipei*
 - (v) *Panama*
 - (vi) *Accession procedures*
 - E. NEWLY ACCEDED WTO MEMBERS
 - (i) *Bulgaria*
 - (ii) *Mongolia*
 - (iii) *Slovenia*
 - F. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION
 - G. NEGOTIATIONS UNDER ARTICLE XXIV:7
 - H. 1999 REPORT TO THE GENERAL COUNCIL
 - I. DATE OF THE NEXT MEETING

A. APPLICATIONS FOR OBSERVER STATUS

2. The Committee agreed to grant observer status to the Governments of the Kyrgyz Republic, Croatia and Georgia, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the requests received from these countries (GPA/W/83, 84 and 89, respectively).

B. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

(i) Notifications

3. The Chairman said that, since the Committee's February 1999 meeting, Japan had notified proposed modifications to its Appendix I (GPA/W/88, 91, 94 and 98). The modifications by Japan in GPA/W/88 had entered into force on 8 August 1999 (WT/Let/308). Corrections to this notification, subsequently made by Japan, had been circulated in document GPA/W/93.¹ Regarding the notification by Japan in document GPA/W/91, the Chairman said that the delegations of the United States, the European Community and Canada had communicated their objection to the proposed modifications taking effect upon the expiration of the thirty-day period provided in Article XXIV:6 (GPA/W/95, 96 and 97, respectively).

4. The representative of Japan said the proposed modifications to Annex 3 of Appendix I followed the restructuring of the Nippon Telegraph and Telephone Co. (NTT), with effect from 1 July 1999, which had resulted in the establishment of three companies, namely, the Nippon Telegraph and Telephone East Corporation, the Nippon Telegraph and Telephone West Corporation and the NTT Communications Corporation. The Nippon Telegraph and Telephone Corporation itself had become a holding company. The Nippon Telegraph and Telephone East Corporation and the Nippon Telegraph and Telephone West Corporation would be added to the list of entities in Annex 3 of Appendix I of the Agreement. The NTT Communications Corporation had been established as a private company in accordance with the procedures stipulated in the Japanese commercial law. The NTT Law did not apply to this Corporation, which meant that the Government of Japan had no longer control or influence over it. Japan therefore considered that the NTT Communications Corporation would not need to be included in Annex 3 of Appendix 1 of the GPA. Providing some factual data on the procurement of the NTT Communications Corporation, he said that, in 1997 the total amount of its procurement above threshold was only 0.54 per cent of the whole of the former NTT procurement and 0.02 per cent of the procurement by all the entities listed in Appendix I of Japan, which meant that there was very little, if any, consequence of the change on the mutually agreed coverage provided under the Agreement pursuant to the rectification. Open tendering procedures had applied to all the procurements by the NTT Communications Corporation in that year. The Government of Japan had found that the NTT Communications Corporation had voluntarily continued to conduct its procurements in a transparent and non-discriminatory manner.

5. The representative of the United States said that, while the proposed modifications continued to include two new subdivisions of the NTT Corporation under the coverage of the Agreement, the NTT Communications Corporation was excluded. His delegation would be interested in holding consultations with the delegation of Japan under Article XXIV:6 to determine whether government control or influence over the NTT Communications Corporation had effectively been eliminated. His delegation would also provide questions to Japan regarding the implications of this modification.² The representative of the European Community said that his delegation had concerns regarding the proposed modifications and hoped to receive further information from Japan on the new entities and their future procurement activities. His delegation would also submit questions to the delegation of

¹ Modifications by Japan in GPA/W/94, 98 and 93 subsequently entered into force on 30 October 1999 (WT/Let/325), 3 November 1999 (WT/Let/326) and 29 October 1999 (WT/Let/324), respectively.

² Subsequently circulated in document GPA/W/100.

Japan.³ The representative of Canada said that her delegation's communication circulated in GPA/W/97 contained a set of questions to Japan. Her delegation reserved the right to pursue further questions or consultations in future. The representative of Hong Kong, China, joined by the representative of Switzerland, said that his delegation objected to the proposed modifications taking effect. They would need to seek more information from the delegation of Japan to ascertain whether the modifications proposed were indeed minor in nature. For the sake of transparency, Parties concerned should keep the Committee informed of progress in their consultations.

6. The Committee took note of the statements made and agreed to revert to this matter at its next meeting, subject to a mutually satisfactory solution of the issue between Japan and the Parties concerned before then.

(ii) *Loose-leaf system of Appendices*

7. The Chairman said that the revised version of the loose-leaf system had been circulated to Parties for comments on 8 July 1999 in document GPA/W/35/Rev.1. A comment period of 60 days had been given to delegations in accordance with the procedures agreed to by the Committee. Except for a few comments by Japan of a purely editorial nature, no comments had been received by the Secretariat. Accordingly, the Loose-leaf System of Appendices would be certified and circulated to all Parties as well as placed, in its certified form, on the WTO website. In accordance with the procedures agreed to by the Committee at its meeting of 24 February 1997, Parties proposing to make future rectifications and modifications to their Appendices should notify them to the Committee in the form of relevant replacement or additional pages to be inserted in the loose-leaf system, identifying the proposed changes. As before, these proposed rectifications and modifications would be circulated to Members in the GPA/W/- series. Once they had become effective and had been certified, the new or amended pages would be circulated with a cover note indicating where the insertions and/or deletions were to be made in the Loose-leaf System of Appendices.

C. LEAST DEVELOPED COUNTRIES

8. The Chairman said that, at the previous meeting, the delegation of the European Community had suggested the adoption of a decision on the extension of the benefits of the Agreement to all the least developed WTO Members (GPA/M/11, paragraph 30). The representative of the European Community, supported by the representative of Norway, said that his delegation had made that suggestion because it was important that least developed countries had improved access to open procurement markets based on the provision of Article V:12. The representative of the United States said that his country already extended the benefits under the existing coverage of the Agreement to least developed countries. The representative of Canada said that, while her country extended the benefits of the GPA to least developed countries, any action in this respect should continue to be taken through initiatives by individual Parties. On this latter point, the representative of the European Community said that, the present provisions of Article V:12 which allowed each individual Party to decide whether to extend its benefits to least developed countries should not be put into question. However, if a large majority of Parties were prepared to apply these provisions on their own initiative, a declaration in this respect, notwithstanding its non-binding effect, would give a positive political signal that Parties were willing to share the benefits of the Agreement with least developed countries. The representative of Switzerland said that it might be interesting to obtain statistics on the number of procurement contracts that had been awarded by Parties to suppliers from the least developed countries under the relevant provisions of the Agreement.

³ Subsequently circulated in document GPA/W/99.

9. The Chairman suggested that, as a way of moving forward on this matter, the Secretariat might be requested to draw up a draft declaration on the treatment of least developed countries which would be circulated to Parties for their consideration. The declaration would be considered adopted if no objections were received by the Secretariat within two weeks. It would subsequently be forwarded to the Seattle Ministerial Conference as a contribution from the Committee.

10. The representative of Switzerland said that his delegation would need to hold consultations on this matter at the internal level since, under the Swiss Federal Law, the benefits of the GPA could be extended only on the basis of reciprocity.

11. The Chairman said the draft declaration would attempt to take into account the current practices in order to accommodate different situations existing in Parties.

12. The Committee agreed to proceed as suggested by the Chairman.⁴

D. ACCESSIONS

(i) *Kyrgyz Republic*

13. The Chairman said that an application for accession to the Agreement, together with a draft offer, had been received from the Kyrgyz Republic on 11 May 1999 (GPA/SPEC/4).

(ii) *Latvia*

14. The Chairman said that an application for accession to the Agreement, together with a draft offer, had been received from Latvia on 16 June 1999 (GPA/SPEC/5). Furthermore, Latvia had circulated information on its national legislation and had provided responses to the checklist of issues in GPA/1/Add.1 (GPA/28).

(iii) *Iceland*

15. The Chairman said that an application for accession to the Agreement together with a draft offer, had been received from the delegation of Iceland on 22 June 1998 (GPA/W/73).

16. The representative of Iceland said that his delegation had been engaged in bilateral consultations with the delegations of Canada, Switzerland and the United States on the basis of its initial draft offer. During the first half of 1999 Iceland had received further requests for information regarding its offer. The responses of his delegation and the relevant legislation would be submitted in the near future.⁵

17. The Chairman said that delegations should complete their bilateral consultations with Iceland as soon as possible in order to enable the consideration of a decision on Iceland's terms of accession at the Committee's next meeting.

⁴ A note by the Secretariat containing a draft declaration on the treatment of least developed countries was circulated on 8 October 1999 with a comment period until 19 October 1999. Some delegations indicated that they needed more time to consider the draft.

⁵ Circulated subsequently in document GPA/SPEC/6.

(iv) *Chinese Taipei*

18. The representative of Chinese Taipei said that his delegation had held discussions with the delegations of Canada and Korea regarding some pending issues.

(v) *Panama*

19. The representative of Panama said that his delegation had responded to the outstanding questions from the delegations of Switzerland and the United States. The representative of Canada said that her delegation also had a few outstanding questions.

(vi) *Accession procedures*

20. Recalling the discussion on streamlining the accession procedures, the Chairman said that, at the February meeting, the Committee had heard a statement by the delegation of the European Community expressing its views on the general principles of preparation of offers by acceding countries and had invited the Community to come forward with a note. Furthermore, as agreed at that meeting, the Secretariat had drawn up, for the consideration of the Committee, a draft Checklist of Issues that acceding countries might be invited to use in providing information on the main features of their national legislation and procurement regimes (Job No. 5761, dated 5 October 1999).

21. After a brief discussion, the Chairman suggested that the Secretariat be asked to prepare a note on the establishment of an indicative time-frame for accession negotiations together with a procedure for regular reporting to each Committee meeting on progress in bilateral consultations. At the next meeting, the Committee could revert to the matter of developing a normative framework for accessions on the basis of this note, the draft Checklist of Issues prepared by the Secretariat and the note that the European Community had promised to circulate.

22. The Committee so agreed.

E. NEWLY ACCEDED WTO MEMBERS

(i) *Bulgaria*

23. The representative of Bulgaria said that the new government procurement law, fully in line with the requirements of the GPA, had been approved by the Parliament in June 1999. Moreover, his authorities were in the process of preparing Bulgaria's application for accession to the Agreement in accordance with the commitments undertaken in the Protocol of Accession of Bulgaria to the WTO (WT/ACC/BGR/5, paragraph 80).

(ii) *Mongolia*

24. The Chairman said that in its application for observer status, Mongolia had referred to the need for technical cooperation with regard to its accession to the Agreement (GPA/W/80). As agreed at the last meeting, the Secretariat had been in contact with the delegation of Mongolia in order to explore further the requirements of Mongolia in this respect.

25. Reporting on these consultations, the representative of the Secretariat said that Mongolia was in the process of developing basic legislation with the technical assistance received from the Asian Development Bank in 1999. Building on this, Mongolia would need assistance geared specifically to the work on ensuring the consistency of its laws with the Agreement. Other areas of technical assistance might relate to future negotiations of the terms of its accession, including the drawing up of schedules and the preparation of responses to requests for information from Parties. Another key

component of technical cooperation might be providing training on the administrative and institutional aspects of the Agreement to ensure Mongolia's full participation in the Committee's work. The consultations on the modalities of this technical assistance programme would be pursued with Mongolia and interested Parties.

26. The representative of Switzerland said that the World Bank and Regional Development Banks undertook projects in a number of countries for the development of basic government procurement legislation. In the context of the accession process, countries might still need to do work to ensure the necessary alignment of their existing legislation to the Agreement. The Committee might consider developing a framework programme for technical cooperation which would aim at facilitating the work of acceding countries in this respect.

27. At the suggestion of the Chairman, the Committee agreed that the issue of technical cooperation to acceding countries be taken up at the next meeting.

(iii) Slovenia

28. The Chairman said that the Working Party on the Accession of Slovenia to GATT had taken note of a commitment by the representative of Slovenia that his Government would accede to the Agreement on Government Procurement as soon as national legislation dealing with the subject had been enacted, but not later than three years after the date of accession (L/7492, dated 1 July 1994). Slovenia had become a WTO Member on 30 July 1995. The Procurement Law and relevant regulations had been enacted in 1997. Slovenia had yet to submit an application for accession.

29. After a brief discussion, the Committee agreed that the Chair should write a letter to the delegation of Slovenia seeking information on the steps taken in Slovenia regarding its accession to the Agreement.

F. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

30. In accordance with the agreed procedures and the schedule for the review of national implementing legislation, the Committee reviewed the legislation of Canada (GPA/13) on the basis of the written questions put by Hong Kong, China; the European Community; and Switzerland and the replies by Canada which had been circulated prior to the meeting (Job No. 5728). Parties were invited to submit any further questions that they wished to put to Canada by 15 November 1999.⁶ The delegation of Canada would provide written responses to these questions by 15 February 2000.

31. After reverting briefly to the ongoing review of the national legislation of the European Community, Korea, Switzerland and the United States, the Chairman suggested that the Committee consider that the review of legislation of the European Community and Switzerland had been completed, it being understood that the Committee might revert to any matter relating to the legislation of these two Parties at any time. The full record of the review of the legislation of the European Community and Switzerland would be circulated in documents GPA/32 and GPA/33, respectively.

32. The Committee also agreed that the Committee should take up, at its next meeting, any outstanding points with respect to the legislation of Korea and the United States. At that meeting, it would also initiate the review of the national implementing legislation of Hong Kong, China (GPA/27) and Norway (GPA/10). In accordance with the agreed procedures for the review, Parties would be invited to submit their written questions to these delegations by 23 December 1999 and

⁶ No questions had been submitted as of 27 January 2000.

copies would be made available to the Secretariat which would circulate them to other Parties.⁷ Hong Kong, China and Norway would provide written responses to these questions by 15 February 2000.

G. NEGOTIATIONS UNDER ARTICLE XXIV:⁷

33. Reporting on the informal consultations held in May, June, September and October 1999, the Chairman said that these consultations had been held on the basis of an informal Checklist of Issues (the latest revision of which was circulated as Job No. 5189) and an informal note reflecting the draft texts of proposed modifications to the Articles of the Agreement side-by-side with the text of the Agreement (circulated as Job No. 5713). At the informal consultations on 4 October 1999, Parties had considered the timetable for the completion of the negotiations and the overall work programme that should be envisaged within that time-frame. There was agreement that good progress had been made on improving the text of the Agreement, that the momentum of the work would need to be maintained and that all three elements would need to be covered. Parties would revert to this matter at the next meeting in early 2000. At that time, Parties would also focus on: framework and similar types of contracts, statistical reporting and the Article-by-Article review of the Agreement. In addition, Parties would continue monitoring progress in the elimination of discriminatory measures.

H. 1999 REPORT TO THE GENERAL COUNCIL

34. The Committee adopted its Annual Report for 1999 to the General Council on the basis of a draft prepared by the Secretariat which was amended in the light of the discussion at the meeting. It was subsequently circulated as document GPA/30.

I. DATE OF THE NEXT MEETING

35. The Committee agreed to hold its next meeting on 8 March 2000.

⁷ No questions had been submitted as of 27 January 2000. The questions from the European Community and Hong Kong, China put to Canada were circulated on 6 July 1999 as Job No. 3687 and on 16 June 1999 as Job No. 3423, respectively.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 23 FEBRUARY 1999

Chairperson: Mr Dick Mak (Hong Kong, China)

1. The following agenda was adopted:
 - A. Election of the Chairman for 1999
 - B. Application for observer status
 - C. Modifications to the Appendices to the Agreement
 - D. Accessions:
 - (i) *Iceland*
 - (ii) *Chinese Taipei*
 - (iii) *Panama*
 - (iv) *Accession Procedures*
 - E. Newly acceded WTO Members
 - (i) *Bulgaria*
 - (ii) *Mongolia*
 - (iii) *Kyrgyz Republic*
 - (iv) *Latvia*
 - F. Review of national implementing legislation
 - G. Negotiations under Article XXIV:7
 - H. Other business
 - (i) *Least Developed Countries*
 - (ii) *Korea - Procurement of International Airport Construction Corporation*
 - I. Date of the next meeting.

A. ELECTION OF THE CHAIRMAN FOR 1999

2. The Committee elected Mr. Dick Mak (Hong Kong, China) as its Chairman for 1999.

B. APPLICATION FOR OBSERVER STATUS

3. The Committee agreed to grant observer status to the Government of Mongolia, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/80).

C. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

4. The Chairman said that, since the Committee's October 1998 meeting, Japan (GPA/W/78 and 79) and Singapore (GPA/W/82) had notified proposed modifications to their respective Appendix I. Since no objections had been raised within the prescribed time-period, the modifications by Japan had entered into force, on 13 November and 27 November 1998, respectively (WT/Let/274 and 275).¹

D. ACCESSIONS

(i) *Iceland*

5. The representative of Iceland said that his delegation had engaged in bilateral consultations with the delegations of the United States, Canada and Switzerland regarding its draft offer submitted on 22 June 1998 (GPA/W/73), which would be revised in the light of these consultations. Subject to further requests for consultations from any other delegations, Iceland had the intention of completing its accession procedures before the next meeting of the Committee. The representative of the United States said that his delegation would communicate a few questions to the delegation of Iceland following the bilateral consultations held in December 1998.

(ii) *Chinese Taipei*

6. The representative of Chinese Taipei said that no further bilateral consultations had been held since the previous meeting regarding his delegations's revised offer (GPA/SPEC/1/Rev.1). At the next meeting, his delegation hoped to be able to report on more substantial progress with respect to bilateral consultations with certain Parties.

(iii) *Panama*

7. The representative of the United States said that his delegation had engaged in bilateral consultations with Panama on a range of issues with respect to the revised offer submitted on 10 December 1998 (GPA/SPEC/3/Rev.1). His delegation hoped to make progress regarding its several remaining concerns with a view to concluding Panama's accession process as soon as possible.

8. The representative of the European Community said that the delegation of Panama had been informed of the outstanding points on which Panama would need to make further progress.

9. The representative of Panama said that his authorities were working on the questions that had been received from Parties in the bilateral consultations. His delegation welcomed further comments, suggestions or requests from any other Parties.

¹ Modifications by Singapore subsequently entered into force on 19 March 1999 (WT/Let/297).

(iv) *Accession Procedures*

10. The Chairman said that a WTO Member may accede to the Agreement under Article XXIV:2 on terms to be agreed between that government and the Parties. In accordance with the Decision on Accession adopted by the Committee, consultations on accession were held between the acceding country and Parties on the terms of accession (GPA/1, Annex 2). While holding such consultations was a matter between the acceding country and individual Parties to the Agreement, the Committee could consider the ways in which it could have a rôle in facilitating the overall process of accessions.

11. The representatives of the European Community, the United States, Singapore, Canada and Switzerland said that the procedures for accessions should be streamlined. The representative of the European Community said that the accession process consisted of two parallel tracks. First, the assessment of the consistency of the national legislation and procurement practices of the applicant country with the requirements of the Agreement. Second, the negotiation of market access commitments by agreeing on the lists of entities to be covered in the schedule of the acceding country. The Committee should aim at improving the procedures involved in both tracks. The representatives of the European Community, the United States, Singapore, Canada, Switzerland, Iceland and Latvia said that, in order to accelerate the initial process of information gathering, the Committee should agree on a Checklist of Issues that acceding countries could use in providing information concerning the basic features of their national legislation and procurement regimes. The Checklist of Issues could be similar to the one adopted for notification of national implementing legislation of Parties and could incorporate certain additional elements specific to the accession process (GPA/1/Add.1). The responses of the acceding country to the Checklist of Issues would provide a common basis for the process of exchange of questions and answers between Parties and the acceding country and would help in avoiding duplication in the resources allocated by all in this phase of the accession process.

12. With regard to the negotiations of market access commitments, the representative of the European Community said that the Committee should agree to the establishment of a set of general principles that could guide an applicant country in drawing up its initial offer of entities, notwithstanding that subsequent negotiations would be conducted on a bilateral basis. The extent to which an applicant country would be expected to apply such principles would be determined by its level of development. The European Community applied a general approach to accession negotiations whereby acceding countries were expected to meet certain conditions in preparing their offers. For instance, the threshold values in the offers should be the standard thresholds in the Annexes of the majority of Parties. However, a request for higher thresholds could be considered on a case-by-case basis, provided that it was justified and a clear timetable for its reduction established. Whereas industrialized applicant countries should not provide for offset requirements, developing countries might provide for such requirement, where justified. Depending on the level of development of the acceding country, such requirements should be gradually reduced and, eventually, eliminated. Any derogations from the national treatment and non-discrimination principles, for instance in the form of preferences or set-aside schemes, should be time-limited and their existence should be justified. With regard to individual Annexes, all procurement by central government authorities should be covered in Annex 1, except for direct defence-related procurement. Non-privatized entities in the network sectors such as water, electricity and transport that were not privatized were expected to be covered under Annex 3. The coverage of Annex 4 should extend to procurement in all of the services sectors where the applicant country had made market access commitments under its GATS Schedule. All public works and construction services of CPC Division 51 should be covered in Annex 5. The representative of the European Community said that Parties should take a proactive approach to negotiations with applicant countries by providing each applicant country with an indication of what they would expect to be included in its initial offer.

13. The representative of the United States said that any acceptable package of general principles would need to have certain flexibility built into it. It would also be useful to set out an indicative timetable for the different stages of the accession process, which could be adjusted in accordance with the circumstances of each individual applicant country.

14. The representative of Japan said that, while the suggested improvements to the procedures would be valuable, they would not be adequate to ensure the efficiency of the accession process. In view of the objective of making the Agreement more universal, transparent and easily accessible to countries with different economic systems or philosophies, efforts should be made to resolve the difficulties that acceding countries faced in their negotiations with Parties. The divergence of views among Parties concerning the coverage of Annex 3 entities was one of the main difficulties in the negotiations of entity lists. In terms of Article I of the Agreement, Annex 3 contained all other entities that procured in accordance with the provisions of the Agreement. Without any reference, baseline or benchmark for the inclusion or exclusion of an entity, Parties did not have a common notion of a balanced offer as regard Annex 3 entities. An offer from an acceding country was evaluated on the basis of different standards used by Parties and any perceived significance of the sectors offered. Rather than developing the general principles for the preparation of offers, the Committee might give better guidance to acceding countries by agreeing on the meaning of the term "government procurement". The work relating to this matter in the context of the review of the Agreement currently under way would contribute to the efforts of improving the process of accessions.

15. The representative of the United States said that the relative complexity of the Agreement was not the only reason for the limited membership in the Agreement. Joined by the representative of Canada, he said that the expansion of the participation in the Agreement would also require efforts by acceding countries to improve their procurement systems as well as meeting the basic principles of the Agreement. The representative of Canada said that the matter of the clarification of the meaning of the term government procurement might be addressed more appropriately in the context of the ongoing review of the Agreement under Article XXIV:7.

16. The representative of Singapore, supported by the representative of Japan, said that the Secretariat should prepare a synopsis of the schedules in Annexes 1-3 of Parties which would allow acceding countries to make comparisons between the complex lists of commitments in various Parties' schedules. This would be a useful input for negotiations and would assist the acceding countries in the preparation of their entity offers. The representative of the European Community said that the entity lists in Annexes 1-3 were complicated. However, the non-paper by the Secretariat on discriminatory provisions circulated with footer "gpa38" on 31 October 1997 gave an adequate illustration of the coverage in Annex 3 entities. The representative of the United States said that it would be difficult to make comparisons between the schedules of Parties. For instance, each Party had a different government structure which was reflected in the Annex 1 lists of entities, and the functions of Annex 3 entities varied among Parties. Besides, a comparison of all the various ways in which the existing Parties had previously addressed certain issues in their Schedules would not be useful. Negotiations with the acceding countries were conducted bilaterally and reflected the particular priorities and interests of individual participating countries.

17. In concluding the discussion of this item, the Chairman said that the Secretariat should draw up, for the consideration of the Committee, a draft Checklist of Issues that the acceding countries could use in providing information on the main features of their national legislation and procurement regimes. The delegation of the European Community would be invited to come forward with a note on the general principles of preparation of offers by acceding countries that might be used by the Committee in its future consideration of the matter. The Committee so agreed.

E. NEWLY ACCEDED WTO MEMBERS

(i) *Bulgaria*

18. The representative of Bulgaria said that the preparatory work was being carried out in Bulgaria regarding accession to the Agreement, the preparation of the new law on public procurement and the reform of the state administration.

(ii) *Mongolia*

19. The Chairman said that the communication by Mongolia requesting observer status in the Committee also contained a request for technical assistance (GPA/W/80, paragraph 2). The representative of the European Community, supported by the representative of the United States, said that, with a view to avoiding the duplication of technical cooperation efforts of various Parties and to ensuring the optimum targeting of resources available for this purpose, the Committee should draw up a programme of technical cooperation for the benefit of Mongolia, this being without prejudice to the question of financing.

20. The Chairman said that the Secretariat should be invited to draw up, in consultation with interested delegations, an outline of a technical cooperation programme for Mongolia, identifying the specific areas of cooperation that might be needed in connection with its accession to the Agreement. It was so agreed.

(iii) *Kyrgyz Republic*

21. The Chairman said that the Working Party on the Accession of the Kyrgyz Republic had taken note of a commitment of the Kyrgyz Republic to initiate negotiations for membership in the Government Procurement Agreement upon accession to the WTO by tabling an entity offer at that time, and that, if the results of the negotiations were satisfactory to the Kyrgyz Republic and the signatories of the Agreement, the Kyrgyz Republic would complete negotiations for membership in the Agreement by 31 December 1999 (WT/ACC/KGZ/26 and 29). The Kyrgyz Republic had become a WTO Member on 20 December 1998.²

(iv) *Latvia*

22. The Chairman said that the Working Party on the Accession of Latvia had taken note of a commitment that Latvia would initiate negotiations for membership in the Government Procurement Agreement upon accession to the WTO by tabling an entity offer at that time, and that if the results of the negotiations were satisfactory to Latvia and the signatories of the Agreement, Latvia would complete negotiations for membership in the Agreement by 31 December 2000 (WT/ACC/LVA/32). Latvia had become a WTO Member on 10 February 1999 and had been an observer in the Committee since 4 June 1996.

23. The representative of Latvia said that Latvia would submit an initial offer in the near future.³

² Kyrgyz Republic subsequently applied for observer status on 26 February 1999 (GPA/W/83) and applied for accession and submitted a draft offer on 11 May 1999 (GPA/SPEC/4).

³ Latvia applied for accession to the Agreement and submitted a draft offer on 16 June 1999 (GPA/SPEC/5).

F. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

24. The Chairman said that the Committee was to take up any outstanding points relating to the review of the national implementing legislation of the European Community and Korea that had been held at the October 1998 meeting.

25. The representative of Korea said that his delegation would communicate its written responses to the questions put by the delegation of Canada as soon as possible (Job No. 5328).

26. The Chairman said that, in accordance with the agreed procedures and the schedule for the review of national implementing legislation, the Committee was to take up the legislation of Switzerland (GPA/15) and the United States (GPA/23). The written questions put by Canada, the European Community and the United States to Switzerland (with Job Nos. 763, 117 and 1040, respectively on 10 February, 13 January and 24 February 1999) and the written replies by Switzerland to the questions put by the European Community (with Job No. 858 on 18 February 1999) had been circulated prior to the meeting. The written questions put by Canada and the European Community to the United States (with Job Nos. 763 and 117, respectively on 10 February and 13 January 1999) and the written replies by the United States to the questions put by the European Community (with Job No. 1041 on 22 February 1999) had also been circulated. As it had been the case with the previous reviews, each Party could provide an introduction to the responses to the questions that had been put to it by other Parties. He would then offer the floor to other Parties for any other questions or comments.

27. The Committee carried out the review of the legislation of Switzerland and the United States on the basis of the written questions and answers and the oral statements made by the two delegations. Parties were invited to submit any further questions that they wished to put to the two delegations by 31 March 1999.⁴ The delegations of Switzerland and the United States would provide written responses to these questions by 15 May 1999. The full record of the review of the legislation of Switzerland and the United States will be circulated in the GPA/- series of documents.

28. Following the reviews, the Chairman suggested that the Committee should take up, at its next meeting, any outstanding points with respect to the legislation of the European Community, Korea, Switzerland and the United States. At that meeting, it would also initiate the review of the national implementing legislation of Canada (GPA/13). In accordance with the agreed procedures for the review, Parties would be invited to submit their written questions to Canada by 15 June 1999 and copies would be made available to the Secretariat which would circulate them to other Parties.⁵ The delegation of Canada would provide written responses to these questions by 15 September 1999. It was so agreed.

G. NEGOTIATIONS UNDER ARTICLE XXIV:7

29. The Chairman said that informal consultations had been held on 9 December 1998 and 22 February 1999 on the negotiations under Article XXIV:7 on the basis of a revised informal Checklist of Issues, the most recent version of which was dated 25 January 1999 (circulated with footer "gpa78"). In the light of those consultations, it had been agreed that a further informal meeting would be held on 10-11 May 1999 and that, at that meeting, the work would be carried forward in the following way:

- (i) Delegations would revert once more to the issues of information technology and procurement methods on the basis of the note by the Chair attempting to crystallize

⁴ No questions had been submitted as of 2 August 1999.

⁵ The questions from the European Community and Hong Kong, China put to Canada were circulated on 16 June 1999 as Job No. 3867 and on 26 June 1999 as Job No. 3423, respectively.

the state reached in the discussions and to identify the key questions that need to be pursued (Job No. 973). Canada had been requested to consider updating its proposals on information technology. On procurement methods, Parties were encouraged to submit contributions, in particular on how the various procurement methods under discussion are presently handled in their national procurement regimes. Papers from the European Community and the United States on procurement methods had been foreshadowed.

- (ii) Delegations would revert to the issue of statistical reporting, on the basis of an updated version of the note by the Chair which would record the comments made on the draft revision of the text of Article XIX:5 (Job No. 765).
- (iii) Delegations would continue the Article-by-Article review of the Agreement on the basis of an updated version of the two-column table which would reflect the proposals on individual Articles that had been made at the present meeting. Delegations were encouraged to submit concrete proposals. In this connection, Hong Kong, China had foreshadowed a revised proposal on Article XV and Japan a proposal on Article XXIV:6(b).
- (iv) With regard to the elimination of discriminatory provisions, the points made in the discussion would be recorded in a revised version of the Checklist of Issues. Furthermore, a revised version of the Secretariat note on the coverage of services would be circulated in the light of the comments submitted. Delegations were encouraged to continue efforts to remove discriminatory provisions through bilateral and plurilateral consultations and to keep the Committee informed of developments. Delegations would revert to this matter at the next informal meeting on the Article XXIV:7 negotiations.
- (v) In accordance with the agreed time-frame and the work programme which set the third WTO Ministerial as the target date for the completion of the negotiations on at least the simplification and improvement of the Agreement, two more informal consultations would be held in the first half of this year, respectively on 10-11 May and 30 June 1999. Delegations were also reminded that it was agreed that suggestions and proposals should be tabled no later than 30 April 1999, this being without prejudice to the right of participants to put forward at a later date modified or additional proposals where necessary.

H. OTHER BUSINESS

(i) *Least Developed Countries*

30. The representative of the European Community said that all WTO Members were committed to better integration of the least developed countries into the WTO system. The practical implementation of the relevant provisions of Article V:12 of the Agreement, which allowed a Party "to grant the benefits of the Agreement to suppliers in least developed countries which were not Parties, with respect to products and services originating in those countries", would enhance the participation of least developed countries in the Agreement and in procurement markets. Joined by the representatives of Japan and the United States, she suggested that the Committee should adopt a decision requiring all Parties to extend the benefits of the Agreement to all the least developed WTO Members.

31. The Committee agreed to revert to this matter at its next meeting.

(ii) *Korea - Procurement of International Airport Construction Corporation*

32. The representative of the United States said that his delegation had requested consultations with Korea on 16 February 1999 and looked forward to resolving this issue as soon as possible (WT/DS163/1 and GPA/D4/1).

33. The representative of Korea said that his Government continued to consider that the Korean Airport Construction Authority was not covered by the Agreement. His delegation would come forward with detailed arguments in this respect in the course of the WTO dispute settlement proceedings.

I. DATE OF THE NEXT MEETING

34. The Committee agreed to hold its next meeting on 5 October 1999.

WORLD TRADE ORGANIZATION

RESTRICTED

GPA/M/10

18 February 1999

(99-0635)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 7 OCTOBER 1998

Chairperson: Mr Dick Mak (Hong Kong, China)

1. The following agenda was adopted:
 - A. Chairpersonship of the Committee
 - B. Application for observer status
 - C. Modifications to the Appendices to the Agreement
 - D. Accessions:
 - (i) Iceland
 - (ii) Chinese Taipei
 - (iii) Panama
 - (iv) Future arrangements for accessions
 - E. Newly acceded WTO Members
 - F. Review of national implementing legislation
 - G. Negotiations under Article XXIV:7
 - H. Annual Report to the General Council
 - I. Other business
 - (i) Korea - Procurement of International Airport Construction Corporation
 - (ii) United States - Measures affecting government procurement
 - J. Date of the next meeting.
- A. CHAIRPERSONSHIP OF THE COMMITTEE
2. As Mrs. Helle Klem (Norway) was not able to continue as Chairperson of the Committee for the remainder of 1998, the Committee elected Mr. Dick Mak (Hong Kong, China) as its Chairperson.

B. APPLICATION FOR OBSERVER STATUS

3. The Committee agreed to grant observer status to the Government of Estonia, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/77).

C. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

4. The Chairperson said that, since the Committee's June 1998 meeting, Japan had notified proposed modifications to its Appendix I (GPA/W/74). Since no objections had been raised within the prescribed time-period, the modifications by Japan had entered into force on 14 August 1998 (WT/Let/238).

5. The representative of the European Community said that his delegation had communicated an explanatory note, dated 7 October 1998, concerning the proposed modifications relating to its Appendix I that it had notified on 13 August 1997 (GPA/W/51 and Add.2). The note had been prepared in response to the questions that his delegation had received from the delegation of the United States relating to some of the items in the proposed modifications in GPA/W/51. However, there had been no further amendments to the lists that had been previously circulated in GPA/W/51. The representative of the United States said that his delegation had reviewed the modifications in GPA/W/51 and had no objections to them in the light of the consultations it had held with the European Community (GPA/W/51/Add.1) and the explanatory note in GPA/W/51/Add.2. The Chairperson suggested that the Committee accept the modifications proposed by the European Community to its Appendix I in documents GPA/W/51 and Add.2 and that those modifications become effective as of 8 October 1998 in accordance with the procedures of Article XXIV:6. The Committee so agreed.

6. In response to a question by the representative of Switzerland, the representative of the Secretariat said that, in accordance with the procedures agreed by the Committee (GPA/M/8, paragraphs 14 and 15), the draft loose-leaf schedules in document GPA/W/35 dated 5 February 1997 would be revised in order to take into account the modifications to Appendix I of the European Community which had been accepted by the Committee at the present meeting and the modifications to the Appendices of other Parties since February 1997, and then circulated to Parties. The revised loose-leaf schedule would be certified after the expiry of a comment period of 60 days.

D. ACCESSIONS

(i) *Iceland*

7. The Chairperson said that an application for accession to the Agreement together with a draft offer had been received from Iceland on 22 June 1998 (GPA/W/73).

(ii) *Chinese Taipei*

8. The representative of Japan said that his delegation had held three bilateral meetings with the delegation of Chinese Taipei since February 1996. His authorities considered that the level of offers of Chinese Taipei to Japan was sufficient.

9. The representative of Chinese Taipei said that no substantial progress had been made in the bilateral consultations held with other interested Parties since the previous meeting. His delegation would continue to hold consultations with interested Parties in order to conclude the process of bilateral consultations at an early stage.

(iii) *Panama*

10. The representative of Panama said that his delegation would hold consultations with interested Parties regarding its offer in GPA/SPEC/3 in the near future. Panama's replies to the additional questions put by one Party were still pending. On the other hand, his delegation had not received any follow-up questions or comments to the replies that it had provided to some other delegations.

11. The representative of the United States said that his delegation had received replies to some of its questions and hoped to receive an early response to its requests for statistical information and for clarification of certain points in Panama's initial offer. His delegation had held two consultations with Panama and expected to have further consultations prior to the next meeting of the Committee, by which time it hoped to have resolved any outstanding issues with regard to Panama's accession.

12. The representative of the European Community said that her delegation had held a bilateral meeting with the delegation of Panama. The European Community had suggested that Panama should improve its offer in certain respects. It might also consider the use of new technologies for the publication of information related to procurement.

13. The representative of Japan said that his delegation had held two bilateral meetings with the delegation of Panama. Panama's initial offer did not include entities at sub-central levels of government.

14. The representative of Switzerland said that her delegation had held bilateral consultations with Panama in February 1998. Her delegation's questions and comments would be communicated to Panama in writing. The bilateral consultations between the two delegations would be resumed before or at the time of the next meeting.

(iv) *Future arrangements for accessions*

15. The representative of Japan said that the process of accessions to the Agreement had lost its momentum after the accessions of Singapore and Hong Kong. Joined by the representative of the European Community, he suggested that the Committee should discuss how the procedures for accession to the Agreement might be made more operational. The Committee agreed to revert to this matter at its next meeting.

E. NEWLY ACCEDED WTO MEMBERS

16. The Chairperson said that there were no new developments to report on the accessions of Bulgaria and Mongolia to the Agreement as of 7 October 1998.¹

17. The representative of the European Community said that the negotiations on the accessions of these two countries would be held in bilateral consultations. Moreover, the accession of a newly acceded WTO Member to the Agreement on Government Procurement was a matter that related to the work in the WTO on accessions. While recognizing that accession to a plurilateral agreement might be a difficult issue, the European Community would continue to stress the importance of joining the Agreement on Government Procurement for countries newly acceding to the WTO as an important part of its efforts in the WTO accession process. The European Community had offered technical cooperation to some of the acceding countries.

¹ Mongolia applied for observer status in a communication dated 26 November 1998 (GPA/W/80).

18. The representative of Japan said that his Government would be prepared to provide technical cooperation to promote accession to the Agreement of the newly acceded countries on the basis of the requests to be formulated by them.

F. REVIEW OF NATIONAL IMPLEMENTING LEGISLATION

19. The Chairperson said that the arrangements and the schedule for the review of national implementing legislation had been agreed by the Committee at its February and June 1998 meetings (GPA/M/8, paragraph 23 and GPA/M/9, paragraph 12). In accordance with these procedures, the Committee would begin its review at the present meeting by taking up the legislation of the European Community (GPA/20) and Korea (GPA/12/Rev.1). The written questions put by the United States and Korea to the European Community (Job No. 4689) and the written replies by the European Community (Job No. 69) had been circulated respectively on 4 September and 6 October 1998. The written questions put by the United States, the European Community, Switzerland and Canada to Korea (Job Nos. 4690, 4868, 5052 and 5328) and the written replies by Korea (Job No. 5326) had been circulated on 29 August, 7 September, 21 September, 5 October and 2 October 1998 respectively. The Chairman suggested that each Party might provide an introduction to the responses to the questions that had been put to it by other Parties. He would then offer the floor to other Parties for any other questions or comments. Furthermore, Parties would be invited to submit any further questions that they wished to put to these two delegations by 5 November 1998.² The delegations of the European Community and Korea would provide written responses to these questions by 15 January 1999. The Committee would revert to any outstanding points at its next meeting.

20. The Committee agreed to these procedures and carried out the review of the legislation of the European Community and Korea on the basis of the written questions and answers and the oral statements made by the two delegations. The full record of the review of the legislation of the European Community and Korea will be circulated in the GPA/- series of documents.

21. Following the reviews, the Chairperson suggested that the Committee take up at its next meeting any outstanding points with respect to the legislation of the European Community and Korea. At that meeting it would also initiate the review of the national legislation of Switzerland (GPA/15) and the United States (GPA/23). In accordance with the agreed procedures for the review, Parties would be invited to submit their written questions to these Parties by 7 December 1998 and copies would be made available to the Secretariat which would circulate them to other Parties.³ The delegations of Switzerland and the United States would provide written responses to these questions by 31 January 1999.

22. The Committee so agreed.

G. NEGOTIATIONS UNDER ARTICLE XXIV:7

23. The Chairperson said that informal consultations had been held on 5 October 1998 on the negotiations under Article XXIV:7 on the basis of a revised informal checklist of issues, the most recent version of which was dated 8 September 1998 (circulated with footer "gpa60"), and the non-papers presented by the delegations of Hong Kong, China relating to the Articles of the Agreement (Job No. 5269) and the timetable and work programme for the elimination of discriminatory measures (Job No. 5270) and by the delegation of Singapore relating to methods of procurement (Job No. 5295). In the light of those consultations, it had been agreed that a further informal meeting

² No questions had been submitted as of 3 February 1999.

³ The questions from the European Community put to the United States and Switzerland were circulated on 13 January 1999 and the reply by Switzerland on 16 February 1999.

would be held on 9-10 December 1998 and that, at that meeting, the work would be carried forward in the following way:

- (i) delegations would revert once more to the issues of information technology, statistical reporting and enforcement and monitoring mechanisms on the basis of a note that the Chair would draw up attempting to crystallize the state reached in the discussions and to identify the key questions that needed to be pursued;
- (ii) the European Community was invited to provide any further information that it might have on its suggestions regarding the use of information and communications technology for the compilation of statistical data in the light of the questions put to that delegation at the meeting (Job No. 3869);
- (iii) delegations would revert to the issue of procurement methods on the basis of the paper presented by the delegation of Singapore (Job No. 5295) and any other papers that might be submitted;
- (iv) delegations would revert to Articles I to XV and also take up the remaining Articles of the Agreement;
- (v) with respect to the elimination of discriminatory measures, there was an agreement that this matter related to provisions that discriminated between Parties, it being understood that there was a close link between this issue and that of coverage under which issues relating to the extension of the scope of application of the national treatment principle would be taken up;
- (vi) delegations would further revert to the issue of the timetable and work programme for the negotiations on the elimination of discriminatory measures and practices and the expansion of the coverage of the Agreement having regard to the non-paper submitted by Hong Kong, China (Job No. 5270);
- (vii) delegations would discuss the issue of the coverage of services on the basis of a note to be prepared by the Secretariat listing the services presently covered in the Schedules of Parties.

H. ANNUAL REPORT (1998) TO THE GENERAL COUNCIL

24. The Committee adopted its Annual Report for 1998 to the General Council on the basis of a draft prepared by the Secretariat which was amended in the light of the discussion at the meeting and circulated in document GPA/25.

I. OTHER BUSINESS

(i) *Korea - Procurement of International Airport Construction Corporation*

25. The representative of the United States said that his delegation had submitted questions to the delegation of Korea relating to the status of the Korean Airport Construction Corporation under the Agreement (GPA/W/76). His delegation disagreed with the view held by Korea that the Korean Airport Construction Authority was not covered by the Agreement. His authorities considered that this was an important issue for the United States with respect to the balance that had been established pursuant to the negotiations leading to the conclusion of the Agreement.

26. The representative of Korea said that his delegation had not yet been able to respond to the questions put by the United States under paragraphs 1 and 2 of Article XIX due to the complexity of the questions. Korea continued to believe that the Korean Airport Construction Corporation was not subject to the GPA. If necessary, Korea would be willing to hold bilateral consultations so as to resolve the matter in a satisfactory manner.

(ii) *United States - Measures affecting government procurement*

27. The representative of Japan said that his Government had requested the establishment of a panel regarding the sub-federal measures affecting government procurement in the United States at the DSB meeting of 22 September 1998 but that no consensus had been reached at that meeting to establish a panel (WT/DS95/3 and WT/DSB/M/48).⁴

J. DATE OF THE NEXT MEETING

28. The Committee agreed to hold its next meeting on 23 February 1999.

⁴ Following the requests by the European Community (WT/DS88/3) and Japan (WT/DS95/3), a single panel was established at the DSB meeting of 21 October 1998 (WT/DSB/M/49).

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 25 JUNE 1998

Chairperson: Mrs. Helle Klem (Norway)

1. The following agenda was adopted:
 - A. Application for observer status
 - B. Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement
 - C. Modifications to the Appendices to the Agreement
 - D. Loose-leaf system for Appendices to the Agreement
 - E. Accessions:
 - (i) Iceland
 - (ii) Chinese Taipei
 - F. Newly acceded WTO Members: Mongolia
 - G. Review of national implementing legislation
 - H. Statistical reporting
 - I. Modalities for the review of the Agreement
 - J. Other business
 - (i) Korea - Procurement of International Airport Construction Corporation
 - (ii) United States - Measures affecting government procurement
 - (iii) Canada - coverage in Annexes 2 and 3 of Appendix I
 - (iv) Demonstration of the use of information technology in government procurement
 - (v) The date of the next meeting.

A. Application for observer status

2. The Committee agreed to grant observer status to the Government of Lithuania, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/71).

B. Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement

3. The Chairperson said that, at its last meeting, the Committee had discussed the legal and procedural aspects of the relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement on the basis of a note prepared by the Secretariat in response to the Committee's request (GPA/M/8, paragraphs 5-10 and GPA/W/65). The representative of Canada said that, since all Parties to the Tokyo Round Agreement had become Parties to the 1994 Agreement, his delegation considered that the Tokyo Round Agreement had been superseded by the 1994 Agreement in the light of the provisions of Article XXIV:3(c) of the 1994 Agreement. Joined by the representative of Switzerland, he said that in accordance with the legal opinion in the note by the Secretariat, no formal Committee action would be required. The representative of Japan said that his authorities were still reviewing the legal issues involved in respect of this matter.

4. The Committee took note of the legal opinion expressed in the note by the Secretariat circulated in document GPA/W/65, while noting that any delegation could revert to the matter at a future meeting.

C. Modifications to the Appendices to the Agreement

5. The Chairperson said that, since the Committee's last meeting, Hong Kong, China (GPA/W/69) and Singapore (GPA/W/70 and 72) had notified proposed modifications to their respective Appendices. Since no objections had been raised within the prescribed time-periods, the modifications by Hong Kong, China had entered into force on 24 April 1998 (WT/Let/218) and the modification by Singapore in document GPA/W/70 on 9 May 1998 (WT/Let/219).¹

6. In regard to the proposed modifications relating to its Appendix I notified by the European Community on 13 August 1997, the representative of the United States said that the consultations between her delegation and the European Community regarding the modifications in document GPA/W/51 would be concluded in the near future. The representative of the European Community said that, should further modifications to Appendix I result from those consultations, his delegation would submit a note explaining them.

D. Loose-leaf system for Appendices to the Agreement

7. The Chairperson said that the Committee had agreed that the first issue of the loose-leaf system would be postponed until after the entry into force of the extensive modifications that had been notified by the European Community in document GPA/W/51 (c.f. item C above and GPA/M/7, paragraphs 9-10). Meanwhile, a draft of the loose-leaf system of Appendices had been available from 15 May 1998 on the government procurement site at the WTO Homepage in order to provide information on the Appendices including the modifications that had been certified since the signature of the Agreement on 15 April 1994 (<http://www.wto.org/wto/govt/loose.htm>). The loose-leaf system circulated on the Internet included the Appendices of the European Community that were currently in

¹ The modification by Singapore in GPA/W/72 subsequently entered into force on 15 July 1998 (WT/Let/232).

effect and a reference had been made to the modifications under consideration in documents GPA/W/51 and Add.1. As also agreed by the Committee, the procedures agreed by the Committee concerning certification and circulation of the loose-leaf system of schedules would be carried out after the procedures for the certification of the proposed modifications to the Appendices of the European Community had been completed (GPA/W/35, paragraph 4 and GPA/M/5, paragraph 20).

E. Accessions

(i) *Iceland*

8. The Chairperson said that a request for accession had been received from Iceland together with a draft offer (GPA/W/73).

9. The representative of Canada said that, without prejudice to its consideration of Iceland's offer, his delegation had noted that Canada figured prominently in the Annexes to Appendix I and in the General Notes while the respective offers of Chinese Taipei and Panama did not contain any such reference. He also drew attention to the objective of the review of the Agreement concerning the elimination of discriminatory measures.

(ii) *Chinese Taipei*

10. The representative of Chinese Taipei said that the Law on Government Procurement had been promulgated by the President on 27 May 1998 and would enter into force after one year. Chinese Taipei would continue the ongoing consultations with certain Parties on pending issues with a view to concluding its accession process as soon as possible.

F. Newly acceded WTO Members: Mongolia

11. The Chairperson said that the Secretariat had sent a reminder to the delegation of Mongolia on 12 June 1998, drawing attention to the letter by the Chairperson dated 13 November 1997 regarding the commitments undertaken by Mongolia in the Working Party on the Accession of Mongolia to the WTO (c.f. GPA/M/7, paragraph 25).

G. Review of national implementing legislation

12. The Chairperson said that, as of 25 June 1998, Canada, Korea, Norway, Switzerland, the European Community and the United States had notified their national implementing legislation and responses to the checklist of issues (GPA/10, GPA/12/Rev.1, GPA/14, GPA/15, GPA/20 and GPA/23). She drew attention to the arrangements and schedule for the review of national implementing legislation agreed by the Committee at the previous meeting (GPA/M/8, paragraph 23). Accordingly, she suggested that the Committee should initiate the review of national legislation at its next meeting by taking up the legislation of the European Community and Korea. Parties should submit their written questions to these Parties by 24 August 1998 and copies should be made available to the Secretariat which would circulate them to other Parties.² The delegations of the European Community and Korea should provide written responses to these questions before 30 September 1998. The Committee so agreed.

² A reminder was sent to delegations on 3 August in airgram WTO/AIR/897.

H. Statistical reporting

13. The Chairperson said that, as of 25 June, Norway and Hong Kong, China had provided statistics, respectively, for 1996 and July-December 1997 in accordance with Article XIX:5 of the Agreement (GPA/21 and 22).

I. Modalities for the review of the Agreement

14. The Chairperson said that informal consultations had been held on 25 June 1998 on the modalities for the three-year review on the basis of a revised informal checklist of issues, the most recent version of which was dated 25 May 1998, and the non-papers presented by the delegation of the United States relating to information technology (Job No.3842), the delegations of Norway (Job No. 3246), the European Community (Job No. 3869) and the United States (Job No. 3855) respectively on statistical reporting requirements, the delegation of the European Community on enforcement and monitoring mechanisms (Job No. 3871), the delegation of the United States on the expansion of services coverage (Job No. 3843) and the delegation of Hong Kong, China on the elimination of discriminatory measures (Job No. 3412).

15. The Chairperson said that the Committee had held informal consultations regarding a time-frame for the negotiations under Article XXIV:7 and the overall work programme that should be envisaged within that time-frame. In the light of those consultations the Committee agreed to proceed in accordance with the following proposals by the Chair, the text of which incorporates suggestions by delegations agreed to by the Committee:

"We have two sets of points on which the Group should decide. One is the time-frame for the negotiations under Article XXIV:7 and the overall work programme that should be envisaged within this time-frame and the other is the more immediate issue of the work that should be envisaged for the Group's next meeting.

"On the first of these questions, I sense a widespread view that we should aim to complete the negotiations, at least in respect of the simplification and improvement of the Agreement, by the third WTO Ministerial to be held at the end of next year with a view to, in particular, increasing the attractiveness of the Agreement to new members.

"If this is to be done, we would need to reserve the whole of the fall of next year to an intensive negotiating process. This, in turn, would require that by the summer of next year there would be in existence a document, reflecting the outstanding proposals, that could constitute the basis for these negotiations. The preparation of such a document would require that all the proposals and suggestions for improvement of the text would have been thoroughly discussed and digested by that time. In order for this to be done, we might wish to set a target date of the end of April next year for the tabling of all such proposals and suggestions – without, of course, prejudice to the right of participants to put forward at a later date modified or additional proposals where necessary.

"To sum up therefore I would suggest the following key elements of a timetable and work programme:

- The tabling of suggestions and proposals no later than the end of April 1999.
- The preparation of a document reflecting all outstanding proposals and suggestions, as a basis for the final negotiating phase, no later than the summer of 1999. I would, of course, hope that in the course of the review and discussion of the proposals and suggestions that would already have been

undertaken by that time a considerable measure of agreement would already have been reached on many points and that the number of outstanding points left for the final negotiating phase would be kept to a manageable minimum.

- A target of the third WTO Ministerial for the completion of the negotiations, at least on the simplification and improvement of the Agreement.

"We would in parallel continue work on the other elements of the negotiations, namely on the elimination of discriminatory measures and practices which distort open procurement and the expansion of the coverage of the Agreement. We will revert at our next meeting to the timetable and work programme for these parts of the negotiations. To the extent that the objective of the elimination of discriminatory measures could be achieved through modifications to the Agreement itself, this work would also have the target date of the third Ministerial Meeting.

"If this way of proceeding were to be acceptable to you, we would need to give some thought to the sort of meeting schedule that should be envisaged for the remainder of this year and for next year. My own suggestion would be that you might consider two meetings in the fall of this year (our October meeting already scheduled and maybe one in mid-December), and three meetings in the first part of next year (for example February, May and July). In the fall period of 1999, we would need to envisage a semi-continuous process of negotiation, i.e. the Group would need to be on call for the whole period.

"WTO Members, not parties to the GPA, and other observer governments to the GPA would be invited to participate fully in the work, it being understood that the final decision on the outcome would remain with Parties to the GPA.

"As regards the second issue that I mentioned, namely the specific work programme for our next meeting in October, we have already agreed:

- to revert once more to the issues of information technology and statistical reporting;
- to revert to the issue of monitoring and enforcement, on which the Community presented a paper today;
- furthermore, we have been advised to expect a paper from the Community on the issue of procurement methods;
- we have also agreed that we will continue our examination of Articles I through VI and take up Articles VII through XV. In this regard, I encourage participants to put forward drafting proposals in advance;
- using the Secretariat note on the types of discriminatory provisions in the Appendices, we will discuss the reasons for the maintenance of such provisions, any plans for their removal and what is needed for their removal;
- coverage of services.

"Of course, delegations remain free to put forward proposals or suggestions on any of the other issues before us and I would urge them to do so.

"In order to assist this further work, the Secretariat will once more update the Checklist of Issues. In addition, we will revert at the next meeting to the paper proposed by Canada for a text of the Agreement reflecting proposed changes."

J. Other business

(i) *Korea - Procurement of International Airport Construction Corporation*

16. The representative of the United States said that her delegation had held informal consultations with Korea concerning the coverage of the Korea Airport Construction Authority under the Agreement. The representative of Korea said that his authorities considered that the International Airport Construction Corporation was not subject to the obligations of the Agreement.

(ii) *United States - Measures affecting government procurement*

17. The representative of the European Community said that his delegation had been pursuing the consultations with the delegation of the United States concerning the legislation enacted by the Commonwealth of Massachusetts regulating state contracts with companies doing business with or in Myanmar (WT/DS88/1 and GPA/D2/1).

(iii) *Canada - coverage in Annexes 2 and 3 of Appendix I*

18. In response to a request for information by the representative of the European Community regarding any developments in Canada's offer, the representative of Canada said that his delegation's stated position since the entry into force of the Agreement concerning the coverage of sub-central government entities and enterprises in all ten Provinces contained in its Appendix I, Annexes 2 and 3 had remained unchanged (GPA/19, paragraph 6).

(iv) *Demonstration of the use of information technology in government procurement*

19. The Chairperson said that a demonstration of the application of information technology to the area of government procurement had been held on 24 June 1998 with the participation of experts from Canada, the European Community, Finland, Japan, Mexico, Norway, Poland, Singapore and the United States.

(v) *The date of the next meeting*

20. The Committee agreed to hold its next meeting on 7 October 1998.

WORLD TRADE ORGANIZATION

RESTRICTED

GPA/M/8
26 May 1998

(98-2152)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 18 FEBRUARY 1998

Chairperson: Mrs. Helle Klem (Norway)

1. The following agenda was adopted:
 - A. Election of Chairperson
 - B. Applications for observer status
 - C. Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement
 - D. Modifications to the Appendices to the Agreement
 - E. Loose-leaf system for Appendices to the Agreement
 - F. Notification of threshold figures in national currencies
 - G. Accessions:
 - (i) Chinese Taipei
 - (ii) Panama
 - H. Newly acceding WTO Members
 - (i) Bulgaria
 - (ii) Mongolia
 - I. Notification of national implementing legislation
 - J. Statistical reporting
 - K. Modalities for the review of the Agreement
 - L. Other business
 - (i) Australia - Current developments regarding the Agreement on Government Procurement
 - (ii) Korea - Procurement of International Airport Construction Corporation

- (iii) United States - Measures affecting government procurement
- (iv) Japan - Procurement of a satellite navigation system
- (v) Demonstration on the use of information technology in government procurement
- (vi) Dates of meetings in 1998.

A. Election of Chairperson

2. The Committee re-elected Mrs. Helle Klem (Norway), as its Chairperson for 1998.

B. Applications for observer status

3. The Committee agreed to grant observer status to the Government of Slovenia, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the request received from that country (GPA/W/67).

4. In the light of the action taken by the General Council at its meeting of 10 December 1997 (WT/GC/M/25), the Committee agreed that International Trade Centre UNCTAD/WTO would be invited to attend its meetings.

C. Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement

5. The Chairperson said that the Secretariat had prepared a note on the legal and procedural aspects of the supersession provided under Article XXIV:3(c) in response to the Committee's request at the last meeting (GPA/W/65 and GPA/M/7, paragraph 28)

6. The representative of the United States said that her delegation had certain concerns with the approach outlined in the note by the Secretariat. Her delegation considered that Article XXIV:3(c) of the Agreement was not itself a denunciation clause but that it merely provided for supersession of the provisions of the Tokyo Round Agreement by the 1994 Agreement where a party was signatory to both Agreements. The Tokyo Round Agreement would need to be formally terminated as had been the case with the International Dairy Agreement and the International Bovine Meat Agreement. While the United States had withdrawn from the Tokyo Round Agreement in January 1996, it remained concerned that, in the possible instance where a signatory to the 1994 Agreement might withdraw from that Agreement, it might still have rights remaining under the Tokyo Round Agreement.

7. The representative of the European Community said that, in the light of the provisions of Article 59.1(a) of the Vienna Convention on the Law of Treaties (1969), her delegation did not consider that it was necessary to have a formal termination of the Tokyo Round Agreement. Given that the 1994 Agreement had superseded the Tokyo Round Agreement, there was no need for a formal Committee action. The Committee could take note of the legal opinion expressed in this respect in the note by the Secretariat circulated in document GPA/W/65.

8. The representative of Canada said that Canada held the view that it had no remaining rights and obligations vis-à-vis the Parties to the Tokyo Round Agreement as per supersession provisions in Article XXIV:3(c) of the 1994 Agreement. However, his authorities had not yet completed their domestic review of the legal issues involved in this respect.

9. The representative of Japan said that his delegation had no objection to the formal termination of the Tokyo Round Agreement even though that Agreement did not have a specific termination clause. However, it might have problems with a decision that was made effective retroactively as of 20 October 1997.

10. The Committee took note of the statements made and agreed to revert to this item at its next meeting.

D. Modifications to the Appendices to the Agreement

11. The Chairperson said that Hong Kong, China (GPA/W/57), Switzerland (GPA/W/58), Korea (GPA/W/59), Japan (GPA/W/60 and 63), Canada (GPA/W/61) and Norway (GPA/W/62) had notified proposed modifications to their respective Appendices. Since no objections had been raised within the prescribed time-period, these modifications had entered into force respectively on 23 November 1997 (WT/Let/206), 19 November 1997 (WT/Let/205), 23 November 1997 (WT/Let/207), 23 November 1997 and 31 December 1997 (WT/Let/208 and 211), 5 December 1997 (WT/Let/209) and 20 December 1997 (WT/Let/210). Modifications relating to its Appendices had also been notified by Israel (GPA/W/68).¹

12. In regard to the proposed modifications relating to its Appendix I on 13 August 1997 notified by the European Community in document GPA/W/51, the representative of the United States said that her delegation had sought clarifications from the European Community in September 1997 (GPA/W/51/Add.1). The representative of the European Community said that his delegation would respond to the request for information from the United States so as to settle the matter without delay. The difficulties in completing the procedures for acceptance of the modifications proposed by the European Community illustrated the disadvantages of using a positive list approach for the coverage of entities in Appendix I, a matter that was being currently discussed in the context of the review of the Agreement. The representative of the United States said that, if the notification of the European Community had provided a proper explanation of the nature of the proposed modifications, the problem of review of GPA/W/51 by other Parties would have been avoided. Her delegation had had to object to the proposed modifications going into effect because, given the extensive nature of document GPA/W/51 and the timing of its receipt, her delegation had not been able to determine whether the proposed modifications would change the coverage of the commitments of the European Community under the Agreement.

13. The Committee took note of the statements made and, in the event that any further proposed modifications to the Appendices of the European Community were to result from its consultations with the United States regarding the proposed modifications in GPA/W/51, recalled that they should be notified to the Committee in accordance with the procedures of Article XXIV:6(a).

E. Loose-leaf system for Appendices to the Agreement

14. The Chairperson stated that the Secretariat had prepared itself so as to be able to make available a revision of the draft loose-leaf system of Appendices in GPA/W/35 which would consolidate the rectifications and modifications to the Appendices effective on 18 February 1998. At its September 1997 meeting, the Committee had noted that the first issue of the loose-leaf system

¹Entered into force on 8 March 1998 (WT/Let/214).

would be postponed until after the entry into force of the extensive modifications that had been notified by the European Community in document GPA/W/51 (c.f. item D above and GPA/M/7, paragraphs 9-10).

15. Following suggestions by the representatives of Canada and the European Community, the Committee, while noting that the delegations of the European Community and the United States would seek to reach an agreement on the proposed modifications in GPA/W/51 without delay, agreed that, in the event that agreement was not reached in the near future, the following steps would be taken: (i) the loose-leaf system for Appendices would be issued on the Internet with the proviso that it was made available in order to provide information on the Appendices including the modifications that had been certified since the signature of the Agreement in April 1994; (ii) the loose-leaf system circulated on the Internet would include the Appendices of the European Community that were currently in effect and a reference would be made to the modifications under consideration in document GPA/W/51 and Add.1; and (iii) after the procedures for the certification of the proposed modifications to the Appendices of the European Community had been completed, the procedures agreed by the Committee concerning certification and circulation would be carried out (GPA/W/35, paragraph 4 and GPA/M/5, paragraph 20).

F. Notification of threshold figures in national currencies

16. The Chairperson said that Hong Kong, China and the European Community had already notified their threshold figures in national currencies for 1998-1999 in documents GPA/W/66 and Add.1 and invited other Parties to submit their notifications in accordance with the relevant decision of the Committee without delay (GPA/1, Annex 3).²

G. Accessions

(i) *Chinese Taipei*

17. The representative of Chinese Taipei said that bilateral consultations with the United States and Switzerland had been concluded respectively in December 1997 and February 1998. His delegation had also continued bilateral consultations with Canada, the European Community, Japan and Korea in February 1998. Chinese Taipei hoped that the ongoing consultations on its offer would soon be finalized so as to facilitate the accession of Chinese Taipei to the Agreement after becoming a WTO Member. The review of a draft Government Procurement Law by its legislature was in its final stages. Work was also being carried out on the drafting of implementing rules and regulations that would supplement the basic law. Other developments relating to the reform of the government procurement regime in Chinese Taipei included the publication of a Government Procurement Gazette, the dissemination of information on tenders through the Internet, the establishment of a transitional dispute settlement mechanism on public construction and the collection of statistics on government procurement.

18. The representative of Japan said his delegation had obtained a positive and informative explanation from the delegation of Chinese Taipei concerning its offer and the expected changes in the procurement law and regulations. His delegation hoped that the negotiation process would be concluded at an early stage.

²Notifications by Japan and Canada have subsequently been circulated in documents GPA/W/66/Add.2 and 3.

(ii) *Panama*

19. The representative of Panama said that bilateral consultations had been held or would be held with interested Parties in September 1997 and February 1998 regarding Panama's initial offer of 24 June 1997 (GPA/SPEC/3). His delegation had responded in writing to some of the requests for information from these Parties and in some other cases the replies were still being prepared. Interested delegations should get in contact with his delegation if further explanation of Panama's offer or any follow-up to their questions were required. His delegation would hold further consultations with some other Parties and hoped to be able to pursue the procedures for accession of Panama as expeditiously as possible.

H. Newly acceding WTO Members

(i) *Bulgaria*

20. The Chairperson said that she had been in contact with the delegation of Bulgaria in February 1998. The representative of Bulgaria had reaffirmed his country's intention to present an offer and to initiate negotiations for accession to the Agreement. She had been informed that developments in this respect had, however, been delayed due to overburden of work in the Ministries concerned.

(ii) *Mongolia*

21. The Chairperson said that, as agreed at the last meeting, a letter had been sent to the delegation of Mongolia, drawing attention to the commitments undertaken by Mongolia in the Working Party on the Accession of Mongolia to the WTO and encouraging Mongolia to apply for observer status (c.f. GPA/M/7, paragraph 25). As of 18 February 1998, no reply had been received from Mongolia.

I. Notification of national implementing legislation

22. The Chairperson said that, at its meeting of 4 June 1996, the Committee had agreed that Parties would notify national implementing legislation, including responses to the checklist of issues, not later than 31 December 1996 (GPA/1/Add.1). A reminder had been sent to delegations in airgram WTO/AIR/480 of 1 November 1996. As of 18 February 1998, Canada, Korea, Norway, Switzerland and the European Community had notified their national implementing legislation and responses to the checklist of issues (GPA/10, GPA/12/Rev.1, GPA/14, GPA/15 and GPA/20). The representative of the United States said that her delegation would notify its national legislation in the near future.

23. Following discussion on the basis of an informal note by the Secretariat, dated 6 May 1997, describing the procedures for review of implementing legislation developed by other WTO bodies (circulated with footer "gpa28"), the Committee agreed to the following arrangements and schedule for the review of national implementing legislation:

- (i) Parties who had not yet notified their national implementing legislation, including responses to the checklist of issues in document GPA/1/Add.1, would do so by 1 April 1998;
- (ii) Parties would submit written questions to those Parties whose legislation would be reviewed, with copies to the Secretariat, at least six weeks prior to the review meeting, the questions being circulated by the Secretariat to all Parties;

- (iii) Parties would provide responses to these questions in writing at least one week before the meeting at which the review would be held;
- (iv) the Committee would initiate the review of national legislation at its October 1998 meeting, by taking up the legislation of the European Community and Korea.

J. Statistical reporting

24. The Chairperson said that, as of 18 February, no Parties had provided statistics for 1996 and 1997 in accordance with Article XIX:5 of the Agreement. The representatives of Canada, Norway³ and Switzerland said that their delegations would submit statistics for 1996 in the near future.

K. Modalities for the review of the Agreement

25. The Chairperson reported on the informal consultations on the modalities for the three-year review that had been held on the basis of a revised informal checklist of issues, the most recent version of which was dated 27 January 1998, and the non-papers presented by the delegation of the European Community relating to the simplification and improvement of the Agreement (Job No. 6435), the simplification and improvement of the structure of the Agreement (Job No. 6437) and non-discrimination and information technology (Job No. 6438) as well as on the basis of an informal note by the Secretariat on the types of discriminatory provisions in the Appendices to the Agreement, dated 31 October 1997 (circulated with footer "gpa33"). As a result of these consultations it had been agreed to hold a further informal meeting on 25 June 1998. At that meeting the work would be carried forward in the following way:

- (i) the work would proceed with the three elements of the review simultaneously;
- (ii) as regards the simplification/improvement axis of the mandate for the review, delegations would have focused discussions on specific items, starting with information technology and statistical reporting. Delegations would be invited to specify, to the extent possible, the specific drafting changes that they would wish to see made to the relevant provisions of the Agreement in these areas;
- (iii) delegations would initiate an Article-by-Article review of the Agreement with a consideration of Articles I to VI of the Agreement;
- (iv) delegations would be invited to identify any other areas where focused discussions could be taken up and to bring forward proposals, including written proposals on any other substantive provisions, for example on procurement methods and restructuring of the Agreement including its Annexes;
- (v) as regards the other two elements of the review, namely elimination of discriminatory measures and practices which distort open procurement and expansion of the coverage of the Agreement, delegations would begin focused discussion on the expansion of the coverage of the Agreement in the area of services and would be invited to present written suggestions on any other matters;
- (vi) in the light of the state of discussion at the next meeting, the Chair would draw up, for the consideration of delegations, a suggested work programme, including a schedule, for the further work under the review and negotiations foreseen in Article XXIV:7(b) and (c).

³Statistics for 1996 have subsequently been provided by Norway (GPA/21).

L. Other business

(i) *Australia - Current developments regarding the Agreement on Government Procurement*

26. The representative of Australia said that the Commonwealth Government was currently examining all aspects of its possible membership of the Agreement. A consultative group was considering the national approach to Australia's participation in the activities related to the Agreement and a number of the key issues which were relevant to the application of the Agreement in Australia including the interests of small and medium enterprises. The Australian Procurement and Construction Council (APCC) was preparing a report on the impact of the accession to the Agreement on the Australian jurisdictions which would be forwarded to a special meeting at the ministerial level on 26 March 1998. Discussion would focus on the approaches to Australia's accession to the Agreement and the use of electronic commerce in government procurement. Australia's accession process would also entail a discussion between the federal and sub-federal entities. The current trend in Australia at all levels of government was towards greater decentralization of decision-making in the area of government procurement. The government departments and agencies had adopted their own procurement systems and practices which were aligned with the systems and practices adopted by private sector companies.

(ii) *Korea - Procurement of International Airport Construction Corporation*

27. The representative of the United States asked whether Korea had the intention of notifying the modifications to its coverage under the Agreement concerning the Korea Airport Construction Authority in accordance with the procedures of Article XXIV:6(a). This entity had been established in 1994 after the conclusion of the negotiations on Korea's accession to the Agreement. It presently had the responsibility for airport construction procurement instead of the Ministry of Transportation which had that responsibility at the time of Korea's negotiations of accession to the Agreement and which had been included under Korea's coverage of the Agreement.

28. The representative of Korea said that the International Airport Construction Corporation was not among the entities included in Appendix I of Korea. This matter had been fully clarified with the Parties during the negotiations on Korea's coverage of the Agreement.

(iii) *United States - Measures affecting government procurement*

29. The representative of Japan said that Japan had held three rounds of consultations with the United States in 1997 concerning the legislation enacted by the Commonwealth of Massachusetts regulating state contracts with companies doing business with or in Myanmar (WT/DS95/1 and GPA/D3/1). His delegation had been informed that the Federal Government of the United States had had high-level contacts with the Government of Massachusetts but, because of the confidential nature of those contacts, no detailed explanation had been provided on such Federal activities or on any reasonable perspective towards finding a solution to the matter under consultation. The issue of the inconsistency of the measures enacted with the provisions of the Agreement had remained unresolved. His delegation requested the United States delegation to provide explanations or information on this matter.

30. The representative of the United States said that it would be more appropriate to provide information relating to this matter in the bilateral consultations held under the DSU.

(iv) *Japan - Procurement of a satellite navigation system*

31. In reply to the request for information made by the delegation of the United States at the Committee's last meeting regarding a mutually agreed solution reached between the European Community and Japan pursuant to Article 3.6 of the DSU (WT/DS73/4/Rev.1, GPA/D1/2/Rev.1 and GPA/M/7, paragraph 27), the representative of the European Community, in a statement made jointly with the representative of Japan, said that the European Commission and the Ministry of Transport of Japan (MoT) had reached a settlement through the establishment of cooperation between the European Tripartite Group (consisting of the European Commission, the European Space Agency and Eurocontrol) on the one hand and the MoT on the other in the field of interoperability between MTSAT Satellite-based Augmentation System (MSAS) and the European Geostationary Navigation Overlay Service (EGNOS). This cooperation was aimed at jointly contributing to the implementation of a global seamless navigation service for aeronautical end-users through the interoperability among MSAS, EGNOS and other equivalent systems. It had also been agreed that the requirements for interoperability would be mentioned in MSAS and EGNOS documentation for all future procurement in and after 1998, on condition that both sides reached the conclusion that the interoperability was feasible.

(v) *Demonstration of the use of information technology in government procurement*

32. Following a suggestion by the representatives of Canada, the European Community and Norway, the Committee noted that the Secretariat would organize, in conjunction with interested delegations, a demonstration session on the application of information technology in the area of government procurement, to be held on 24 June 1998. It also agreed that Parties interested in making presentations on the operation of the systems in their countries should contact the Secretariat.

(vi) *Dates of meetings in 1998*

33. The Committee agreed to hold its next meeting on 25 June 1998 and its autumn meeting on 7 October 1998.

WORLD TRADE ORGANIZATION

(97-5268)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 29 SEPTEMBER 1997

Chairperson: Mrs. Helle Klem (Norway)

- 1) At the opening of the meeting, the Committee observed a minute of silence in memory of Mr. Harald Ernst, the Chairman of the Committee in 1996 and 1997.
- 2) The following agenda was adopted:
 - A. Election of Chairperson
 - B. Applications for observer status
 - C. Modifications to the Appendices to the Agreement
 - D. Loose-leaf system for Appendices to the Agreement
 - E. Notification of national implementing legislation
 - F. Statistical reporting
 - G. Modalities for the three-year review of the Agreement
 - H. Accessions:
 - (i) Liechtenstein
 - (ii) Singapore
 - (iii) Chinese Taipei
 - (iv) Panama
 - I. Newly acceding WTO Members
 - (i) Bulgaria
 - (ii) Mongolia
 - J. Other Business
 - (i) United States - Measures affecting government procurement

- (ii) Japan - Procurement of a navigation satellite
- (iii) Relationship of the Tokyo Round Agreement on Government Procurement to the 1994 Agreement on Government Procurement

K. Annual Report (1997) to the General Council

L. Date of the next meeting

A. Election of Chairperson

3) The Committee elected Mrs. Helle Klem (Norway) as its Chairperson for the remainder of 1997.

B. Applications for observer status

4) The Committee agreed to grant observer status to the Governments of Poland, Chile and Panama, pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the requests received from those countries (GPA/W/48, 49 and 53).

C. Modifications to the Appendices to the Agreement

5) The Chairperson said that the United States (GPA/W/41), Switzerland (GPA/W/42 and 45), Norway (GPA/W/43 and 46), the European Community (GPA/W/44 and 55) and Israel (GPA/W/54) had notified proposed modifications to their respective Appendices. Since no objections had been raised within the prescribed time-period, these modifications had been certified respectively on 22 June 1997 (WT/Let/146), 22 June 1997 (WT/Let/146), 16 August 1997 (WT/Let/164), 29 June 1997 (WT/Let/152), 12 July 1997 (WT/Let/163), 9 July 1997 (WT/Let/162), 27 September 1997 (WT/Let/185) and 26 September 1997 (WT/Let/184). Modifications relating to their respective Appendices had also been notified by Hong Kong, China (GPA/W/56) and Switzerland (GPA/W/47/Add.1).¹

6) The Chairperson said that the European Community had notified, on 13 August 1997, modifications to its Appendices I-IV (GPA/W/51). In a communication, dated 3 September 1997, the United States had informed the Committee that it required more time to review the proposed modifications and, therefore, the United States could not agree to their taking effect upon the expiration of the 30-day period of review (GPA/W/51/Add.1). The representative of the United States said that her authorities had sought clarifications from the European Community regarding the proposed modifications and, on account of the extensive nature of such modification, their review would take more time. The representative of the European Community said that his delegation would notify to all Parties any modifications to Appendix I that might be warranted as a result of the ongoing consultations with the United States.

¹Subsequently certified on 5 October 1997 (WT/Let/183) and on 23 October 1997 (WT/Let/194).

7) The representative of Hong Kong, China said that it was difficult to ascertain whether the proposed modifications by the European Community, which appeared to involve a major reorganization of its Annex 1 to Appendix I, were substantive. Joined by the representative of Canada, he said that Parties should identify and explain, in their notifications, each proposed modification so as to facilitate the review of such modifications by other Parties. The representative of the Secretariat said that, the Committee had agreed that in future, under the loose-leaf system of Appendices, a Party proposing to make modifications or rectifications would notify them to the Committee by identifying the proposed changes on the relevant replacement pages (c.f. GPA/W/35, paragraph 4 and GPA/M/5, paragraph 20). The operation of the loose-leaf system would thus enable Parties to identify readily the proposed changes and to consider whether they modified the rights and obligations under the Agreement. Parties could also provide a presentation of each proposed modification in the form used hitherto to facilitate their domestic procedural requirements.

8) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

D. Loose-leaf system for Appendices to the Agreement

9) The Chairperson stated that the Secretariat had prepared a draft of the first issue of the loose-leaf system of Appendices which consolidated the rectifications and modifications to the Appendices effective on 29 September 1997. However, the Secretariat would postpone the issue of the loose-leaf system until after the entry into force of the extensive modifications that had been notified by the European Community in document GPA/W/51 (cf. paragraphs 6-7).

10) The Committee took note of the statement and agreed to revert to this agenda item at its next meeting.

E. Notification of national implementing legislation

11) The Chairperson said that, at its meeting of 4 June 1996, the Committee had agreed that Parties would notify national implementing legislation, including responses to the checklist of issues, not later than 31 December 1996 (GPA/1/Add.1). A reminder had been sent to delegations in airgram WTO/AIR/480 of 1 November 1996. As of 29 September, four delegations - Canada, Korea, Norway and Switzerland - had notified their national implementing legislation including their responses to the checklist of issues (GPA/10, GPA/12/Rev.1, GPA/13 and GPA/15).

12) The representatives of Hong Kong China, the European Community and Israel said that the notifications on their implementing legislation would be submitted in the near future.

13) The representative of Norway said that the Committee should postpone its review until more Parties had notified their implementing legislation. The representative of Switzerland said that Parties could, at least, present information

on the most important features of their legislation by responding to the checklist of questions. The representative of Canada said that the Committee should discuss the procedures for the review of implementing legislation on the basis of the note by the Secretariat, dated 6 May 1997, describing the relevant procedures which had been developed by other WTO bodies.

14) The Committee took note of the statements made and agreed to revert to this item at its next meeting.

F. Statistical reporting

15) The Chairperson said that Article XIX:5 of the Agreement called on each Party to collect and provide, annually, statistics on its procurement covered by the Agreement. As of 29 September 1997, Parties had not provided statistics for 1996, the first year of the implementation of the Agreement.

16) The representative of Switzerland said that more statistical data had to be provided under the 1994 Agreement than under the earlier Agreement because of the extension of the coverage of entities. Joined by the representatives of Canada and Norway, he said that the Committee had addressed a proposal for simplification of the provisions on statistical requirements under the three-year review of the Agreement. Notwithstanding the discussion in that context, Parties should comply with the existing requirements and should submit, without any further delay, their statistical data for 1996 and 1997.

17) The Committee took note of the statements made and agreed to revert to this item at its next meeting.

G. Modalities for the three-year review of the Agreement

18) The Committee pursued its informal consultations on the modalities for the three-year review on the basis of an informal checklist of the issues, dated 27 August 1997, and the submissions by the delegations of the European Community (GPA/W/50) and Norway (Job Nos. 5211 and 5212). As a result of these consultations, the Committee agreed that it would hold further informal consultations on the modalities for the review of the Agreement on 5 November 1997. At that meeting, it would have focused discussions on: (i) issues of non-discrimination in connection with information technology; (ii) improvements to the structure and presentation of the Agreement; (iii) discriminatory provisions in the Appendices. Delegations would be urged to submit written proposals concerning these elements. Delegations could raise any other matters relating to the review, including suggestions concerning the best structure for carrying the work forward. The Secretariat would prepare an informal note on types of discriminatory provisions in the Appendices, it being understood that this would be without prejudice to the views of delegations and of the Committee.

H. Accessions

(i) *Liechtenstein*

19) The Chairperson said that Liechtenstein had deposited its instrument of accession on 19 August 1997. The Agreement had entered into force for Liechtenstein on 18 September 1997 (GPA/17 and WT/Let/166).

(ii) Singapore

20) The Chairperson said that Singapore had deposited its instrument of accession on 20 September 1997. The Agreement would enter into force for Singapore on 20 October 1997 (GPA/18 and WT/Let/179).

(iii) Chinese Taipei

21) The representative of Chinese Taipei said that his delegation had held, in the past two years, intensive bilateral consultations with the Parties to the Agreement. Chinese Taipei would continue, in due course, the bilateral consultations on a few sensitive issues that remained outstanding, with a view to its accession to the Agreement.

(iv) Panama

22) The Chairperson said that Panama's request for accession had been circulated on 22 August 1997 (GPA/W/53) and its initial offer on 24 June 1997 (GPA/SPEC/3). The representative of Panama said that his delegations would hold bilateral consultations with Parties to the Agreement. Meanwhile, his delegation appreciated that it could participate as an observer in the formal and informal meetings of the Committee.

23) The representative United States and the European Community, Japan, Korea, Norway and Switzerland welcomed the offer by Panama and said that their delegations would hold bilateral consultations with Panama in the coming months.

I. Newly acceding WTO Members

(i) Bulgaria

24) The Chairperson recalled that, at its last two meetings, the Committee had been informed that Bulgaria had been preparing its offer with a view to initiating negotiations for accession to the Agreement, if possible, by the end of 1997.

(ii) Mongolia

25) At the request of the representative of the European Community, the Committee agreed that the Chairman would write to the delegation of Mongolia, drawing attention to the commitments undertaken by Mongolia in the Working Party on the Accession of Mongolia to the WTO (WT/ACC/MNG/9, paragraph 59 and Protocol, Part I, paragraph 3) and encouraging Mongolia to apply for observer status.

J. Other business

(i) *United States - Measures affecting government procurement*

26) The representative of the Japan said that the legislation enacted by the Commonwealth of Massachusetts regulating State contracts with companies doing business with or in Myanmar affected the rights of more than thirty Japanese affiliated companies in the United States. Japan considered that the measures specified in the legislation were inconsistent with the provisions of the Agreement and that the matter was related to the implementation of the Agreement by the United States in respect of Annex 2 entities. Following Japan's request for consultations with the United States in July 1997, a first round of consultations had been held in July 1997 and a second round was scheduled in the week of 29 September 1997. The representative of the United States said that it would not be appropriate to provide to the Committee details on a matter under consultations under the DSU.

(ii) *Japan - Procurement of a navigation satellite*

27) The representative of the United States said that the European Community had notified that it had found a mutually agreed solution with Japan regarding a procurement tender published by the Ministry of Transport of Japan to purchase a MTSAT Satellite-based System (WT/DS73/4/Rev.1 and GPA//D1/2/Rev.1). Pursuant to Article 3.6 of the DSU, her delegation requested parties to the dispute to provide information on the mutually agreed solution reached in the consultations. Article 3.5 of the DSU provided that all solutions to matters raised shall be consistent with the agreements under which the consultations took place. The representative of Japan said that his authorities had informed Parties of the solution reached directly to their capitals. The representative of the European Community said that the specific solution was under discussion within the European Community.

(iii) *Relationship of the Tokyo Round Agreement to the 1994 Agreement on Government Procurement*

28) The Committee took note that, with the accession of Singapore on 20 October 1997, all signatories to the Tokyo Round Agreement on Government Procurement would have acceded to the 1994 Agreement on Government Procurement and agreed that the Secretariat would prepare a note clarifying the legal and procedural aspects of the supersession provided under Article XXIV:3(c). The representative of the United States recalled that his country had withdrawn from the Tokyo Round Agreement on Government Procurement prior to the entry into force of the 1994 Agreement on Government Procurement.

K. Annual report (1997) to the General Council

29) The Committee adopted its annual report for 1997 to the General Council on the basis of a draft prepared by the Secretariat which was amended in the light of the discussion at the meeting.²

²Subsequently issued in GPA/19.

L. Date of the next meeting

30) The Committee agreed to hold its next meeting on 18 February 1998.

RESTRICTED

GPA/M/6

18 August 1997

WORLD TRADE ORGANIZATION

(97-3419)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 21 MAY 1997

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Modifications to the Appendices to the Agreement
 - B. Loose-leaf system for Appendices to the Agreement
 - C. Notification of national implementing legislation
 - D. Modalities for the three-year review
 - E. Accessions:
 - (i) Hong Kong
 - (ii) Chinese Taipei
 - F. Newly acceding WTO Members
 - (i) Bulgaria
 - (ii) Mongolia
 - (iii) Panama
 - G. Other Business
 - (i) United States - Measures affecting government procurement
 - (ii) Japan - Procurement of a navigation satellite
 - (iii) Procurement of supercomputers by the United States National Science Foundation
 - (iv) Date of next meeting

A. MODIFICATIONS TO THE APPENDICES TO THE AGREEMENT

- 2) The representatives of the European Community¹, Norway², Switzerland³, Korea, Canada and the United States⁴ said that they would propose modifications to their respective Appendices. The relevant notifications would be submitted before 31 May 1997 in order to enable the incorporation of the modifications in the first certified copy of the loose-leaf system of Appendices.⁵
- 3) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

B. LOOSE-LEAF SYSTEM FOR APPENDICES TO THE AGREEMENT

- 4) In response to a request for clarification, the representative of the Secretariat said that in its operation the loose-leaf system would give effect to the rectification and modification procedures under Article XXIV:6(a). It was envisaged that the Party proposing to make modifications or rectifications should notify them to the Committee by identifying the proposed changes on the relevant pages of the loose-leaf system. Certified true copies of the replacement page(s) incorporating the amendments would be circulated once the procedures under Article XXIV:6(a) had been completed (c.f. GPA/W/35, paragraph 4 and GPA/M/5, paragraph 20).
- 5) The representative of Japan sought the Committee's understanding that, under the procedures for the certification of changes to the loose-leaf system of Appendices, certification of amendments to the loose-leaf system relating to Japan's Appendices should incorporate the text that described the proposed amendments as well as the replacement page(s) of the loose-leaf system. This would facilitate the National Diet's approval of substantive modifications to Japan's Appendices, in particular those involving an increase of Japan's obligations under the Agreement.
- 6) The Committee took note of the statements and agreed to revert to this agenda item at its next meeting.

C. NOTIFICATION OF NATIONAL IMPLEMENTING LEGISLATION

¹Subsequently notified in document GPA/W/51

²Subsequently notified in document GPA/W/46

³Subsequently notified in documents GPA/W/42 and 45

⁴Subsequently notified in document GPA/W/41

⁵Postponed from 1 July to 1 October 1997

7) The Chairman said that, at its meeting of 4 June 1996, the Committee had agreed that Parties would notify national implementing legislation, including responses to the checklist of issues, not later than 31 December 1996 (GPA/1/Add.1). A reminder had been sent to delegations in airgram WTO/AIR/480 of 1 November 1996. As of 21 May, three delegations - Canada, Korea and Norway - had notified their national implementing legislation including their responses to the checklist of issues (GPA/10, GPA/12/Rev.1 and GPA/13).⁶

8) The Committee took note of the statements made and agreed to revert to this item at its next meeting and at that time to take up the question of procedures for review of implementing legislation on the basis of the informal note by the Secretariat describing such procedures developed by other WTO bodies, which had been prepared at the Committee's request.

D. MODALITIES FOR THE THREE-YEAR REVIEW

9) The Committee pursued its informal consultations on the modalities for the three-year review on the basis of the non-papers presented by the delegations of the European Community on the three-year review (Job No. 3885) and Canada on information technology (Job No. 3887). As a result of these consultations, it was agreed that: (i) the Chairman would update the informal checklist of issues of 7 March 1997; (ii) prior to its next meeting, the Committee would hold further informal consultations on this item; (iii) in those consultations delegations could come forward with further proposals concerning the elements of the review.

E. ACCESSIONS

(i) Hong Kong

10) The Chairman said that Hong Kong had deposited its instrument of accession on 20 May 1997. Hong Kong would become a Party to the Agreement on 19 June 1997 (GPA/14 and WT/Let/141).

11) The representative of Hong Kong said that Hong Kong would do its best to establish the required bid challenge procedures as soon as possible so that it could fully implement Article XX before the expiry of the transitional period of one year foreseen in the Decision on the Accession of Hong Kong.

12) The representatives of the European Community⁷ and Norway⁸ said the General Notes to their respective Appendices I would be modified to reflect the extension of the Agreement as regards the award of contracts in the electricity sector with respect to the suppliers and service providers in Hong Kong. The representative of Switzerland said that the modifications to Appendix I, Annex 3 of Switzerland would be notified to reflect the extension of benefits to Hong Kong in

⁶Switzerland subsequently notified in document GPA/15

⁷Subsequently notified in document GPA/W/44

⁸Subsequently notified in document GPA/W/43

the electricity sector. The modifications would enter into force after the completion of Switzerland's internal ratification procedures in September 1997.⁹

(ii) *Chinese Taipei*

13) The representative of Chinese Taipei said that, following the bilateral consultations held with Parties to the Agreement, Chinese Taipei had submitted a revised offer in March 1997 (GPA/SPEC/1/Rev.1). His delegation's position on the three major areas of concern raised by Parties in the consultations was as follows: first, his delegation accepted the proposal by one Party concerning General Note 14, that Chinese Taipei acceded to the Agreement within one year after its accession to the WTO. If, however, the national government procurement law was enacted prior to its accession to the WTO, Chinese Taipei would accede to the Agreement within one year after the enactment of the law or at the time it acceded to the WTO, whichever was later. Second, concerning General Note 6, Chinese Taipei would carefully review the requests of three Parties that a certain number of items that were of particular interest to their suppliers should not be excluded from the electricity and transport projects. Third, concerning Note 6 to Annex 3 of Appendix I, Chinese Taipei agreed that, under the circumstances in which a Party's telecommunication sector might be run by the private sector and its procurement was conducted without influence or control from the government, the reciprocity requirement would not apply to that Party. His delegation encouraged those Parties who had not already done so to provide their comments, in writing, as soon as possible.

14) The Committee took note of the statements made under this item.

F. NEWLY ACCEDING WTO MEMBERS

(i) *Bulgaria*

15) The representative of Bulgaria said that his delegation was in the process of preparing its offer with a view to initiating negotiations for accession to the Agreement as early as possible.

(ii) *Mongolia*

16) The Chairman said that the Working Party on the Accession of Mongolia had taken note of a commitment by the representative of Mongolia that his Government would seek observer status in the Committee on Government Procurement at the time of its accession to the WTO with a view to initiating negotiations for membership thereafter (WT/ACC/MNG/9, paragraph 59 and Protocol, Part I, paragraph 3). Mongolia had become a WTO Member on 29 January 1997.

(iii) *Panama*

⁹Communication circulated in document GPA/W/47

17) The Chairman said that the Working Party on the Accession of Panama had taken note of a commitment by the representative of Panama that his Government would notify the Committee on Government Procurement at the time of Panama's accession to the WTO of its intention to accede to the Agreement on Government Procurement, and that Panama would initiate negotiations for membership in the Agreement by tabling an entity offer prior to 30 June 1997.¹⁰ It was also confirmed that, if the results of the negotiations were satisfactory to the interests of Panama and other members of the Agreement, Panama would complete negotiations for membership in the Agreement by 31 December 1997 (WT/ACC/PAN/19, paragraphs 68 and 116 and Protocol, Part I, paragraph 2, dated 26 September 1996).

18) The Committee took note of the statements made.

G. OTHER BUSINESS

(i) United States - Measures affecting government procurement

19) The representative of the European Community said that the European Community remained deeply concerned about the legislation enacted by the Commonwealth of Massachusetts regulating State contracts with companies doing business with or in Myanmar. The European Community remained of the view that this and other similar initiatives taken by Massachusetts as well as by other sub-federal authorities were in breach of the United States obligations and that they resulted in a de facto reduction of the United States offer under the Agreement. The European Community was closely monitoring the action taken by the Government of the United States to address its concerns and, in this respect, the European Community had made informal bilateral contacts with the United States. The European Community looked forward to receiving responses of the United States to the written questions by Japan regarding this issue and reserved all its rights under the WTO agreements with respect to this matter.

20) The representative of the United States said that her delegation had taken seriously the concerns expressed by the European Community with respect to the legislation enacted by the Commonwealth of Massachusetts as well as various other pending State laws. Her authorities had recently held consultations with officials in both Massachusetts and Connecticut. The legislation in Connecticut was not expected to be voted on during this year's legislative session. Her authorities were concerned, however, that various Member States of the European Community had been encouraging State governments in the United States to enact this type of legislation, in particular, with respect to Indonesia.

¹⁰Subsequently circulated in document GPA/SPEC/3

21) The representative of Japan urged the delegation of the United States to explain how the Federal Government of the United States intended to provide a solution concerning the trade-related aspects of this issue and to respond to his delegation's request for information pursuant to Article XIX of the Agreement (GPA/W/39).

(ii) Japan - Procurement of a navigation satellite

22) The representative of the European Community said that the European Community had requested consultations with Japan pursuant to Article XXII:2 of the Agreement and Article 4.4 of the Dispute Settlement Understanding (WT/DS73/1-GPA/D1/1).

(iii) Procurement of supercomputers by the United States National Science Foundation

23) The representative of Japan said that his authorities were concerned about the intervention of the Government of the United States in a recent supercomputer procurement. In March 1995, the University Corporation for Atmospheric Research (UCAR) had released a Request for Proposal (RFP) to 14 vendors to supply supercomputers. The RFP had sought proposals to lease for a period of five years the best possible computing system that could be obtained for a price of approximately US\$35 million. On 17 May 1997, the UCAR had announced that it had selected a certain Japanese company to supply the supercomputers and that it would enter into contract negotiations with that company. The UCAR supercomputer procurement was funded by the National Science Foundation (NSF) which retained the authority to approve or to disapprove any procurement decision made by UCAR. On 20 May 1996 an official of the United States Commerce Department had sent a letter to the NSF warning that the supercomputers of the Japanese company might have been offered to the UCAR at a price below fair value and that the dumping margin was likely to be very high. That letter had also cautioned the NSF that the Commerce Department had significant concerns that the UCAR's proposed purchase would threaten the supercomputer industry in the United States with material injury. In addition, the Commerce Department official had also transmitted to the NSF a Commerce Department Predecisional Memorandum that had indicated that the company's supercomputers were to be leased at less than fair value, with estimated dumping margins ranging from 163 to 280%, depending on the number of computers and the terms of the lease arrangement ultimately reached. As a result of the Commerce Department's action, the UCAR's lease of the Japanese companies' supercomputers had been delayed. On 20 August 1996, the NSF had issued a statement stating that it would be inappropriate for the NSF to approve that procurement until the dumping issue had been resolved. The NSF was covered under the GPA, whereas the UCAR, notwithstanding that it was established and funded by the NSF, was not a covered entity. This meant that procurement by a covered entity was conducted through a non-covered entity in order to circumvent the obligations of the Agreement on non-discrimination. Japan had the intention of seeking information from the United States on this matter pursuant to Article XIX of the Agreement.

24) The representative of the United States said that Japan had raised this issue in the Committee on Anti-Dumping Practices. The procuring entity was not covered by the Agreement and, therefore, the contract in question was not subject to the obligations of the Agreement.

25) The representative of the European Community said that this issue appeared to have a certain similarity to a matter that the European Community had raised with Korea, where the European Community had considered that, the Korean Government, by procuring through a private entity which fell outside the coverage of the Agreement, had violated Article III of GATT 1994 on national treatment.

26) The Committee took note of the above statements.

(iv) Date of next meeting

27) The Committee agreed to hold its next meeting on 29 September 1997.

RESTRICTED

GPA/M/5
11 April 1997

WORLD TRADE ORGANIZATION

(97-1536)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 24 FEBRUARY 1997

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Election of Chairperson
 - B. Applications for observership
 - C. Modifications to Appendix I to the Agreement
 - D. Loose-leaf system of Appendices
 - E. Notification of national implementing legislation
 - F. Accessions:
 - Hong Kong
 - Liechtenstein
 - Chinese Taipei
 - G. Procedures for the circulation and derestriction of documents
 - H. Information technology
 - I. Modalities for the three-year review
 - J. Other business
 - (i) United States• sub-federal legislation on government procurement
 - (ii) Japanese Ministry of Transport procurement of satellite navigation systems
 - (iii) Newly acceding WTO Members

(iv) Dates of future meetings.

A. ELECTION OF CHAIRPERSON

2) The Committee re-elected Mr. Harald Ernst as its Chairman and agreed that, in case the Chairman was absent from any meeting or part thereof, it would elect an interim Chairperson for that meeting or part of that meeting rather than electing a Vice-Chairperson.

B. APPLICATIONS FOR OBSERVERSHIP

3) The Committee agreed to grant observer status to the Governments of Argentina, Bulgaria and Hong Kong pursuant to the decision it had taken on this matter (GPA/1, Annex 1) and in response to the requests received from those countries (GPA/W/30, 37 and 38).

4) The Chairman said that the Committee needed to take action on the requests for observer status which it had received from the European Free Trade Association (EFTA), the Inter-American Development Bank (IADB), the International Monetary Fund (IMF) and the Organization for Economic Co-operation and Development (OECD) (GPA/W/36). The Committee's decision on the participation of observers and the relevant WTO guidelines were contained respectively in documents GPA/1, Annex 1, paragraph 5 and WT/L/161, Annex 3.

5) The Committee, noting that the IMF had been given observer status in the General Council and certain other WTO bodies by virtue of the Agreement between the IMF and the WTO (WT/L/195, Annex I), agreed to grant observer status to the IMF in accordance with the terms of paragraph 6 of that Agreement.

6) The Committee, noting that the OECD had been given observer status in the General Council (WT/GC/M/18), agreed to grant observer status to the OECD on the basis of reciprocity with respect to access to proceedings, documents and other aspects of observer status.

7) The Committee agreed to postpone its consideration of the requests for observer status by the European Free Trade Association (EFTA) and the Inter-American Development Bank (IADB) until after the WTO General Council had taken a decision on the observer status of those organizations.

C. MODIFICATIONS TO APPENDIX I TO THE AGREEMENT

8) The Chairman informed the Committee that, in documents GPA/W/27 and GPA/W/31, dated 4 October 1996 and 5 December 1996 respectively, Japan had notified proposed rectifications to Annex 3 of its Appendix I. Since no objections had been raised within the prescribed time-period, these rectifications had become effective as of 5 November 1996 and as of 4 January 1997, respectively. Certified copies had been distributed in documents WT/Let/119 and 134.

9) The Chairman also informed the Committee that the European Community and the United States had notified modifications to Appendix I consequent on the enlargement of the European Communities on 1 January 1995 to include Austria, Finland and Sweden. The relevant notification had been circulated in document GPA/W/32 of 17 December 1996. Since no objections had been raised, these modifications had become effective on 16 January 1997. Certified copies of the modifications had subsequently been circulated by the Secretariat in WT/Let/135.

10) The representative of the European Community said that certain changes warranted by developments that had taken place in the administrative organization of the governments of some Member States, including the proposed changes to Appendix I of Sweden as circulated in documents GPR/W/133 and GPR/W/139, would be notified before the next meeting of the Committee.

11) The Chairman recalled that the Canadian Schedule offered to cover entities in all ten Provinces on the basis of commitments to be received from Provincial Governments, with a final listing to be provided within 18 months after the conclusion of the Agreement. The representative of Canada said that his delegation's position as outlined in his statements at the last two meetings of the Interim Committee and the meetings of the Committee in 1996 remained unchanged. The representative of the European Community said that his delegation remained concerned that Canada had not, in the view of his delegation, honoured the commitment that it had undertaken under its Annex 2 of Appendix I regarding sub-central levels of government.

12) The representative of Switzerland said that Switzerland and the United States had recently concluded a bilateral agreement which would enable Switzerland to have access to public procurement by thirty-seven States in the United States and the United States to have access to procurement at the cantonal level in Switzerland. Furthermore, Switzerland and the United States would open their procurement markets in the areas of electricity, ports and airports. The agreement was in the process of being approved by the Swiss Parliament.

13) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

D.LOOSE-LEAF SYSTEM FOR THE APPENDICES

14) The Chairman said that the Secretariat had prepared an updated draft set of Appendices, with a view to providing a starting point for the loose-leaf system (GPA/W/35). As agreed by the Committee and as indicated in the cover note to the document, delegations had 60 days from the date of its distribution to review the draft loose-leaf system. Those delegations wishing to make comments on the accuracy and completeness of the consolidation of the Appendices by the Secretariat were invited to do so as soon as possible. The Secretariat would bring such comments to the attention of all other Members of the Committee in corrigenda to GPA/W/35. In the event that any Member of the Committee considered that any such comments could raise points of difference that needed to be resolved in the Committee, the certification of the loose-leaf schedules might be postponed until after the Committee had discussed the matter at its subsequent meeting.

15) The Chairman also said that any further rectifications and modifications to the Appendices could only be incorporated in the first issue of the loose-leaf system if the procedures for notification and certification of such rectifications were to be completed before the expiry of the deadline for comments on the draft circulated by the Secretariat (GPA/W/35). As usual, notifications of any such rectifications and notifications would be circulated in the GPA/W/- series of documents.

16) The representative of the United States said that the notification of the bilateral agreement between Switzerland and the United States could not be submitted before April 1997 (paragraph 12). The first issue of the loose-leaf system should, therefore, be delayed until after the notification and certification of the relevant changes in the schedules of Switzerland and the United States.

17) The representative of the European Community said that the European Community would notify a number of changes to its Annex 1 in the coming months (paragraph 10). The date of issue of the first version of the loose-leaf system should therefore be postponed to 1 July 1997 in order to enable those changes to be incorporated.

18) The representative of Japan said that his authorities would notify certain rectifications relating to Annex 3 entities, so that the relevant changes could be reflected in the first issue of the loose-leaf schedule.

19) In the light of the above comments, the Committee agreed to postpone the date of certification of the first issue of the loose-leaf schedule to 1 July 1997. It also agreed that any amendments to the Appendices that were to be incorporated should be notified before 1 June 1997 in order to allow the approval and certification to be completed by 1 July 1997.

20) The Committee agreed to the procedures suggested in paragraph 4 of the note by the Secretariat (GPA/W/35) with respect to subsequent modifications to the loose-leaf system of schedules.

21) The representative of Japan said that giving the loose-leaf system of Appendices legal effect was under legal scrutiny in his country with a view to establishing that this fell within the administrative responsibility of the executive, given that the Diet had approved the original text of the Agreement with the Appendices. In response to comments from a delegation and from the Chair, he recognized the agreement reached in the Committee on this matter (GPA/M/2, paragraph 31) and that this was essentially an internal issue for his Government. This internal scrutiny would be completed before the first issue of the loose-leaf schedule.

22) The Committee took note of the statements made under this agenda item and agreed that the first certified copy of the loose-leaf system reflect the Appendices as they would stand on 1 July 1997.

E. NOTIFICATION OF NATIONAL IMPLEMENTING LEGISLATION

23) The Chairman said that, at its meeting of 4 June 1996, the Committee had agreed that Parties would notify national implementing legislation, including responses to the

checklist of issues (GPA/1/Add.1), not later than 31 December 1996. A reminder had been sent to delegations in Airgram WTO/AIR/480 of 1 November 1996. As of 24 February, only two delegations - Korea and Norway - had notified their national implementing legislation and responses to the checklist of issues (GPA/10 and GPA/12).

24) The representative of the United States said that her delegation would submit a notification of its national implementing legislation in the near future. She also said that, once a significant number of notifications had been submitted, the Committee could proceed with an examination of the implementing legislation of Parties on the basis of an exchange of written questions and answers. The representative of the European Community supported this suggestion.

25) The representative of Korea said that, notwithstanding that Korea had only been applying the Agreement since 1 January 1997, his delegation had already submitted a notification. Those other Parties who had longer experience with the implementation of the Agreement should not delay the notification of their legislation.

26) The representatives of Canada, the European Community, Israel and Switzerland said that their delegations would submit their respective notifications of implementing legislation in the near future.

27) The representative of Japan said that his authorities were preparing Japan's notification of implementing legislation. Japan had made a notification on the establishment of its independent review body before the entry into force of the Agreement (GPA/IC/W/37).

28) The representative of Norway said that, in her delegation's understanding, interested suppliers from Parties to the Agreement may resort to national bid challenge procedures also in those Parties that had not yet notified their national implementing legislation. The representative of the European Community said that the conformity of a Party's national implementing legislation with the Agreement could be questioned by other Parties even though that Party had not yet notified its implementing legislation.

29) The Committee took note of the statements made under this item. It agreed to revert to this matter at its next meeting on the basis of an informal note by the Secretariat describing the procedures for review of implementing legislation developed by other WTO bodies.

F. ACCESSIONS

- *Hong Kong*

30) The Committee took note of a written statement by Hong Kong on the electricity sector which had been circulated in GPA/11.

31) The representative of Hong Kong said that Hong Kong was in the process of completing the domestic procedures for its accession to the Agreement before the expiry of the validity period of the Committee's Decision (GPA/9). His authorities were currently examining Article XX of the Agreement with a view to establishment of a bid challenge

system in Hong Kong and had the intention of completing the necessary procedures for the application of Article XX fully before the one-year period provided in the Decision expired.

32) In response to a question by the representative of Canada, the representative of Hong Kong said that, while Hong Kong was endeavouring to complete the domestic procedures to ensure that Hong Kong acceded to the Agreement before the end of the validity period of the Decision, for the time being no set date for accession could be given.

- *Liechtenstein*

33) The Chairman said that, in terms of its paragraph 3, the Decision of the Committee of 27 February 1996 on the Accession of Liechtenstein would expire one year after the date of its adoption, i.e. on 27 February 1997, unless it had been extended by mutual consent between the Committee and Liechtenstein (GPA/3). Liechtenstein had recently requested an extension of six months, i.e. until 27 August 1997, for the depositing of its instrument of accession (GPA/W/34).

34) The representative of Liechtenstein said that Liechtenstein was not in a position to deposit its instrument of accession before the expiry of the Decision on Accession of Liechtenstein on 27 February 1997. Parliamentary elections had been held in Liechtenstein in February 1997. The Parliament, once reinstalled, would resume its debate on the new Liechtenstein Act on Public Procurement as well as the accession of Liechtenstein to the Agreement, possibly in next April or May. Following the debate in the Parliament, the people of Liechtenstein would have one month to decide whether to call a referendum. In that event, the completion of internal procedures for the accession of Liechtenstein would be extended by at least another two months. Her delegation, therefore, requested a six-month extension of the time-period for depositing Liechtenstein's instrument of accession.

35) The Committee agreed to extend the period of validity of its Decision on the Accession of Liechtenstein by six months, i.e. until 27 August 1997.

- *Application for accession by Chinese Taipei*

36) The representative of Chinese Taipei said that his delegation had submitted a second revised offer which was aimed at concluding the bilateral consultations held with various Parties in a practical manner (GPA/SPEC/1/Rev.1). In this second revision of its offer, his delegation had tried its best to respond to the requests that interested Parties had made during the past bilaterals. Major areas of progress in the present revision of the offer included a significant reduction of thresholds, the deletion of reservations for the withdrawal of a covered entity from the list of offers after privatization, the reduction of items to be excluded from the coverage of electricity and transportation projects, and the inclusion of the government-owned telecommunication company. It had not been an easy task for his authorities to move this far. They had had numerous and lengthy internal consultations with the various government authorities, procuring entities and interested groups. His delegation sincerely wished that interested Parties could conclude the bilaterals with Chinese Taipei based upon this offer. He asked any interested Party who might wish to provide further comments or specific concerns to do this in a written form and as soon as possible.

37) In addition to the revision of its offer, Chinese Taipei had made significant progress in its government procurement régime. First, as of 1 November 1996, a Government Procurement Gazette had been officially published, after a ten-month trial period, by the Public Construction Commission for publicizing tender and award notices of the procuring entities at all levels. Second, as of 1 January 1997, a transitional dispute settlement mechanism had been established in the Public Construction Commission to hear bid challenges raised by dissatisfied suppliers, and to help the suppliers and the contractors to settle contract disputes by reconciliation. An APEC seminar on bid challenge procedures would be held in Taipei from 31 March to 1 April 1997. Third, a draft Government Procurement law had been approved by the Premier's Office in December 1996, and had subsequently been sent to the legislative body on 23 January 1997. The draft Law was in conformity with the requirements of the Agreement. When it would be enacted, a transitional period of one year would be needed for training and for switching from the current system to the new system. His delegation hoped that the improvements made by Chinese Taipei to its offer would facilitate Parties' support for its accession.

38) The representative of the European Community said that his delegation had held a series of bilateral discussions with the delegation of Chinese Taipei. His delegation would provide its comments to Chinese Taipei when it was ready after examination of the revised offer.

39) The representative of Korea said that his delegation had held bilateral consultations with the delegation of Chinese Taipei but these were not yet concluded. Korea would hold further discussions with Chinese Taipei on the basis of the revised offer.

40) The representative of Switzerland said that his delegation had held bilateral consultations with the delegation of Chinese Taipei in December 1996 and would hold further consultations in February 1997.

41) In response to a question by the representative of Switzerland, the representative of Chinese Taipei confirmed that the thresholds for construction services would be reduced to SDR 5 million after two years.

42) The Committee took note of the statements made under this item.

G.PROCEDURES FOR THE CIRCULATION AND DERESTRICTION OF DOCUMENTS

43) The Committee adopted a decision on procedures on the circulation and derestriction of documents (GPA/1/Add 2) on the basis of a note by the Secretariat on the alignment of the Committee's relevant procedures with those adopted by the General Council for the WTO on 18 July 1996 (GPA/W/33 and WT/L/160/Rev.1). It requested the Secretariat to prepare and circulate a list of documents eligible for consideration for derestriction (GPA/W/39).

44) The Committee also agreed that the procedures on the circulation and derestriction of its documents would apply to those documents of the Interim Committee on Government Procurement that had not yet been derestricted. The Secretariat would also circulate a list of documents of the Interim Committee eligible for consideration for derestriction.

H & I.MODALITIES FOR THE THREE-YEAR REVIEW OF THE AGREEMENT AND INFORMATION TECHNOLOGY

45) The Committee held informal consultations pursuant to the agreement, in its Report to the Ministerial Conference of December 1996, to undertake an early review, starting in 1997 with an examination of modalities, with a view to the implementation of Article XXIV:7(b) and (c) (GPA/8, paragraph 22). In these consultations the Committee also took up item I on Information Technology. As a result of these consultations, it was agreed as follows: (i) the Chairman would draw up an informal checklist of issues that had been raised by Parties during the consultations, for circulation in good time before the Committee's next meeting; (ii) Parties would be invited to submit before the Committee's next meeting papers containing their suggestions concerning the review of the Agreement; (iii) prior to its next meeting, the Committee would hold further informal consultations on this item; (iv) in those consultations delegations could come forward with proposals concerning the issue of information technology, taking into account the Secretariat document circulated in GPA/W/25.

46) With respect to information technology, it was noted that the delegations of Canada, Korea and Norway had provided answers to the Revised Questionnaire on Information Technology circulated in document GPA/W/24 and Addenda 1-3. Other delegations were urged to submit their replies as soon as possible.

J.OTHER BUSINESS

(i) United States• sub-federal legislation on government procurement

47) The representative of the European Community said that the European Community had serious concerns about the legislation enacted on 25 June 1996 by the Commonwealth of Massachusetts Act of June 1996, i.e. the Act regulating State contracts with companies doing business with or in Myanmar. This legislation forbade Massachusetts State agencies, State authorities, the House of Representatives or the State Senate to sign new contracts or to renew existing contracts with companies doing business with or in Myanmar. The European Community was of the opinion that this legislation constituted a breach of the rules of the Agreement on Government Procurement for the following reasons. First, it violated Article VIII(b) of the Agreement, given that it imposed conditions on a tendering company which were not essential to ensure the firm's capability to fulfil the contract. Second, it infringed Article X of the Agreement because it imposed qualification criteria based on political rather than economic considerations. Third, the Act was in contradiction with Article XIII:4, to the extent that the statute provided for the award of contracts to be based on political, instead of economic, considerations.

48) When concluding the Agreement, the United States had accepted to cover the State of Massachusetts under its offer of sub-federal agencies in order to balance the European Community's offer to the United States. By limiting access of European Community suppliers to the procurement of Massachusetts State agencies, State authorities, the House of Representatives or the State Senate in Massachusetts, the United States had reduced its offer under the Agreement. The European Community was also concerned about similar legislation which was currently under consideration by the State of Massachusetts with regard to Indonesia. In addition, the European Community was concerned about similar legislation introduced recently by the State of Connecticut and similar initiatives which had been taken by other sub-federal authorities.

49) The European Community was of the opinion that this type of action reduced the United States offer under the Agreement. The European Community requested the Government of the United States to take the necessary measures in order to safeguard the interests of Community companies who might be affected by such legislation or similar actions. In addition, the European Community wished to be fully and immediately informed on the course of action that the Government of the United States had undertaken or intended to undertake in order to prevent the proliferation of such legislation and to remedy any harm caused to the interest of Community companies. The European Community fully reserved its rights under the WTO dispute settlement procedures. In addition, the European Community continued to examine the compatibility of such legislation with the GATS.

50) The representative of Japan said that the notification of laws and regulations and other administrative measures should extend to providing information on any restrictions on participation of suppliers in procuring procedures or award of contracts at all levels of government and cover such relevant factors as the degree of suppliers' foreign affiliation. Furthermore, Japan believed that central government authorities had the ultimate responsibility for the implementation of the Agreement at sub-central levels of government. In this respect, the Japanese authorities had concerns about certain specific laws and measures by which certain entities of State governments in the United States

conducted their procurement activities. Pursuant to Article XIX, paragraphs 1 and 3 of the Agreement, his authorities planned to request the United States Government to provide information on the relevant laws and measures and to explain their consistency with the relevant provisions of the Agreement.

51) The representative of the United States said that his authorities would be informed of the issues raised.

52) The Committee took note of the statements made.

(ii) Japanese Ministry of Transport procurement of satellite navigation systems

53) The representative of the European Community said that the European Community had serious concerns about the tendering procedures that had been undertaken by the Japanese Ministry of Transport in connection with MSAS, i.e. the global navigation system for air traffic management. In its tender, the Ministry of Transport had published specifications which explicitly requested interoperability with the specifications of the United States system, called the WAAS system, which were known only to the suppliers of that country. The European Global Navigation Satellite System had, therefore, been de facto excluded. The European Community believed that the MSAS procurement procedure was subject to the rules of the Agreement, given that the Ministry of Transport was covered under Japan's Annex 1 to Appendix I. The European Community was of the opinion that Japan had not fulfilled the obligations imposed by the Agreement's rules on technical specifications. Indeed, by publishing specifications with direct reference to the United States system, and thereby effectively excluding European Community suppliers, the Ministry of Transport had violated Article III of the Agreement on non-discrimination and Article VI:2. The latter Article stipulated that technical specifications prescribed by procuring entities should not be based on design or descriptive characteristics, but rather on performance. Furthermore, paragraph Article VI:3 stated that there should be no requirement or reference to a particular trademark, trade name, etc.. In addition, given that the WAAS specifications were not public, the published tender was not in line with the requirements set out in Article XII:2(g), which stipulated that the tender documentation should provide a complete description of the products and services required or of any requirements including technical specifications and conformity certification. The European Community requested that the Japanese authorities take the necessary measures with a view to re-publishing the tender in order to allow Community producers to participate in the tender procedure and that the Japanese authorities take the appropriate steps in order to ensure that, in future, tender specifications would be drafted and published in such a way that interoperability with systems offered by Community suppliers was guaranteed. The European Community fully reserved its rights under the WTO dispute settlement procedures.

54) The representative of Japan said that the Japanese authorities were reviewing the matter in his capital. His remarks should therefore be taken as preliminary ones. The Ministry of Transport - an Annex 1 entity - conducted procurement of satellite navigation systems through open tendering procedures. The contract had been awarded on 7 February 1997 to one of the two domestic suppliers which had submitted tenders. His authorities considered that the tendering process had been undertaken in a manner consistent with all the provisions of the Agreement. The Japanese delegation would be

ready to respond promptly to any additional questions of a legal or technical nature from any interested Party.

55) The Committee took note of the statements.

(iii) Newly acceding WTO Members

56) The Chairman said that the report of the Working Party on Accession of Bulgaria included a commitment by Bulgaria that, upon accession, it would notify the Committee on Government Procurement of its intention to accede to the Agreement on Government Procurement and seek observer status. It further confirmed that Bulgaria would initiate negotiations for membership in the Agreement by tabling an entity offer prior to 30 June 1997 and that, if the results of the negotiations were satisfactory to the interests of Bulgaria and the other Parties to the Agreement, Bulgaria would complete negotiations for membership in the Agreement by 31 December 1997 (WT/ACC/BGR/5, paragraph 80).

57) The representative of Bulgaria said that his authorities intended to initiate negotiations for accession to the Agreement, if possible, by the end of 1997. The Bulgarian Parliament had adopted a national law on government procurement on 16 January 1997, a translation of which would be communicated to the WTO Secretariat.

58) The Committee took note of the statements made.

(iv) Dates of the next meetings of the Committee on Government Procurement

59) The Committee agreed to schedule its next two meetings, tentatively, on 23 May and 29 September 1997, on the understanding that these dates might be modified in the light of developments in other WTO bodies• work on government procurement matters.

RESTRICTED

GPA/M/4
7 January 1997

WORLD TRADE ORGANIZATION

(97-0014)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 5 DECEMBER 1996

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Accession by Hong Kong
 - B. Other business

A. ACCESSION BY HONG KONG

2) The Chairman recalled that, in a communication dated 31 October 1996 and circulated in document GPA/W/28 and Corr.1, Hong Kong had applied for accession to the Agreement. Attached to this communication were an offer from the Government of Hong Kong for Appendix I and lists of relevant publications for Appendices II to IV.

3) The representative of Hong Kong said that Hong Kong had always been a staunch supporter of the multilateral trading system and the fundamental GATT principles of most-favoured-nation and national treatment. He recalled that, as a Party to the Tokyo Round Agreement on Government Procurement, Hong Kong had participated actively in the negotiations on the WTO Government Procurement Agreement. It had been with considerable regret that Hong Kong had not been able to sign the new Agreement due to its continued difficulty with the discriminatory elements introduced by many participants at the concluding stage of the negotiations. Though not a Party to the new Agreement, Hong Kong continued to maintain its open and transparent government procurement system. In bilateral contacts earlier this year with Parties to the new Agreement, Hong Kong's continuing concerns about the derogations from the non-discriminatory provisions of the Agreement had been acknowledged. For those discriminations specifically directed against it, Hong Kong had received assurances that they could be removed. In respect of those discriminatory provisions of a general nature, Hong Kong understood that the Committee had adopted a decision to conduct an early review in 1997 of the Agreement under Article XXIV, paragraph 7(b) and (c) of the Agreement, with a view to, among other things, eliminating the

discriminatory measures and practices in the Agreement. Hong Kong therefore considered that the time was ripe for it to re-engage in the new Agreement. It was on this basis that Hong Kong had expressed formally in October this year its interest in acceding to the new Agreement. Hong Kong had also submitted its terms of accession on the basis of its final offer which had been accepted by all Parties at the conclusion of the negotiation of the new Agreement. His delegation was pleased that, after several rounds of bilateral negotiations with all Parties to the Agreement, a draft decision on the terms of accession for Hong Kong had been worked out for the Committee's consideration. He expressed his delegation's gratefulness to all Parties concerned for their positive efforts which had enabled the bilateral consultations to be concluded within such a short period of time.

4) Specifically, during the bilateral negotiations, after having received assurance from Hong Kong that the Hong Kong Government neither held any interest in the electricity companies in Hong Kong nor sought to influence their procurement policy, the European Community, Norway and Switzerland had agreed to remove the discrimination against Hong Kong in the electricity sector. This, as Hong Kong understood it, would be followed up by formal notifications from all Parties concerned once the Committee had adopted the terms of accession. This was certainly a welcome move and addressed part of Hong Kong's serious concerns about the derogations from the non-discrimination provisions.

5) Separately, during the bilateral discussions, Hong Kong had also explained the need for it to delay application of most of the provisions of Article XX for a maximum period of one year in order to enable it to set up the required bid challenge procedures to cover all entities covered by the Agreement. His delegation was grateful for the understanding and flexibility on the part of all Members of the Committee. It was his delegation's intention to try its best to establish the necessary procedures as soon as possible so that Hong Kong could apply Article XX in full before the one-year period expired. Similarly, Hong Kong would do its best to complete the domestic procedures so that, if the Committee were to adopt the terms of accession, Hong Kong could accede to the Agreement before the validity period of the Committee decision expired. Hong Kong very much looked forward to participating constructively in the early review of the Agreement which it believed would contribute not only to the elimination of the derogations from the non-discrimination provisions but also to further liberalization in the area of government procurement.

6) The representatives of Canada, the European Community, Japan, Korea, Norway, Switzerland and the United States supported Hong Kong's request for accession to the Agreement. They said that accession of a new Party to the Agreement was a significant move towards further liberalization of public procurement markets. Hong Kong's accession before the Singapore Ministerial Conference would also send a welcome message to the WTO Members on the importance of government procurement for the multilateral trading system.

7) The representative of the United States said that, while recognizing the importance of the overall package offered by Hong Kong in its accession, his delegation was disappointed with the coverage of services in Hong Kong's Appendix I, Annex 4. He hoped that the early review of the Agreement could

achieve a uniformly high level of coverage of services by all Parties. Meanwhile, the reciprocity provisions included in some Parties' Schedules with respect to the coverage of services remained necessary and relevant. The representative of Canada said that his delegation shared the concerns regarding the coverage of services in Hong Kong's offer. Canada's Appendix I, General Notes, contained a reciprocity provision on services. Hopefully, the Committee would come up with a mutually agreed list of services in its early review of the Agreement, to be initiated next year. The representative of Hong Kong said that his delegation looked forward to participating in an early review which would address, among others, the extension of the coverage of services under the Agreement.

8) The representatives of Switzerland and the United States said that their delegations recognized that the legislative process necessary for the establishment of a credible bid challenge system in Hong Kong warranted a transition period of one year. Pending the implementation of the bid challenge system, they understood that a number of existing independent fora were available to review any complaints of unsatisfied suppliers regarding a decision. The representative of Norway said that her delegation felt confident that Hong Kong would make all possible endeavours to implement the provisions of paragraphs 2-8 of Article XX regarding challenge procedures as soon as possible, and no later than one year after the entry into force of the Agreement for Hong Kong. The representative of Hong Kong said that, during the transition period, his delegation would keep the Committee informed of the progress made in the establishment of a bid challenge mechanism consistent with Article XX.

9) The representative of Switzerland said that her delegation had understood from Hong Kong's explanation of the scheme governing the two private electricity companies that their procurement was not subject to government control. Hong Kong had taken a bilateral commitment towards Switzerland to ensure that these companies procured in a non-discriminatory way. Switzerland would, therefore, delete the reference to suppliers from Hong Kong in its General Note No. 1 relating to the electricity sector. Switzerland would subsequently submit a formal notification in this respect. The representative of Norway said that her delegation had expressed some concerns in the bilateral consultations regarding the two electrical utility companies operating in Hong Kong. It was her delegation's understanding that Hong Kong would forward a letter to the Chairman containing a unilateral commitment from Hong Kong, including *inter alia* a so-called 'self-denial clause', with respect to these two companies. In turn, Norway undertook to extend the Agreement to the suppliers and service providers of Hong Kong in the electricity sector under the conditions laid down in Appendix I, Annex 3 of Norway. Accordingly, Norway would remove Hong Kong from paragraph 1 (1) of the General Notes to Norway's Schedule. A notification to this effect would be made in due course. The representative of the European Community said that his delegation would notify the deletion of the reference to Hong Kong in the General Note 1, indent point (b), in the Schedule of the European Community. In this connection, the representative of Hong Kong confirmed that the self-denial commitments made by Hong Kong as a result of its bilateral negotiations with some Parties would be applied on a non-discriminatory basis.

10) The representatives of the European Community and Switzerland said that their Governments intended to withdraw from the Tokyo Round Agreement.

11) The Committee adopted a decision on the accession of Hong Kong (document GPA/9) and invited Hong Kong to accede to the Agreement on Government Procurement on the terms attached to that Decision.

12) The Committee agreed to amend the Committee's report to the Ministerial Conference to reflect Hong Kong's accession (GPA/8/Add.1). The Committee also agreed that, in the event that Hong Kong were not already a Member, it would be invited to the next meeting of the Committee as an observer.

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 20 SEPTEMBER 1996

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Modifications to Appendix I of the Agreement
 - B. Accession negotiations
 - C. Establishment of a loose-leaf system for the Appendices of the Agreement
 - D. Information technology
 - E. Transparency of notices
 - F. Notification of thresholds in national currencies
 - G. Procedures for the circulation and derestriction of documents
 - H. Annual Report (1996) of the Committee to the General Council
 - I. Other business

A. MODIFICATIONS TO APPENDIX I OF THE AGREEMENT

2) The Chairman informed the Committee that, in documents GPA/W/22 and GPA/W/23, dated 17 July 1996, Norway and the United States had notified the proposed modifications to Appendix I of the Agreement which followed on from the agreement reached between these two Parties. Since no objections had been received within the prescribed time-period, these modifications had become effective on 17 August 1996. Certification of these modifications had been subsequently circulated in document WT/Let/105.

3) The representative of the European Community said that modifications to the Appendices in relation to the consequences of the accession of the three new

Member States to the European Community would be notified within the next few weeks. Certain changes warranted by developments that had taken place in the administrative organization of the governments of some Member States, including the proposed changes to Appendix I of Sweden as circulated in documents GPR/W/133 and GPR/W/139, would be notified subsequently.

4) The representative of the United States said that the deletion of the three European Community Member States from the General Note 5 to Appendix I of the United States would be notified shortly in coordination with the notification of the European Community.

5) The Chairman also recalled that the Canadian Schedule offered to cover entities in all ten provinces on the basis of commitments to be received from Provincial Governments, with a final listing to be provided within 18 months after the conclusion of the new Agreement. The representative of Canada said that his delegation's position as outlined in his statement at the last two meetings of the Interim Committee of last year remained unchanged.

6) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

B. ACCESSION NEGOTIATIONS

- *Chinese Taipei*

7) The Chairman recalled that, at the last meeting, the delegation of Chinese Taipei had informed the Committee that it was conducting bilateral consultations on the basis of its revised offer circulated in document GPA/SPEC/1. At that meeting, the Committee had agreed to revert to this issue at its next meeting and, in view of the wish of the delegation of Chinese Taipei to conclude the process of bilateral consultations in the latter part of 1996, had urged delegations to pursue their bilateral negotiations with the delegation of Chinese Taipei.

8) The representative of Chinese Taipei said that, following the bilateral consultations that had been held with Parties to the Agreement since last June, the offer of Chinese Taipei contained in GPA/SPEC/1 dated 1 March 1996 would be improved as follows: Annex 1 would include the Ministry of National Defense where an exhaustive list of goods would apply; the threshold for construction services for the entities in Annex 1 would be lowered from SDR 15,000,000 to SDR 5,000,000; the Taiwan Railway Administration would be included in Annex 3; the services items of CPC 841- (consultancy services related to the installation of computer hardware), CPC 842- (software implementation services), and CPC 844- (database services) would be added to Annex 4; and the respective Notes to Annexes 1 to 5 as well as to the General Notes would be improved further to reflect the concerns of interested Parties. His delegation's intention was to complete the bilateral negotiations as soon as possible and it therefore hoped that interested parties would provide their comments on the revised offer at the earliest date so as to facilitate the process of accession to the Agreement. He also said that experts

responsible for Chinese Taipei's accession were currently participating in the final review of the draft Law on Government Procurement at the Premier's office.

9) The representative of Korea said that, while bilateral agreement had not yet been reached with Chinese Taipei, his delegation welcomed the indication by Chinese Taipei that it could improve the coverage of its offer.

10) The Committee took note of the statements made and agreed to revert to this issue at its next meeting.

- *Singapore*

11) The Chairman recalled that, as agreed at the last meeting, the Secretariat had drawn up and circulated on 20 June 1996 a draft Decision on Accession, to which were attached the terms of its accession submitted by Singapore on 14 June 1996, for consideration and adoption by the Committee (GPA/W/21). This Decision would have been considered adopted if no objections or requests for extension of the time-limit would have been received from Parties within 30 days of the date of the issue of the document, i.e. by 20 July 1996. On 19 July 1996 the Secretariat had been informed by some Parties that they would wish to have additional time for consideration of the Decision before its adoption (GPA/W/21/Add.1). In a communication dated 13 August 1996, the delegation of Singapore had submitted a revised offer which included an undertaking to review its current compulsory registration system (GPA/SPEC/2/Rev.1).

12) The representative of Singapore said that, following the submission of its initial offer on 7 December 1995, Singapore had held four rounds of bilateral negotiations with the Parties to the Agreement in February, June, August and September 1996. In its final offer of 15 August 1996 Singapore had taken into account the concerns of Parties to the Agreement (GPA/SPEC/2/Rev.1). The offer represented a substantial access to government procurement opportunities available in Singapore. It would subject 46 per cent of Singapore's total government procurement, in value terms, to the disciplines of the Agreement. For the calendar year 1995, the total amount of procurement by the Government of Singapore was S\$18.4 billion, of which S\$8.4 billion, equivalent to 8.1 per cent of Singapore's gross domestic product in 1995, would be covered under the Agreement. The offer under Annex 1 to Appendix I was extended comprehensively to all 23 central-government entities including all ministries and organs of State. Annex 3 covered all the 25 major statutory boards, thus subjecting 56 per cent of their total procurement, in value terms, to the disciplines of the Agreement. Singapore's services offer under Annex 4 was equivalent to its GATS commitments. The comprehensive offer under Annex 5 included all categories of construction services. The threshold levels applicable under the relevant Annexes were in line with those applied by the majority of the Parties to the Agreement. In addition, in a General Note to Appendix I Singapore had undertaken to review the current compulsory requirement for registration of firms in order to address the concerns expressed by Parties. The Singapore Government adopted the fundamental principles of fairness, openness and competitiveness for its government procurement system. The current registration system was non-discriminatory and fulfilled the national treatment requirement under the Agreement. Its objective was to facilitate the

qualification process and, being a fair system, it ensured the application of the same objective criteria in the qualification of suppliers. Through this system procuring entities kept a pool of information on each registered firm which reduced the time required to examine the qualification of a firm during tender evaluation. The registered suppliers also benefited from this system as they did not need to provide repeatedly the same information each time they participated in a public tender. The undertaking in the General Note would give Singapore time to fine-tune certain aspects of this system in order to address any misperception or uncertainty that certain Parties may have with the existing system. This General Note in no way detracted or reduced the very substantial scope of Singapore's offer and Singapore's commitments under the Agreement.

13) The representatives of Canada, the European Community, Israel, Japan, Korea, Norway, Switzerland and the United States supported Singapore's request to accede to the Agreement. They said that Singapore's accession would not only enable access to an important economy but was also a sign of interest in the existing WTO procurement regime in a dynamic part of the world economy. This was a welcome development towards extending the membership of the Agreement and for the WTO system in general before the Singapore Ministerial Conference.

14) The representative of Norway said that the General Note in Appendix I had alleviated Norway's concerns relating to the compulsory registration system. Her delegation hoped that Singapore would proceed with an early review of this system within the three-year period.

15) The representative of the European Community said that, although Singapore had made a good offer which had responded to most of its concerns, the European Community would make a modification in the General Notes and derogations from the provisions of Article III under its Appendix I which would reflect the exclusion of the electric sector in Singapore's offer. The representative of Norway said that her delegation would make modifications similar to those of the European Community in its Appendix I. The representative of Switzerland said that her delegation may also make certain modifications in its Appendix I.

16) The Committee adopted a decision on the accession of Singapore (document GPA/6), and invited Singapore to accede to the Agreement on Government Procurement on the terms attached to that Decision.

17) The representative of Singapore thanked the Committee for the adoption of the Decision on Singapore's Accession at the present meeting. It was important for all parties concerned that Singapore's accession took place before the WTO Ministerial Conference. Its accession, completed in a record period of nine months, was the result of hard work and commitment from Singapore's side and goodwill from all Parties to the Agreement. Singapore's prompt accession would create a good precedent for future accessions to the Agreement. The challenge before the Committee was to make the Agreement more attractive for non-Parties. Her delegation would work closely with other Parties towards the objective of achieving a wider membership of the Agreement and the multilateralization of the Agreement in the longer term.

- *Kingdom of the Netherlands with respect to Aruba*

18) The Chairman recalled that the Committee's Decision of 27 February 1996 on the Accession of the Kingdom of the Netherlands with respect to Aruba stated that the Decision would expire six months after the date of its adoption, i.e. on 27 August 1996, unless it was extended by mutual consent between the Committee and the Kingdom of the Netherlands with respect to Aruba (GPA/2, paragraph 3). On 23 August 1996 the Kingdom of the Netherlands with respect to Aruba had requested an extension of the deadline for depositing its instrument of accession (GPA/W/26).

19) The representative of the Netherlands with respect to Aruba said that the domestic legislative process in Aruba had been completed and that the instrument of accession would be deposited in the near future.

20) The Committee took note of this statement and agreed to extend the deadline for the deposit of the instrument of accession of the Kingdom of the Netherlands with respect to Aruba until the end of October 1996.¹

C. ESTABLISHMENT OF A LOOSE-LEAF SYSTEM FOR THE APPENDICES TO THE AGREEMENT

21) The Chairman recalled that, at the last meeting, the Committee had agreed to establish a loose-leaf system with legal effect to periodically update the Appendices to the Agreement and had asked the Secretariat to produce and distribute an updated set of Appendices, with a view to providing a starting point for the loose-leaf system. He drew attention to the modifications that the European Community intended to make to their Schedules in relation to the consequences of the accession of Austria, Finland and Sweden (GPA/M/2, paragraph 10 and item A of the present agenda). As the consequential changes, necessary to reflect the present membership of the European Community, would require a major reorganization of the Appendices as they presently stood, the Secretariat had suggested to postpone the circulation of the draft loose-leaf system until after the notification and acceptance of the relevant modifications. Once the necessary modifications from the European Community were submitted and approved, the Secretariat, as agreed at the last meeting of the Committee, would produce and distribute an updated set of Appendices to the Agreement including accepted rectifications and modifications that had been made to the originally negotiated Appendices since the signature of the Agreement, with a view to providing a starting point for the loose-leaf system. As agreed, a period of sixty days from the date of distribution of the draft of the consolidated set of Appendices would be given for delegations to review whether the agreed changes had been correctly reflected.

¹The Kingdom of the Netherlands with respect to Aruba subsequently deposited its instrument of accession on 25 September 1996 (WT/Let/111 and GPA/7).

22) The Chairman also said that, at its June meeting, the Committee had noted that the Secretariat was exploring ways to publish the Agreement, including the loose-leaf system, on the Internet and it had been suggested that the Secretariat produce in due course a note which would outline the modalities of access to these and other GPA documents through the Internet. A documentation dissemination facility through which WTO Members could obtain most WTO documents through the Internet had now become operational and document WT/L/174 contained a note on how this operated. This system did not, as yet, extend to documents with special distributions, including the GPA documents. However, it was the intention to include such documents as soon as possible and the Committee would be informed when this had been done.

23) As for the question of making unrestricted documentation available to the public at large, the Chairman said that the General Council had agreed on 18 July 1996 that the Secretariat would make available on on-line computer network the material which was accessible to the public, including derestricted documents (WT/GC/M/13, item 9(c) and WT/L/162). This would be done through the WTO Home Page on the Internet² which was already operational. Certain unrestricted documentation would be made accessible in this way in the coming weeks and this would be progressively extended in the months ahead. Furthermore, the Secretariat had the intention to establish a special site on government procurement on the WTO Home Page which would contain information relevant to the Agreement on Government Procurement and through which interested parties would be able to access relevant documentation more easily. The Secretariat would provide a note on these matters once more detailed information was available.

24) The representative of the European Community said that the site on government procurement in the WTO Home Page could establish a system of hyperlinks on the Internet to other home pages related to government procurement existing in various Parties, for example to the United States procurement jump station.

25) Members of the Committee expressed views on whether the hard-copy version of the loose-leaf system would still be necessary once the electronic version became available and, in particular, whether it could fulfil the legal requirements under the Agreement. In response, the representative of the Secretariat recalled the modalities for the operation of the loose-leaf system as set out in document GPA/W/3 on a Possible Loose-leaf System for Periodically Updating the Appendices. He also said that WTO documents would continue to be circulated in hard copy form as well as made available in electronic form through the Document Dissemination Facility (DDF) until such time a decision to the contrary was taken by Members.

26) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

²<http://www.wto.org/>

D. INFORMATION TECHNOLOGY

27) The Chairman recalled that, at its June meeting, the Committee had continued its discussion on the issue of the implications of the development of information technology for the Agreement. On the basis of the options identified in a note by the Secretariat (GPA/W/15) for carrying forward work in this area, it had requested the Secretariat to prepare a revision of the questionnaire on information technology as proposed in document GPA/W/15 and a factual note on the aspects of the Agreement that it had been suggested might need to be re-examined in the light of information technology. The revised questionnaire was circulated in document GPA/W/24 and the factual note in document GPA/W/25. At the June meeting, the Committee had also noted that the European Community, in coordination with Norway and with the assistance of the Secretariat, would prepare a paper identifying the technical issues relating to information technology that might need to be examined by experts and that the delegation of the United States would provide information on the pilot project launched in the APEC framework on access to national databases (GPA/M/2, paragraphs 44 and 45).

28) The representative of the European Community said that his delegation was preparing a draft note identifying the technical issues relating to information technology.

29) The representative of the United States described what had been accomplished in the APEC context on access to national databases. Building from a cooperative effort associated with a demonstration project undertaken by the United States Department of Commerce for the 1995 APEC Ministerial in Osaka, the APEC Secretariat had fashioned an Internet Home Page on government procurement opportunities which served as a gateway to sources of information on procurement opportunities within the member economies or provided an actual linkage to member economies' procurement information Internet sites. In 1995, the United States Department of Commerce undertook to gather specific information from APEC member economies on contact points for information on government procurement opportunities - either names and addresses of appropriate agencies or Internet addresses where further information could be accessed. Using Internet software to create a homepage to serve as an Internet gateway to this information, Department of Commerce officials had established the site at the Department of Commerce for temporary use as a demonstration project as to its feasibility for the APEC Ministerial in Osaka. Building on the information gathered for this cooperative effort, the APEC Secretariat had since developed its own procurement homepage with identical functions which could be accessed directly or more conveniently through the APEC Home Page on the Internet (<http://www.apecsec.org.sg/gphome.html>). The quality and timeliness of the information on opportunities available from the member economies depended entirely on the efficiency with which the economies maintained their own information sites which could be accessed via the APEC homepage gateway. The main advantage of the APEC site was that it provided a useful starting point to seeking out information from numerous economies and procurement regimes.

30) The representative of Canada said the note by the Secretariat on the provisions of the Agreement which might need to be re-examined in the light of information technology (GPA/W/25) made it clear that the wording of the relevant provisions of the Agreement had been carried over from the Tokyo Round Agreement and its 1988 Revision and predated the introduction of the use of information technology in procurement. The paper pointed out the work that had to be done and gave a focused view of how quickly changes might take place in this area. At an early opportunity the Parties should make the necessary modifications to ensure that the Agreement would evolve with the field for which it set down rights and obligations.

31) The representative of the United States said that his delegation was undertaking a comprehensive review of the issues related to information technology and the Government Procurement Agreement. In so doing, it would attempt to develop approaches that reflected the balance of interest, which had sometimes been perceived as competing, of ensuring and enhancing access while permitting the accommodation of new technologies. The Agreement would require amendments to fully address the issue of information technology. Future negotiations under Article XXIV:7(b) should give priority to this issue.

32) The representative of Japan said that the note by the Secretariat on information technology made it clear that the existing Agreement had been drafted without information technology used in procurement procedures in mind. His delegation was prepared to discuss the matter in the Committee under the terms of Article XXIV:8 and, if necessary, to negotiate the necessary amendments to the Agreement in the framework of the review under Article XXIV:7(b). Such discussion should aim to establish disciplines which would allow suppliers to choose between the use of the procedures stipulated in the current Agreement and procedures based on electronic communications. From the viewpoint of ensuring consistency with the principles of national treatment and non-discrimination, the Committee should also pay attention to such issues as the treatment of foreign suppliers in the procedures based on electronic communications, the treatment of suppliers who utilize communication systems which differ from the procuring entities, and the treatment of suppliers who use electronic procedures in their procurements by entities which do not choose to utilize electronic procedures.

33) The Committee took note of the statements made agreed to revert to this item at its next meeting.

E. TRANSPARENCY OF NOTICES

34) The Chairman recalled that, in the context of endorsing the Interim Committee's recommendation that the rules of origin used for the purposes of statistical reporting in Article XIX:5 of the Agreement should be the same as those applied under Article IV, those used in the normal course of trade, the delegation of the European Community had suggested that there was merit in examining ways to establish a link between statistical information and the degree of transparency of tender notices as an effective way of monitoring the operation of the Agreement. At its last meeting, the Committee had agreed, at the request of the delegation of the European Community, to revert to this issue.

35) The representative of the European Community said that his point could be taken up as part of the future review under Article XXIV:7(b).

36) The Committee took note of this statement.

F. NOTIFICATION OF THRESHOLDS IN NATIONAL CURRENCIES

37) The Committee took note that, pursuant to its Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3) of 27 February 1996, notifications had been received from all Parties on the thresholds for the period 1996-1997 in their respective national currencies and circulated in documents GPA/W/12 and Addenda 1 to 6.

38) The representative of Switzerland said that the threshold figures for Switzerland would be valid only from 1 January 1997 as they had to be implemented through the national legislation at the central and sub-central level.

G. PROCEDURES ON THE CIRCULATION AND DERESTRICTION OF DOCUMENTS

39) The Chairman recalled that the Committee took, on 27 February 1996, two Decisions on the circulation and the derestriction of documents, respectively. These decisions were taken on an interim basis, with the understanding that they would be examined in the light of definitive measures to be adopted by the General Council (GPA/M/1, paragraph 3 and GPA/1). At its meeting on 18 July 1996, the General Council had adopted a Decision on procedures for the circulation and derestriction of WTO documents (WTO/L/160/Rev.1). In accordance with its footnote 1, a copy of this Decision had been transmitted to the Committee on Government Procurement for its consideration and appropriate action.

40) The representative of the United States, supported by the representatives of the European Community, Canada and Switzerland said that the Committee should align its procedures for circulation and derestriction of documents to those adopted for WTO documents by the General Council.

41) The Committee agreed to align its procedures with those adopted by the General Council for the WTO on 18 July 1996 and requested the Secretariat to produce a draft to this effect for examination by the Committee at its next meeting.

H. ANNUAL REPORT (1996) OF THE COMMITTEE TO THE GENERAL COUNCIL

42) The Committee considered a draft annual report to the General Council which had been circulated by the Secretariat on 23 July 1996. After discussion, the Committee adopted Sections I to III of the draft annual report as amended in the light of the discussion. The Committee also agreed that a text on Section IV of the Report on issues to be brought to the attention of the Singapore Ministerial Conference would be deemed to be adopted by the Committee if no comments were received from Parties within 20 days after its circulation, i.e. by 14 October 1996. In that case, the Report (GPA/-) would then be submitted to the General Council, incorporating any developments in the interval, of a purely factual nature, notably in regard to deposit of instruments of accession.

I. OTHER BUSINESS

-Date of the next meeting of the Committee

43) It is proposed that the next meeting of the Committee be held on 24 February 1997.

RESTRICTED

GPA/M/2
23 July 1996

WORLD TRADE ORGANIZATION

(96-2821)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 4 JUNE 1996

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Requests for observer status
 - B. Procedures for notifying national implementing legislation
 - C. Modifications of Appendix I to the Agreement
 - D. Accession negotiations
 - E. Establishment of a loose-leaf system for the Appendices of the Agreement
 - F. Information technology
 - G. Uniform classification systems
 - H. Transparency of notices
 - I. Requirements stemming from the inclusion of the Agreement in Annex 4 of the WTO Agreement
 - J. Preparation for the Singapore Ministerial
 - K. Notification of thresholds in national currencies
 - L. Other business
- A. REQUESTS FOR OBSERVER STATUS

2) The Chairman informed the Committee that, for reasons of transparency, he had sent a letter to the Chairman of the General Council transmitting, for the information of all Members of the WTO, the procedural decisions taken by the Committee at its first

meeting on 27 February 1996 concerning possibilities for the Members of the WTO not Parties to the new Agreement on Government Procurement to participate as observers in the Committee, to receive Committee documents and to accede to the new Agreement. The letter including its attachments had been issued as a General Council document (WT/L/146).

3) The Committee agreed to grant observer status to the Governments of Turkey, Latvia and Australia.

4) The representative of Turkey said, taking into account the contribution of plurilateral trade agreements to the global trading system, Turkey wished to participate as observer in the Committee.

5) The representative of Latvia said that his country was in the process of acceding to the WTO and, as part of its general exercise in foreign trade liberalization, attached great importance to the adoption of internationally accepted rules on government procurement. A new law on government procurement, drafted in compliance with the requirements of the Agreement, had been submitted for the approval of the Parliament. Taking into account the scarce human resources allocated to trade policy matters, Latvia could begin negotiations on accession to the Agreement only after it had completed the procedures of accession to the WTO. Meanwhile, Latvia's participation as observer in the work of the Committee would greatly facilitate the preparations for the negotiations on accession to the Agreement.

B. PROCEDURES FOR NOTIFYING NATIONAL IMPLEMENTING LEGISLATION

6) The Chairman recalled that, in response to a request of the Committee at its meeting of 27 February 1996, the Secretariat had drawn up and circulated draft procedures for the notification of national implementing legislation in an informal note dated 7 May 1996. Draft procedures were based on the discussion in the Committee at its first meeting on 27 February 1996 and on the checklist of issues that had been presented in an informal paper dated 16 February 1996.

7) The Committee adopted the Procedures for the Notification of National Implementing Legislation, as amended in the light of the comments made by the representatives of the United States, Korea, the European Communities and Canada.¹ It agreed that notifications including responses to the checklist of issues should be made as soon as possible but not later than 31 December 1996.

C. MODIFICATIONS OF APPENDIX I TO THE AGREEMENT

8) The representatives of Norway and the United States informed the Committee that Norway and the United States had agreed to mutually extend their present coverage under the Agreement to sub-central entities as well as to the electricity sector and to harbours. The coverage under the Agreement between Norway and the United States would be similar to the reciprocal coverage between the European Community and the

¹Subsequently circulated in document GPA/1/Add.1

United States. The amendments to the relevant annexes would be notified in due course.

9) The representative of the European Communities said that the European Communities had held discussions with Israel on the reciprocal extension of the coverage of the Agreement. Notification of amendments to the relevant annexes would be made in due course.

10) Reiterating his statement made at the meeting of 27 February 1996, the representative of the European Communities confirmed that the European Communities intended to make two modifications to their Schedules: modifications relating to the consequences of the accession of the three new Member States to the European Community; and certain changes warranted by developments that had taken place in the internal organization of the governments of some Member States, including the proposed changes to Appendix I of Sweden as circulated in documents GPR/W/133 and GPR/W/139.

11) Reiterating his statement made at the meeting of the Committee of 27 February 1996, the representative of the United States confirmed that the deletion of the three EC Member States from its General Note 5 would be notified at the appropriate time.

12) The Chairman also recalled that the Canadian Schedule offered to cover entities in all ten provinces on the basis of commitments to be received from Provincial Governments, with a final listing to be provided within 18 months after the conclusion of the new Agreement.

13) The representative of Canada reiterated that his delegation's position as outlined in his statements at the October and December 1995 meetings of the Interim Committee and the February 1996 meeting of the Committee had remained unchanged.

14) The representative of the European Communities once again stressed the need for Canada to honour the commitments it had undertaken by signing the Agreement in Marrakesh. He expressed the disappointment of his delegation that Canada had not been able to come up with a final listing of entities in all ten provinces or to announce a date by which such a list could be provided.

15) The Committee took note of the statements made and agreed to revert to this agenda item at its next meeting.

D. ACCESSION NEGOTIATIONS

- *Application for accession by Chinese Taipei*

16) The representative of Chinese Taipei said that its offer had been revised to reflect the improvements made in the light of bilateral consultations held in February (GPA/SPEC/1). Since then they had coordinated with their government agencies on the remaining issues. They were conducting further bilateral consultations which they hoped would narrow down the list of few pending issues and would lead to the conclusion of the negotiations in the latter part of this year. He also informed the Committee that the Premier's Office was currently reviewing a draft law on government procurement, drawn up in conformity with the principles of the Agreement.

17) The Committee took note of the statements made, agreed to revert to this issue at its next meeting and, in view of the wish of the delegation of Chinese Taipei to conclude the process of bilateral consultations in the latter part of 1996, urged delegations to pursue their bilateral negotiations with this delegation.

- *Application for accession by Singapore*

18) The representative of Singapore drew attention to the replies of her delegation to the questions put by one delegation concerning the description of Singapore's procurement régime (GPA/W/10).²

19) The representative of Singapore also informed the Committee that her delegation had prepared a tentative revised offer with a view to achieving an expeditious accession to the Agreement.³ Singapore's revised offer took into account the concerns that delegations had raised during the first round of bilateral consultations regarding the initial offer submitted in December 1995 (GPA/IC/SPEC/2) and represented substantially improved access to government procurement opportunities available in Singapore. The main features of the offer were: the threshold values applicable under the relevant annexes were lowered; and the coverage of entities was extended. The coverage of central government entities under Annex 1 was now comprehensive, except for the Ministry of Defense, thus subjecting 46 per cent of the total value of their procurement to the disciplines of the Agreement. Several important purchasers in government procurement market were included - 92 per cent of the total procurement of the Ministry of Environment, 83 per cent of that of the Ministry of Health and 92 per cent of that of the Ministry of Education. The list of statutory boards in Annex 3 was expanded, subjecting twenty-five such entities that had been requested in bilateral consultations to the disciplines of the Agreement. Under the improved offer 56 per cent in value terms of the total procurement of statutory boards would be covered; for example, more than 80 per cent of the total procurement of the Civil Aviation Authority and 91 per cent of the total procurement of the Housing Development Board and 86 per cent of total procurement of the Land Transport

²Subsequently circulated as document GPA/W/19

³Subsequently circulated as document GPA/SPEC/2

Authority were covered. The threshold levels in Annex 3 were reduced to SDR 400,000 for both goods and services and to SDR 5 million for construction. The scope of the service sectors was expanded under Annex 4 to include, among others, veterinary science services, consultancy services in the installation of computer hardware, systems and software consulting services, electronic mail voice online information database retrieval, motion picture services, translation and interpretation services; and the threshold level applied to entities under this annex was reduced to SDR 400,000. The initial offer on Annex 5 was comprehensive and included all categories of construction services and the threshold level was reduced to SDR 5 million. In conclusion, she expressed her delegation's hope that Parties would facilitate an expeditious accession process with a view to its completion by the end of July 1996. Bearing in mind this time-frame, Singapore would table its final offer by mid-June.

20) The representatives of the European Communities, the United States, Canada, Korea, Norway, Japan and Switzerland welcomed the draft revised offer which appeared to have reflected significant improvements to the initial offer. They supported Singapore's efforts to conclude bilateral consultations as soon as possible.

21) The Chairman noted the general support for Singapore's efforts for an early accession process and the intention of Singapore to submit a revised offer by 14 June 1996 to the Secretariat after holding further bilateral consultations with interested Parties. He proposed that, after the submission of Singapore's revised offer, the Secretariat would draw up and circulate, in the week of 17 June 1996, a draft Decision on Accession to which would be attached the terms of accession as contained in the offer by Singapore for consideration and adoption by the Committee.⁴ This Decision would be considered adopted if no objections or requests for extension of this time-limit were received from Parties within thirty days of the date of the issue of the document.

22) The Committee so agreed.

E. ESTABLISHMENT OF A LOOSE-LEAF SYSTEM FOR THE APPENDICES OF THE AGREEMENT

23) The Chairman recalled that, at the request of the Interim Committee, the Secretariat had prepared a note outlining how a loose-leaf system to periodically update the Appendices in the Agreement might work, taking into consideration relevant experience in other areas of the WTO such as in regard to tariff schedules (GPA/W/3).

24) The representatives of the United States, Canada, the European Communities, Switzerland and Norway reiterated their support for the establishment of a loose-leaf system to regularly update the Appendices to the Agreement which would record the modifications and rectifications notified and agreed pursuant to the procedures under Article XXIV:6. They agreed, therefore, that the loose-leaf system should constitute the official legal record of national schedules.

25) Asked by the Chair to comment on the advantages of giving the loose-leaf system legal effect, the representative of the Secretariat said that the principal

⁴Subsequently circulated in document GPA/W/21

advantages would be to provide delegations with only one system to maintain up to date and a clear picture of the legal status of the Appendices - something which did not result from the present procedures. With a view to facilitating its operation, it was suggested that delegations submit proposed changes to their Appendices under the provisions of Article XXIV:6 in the form of replacement pages or additional pages to be inserted in the loose-leaf system with the proposed changes identified on those pages. Once these changes, circulated in the GPA/W/- document series, would have been adopted by the Committee and certified according to the procedures under Article XXIV:6, those replacement pages could then be circulated for insertion in the loose-leaf system, in addition to the circulation in the WT/Let/- document series.

26) The representative of Japan said that, since the Diet had approved the authenticated certified text of the Marrakesh Agreement on Government Procurement of 15 April 1994, his delegation would need to assess the implications of a loose-leaf system with legal status in the light of the approval procedures in his country. His delegation had a similar position in respect of the Schedules under GATT and GATS.

27) The representative of the European Communities said that, recognizing that the document which would record the agreed modifications to Parties' concessions would have legal effect, the Committee should limit its consideration to whether such document would be made available in a loose-leaf system or in any other version. He disagreed with the Japanese position which could imply that changes made by Parties to their respective Appendices in accordance with the procedures under the Article XXIV:6 of the Agreement could have legal effect only after the completion of the legislative approval procedures in each of the Parties.

28) The representative of the United States said that a proposed modification or rectifications to the Appendices had legal effect once it was agreed by the Committee pursuant to the procedures of Article XXIV:6. Circulation of such modifications in one consolidated text or in a series of documents was a matter of form rather than of substance.

29) The Chairman confirmed that only modifications which would have been adopted would be systematically made available as derestricted documents to the wider public under the loose-leaf system. This would, however, not preclude Parties from notifying proposed changes to their Appendices on an unrestricted basis.

30) On the question of distribution of GPA documents to Parties, Observers and WTO Members in electronic form and on the possibility of making the loose-leaf system available to the wider public, the representative of the Secretariat informed the Committee that, at the request of the General Council, the WTO Secretariat was currently working on two systems for the electronic distribution of WTO documents. One concerned the electronic distribution of restricted documents destined for use by WTO Members, possibly through the Internet, and would involve using pass words to guarantee that access was restricted only to those entitled to receive such documents. All GPA documents, including the loose-leaf system, could be distributed under this method. The second system related to making available unrestricted documents to the general public through the WTO Home Page on the Internet. The loose-leaf system could be made available to the general public by this method. Both methods were expected to be in operation before the end of 1996.

31) The Committee agreed in principle to establish a loose-leaf system with legal effect to periodically update the Appendices to the Agreement, subject to a scrutiny reserve of thirty days entered by the delegation of Japan.

32) The Chairman proposed that the Committee request the Secretariat to produce and distribute an updated set of Appendices, with a view to providing a starting point for the loose-leaf system and that a period of sixty days be foreseen from the date of distribution for delegations to review whether the agreed changes had been correctly reflected. He also noted that the Secretariat was exploring ways to publish the Agreement including the loose-leaf system on the Internet and suggested that it produce in due course a note that would outline the modalities of access to these and other GPA documents through the Internet.

33) The Committee so agreed.

F. INFORMATION TECHNOLOGY

34) The Chairman recalled that, following the request of the Committee at its meeting of 27 February 1996, the Secretariat had prepared a compilation of issues relating to the implications of the development of information technology for the Agreement and, in conjunction with the Chairman and based on inputs from delegations, had identified options for carrying forward the work in the area of information technology (GPA/W/15).

35) The representative of the United States, welcoming the compilation of issues on information technology circulated in document GPA/W/15, noted that it seemed to reflect more anxiety about the implications of information technology than was warranted.

36) The representative of the European Communities, in referring to the paper presented by his delegation (GPA/W/13), said that the use of information technology would have certain practical consequences but it should not be assumed that they necessarily created the need to make changes to the Agreement. However, some flexibility in the application of rules could be justified to the extent that this did not undermine the respect of the basic principles underlying the Agreement. In general, it was essential to secure that the new technologies did not lead to discrimination against Parties or suppliers who did not have access to their use. The paper by the United States (GPA/IC/W/36), by setting out certain practical problems related to this question, hinted at the need for certain changes to the provisions of the Agreement, for instance to allow the wider use of selective or limited tendering. New technologies would be instrumental in attracting offers from a greater number of suppliers which was to be welcomed in accordance with the principles of the Agreement. Increased use of selective tendering procedures would not be the right way of handling the possible increase in the number of offers. The system of open procedures under the Agreement provided adequate flexibility to solve any problem that could arise in this connection.

37) The representative of the European Communities also said that the respect of the principle of non-discrimination was essential as regards the setting of deadlines taking into account language differences. The use of new technologies should not lead to a

shortening of deadlines to the detriment of those suppliers who had not been able to develop facilities for retrieving information on tendering opportunities or for electronic tendering. In the multicultural environment of government procurement, shortening of deadlines could discriminate against foreign suppliers who faced difficulty in understanding tender procedures and in providing a rapid response in a different language. Furthermore, electronic tendering systems should be designed from the outset to be effectively transparent, compatible and readily accessible to all suppliers from all Parties. Relying on the market to fill the gap was not a satisfactory option and in any event would take time.

38) The representative of Norway, in referring to the paper presented by her delegation (GPA/W/14), said that information technology systems should be open and accessible to all suppliers and Parties. The principle of non-discrimination should be observed both in terms of access to systems and compatibility between different systems.

39) The representative of Canada cautioned that shortening of deadlines should not undermine increased competition in procurement markets offered by new technologies. He also said that a preliminary draft on possible solutions to some of these questions could assist the future discussion of this issue in the Committee.

40) The representative of Korea said that further discussion could give guidance to what extent databases should cover entities at the sub-central government level. Pending electronic transmission of data, hard copy publications should continue to be the principal means of transmitting information on procurement. Parties advanced in new technologies could cooperate with other Parties in developing the relevant information technology.

41) The representative of the United States said that adoption of information technology would increase the efficiency of procurement procedures and would improve access to procurement opportunities. In response to concerns expressed by the representative of the European Communities, he explained that his delegation's paper on information technology (GPA/IC/W/36) pointed out the possibility of the use of selective tendering in those situations where procuring entities adopting information technology would be faced with a considerable increase in the number of offers. While the present provisions of Article X allowed the use of selective tendering subject to certain conditions, a review of these provisions might be necessary to identify possible areas where changes might be warranted to accommodate the effects of increased use of information technology. Article X could be modified to ensure that any increased use of selective tendering would not lead to discrimination between domestic and foreign suppliers. He also said that the provisions of the Agreement relating to deadlines were based on the practice of distribution of publications in hard copy version through the postal system. These might have to be reviewed to reflect the possibilities offered by developments in the area of electronic data transmission and electronic tendering. He agreed that any amendments to the relevant provisions should take into account the difficulties resulting from different languages.

42) The representative of Japan said that Japan now provided information to suppliers worldwide, through the Internet, not only with respect to procurement by central government entities, as indicated in the Secretariat compilation (GPA/W/15,

paragraph 14) but also with respect to government-related entities in Annex 3 as well as challenge procedures. A number of Ministries and agencies in his country were examining the possibility of establishing an electronic database containing contract opportunities provided by entities under Annexes 1 and 3, to which private companies would have access, and which would also provide electronic tendering facilities. He also supported the view of the delegation of the European Communities that the non-discrimination principle was essential in securing access to contract opportunities for foreign suppliers on a fair basis. He also said that any possible amendments to the relevant provisions of the Agreement could be discussed under the review procedures of Article XXIV:7.

43) The representative of the United States said that the question of access to domestic databases by all other Parties deserved careful consideration. His delegation was concerned about the implication that a requirement for a one-way access to databases in individual Parties might have on the balance of rights and obligations between Parties under the Agreement. He also expressed his delegation's readiness to provide information on the establishment of the APEC Home Page at the request of some delegations.

44) After discussion of the options identified in the note on information technology for carrying forward work in this area (GPA/W/15, paragraphs 34 to 38), the Chairman concluded as follows. First, the Secretariat would revise the questionnaire on information technology (GPA/IC/W/4/Rev.1) as proposed in document GPA/W/15. Second, he noted that the European Communities, in coordination with Norway, would prepare a paper identifying the technical issues relating to information technology that might need to be examined by experts. Third, the Secretariat would prepare a factual note on the aspects of the Agreement that it had been suggested might need to be re-examined in the light of information technology, setting out the relevant provisions of the Agreement and drawing attention to any pertinent information on their negotiating history. Fourth, he noted that the delegation of the United States would provide information on the pilot project launched in the APEC framework on access to national databases. The representative of the European Communities suggested that the Secretariat might also assist in the preparation of the paper identifying the technical issues related to information technology.

45) The Committee so agreed.

G. UNIFORM CLASSIFICATION SYSTEMS

- *Goods*

46) The Chairman recalled that, at its meeting of 27 February 1996, the Committee had endorsed the recommendation of the Working Group on Statistical Reporting that the system of 26 product categories be used as a basis for a classification system for products. With a view to identifying the precise level of detail desirable in the system of 26 product categories, the Chairman, in cooperation with the Secretariat, had prepared a paper indicating what categories of the 26 product categories could be usefully divided into sub-headings, and, where a further breakdown had been suggested, identifying the precise product coverage of the proposed new categories (GPA/W/17).

47) The representative of Korea questioned the appropriateness of dividing category 15 into two subheadings, arguing that several Parties had excluded telecommunications apparatus and equipment from the coverage of the Agreement. In response, the representative of Japan said that his delegation had suggested the breakdown of categories 14 and 15 because of the growing volume of procurement in these categories. The representative of the United States said that, while telecommunication entities *per se* were generally not covered under the Agreement, many entities covered under the Agreement were important procurers of telecommunication equipment, which justified the division of category 15 into two subheadings.

48) The Committee adopted the product classification system of 26 product categories as proposed in Annex 1 of document GPA/W/17, subject to scrutiny reserves of thirty days entered by Canada, Korea and the United States.⁵

- *Services*

49) The Chairman recalled that, at its meeting of 27 February 1996, the Committee had endorsed the recommendation of the Working Group on Statistical Reporting that the UNCPD be used as the classification system for services. With a view to reaching conclusions on the level of detail which would be desirable, the Chairman, in cooperation with the Secretariat, had prepared a paper indicating which of the 30 UNCPD divisions should be combined and if any subdivisions would be desirable (GPA/W/17).

50) In this connection, the representatives of Canada and the United States stated that their delegations would use the NAFTA system for the purposes of statistical reporting in the area of services and that a table of concordance of classification would be provided to the Committee.

51) The Committee adopted the services classification system in Annex 2 of document GPA/W/17, as amended by merging category 71 and 73 into one category named "transport services".⁶

H. TRANSPARENCY OF NOTICES

52) The Chairman recalled that, in the context of endorsing the Interim Committee's recommendation that the rules of origin used for the purposes of statistical reporting in Article XIX:5 of the Agreement should be the same as those applied under Article IV which were those used in the normal course of trade, the delegation of the European Communities had suggested that there was merit in examining ways to establish a link between statistical information and the degree of transparency of tender notices as an effective way of monitoring the operation of the Agreement.

53) At the request of the representative of the European Communities, the Committee agreed to revert to this issue at its next meeting.

⁵Subsequently issued as document GPA/4

⁶Subsequently issued as document GPA/4

I. REQUIREMENTS STEMMING FROM THE INCLUSION OF THE AGREEMENT
IN ANNEX 4 OF THE WTO AGREEMENT

54) The Chairman recalled that, in accordance with the provisions of Article 1:2 and Appendix 1 of the Understanding on Rules and Procedures Governing the Settlement of Disputes (Annex 2 of the WTO Agreement), the Dispute Settlement Body (DSB) should be notified of any special or additional rules or procedures on dispute settlement in the plurilateral trade agreements. As requested by the Committee at its meeting of 27 February 1996, the Secretariat had prepared and circulated informally a draft notification in the form of a letter from the Chairman to the Chairman of the Dispute Settlement Body, for the Committee's consideration and action.

55) The Committee approved the draft letter for forwarding to the Chairman of the DSB.⁷

J. PREPARATION FOR THE SINGAPORE MINISTERIAL

56) The Chairman recalled that, pursuant to the provisions of paragraph 7(a) of Article XXIV, the Committee shall annually inform the General Council of the WTO of developments in the implementation and operation of the Agreement. This year, reports of this nature by WTO bodies would subsequently be transmitted by the General Council to the Singapore Ministerial Conference. Given the schedule of meetings, as noted by the General Council at its meeting on 16 April 1996, the Committee on Government Procurement should adopt its report to the General Council at the Committee's meeting planned for 20 September 1996. The Chairman suggested that, while the Committee on Government Procurement was not a subsidiary body of the General Council, it may, with regard to format and content of its report, nevertheless wish to take account of procedures decided in the General Council in regard to those reports. The Chairman of the General Council, at its meeting on 16 April 1996, had stated that each body must decide on the format of the report which it deemed most appropriate for consideration of relevant issues. While taking this into account, he suggested that these reports include at least the following elements: (a) a section on implementation of the Agreement; (b) progress concerning work under the built-in agenda; (c) an indication as appropriate of issues and problems which had been identified and recommendations, if any. The Chairman also recalled that the Agreement on Government Procurement had its own built-in agenda, in particular in the provisions of paragraph 7(b) and (c) and paragraph 8 of Article XXIV and of paragraph 14 of Article V.

57) With reference to the section of the report on progress concerning work under the built-in agenda, the representative of Canada said that bilateral, plurilateral and multilateral discussions had made it evident that the Committee should give early consideration to certain areas of the Agreement that required improvement. He suggested that the report indicate that work would be carried out shortly pursuant to the provisions of Article XXIV:7 which provided for further negotiations. The main elements of such negotiations could include security of market access under the

⁷Subsequently circulated in document GPA/5

Agreement, extension of the Agreement to those sectors presently excluded from its coverage, elimination of discriminatory measures and simplification of its procedural requirements. This work could begin as from next year on the basis of proposals to be submitted by delegations.

58) The representative of the United States supported the suggestion for a reference to an early review under Article XXIV:7(b) in the report to the General Council. The review could address improvement of the procedural aspects of the Agreement as well as expansion of its coverage. The report could also point out to the need to accelerate the work under Article XXIV:8 in the area of information technology.

59) The representative of the European Communities endorsed the statement of the representative of the United States. His delegation would be prepared to consider any proposal that would be put forward by the delegation of Canada for an early review of the Agreement.

60) The Committee requested the Secretariat to prepare and circulate a draft report to the General Council by the end of July for its adoption at the next meeting of the Committee.

K. NOTIFICATION OF THRESHOLDS IN NATIONAL CURRENCIES

61) The Chairman recalled that, at its meeting on 27 February 1996, the Committee on Government Procurement had adopted a Decision on Modalities for Notifying Threshold Figures in National Currencies (GPA/1, Annex 3) and reminded Parties that, pursuant to this Decision, they were to notify without delay to the Committee on Government Procurement the thresholds for the period 1996-1997 in their respective national currencies and the method employed for determining them. So far the delegations of Canada, Japan and the European Community had notified (GPA/W/12 and Addenda 1 and 2).

62) The representatives of the United States⁸, Switzerland and Norway said that their delegations would notify their applicable thresholds in the near future.

63) The Committee took note of the statements made.

L. OTHER BUSINESS

64) The next meeting of the Committee is scheduled for 20 September 1996.

⁸Subsequently notified and circulated in document GPA/W/12/Add.3

RESTRICTED

GPA/M/1
18 April 1996

WORLD TRADE ORGANIZATION

(96-1427)

Committee on Government Procurement

MINUTES OF THE MEETING HELD ON 27 FEBRUARY 1996

Chairman: Mr. Harald Ernst (Switzerland)

- 1) The following agenda was adopted:
 - A. Election of officers
 - B. Recommendations for procedural decisions by the Committee on Government Procurement
 - C. Application for observership by Chinese Taipei, Colombia, Iceland, Liechtenstein, the Kingdom of the Netherlands with respect to Aruba, and Singapore
 - D. Modifications of Appendix I to the Agreement
 - E. Accession negotiations
 - F. Establishment of a practical guide to the new Agreement
 - G. Information technology
 - H. Statistical reporting
 - I. Other business

A. ELECTION OF OFFICERS

- 2) The Committee elects Harald Ernst as its Chairman and agrees that, in case the Chairman was absent from any meeting or part thereof, it would elect an interim Chairperson for that meeting or part of that meeting rather than electing a Vice-Chairperson.

B. RECOMMENDATIONS FOR PROCEDURAL DECISIONS BY THE COMMITTEE ON GOVERNMENT PROCUREMENT

3) The Committee adopted the decisions as recommended in document GPA/IC/W/31 on Procedures on the Participation of Observers, Procedures for Accession to the Agreement and Modalities for Notifying Threshold Figures in National Currencies. It also adopted interim procedures on the circulation of documents and on the derestriction of documents, pending definitive measures.¹ It agreed to consider additional changes to the interim procedures on derestriction of documents, if it appeared that action by the General Council on the general WTO policy in this area was delayed significantly.

Notification of National Legislation

4) The Chairman recalled that, at its last meeting on 7 December 1995, the Interim Committee had discussed procedures for notifying national implementing legislation and had recommended that this Committee carry forward this discussion. It had also requested the Secretariat to distribute information on notification procedures in other areas of the WTO, which it had subsequently circulated in an Informal Note, dated 16 February 1996. At the December meeting, the Chairman had circulated an Informal Note on Notification of National Legislation, which included a checklist of issues. This Note had subsequently been revised to take account of two amendments which had been proposed during the meeting.

5) The representative of the European Communities said that a balance needed to be struck between, on the one hand, the need for useful and effective surveillance of compliance with obligations under the Agreement and, on the other hand, the administrative burden of so doing. This could best be achieved by, first, an obligation on Parties to supply the texts of essential legislation to the Secretariat in the original language, without translation into a WTO language. Second, a summary of other legislation which was of relevance should be provided. Third, it would be necessary for each Party to indicate a local contact point which could help with translations and provide access to relevant information. The legal texts adopted to build the overall framework in which purchases would take place would fall under the category of essential legislation. Less essential legislation would be specific implementing regulations, such as, for example, the Federal Acquisition Regulations in the United States. A summary of such implementing legislation, emphasizing those aspects which were important with regard to the Agreement on Government Procurement would therefore be sufficient. He emphasized that this was a preliminary position and that his delegation was flexible and open to discuss the matter further.

6) The representative of Japan said that, while he had to reserve his delegation's position for the moment, it was important that each Party make available, as soon as possible, its domestic challenge procedures, as his delegation had already done and which had been distributed to the Parties.² Challenge procedures could be notified at an early date, even before the adoption of notification procedures for national legislation in general.

¹Subsequently circulated in document GPA/1

²Distributed in document GPA/IC/W/37

7) The representative of Switzerland said that a way should be found to be transparent without overloading the system. Her delegation would favour a procedure whereby the essential legislation be notified in a national language, which would not be translated, plus a summary in a WTO language of other implementing national legislation based on the checklist of issues which the Chairman had tabled at the last meeting, which could, of course, still be amended if deemed useful. She recalled that in that checklist, under item 8, mention was made of a contact point, which seemed a necessary and useful element.

8) The representatives of Norway, Korea and Canada supported the suggestions made so far.

9) The representative of the United States agreed with previous speakers and inquired whether the next step would be the drafting of procedures for notifications, once the Committee would have agreed to broad principles on procedures for notification. He reiterated that the checklist as tabled at the last meeting was useful, in that it provided guidance on how domestic implementing actions could be summarized.

10) The Chairman concluded that there was a general desire for a flexible, efficient and balanced approach. It had been suggested that part of the legislation be notified in its entirety in the official language of the notifying government, and that other provisions be notified in summary format in a WTO language, for which the checklist of issues which was issued at the last meeting seemed a good basis. The idea of establishing a contact point had also been raised. It had also been suggested that priority be given to the notification of domestic challenge procedures. He proposed that the Committee request the Secretariat to draw up draft procedures for notification for the next meeting, based on those parameters.

11) The Committee so agreed.

C.APPLICATION FOR OBSERVERSHIP BY CHINESE TAIPEI, COLOMBIA, ICELAND, LIECHTENSTEIN, THE KINGDOM OF THE NETHERLANDS WITH RESPECT TO ARUBA AND SINGAPORE

12) The Chairman said that the Committee needed to take action on the requests for observer status which it had received from the delegations of Chinese Taipei, Colombia, Iceland, Liechtenstein, the Kingdom of the Netherlands with respect to Aruba and Singapore, pursuant to the decision it had taken on this matter (GPA/IC/W/31).

13) The Committee agreed to grant observer status to the Governments of Chinese Taipei, Colombia, Iceland, Liechtenstein, the Kingdom of the Netherlands with respect to Aruba and Singapore.

D. MODIFICATION OF APPENDIX I TO THE AGREEMENT

14) The Chairman recalled that the notification dated 22 December 1995 by the delegations of the European Communities and the United States of their bilateral

agreement which they had concluded in Marrakesh in April 1994 was circulated in document GPA/IC/10, dated 16 January 1996. The consequential modifications to their respective Appendices had therefore entered into force, pursuant to the Interim Committee's Decision of 7 December 1995. Certification of these modifications had been circulated by the Secretariat in the normal WT/Let/- series (WT/Let/57). He also recalled that, in documents GPA/W/1 and GPA/W/2 respectively, the delegations of Japan and the United States had communicated modifications to their respective Appendices which followed on from the agreement reached between these two countries and which enlarged the scope of the Agreement on Government Procurement. Since no objections had been received within the prescribed time period, these modifications had entered into force on 25 February 1996. Certification of these modifications would shortly be circulated in the WT/Let/- series.³

15) He also recalled that, at the Interim Committee's last meeting, the delegation of the European Communities had said that it still needed to communicate the modifications in relation to the consequences of the accession of three new Member States to the European Communities as well as certain other changes warranted by developments that had taken place in the internal organization of the governments of some Member States, including the proposed changes to Appendix I of Sweden as circulated in documents GPR/W/133 and GPR/W/139.

16) The representative of the European Communities confirmed that the Committee could expect two more notifications from his delegation. He was hopeful that the notification pertaining to the incorporation into the European Communities Appendices of those of the three new Member States of the European Communities could be done shortly. It would be a consolidation and did not involve any changes in the coverage of the Appendices. His delegation also intended to notify an amended version of the European Communities Appendix I in the near future, which would take into account changes which had taken place in several of the Member States in their administrative set-up. Appropriate procedures for such notification would be followed.

17) The representative of the United States said that, in the implementation of the Agreement, his authorities *de facto* already treated the three new Member States of the European Communities on exactly the same basis as the other Member States and said further that the relevant changes to United States Appendices - deletion of these three Member States from its General Note 5 - would be notified at the appropriate time.

18) The Chairman also recalled that the Canadian Schedule offered to cover entities in all ten Provinces on the basis of commitments to be received from Provincial Governments, with a final listing to be provided within 18 months after the conclusion of the new Agreement. At the October meeting, the representative of Canada had made a statement which could be found in the Minutes of that meeting (GPA/IC/M/5). At the December meeting, he had informed the Committee that his delegation had subsequently contacted a number of Parties bilaterally.

³Subsequently circulated in document WT/Let/68

19) The representative of Canada said that his Government had written to the United States authorities requesting consideration of negotiations to limit horizontal exceptions and include presently excluded sectors under the Agreement. The United States had indicated in its response that it considered these areas non-negotiable. As a consequence, the Canadian position as outlined in his statements at the October and December meetings remained unchanged.

20) The representative of the European Communities expressed his delegation's disappointment that it had not been possible for Canada to respect its obligations. While he understood that there were bilateral problems between Canada and the United States, this should not be a reason to refrain from complying with the Canadian commitment under the Agreement.

21) The representative of Japan also expressed his delegation's disappointment about Canada's position with regard to its Annexes 2 and 3, which prevented his delegation from starting negotiations with Canada with a view to withdrawing the relevant derogations in the Japanese General Notes. While his delegation shared the Canadian concerns regarding the United States small business set-asides, this problem could more appropriately be dealt with in the process of reviewing national implementing legislation, once such legislation would have been notified to the Committee.

22) The representative of Norway reiterated her country's disappointment with the Canadian position and urged this delegation to come up with a list of sub-central entities. There was no reason why this bilateral conflict should hamper the multilateral process under this Agreement.

23) The representative of Switzerland said that her delegation knew how difficult it was to make fairly autonomous sub-central entities abide by the provisions of the Agreement on Government Procurement. Nevertheless, and while she recognized the Canadian problems with specific countries, she hoped that Canada would consider coming forward with an offer in terms of its Annexes 2 and 3 as regards the other Parties.

24) The Committee took note of the statements made and agreed to revert to this issue at its next meeting.

E. ACCESSION NEGOTIATIONS

- *Application for accession by Chinese Taipei*

25) The Chairman recalled that the report by the Interim Committee to this Committee on the application for accession by the Government of Chinese Taipei had been circulated in document GPA/IC/5 with the recommendation that this Committee carry forward the accession process. At its last meeting, the Interim Committee had urged delegations to engage in bilateral consultations with Chinese Taipei, in the light of the wish expressed by that delegation to be in a position to conclude the bilateral consultations before June 1996. In the meantime, the delegation of Chinese Taipei had circulated a revised offer in an informal document dated 22 February 1996.⁴

26) The representative of Chinese Taipei said that, since the circulation of his authorities' first draft initial offer, his delegation had held consultations with Canada, the European Communities, the United States, Japan and Korea. In response to the requests raised by these delegations, his authorities had made great improvements to the draft offer. A revised offer, containing the results of such improvements, had been prepared accordingly and had been distributed by the Secretariat. Based upon the efforts made in the revision of the offer and the total value of procurement opportunities it represented, his delegation urged Committee members, which it had contacted, to evaluate the revised offer favourably and to bring the consultations to an end as soon as possible. He invited members of the Committee to respond at their earliest convenience if they had any further questions on the revised offer, preferably by way of written documents directed through Chinese Taipei's Representative's Office in Geneva. After receiving these responses, his delegation would further evaluate its offer with the objective of concluding bilateral consultations with all interested Parties sometime in the middle of this year. The potential procurement value included in the offer represented up to 3.3 per cent of the GNP of Chinese Taipei of fiscal year 1995, which was higher than that of many of the Parties to the Agreement. The potential value of procurement opportunities for construction services offered by central and sub-central entities amounted up to about 0.34 per cent for the central government and 0.4 per cent for the sub-central government respectively, which was also higher than that of many of the Parties to the Agreement. The computer database containing the latest procurement information, which was demonstrated in the Interim Committee last year, was now in full operation on the Internet. In addition, the information contained on the database was now also being published in the Government Procurement Gazette. Currently, the Gazette was published in Chinese three times a week. In the future, summary information in English would be included, after Chinese Taipei's accession to the Agreement on Government Procurement. In referring to the planned reform of the government procurement régime in Chinese Taipei, he said that the favourable support of the Parties to the Agreement to Chinese Taipei's accession was essential to the success of these reforms.

⁴Subsequently circulated as document GPA/SPEC/1

27) The representative of the European Communities welcomed the revised offer from Chinese Taipei as a good one and commended Chinese Taipei for its efforts, both as regards its revised offer and with respect to the reforms in its procurement régime. He hoped that certain preconditions surrounding Chinese Taipei's accession to the Agreement on Government Procurement could be fulfilled soon with a view to its accession at an early stage.

28) The representatives of Canada and the United States also welcomed the efforts displayed all along by Chinese Taipei in its accession process and hoped that this process could be moved along as quickly as possible.

29) The representative of Korea said that his delegation was engaged in bilateral consultations with Chinese Taipei. Since it was important to widen membership of the Agreement, he suggested that Parties support non-Parties in a number of ways, for instance through the circulation to applying governments of dispute settlement cases which had been brought before the Committee.

30) The Committee took note of the statements made, agreed to revert to this issue at its next meeting and urged delegations to engage in bilateral negotiations with the delegation of Chinese Taipei.

- *Application for accession by Liechtenstein*

31) The Chairman recalled that the report by the Interim Committee to this Committee on the application for accession by the Government of Liechtenstein, which contained a draft Decision and included the terms for its accession, had been circulated in document GPA/IC/6. In its report, the Interim Committee recommended that the Committee on Government Procurement adopt the draft Decision attached to its report and invite Liechtenstein to accede to the Agreement on Government Procurement on the terms attached to the Decision.

32) The Committee adopted the Decision contained in document GPA/IC/6, and invited Liechtenstein to accede to the Agreement on Government Procurement on the terms attached to that Decision.

- *Application for accession by the Kingdom of the Netherlands with respect to Aruba*

33) The Chairman recalled that the report by the Interim Committee to this Committee on the accession negotiations with the Government of the Kingdom of the Netherlands with respect to Aruba, which contained a draft Decision and included the terms for its accession, had been circulated in document GPA/IC/7. In its report, the Interim Committee recommended that the Committee on Government Procurement adopt the draft Decision attached to its report and invite the Kingdom of the Netherlands with respect to Aruba to accede to the Agreement on Government Procurement on the terms attached to the Decision.

34) The Committee adopted the Decision contained in document GPA/IC/7, and invited the Kingdom of the Netherlands with respect to Aruba to accede to the Agreement on Government Procurement on the terms attached to that Decision.

- *Application for accession by Singapore*

35) The Chairman recalled that the Government of Singapore had applied for accession to the new Agreement and had tabled its initial offer, contained in document GPA/IC/SPEC/2, at the Interim Committee's last meeting, in December 1995. He noted that the delegation of Singapore had just submitted to the Secretariat a description of its procurement régime.⁵ He suggested that, in conformity with the Interim Committee's recommendation, the Committee carry forward the accession process in accordance with the procedures for accession negotiations which it had adopted under agenda item B.

36) The representative of Singapore said that most Parties would be aware that her Government had adopted the fundamental principles of fairness, openness and competitiveness for its government procurement policies. In general, Singapore did not have any special government procurement programmes to achieve specific social and economic objectives, such as assistance to small- and medium-sized enterprises, or to support specific industry sectors or infant industries. Her Government believed in the benefits of open competition and getting value for money. On average, open competition accounted for about 85 per cent of the total number of tenders. Her delegation would stand ready to provide further clarification of government procurement procedures in the course of bilateral consultations. Bilateral consultations had taken place or were foreseen with Japan, the European Communities, Canada and the United States. Her delegation would welcome further bilateral consultations with other Parties as well as receiving comments on Singapore's initial offer, either through correspondence, or through bilateral consultations in the near future. She hoped to be able to conclude Singapore's accession to the Agreement expeditiously.

37) The Chairman proposed that the Committee take note of the statements made. In the event that delegations had questions concerning the description of Singapore's procurement régime, which had just been distributed, he proposed that these be submitted in writing to the delegation of Singapore with a copy to the Secretariat. A compilation of such questions received would be circulated by the Secretariat in an informal document in due course. He also urged delegations to enter into bilateral consultations with Singapore, with a view to an early accession.

38) The Committee so agreed.

⁵Subsequently circulated as document GPA/W/10

F. ESTABLISHMENT OF A PRACTICAL GUIDE TO THE NEW AGREEMENT

39) The Chairman recalled that the report of the work of the Interim Committee on this matter was contained in document GPA/IC/9, paragraph 17. At the Interim Committee's October meeting, a number of delegations, while not opposed in principle to the establishment of a new guide, had suggested postponing active consideration of it, in view of its links with various other issues which were still under consideration. At the Interim Committee's December meeting, a number of delegations supported the idea of considering the establishment of a regular process of updating the Appendices to the new Agreement on Government Procurement, in the form of loose-leaf schedules, as a complement to, but distinct from, the establishment of a practical guide. At that meeting, the Interim Committee requested the Secretariat to prepare a brief note outlining how a loose-leaf system to periodically update the Appendices in the Agreement might work, taking into consideration relevant experience in other areas of the WTO such as in regard to tariff schedules. This note had been circulated in document GPA/W/3 on 14 February 1996.

40) The representative of the United States reiterated that, while active consideration of a practical guide best be postponed in view of its links with certain outstanding issues in other areas, there was merit in considering the establishment of a loose-leaf system for periodic updating of the Appendices to the Agreement, which would be accorded legal effect. In that respect, document GPA/W/3 seemed like a promising approach and its suggestion to explore possibilities to publish such a system on the Internet merited serious consideration.

41) The representative of the European Communities emphasized the distinction that should be made between a practical guide and a system to periodically update the Appendices in the Agreement. A practical guide did not require legal status. Nonetheless, he drew the Committee's attention to a possible issue which might arise where legal status of such a guide was assumed merely because it was published by a public institution, such as the WTO. His delegation would prefer a solution whereby the market would come up with a practical guide rather than the WTO Secretariat producing one. New technologies should be put to use to establish such a guide: there was merit in exploring possibilities to put a practical guide on the Internet, for example. On the other hand, and separate from the issue of a practical guide, he appreciated the need for a system to periodically update the Appendices in the Agreement, which would require legal status.

42) The representative of Canada agreed that active consideration of the establishment of a practical guide should be postponed until such time as linked issues would have been resolved. At the same time there was a need to come up with an efficient loose-leaf system to periodically update the Appendices and, in that respect, document GPA/W/3 seemed like a good basis for further reflection.

43) The Committee took note of the statements made and agreed to revert to this issue at its next meeting.

G. INFORMATION TECHNOLOGY

44) The Chairman recalled that the report of the work of the Interim Committee on this item was contained in document GPA/IC/9, paragraph 18 and that the Interim Committee had agreed to transmit its work to the Committee for further action. Broadly speaking, attention in previous discussions had focused on two main issues: compatibility between national systems and possible modifications of the Agreement itself. At the Interim Committee's last meeting, the delegation of the United States had introduced a paper on electronic commerce, circulated in document GPA/IC/W/36. A report of the relevant discussion at the Interim Committee's December meeting was contained in document GPA/IC/M/6, paragraphs 69 through 72.

45) The representative of the European Communities welcomed the paper which had been introduced by the United States at the last meeting as a useful discussion paper. What this paper implied was that electronic tools could make the procurement system more effective. He referred to early experiences in the United States with some form of electronic commerce at the federal level, and welcomed any information on conclusions drawn from these experiences. In the European Communities similar developments to those described in the United States paper were taking place. In referring to the United States concern that the introduction of electronic tools in the procurement process might result in a significantly higher number of bids submitted, he thought that electronic tender notices appearing on private screens might sometimes give the illusion to the viewer of having privileged access to such information, hence privileged access to certain tenders. This sometimes led to situations where suppliers which normally should refrain from responding did so anyway. However, this had nothing to do with electronic commerce but rather with the way in which information about tender procedures was perceived. In a way, electronic tools were a catalyst for reflection about Parties' respective procurement régimes and the United States paper was useful in that sense in that it highlighted issues which perhaps should have been addressed earlier. He acknowledged that receiving too many offers in response to a call for tender could become a problem, but this was not an issue generated by the use of electronic tools but rather because of a problem somewhere in the system, probably in the formulation of the technical specifications or the qualification criteria. In order to avoid such situations, tender documentation should be made clearer. The United States paper addressed issues which were not directly related to electronic tendering, in particular the one in respect of an increased need for selective tendering. In considering the effects of electronic tendering, there was the narrow issue of electronic tendering *per se*: in what respect did electronic tendering force Parties to review certain rules in the Agreement, for example deadlines in the tendering process. Deadlines could only be shortened on condition that this would not lead to discrimination between suppliers and that an off-the-shelf product was procured. This led to the question whether the Agreement should be adapted to cover situations where electronic tools could be used side by side with paper-based procedures or to cover procedures which were exclusively based on electronic tools. In his view, deadlines could probably only be shortened if all Parties adopted a system based exclusively on electronic tools and this stage had not yet been reached in the European Communities.

46) The representative of Canada warned that this issue was not standing still, and that rapid solutions ought to be found. Procurement offices were coming under increasing pressure to procure more efficiently and quickly. In some cases this had led to an

increased use of exceptions in order to be able to avoid the obligations under the Agreement. It was imperative that the Committee address the issue of electronic tendering and that it do so in terms of ensuring non-discriminatory market access.

47) The representative of Korea said that his delegation agreed with the view expressed in the United States paper that electronic tendering could ensure open, non-discriminatory and efficient government procurement and with the statements made by the European Communities. While, in his country, government procurement was not currently done electronically, his authorities did intend to establish a computerized network on government procurement. However, inconsistencies between legal and institutional requirements and technical elements posed certain difficulties, which warranted more cooperation between those Parties which used electronic tendering procedures and those who did not, including non-Parties. He hoped to be able to benefit from the experience gained by the United States on this subject.

48) The representative of Norway agreed that this issue should be addressed immediately in the Committee in view of the rapid technological progress being made in this area, and that, in doing so, the main objectives of such an exercise should be ensuring non-discriminatory market access. Account should also be taken of signals which possible amendments to the Agreement could send to new members. Hence, it was probably unavoidable that parallel systems would continue to exist side by side for some time. She thanked the delegation of the United States for its paper, which served as a useful contribution to this discussion.

49) The representative of Japan said that, while he appreciated the importance of electronic tendering for government procurement, it would be difficult for his delegation to enter discussions on this matter if such discussions were aimed at a revision of the Agreement, given his country's domestic legislative process in adopting amendments to the Agreement. The process of reflection should move forward but this should be done separately from contemplating any changes to the text of the Agreement. Electronic tendering could well be one of the most important issues for the next major review of the Agreement pursuant to Article XXIV:7(b), which should take place within three years after entry into force.

50) The representative of the European Communities said that he hoped that Parties would discuss the issue of electronic tendering or commerce with an open mind, including the question of possible revisions in the text. Drawing up a list of issues seemed like a good basis for future work in this area. The United States paper contained a number of issues, but was not exhaustive. If, in addressing the various issues, well-defined reasons surfaced for amending the Agreement, the Committee should not shy away from that simply because there was an Article in the Agreement which stipulated three-yearly reviews. There was a need to act quickly. One of the conclusions which might flow from the Committee's work could be the need to be more flexible in order to allow for certain information technology to be used, which was currently not possible due to legal restrictions. However, flexibility could not exist without a safety net which should consist of a stricter definition of discrimination in this particular area than the one currently included in the Agreement. He was wondering how best to proceed procedurally. Was a separate working party needed, or should the discussion be kept in the Committee? One

could perhaps start by providing descriptions of the various existing domestic schemes; it would, for example, be very useful to have a description of the experiences gained so far in the field of electronic commerce in the United States. His delegation could provide a description of its domestic experiences. Based on such an inventory, further action could be determined including the definition of areas in the Agreement which warranted further scrutiny. His delegation would come forward with a paper for discussion at the next meeting and he hoped others would do the same. He recalled in this context that, as part of the work done in the Interim Committee on this item so far, responses to a questionnaire had been provided by all delegations in the course of the previous year but the scope of what had been discussed so far had been limited.⁶ What was needed now was to gather information on electronic commerce - doing the whole tendering process electronically rather than just having electronic access to databases of tender notices - which was a much broader area than what had been discussed so far. In practical terms what this amounted to was for delegations to update the responses provided so far to the questionnaire with new information on practices with electronic commerce.

51) The representative of the United States said that it was a hopeful sign that all countries were willing to discuss issues of substance with regard to information technology. He recalled that Article XXIV:8 placed a marker and allowed for the possibility to negotiate modifications to the Agreement if warranted by developments in the use of information technology. In the past two years, delegations had exchanged information on their respective systems by way of responses to a questionnaire and had discussed certain basic principles for approaching this issue, the most important of which was the desire for this Agreement to remain a living Agreement, while ensuring non-discriminatory market access. Adoption of information technologies should result in enhanced market access. The purpose of the United States paper had not been to put forward any proposals but rather to prompt reflection on the issue and to show a willingness on his delegation's side to review the Agreement and identify possible areas where changes might be warranted, either associated with accommodating these technologies or with strengthening the commitment to non-discriminatory market access.

52) The representative of Canada agreed that there was a need to act quickly in this Committee to avoid making this Agreement obsolete in its tendering procedures. He would be pleased to provide an update of the questionnaire and other inputs on the issue of electronic tendering. He suggested that the Secretariat might be asked to assist the Committee in identifying a number of the key issues, based on inputs from all delegations and to come forward with a fundamental issues paper which would, at the same time, provide a consolidated list of the concerns expressed by the Parties, rather than each delegation submitting an individual paper. What this Committee needed to decide on were fundamental principles, such as how to ensure non-discriminatory market access, rather than focus on the technical differences between the various domestic systems.

53) The Chairman concluded that there was a strong wish to carry this process forward. Two questions had emerged from the discussions. Did the Committee need more information about national systems in order to identify any incompatibilities? And

⁶Circulated in documents GPA/IC/W/7 plus ten Addenda

secondly, was the Committee ready to consider amendments to the Agreement? The Secretariat had been requested to draw up a fundamental issues paper which would at the same time list the concerns of the delegations, and which would be based on inputs from delegations. He requested delegations therefore to come forward by 1 April with their ideas on how to carry the process forward, identifying their concerns, and possibly also to respond to the questions he had identified. Based on this information, the Secretariat would come forward with a compilation of issues and, in conjunction with the Chairman, identify options for carrying forward the work in this area.

54) The Committee so agreed.

H. STATISTICAL REPORTING

55) The Chairman recalled that the Working Group on Statistical Reporting had communicated its report to the Interim Committee in document GPA/IC/8.

Uniform Classification Systems

(i) Goods

56) The Chairman recalled that the Working Group had agreed to use the system of 26 product categories as a working hypothesis for a classification system for products. With a view to identifying the precise level of detail desirable in the system of 26 product categories, delegations had agreed to submit their ideas on what categories of the 26 product categories could be usefully divided into sub-headings, and, where a further breakdown would be suggested, to identify the precise product coverage of the proposed new categories. So far, two submissions had been received which suggested dividing categories 14, office machinery and automatic data processing equipment, into two sub-headings, and category 15, telecommunications and sound recording and reproducing apparatus and equipment, also into two sub-headings. The responses which had been received so far did not seem a sufficient basis on which to draw any definitive conclusions. Delegations might need more time to consider. He therefore proposed 15 April as a new deadline for submission of ideas and to fix this same deadline for the submission of suggestions on the level of detail in the UNCPC classification for services, which had earlier been fixed for 15 March. On the basis of this information, he would, in cooperation with the Secretariat, come forward with a paper as a basis for discussion at the next Committee meeting.

57) The Committee so agreed.

(ii) *Services*

58) The Chairman recalled that delegations had found common ground in the UNCPC as a classification system for services. With a view to reaching some preliminary conclusions on the level of detail which would be desirable, delegations had agreed to review the 30 UNCPC divisions with a view to advising which of these divisions should be combined and if any sub-divisions would be desirable and to submit their ideas to the Secretariat by 15 April. Based on this information, he would, in cooperation with the Secretariat, come forward with a paper as a basis for discussion at the next Committee meeting.

59) The Committee so agreed.

Country of Origin of Products and Services

(i) *Origin of products*

60) The Chairman recalled that the Statistical Working Group had recommended that the rules of origin used for the purposes of statistical reporting in Article XIX:5 of the Agreement should be the same as those applied under Article IV, which were those used in the normal course of trade.

61) The Committee adopted this recommendation.

62) The Chairman also recalled that, as a separate but linked issue, the delegation of the European Communities had suggested that there was merit in examining ways to establish a link between statistical information and the degree of transparency of tender notices as an effective way of monitoring procurement. The Working Group had been of the view that this suggestion should be more appropriately addressed by the new Committee on Government Procurement.

63) The representative of the European Communities confirmed that the view of his delegation that statistics on the origin of products and services procured did not provide sufficient information in themselves to monitor market opening. In order to meet his delegation's concerns about this, other criteria needed to be included. These could include statistics on the transparency of notices published by Parties, either in official gazettes or electronically.

64) The Committee took note of the statements made and agreed to revert to this issue at its next meeting.

(ii) *Origin of services*

65) The Chairman recalled that the Working Group had agreed that, in the light of the wording of Article XIX:5, last paragraph - •to the extent that such information is available• - this Committee should consider postponing application of the requirement to report statistics on the origin of services until practicable rules for determining the origin of services had been defined and that this Committee should revert to this matter when the work in the GATS and other relevant contexts would have advanced sufficiently to warrant it.

66) The Committee so agreed.

I. OTHER BUSINESS

- *Requirements stemming from the inclusion of the Agreement in Annex 4 of the WTO Agreement*

67) The Chairman recalled that the Understanding on Rules and Procedures Governing the Settlement of Disputes stipulated that the Dispute Settlement Body (DSB) should be notified of any special or additional rules or procedures on dispute settlement in the plurilateral trade agreements (Appendix I to the Understanding). He proposed that the Committee request the Secretariat to prepare, for the next meeting, such a draft notification for subsequent transmission to the DSB.

68) The Committee so agreed.

-*Dates in 1996 of the meetings of the Committee on Government Procurement under the new Agreement*

69) It was decided that the date of the next meeting be set in consultation with delegations. Attempts would be made to coordinate with the GATS Rules Group's next meeting on government procurement of services.

Committee on Government Procurement

Original: English

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2006-2007

CANADA

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2006-2007.

The information notified by Canada is reproduced below.

Pursuant to the agreed procedures (GPA/1, Annex 3), Canada submits its notification of threshold figures in the national currency for the period 1 January 2006 to 31 December 2007 for Annex 1 of Appendix I of the Agreement on Government Procurement. This information was also published on 16 December 2005 in Contracting Policy Notice 2005-3 on the Treasury Board Canada Secretariat website at <http://www.tbs-sct.gc.ca/>.

Annex 1 Entities	Threshold Value (SDR)	Threshold Value in Canadian Dollars
Goods	130,000	245,000
Services	130,000	245,000
Construction	5,000,000	9,400,000

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2006-2007

UNITED STATES

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), the United States notifies the Committee on Government Procurement of the U.S. thresholds for the period 2006-2007. These thresholds are effective via a Federal Register notice published December 12, 2005 (70 Fed. Reg. 73510).

ANNEX 1

	Threshold Value (SDR)	Threshold Value in U.S. Dollars
1. Goods and services	130,000	193,000
2. Construction services	5,000,000	7,407,000

ANNEX 2

	Threshold Value (SDR)	Threshold Value in U.S. Dollars
1. Goods and services	355,000	526,000
2. Construction services	5,000,000	7,407,000

ANNEX 3

	Threshold Value (SDR)	Threshold Value in U.S. Dollars
1. Goods and services (except entities identified in Annex 3 to which the threshold of US\$250,000 applies)	400,000	593,000
2. Construction services	5,000,000	7,407,000

**THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED
IN NATIONAL CURRENCIES FOR 2006-2007**

SINGAPORE

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2006-2007.

The information notified by Singapore is reproduced below.

1. Calculation of threshold figures in national currency

Annex 1 Entities	Threshold Value (SDR)	Threshold Value in Singapore Dollars (rounded)
1. Goods and services other than construction services	130,000	323,800
2. Construction services	5,000,000	12,454,000

Annex 3 Entities	Threshold Value (SDR)	Threshold Value in Singapore Dollars (rounded)
1. Goods and services other than construction services	400,000	996,300
2. Construction services	5,000,000	12,454,000

2. Method of calculation

The calculation of national threshold is based on the monthly average exchange rate of SDR to Singapore Dollars over 24 months from October 2003 to September 2005.

Month	Exchange Rate of Singapore Dollars to 1 SDR	Month	Exchange Rate of Singapore Dollars to 1 SDR
October 2003	2.4863	October 2004	2.4911
November 2003	2.5006	November 2004	2.5215
December 2003	2.5273	December 2004	2.5373
January 2004	2.5212	January 2005	2.4932
February 2004	2.5209	February 2005	2.4919
March 2004	2.4858	March 2005	2.4926
April 2004	2.4736	April 2005	2.4987
May 2004	2.4958	May 2005	2.4540
June 2004	2.5165	June 2005	2.4518
July 2004	2.5136	July 2005	2.4131
August 2004	2.5022	August 2005	2.4585
September 2004	2.4838	September 2005	2.4483

Source: International Financial Statistics, IMF

The average exchange rate of SDR to Singapore Dollars is:

Singapore Dollar 59.7796 / 24 months = Singapore Dollar 2.4908

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2006-2007

HONG KONG, CHINA

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2006-2007.

The information notified by Hong Kong, China is reproduced below.

1. Calculation of threshold figures in Hong Kong Dollars (HKD)

Annex 1 Entities	Threshold Value in SDR	Threshold Value in HKD
1. Goods and services other than construction services	130,000	1,499,000
2. Construction services	5,000,000	57,636,000

Annex 3 Entities	Threshold Value in SDR	Threshold Value in HKD
1. Goods and services other than construction services	400,000	4,611,000
2. Construction services	5,000,000	57,636,000

2. Method of calculation

The calculation of threshold figures in HKD is based on the monthly average exchange rate of SDR to HKD over 24 months from November 2003 to October 2005.

Period (Month/Year)	Average HKD Equivalent of SDR	No. of Days	HKD Equivalent
November 2003	11.13168	30	333.95040
December 2003	11.39197	31	353.15107
January 2004	11.57831	31	358.92761
February 2004	11.63364	29	337.37556
March 2004	11.47777	31	355.81087

./.

Period (Month/Year)	Average HKD Equivalent of SDR	No. of Days	HKD Equivalent
April 2004	11.38941	30	341.68230
May 2004	11.31363	31	350.72253
June 2004	11.42621	30	342.78630
July 2004	11.48745	31	356.11095
August 2004	11.42530	31	354.18430
September 2004	11.42164	30	342.64920
October 2004	11.52297	31	357.21207
November 2004	11.76995	30	353.09850
December 2004	11.97792	31	371.31552
January 2005	11.88122	31	368.31782
February 2005	11.83529	28	331.38812
March 2005	11.89597	31	368.77507
April 2005	11.77841	30	353.35230
May 2005	11.66428	31	361.59268
June 2005	11.41035	30	342.31050
July 2005	11.27142	31	349.41402
August 2005	11.39944	31	353.38264
September 2005	11.37956	30	341.38680
October 2005	11.21052	31	347.52612
TOTAL		731	8,426.42325

HKD equivalent of SDR for the 24-month period preceding November 2005:

$$8,426.42325 \div 731 = 11.5272548$$

$$\text{that is, 1 SDR} = \text{HKD } 11.5272548$$

ISRAEL'S LEVEL OF OFFSET RIGHTS

Communication from Israel

The following communication, dated 14 July 2005, is being circulated at the request of the Delegation of Israel.

1. Israel hereby declares its intention to renew its request to modify provisions regarding offsets, contained in a note in Israel's Appendix I.

2. As Parties to the GPA may recall, in November 2004, Israel submitted a formal request to the WTO Committee on Government Procurement, requesting the modification of the timetable for a gradual reduction in the levels of its offset rights. Due to the urgent nature of the matter and the need for more time to study Israel's request more thoroughly, the decision was taken to extend Israel's right to require offsets at a level of 30 per cent for an additional one year, i.e., until 31 December 2005 (document GPA/83, dated 17 December 2004). It was then understood that Israel, as well as the rest of the membership, would use this period of one year to further explore and negotiate the issue. This understanding is reflected in the minutes of the Committee in document GPA/M/25 (paragraph 5), dated 18 January 2005.

3. In line with the above understanding, the Government of Israel has conducted a thorough study of the implications and consequences on Israel's economy and industry of Israel's participation in the GPA. In order to guarantee the objectivity of the outcome, the Government has charged this assignment to an external private leading market research and consulting firm - Business Data Israel Ltd. Specifically, the study focused on the following:

- (i) the impact of Israel's membership in the GPA on Israeli firms' access to and success in winning public contracts in GPA Parties' markets;
- (ii) the effect of Israel's membership in the GPA on foreign and domestic suppliers bidding for public tenders in Israel; and
- (iii) the impact of the offset provisions on Israel's domestic industry and their contribution to economic development.

4. The main findings of the study are as follows:

- (i) Israel's membership in the GPA has lead Israeli companies neither to participate more in public tenders nor to win public contracts in other GPA Parties' markets.

- (ii) Israel's public procurement market has been further opened to competition from abroad. In 2004, direct purchases by Israeli entities from foreign suppliers covered by the GPA accounted for 56 per cent of total procurement, while the remaining 44 per cent were purchased in Israel from either local manufacturers or importers.
- (iii) The offset provisions in place have not hindered nor discouraged foreign suppliers from competing and winning public tenders in Israel.
- (iv) Business opportunities for the Israeli industry, resulting from the offset provisions, constitute the main benefit of Israel's membership in the GPA. These benefits are observed in aspects of direct business contracts, the transfer of technology and know-how and the creation of long-term business relations. For the aforementioned reasons, offsets are an important vehicle for durable economic development.

5. In light of the above-mentioned considerations, Israel intends to renew its request to introduce amendments to its note concerning offset rights in Appendix I.

6. Israel stands ready to engage in constructive negotiations concerning its request with other GPA Parties.

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2004-2005

ISRAEL

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds.

The information notified by Israel for 2004-2005 is reproduced below.

1. Calculation of threshold figures in US\$

ANNEX 1

	Threshold Value (SDR)	Threshold Value in US\$
Supplies	130,000	175,000
Services	130,000	175,000
Construction	8,500,000	11,450,000

ANNEX 2

	Threshold Value (SDR)	Threshold Value in US\$
Supplies	250,000	337,000
Services	250,000	337,000
Construction	8,500,000	11,450,000

ANNEX 3

	Threshold Value (SDR)	Threshold Value in US\$
Supplies	355,000	478,000
Services	355,000	478,000
Construction	8,500,000	11,450,000

2. Method of calculation

The calculation of the thresholds of the WTO Agreement, expressed in US\$ has been based on the average monthly SDR to US\$ exchange rate over 24 months from 1 January 2002 to 1 January 2004 (1 SDR = 1.347 US\$).

REQUEST FOR OBSERVER STATUS

Communication from the Republic of Armenia

The following communication, dated 10 June 2004, is being circulated at the request of the Delegation of the Republic of Armenia.

Taking into consideration the commitment to initiate negotiations to become a Party to the Agreement on Government Procurement, undertaken by the Republic of Armenia in the Working Party Report on the Accession of the Republic of Armenia to the WTO, we have the honour to ask the Committee on Government Procurement to grant the Republic of Armenia the status of an observer country.

Annex 2 Entities

	SDRs	Converted to Sw F
Goods	200,000	383,000
Services	200,000	383,000
Construction	5,000,000	9,575,000

¹ SDR 1.0 = Sw F (Swiss Francs) 1.987. The average monthly value of the SDR in Swiss Francs from September 2001 through August 2003 (24 months) was Sw F 1.987. This calculation is based on data published by the Swiss National Bank. The monthly average is 3.7% higher than the basis (from Sw F 1.915, average Oct. 1993-Sept. 1995). Despite having the factual basis to modify the value in Swiss francs (increase in this case), Switzerland follows a policy aimed at maintaining the Swiss franc value: (a) to facilitate the implementation of the Agreement by the thousands of purchasing entities; and (b) to avoid regular modifications linked with the fluctuations of the Swiss franc/SDR value which have tended over the past few years to offset each other. The value of the thresholds in Sw F has been expressed without the value-added tax (VAT) because Switzerland excludes VAT when calculating the value of contracts.

Annex 3 Entities

	SDRs	Converted to Sw F
Goods	400,000	766,000
Services	400,000	766,000
Construction	5,000,000	9,575,000

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2004-2005

NORWAY

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds.

The information notified by Norway for the period 2004-2005 is reproduced below.

The calculation of the threshold values of the Agreement on Government Procurement in Nkr has been based on the average daily exchange rates of SDR to Nkr and EURO to Nkr over 24 months from September 2001 through August 2003.

The thresholds are effective from 9 February 2004.

Annex 1

	Threshold in GPA in SDR	Threshold in GPA in Nkr
1. Goods and services	130,000	1,187,448
2. Construction services	5,000,000	45,671,141

Annex 2

	Threshold in GPA in SDR	Threshold in GPA in Nkr
1. Goods and services	200,000	1,826,846
2. Construction services	5,000,000	45,671,141

Annex 3

	Threshold in GPA in SDR	Threshold in GPA in Nkr
1. Goods and services	400,000	3,653,692
2. Construction services	5,000,000	45,671,141

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2004-2006

JAPAN

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds.

The information notified by Japan for the period 2004-2006 is reproduced below.

The thresholds listed below will be effective for the period from 1 April 2004 (the beginning of FY 2004) until 31 March 2006 (the end of FY 2005).

Annex 1 (Central Government Entities)

	SDRs	YEN
1. Products	130,000	21,000,000
2. Services other than 3 and 4	130,000	21,000,000
3. Architectural, Engineering and Other Technical Services related to 4	450,000	73,000,000
4. Construction Services	4,500,000	730,000,000

Annex 2 (Sub-Central Government Entities)

	SDRs	YEN
1. Products	200,000	32,000,000
2. Services other than 3 and 4	200,000	32,000,000
3. Architectural, Engineering and Other Technical Services related to 4	1,500,000	240,000,000
4. Construction Services	15,000,000	2,430,000,000

Annex 3 (All Other Entities)

	SDRs	YEN
1. Products	130,000	21,000,000
2. Services other than 3 and 4	130,000	21,000,000
3. Architectural, Engineering and Other Technical Services related to 4	450,000	73,000,000
4. Construction Services for Entities in Group A except Japan Post	15,000,000	2,430,000,000
5. Construction Services for Japan Post and Entities in Group B	4,500,000	730,000,000

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2004-2005

EUROPEAN COMMUNITIES

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2004-2005.

The information notified by the European Communities is reproduced below.

THRESHOLDS FOR THE PERIOD 2004-2005¹

SDR	130,000	200,000	400,000	5,000,000
EUR	154,014	236,945	473,890	5,923,624
Dansk krone	1,144,617	1,760,949	3,521,898	44,023,723
Svensk krona	1,421,076	2,186,270	4,372,541	54,656,757
Pound sterling	99,695	153,376	306,753	3,834,411

¹ The calculation of the thresholds of the Agreement on Government Procurement, expressed in EUR and in national currencies, has been based on the average monthly SDR to EUR exchange rate over 24 months from September 2001 through August 2003 (1 EUR = 0,746972 SDR).

The value of the thresholds in EUR and in national currencies has been expressed without the value-added tax (VAT) because the Community excludes VAT when calculating the value of contracts.

MODIFICATIONS TO APPENDIX I OF THE AGREEMENT ON GOVERNMENT PROCUREMENT PROPOSED BY JAPAN IN GPA/W/272, GPA/W/273, GPA/W/274, GPA/W/275 AND GPA/W/276

Communication from the European Communities

The following communication, dated 27 January 2004, is being circulated at the request of the Delegation of the European Communities.

Further to its communications of 16 October 2003 (GPA/W/279) and 7 November 2003 (GPA/W/282), the EC has carried out a first review of the modifications to Appendix I of the Agreement on Government Procurement (GPA) proposed by Japan in GPA/W/272, GPA/W/273, GPA/W/274, GPA/W/275 and GPA/W/276. To assist the EC in its assessment, the EC would appreciate Japan's answers to the following questions.

GPA/W/272

In the current Appendix I, procurement by Japan Railway Construction Public Corporation is subject to Notes 4(a) and 4(d). As a result of the proposed modification, all procurement by the new entity - Japan Railway Construction, Transport and Technology Agency - would be subject to Notes 4(a), 4(d) and 4(e). This implies that procurement relating to the activities that were in the past carried out by Japan Railway Construction Public Corporation would be made subject to a new restriction, i.e. that of Note 4(e).

1. Please explain the reason for applying Note 4(e) to procurement by Japan Railway Construction, Transport and Technology Agency relating to the activities that were in the past carried out by Japan Railway Construction Public Corporation.
2. Please explain the effect of this new restriction on the mutually agreed level of coverage.

In the current Appendix I, procurement by Corporation for Advanced Transport and Technology is subject to Note 4(e), whereas in the proposed new Appendix I all procurement by Japan Railway Construction, Transport and Technology Agency would be subject to Note 4(a), 4(b) and 4(e). This implies that procurement relating to the activities that were in the past carried by the Corporation for Advanced Transport and Technology would be made subject to two new restrictions, i.e. those of Note 4(a) and 4(b).

3. Please explain the reason for applying Notes 4(a) and 4(b) to procurement by Japan Railway Construction, Transport and Technology Agency relating to the activities that used to be carried out by Corporation for Advanced Transport and Technology.
4. Please explain the effect of these new restrictions on the mutually agreed level of coverage.

GPA/W/273

After further analysis of this notification, the EC withdraws its objection, based upon the statement of Japan that this modification does not alter the level of mutually agreed coverage provided in the Agreement.

GPA/W/274

The EC does not question the deletion of Japan Consumers Information Center. In respect of the other seven entities (Water Resource Development Public Corporation, Japan Green Resources Corporation, Japan Science and Technology Corporation, RIKEN (The Institute of Physical and Chemical Research), National Stadium and School Health Center of Japan, Association for Welfare of the Mentally and Physically Handicapped and National Agriculture Research Organization) the EC would appreciate responses to the following questions:

5. Please indicate for each of these entities which activities are continued and which activities are discontinued. Will some of the functions of these entities be taken over by entities not listed in the notification, and if so, by which entities?
6. Please explain the effect of the proposed modifications on the mutually agreed level of coverage.

GPA/W/275

The EC understands that part of the activities of the National Aerospace Laboratory of Japan have been assigned to another public entity, Japan Aerospace Exploration Agency, which is not listed in Appendix I. In this respect, the EC would appreciate Japan's answer to the following questions.

7. Please confirm whether it is correct that activities of the National Aerospace Laboratory of Japan have been assigned to Japan Aerospace Exploration Agency. Have all or only part of the activities been transferred? Will some of the functions of National Aerospace Laboratory of Japan be taken over by other entities than Japan Aerospace Exploration Agency. If so, please identify these entities.
8. Please explain the effect of the withdrawal of the National Aerospace Laboratory of Japan on the mutually agreed level of coverage.

GPA/W/276

9. Please indicate which activities of Social Welfare and Medical Service Corporation and Japan Institute of Labour are continued and which activities are discontinued. Will some of the functions of these entities be taken over by entities not listed in the notification, and if so, by which entities?

10. Please explain the effect of the proposed modifications on the mutually agreed level of coverage.

The EC reserves the right to ask additional questions and to seek additional information through informal consultations with the Government of Japan.

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 2004-2005

UNITED STATES

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2004-2005.

The information notified by the United States is reproduced below.

In pursuance of the agreed procedures (GPA/1, Annex 3), the United States notifies the Committee on Government Procurement of the US thresholds for the period 2004-2005. These thresholds are effective via a Federal Register notice published 19 December 2003 (68 Fed. Reg. 70861).

ANNEX 1

	Threshold Value (SDR)	Threshold Value in US Dollars
1. Goods and services	130,000	175,000
2. Construction services	5,000,000	6,725,000

ANNEX 2

	Threshold Value (SDR)	Threshold Value in US Dollars
1. Goods and services	355,000	477,000
2. Construction services	5,000,000	6,725,000

ANNEX 3

	Threshold Value (SDR)	Threshold Value in US Dollars
1. Goods and services (except entities identified in Annex 3 to which the threshold of US\$250,000 applies)	400,000	538,000
2. Construction services	5,000,000	6,725,000

GPA/W/147
GPA/W/148
GPA/W/150
GPA/W/154
GPA/W/157
GPA/W/203

2. The lists of documents circulated prior to the said Decision and which have been previously derestricted are contained in documents GPA/24, GPA/26, GPA/31, GPA/45, GPA/64 and GPA/74.

**THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED
IN NATIONAL CURRENCIES FOR 2004-2005**

CANADA

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2004-2005.

The information notified by Canada is reproduced below.

Pursuant to the agreed procedures (GPA/1, Annex 3), Canada submits its notification of threshold figures in the national currency for the period 1 January 2004 to 31 December 2005 for Annex 1 of Appendix I of the Agreement on Government Procurement. This information was also published on 3 December 2003 in Contracting Policy Notice 2003-6 on the Treasury Board Canada Secretariat website at <http://www.tbs-sct.gc.ca/>.

Annex 1 Entities	Threshold Value (SDR)	Threshold Value in Canadian Dollars
Goods	130,000	261,300
Services	130,000	261,300
Construction	5,000,000	10,000,000

MODIFICATIONS TO ITS ANNEX 1 OF APPENDIX I OF THE AGREEMENT ON GOVERNMENT PROCUREMENT PROPOSED BY CANADA IN GPA/W/203

Communication from Hong Kong, China

The following communication, dated 9 December 2003, is being circulated at the request of the Delegation of Hong Kong, China.

Based upon Canada's clarifications in documents GPA/W/229 and GPA/W/229/Corr.1, Hong Kong, China hereby withdraws its reservations (GPA/W/218) on Canada's proposed modifications to Annex 1 of Appendix I as outlined in document GPA/W/203.

**THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED
IN NATIONAL CURRENCIES FOR 2004-2005**

HONG KONG, CHINA

Addendum

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2004-2005.

The information notified by Hong Kong, China is reproduced below.

1. Calculation of threshold figures in national currency

Annex 1 Entities	Threshold Value (SDR)	Threshold Value in Hong Kong Dollars
1. Goods and services other than construction services	130,000	1,351,000
2. Construction services	5,000,000	51,951,000

Annex 3 Entities	Threshold Value (SDR)	Threshold Value in Hong Kong Dollars
1. Goods and services other than construction services	400,000	4,156,000
2. Construction services	5,000,000	51,951,000

2. Method of calculation

The calculation of national threshold is based on the monthly average exchange rate of SDR to Hong Kong Dollars (HKD) over 24 months from November 2001 to October 2003.

Period (Month/Year)	Average HKD Equivalent of SDR	No. of Days	HKD Equivalent
November 2001	9.89266	30	296.77980
December 2001	9.84739	31	305.26909
January 2002	9.76918	31	302.84458
February 2002	9.70819	28	271.82932
March 2002	9.74945	31	302.23295
April 2002	9.80108	30	294.03240
May 2002	9.96041	31	308.77271
June 2002	10.14424	30	304.32720
July 2002	10.37548	31	321.63988
August 2002	10.30638	31	319.49778
September 2002	10.30778	30	309.23340
October 2002	10.27635	31	318.56685
November 2002	10.38125	30	311.43750
December 2002	10.44987	31	323.94597
January 2003	10.64860	31	330.10660
February 2003	10.68814	28	299.26792
March 2003	10.68388	31	331.20028
April 2003	10.67753	30	320.32590
May 2003	10.96336	31	339.86416
June 2003	11.03284	30	330.98520
July 2003	10.90418	31	338.02958
August 2003	10.80000	31	334.80000
September 2003	10.87090	30	326.12700
October 2003	11.08790	31	343.72490
TOTAL		730	7,584.84097

HKD equivalent of SDR for the 24-month period preceding November 2003:

$$7,584.84097 \div 730 = 10.39019311$$

$$\text{that is, 1 SDR} = \text{HKD } 10.39019$$

**RESPONSES TO QUESTIONS FROM THE EUROPEAN COMMUNITIES (GPA/W/281)
REGARDING THE NOTIFICATION FROM KOREA (GPA/W/250)
UNDER ARTICLE XXIV:6**

Communication from the Republic of Korea

The following communication, dated 24 November 2003, is being circulated at the request of the Delegation of the Republic of Korea.

Please find below Korea's responses to questions from the European Communities (GPA/W/281) regarding Korea's notifications to the Committee on Government Procurement on the withdrawal of Korea Tobacco & Ginseng Corporation (KT&G) and Daehan Printing and Publishing Co. Ltd. (Daehan) from Annex 3 of Appendix I of the Agreement on Government Procurement (GPA) (GPA/W/250).

KT&G

1. *Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, de jure or de facto, influence the appointment of the directors of KT&G.*

The Government of Korea does not, *de jure* or *de facto*, influence the appointment of the directors of KT&G.

As the Government of Korea already mentioned in the Notification (GPA/W/250), the Government of Korea disposed its entire stocks of the Korea Tobacco & Ginseng Cooperation (hereinafter referred to as "KT&G") in October 2002, and since then KT&G has been a private company. The Act on Corporate Governance Improvement and Privatization of Government Invested Enterprise (hereinafter referred to as "Privatization Act") which is attached to the Notification (GPA/W/270) clearly indicates the legal status of KT&G. The Article 3 of the Privatization Act stipulates that the KT&G is no longer considered as a government invested institution. Accordingly, KT&G is now a private company subject to the Korean Commercial Law, and the Government of Korea does not have any means to control or influence the appointment of the directors of KT&G.

In addition, the Incorporation of KT&G (Attachment A) stipulates that the President and the executive directors of KT&G shall be appointed at the shareholders' meeting by shareholders with voting rights present at the meeting under the provision of Articles 20 and 26.

For reference, hereby attached is the Incorporation of KT&G (Attachment A).

2. *Please describe all financing, including grants, guarantees and loans, that KT&G may have obtained from the Government of Korea, other Korean public entities or publicly-owned companies.*

As mentioned above in the response to question 1, KT&G is a private company like any other private companies. Thus, KT&G does not receive any financial privileges from the Government of Korea, other Korean public entities or publicly-owned companies.

3. *Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, de jure or de facto, influence management decisions of KT&G.*

The Government of Korea and other public entities or publicly-owned companies do not, *de jure* or *de facto*, influence the management decisions in the KT&G. The Board of Directors resolves important matters in respect to the operations of KT&G and the President and the directors of KT&G manage the overall operations of the KT&G.

The above-mentioned facts are stipulated in the Articles 28 and 34 of the Incorporation of KT&G (Attachment A).

4. *Please describe the main features of the laws, regulations and measures that apply specifically to tobacco manufacturing companies.*

To ensure the sound development of the tobacco industry, the Tobacco Business Act and its Presidential Decree apply specially to tobacco manufacturing companies, including KT&G, Phillip Morris (hereinafter referred to as "PM") and British American Tobacco (hereinafter referred to as "BAT"). They prescribe matters concerning the production and distribution of tobacco such as licensing, disqualification of license, registration and some penal and fine provisions.

For reference, hereby attached is the Tobacco Business Act (Attachment B) and its Presidential Decree (Attachment C).

5. *Please provide the full text of Article 25 of the Tobacco Business Act and all measures giving effect to this provision, and explain what kind of assistance could be required. Has this provision ever been used, and if so, please describe how and under which circumstances?*

Article 25 of the Tobacco Business Act prescribes the obligation of the tobacco manufacturer. Articles 25 through 25-4 of the Tobacco Business Act prescribe "Indication of Warning Words and Restriction on Advertisement on Tobacco (Article 25)", "Indication of Tobacco Ingredients (Article 25-2)", "Participation of Manufacturer, etc. in Public Activities (Article 25-3)", "Prohibition of Money Providing, etc. for Promotion of Tobacco Sales(Article 25-4)".

Regarding assistance requirement for tobacco manufacturers, which is stipulated in section 3 of Article 25 (Participation of Manufacturers in Public Activities) in the Tobacco Business Act, a tobacco manufacturer is required to contribute 10 won per every 20 pieces of tobacco. The provision of contribution is in effect since 1 January 2002. In the early days of enforcement, only KT&G was subject to the Act. However, BAT and PM are also subject to the provision for their tobacco products manufactured in Korea since November 2002 and December 2002 respectively upon their establishment in Korea.

The Korean Government has successfully established the "Tobacco Production Stability Fund" based on the contribution from tobacco manufacturers for the purpose of assisting tobacco-producing farms to create a self-supporting agricultural sector.

The following data are forecasts on the receipts from the contributions made by KT&G, BAT and PM and the expected profits in the Tobacco Production Stability Fund.

CONTRIBUTION RECEIPTS

(Unit: 100 million won)

	'02	'03.9	Total
KT&G	336.6	258.6	595.2
BAT	1.3	12.1	13.4
PM	5.8	37.6	43.4
Total	343.7	308.3	652

EXPECTED PROFIT OF THE TOBACCO PRODUCTION STABILITY FUND

(Unit: 100 million won)

	2002	2003	2004	2005	2006	2007	2008
Founder's Contribution	0.1						
Manufacturers' Contribution	330	370	370	360	360	350	277
KT&G Contribution						1,100	
Interest Revenue	9	32	56	81	108	136	161
Subtotal	339	402	426	441	468	1,586	438
Total	339	741	1,167	1,608	2,076	3,662	4,100

6. Please describe the conditions that apply for obtaining a licence to manufacture tobacco, the customs tariffs that apply to the import of cigarettes and leaf tobacco, and the market shares of all tobacco manufacturers.

The Minister of Finance and Economy may grant a licence for tobacco manufacturing business on the following conditions:

- (1) equity capital: to be in excess of 30 billion won;
- (2) facility standards: to install the facilities capable of manufacturing tobacco in excess of five billion pieces per annum (based on 16-hour operation daily), which are equipped with an assembly line from raw material processing to cigarette manufacturing and product packing: *Provided*, That the processing facilities of raw material may not be installed not later than the time when the tobacco of 10 billion pieces per annum is manufactured;
- (3) technical manpower: to have the specialized technology manpower of not less than five persons who have the career for not less than three years in the field of tobacco manufacturing and quality control; and
- (4) R&D of tobacco manufacturing technology and quality control for national health protection: to be equipped with the testing equipment capable of analysing the function and quality of products (temperature-resistant and humidity-resistant equipment, measuring apparatus of smoky ingredients, measuring apparatus of

air-dilution rate, measuring apparatus of suction-resistance), and to provide the standards and guidances of quality control.

The relevant provisions are Articles 11 through 11-4 of the Tobacco Business Act and the Articles 2 through 4 of the Presidential Decree of the Tobacco Business Act.

The customs tariffs that applies to the import of cigarettes is 30 per cent of the CIF price (the customs tariffs will be changed into 40 per cent since 1 July 2004).

The customs tariffs that applies to the import of leaf tobacco is 20 per cent of the CIF price.

BREAKDOWN OF THE TOBACCO MANUFACTURERS' MARKET SHARES

(January - September 2003)

	KT&G	BAT	PM	JT	Others	Total
Ratio(%)	76.8	12.8	6.4	3.9	0.1	100

Daehan

7. *Please indicate if the Government of Korea, other Korean public agencies or publicly-owned companies own or used to own shares in Daehan. If yes, please provide details on these shareholdings, including the number of these shares, voting rights attached to these shares, and indicate when such shares were sold to private parties.*

No. The Government of Korea, other Korean public entities or publicly-owned companies have never owned shares of Daehan Printing and Publishing Co. Ltd. (hereafter referred to as "Daehan"). Since its establishment in 1948, Daehan has been a pure private company. A specific list on Daehan's shareholding is as below:

BREAKDOWN OF DAEHAN'S SHAREHOLDERS

	Government of Korea	Public Entity	Domestic Shareholders	Foreign Shareholders	Total
Ratio (%)	0	0	100	0	100

A SPECIFIC LIST OF DOMESTIC SHAREHOLDERS

	Number of Shareholders	Number of Shares	Ratio(%)
Individual Shareholders	479	2,637,438	61.40
Private School Foundations	43	184,920	4.30
Scholarship Foundations	16	268,780	6.26
Private Corporations	2	1,204,322	28.04
Total	540	4,295,460	100.00

8. *Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, de jure or de facto, influence the appointment of the directors of Daehan.*

The Government of Korea, other Korean public entities or publicly-owned companies do not, *de jure* or *de facto*, influence the appointment of the directors of Daehan.

The majority of shareholders with voting right appoint the directors of Daehan at the shareholders' meeting.

For reference, the relevant provision of the Incorporation of Daehan is as below:

"Article 32 (The Appointment of Directors)

1. The Directors of Daehan shall be appointed at the shareholders' meeting.
2. The Director of Daehan shall be appointed by a majority vote of shareholders, provided that the vote is over a quarter of its issuing stocks.

Article 36 (The Duties of Directors)

1. The President of Daehan shall represent and control the overall operation of company.
2. The Vice-President and other executive directors shall assist the President.

Article 38 (Organization and Convocation of Board of Directors)

1. The Board of Directors shall be composed of the President and the directors, and it shall resolve important matters relating to the operations of the company.

2.3. <omitted>"

9. *Please describe all financing, including grants, guarantees and loans, that Daehan may have obtained from the Government of Korea, other Korean public entities or publicly-owned companies.*

None. Daehan hasn't received any financial preferential treatment from the Government of Korea, other Korean public entities or publicly-owned companies.

10. *Indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, de jure or de facto, influence management decisions of Daehan.*

No. The Government of Korea, other Korean public entities or publicly-owned companies do not, *de jure* or *de facto*, influence management decisions of Daehan.

11. *Please describe and provide a copy of the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement (Presidential Decree 15187) and the Accounting Regulation for Government Invested Enterprises (Minister of Finance and Economy Decree 107). Please indicate if there are other instruments that apply to Daehan and not to other printing or publishing companies.*

The purpose of "the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party" (hereinafter referred to as "Special Regulation") is to regulate

international tendering applicable to the WTO Agreement on Government Procurement which was signed in Marrakesh on 15 April 1994.

The Special Regulation covers matters, such as Application (Article 3), Principle of Contract (Article 4), Method of Contract (Article 7), Qualification of Participant (Article 9) and other relevant procurement and contract methods. Hereby attached is a copy of the Special Regulation (Attachment D).

The purpose of "the Accounting Regulation for Government Invested Enterprises" (hereinafter referred to as "Accounting Regulation") is to regulate matters concerning the accounting and contracting standards and procedures applicable to government invested institutions, and qualification of bidders to participate in the tender. Hereby attached is a copy of the Accounting Regulation (Attachment E).

As mentioned above in the Notification (GPA/W/250), Daehan is a private company. Thus, no particular privilege is applied to Daehan exclusively from the other printing or publishing companies.

12. Please indicate if the Regulations referred to in question 11 are applicable to National Textbook Ltd.

No. Special Regulation and Accounting Regulation are not applicable to National Textbook Ltd., because National textbook Ltd. was extinguished at its merger with Daehan in 1999.

13. Please explain why the purchase of National Textbook Ltd. – a company not included in Annex 3 of Appendix I - justifies the withdrawal of Daehan from this Annex 3.

National Textbook Ltd. had been listed in Annex 3 of the WTO Agreement on Government Procurement since its effective day, until before Daehan was listed in Annex 3. As described in question 12, the National Textbook Ltd. was merged with Daehan in 1999. As a result, the Government of Korea modified its list in Annex 3 of the GPA by replacing "the National Textbook Ltd." by "Daehan Printing and Publishing Co. Ltd." (GPA/W/128).

14. Please set out on which markets Daehan and its subsidiaries, if any, operate, and indicate to what extent these markets have been liberalized. Please describe the structure of the Korean market for textbooks.

The textbook markets in Korea are usually composed of three categories, covering elementary and secondary school curriculum.

The first category deals with the textbooks issued by the Ministry of Education and Human Resources Development (hereafter referred to as "the Ministry") that reserves their copyrights. The Deliberation Committee for Publication of Textbooks under the Ministry every three or five years grants the copyrights of these textbooks to private printing and publishing companies selected through a performance evaluation of their capabilities of printing, bookbinding and publication. Currently, the selected companies are Daehan, Hyangwoo Industry Co., Doo-San Co., Kyo-Hak Sa Co., Choong-Ang Education Co., Chi-Hak Sa Co., Chun-Jae Education Co.

The second category concerns the textbooks that are published by private printing and publishing companies with the authorization by the Ministry to use them for the curriculum. This system relates to the fact that the school curriculum in Korea has been revised periodically (about every five years). At each revision, the Ministry has granted the authorization to private printing and

publication companies to publish textbooks for the curriculum. As of 2003, there are 84 printing and publishing companies who publish officially authorized textbooks, including Daehan.

The third and last category is the market relating to the books the Ministry recognizes as curriculum textbooks by accepting an application by a relevant school to use them for its curriculum. The authority to select printing and publishing companies for the recognized textbooks is, for the most part, delegated to the metropolitan/provincial offices of education.

INCORPORATION OF KT&G

KT&G Corporation

Articles of Incorporation

Amended: 1 April 1989
Amended: 26 February 1993
Amended: 22 March 1995
Amended: 1 October 1997
Amended: 9 October 1998
Amended: 17 November 1998
Amended: 2 September 1999
Amended: 29 March 2000
Amended: 27 December 2000
Amended: 23 March 2001
Amended: 15 March 2002
Amended: 27 December 2002
Amended: 14 March 2003

Chapter 1 General Provisions

Article 1 (Incorporation and Name)

The company shall be called "CHUSIKHOESA KT&G" and, in English, "KT&G CORPORATION" (hereinafter the "Company").

Article 2 (Purposes)

1. The object of the Company shall be to engage in the following businesses:
 - A. Tobacco manufacturing and sales;
 - B. Red ginseng and red ginseng products manufacturing and sales;
 - C. Beverages manufacturing and sales;
 - D. Pharmaceutical and non-pharmaceutical products manufacturing and sales (amended on 15 March 2002);
 - E. Tobacco business related materials manufacturing and sales;
 - F. Trading business (amended on 27 December 2002);
 - G. Distribution business (amended on 27 December 2002);
 - H. Broadcasting business (amended on 27 December 2002);
 - I. Real estate business (amended on 27 December 2002);
 - J. Leaf tobacco cultivation education;

¹ Attachments A to E are in English only.

- K. Activities concerning test, inspection or examination designated or entrusted by the Korean government; and
- L. Research activity relating to the above items(amended on 27 December 2002).

2. Furthermore, the Company may engage in investment, contribution, loan, support, or any other ancillary businesses necessary in engaging in the above listed businesses.

Article 3 (Location of Offices)

The Company shall have its head office in the city of "Taejeon" and, by the resolution of the Board of Directors, the Company may have branches, subsidiaries or representative offices within or without Korea.

Article 4 (Public Notices)

The Company shall make all its public notices in the Korea Daily News published in Seoul. However, if it is deemed impossible to give such notices through the Korea Daily News due to any *force majeure* event, such notices shall be given by publication in any other daily newspaper published in Seoul, Korea.

Chapter 2 Shares

Article 5 (Total Number of Shares to be Issued and Par Value)

The total number of shares that the Company may issue shall be 8 hundred million shares and the par value per share issued by the Company shall be KRW 5,000 per share.

Article 6 (Total Number of Shares to be Issued at the Time of Establishment)

The total number of shares that the Company may issue at the time of its establishment is 274,566,387 shares.

Article 7 (Types of Shares and Share Certificates)

The shares to be issued by the Company shall be common shares, preferred shares or convertible preferred shares, all of which are in non-bearer form. The share certificates of the Company shall be in eight denominations of one, five, ten, fifty, one hundred, five hundred, one thousand and ten thousand share(s) per certificate (amended on 15 March 2002).

Article 7-2 (Number and Characteristics of Preferred Shares)

1. Preferred shares to be issued by the Company shall be non-voting, and the number thereof shall not exceed the limit prescribed in the Korean laws.

2. Dividend ratio of the preferred shares in Paragraph 1 above shall not be less than nine per cent (9%) per annum of the par value of the shares as determined by the Board of Directors at the time of issuance.

3. Notwithstanding the provision of Paragraph 2 above, in case the possible amount of dividends that can be paid is less than the minimum aggregate amount of dividends for preferred shares, dividends may not be paid.

4. If dividends on preferred shares under Paragraph 2 above are not paid, the preferred shares shall have voting rights for a period starting from the general meeting of shareholders following the general meeting at which the resolution not to pay dividends on preferred shares is adopted to the end of the general meeting of shareholders at which a resolution to pay dividends for such preferred shares is adopted.

5. Duration of the preferred shares shall be ten (10) years beginning on the issuance date of such shares and the preferred shares shall be converted into common shares at the end of such period. Provided, however, that in case the dividends set forth in Paragraph 2 above are not paid during such period, such duration shall be extended until the distribution of such dividends is completed. With respect to dividends on the shares issued upon the conversion, Paragraph 4 of Article 8 of this Articles of Incorporation shall apply *mutatis mutandis*.

[This Article was newly established on 15 March 2002.]

Article 7-3 (Number and Characteristics of Convertible Preferred Shares)

1. Convertible preferred shares to be issued by the Company shall be non-voting, and the number thereof shall not exceed the limit prescribed in the Korean laws.

2. Dividend ratio of the convertible preferred shares shall not be less than nine per cent (9%) per annum of the par value of the shares as determined by the Board of Directors at the time of issuance. With respect to the dividends on the convertible preferred shares to be issued upon conversion, Paragraph 4 of Article 8 of this Articles of Incorporation shall apply *mutatis mutandis*.

3. Convertible preferred shares shall, upon request of holders of such convertible preferred shares, be converted to common shares at the conversion rate of one convertible preferred share to one common share. The conversion period for convertible preferred shares shall be three (3) years from the date immediately following the date of issuance thereof. Such period may be adjusted by a resolution of the Board of Directors before the issuance within the period; *provided, however*, that in the case of split or consolidation of common shares or other events of change in the shareholding ratio of convertible preferred shares (the shareholding ratio premised upon the conversion to common shares), the adjustment of the conversion ratio shall be determined at the time of issuance of convertible preferred shares by a resolution of the Board of Directors.

4. In case the conversion right on the convertible preferred shares is not exercised within the conversion period, such shares shall be converted into common shares on the date immediately following the final date of the conversion period; in this case, with respect to the dividends on the shares to be issued by the exercise of the conversion right, Paragraph 4 of Article 8 of this Articles of Incorporation shall apply *mutatis mutandis*.

5. Notwithstanding Paragraph 2 above, in case the possible amount of dividends that can be paid is less than the minimum amount of dividends for convertible preferred shares, dividends may not be paid.

6. The convertible preferred shares may have additional rights and characteristics to the extent that the relevant laws permit prior to issuance of such shares as determined by the Board of Directors.

7. In case of the convertible preferred shares, Paragraph 4 of Article 7-2 shall apply *mutatis mutandis*.

[This Article was newly established on 15 March 2002.]

Article 8 (Pre-emptive Right and Record Date for Dividends on New Shares)

1. The Company's shareholders shall have the pre-emptive right to subscribe for new shares in accordance with their respective shareholding ratio. In case the Company issues new shares by rights issue or bonus issue, then the new shares issued with respect to the preferred shares or the convertible preferred shares shall be common shares in the case of rights issue and shall be the shares of same class in the case of bonus issue. However, where a shareholder waives or loses his/her pre-emptive right, or where fractional shares result from allocation of new shares, the shares which have not been allocated and/or subscribed shall be disposed of in accordance with a resolution of the Board of Directors (amended on 15 March 2002).

2. Notwithstanding Paragraph 1 above, new shares may be allocated to persons other than existing shareholders of the Company by a resolution of the Board of Directors in the following cases:

- A. Issuance of new shares by public offering;
- B. Issuance of new shares to the members of the Employees Stock Holding Association (the "ESHA");
- C. Where the Company issues new shares to attain its managerial objectives including, without limitation, introduction of new technologies, improvement of corporate financial structure(amended on December 27, 2002); and
- D. Where prescribed by pertinent acts and regulations of Korea.

3. Where the Company issues new shares for value, the Company may make initial issuance of the new shares to the members of the ESHA as set forth in B of the above Paragraph within the limit prescribed in the Securities and Exchange Act (the "SEA").

4. Where the Company issues new shares by right issue, bonus issue or stock dividend, such new shares shall be regarded as having been issued at the end of the fiscal year immediately preceding the fiscal year during which the new shares are issued for the sake of dividends on the shares. Provided, however, that in case of interim dividends on the shares issued by right issue, bonus issue or stock dividend after the record date for interim dividends as set forth in Paragraph 3 of Article 43, of this Articles of Incorporation, the new shares shall be deemed to have been issued immediately after such record date (amended on 15 March 2002).

Article 9 (Stock Option)

1. Stock options for the shares of the Company within the limit of twenty per cent (20%) of the total number of shares issued by the Company may be awarded in accordance with the Enforcement Decree of the SEA, and pursuant to a special resolution of the shareholders' meeting to those officers and employees of the Company who have contributed or is capable of contributing to improve the management and the technical innovation of the Company, except for officers or employees in any of the following cases; provided, however, the Company may grant stock options by a resolution of the Board of Directors, to an extent not exceeding ten per cent (10%) of the total number of issued and outstanding shares in accordance with the Enforcement Decree of the SEA.

- A. The largest shareholder (as defined in Article 54-5, Paragraph 4, Subparagraph 2 of the SEA) of the Company and those who are specially related to the largest shareholder ("Specially related persons" is defined in Article 10-3, Paragraph 2 of the SEA. Hereinafter, referred to as "Specially Related Persons"). Provided, however, persons who became specially related persons only due to the fact that they were elected as officers of the Company shall be excluded.
 - B. Major shareholders of the Company (as defined in Article 188, Paragraph 1 of the SEA) and Specially related persons who are specially related to the major shareholders of the Company. Provided, however, persons who became specially related persons only due to the fact that they were elected as officers of the Company shall be excluded.
 - C. Persons who, upon exercising the stock option, would become the major shareholder.
2. Shares to be issued by the Company upon exercising the stock option shall be common shares, preferred shares or convertible preferred shares, all of which are in non-bearer form (and these shares shall be used to calculate the difference between the exercise price and the market price where the Company pays cash or deliver treasury shares for such difference) (amended on 15 March 2002).
 3. The number of officers and employees to whom the stock option will be awarded shall not exceed 99/100 of the total number of officers and employees in office of the Company, and the stock options to be granted to an officer or employee shall not exceed 10/100 of the total number of shares issued by the Company.
 4. The purchase price per share to be acquired by the exercise of the stock options shall not be less than the price prescribed in the SEA.
 5. The stock options may be exercised, during the period prescribed by a separate agreement, within seven (7) years from the date when two (2) years have elapsed from the date of the special resolution of the shareholders' meeting or the resolution of the Board of Director that granted such stock options.
 6. The officers and employees of the Company who are granted stock options must remain in the office or must have been employed for at least two years since the date of the special resolution of shareholders' meeting or the resolution of the Board of Directors prior to exercising the stock option awarded to them. However, where the officer or employee of the Company who are granted stock options dies or retires or resigns due to age limit or any other cause not attributable to him/her, the stock options may be exercised by such officer, employee or their heirs/heiresses during its exercise period.
 7. In the following cases, the stock options may be cancelled by a resolution of the Board of Directors:
 - A. where the officer or employee has retired or resigned from his/her office voluntarily after being awarded the stock options;
 - B. where the officer or employee has been released or dismissed from his/her office as a result of his/her wilful misconduct or gross negligence causing significant injury to the Company; and

C. where any other events for cancellation stipulated in the stock option agreement occurs.

Article 10 (Deleted on 27 December 2002)

Article 11 (Transfer Agent)

1. The Company shall have transfer agent.
2. The transfer agent, the place where its services are to be rendered and the scope of its duties must be decided by a resolution of the Board of Directors and must be publicly announced.
3. The shareholders registry or a duplicate thereof must be kept at the office where the transfer agent renders its services, and the activities of making entries in the shareholders registry, pledge registration and cancellation, trust indication and cancellation, issuance of share certificate, receipt of reports files, and all other administrative matters relating to the shares must be conducted by the transfer agent.
4. All procedures relating to the administrative matters stipulated in Paragraph 3 of this Article shall be performed according to the Regulation on Securities Transfer Agents, etc.

Article 12 (Reporting the Name, Address, Registered Seal and Signature of Shareholders)

1. Each shareholder and registered pledgee of the Company shall register his/her name, address and registered seal signature with the Company, and any changes thereof shall also be reported to the Company.
2. Shareholders and the registered pledgees residing in a foreign country must designate an address and an agent in Korea to receive reports and report to the Company thereof.
3. Paragraphs 1 and 2 shall apply even if a change in matters described therein.

Article 13 (Suspension of Alternation of Shareholders' Register and Record Date)

1. The Company shall suspend any entry into the shareholders' register with regard to shareholders' rights during the period starting from the day following the last day of the preceding fiscal period until the close date of the ordinary shareholders' meeting convened for such preceding fiscal period.
2. The Company shall recognize the shareholders registered on the shareholders' register as of the last day of each fiscal period as the shareholders who may exercise the shareholder's rights in the ordinary shareholders' meeting.
3. In case of an extraordinary shareholders' meeting being called or if needed for certain other cases, the Company may suspend any entry into the shareholders' register for a period not exceeding three months by a resolution of the Board of Directors or recognize the shareholders registered on the shareholders' register as of a fixed day determined by a resolution of the Board of Directors as the shareholders to exercise the shareholder rights. In addition, the Company may arrange both a suspension of any entry into the contents in the shareholders' register and designation of a record date if the Board of Directors finds that the two measures are necessary. The Company must publicly notify all such measures no less than two weeks prior to the intended date of the shareholders' meeting.

Chapter 3 Bonds

Article 14 (Issuance of Convertible Bonds)

1. By a resolution of the Board of Directors, the Company may issue convertible bonds to those other than the shareholders if such issuance of convertible bonds falls under any of the categories set forth below; provided, that the total face value of such convertible bonds does not exceed KRW 500 billion:

- A. where the issuance is in the form of a general public offering in accordance with the provisions of the Securities and Exchange Act ("SEA");
- B. where the Company issues convertible bonds to alliance companies for introduction of technology or other purposes;
- C. where the issuance is for the purpose of soliciting foreign investment necessary for the management of the Company in accordance with the Foreign Investment Promotion Act;
- D. where the Company issues convertible bonds to domestic or international financial institutions for urgent funding;
- E. where the issuance is performed overseas in accordance with Article 192 of the SEA; or
- F. where the Board of Directors reasonably decides that the issuance is necessary for achievement of management purpose of the Company.

2. The Board of Directors may issue the convertible bonds in Paragraph 1 above with the condition that only a portion of the bonds issued shall be attributed with conversion right.

3. The classes of shares issued upon conversion shall be common shares, preferred shares or convertible preferred shares, which shall be determined by the Board of Directors at the time of issuance of bonds. The conversion price shall be decided by the Board of Directors at the time of issuance of the relevant bonds, and must not be less than the face value of each share (amended on 15 March 2002).

4. The period during which request for conversion may be made shall be determined by the meeting of the Board of Directors within the period from the date when one (1) month has elapsed after issuance of the relevant convertible bonds to the date immediately preceding the redemption date for such bonds.

5. Distribution of dividend or interest on the shares issued upon conversion shall be made in accordance with Paragraph 4 of Article 8; *provided*, however, that with respect to the interim dividends on the shares to be issued upon conversion after the record date for such dividends as set forth in Paragraph 3 of Article 43, the shares shall be deemed to have been issued immediately after the record date for such interim dividends (amended on 15 March 2002).

Article 15 (Issuance of Bonds with Warrants)

1. By a resolution of the Board of Directors, the Company may issue bonds with warrants to those other than the shareholders if such issuance of bonds with warrants falls under any of the categories provided in Article 14, Paragraph (1); *provided* that the total face value of such warrant does not exceed KRW 500 billion.
2. The aggregate price of new shares, which may be subscribed for by the holders of warrants, shall be decided by the Board of Directors, and must not exceed the total face value of the bonds with warrants.
3. The classes of shares to be issued by exercising the warrant shall be common shares, preferred shares and convertible preferred shares, which shall be determined by the Board of Directors at the time of issuance of warrants. The issuing price shall be decided by the Board of Directors at the time of issuance of the relevant warrants, and shall be equal to the face value or an amount exceeding the face value.
4. The period during which request for the exercise of the warrant may be made shall be determined by the meeting of the Board of Directors within the period from the date when one (1) month has elapsed after issuance of the relevant warrants to the date immediately preceding the redemption date for such warrants.
5. Distribution of dividend or interest on the shares issued by exercising the warrant shall be done in accordance with Paragraph 4 of Article 8; *provided*, however, that with respect to the interim dividends on the shares to be issued by exercising the warrant after the record date for such dividends as set forth in Paragraph 3 of Article 43, the shares shall be deemed to have been issued immediately after the record date for such interim dividends (amended on 15 March 2002).

Article 16 (Applicable Provisions regarding the Issuance of Bonds)

Articles 11 through 13 shall apply *mutatis mutandis* to the issuance of bonds.

Chapter 4 Shareholders Meeting

Article 17 (Convocation of Shareholders' Meeting)

1. Shareholders' meetings shall be of two categories, ordinary and extraordinary. The ordinary shareholders' meeting shall be convened within three months after the close of each fiscal year; the extraordinary shareholders' meeting may be convened at any time when deemed necessary by the Board of Directors or pursuant to any other relevant laws and regulations.
2. Resolutions of the shareholders' meeting shall be limited to the agenda stated in the meeting notice only.
3. The shareholders' meeting shall be held either at the place where the head office of the Company is located or in Seoul. However, the shareholders' meeting may be held at a nearby place as determined by a resolution of the Board of Directors when necessary.
4. The President shall convene the shareholders' meeting. Where the President is unable to convene due to an unavoidable reason, Paragraph 2 of Article 28, shall apply *mutatis mutandis*.

Article 18 (Notice and Public Notice of Convocation of Shareholders General Meeting)

1. In convening a shareholders' general meeting, the notice stating the time, date, place and purposes of the meeting shall be sent, in writing, to individual shareholders two weeks prior to the scheduled date of the meeting.
2. Notices of the meeting to the shareholders owning less than 1/100 of the total number of shares may be made by with two or more public notices in the Korean Daily News published in Seoul, or the Taejeon Times published in Taejeon.

Article 19 (Chairman of Shareholders' Meeting)

The President shall act as the Chairman at the shareholders' meetings. However, where the President is unable to do so due to an unavoidable reason, Paragraph 2 of Article 28, shall apply *mutatis mutandis*.

Article 20 (Resolution of Shareholders' Meeting)

1. Unless otherwise stipulated in the applicable laws and regulations, the resolution of the shareholder's meeting shall be adopted by the shareholders representing the majority of shareholders with voting right present at the meeting and holding no less than one fourth of the total number of shares issued.
2. Notwithstanding the provision of Article 385, Paragraph (1) of the Commercial Code, the dismissal of the directors shall be adopted by at least two third (2/3) votes of shareholders present at the meeting and such votes shall represent at least one half (1/2) of total number of issued and outstanding shares of the Company; provided, that the dismissal as set forth in Article 26, Paragraph (2) and Article 32-2, Paragraph (4) shall be adopted by a resolution pursuant to Article 434 of the Commercial Code.
3. In case of any amendment to the first sentence of Paragraph (2), notwithstanding Article 434 of the Commercial Code, such amendment shall be adopted by at least two third (2/3) votes of shareholders present at the meeting and such votes shall represent at least one half (1/2) of total number of issued and outstanding shares of the Company.
4. Each share shall be given one voting right.

Article 21 (Exercise of Voting Rights by Proxy)

1. Shareholders may cause their proxy holders to exercise their voting rights.
2. Prior to the shareholders' meeting, proxy holders in Paragraph 1 above must submit to the Company a proof of their proxy rights.

Article 22 (Chairman's Right to Maintain Order)

1. The Chairman may suspend or, cancel a persons' right to speak or order such person to be removed from the meeting if such person speaks or acts in such manner as to intentionally interrupt the proceedings or disturb the order of the shareholders' meeting.
2. The Chairman may restrict the allotted time and the number of opportunity allowed for each shareholder to speak if deemed necessary for the orderly proceeding of the shareholders' meeting.

[This Article was amended on 27 December 2002.]

Article 23 (Minutes of Shareholders' Meeting)

The proceedings and resolutions of the shareholders' meeting shall be recorded in the minutes and shall be signed by the Chairman and all officers of the Company present at the meeting, and must be kept in custody of the Company.

Article 24 (Shareholders' Committee)

1. The Company may have the Shareholders' Committee consisting not more than fifteen shareholders' representatives for the purpose of effective operation of the Shareholders' Meeting.
2. The following persons shall be the members of the Shareholders' Committee, and the institutional shareholders shall not be more than five members. If two or more members are included in the scope of the specially related persons, the next specially related person in order cannot be the member of the Shareholders' Committee.
 - A. the largest fourteen shareholders as of the beginning date of the suspension of alteration of the shareholders' register or the record date;
 - B. one representative of the ESHA.
3. Any person in competition with the Company or the specially related persons of such person cannot be the member of the Shareholders' Committee.
4. The Shareholders' Committee shall perform the following functions:
 - A. to recommend the outside director;
 - B. to submit the opinion regarding the agenda of the General Meeting of Shareholders, which was presented to the Shareholders' Committee for its review by the Board of Directors; and
 - C. to provide mutual cooperation among the members of the Shareholders' Committee for the stabilization of management right of the Company.
5. After the resolution of the Board of Directors regarding the agenda of the General Meeting of Shareholders, the President shall convene the meeting of the Shareholders' Committee prior to the date set for the Shareholders' Meeting.
6. After the composition of the Shareholders' Committee, the chairman of the Shareholders' Committee shall be appointed from among its members.
7. The matters referred to in Subparagraph 2 of Paragraph 4 shall be adopted by the presence of a majority of all members and by the affirmative votes of a majority of the members present of the Committee. Each member shall have one vote regardless of the number of shares held by him.
8. The Company shall report to the Shareholders' Committee the matters deemed by the Board of Directors necessary to be reported from among those related to the interests of the shareholders.

Chapter 5 Directors and Board of Directors

Article 25 (Number of Directors)

The Company shall have one President and not more than fourteen directors. Provided that, the number of the executive directors, including the President, shall be less than six and 1/2 of the total number of directors (amended on 27 December 2002).

Article 26 (Appointment of President and Directors, etc)

1. The President shall be appointed at the Shareholders' Meeting among the persons recommended by the President Candidate Recommendation Committee according to Article 32 hereof (amended on 27 December 2002).

2. The executive directors shall be appointed among the persons recommended by the President with the consent of the Board of Directors at the Shareholders' Meeting. Upon occurrence of any of the events set forth below, the President may propose dismissal of an executive director to the Shareholders' Meeting with consent of the Board of Directors. The executive directors shall not participate in the resolution of the Board of Directors:

- A. where an executive director contracts a physical or mental disease which may make such executive director incapable of performance of his/her duties at least one (1) year; or
- B. where an executive director's achievement is severely unsatisfactory due to significant deficiency in his/her ability to perform duties.

3. Notwithstanding Paragraph 2 above, if the President Candidate Recommendation Committee recommends a candidate for president, such candidate shall recommend executive director candidates with the consent of the Board of Directors. In such case, the candidates recommended to become executive directors may not participate in the resolution of the Board of Director. Provided that, if the president candidate fails to be appointed as the President at the General Meeting of Shareholders, the president candidate's recommendation for executive director candidates shall be void.

4. Members of the Audit Committee who are not outside directors pursuant to Article 34-3 shall meet the requirements set forth in Paragraph 3 of Article 54-6 of the SEA. In case of appointing or dismissing, pursuant to Article 191-11 of the SEA, if the aggregate voting shares owned by the largest shareholder and its Specially Related Persons and other persons as prescribed by the Presidential Decree exceeds 3/100 of the total voting shares issued by the Company, the shareholders may not exercise voting rights for such shares in excess of the above percentage (amended on 27 December 2002).

5. Outside directors shall be recommended by the Outside Director Candidates Recommendation Committee after its examination of qualification of those recommended by the Outside Director Candidates Recommendation Committee, the shareholders who exercise the right under Article 191-14, Paragraph (1) of the SEA and the Shareholders' Committee, and shall be appointed at the General Meeting of Shareholders in accordance with Article 34-5 hereof.

Article 27 (Terms of Directors)

1. The term of the directors shall be determined at the General Meeting of Shareholders not exceeding three years and the term of a director who is newly appointed as a result of vacancy of an outside director shall be the remaining term of the predecessor; provided, however, that if the term of the directors expire after the last date of the last fiscal year during such term but prior to the close of the ordinary shareholders' meeting for the approval of the settlement of accounts for such last fiscal year, the term shall be extended until the end of the ordinary Shareholders' Meeting (amended on 27 December 2002).

2. (Deleted on 29 March 2000.)

Article 28 (Duties of the President and Executive Directors)

1. The President shall represent the Company and control the overall operations of the Company.

2. The directors shall assist the President. In case where the President is absent, the directors shall act for the President in the order stipulated in the Organization Regulation of the Company.

Article 29 (Deleted on 29 March 2000)

Article 30 (Remuneration for Directors)

1. The remuneration of executive directors including the President shall be determined by the Board of Directors within the scope set forth by a resolution of the Shareholders' Meeting. In such case, the President and the executive directors shall not participate in the resolution of the Board of Directors (amended on 27 December 2002).

2. (Deleted on 27 December 2002.)

3. The Company may compensate actual costs and expenses for outside directors by the resolution of the Board of Directors.

Article 31 (Retirement Allowances for Directors)

The retirement allowance for the President and executive directors shall be paid in accordance with the Directors Retirement Allowance Provisions provided by the resolution of the Shareholders' Meeting (amended on 27 December 2002).

Article 31-2 (Deleted on 27 December 2002)

Article 32 (President Candidate Recommendation Committee)

1. By a resolution of the Board of Directors, the Company shall have a President Candidate Recommendation Committee, a temporary committee of the Board of Directors, which is composed of not more than seven members in the following order. In such case, the President and the executive directors shall not participate in the resolution of the Board of Directors (amended on 27 December 2002):

A. No more than six outside directors selected by the Board of Directors;

- B. The incumbent President; provided, however, that where the incumbent President wishes to become a candidate for the president or where the President is not available for the committee temporarily, then the Board of Director only consisting of outside directors shall appoint one outside director as a candidate. Any one who is appointed as a member of the Committee may not become a candidate for the President;
 - C. (Deleted on 23 March 2001.)
2. The Chairman of the Committee shall be appointed by the resolution of the Committee.
 3. The President Candidate Recommendation Committee shall resolve all issues with the majority votes of the members present.
 4. The President Candidate Recommendation Committee shall be established by the resolution of the Board of Directors within sixty days prior to the expiration date of the President's term and shall be deemed dissolved upon the resolution of the Shareholders' Meeting to approve the candidate for the presidency recommended by the President Candidate Recommendation Committee. However, if a new President is appointed before the full term of the President expires due to dismissal or vacancy due to any other reason, the Recommendation Committee must be re-established within 30 days from the date of dismissal or vacancy.
 5. After identifying the candidates, the President Candidate Recommendation Committee shall consider the following factors as the examination standard for evaluating the presidential candidates in a meeting of the Board of Directors composed of outside directors and shall recommend the candidate to the General Meeting of Shareholders. Provided that, the Committee shall report the results of consideration to the Board of Directors prior to the recommendation to the General Meeting of Shareholders:
 - A. Factors such as experience and academic record, etc. that allow an objective examination on the knowledge of the candidate regarding business administration and economics economy;
 - B. Factors that allow for an objective examination of the individual's business experiences, such as past business achievements and the period length of the relevant experiences; and
 - C. Other factors that allow for an examination on the individual's qualification and capabilities as a CEO.
 6. The details regarding the operation, etc. of the President Candidate Recommendation Committee shall be determined by the resolution of the Board of Directors.

Article 32-2 (Contract with President)

1. The President Candidate Recommendation Committee shall consult with the person to be recommended as the candidate for president about terms and conditions of a contract on the management targets as determined by the Board of Directors, and may change the terms and conditions of such contract determined by the Board of Directors if deemed necessary in the course of such consultation; *provided that*, the President shall not participate in the resolution of the Board of Directors at which the management targets to the terms and conditions of the contract are determined.

2. The President Candidate Recommendation Committee shall recommend the candidate for president at the General Meeting of Shareholders pending the results of the consultations as provided under Paragraph 1 above.

3. In case that the candidate for president is appointed as the President at the General Meeting of Shareholders under Paragraph 2 above, the Chairman of the President Candidate Recommendation Committee in such capacity as the representative of the Company shall enter into a management agreement with the President.

4. The Board of Directors may evaluate the performance of the management agreement with the President under Paragraph 3 above or request an independent evaluation agency for such evaluation. If the Board of Directors deems the performance of the President to be unsatisfactory upon considering the results of the performance evaluation as compared to the management targets, the Board of Directors may suggest the dismissal of the President at the General Meeting of Shareholders. In such case, the President and the executive directors shall not participate in the resolution of the Board of Directors.

[This Article was newly established on 27 December 2002.]

Article 33 (Qualification of Outside Director)

Every outside director must be an independent expert or experienced person in the field of economics, business management, law, or relevant technology. The person falling under one of the following individual category may not become an outside director and shall lose his/her office as an outside director if he/she falls under one of the following category after becoming an outside director.

1. A person who falls under Subparagraphs 1 through 9 of Paragraph (4) of Article 54-5 of the SEA;
2. An individual or an employee or executive of a company who receives support from the Company, or a former employee or executive who have worked at such company within the past two years;
3. A government official (excluding educational officials - hereinafter the same) under the relevant laws or a person who has had been an official within last two years; and
4. (Deleted on 27 December 2002.)

Article 34 (Organization and Convocation of Board of Directors)

1. The Board of Directors shall be composed of the President and the directors, and it shall resolve important matters relating to the operations of the Company.

2. Notwithstanding Paragraph 1 above, the Board of Directors will be composed of directors, after excluding the President or the executive directors if this Articles of Incorporation prohibits the President or executive directors from participating in the resolution of the Board of Directors.

3. The President may convene the Board of Directors' meeting if any director requests such a meeting, and if the President is not present, Paragraph 2 of Article 28 hereof shall apply *mutatis mutandis*. Provided, that if the President refuses to convene the meeting of the Board of Directors without justifiable reason, another director may convene such meeting (amended on 27 December 2002).

4. When convening a Board of Directors' meeting, notice shall be given to the members of the Board of Directors three days prior to the meeting; provided, if where all the members of the Board of Directors agree, the procedure for convocation may be omitted.

Article 34-2 (Committee in the Board of Directors)

1. The Company shall establish an Audit Committee and Outside Director Candidate Recommendation Committee as internal committees of the Board of Directors, and if deemed necessary, the Company may establish any other committee by a resolution of the Board of Directors. Each Committee shall appoint their respective representative by a resolution thereof.

2. Details regarding the organization, authority, and operation of the internal committees of the Board of Directors shall be decided by the resolution of the Board of Directors.

Article 34-3 (Audit Committee)

1. The Audit Committee shall be composed of at least three directors, and no more than 2/3 of the members shall be outside directors.

2. The Audit Committee shall designate its representative by its resolution. The Audit Committee may designate several co-representatives.

Article 34-4 (Duty of the Audit Committee)

1. The Audit Committee shall audit the accounting matters and the operation of the Company.

2. After reviewing the agenda and documents to be submitted to the Shareholders' Meeting, the Audit Committee shall present to the Shareholders' Meeting its opinion as to whether such agenda and documents violate any relevant laws or this Articles of Incorporation, or include any other substantially unreasonable matters.

3. The Audit Committee may request for convocation of the extraordinary Shareholders' Meeting by submitting a letter stating the reasons and agenda for such meeting.

4. The Audit Committee may handle any other matters entrusted to it by the Board of Directors.

Article 34-5 (Outside Director Candidate Recommendation Committee)

1. The Outside Director Candidate Recommendation Committee shall be composed of no more than three members, more than one half of which shall be the outside directors.

2. The Outside Director Candidate Recommendation Committee shall perform the following duties:

- A. Examination of qualification and recommendation of the outside director candidates; and
- B. Other matters delegated by the Board of Directors.

Article 35 (Chairman of the Board of Directors)

1. The President shall be the Chairman of the Board of Directors. If the President is absent, Paragraph 2, Article 28 hereof shall apply *mutatis mutandis*.
2. In case where the President cannot participate in the resolution of the Board of Directors pursuant to this Articles of Incorporation, the Chairman of the Board of Directors shall be determined by the seniority of the outside directors.

Article 36 (Resolution of Board of Directors)

1. The Board of Directors shall be convened by the presence of a majority of the directors and the resolutions of the Board of Directors shall be adopted by a majority of votes of the members present of the Board of Directors. However, resolutions on dismissal of the President and the executive directors shall be adopted by affirmative votes of 2/3 of the outside directors.
2. The regulations on the Board of Directors shall apply to matters that are subject to review and resolution by the Board of Directors and matters in connection with operations of the Board of Directors.

Article 37 (Minutes of the Board of Directors)

With respect to the proceedings of meetings of the Board of Directors, the agenda for the meeting, course of the proceedings and the results thereof, and the person who opposed thereto and the reason of such opposition shall be recorded in the minutes to the Meeting of the Board of Directors which the Chairman and the directors present shall affix their names and seals or signatures (amended on 27 December 2002).

Article 38 (Managerial Officers)

1. The Company may have managerial officers for the purpose of efficient performance of the business of the Company.
2. The executive officers in Paragraph 1 shall be appointed by the President and the terms of such executive officers shall be no more than three years.
3. Remuneration and bonus for managerial officers shall be determined pursuant to the separate regulations established by the Board of Directors, and the retirement allowance for the executive officers shall be paid in accordance with the Executive Officers Retirement Allowance Provisions as adopted pursuant to the resolution of the Shareholders' Meeting.

(Deleted on 27 December 2002.)

[This Article was amended on 27 December 2002.]

Article 38-2 (In-house Advisors)

In order to obtain the advice for the material matters related to the business operation of the Company, the President may appoint as in-house advisors certain persons who were former Presidents, executive directors and managerial officers having sufficient experiences in the management of the Company or the persons who are necessary to establish the policy of the management of the Company.

[This Article was newly established on 27 December 2002.]

Article 39 (Management Committee)

1. The Company may have a Management Committee to review and resolve the matters entrusted to it there with by the Board of Directors.
2. (Deleted on 15 March 2002.)

Chapter 6 Accounting

Article 40 (Fiscal Year)

The fiscal year of the Company shall be from 1 January to 31 December of each year. The last day of the fiscal year shall be the financial settlement date.

Article 41 (Submission, Approval and Announcement of Financial Statements)

1. The President shall settle accounts at the end of each fiscal year and shall prepare the balance sheet, statement of profit and loss, statement of appropriation of retained earnings (hereinafter referred to as "Financial Statements"), the supporting statements and the business report. The President shall, after acquiring the approval of the Board of Directors on the above documents, submit such documents to the Audit Committee six weeks prior to the starting date of the ordinary Shareholders' Meeting.
2. The Audit Committee, after receipt of the documents set forth in Paragraph 1 above, shall prepare and submit an audit report within four weeks to the President.
3. The President shall submit the Financial Statements to an ordinary Shareholders' Meeting for approval and report the contents of the business report to the Shareholders' Meeting.
4. The President shall, immediately after the approval provided in Paragraph 3 above, notify to the public of the balance sheets and the independent auditor's opinion.
5. The President shall keep the Financial Statements, the business report and the audit report at it's the head office of the Company for five years and copies of each document at the branch offices of the Company three years commencing from date one week before the Shareholders' Meeting.

Article 41-2 (Public Notice of Management Information)

The Company shall publicly announce certain items necessary for the purpose of the transparency of the operation of the Company.

Article 42 (Appropriation of Earnings)

The Company shall dispose of the unappropriated retained earnings in the following order; provided, however, other items that the following may be disposed by a resolution of the Shareholders' General Meeting:

- A. Legal reserves (legal reserves under the Commercial Code);

- B. Other statutory reserves;
- C. Dividends
- D. Discretionary reserves;
- E. Other appropriation of retained earnings; and
- F. Unappropriated retained earnings to be carried forward to the subsequent year.

Article 43 (Dividends)

1. Dividends shall be paid in cash or in stocks.
2. In case the dividends are distributed in shares and the Company has issued several classes of shares, such distribution may be made through shares of different classes by a resolution of a Shareholders' Meeting (newly established on 15 March 2002).
3. Once a year, the Company may distribute interim dividends in cash with the record date set as 30 June by a resolution of the Board of Directors (newly established on 15 March 2002).
4. When distributing interim dividends, the same dividend ratio as that of the common shares of the Company shall be applied to the preferred shares set forth in Article 7-2 and the convertible preferred shares set forth in Article 7-3 (newly established on 15 March 2002).
5. Dividends in Paragraph 1 above shall be paid to the shareholders or the pledgees registered on the shareholders' register as of the end of each fiscal year; dividends in Paragraph 3 above shall be paid to the shareholders or the pledgees registered on the shareholders register of the Company as of the record date for mid-year dividends; provided, the interest on dividends shall not be paid (amended on 15 March 2002).

Article 43-2 (Redemption of Shares)

1. The Company may redeem the shares within the scope of profits attributable to the shareholders, by the resolution of the Board of Directors.
2. In order to redeem the shares pursuant to Paragraph 1, the Board of Directors shall adopt the following resolutions:
 - A. Types and the total number of shares to be redeemed;
 - B. The total amount of shares to be acquired for redemption; and
 - C. Acquisition period (the acquisition period shall be before the Ordinary General Meeting of Shareholders to be held first after the resolution of such redemption).
3. In case of acquisition of treasury shares for the purpose of redemption pursuant to Paragraph 1, the acquisition shall be made in accordance with the following criteria:
 - A. To be made in accordance with the method referred to in any of Subparagraphs of Paragraph 1 of Article 189-2 of the SEA. In case by the method referred to in the said Subparagraph 1, the acquisition period and method should be in compliance with the criteria set forth by the Enforcement Decree of the SEA.
 - B. The total amount of shares to be acquired for redemption shall not exceed the amount set forth by the Enforcement Decree of the SEA within the scope of profits

attributable to the shareholders as of the end of the relevant fiscal year pursuant to Paragraph 1 of Article 462 of the Commercial Code.

4. When the shares are redeemed pursuant to Paragraph 1, the matters referred to in each Subparagraph of Paragraph 2 and the purpose of redemption shall be reported to the Ordinary General Meeting of Shareholders to be held first after the resolution of such redemption.

Article 44 (Extinctive Prescription of the Claim for Dividend)

1. The claim for payment of dividends shall expire when it is not exercised for five years.
2. Dividends not paid until the completion of the extinctive prescription period provided in Paragraph 1 above shall belong to the Company.

ADDENDA (1 April 1989)

Article 1 Enforcement Date

This Articles of Incorporation shall be effective on the date of establishment of the Company.

Article 2 Interim Measure Concerning Government Investment

Any amount invested in the Korea Government Monopoly Corporation ("KGMC") by the Government before the execution of this Articles of Incorporation shall be deemed investment in the Company.

Article 3 Interim Measure Concerning Fiscal Year

The first fiscal year of the Company shall count in the fiscal year of the KGMC and shall end on the last day of the fiscal year of the Korean government.

Article 4 Interim Measure Concerning Budget

During the period of enforcement of this Articles of Incorporation, any budget, which has not been used by the KGMC during the fiscal year of 1989, shall be assigned to the Company's budget for the year 1989.

Article 5 Interim Measure Concerning Hiring Employees

1. The employees of the KGMC at the time of execution of this Articles of Incorporation shall become the employees of the Company.
2. The retirement age of the employees of the Company pursuant to Paragraph 1 above shall be determined in accordance with the rules for the retirement age of the KGMC. However, where the retirement age of the Company is greater than that of the KGMC, these rules shall not apply.

Article 6 Interim Measure Concerning Terms of the Executive Officers

The terms of the executive officers of the Company as of the execution of this Articles of Incorporation shall be calculated by adding the periods during which they have worked for KGMC in accordance with the previous rules.

Article 7 Expenses for Establishment

1. The expenses for the establishment of the Company shall not exceed KRW 150,000,000, and this amount shall be paid by KGMC.
2. The expenses in Paragraph 1 above shall include incorporation (establishment) registration fee, printing fee, other operational expenses, and expenses for the preparation of the operation of the Company including the initial cost of business.

Article 8 Names and Addresses of the Establishing Members

1. The names and addresses of the promoters of the Company are as follows.
2. The promoters, having created this Articles of Incorporation pursuant to Article 4 of the Addenda of the Korea Tobacco & Ginseng Corporation Act, hereby affix their signatures and seals.

ADDENDUM (26 April 1993)

This Articles of Incorporation shall be effective from the date of the approval of the Minister of Finance and Economy.

ADDENDUM (22 March 1995)

This Articles of Incorporation shall be effective from the date of the approval of the Minister of Finance and Economy.

ADDENDA (1 October 1997)

Article 1 Enforcement Date

This Articles of Incorporation shall be effective as of 1 October 1997.

Article 2 Relationship with the Relevant Laws

The Special Act, the Korea Tobacco & Ginseng Corporation Abolition Act and the Commercial Code shall apply to matters not provided in this Articles of Incorporation.

Article 3 Exceptions for Restriction of Acquisition of Shares

Paragraph 1, Article 10 hereof shall not apply to a person holding shares of the Company in excess of the limitation at the time when this Articles of Incorporation became effective.

Article 4 Exception for Appointment of the First Non-Executive Directors

The first outside directors shall be appointed at the Shareholders' General Meeting by the recommendation of the temporary outside directors recommendation committee pursuant to Article 3 of the Addenda of the Special Act.

Article 5 Exceptions for Extension of the Terms of the First President and the Directors

Notwithstanding Paragraph 1, Article 27 hereof, the term of the President and the directors elected for the first time since the enforcement of this Articles of Incorporation shall be extended until the last date of the Shareholders' Meeting, which was convened for the first time after the expiration of their terms.

ADDENDUM (9 October 1998)

This Article of Incorporation shall be effective from the date of resolution by the Shareholders' Meeting.

ADDENDUM (17 November 1998)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ADDENDUM (2 September 1999)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ADDENDUM (29 March 2000)

1. (Enforcement Date) This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting. However, amended rules of Articles 25, 26 (excluding Paragraph 4), 27, 29, 30, 31, 34, 34-2(1) (Establishment of the Audit Committee), 34-3, 34-4, 37, and 41 shall come into force from the day following the expiration date of the terms of the auditors designated under the previous rules or from the day following the date when the auditors resigned for certain reasons.

2. (Interim Measures) Terms, duties, remunerations for the auditors designated pursuant to the previous articles shall be governed by the previous articles.

ADDENDUM (27 December 2000)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ADDENDA (23 March 2001)

Article 1 Enforcement Date

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting. However, amended rules of Articles 9 (1), (5) and (6) and 43-2 shall come into force from the time when the SEA (law no. 6176) is amended and becomes effective; amended rules of Article 26 (4) shall come into force from the date of the General Meeting of Shareholders to be held first after this amendment; and amended rules of Articles 26 (1) and (5), 32, 34 (2) and 34-2 (1) concerning the establishment of the Outside Director Candidate Recommendation Committee, and amended rules of Articles 34-5 and 35(2) shall come into force from the date when the Company is excluded from the companies subject on the provisions of the Law Regarding the Management Structure Enhancement and Privatization of Public Enterprises.

Article 2 Interim Measure Concerning Outside Directors

Outside directors herein shall be deemed the non-executive directors under the Law Regarding the Management Structure Enhancement and Privatization of Public Enterprises until the Company is excluded from the companies subject on the provisions of the same Law.

Article 3 Interim Measure Concerning Functions of Shareholders' Committee

The provisions of Article 24 (4) 1 of this Articles of Incorporation shall not apply if the Company is excluded from the companies subject on the provisions of the Law Regarding the Management Structure Enhancement and Privatization of Public Enterprises.

Article 4 Exceptions for Terms of the Executive Officers

The executive officers of the Company to be appointed at the 14th Ordinary Shareholders' Meeting shall be grouped by the 1st, 2nd and 3rd groups. Notwithstanding the provisions of Article 27(1), the term of the executive officers in the 1st group shall be up to the Ordinary General Meeting of Shareholders to be held first after their appointment, that for the 2nd group shall be up to the Ordinary General Meeting of Shareholders to be held second after their appointment, and that for the 3rd group shall be up to the Ordinary General Meeting of Shareholders to be held third after their appointment. The number of executive officers of each group should be properly adjusted so as that such numbers are equal.

Article 5 Interim Measure Concerning Appointment of the Outside Directors

If the outside directors shall be appointed or re-appointed pursuant to the amendment of Article 25, the number of outside officers to be appointed each year should be properly adjusted so as that the ends of terms of the outside directors are equally allotted through three years.

ADDENDUM (15 March 2002)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ADDENDUM (27 December 2002)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ADDENDUM (14 March 2003)

This Articles of Incorporation shall be effective from the date of resolution of the Shareholders' Meeting.

ATTACHMENT B
TOBACCO BUSINESS ACT

Act No. 4065, 31 December 1988
Amended by Act No. 4682, 31 December 1993
Act No. 5453, 13 December 1997
Act No. 5454, 13 December 1997
Act No. 6078, 31 December 1999
Act No. 6460, 7 April 2001
Act No. 6625, 26 January 2002

CHAPTER I GENERAL PROVISIONS

Article 1 (Purpose)

The purpose of this Act is to ensure the sound development of the tobacco industry and contribute to the national economy, by prescribing matters concerning the production and distribution, etc. of tobacco. *<Amended by Act No. 6460, 7 April 2001>*

Article 2 (Definitions)

For the purpose of this Act, the term "tobacco" means what is manufactured in a state suitable for smoking, chewing, or smelling by using the leaves of the tobacco plant as principal raw materials. *[This Article Wholly Amended by Act No. 6460, 7 April 2001.]*

CHAPTER II Deleted.

Articles 3 through 10 Deleted. *<by Act No. 6460, 7 April 2001>*

CHAPTER III MANUFACTURE, SALE, EXPORT AND IMPORT

Article 11 (License for Tobacco Manufacturing Business)

(1) A person who intends to operate the tobacco manufacturing business shall obtain a license of the Minister of Finance and Economy under the conditions as prescribed by the Presidential Decree. The same shall apply to the case where intending to alter any principal matters as prescribed by the Presidential Decree from among the licensed matters.

(2) The Minister of Finance and Economy shall grant the license in case where any person who intends to obtain the license for tobacco manufacturing business under paragraph (1) (hereinafter referring to the "tobacco manufacturing business license") satisfies the criteria for equity capital, facility standards, technological manpower, research and development of tobacco manufacturing technology, and quality control for the protection of national health, etc.

[This Article Wholly Amended by Act No. 6460, 7 April 2001.]

Article 11-2 (Disqualification for Tobacco Manufacturing Business License)

Any person falling under one of the following subparagraphs shall be prohibited from obtaining the tobacco manufacturing business license:

1. A person of incompetency, quasi-incompetency or minor;
2. A person who has been sentenced to a bankruptcy and not reinstated as yet;
3. A person who has been consigned to an unsuspended sentence of imprisonment for violating this Act, and for whom not more than one year has passed after the completion (including the case of deeming to be completed) of or exemption from its execution;
4. A person who is under a grace period after having been consigned to a suspended sentence of imprisonment for violating this Act;
5. A person for whom two years have not elapsed since a cancellation of the tobacco manufacturing business license under Article 11-4; and
6. A corporation whose representative falls under one of subparagraphs 1 through 5.

[This Article Newly Inserted by Act No. 6460, 7 April 2001.]

Article 11-3 (Transfer or Takeover, etc. of Tobacco Manufacturing Business)

(1) A person who has obtained a tobacco manufacturing business license (hereinafter referred to as the "manufacturer") shall, where he intends to transfer the tobacco manufacturing business or merge with another corporation, file a report thereon with the Minister of Finance and Economy under the conditions as determined by the Ordinance of the Ministry of Finance and Economy.

(2) Where there exists a report on transfer under paragraph (1), a person who has taken over the tobacco manufacturing business shall succeed to the manufacturer's status of the transferor of tobacco manufacturing business, and where there exists a report on merger of corporations, a corporation to be established or to survive by such merger shall succeed to the manufacturer's status of a corporation to be extinguished by such merger.

(3) In case where a manufacturer has died, if an heir intends to continue the tobacco manufacturing business, he shall file a report thereon with the Minister of Finance and Economy within 30 days after the date on which the decedent has died, under the conditions as determined by the Ordinance of the Ministry of Finance and Economy.

(4) In case where an heir has filed a report on succession under paragraph (3), the tobacco manufacturing business license for the decedent shall be deemed the tobacco manufacturing business license for the heir in the period from the date on which the decedent has died to the date of such report.

(5) An heir who has filed a report on succession under paragraph (3) shall succeed to the manufacturer's status of the decedent.

(6) The provisions of Article 11-2 shall apply *mutatis mutandis* to the report under paragraphs (1) and (3). [This Article Newly Inserted by Act No. 6460, 7 April 2001.]

Article 11-4 (Cancellation, etc. of Tobacco Manufacturing Business)

The Minister of Finance and Economy may, where a manufacturer falls under one of the following subparagraphs, either cancel the tobacco manufacturing business license or order the suspension of such business by fixing the period of less than one year: *Provided*, That where falling under subparagraphs 1 and 3, he shall cancel such license:

1. Where he has obtained the tobacco manufacturing business license by illegal means;
2. Where he falls short of the criteria for equity capital, facility standards, technological manpower, research and development of tobacco manufacturing technology, and quality control for the protection of national health, etc. under Article 11 (2);

3. Where he falls under disqualification of each subparagraph of Article 11-2: *Provided*, That it shall not apply to the case where the representative of a corporation falls under such causes, and he is replaced within six months; and
4. Where he violates this Act or the orders issued under this Act.

[*This Article Newly Inserted by Act No. 6460, 7 April 2001.*]

Article 12 (Sale of Tobacco)

(1) Tobacco manufactured by a manufacturer shall be sold by such manufacturer, and tobacco imported from foreign countries shall be sold by such import and sale business operator (referring to the person who has registered for a tobacco import and sale business under Article 13 (1); hereinafter the same shall apply) to wholesalers (referring to persons who have registered for a wholesale business under Article 13 (1); hereinafter the same shall apply) or retailers (referring to persons who are designated as retailers under Article 16 (1); hereinafter the same shall apply). <Amended by Act No. 6460, 7 April 2001>

(2) No person other than a retailer may sell any tobacco to the consumers.
<Amended by Act No. 6460, 7 April 2001>

Article 13 (Registration of Tobacco Sale Business)

(1) Any person who intends to run the business of importing and selling tobacco shall register his business with the Minister of Finance and Economy, and any person who intends to do the business of wholesaling tobacco (referring to the business of selling tobacco to other wholesalers or retailers; hereinafter the same shall apply) shall register his business with the Seoul Metropolitan City Mayor, Metropolitan City Mayor or *Do* governor (hereinafter referred to as the "Mayor/*Do* governor") having jurisdiction over the location of his head office or his principal office. The same shall also apply to the case in which he intends to change important matters prescribed by the Ordinance of the Ministry of Finance and Economy from among registered matters. <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(2) Any person who intends to register his business in accordance with the provisions of paragraph (1) shall meet requirements prescribed by the Presidential Decree.

Article 14 (Disqualifications for Registration of Tobacco Sale Business)

Any person falling under one of the following subparagraphs shall be prohibited from registering the business of importing and selling tobacco or the business of wholesaling tobacco under Article 13 (1): <Amended by Act No. 6460, 7 April 2001>

1. A person of incompetency, quasi-incompetency or minor;
2. A person who has been sentenced to a bankruptcy and not reinstated as yet;
3. A person who has been consigned to an unsuspended sentence of imprisonment for violating this Act, and for whom not more than one year has passed after the completion (including the case of deeming to be completed) of or exemption from its execution;
4. A person who is under a grace period after having been consigned to a suspended sentence of imprisonment for violating this Act;
5. A person for whom two years have not elapsed since a cancellation of the registration under Article 15(1); and
6. A corporation whose representative falls under one of subparagraphs 1 through 5.

[*This Article Wholly Amended by Act No. 6078, 31 December 1999.*]

Article 15 (Cancellation, etc. of Registration of Tobacco Sale Business)

(1) The Minister of Finance and Economy or the Mayor/*Do* governor shall, where any import and sale business operator or any wholesaler falls under any case of the following subparagraphs, cancel his business registration: *<Amended by Act No. 6460, 7 April 2001>*

1. Where he has registered his business in an illegal manner;
2. Where he falls under any subparagraph of Article 14;
3. Where a person who has been subjected to a disposition taken to suspend his business twice for the recent five years falls again under any subparagraph of paragraph (3); and
4. Where he is in the business during a period for which his business is suspended.

(2) The provisions of paragraph (1) shall not apply where a juristic person replaces its representative within 6 months from the date on which such juristic person falls under subparagraph 6 of Article 14 or by the date on which 6 months have elapsed since the date on which a successor who inherited the status of an import and sale business operator or a wholesaler falls under any of subparagraphs 1 through 5 of Article 14. *<Amended by Act No. 6460, 7 April 2001>*

(3) The Minister of Finance and Economy or the Mayor/*Do* governor may, where any import and sale business operator or any wholesaler falls under any of the following subparagraphs, order him to suspend his business for a fixed period not exceeding one year: *<Amended by Act No. 6460, 7 April 2001>*

1. Where he sells tobacco to any consumer in contravention of Article 12 (2);
2. Where a person importing and selling manufactured tobacco fails to report sale prices in accordance with the provisions of Article 18 (2);
3. Where he commits a violation of the provisions of Article 20 (1);
4. Where he continues to suspend his business for not less than 6 months without filing a report thereof in accordance with the provisions of Article 22-2 (1);
5. Where he commits a violation of the provisions of Article 25; and
6. Where he commits a violation of this Act or orders given under this Act.

[This Article Wholly Amended by Act No. 6078, 31 December 1999.]

Article 16 (Designation of Retailer)

(1) Any person who intends to do a tobacco retail business (referring to the business of selling directly to consumers) shall obtain a designation as a retailer of tobacco from the head of *Si/Gun*/autonomous *Gu* (hereinafter referred to as the "head of *Si/Gun/Gu*") having jurisdiction over the location of the business place concerned. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>*

(2) Any person falling under any of the following subparagraphs shall be prohibited from being designated as a retailer of tobacco: *<Amended by Act No. 6078, 31 December 1999>*

1. A person of incompetency, quasi-incompetency or minor;
2. A person who has been sentenced to a bankruptcy and not reinstated as yet;
3. A person who has been consigned to an unsuspended sentence of imprisonment for violating this Act, and for whom not more than one year has passed since the completion (including the case of deeming to be completed) of or exemption from its execution;
4. A person who is under a grace period after having been consigned to a suspended sentence of imprisonment for violating this Act;

5. A person for whom two years have not elapsed since a cancellation of the designation under Article 17 (1); and
6. A corporation whose representative falls under one of subparagraphs 1 through 5.

(3) With respect to a person who intends to sell tobacco at a place which is feared to damage the quality of tobacco or is deemed inappropriate for the business of selling tobacco, the head of *Si/Gun/Gu* may refrain from designating a retailer. <Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(4) Standards and procedures for the designation of retailers and other matters necessary for the designation shall be determined by the Ordinance of the Ministry of Finance and Economy. <Amended by Act No. 4682, 31 December 1993; Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999>

Article 17 (Cancellation, etc. of Retailer Designation)

(1) The head of *Si/Gun/Gu* shall, if any retailer of tobacco falls under any case of the following subparagraphs, cancel the designation of his retail business: <Amended by Act No. 6460, 7 April 2001>

1. Where he obtains a designation of his retail business in an illegal manner;
2. Where he falls under any subparagraph of Article 16 (2): *Provided*, That the same shall not apply to the case in which a representative of a juristic person falling under such cause is replaced within 6 months;
3. Where a person who has been subjected to a disposition taken to suspend his business twice for the recent five years falls again under any subparagraph of paragraph (2);
4. Where he continues his business during a period for which his business is suspended; and
5. Where he has failed to do business for not less than 60 days without making any report on discontinuance or suspension of business.

(2) The head of *Si/Gun/Gu* may, where any retailer of tobacco falls under any of the following subparagraphs, order him to suspend his business for a fixed period not exceeding one year: <Amended by Act No. 6460, 7 April 2001>

1. Where he commits a violation of the provisions of Article 18 (4);
2. Where he commits a violation of the provisions of Article 20;
3. Where he fails to implement any corrective order or measure such as the removal of advertisements under the provisions of Article 25(3);
4. Where he fails to continuously purchase or sell tobacco without any justifiable reasons during a period prescribed by the Ordinance of the Ministry of Finance and Economy; and
5. Where he commits a violation of this Act or orders given under this Act.

(3) Matters necessary for the standards and procedures, etc. for the disposition of business suspension under paragraph (2) shall be determined by the Ordinance of the Ministry of Finance and Economy. <Newly Inserted by Act No. 6460, 7 April 2001>
[This Article Wholly Amended by Act No. 6078, 31 December 1999.]

Article 18 (Selling Price of Tobacco)

(1) The selling price of tobacco made by a manufacturer shall be determined by the manufacturer under the conditions as prescribed by the Presidential Decree. *<Amended by Act No. 6460, 7 April 2001>*

(2) Any import and sale business operator who imports tobacco from foreign countries shall report to the Minister of Finance and Economy on the selling price of such tobacco under the conditions as prescribed by the Presidential Decree. This provisions shall also apply if he desires to change the reported selling price. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>*

(3) When a manufacturer or import-distributor has determined or reported the selling price as referred to in paragraph (1) or (2), he shall announce it publicly under the conditions as prescribed by the Ordinance of the Ministry of Finance and Economy. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>*

(4) A retailer shall sell tobacco at the selling price as announced publicly under paragraph (3). *<Amended by Act No. 6460, 7 April 2001>*

Article 19 (Tobacco for Special Use)

(1) A manufacturer may manufacture and sell the tobacco for special use as prescribed by the Presidential Decree. *<Amended by Act No. 6460, 7 April 2001>*

(2) No tobacco for special use as referred to in paragraph (1) shall be sold for any purpose other than its proper use. *<Amended by Act No. 6460, 7 April 2001>*

Article 20 (Prohibition of Sale and Restriction on Purchase)

(1) No person shall sell tobacco with its packing and contents changed. *<Amended by Act No. 6460, 7 April 2001>*

(2) Deleted. *<by Act No. 6460, 7 April 2001>*

Articles 21 and 22 Deleted. *<by Act No. 6460, 7 April 2001>*

Article 22-2 (Suspension or Discontinuance of Tobacco Sale Business, etc.)

(1) Where any person importing and selling tobacco, any wholesaler of tobacco or any retailer of tobacco intends to suspend or discontinue his business for a period exceeding what is prescribed by the Ordinance of the Ministry of Finance and Economy, such person importing and selling tobacco shall file a report thereof to the Minister of Finance and Economy, such wholesaler of tobacco to the Mayor/Do governor and such retailer of tobacco to the head of *Si/Gun/Gu*, respectively. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999>*

(2) Upon filing a report as referred to in paragraph (1), the period of business suspension, procedure of report, and other matters necessary for the report on a suspension or discontinuance of business shall be determined by the Ordinance of the Ministry of Finance and Economy. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999>*
[This Article Newly Inserted by Act No. 4682, 31 December 1993.]

Article 22-3 (Hearing)

The Minister of Finance and Economy, the Mayor/*Do* governor, or the head of *Si/Gun/Gu* shall, where he intends to take a disposition falling under any of the following subparagraphs, hold hearings: <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

1. Cancellation of the license for manufacturing tobacco under Article 11-4;
- 1-2. Cancellation of the registration for tobacco import and sale business, or of the registration for tobacco wholesale business; and
2. Cancellation of the designation of a retailer under Article 17 (1).

[*This Article Wholly Amended by Act No. 5453, 13 December 1997.*]

CHAPTER IV SUPPLEMENTARY PROVISIONS

Article 23 (Substitute for Tobacco)

Anything which is in a similar form to tobacco and usable for smoking shall be considered as tobacco and subject to the provisions of Article 11: *Provided*, That any smoking products manufactured, without using tobacco leaves, for the purpose of quitting smoking shall be excluded. <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

Article 24 (Report and Confirmation of Related Books, etc.)

(1) The Minister of Finance and Economy may, when deemed necessary to enforce this Act, have a manufacturer and import and sale business operator, the Mayor/*Do* governor may have a wholesaler, and the head of *Si/Gun/Gu* may have a retailer, respectively, file a report on his business. <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(2) The Minister of Finance and Economy, the Mayor/*Do* governor, or the head of *Si/Gun/Gu* may have his officials confirm or examine related books or documents, etc. of the manufacturer and import and sale business operator, wholesaler, or retailer, respectively. <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(3) Any official who carries out the confirmation or perusal under paragraph (2) shall carry with him a certificate indicating his competence and show it to interested parties.

Article 25 (Indication of Warning Words and Restriction on Advertisement on Tobacco)

(1) The warning words clearly expressing the effect that smoking is harmful to health shall be indicated on the wrapping paper of a tobacco case and in the advertisement as prescribed by the Presidential Decree (including sales promotion activities; hereinafter the same shall apply). <Amended by Act No. 6460, 7 April 2001>

(2) The Minister of Finance and Economy may prohibit or restrict any advertisement on tobacco under the conditions as pre-scribed by the Presidential Decree. <Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(3) In case where no words of warning under paragraph (1) are in existence or the prohibition of or restrictions on ads under paragraph (2) are violated, the Minister of Finance and Economy, the Mayor/*Do* governor or the head of *Si/Gun/Gu* may order a tobacco manufacturer and import and sale business operator, wholesaler, or retailer, respectively, to restrict the imports or sales of relevant tobacco, or to issue orders or to take measures which are required for the corrections such as the removal of ads, etc. <Amended by Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(4) The Minister of Finance and Economy shall determine the words of warning referred to in paragraph (1) after consulting with the Minister of Health and Welfare and the Chairman of the Juvenile Protection Committee. <Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999>

Article 25-2 (Indication of Tobacco Ingredients)

(1) A manufacturer and an import and sale business operator shall indicate the major ingredients and their contents in the smoke of one cigarette on the wrapping paper of tobacco packs and the advertisements as prescribed by the Presidential Decree.

(2) Kinds of ingredients, criteria for measurement, designation of measuring agency, method of indication, scope of allowable errors, omission of indication of ingredients, which are to be indicated under paragraph (1), and other matters necessary for indication of ingredients, shall be prescribed by the Presidential Decree.

(3) The provisions of Article 25 (3) shall apply *mutatis mutandis* to a case where there exists no indication of ingredients and their contents under paragraph (1), and where the contents of indicated ingredients are in excess of the scope of allowable errors.

[This Article Newly Inserted by Act No. 6625, 26 January 2002.]

Article 25-3 (Participation of Manufacturers, etc. in Public Activities)

(1) The Minister of Finance and Economy may have a manufacturer carry out directly public activities, such as public health, medical care, protection of environment, etc., and projects such as the support for tobacco cultivation, within a limit of 20 won per 20 cigarettes which he sells, under the conditions as determined by the Ordinance of the Ministry of Finance and Economy, or make a contribution to those carrying out such projects. <Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(2) Any import and sale business operator may carry out directly such public activities as referred to in paragraph (1), or make any contribution to those who carry out such activities. In this case, the provisions of paragraph (1) shall apply *mutatis mutandis*.

(3) The Minister of Finance and Economy shall consult with the heads of related central administrative agencies about fundamental matters concerning the activities carried out by a manufacturer or an import and sale business operator under paragraphs (1) and (2). <Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>

(4) A person who intends to run the business directly supporting the development of agricultural technology of tobacco cultivators with the contribution from manufacturers under paragraph (1) shall establish a corporation by obtaining an approval of the Minister of Finance and Economy. <Newly Inserted by Act No. 6460, 7 April 2001>

(5) The provisions concerning the foundation in the Civil Act shall apply *mutatis mutandis* to the establishment and operation of the corporation under paragraph (4) except for those as otherwise provided in this Act. <Newly Inserted by Act No. 6460, 7 April 2001>
[This Article Newly Inserted by Act No. 4682, 31 December 1993.]

Article 25-4 (Prohibition of Money Providing, etc. for Promotion of Tobacco Sales)

The manufacturers, import and sale business operators and wholesalers shall be prohibited from providing money and other similar activities as prescribed by the Presidential Decree, to the retailers in order to promote their tobacco sales.

[This Article Newly Inserted by Act No. 6460, 7 April 2001.]

Article 26 (Delegation of Authority)

Part of the authority of the Minister of Finance and Economy as prescribed by this Act may be delegated to the head of the local government under the conditions as prescribed by the Presidential Decree. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999; Act No. 6460, 7 April 2001>*

CHAPTER V PENAL PROVISIONS

Article 27 (Penal Provisions)

(1) Any person who has manufactured tobacco without obtaining a license for tobacco manufacturing business in contravention of Article 11 shall be punished by imprisonment for not more than 3 years, or a fine not exceeding 20 million won.

(2) Any attempted crime under paragraph (1) shall be punished.

(3) In cases of paragraphs (1) and (2), the punishment of imprisonment and fine may be concurrently imposed. *[This Article Wholly Amended by Act No. 6460, 7 April 2001.]*

Article 27-2 (Penal Provisions)

Any person who falls under any of the following subparagraphs shall be punished by imprisonment for not more than one year, or a fine not exceeding ten million won: *<Amended by Act No. 6625, 26 January 2002>*

1. A person who has failed to file a report on transfer, takeover, etc. of tobacco manufacturing business in contravention of Article 11-3 (1) or (3);
2. A person who has manufactured a substitute for tobacco in contravention of Article 23;
3. A person who has manufactured or imported tobacco on which the words of warning under Article 25(1) are not indicated, or such words as violating thereof are indicated;
4. A person who has made any advertisement on tobacco in contravention of Article 25(2); and
5. A person who has manufactured or imported tobacco on which the ingredients and their contents under Article 25-2(1) are not indicated, or the content of each ingredient is falsely indicated.

[This Article Newly Inserted by Act No. 6460, 7 April 2001.]

Article 27-3 (Penal Provisions)

Any person who falls under any of the following subparagraphs shall be punished by a fine not exceeding five million won: *<Amended by Act No. 6625, 26 January 2002>*

1. A person who has sold tobacco to consumers without obtaining a designation of retailer in contravention of Article 12(2);

2. A person who has run tobacco import and sale business or tobacco wholesaler business without making a registration in contravention of Article 13(1);
3. A person who has failed to comply with the orders or measures required for correction, such as the removal of advertising materials under Article 25(3);
- 3-2. A person who has failed to comply with the orders or measures required for correction, such as restrictions, etc. on the import or sale of tobacco under Article 25-2(3); and
4. A person who has committed the acts of providing money, etc. in contravention of Article 25-4.

[This Article Newly Inserted by Act No. 6460, 7 April 2001.]

Article 28 (Fine for Negligence)

(1) Any person who fails to make a report on the selling price (including the report on any change) in violation of the provisions of Article 18(2) shall be punished by a fine for negligence not exceeding two million won. *<Newly Inserted by Act No. 4682, 31 December 1993>*

(2) Any person who falls under any of the following subparagraphs shall be punished by a fine for negligence not exceeding one million won: *<Amended by Act No. 4862, 31 December 1993; Act No. 6460, 7 April 2001>*

1. A retailer who sells tobacco in violation of the provisions of Article 18 (4);
2. Deleted; and *<by Act No. 6460, 7 April 2001>*
3. A retailer who has suspended his business in excess of the suspension period as prescribed by Article 22-2(2).

(3) Any person who falls under any of the following subparagraphs shall be punished by a fine for negligence not exceeding 500 thousand won: *<Amended by Act No. 6460, 7 April 2001>*

1. Deleted; *<by Act No. 6460, 7 April 2001>*
2. A person who has sold tobacco for special use for a different purpose, in violation of the provisions of Article 19(2); and
3. A person who has sold tobacco after changing the packing and contents thereof in violation of the provisions of Article 20(1).

Article 29 (Procedures for Imposition of Fine for Negligence)

(1) The Minister of Finance and Economy, the Mayor/*Do* governor or the head of *Si/Gun/Gu* (hereafter referred to as the "imposition right holder" in this Article) shall impose and collect a fine for negligence under the provisions of Article 28 according to their respective jurisdiction under the conditions as prescribed by the Presidential Decree. *<Amended by Act No. 6078, 31 December 1999>*

(2) Any person who is dissatisfied with a disposition of a fine for negligence as referred to in paragraph (1) may raise an objection to an imposition right holder within thirty days from the date when he is aware of it. In this case, the imposition right holder shall notify without delay the competent court thereof, which shall, upon receiving the notification, bring the case of a fine for negligence to a trial under the non-contentious case litigation procedures. *<Amended by Act No. 5454, 13 December 1997; Act No. 6078, 31 December 1999>*

(3) If a fine for negligence is not paid without raising an objection within the period as referred to in paragraph (2), it shall be collected according to the examples of taking a disposition to collect national or local taxes in arrears. *<Amended by Act No. 6078, 31 December 1999>*

Article 30 (Confiscation and Additional Collection)

- (1) Any leaf tobacco and tobacco involved in the crime under Articles 27, 27-2 and 27-3 shall be confiscated. *<Amended by Act No. 6460, 7 April 2001>*
- (2) If it is impossible to confiscate those items as referred to in paragraph (1), the value thereof shall be collected additionally.
- (3) Deleted. *<by Act No. 6460, 7 April 2001>*

Article 31 (Restriction on Application of Criminal Act)

With respect to those who have committed any crime as prescribed by this Act, the provisions of Articles 9, 10(2), 11, 16, 32(2), 38(1)2 of the Criminal Act concerning the restriction or aggravation of the concurrence of fines, and those of Article 53 of the said Act shall not be applied: *Provided*, That this provisions shall not apply to imprisonment in a case where the criminal is to be punished by imprisonment or by both an imprisonment and fine.

Article 32 (Joint Penal Provisions)

If a representative of a juristic person, or an agent, employer, or other employee of a juristic person or an individual commits an offense as provided in Articles 27, 27-2 and 27-3 with respect to affairs of the juristic person or the individual, the fine as provided in the said respective Article shall also be imposed on such a juristic person or individual, in addition to punishment of the offender. *<Amended by Act No. 6460, 7 April 2001>*

ADDENDA

Article 1 (Enforcement Date)

This Act shall enter into force on 1 January 1989.

Article 2 (Repeal of Other Acts)

The Tobacco Monopoly Act shall hereby be repealed.

Article 3 (Amendment, etc. of Other Acts)

- (1) and (2) Omitted.
- (3) Any citation of the Tobacco Monopoly Act in other Acts and subordinate statutes at the time when this Act enters into force shall be considered to have cited this Act, and that of the provisions of the Tobacco Monopoly Act shall be considered to have cited the provisions of this Act if they are the corresponding provisions in this Act.

Article 4 (General Transitional Measures)

- (1) What was enforceable under the previous Tobacco Monopoly Act at the time when this Act enters into force shall be considered to be in force, pursuant to the corresponding provisions of this Act.

(2) Any disposition or other acts taken by the Minister of Finance and Economy under the previous Tobacco Monopoly Act before the enforcement of this Act, shall be considered as that or those taken pursuant to the corresponding provisions of this Act.

(3) Any public notice or other acts taken by the Korea Monopoly Corporation, or any application filed with or other acts taken by the said Corporation, under the previous Tobacco Monopoly Act before the enforcement of this Act, shall be considered as that or those taken by or for the Corporation pursuant to the corresponding provisions of this Act.

Article 5 (Transitional Measures concerning Cultivation of Tobacco Plant and Purchase of Leaf Tobacco)

Notwithstanding the provisions of Chapter 2 of this Act, the provisions of the previous Tobacco Monopoly Act shall apply to the first cultivation of tobacco plants and the first purchase of leaf tobacco for raw materials of manufactured tobacco after this Act enters into force.

Article 6 (Transitional Measures concerning Designation of Manufactured Tobacco Retailer)

Any person who is designated as a manufactured tobacco retailer by the Korea Monopoly Corporation under the previous Tobacco Monopoly Act, before the enforcement of this Act, shall be considered to have been designated by the Minister of Finance and Economy under this Act.

Article 7 (Transitional Measures concerning Operation of Corporation)

Operations of the Corporation as prescribed by this Act shall be carried out by the Korea Monopoly Corporation under the Korea Monopoly Corporation Act until the Korea Tobacco and Ginseng Corporation Act is enacted and enforced.

Article 8 (Transitional Measures concerning Application of Penal Provisions)

Application of the penal provisions to any act committed before this Act enters into force, shall be subject to the provisions of the previous Tobacco Monopoly Act.

ADDENDA <Act No. 4682, 31 December 1993>

(1) (Enforcement Date) This Act shall enter into force on 1 January 1994.

(2) (Transitional Measures concerning Application of Penal Provisions) The application of the penal provisions to any act committed before this Act enters into force, shall be governed by the previous provisions.

ADDENDA <Act No. 5453, 13 December 1997>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 January 1998. (Proviso Omitted.)

Article 2 Omitted.

ADDENDUM <Act No. 5454, 13 December 1997>

This Act shall enter into force on 1 January 1998. (Proviso Omitted.)

ADDENDA <Act No. 6078, 31 December 1999>

- (1) (Enforcement Date) This Act shall enter into force on the date of its promulgation.
- (2) (Transitional Measures concerning Disqualifications) Any person who has his import and sale business of manufactured tobacco or his wholesale business of manufactured tobacco registered, or his retail business of manufactured tobacco designated under the previous provisions at the time that this Act is enforced, where he falls under disqualifications as described in the amended provisions of Article 14 or 16 (2) due to unavoidable reasons that occurred prior to the enforcement of this Act, shall be dealt with according to the previous provisions notwithstanding the amended provisions.
- (3) (Transitional Measures concerning Registration of Sale Business of Manufactured Tobacco) Any person who has his wholesale business of manufactured tobacco registered under the previous provisions at the time that this Act is enforced shall be deemed to register his business in accordance with the amended provisions of Article 13(1).
- (4) (Transitional Measures concerning Designation of Retail Business of Manufactured Tobacco) Any person who has his retail business of manufactured tobacco designated under the previous provisions at the time that this Act is enforced shall be deemed to have his business designated in accordance with the amended provisions of Article 16(1).

ADDENDA <Act No. 6460, 7 April 2001>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 July 2001.

Article 2 (Transitional Measures Following Abolition of Systems of Tobacco Cultivation and Leaf Tobacco Purchase)

The Korea Tobacco and Ginseng Corporation (hereinafter referred to as the "Corporation") under subparagraph 1 of Article 2 of the Act on the Improvement of Managerial Structure and Privatization of Public Enterprises, which has run tobacco manufacturing business under the previous provisions at the time of enforcement of this Act, may conclude a contract with the tobacco cultivators on the tobacco cultivation, purchase of leaf tobacco as for raw materials of tobacco, and support to tobacco cultivators, and perform it.

Article 3 (Transitional Measures concerning Existing Manufacturers)

The Corporation which has run the tobacco manufacturing business under the previous provisions at the time of enforcement of this Act shall be considered to have obtained a license for tobacco manufacturing under the amended provisions of Article 11.

Article 4 Omitted.

ADDENDA <Act No. 6625, 26 January 2002>

- (1) (Enforcement Date) This Act shall enter into force on 1 January 2003.
- (2) (Application Example) This Act shall apply from the portion of carrying out from the manufacturing place or bonded area or of advertisement for the first time since the enforcement of this Act.
- (3) Omitted.

ATTACHMENT C

ENFORCEMENT DECREE OF THE TOBACCO BUSINESS ACT

Wholly Amended by Presidential Decree No. 17267, 30 June 2001
Amended by Presidential Decree No. 17761, 23 October 2002

Article 1 (Purpose)

The purpose of this Decree is to prescribe for matters delegated by the Tobacco Business Act and those necessary for the enforcement thereof.

Article 2 (License for Tobacco Manufacturing Business)

(1) Any person who intends to obtain a license for tobacco manufacturing business under the former part of Article 11 (1) of the Tobacco Business Act (hereinafter referred to as the "Act") (hereinafter referred to as the "license for tobacco manufacturing business") shall submit an application for license for tobacco manufacturing business stating the matters falling under any of the following subparagraphs to the Minister of Finance and Economy along with the documents as determined by the Ordinance of the Ministry of Finance and Economy:

1. Personal details of an applicant;
2. Location of principal office and manufacturing place;
3. Equity capital;
4. Types of tobacco to be manufactured; and
5. Annual manufacturing scale.

(2) The Minister of Finance and Economy may, upon receipt of an application for a license for tobacco manufacturing business under paragraph (1), and where an applicant for a license for tobacco manufacturing business possesses the equity capital under Article 4(1)1, grant a license for tobacco manufacturing business on condition that he is to be equipped with the manufacturing facilities, technical manpower, testing equipment under subparagraphs 2 through 4 of the same paragraph within 3 years: *Provided*, That the Minister of Finance and Economy may extend such period within the limit of one year if it is deemed that there exists an inevitable reason.

Article 3 (Alterations in Licensed Matters)

(1) The term "principal matters as prescribed by the Presidential Decree from among the licensed matters" in the latter part of Article 11(1) of the Act means the alterations in the matters provided in Article 2(1)3 and 5 (including the case where the processing facilities of raw materials are required to be additionally installed as he becomes not to fall under the proviso of Article 4(1)2).

(2) Any person who intends to obtain a modified license under the latter part of Article 11(1) of the Act shall submit an application for modified license for tobacco manufacturing business to the Minister of Finance and Economy along with the documents as determined by the Ordinance of the Ministry of Finance and Economy. In this case, if he intends to additionally install the processing facilities of raw materials as he becomes not to fall under the proviso of Article 4(1)2, he shall submit the same application within 6 months from the date on which he becomes not to fall under the same provisions.

(3) Any person who has obtained a modified license for tobacco manufacturing business under the latter part of paragraph (2) shall install the processing facilities of raw materials within 3 years from the date on which a modified license has been received: *Provided*, That the Minister of Finance and Economy may extend such period within the limit of one year if it is deemed that there exists an inevitable reason.

Article 4 (Criteria for License for Tobacco Manufacturing Business)

(1) The criteria for the equity capital, facility standards, technical man-power, research and development of tobacco manufacturing technology and the quality control for national health protection, etc. under Article 11(2) of the Act shall be as follows:

1. Equity capital: to be in excess of 30 billion won;
2. Facility standards: to install the facilities capable of manufacturing tobacco in excess of 5 billion pieces per annum (based on 16-hour operation daily), which are equipped with as assembly line from the raw material processing to the cigarette manufacturing and product packing: *Provided*, That the processing facilities of raw materials may not be installed not later than the time when the tobacco of 10 billion pieces per annum is manufactured;
3. Technical manpower: to have the specialized technology manpower of not less than 5 persons who have the career for not less than 3 years in the field of tobacco manufacturing and quality control; and
4. Research and development of tobacco manufacturing technology and the quality control for national health protection: to be equipped with the testing equipment capable of analysing the function and quality of products (temperature-resistant and humidity-resistant equipment, measuring apparatus of smoky ingredients, measuring apparatus of air-dilution rate, measuring apparatus of suction-resistance), and to provide the standards, and guidances of quality control.

(2) In computing the quantity of annual tobacco manufactured by manufacturers under the proviso of paragraph (1) 2, such computation shall be done by summing up both the annual manufacturing volume of the relevant manufacturer and annual import quantity of tobacco produced by the affiliate firms under subparagraph 3 of Article 2 of the Monopoly Regulation and Fair Trade Act (in case where the manufacturer is a domestic business place of a foreign corporation, referring to the relevant foreign corporation).

Article 5 (Requirements for Registration of Tobacco Sale Business)

(1) Any person who intends to register for the business of importing and selling tobacco under Article 13 of the Act shall conclude a contract for tobacco supply with a foreign tobacco manufacturer.

(2) Any person who intends to register for the wholesale business of tobacco under Article 13 of the Act shall satisfy the requirements falling under any of the following subparagraphs:

1. To install the storage facilities of tobacco; and
2. To conclude a contract for tobacco supply with a manufacturer, tobacco import-distributor (hereinafter referred to as the "import-distributor") or another tobacco wholesaler (hereinafter referred to as the "wholesaler").

Article 6 (Selling Price of Tobacco)

(1) In case where a manufacturer determines the selling prices of tobacco to the consumers, that are manufactured by him, under Article 18(1) of the Act, he shall make a report thereon by item to the Min sales. The same shall apply in a case of altering the selling prices that are already reported.

(2) In case where an import-distributor makes a report on the selling prices of imported tobacco to the consumers under Article 18(2) of the Act, he shall do so by item 6 days prior to the commencement of their sales.

Article 7 (Tobacco for Special Use)

(1) Tobacco for special use under Article 19 (1) of the Act shall be as follows:

1. Tobacco to be used by the Head of State as a gift to the members of diplomatic mission and other persons;
2. Tobacco supplied to the armed forces, members of riot police units, guards or warders of correctional institutions, or persons of distinguished service to the State and their bereaved families accommodated in the institutions for the aged under Article 63 of the Act on the Honorable Treatment and Support of Persons, etc. of Distinguished Services to the State, which is operated by the Korea Veterans Welfare and Health Care Corporation;
3. Tobacco supplied to navy cadets and servicemen on board warships participating in overseas training;
4. Tobacco supplied to workers in overseas employment and personnel of diplomatic missions abroad;
5. Tobacco sold at a bonded area;
6. Tobacco sold to the crew of an ocean-going ship or deep-sea fishing vessel;
7. Tobacco sold to passengers of aircraft or passenger ships operating on international lines; and
8. Tobacco sold in the competent area of foreign armed forces in the Republic of Korea.

(2) The scope of tobacco supply under paragraph (1) and other matters necessary for supply shall be determined by the Ordinance of the Ministry of Finance and Economy.

(3) The tobacco for special use under paragraph (1) shall be marked separately from the tobacco sold under Article 12 of the Act. In this case, matters necessary for the separate marking of the tobacco for special use shall be determined by the Ordinance of the Ministry of Finance and Economy.

Article 8 (Criteria for Indication of Smoking Warning Words)

The smoking warning words shall be indicated in Korean, in the following articles under Article 25(1) of the Act:

1. Front and back of packing paper of a tobacco case;
2. Advertisement by stickers or posters posted in the business place of retailers; and
3. Advertisement in the magazines under Article 9(1)2.

Article 9 (Advertisement on Tobacco)

(1) Any advertisement of tobacco under Article 25(2) of the Act may be made only by the following means:

1. Act of displaying or posting the advertising materials as provided in the Ordinance of the Ministry of Finance and Economy within the retailer's business place: *Provided*, That any displaying or posting, whose contents are visible from outside of business place, shall be excluded;
2. Act of inserting an advertisement by variety group 60 or less times per annum (within 2 pages each time) in magazines [referring to the bound periodicals registered under the Registration, etc. of Periodicals Act, and published periodically once or less a week, and foreign periodicals under the Import and Distribution of Foreign Publications Act which is regularly published once or more per annum under the same title (hereinafter referred to as the "foreign periodicals"), but excluding those intended for women or juveniles]: *Provided*, That if the foreign periodicals are sold domestically in the number of copies less than those as determined by the Ordinance of the Ministry of Finance and Economy and written only in a foreign language, they shall be exempted from the restriction of carrying advertisements;
3. Act of sponsoring the social, cultural, musical, sports events, etc. (excluding those intended for women or juveniles). In this case, any product advertisement other than the use of sponsor's title shall not be made; and
4. Advertisement made in an airplane and passenger ship operating on an international line, and other places prescribed by the Ordinance of the Ministry of Finance and Economy.

(2) A manufacturer or import-distributor may have a wholesaler or retailer conduct the advertisement under paragraph (1). In this case, any advertisement made by the wholesaler or retailer shall be deemed to have been done by the manufacturer or import-distributor.

(3) Any advertisement under paragraph (1) 1, 2 and 4 or advertising materials used therefore shall not exceed an extent of informing the smokers of the name, kind and features of tobacco, and it shall not directly or indirectly encourage or induce non-smokers to smoke, or depict the figures of women or juveniles, or include the contents or form contrary to the details and purports of the smoking warning words indicated under Article 25(1) of the Act.

(4) A manufacturer or import-distributor shall have the advertisement on tobacco so regulated autonomously as not to violate the provisions of paragraphs (1) through (3).

(5) The Minister of Finance and Economy may request the Minister of Culture and Tourism to take corrective measures against the importers of foreign periodicals carrying the advertisements without any indication of the smoking warning words under Article 25(1) of the Act, or those violating the prohibition or restriction of advertisement under Article 25(2) of the Act.

Article 9-2 (Indication Criteria for Tobacco Ingredients)

Pursuant to the provisions of Article 25-2(1) of the Act, the major ingredients and their contents in the smoke of one cigarette shall be indicated on what are listed in any of the following subparagraphs:

1. One of both sides of the wrapping paper of tobacco pack;
2. Advertisements by stickers or posters to be posted in the business places of retailers; and
3. Advertisements in the magazines under Article 9(1)2.

[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 9-3 (Types of Indicated Ingredients and Their Indication Methods)

(1) Types of ingredients to be indicated under the provisions of Article 25-2(2) of the Act shall be tar and nicotine.

(2) Matters necessary for the indication methods of tobacco ingredients under the provisions of paragraph (1) shall be stipulated by the Ordinance of the Ministry of Finance and Economy.
[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 9-4 (Criteria for Measurement, etc. of Tobacco Ingredients)

(1) The criteria for measurement under the provisions of Article 25-2(2) of the Act means the dependence on the test methods of tobacco smoke ingredients as determined by the International Organization for Standardization (ISO), and its definite measurement criteria shall be stipulated by the Ordinance of the Ministry of Finance and Economy.

(2) Measurement cycles of tobacco ingredients under the provisions of paragraph (1), sample extraction methods for measurements, and other matters necessary for measurements shall be stipulated by the Ordinance of the Ministry of Finance and Economy.
[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 9-5 (Designation of Measuring Agency)

(1) Any measuring agency under the provisions of Article 25-2(2) of the Act may be designated by the Minister of Finance and Economy from among the persons authorized as the test or inspection agency for the field of tobacco smoke ingredients by the Korean Agency for Technology and Standards designated as the authorizing organization under the provisions of Article 23(2) of the Framework Act on National Standards and of Article 16(2) of the Enforcement Decree of the same Act.

(2) Matters necessary for the designation of measuring agency under the provisions of paragraph (1) shall be stipulated by the Ordinance of the Ministry of Finance and Economy.
[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 9-6 (Scope of Allowable Errors)

(1) The scope of allowable errors in the indicated values of tobacco smoke ingredients under the provisions of Article 25-2(2) of the Act shall be as follows:

1. Tar:
In the case of over 5 milligrams: \pm within 20%
In the case of under 5 milligrams: \pm within 1 milligram
2. Nicotine:
In the case of over 0.5 milligrams: \pm within 20%
In the case of under 0.5 milligrams: \pm within 0.1 milligram

(2) Whether or not exceeding the scope of allowable errors under the provisions of paragraph (1) shall be determined on the basis of values obtained by an arithmetic mean of each measured value which has been obtained by 4 consecutive measurements: *Provided*, That when the contents indicated under the provisions of Articles 9-2 and 9-3 are altered before the measurements over 4 occasions have been achieved, it shall be determined on the basis of values obtained by an arithmetic mean of each measured value before such alterations.

[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 9-7 (Omission of Tobacco Ingredient Indications)

The case where an indication of tobacco smoke ingredients may be omitted under the provisions of Article 25-2(2) of the Act shall be limited to the cigars, pipe tobaccos, cut tobaccos, chewing tobaccos, and smelling tobaccos.

[This Article Newly Inserted by Presidential Decree No. 17761, 23 October 2002.]

Article 10 (Prohibition of Providing of Money or Goods, etc. for Promotion of Tobacco Sales)

The term "providing money and other similar activities as prescribed by the Presidential Decree" in Article 25-4 of the Act means the acts of providing the bounty for tobacco sales, premiums, merchandise coupons and other money or goods: *Provided*, That the acts of providing the goods which are determined by the Ordinance of the Ministry of Finance and Economy and which are necessary for the tobacco retail business shall be excluded. *<Amended by Presidential Decree No. 17761, 23 October 2002>*

Article 11 (Procedure for Imposition and Collection of Fine for Negligence)

(1) In case where a fine for negligence is imposed under Article 29(1) of the Act, a person subject to a disposition of such a fine for negligence shall be notified to pay such fine for negligence in writing clarifying the fact of offense and the amount of fine for negligence, etc. after investigating and verifying the relevant offense.

(2) An imposition right holder under Article 29(1) of the Act shall, where he intends to impose a fine for negligence under paragraph (1), provide a person subject to a disposition of fine for negligence with an opportunity to state his opinion orally or in writing by fixing a period of not less than ten days. In this case, if he fails to state his opinion by the designated date, he shall be considered to have no opinions.

(3) An imposition right holder under Article 29 (1) of the Act shall, in determining the amount of fine for negligence, take into consideration the motive and consequences therefrom, etc.

(4) The procedure to collect a fine for negligence shall be prescribed by the Ordinance of the Ministry of Finance and Economy.

ADDENDA

Article 1 (Enforcement Date)

This Decree shall enter into force on 1 July 2001.

Article 2 Omitted.

ADDENDA *<Presidential Decree No. 17761, 23 October 2002>*

(1) (Enforcement Date) This Decree shall enter into force on 1 January 2003.
(Application Example to First Measurement) The first measurement of tobacco ingredients shall be performed beginning from the quarter next to that wherein the measuring agency has been first designated under the amended provisions of Article 9-5.

ATTACHMENT D

SPECIAL REGULATION OF THE ENFORCEMENT DECREE OF THE ACT RELATING TO CONTRACTS TO WHICH THE STATE IS A PARTY FOR SPECIFIC PROCUREMENT

Presidential Decree 15,187 (1996.12.31)

Article 1 (Purpose)

The purpose of these Regulation is to provide for special regulations, with respect to the Enforcement Decree of the Act relating to Contracts to which the State is a Party(hereinafter referred to as "Enforcement Decree"), in conducting international tendering under Article 4 of the Act relating to Contracts to which the State is a Party(hereinafter referred to as "Act"), which is to perform the Agreement on Government Procurement(hereinafter referred to as "Agreement") executed at Marrakesh on 15 April 1994.

Article 2 (Definition)

The terms as used in these Regulations shall be defined as follows:

"International tendering" means the tendering in which the participants are national/foreigners and is conducted in order to procure the goods, construction works and services, including private contracts.

"Special procurement contract" means a contract which is executed in accordance with the Act, the Enforcement Decree and these Regulations, in order for the state to procure the goods, construction works and services through international tendering as provided in Article 4, paragraph (1) and (2) of the Act.

"Ordering Agency" which executes a contract in order to procure the goods, construction works and services in accordance with the Act, the Enforcement Decree and these Regulations.

"General competitive tendering" means a tendering in which all qualified persons intending to participate in tendering for a specific procurement contract may submit tendering documents.

"Selective tendering" means a tendering in which a person designated by the ordering agency for a specific procurement contract may submit tendering documents.

"Private contract" means a contract where the ordering agency determines the other party in relation to a specific procurement contract, not through competitive tendering.

"List of qualified persons" means a list which consists of the persons qualified. Such qualification for participation of tendering on goods, construction works and services for the specific procurement contracts is determined in advance.

Article 3 (Scope of Application)

(1) These Regulations shall be applied to the specific procurement contract which the State executes.

(2) "The case as prescribed by the Presidential Decree, "referred to in Article 4, Paragraph(1), Item 4 of the Act, shall mean the case falling under any Item of the following:

1. When necessary to protect the benefit of important national security in procurement of arms, ammunition or warfare materials, or procurement in relation to the performance of the purpose of national safety or national defense;
2. When necessary to maintain the public order and stability, or maintain life and health of human beings, animals or plants, or intellectual property rights;
3. When procuring goods and services, etc., manufactured by charitable organizations, the disabled and prisoners;
4. When manufacturing and procuring artificial satellites in accordance with the Aviation and Space Industry Development Promotion Act; or
5. When executing a private contract in accordance with the proviso of Article 7 of the Act and Article 26 of the Enforcement Decree.

(3) The government agency and the scope of goods, construction works and services as prescribed in Article 4, Paragraph (2) of the Act shall be as described in Attachments 1 and 2, However, the Minister of Finance and Economy ("MOFE") may notify the matters regarding the member states of the Agreement and those states restricted from executing a specific procurement contract, as provided in the Agreement.

(4) In any of the following cases, the head of each central agency or the public official in charge of the contract may secure procurement through the international tendering process, as provided in Article 4, Paragraph (3) of the Act:

1. When deemed necessary to prevent improper construction work;
2. When it is impossible to achieve the purpose of procurement through the domestic tendering process due to difficulty in domestic manufacturing; or
3. When deemed efficient from the viewpoint of the purpose and nature of the relevant contract to secure procurement through the international tendering process.

(5) In the case of procurement through the international tendering process, as provided in Paragraph (4), these Regulations shall be applied *mutatis mutandis* to the extent not contrary to the nature thereof. In this case, the words "specific procurement contract" shall be read as "international tendering under the provision of Paragraph(4)".

Article 4 (Principles of Specific Procurement Contract)

(1) The head of each central agency or the public official in charge of the contract shall fairly select the other party of the specific procurement contract, and shall not provide the information related to governmental procurement with discrimination.

(2) The head of each central agency or the public official in charge of the contract shall comply with the following, in connection with the specific procurement contract:

1. He/she shall not select the calculation method of the Estimated price or make a partial ordering for the purpose of avoiding the application of the Agreement; and
2. He/she shall not apply the provisions on the country of origin other than those under the Foreign Trade Law and the Customs Tax Law, which are applied during the ordinary transaction process, to goods, construction works and services procured from the other party of the contract from the member states of the Agreement; and
3. He/she shall not take measures restricting the participation of tendering or the conditions of procurement of the tendering participants of the member state of the Agreement through the designation of the ratio of localization of parts, etc., technology transfer and counter purchase during the course of screening of the

qualification for participation of tendering, the evaluation of tendering documents or the determination of a successful tenderer.

Article 5 (Preferential Treatment Measures to a Developing Country)

(1) The head of each central agency or the public official in charge of the contract may take preferential measures, as provided for in the Agreement, on the goods, construction works and services procured from the supplier of a developing country in relation to a specific procurement contract.

(2) The MOFE may determine the states and objects subject to Paragraph(1) and make a public notice thereof.

Article 6 (Exception of the Preparation of Standard price)

The head of each central agency or the public official in charge of the contract is not required to prepare the standard price under Article 7-2, Paragraph (1) of the Enforcement Decree, in the cases as shall be provided by the Prime Ministerial Decree, including the case that it is difficult to prepare the standard price in the specific procurement contract of goods and services due to a lack of an actual example of a transaction price.

Article 7 (Method of Contract)

The method of the specific procurement contract shall be classified into general competitive tendering, designated competitive tendering, or private contract.

Article 8 (Language to be Used)

(1) In principle, the language to be used in the specific procurement contract shall be Korean. However, if deemed inevitable to use foreign languages, such as the supplier of goods to be procured being limited to a specific area, any one language among the language of the specific state, English, French and Spanish may be chosen.

(2) If the head of each central agency or the public official in charge of the contract desires to give public notice on tendering of a specific procurement contract, he/she shall describe the following in any language chosen from among English, French and Spanish at the tail end of the public notice:

1. Object of contract;
2. Deadline for tendering documents and the application for tendering; and
3. Name and address of the ordering agency(the agency which delivers the documents concerning tendering).

(3) If the head of each central agency or the public official in charge of the contract permits the use of multiple languages in the preparation of tendering documents for a specific procurement contract, he/she shall include one or more languages from among English, French and Spanish.

(4) If the matters described in the foreign language, in accordance with Paragraphs (2) and (3), differ from those described in Korean, the matters described in Korean shall prevail.

Article 9 (Qualification of Participants in General Competitive Tendering and Screening thereof)

(1) If the head of each central agency or the public official in charge of the contract deems it necessary for a specific procurement contract, he/she may, in consideration of the type and size of the contract, determine on the qualification, which are required for the participants of general competitive tendering, with respect to previous contracts of the same type as that of the relevant contract, the contract ceiling amount, construction capacity, the technological ability and the management status, in addition to the qualifications under Article 12, Items 1 through 3 of the Enforcement Decree.

(2) Upon application by a person intending to participate in general competitive tendering head of each central agency or the public official in charge of the contract shall screen the applicant's qualification for the participation of tendering as provided in Paragraph (1), and notify the applicant of the result.

(3) The head of each central agency or the public official in charge of the contract is not required to conduct a screening provided for in Paragraph (2), with respect of the persons listed in a list of qualified persons.

(4) If a person not having been screened in accordance with Article 10, Paragraph (1), applies for the participation of tendering, the head of each central agency or the public official in charge of the contract shall immediately commence the screening of qualification. If it is determined that there is enough time to complete the screening by the day preceding the deadline of submitting the tendering documents, the head of each central agency or the public official in charge of the contract shall allow the tendering documents to be submitted.

Article 10 (List of Qualified Persons)

(1) The head of each central agency or the public official in charge of the contract may notify the standard of qualification for participating in tendering provided in Article 9, Paragraph (1), in the gazette, at the beginning of each fiscal year and, from time to time, screen the qualification of the applicants who wish to participate in general competitive tendering. Based on the results of such screening, he/she may prepare a list of qualified persons and allow for any applicant to have access to the list.

(2) After the public notice on tendering, the head of each central agency or the public official in charge of the contract shall notify the applicants of the results of screening, whether or not the relevant applicant satisfies the qualification for participation of the tendering under the provision of Paragraph (1). If the effective period of the list of qualified persons expires or if any person is deregistered from the list, such expiration or deregistration shall be notified to the relevant person.

Article 11 (Public Notice on Tendering)

(1) With respect to a specific procurement contract to be entered into by means of general competitive tendering, the head of each central agency or the public official in charge of the contract shall notify the matters set forth in Article 12 in the gazette.

(2) The public notice on tendering under Paragraph (1) shall be given before forty (40) days immediately preceding the deadline of filing tendering documents.

(3) Notwithstanding the provision of Paragraph (2), if it is deemed that the object of the contract cannot be procured in time, as in such cases of the following items, the tendering may be publicly notified ten (10) days before the deadline of filling tendering documents:

1. In emergent cases; or
2. In the case of re-notification under the provision of Article 20, Paragraph (2) of the Enforcement Decree.

(4) If any matters concerning tendering are required to be corrected after the public notice has been given as provided in Paragraphs (1) and (2), the public notice of such correction shall be given during the period of the remaining days out of the initial period set forth in Paragraph (2) plus an additional ten (10) or more days.

(5) Notwithstanding the provision of Paragraph (2), in each of the following cases, the public notice on tendering may be given 24 days immediately preceding the deadline of filing tendering documents:

1. When a public notice was separately given for a period of 40 days within the past 12 months, which contains the matters set forth in Article 13, Paragraph 2; or
2. With respect to the contract in which an individual requirement of procurement is made in multiple cases or in instalments (hereinafter, "repeating contract"), when the public notice on tendering for such contract is given after the initial public notice.

Article 12 (Contents of Public Notice on Tendering)

When the head of each central agency or the public official in charge of the contract gives a public notice on tendering as provided in Article 11, he/she shall include the following matters in addition to those set forth in Article 36 of the Enforcement Decree:

1. Conditions of any additional procurement which are required in connection with the relevant procurement, and an expected date of public notice for any subsequent tendering of any repeating contract;
2. Method of general competitive tendering or selective tendering and whether or not negotiation procedure is included;
3. Method of procurement by the ordering agency such as purchase, lease, purchase in instalments, etc.;
4. Address to be used for filing the application for screening of qualification for participation in tendering, an application for tendering and tendering documents, the deadline for filing them and the language to be used therein; and
5. Whether or not the relevant tendering is subject to the Agreement.

Article 13 (Public Notice of Procurement Plan)

(1) The head of each central agency or the public official in charge of the contract may notify in the gazette, the plan for procurement of goods, construction works and services to be supplied under specific procurement contracts during each fiscal year.

(2) The public notice on procurement plan shall contain the statements set forth in each Item of Article 8, Paragraph(2), and those set forth in each Item of Article 12 are recommended to be stated in the said public notice to the most possible extent.

Article 14 (Technical Specification)

(1) The head of each central agency or the public official in charge of the contract shall prepare the technical specifications concerning quality, function, etc., in consideration of the function as important element. Unless there are any inevitable reasons, the technical specifications shall be

prepared on the basis of the relevant international standard, if any, and if there is no applicable international standard, relevant Korean laws and regulations or domestic criteria shall be applicable thereto.

(2) If no international standard is applicable as provided in Paragraph (1), the head of each central agency or the public official in charge of the contract may set up the technical specifications through the test of quality or function.

(3) If it is difficult to sufficiently explain the goods or services to be procured without presenting a specific trademark/specification thereof, and such trademark/specification is designated in the documents concerning tendering provided in Article 15, the head of each central agency or the public official in charge of the contract shall include the statement in the public notice on the tendering to the effect that any goods or services of equal or higher level of such specific trademark/specification are put up in the tendering.

(4) In the case of Paragraph (3) above, the applicant of the tendering shall evidence the fact that the specification, quality, etc., of the goods or services to be supplied, correspond to such specific conditions or are at a higher level.

(5) In preparing the specifications, the head of each central agency or the public official in charge of the contract shall not request or accept any advice, to or from any person who has commercial interest which may be used to restrict the competition.

(6) If it is deemed to be necessary for fair competition, the head of each central agency or the public official in charge of the contract may disclose the technical specifications to the participants of the tendering and make them accessible before the tendering, and allow the participants to present their opinion thereto.

Article 15 (Delivery of Documents concerning Tendering)

With respect to the specific procurement contracts to be entered into by means of general competitive tendering, the head of each central agency or the public official in charge of the contract, at the request of the relevant applicants, shall deliver the tendering related documents as provided in Article 14, Paragraph(1) of the Enforcement Decree (hereinafter, "tendering related documents"), and shall address any inquiries regarding the tendering related documents without delay.

Article 16 (Filing and Acceptance of Tendering Documents)

(1) With respect to any specific procurement contract, the head of each central agency or the public official in charge of the contract shall permit the submission of tendering documents by mail.

(2) The head of each central agency or the public official in charge of the contract may, if it is deemed to be necessary, allow the applicants to submit the tendering documents and other related documents by cable, telegraph and fax transmission.

(3) When the tendering documents are filed as provided in Paragraph (2), the head of each central agency or the public official in charge of the contract shall cause the relevant participant to submit the copy thereof, with his/her signature for the purpose of confirmation. In this case, if there is any discrepancy between the tendering documents submitted by cable, etc., and the copy thereof, with the signature provided after the deadline for filing for confirmation, the tendering documents submitted by cable, etc., shall prevail.

(4) When the head of each central agency or the public official in charge of the contract accepts the tendering documents by mail as provided in Paragraph(1), he/she shall state the date of acceptance and affix the seal of confirmation on the envelope of the relevant tendering documents and keep it closed until the opening of tendering. If the tendering documents are delivered to the relevant department after the date designated in the tendering related documents, due to any reason attributable to the ordering agency, the relevant participant shall not be adversely affected therefrom.

Article 17 (Public Notice of Successful Tenderer and Disclosure of Information)

(1) When the head of each central agency or the public official in charge of the contract selects a successful tenderer for any specific procurement contract, or decides who the other party of the private contract shall be as provided in Article 23, he/she shall publicly notify the matters provided in the Prime Ministerial Decree, in the gazette, within 72 days from the date of such selection or decision.

(2) When the participants of the tendering requires the head of each central agency or the public official in charge of the contract to provide any information concerning the relevant tendering, he/she shall meet such demand if there are no special reasons to avoid such request.

(3) In connection with the provisions of Paragraphs (1) and (2), the matters concerning the scope of disclosure, and an exceptional case of disclosure, of information relating to successful tendering, shall be in accordance with the provision of the Prime Ministerial Decree.

Article 18 (Selective Tendering)

When the head of each central agency or the public official in charge of the contract intends to put up the designated competitive tendering as provided in Article 7 of the Act, for a specific procurement contract, he/she shall, in consideration of the matters provided in Article 9, establish the qualification required of the participants of the selective tendering and the standard for designation.

Article 19 (Designation of Participants of Designated Competitive Tendering and Notice thereof)

(1) When the head of each central agency or the public official in charge of the contract intends to put up the designated competitive tendering for a specific procurement contract, he/she shall designate a person having the qualification provided in Article 18, who is deemed to be appropriate with regard to the standard for designation, and at the same time, give notice stating the matters concerning public notice of tendering as provided in Article 12 hereof and Article 36 of the Enforcement Decree, to such designated person.

(2) The notice provided in Paragraph (1) shall be given at the date of public notice under the provision for Article 20, Paragraph (1).

Article 20 (Public Notice of Selective Tendering)

If the head of each central agency or the public official in charge of the contract intends to put up designated competitive tendering for a specific procurement contract, he/she shall give public notice thereof, in accordance with the provisions of Article 11 and Article 12.

(2) Notwithstanding the provision of Paragraph(1), in the case of selective tendering without using the list of qualified persons, the period for submission of the application for participation in the selective tendering shall be set up for 25 days or more from the date of public notice as provided in Paragraph (1).

Article 21 (Screening of Qualification for Participants of Selective Tendering)

(1) If the head of each central agency or the public official in charge of the contract receives any applications for screening of qualification for participation in designated competitive tendering after the public notice thereof, as provided in Article 20, he/she shall, without delay, commence the screening of qualification as set forth in Article 18. However, if it appears that the screening cannot be completed until the deadline for the filing of the application, he/she shall give notice of such matter in advance to the applicants.

(2) If it is deemed to be necessary, the head of each central agency or the public official in charge of the contract shall designate the screening period for the application of screening of qualification for participation as provided in Paragraph (1), and he/she may publicly notify the period, together with any other matters as provided in Article 20.

(3) If the head of each central agency or the public official in charge of the contract intends to prepare the list of qualified persons for selective tendering, he/she shall give public notice of the matters concerning the qualification for participation of the designated competitive tendering as provided in the Prime Ministerial Decree, in the gazette, each year.

(4) The provision of Article 10 shall apply *mutatis mutandis* to the preparation of the list of qualified persons under the provision of Paragraph (3).

Article 22 (Application of Provision Concerning General Competitive Tendering)

The provisions of Article 9 through Article 17 shall apply *mutatis mutandis* to the selective tendering.

Article 23 (Private Contract)

The specific procurement contracts which may be entered into by means of a private contract shall be as follows:

1. When there is no participant of the competitive tendering, collaborative tendering documents are filed, or no tendering documents satisfy the conditions required in the public notice of the relevant tendering;
2. When the relevant goods may be procured only from a specific supplier such as works of art with no substitutes thereof, or other goods which are related to any exclusive rights, including patent rights or publication rights, or which require special technology;
3. If the procurement cannot be made within the required period by competitive tendering due to any urgent cause;
4. If the procurement is made for an change of the components of already procured goods or an expansion of any of the facilities (only if the manufacture and supply of the relevant goods by others than those which are originally manufactured and supplied causes lack of compatibility);
5. If the prototype developed by the request of the ordering agency is procured (except if the relevant goods continue to be procured after completion of fulfilment of the relevant contract);

6. If nay additional construction for the construction work for which a contract has been already executed is required, due to any unexpected circumstances, and an amount equivalent to the standard price of the additional construction is 50/100 or less of the contract amount of the immediately previous construction, and if there is a need to execute a contract with the person performing the relevant work since it is difficult to separate the additional construction work technically and economically, or such separation causes considerable inconvenience to the ordering agency;
7. If the new construction work is a repeat of similar construction works according to the basic plan, and the initial contract was executed as a specific procurement contract, and the public notice on tendering for the initial contract specifies that the new construction can be made by a private contract;
8. If any goods are purchased in raw materials market(commodity exchange);
9. If any goods are procured in remarkably profitable conditions due to any causes including asset disposition of any corporation subject to bankruptcy or corporate reorganization; and
10. If any contract is executed with the person winning the prize in the design contest as specified in the Prime Ministerial Decree.

Article 24 (Records concerning Contract)

When the head of each central agency or the public official in charge of the contract determines the successful tenderer in the specific procurement contract by competition, he/she shall keep and maintain the documents concerning the tendering and the contract, and the documents recording any of the following for five (5) years:

1. Names of participants in the tendering and any person participating in the opening of the tendering;
2. Name of successful tenderer, amount of successful tendering and reason of determination of the successful tenderer;
3. In the event any tendering becomes null and void, details of the relevant tendering and reason for such nullity;
4. In the event the notice as prescribed by Article 9, Paragraph 2 is given, matters concerning the notice;
5. Country of origin of goods; and
6. Other matters as determined by the Prime Ministerial Decree.

(2) When the head of each central agency or the public official in charge of the contract executes a private contract for a specific procurement, he/she shall keep and maintain any documents concerning the contract and the documents recording any of the following for five (5) years:

1. Purpose of the contract;
2. Name of item, size, quantity, unit price, amount, etc., of the goods;
3. Provisions of any applicable laws and specific reason for the application;

4. Name (trade name) and address of the other party in the contract;
5. Contract amount and reason of determination of the other party of the contract;
6. Country of origin of goods; and
7. Other matters as determined by the Prime Ministerial Decree.

Article 25 (Report on Result of the Contract)

(1) The head of each central agency shall prepare the report on the results of the contract, consisting of such contents as required by the Prime Ministerial Decree and submit it to the MOFE within 60 days from the end of the relevant year.

(2) The report on the results of the contract concluded by a government invested institution, which is subject to the Agreement, shall be submitted by the relevant Minister according to Paragraph 1 above.

Article 26 (Subject to Submitting Objection)

"Other matters as determined by the Presidential Decree" as set forth in Article 28, Paragraph 1, Item 5 of the Act shall mean the matters breaching the provisions of the Agreement as not specified in Article 28, Paragraph 1, Item 1 of the Act.

Article 27 (Application for Mediation)

(1) The person("applicant") who intends to apply for a review in accordance with Article 28, Paragraph 4 of the Act ("application for mediation") shall sign or affix seals to the application as determined by the MOFE and then submit it to the International Contract Dispute Mediation Committee as prescribed by Article 28, together with evidencing documents and any related documents.

(2) Matters concerning any necessary procedures in connection with the application for mediation, except for the provision of Paragraph 1 above, shall be determined by the MOFE.

Article 28 (Organization of International Contract Dispute Mediation Committee)

(1) The International Contract Dispute Mediation Committee("Committee") as set forth in Article 29 of the Act, shall consist of 15 or less members, including the Chairman.

(2) The Chairman of the Committee shall be the Deputy-Minister of Finance and Economy. The members of the Committee shall be the public officials of the central administrative agency as determined by the Prime Ministerial Decree who shall be designated by the head of the relevant agency and the persons appointed by the MOFE among the persons falling under any of the following:

1. The person who has held for five (5) years or more, the position as a deputy professor or a higher level of law, finance, trade or accounting at the university as prescribed by the Education Law;
2. The person qualified as a lawyer who has engaged in legal works for ten (10) years or more; and
3. The person who has much knowledge and experience concerning accounting and procurement contract affairs of the government.

(3) The term of the member who is not the public official shall be two (2) years and shall be eligible for re-election. The term of any substitute shall be the remaining term of the predecessor.

(4) The member who is not the public official may not be involuntarily removed during the term of office, except when he is sentenced to imprisonment or more severe punishment, or when he may not perform his duties due to long-term mental and physical weakness.

Article 29 (Function of the Committee)

When the Committee receives the application for mediation as set forth in Article 27, Paragraph 1, it shall notify the head of the relevant central agency of the contents of the application, and then examine and mediate the application.

Article 30 (Suspension of Contract Tendering Procedures)

(1) When the Committee orders a postponement of the tendering procedure or a suspension on the conclusion of the contract to the relevant central agency, in accordance with Article 30, Paragraph 2 of the Act, the Committee shall make such order in writing within seven (7) days from receipt of the opinion pursuant to Article 33 unless there is any special cause.

(2) When, in accordance with the provisions of the Agreement, the Committee determines not to order the suspension of the contract as provided in Paragraph 1 above because it threatens to cause any disadvantageous effect to public interest or the relevant interested party, it shall notify, in writing, the reason therefore to the applicant and the head of the relevant central agency.

Article 31 (Duties of Chairman of the Committee)

(1) The Chairman of the Committee shall generally coordinate business affairs of the Committee and represent the Committee.

(2) When the Chairman of the Committee is unable to perform his duties due to unavoidable causes, the member designated by the MOFE shall act for the Chairman.

Article 32 (Meeting of the Committee)

(1) The meeting of the Committee shall be convened by the Chairman.

(2) A resolution of the meeting of the Committee shall be adopted by the presence of the majority of all members and then by affirmative vote of the majority of the members present thereat.

(3) The Committee shall have one(1) secretary for its conduction of business.

Article 33 (Investigation)

(1) The head of the central agency to whom the details of the application for mediation according to Article 29 are notified, in accordance with Article 29, shall submit to the Committee, its opinion, in writing, within fourteen (14) days from receipt of the notice.

(2) If necessary for examination and mediation, the Committee may demand the applicant and the head of the relevant central agency to submit the documents relating to the matters subject to the application for mediation, and may request the relevant professional institution to conduct an appraisal, a diagnosis and a test.

(3) The Committee shall give the party, or its representative, an opportunity to state his/her opinion prior to the completion of the mediation. If necessary, the Committee may cause the applicant, the head of the relevant central agency, its representative, witness or the relevant specialist, to be present at the Committee, to state their opinion.

Article 34 (Suspension of Mediation)

If litigation, with respect to the matter which is the same as the matter subject to the application of mediation with the Committee, is pending at the Court, the Committee may suspend the examination/mediation. In such a case, the Committee shall notify the party, who has filed an application for mediation, of the cause for the suspension.

Article 35 (Mediation)

(1) The Committee shall prepare a mediation plan stating the results of the examination and then notify the party of the results.

(2) When preparing the mediation plan as set forth in Paragraph (1), if the Committee considers that the applicant has sustained any disadvantage due to any of the acts as set forth in Article 28, Paragraph (1) of the Act, the mediation plan shall include revocation or correction of the acts of the head of the central agency concerned of the public official in charge of the contract, and compensation for the damage of loss therefrom.

(3) The compensation for the damage or loss as set forth in Paragraph (2) may be restricted to the expenses incurred in the course of preparation of tendering and application for mediation.

Article 36 (Compensation)

The Committee shall pay compensation to the Committee member and the relevant specialist who are present at the Committee, within the extent of the budget.

Article 37 (Expenses)

(1) Expenses incurred in connection with the examination/mediation of the application for mediation shall be borne by the applicant. However, if there is any agreement between the parties in connection with the expenses, the expenses shall be borne as agreed in the agreement.

(2) Details on expenses in connection with the application for mediation shall be as set forth in the Prime Ministerial Decree.

Article 38 (Operation of Committee)

Matters necessary for the operation of the Committee which has not been provided in these Regulations, shall be set forth in the Prime Ministerial Decree.

Article 39 (Relations with the Enforcement Decree)

In a specific procurement contract, provisions of the Enforcement Decree shall apply to any matter which has not been specifically provided in the Regulations. However, Articles 21 and 22, and Article 72, Paragraph (3) of the Enforcement Decree shall not apply to the matters in connection with a specific procurement contract.

Article 40 (Application of International Trade Customs)

If, in the case of specific procurement contracts, it is unavoidable to the performance of procedures for procurement such as currency, type and period for payment of security deposit, method of payment of consideration through a letter of credit, and inspection, etc., the head of each central agency or the public official in charge of the contract may, notwithstanding Article 39, be subject to the international trade customs within the extent which is not contrary to the provisions and nature of Agreement and these Regulations.

If, in the case of specific procurement contracts of goods and services, it is judged to be difficult to perform procedures for procurement without complying with the international trade customs with respect to the adjustment of the contract amount due to price fluctuation, the head of each central agency or the public official in charge of the contract shall, notwithstanding Article 64, Paragraph (1) of the Enforcement Decree, be subject to the international trade customs within the extent which is not contrary to the provisions and nature of the Agreement and these Regulations.

ADDENDA

Article 1 Enforcement Date

These Regulations shall enter into force from 1 January 1997.

Article 2 Validity Period of Application of these Regulations to the Contract for Manufacture and Purchase of Artificial Satellite

The effect of the provision of Article 3, Paragraph (2), Item 4 shall be maintained until 31 December 2001.

Article 3 Repeal and Amendment of Other Laws and Regulations

The Regulations on the Contract for Foreign Capital Purchase shall be repealed.

Special Regulations of the Enforcement Decree of the Act Relating to the Contract to Which the State is a Party for the Procurement of Specific Goods shall be amended as follows: Article 12 shall be deleted.

Article 14, Paragraph (2) shall be amended as follows:

Any person who objects to the measures taken by the head of each central body as referred to Paragraph(1), may request a review for mediation to the International Contract Dispute Mediation Committee as Prescribed in Article 28 of the Special Regulations of the Enforcement Decree of the Act Relating to the Contract to Which the State is a Party for Specific Procurement, within fifteen (15) days after the head of each central body takes the measures or he/she is aware that such measures have been taken.

Articles 15 and 16 shall be deleted, respectively.

In Article 17, the "regulations on the contract for Foreign Capital Purchase" shall be amended as the "Special Regulations of the Enforcement Decree of the Act Relating to the Contract to Which the State is a Party for Specific Procurement".

Article 4 Interim Measures for Execution of Contract for Foreign Capital Purchase, etc.

The tendering, determination of a successful tenderer and execution of the contract which will occur after the enforcement date of these regulations and with regard to which a public notice for tendering was made before the enforcement date of these Regulations in accordance with the Regulations on the Contract for Foreign Capital Purchase, and the contract which is to be executed after the enforcement date of these Regulations and with regard to which a tendering was determined before the enforcement date of these Regulations, shall be governed by the previous provisions.

ATTACHMENT E

THE ACCOUNTING REGULATION FOR GOVERNMENT INVESTED ENTERPRISES

[Enacted on 21 October 1999 as Decree No. 00107, Ministry of Finance and Economy]

Article 1 (Purpose)

These Regulations (hereinafter referred to as "Regulation") is to regulate the necessary matters concerning the accounting and contracting standards and procedures applicable to government-invested institutions and bidders' qualifications for participating in the tender, as mandated by subsection 3 of Article 20 of the Framework Act on the Management of Government-invested Institutions (hereinafter referred to as "Framework Act").

Article 2 (Relations with Other Laws)

(1) Unless otherwise provided in other laws or ordinances, these Regulations shall apply to the accounting practices of the government-invested institutions (hereinafter referred to as "Invested Institutions") under Article 2 of the Framework Act.

(2) The matters that are not provided in these Regulations concerning contracts entered into by an Invested Institution shall be subject to the Act on Contracts to which the State is a party, *mutatis mutandis*, in such case "state", "government" and "national treasury" in the aforesaid Act shall be deemed to be an "Invested Institution", "head of any office of the central government" and "public servant in charge of contract-related affairs" shall be deemed to be "president of an Invested Institution" and the "Contracting Officer", respectively.

Article 3 (Accounting Officers)

(1) The president of an Invested Institution shall appoint the accounting officers to take charge of accounting for each accounting unit, as follows:

1. An officer in charge of the revenue-related affairs;
2. An officer in charge of the expenditure-related affairs;
3. An officer in charge of the contract-related affairs;
4. An officer in charge of the cause-of-expenditure-related affairs;
5. An officer in charge of the routine-expense-related affairs;
6. An officer in charge of the securities management related affairs;
7. An officer in charge of the supplies management related affairs, and
8. An officer in charge of the affairs relating to the management of inventories, fixed assets and other assets.

(2) Among the accounting officers under subsection (1) above, there shall be no holding currently the post of a revenue officer and an expenditure officer, an expenditure officer and a contracting officer or a cause-of-expenditure officer; provided, however, that the foregoing provisions shall not apply to an office overseas or when inevitable, due to the number of personnel far less than required.

(3) The president of an Invested Institution may appoint one of its employees to mandate the duties of the accounting officers under subsection (1) above, in whole or in part, if deemed necessary.

Article 4 (Consolidated Financial Statements)

The Minister of Finance and Economy (hereinafter referred to as "Minister") may direct the President of an Invested Institution to prepare consolidated financial statements, if it is deemed necessary in order to ensure proper accounting.

Article 5 (Payment of Expenditure)

(1) Expenditure shall be paid by crediting related payment to the savings account in the financial institution or a mail transfer account in the post office (for the purpose of this article, hereinafter referred to as "Crediting to Creditor's Account"), as designated by the relevant creditor (including the subcontractors appointed by the creditor, in case a subcontracts has been entered into in the course of performing a construction, manufacture or purchase contract); provided, however, that expenditure may be paid otherwise than by Crediting to Creditor's Account, in the event of:

1. Payment of personnel expenses, travelling expenses or routine expenses;
2. Payment in an amount less than W100,000 per transaction;
3. Payment made by an Invested Institution located in a "Myeon"; or
4. If payment by Crediting to Creditor's Account is deemed particularly inappropriate.

(2) The expenditure in accordance with subsection (1) above shall be effected by check, except where specific circumstances require payment in cash.

Article 6 (Payment of Routine Expenses)

(1) The President of an Invested Institution may make payment of the necessary expenses that are likely to adversely affect the Invested Institution's ordinary activities considering its nature, if not paid in cash as routine expenses.

(2) The scope of routine expenses referred to in subsection (1) above shall be as follows:

1. Expenses to be paid in foreign countries;
2. Expenses required for operation and/or repair of vessels;
3. Expenses to be paid in the area where proper transportation and/or communication is not available;
4. Expenses routinely spent in the office and travelling expenses that do not exceed W5 million;
5. Expenses incurred by each office to purchase miscellaneous food and related materials;
6. Expenses incurred by the office whose place of payment is not fixed;
7. Expenses incurred by the office whose expenditure officer is not appointed;
8. Expenses for construction, manufacture or afforestation carried out directly by each office that do not exceed W20 million;
9. Business promotion expenses;
10. Expenses to be paid to witnesses or surveyors;
11. Salaries to be paid to its officers and employees of an Invested Institution;
12. Various allowances and honorariums;
13. Bonuses; and
14. Expenses for purchasing samples and fees for test and research pursuant to the provisions of applicable laws and ordinances.

(3) The funds for the expenses under subsection (1) above shall be paid in compliance with the following requirements:

1. The routine expenses of the office shall be paid within the estimated budget of expenses for one month; provided, however, that the expenses to be paid in foreign countries or in the area where proper transportation and/or communication is not available, or incurred by an office whose place of payment is not fixed, may be paid within the budget of expenses for three months.
2. The extraordinary expenses incurred from time to time shall be paid in instalments as many as possible, to the extent of not affecting normal business and on the basis of the expenditure plan reflecting the fund required for such expenses.

Article 7 (Payment in Advance)

(1) The President of an Invested Institution may pay in advance freight, chartreuse, travelling expenses, considerations for a construction, manufacturing or service contract, etc., that may likely adversely affect the Invested Institution's ordinary activities or business considering its nature, if not paid in advance.

(2) The scope of expenses to be paid in advance pursuant to the provisions of subsection (1) above shall be as follows:

1. Payment for the machinery, books, samples, or testing materials purchased directly from foreign countries;
2. Payment for periodicals;
3. Rental of land/buildings or chartreuse;
4. Freight;
5. Wages and salaries to be paid to those who will be transferred or going on business trip, participating in an emergency drill or manoeuvre, or going on leave on the date of record for wages and salaries;
6. Expenses to be paid to the state, a local government or other Invested Institution;
7. Expenses to be paid to those who are engaged in research or survey in foreign countries;
8. Wages and salaries to be paid to those working in the area where proper transportation is not available or the crew of vessels, or wages and salaries to be credited to financial institutions for the purpose of payment thereof through the savings accounts in financial institutions;
9. Expenses required to entrust certain activities, etc.;
10. Subsidies or contributions;
11. Honorariums;
12. Consideration of or compensation for, or transfer cost of the land or objects on it purchased or expropriated by the Invested Institution;
13. Any amount not exceeding 70/100 of the contract price under a construction or manufacturing contract with its contract price of W30 million or more, or a service contract with its contract price of W5 million or more; or
14. Expenses to be paid in Korea to a foreign nationals invited by the Invested Institution.

(3) The wages and salaries to be credited to financial institutions for the purpose of payment thereof through the savings accounts in financial institutions pursuant to the provision of item 8, subsection (2) above may be so credited within three days prior to the date of record.

(4) In paying in advance the expenses under item 13 of subsection (2) above, such expenses shall be paid within 14 days from the date of request for payment from the other party of relevant contract after execution thereof; provided, however, that the foregoing provision shall not apply, if the party liable to pay such expenses has been prevented from payment thereof inevitably and when the said party has notified the other party thereof in writing.

Article 8 (Payment by Estimation)

(1) The president of an Invested Institution may pay by estimation freight, charterage, travelling expenses, considerations for a construction, manufacturing or service contract, etc., that may likely adversely affect the Invested Institution's ordinary activities or business considering its nature, if not so paid.

(2) The scope of expenses to be paid by estimation pursuant to the provisions of subsection (1) above shall be as follows:

1. Travelling expenses, business promotion expenses or office operation expenses;
2. Expenses to be paid to the state;
3. Subsidies or contributions;
4. Medical care expenses to be paid pursuant to the provisions of Industrial Accident Compensation Insurance Act; and
5. Expenses required for disaster rehabilitation and relief activities.

Article 9 (Accounting for Claims as Bad Debt Expenses)

(1) If anyone of the following events occur, the President of the Invested Institution concerned shall account for the claims affected thereby as bad debt expenses, even before conclusion of relevant extinctive prescription:

1. When a corporate entity (debtor) is dissolved or has suspended its business and deemed unlikely to resume its business and the sum of expenses required for enforcement and other priority claims to be reimbursed out of the expected revenue from such enforcement exceeds the value of the properties available for attachment;
2. When claims against a corporate entity (debtor) are concluded to be non-collectable, as the reorganization plan concerning such claims has been approved pursuant to the provisions of Corporation Reorganization Act;
3. When a debtor is dead and if the sum of expenses required for enforcement and other priority claims to be reimbursed out of the expected revenue from such enforcement exceeds the value of inherited properties; and
4. When the estimated expenses required for collecting certain claims exceed the value thereof.

(2) If there exists a third parties other than the debtor, such as a joint debtor or guarantor, who is obliged to perform such obligations, the provisions of items 1 through 3 of subsection (1) above shall not apply.

Article 10 (Accumulation of Allowance for Bad Debts)

The President of an Invested Institution shall accumulate allowance for bad debts on accounts receivable, notes receivable, other receivables, accrued income and claims similar thereto, long-term trade receivables. In such case, the amount of claims against the state, a local government or other Invested Institutions, if any, shall be excluded from the subject on which the estimated bad debt losses are to be calculated.

Article 11 (Scope of Procurement Contract by an Invested Institution based on International Tender)

(1) The procurement contract entered into by an Invested Institution shall be through an international tender, if the contract price is same as or higher than the amount specified and notified by the Minister in accordance with the Agreement on Government Procurement executed in Marrakesh, Morocco on 15 April 1994 (hereinafter referred to as "Agreement on Government Procurement") and other international regulations based thereon. Notwithstanding the foregoing provisions, any procurement contract falling into anyone of the category as described below shall be excluded from the subject of an international tender:

1. Procurement of the goods and services for resale or required for the manufacture of products for sale;
2. Manufacture and/or purchase of products of small and medium enterprises pursuant to the provisions of the Act on Promotion of Small & Medium Enterprises and Encouragement of Purchase of Their Products;
3. Purchase of agricultural, fishery or livestock products pursuant to the provisions of Grain Management Act, Act on Distribution and Price Stabilization of Agricultural, Fishery Products and Livestock Industry Act;
4. Purchase by Korea Electric Power Corporation of certain heavy electric products (HS 8504, 8535, 8537 and 8544) pursuant to the provisions of Korea Electric Power Corporation Act; or
5. A procurement contract entered into, as a private free contract, pursuant to the provisions of Article 15 hereof.

(2) If a procurement contract is entered into through an international tender, the matters not provided for in these Regulations concerning the method and procedures of executing such contract shall be in compliance, *mutatis mutandis*, with the Provisions of Special Cases of the Enforcement Decree of the Act on Contracts for the specifically designated procurement to which the State is a party and the Rules of Special Cases of the Detailed Enforcement Regulations of the aforesaid act.

(3) The matters to be announced in course of such an international tender shall be announced publicly by posting them in the publications as set forth in the Agreement on Government Procurement.

(4) The president of an Invested Institution or the person taking charge of the contract-related affairs by mandate or entrustment pursuant to the provisions of Article 14 hereof (hereinafter referred to as "Contracting Officer") may procure through an international tender an item not falling within the subject of an international tender under subsection (1) above, if it is deemed necessary to do so, taking into account the purpose and nature of relevant contract.

Article 12 (Principles of Entering into a Contract)

(1) The contract to be entered into an Invested Institution shall be based on mutual agreement between the parties thereto, as independent and equal contractors, and each party shall perform such contract in good faith.

(2) In entering into a contract, the President or Contracting Officer of the Invested Institution concerned shall ensure that such contract will not contain any of special terms or conditions that may unreasonably limit the other party's contractual interests under these Regulations or applicable laws and ordinances.

Article 13 (Method of Entering into a Contract)

(1) When entering into a contract, the President or Contracting Officer of the Invested Institution concerned shall publicly notify the details of the proposed tender and then put the tender in public competition; provided, however, that such a contract may be entered into through a competitive bidding by qualified or designated bidders or as a private free contract, if it is deemed necessary, taking into account its purpose, nature and scope.

(2) If such a contract falls within anyone of the following category, the provisions of subsection (2) above may not apply, if:

1. If an Invested Institution participates in the competitive bidding or public sale;
2. If a transaction involving securities is executed in the manner as stipulated in Securities Exchange Act; or
3. If, in case of a contract for purchase or lease of real estate, there exists a specific circumstance preventing a competitive bidding.

Article 14 (Mandate & Entrustment of Contract-related Matters)

(1) The President of an Invested Institution may mandate contract-related affairs to one of its employees, or entrust the same to an agency of the state or an agency of a local government, or the president or one of the employees of other Invested Institution (including Korea Asset Management Corporation established pursuant to the provisions of Article 6 of the Act on Efficient Disposal of Financial Institutions' Non-performing Assets of Financial Institutions and the Establishment of Korean Asset Management Corporation, in the case of selling non-business real estate).

(2) In the event of entrusting contract-related affairs pursuant to the provisions of subsection (1) above, the conditions and fees of such entrustment and other necessary matters related thereto shall be clearly prescribed.

Article 15 (Private Free Contract)

The President or Contracting Officer of an Invested Institution may enter into a contract, as a private free contract, if:

1. The contract is entered into with the state, a local government or other Invested Institution; or
2. The Invested Institution enters into the contract falling within the category as described below, with one of its subsidiaries (a "**Subsidiary**" means a corporation, the 50/100 or more whose outstanding shares or equity interests is held by the Invested Institution, and this definition shall apply to these regulations hereafter) or affiliated companies (a "**Affiliated Company**" means a corporation the sum of the

shares or equity interests is held by the Invested Institution, other Invested Institutions or Korea Development Bank is 50/100 or more and this definition shall apply to these Regulations hereafter:

- a. If the Invested Institution concerned entrusts its activities to a third party or has a third party perform its activities on its behalf, in compliance with the government's policy for management innovation;
 - b. If it is required to do so for the purpose of maintaining the installations and equipment owned by the Invested Institution concerned or the installations of Type I under subsection 2 of Article 2 of the Special Act on the Safety Control of Installations;
 - c. If it is required to do so for the purpose of protection and promotion of the specific technologies recognized by the minister concerned;
 - d. If the minister concerned deem indispensable, in the course of restructuring the Invested Institution's Subsidiaries or Affiliated Companies for their management innovation;
3. If the office located abroad purchases from a local source supplies for its own use;
 4. If the contract is required to be entered into on a confidential basis;
 5. If, in order to promote localization, the President of an Invested Institution manufactures or purchases the product he/she has selected as the item for development, within 2 years after the manufacturer has completed the development;
 6. In addition to the contract described in items 1 through 5 above, if the purpose or nature of relevant contract requires it to be executed as a private free contract, or such is allowed under subsection (1) of Article 26 of the Enforcement Decree of the Act on Contracts to which the State is a party.

Article 16 (Competition by Designated Bidders)

The President or Contracting Officer of an Invested Institution may enter into a contract through a competitive bidding by designated bidders, if the contract falls within the category as described in subsection (1) of Article 23 of the Enforcement Decree of the Act on Contracts to which the State is a party and also in Article 15 of these Regulations.

Article 17 (Incidental Tender)

(1) In putting in tender a construction work specified in subsection (2) of Article 23 of the Enforcement Decree of the Act on Contracts to which the State is a party, the President or Contracting Officer of the Invested Institution shall ensure that bidders will describe mention of their bidding price the details of the proposed subcontracts, including the portion of the work to be subcontracted, subcontract price, subcontractors; provided, however, that the foregoing shall not apply, if the contract falls within the category as enumerated in the provision of subsection (1) of Article 19 of the Enforcement Decree of the Act on Contracts to which the State is a party.

(2) In mentioning the details of such subcontracts pursuant to the provisions of subsection (1) above, such details of a long-term construction work shall be stated on the basis of the total bidding price for the whole work; provided, however, that they may be stated on the basis of the bidding price

for the portion of the work to be implemented in the first year, if it is deemed necessary considering the duration of such construction.

(3) The necessary matters concerning the procedures of the incidental tender under subsection (2) above shall be provided for separately by the President of the Invested Institution concerned.

Article 18 (Exemption from Bid Bond, etc.)

(1) The President or Contracting Officer of an Invested Institution may allow exemption from the bid bond, if:

1. A Subsidiary of the Invested Institution participates in the tender;
2. An Affiliated Company of the Invested Institution participates in the tender; and
3. Any person who is exempted from the bid bond in whole or in part pursuant to the provisions of subsection (3) of Article 37 of the Enforcement Decree of the Act on Contracts to which the State is a party participates in the tender.

(2) The provisions of subsection (1) above shall also apply, *mutatis mutandis*, to the exemption from performance bond.

Article 19 (Interests on Bid Bond, etc.)

The President of an Invested Institution shall pay the interest on the amount of the bonds deposited in cash by bidders participating in the tender and/or the other parties of the contract to which the said Invested Institution is a party, including bid bonds, performance bonds, maintenance bonds etc., as calculated by applying the interest rate applicable to deposits as stipulated by the Minister pursuant to the provisions of Article 16 of Government Deposit Management Regulations; provided, however, that the foregoing shall not apply to any of the aforementioned bonds that is returned within 10 days from the date of deposit thereof.

Article 20 (Establishment of Standards for Screening Eligibility)

In connection with reviewing bidders' capability to perform the relevant contract, the President of the Invested Institution concerned may establish detailed standards for screening eligibility of the participants in the tender in accordance with the standards for screening eligibility stipulated by the Minister pursuant to the provisions of subsection (2), Article 42 of the Enforcement Decree of the Act on Contracts to which the State is a party. Notwithstanding the foregoing, the President of the Invested Institution concerned may establish a standard for screening eligibility, separately from those standards referred to in this Article, if it is deemed necessary taking into account the characteristics of the applicable construction work or goods for which the contract is entered into.

Article 21 (Payment of Consideration prior to Inspection)

The President or Contracting Officer of an Invested Institution may pay the consideration of a contract prior to inspection, if it is deemed inevitable as described below:

1. The other party of the contract is the State, a local government or other Invested Institution;
2. The other party of the contract is a Subsidiary of the Invested Institution;
3. The other party of the contract is an Affiliated Company of the Invested Institution;
4. It is recognized that there exists an inevitable circumstance requiring so, such as international practices, etc.

Article 22 (Receipt of Consideration)

(1) In the case of the contract constituting a source of revenue such as the sale or loan of assets, provision of services or otherwise, the President or Contracting Officer of the Invested Institution concerned shall ensure that the other parties of the contract will deposit the consideration thereof in advance, except where:

1. The other party of the contract is the State, a local government or other Invested Institution;
2. The other party of the contract is a Subsidiary of the Invested Institution;
3. The other party of the contract is an Affiliated Company of the Invested Institution;
4. The other party of the contract has submitted a letter of guarantee issued by a bank or a performance guarantee insurance policy in an amount equal to or more than the sum of consideration thereof plus the compensation for the actual cost and expenses incurred; or
5. An export contract has been executed on deferred payment basis or on the basis of payment by remittance after export.

(2) With respect to the contract for sale of assets, the President of the Invested Institution may allow the purchaser thereof to pay for such assets in instalments over the period not exceeding 5 years after execution of the contract, together with the interests thereon calculated at the rate equal to the interest rate applicable to loans from general resources that are offered by financial institutions, if:

1. The other party of the contract is the State, a local government or other Invested Institution, purchasing the said asset for public use; or
2. It is deemed impossible to enter into the contract on the terms of payment requiring the consideration thereof to be deposited in advance, or it is deemed considerably more profitable to the said Invested Institution concerned to allow the other party to make payment in instalments.

(3) The President or Contracting Officer of the Invested Institution concerned may not apply the main text of subsection (1) above and the provisions of subsection (2) above to the merchandises (being the real estate) among inventories.

(4) When the other party of the contract constituting a source of revenue has delayed payment in advance of the consideration thereof and if the contract is not cancelled or terminated by the Invested Institution, the Invested Institution shall ensure that the other party will pay the consideration thereof, together with the interests thereon, as calculated by applying the default interest rate applicable to loans from general resources that are offered by financial institutions.

Article 23 (Limitation of Unfaithful Bidders' Qualifications for Participating in Tender)

(1) The President of an Invested Institution shall restrict the qualifications for participating in the tender for the period more than one month but not longer than 2 years, for the other party of a contract or a bidder participating in the tender (including the representative, manager or other servant of the aforesaid other party or bidder) that is likely to affect a fair execution of competition or due performance of the contract, or deemed not appropriate to participate in the tender, and further that falls within the category described below:

1. The person who has been unfaithful, rude or unreasonable in performing a contract or committed unjust acts;

2. The person who has subcontracted in violation of the provisions limiting subcontracts under the Framework Act on the Construction Industry, Electrical Construction Business Act, Information and Communication Work Business Act or other laws or ordinances (excluding violation of the obligation to give notice of subcontracts) and who has subcontracted without the approval of the Invested Institution concerned or modified the conditions of subcontract already approved by the Invested Institution concerned;
3. The person who has violated the Monopoly Regulation and Fair Trade Act and Fair Transactions in Subcontracting Act and whose qualifications for participating in the tender Fair Trade Commission has requested to be restricted;
4. The person who, in the case of a contract for research design services or cost calculation services, has failed to properly calculate the estimated amount for research design or the estimated cost by wilful acts or gross negligence;
5. The person who, in the case of construction work or manufacturing products, has caused harm to the public by neglecting to take necessary safety measures or caused critical injury, including death, to employees in the workplace by neglecting to take necessary safety or health measures under the Industrial Safety and Health Act;
6. The person who has not entered into or performed the contract (including the matters concerning incidental tenders under Article 17 hereof and the matters concerning joint contracts under Article 72 of the Enforcement Decree of the Act on Contracts to which the State is a party), without justification;
7. The person who, in a competitive bidding, has pre-concerted bidding prices by agreement among bidders or colluded to have a specific person become the successful bidder. The person who has counterfeited or forged, or used in an unjust manner any of the documents related to the tender or contract, or submitted false documents;
8. The person who has wilfully submitted an invalid tender;
9. The person who has bribed officer(s) or employee(s) of the Invested Institution, in relation to the bidding, being awarded the contract, or execution or performance of the contract;
10. The person who has submitted an application for or a letter of consent to participation in the tender but has not participated in the tender thrice or more in the then current fiscal year;
11. The person who has prevented others from participating in the tender or interfered with the successful bidder's executing or performing the contract;
12. The person who, during supervision or inspection, has interfered with performance of such activities; or
13. The person who has failed to submit the documents, in whole or in part, as needed for reviewing bidders' capability to perform relevant contract without justification;

(2) In the case of a joint contract by a group of bidders, the provisions of subsection (1) above shall apply to the person who has directly caused the restriction of the group's qualifications for participating in the tender.

(3) If the person whose qualifications for participating in the tender is restricted is a corporation or other entity, the provisions of subsection (1) above shall also apply to its representative; in the case of Korea Federation of Small Business, the aforesaid provisions shall also apply to its member who has directly caused the restriction of its qualification. Notwithstanding the foregoing provisions, the provisions of subsection (1) above shall not apply to other representative(s) of the aforesaid corporation or other entity who has not dealt with the affairs related to the said tender or contract, if there are more than one representative in the abovementioned corporation or other entity.

(4) If a corporation or other entity has appointed as representative a person whose qualifications for participating in the tender is restricted and the said representative is involved with the tender, then the provisions of subsection (1) above shall also apply to the representative.

(5) When placing restriction on qualifications for participating in the tender, the President of the Invested Institution shall clearly specify the information mentioned in each item below and notify the same to the head of each office of the central government, mayor of Seoul Metropolitan Government, mayor of each of provincial cities, provincial governors and president of each Invested Institution and shall also post the same on the official gazette:

1. Company name (trade name), address, name (representative's name, if a corporation), resident registration number (representative's resident registration number, if a corporation), corporate registration number (only in the case of a corporation), business registration number and license or registration number under applicable laws and ordinances;
2. Duration of restriction placed on qualifications for participating in the tender; and
3. Cause of restriction placed on qualifications for participating in the tender.

(6) If the President of an Invested Institution has been informed of the fact that a person's qualifications for participating in the tender is restricted pursuant to the provisions of subsection (5) above or such fact has been posted in the official gazette, the president of the Invested Institution shall ensure that the person whose qualifications are so restricted can not participate in any tender invited by the said Invested Institution during the duration of such restriction placed.

(7) The President of an Invested Institution shall verify the respective bidders' resident registration number (representative's resident registration number, if a corporation), corporate registration number (only in the case of a corporation), business registration number and license or registration number under applicable laws and ordinances, in order to prevent any person with such restricted qualifications from participating in the tender during the duration of such restriction placed, by changing trade name and/or replacing the representative.

(8) Unless circumstances require, the President or Contracting Officer of an Invested Institution shall not enter into any private free contract with a person whose qualifications for participating in the tender are restricted (including a person whose qualifications are restricted by other Invested Institutions).

(9) A person whose qualifications for participating in the tender are restricted may apply to the President of the Invested Institution concerned for cancellation or alteration of such restriction, if the person has any objection to such restriction placed.

(10) If the President of an Invested Institution may also prohibit from participating in any tender a person whose restricted qualifications for participating in the tender have been notified or posted on the official gazette under the Act on Contracts to which the State is a party and Local Finance Act; provided, however, that measures shall be taken by all means to ensure that a person whose

qualifications for participating in the tender due to the reason as referred to in items 1 through 5, item 7 and item 8, can not participate in any tender invited by the said Invested Institution at all.

(11) The provisions of subsection (5) above shall apply, *mutatis mutandis*, where, as a result of reviewing the objection raised under subsection (9) above, the decision on the restriction placed on the qualifications for participating in the tender is cancelled or the duration of such restriction placed is altered.

Article 24 (Procedures for Hearing and Review)

(1) When intending to place restriction on any person's qualifications for participating in the tender pursuant to the provisions of subsection (1) of Article 23 hereof, the president of the Invested Institution concerned shall allow the said person or his/her representative an opportunity to represent his/her opinion in advance and shall hear the opinion from the interested parties, if it is deemed necessary; provided, however, that the foregoing provisions shall not apply where the subject of such intended restriction or its representative has not responded thereto, without justification, or such an opportunity to represent such opinion cannot be allowed due to the person's whereabouts unknown.

(2) If intending to hear such opinion pursuant to the provisions of subsection (1) above, the President of the Invested Institution concerned shall give notice to the persons or his/her representative in writing of the time, date and place of such hearing, together with the reason for such hearing.

(3) The persons or his/her representative who has been notified of such hearing under subsection (2) above may be present at such time on such date as designated and represent his/her opinion, or submit a written statement.

(4) The notice to be given under subsection (2) above shall clearly state that any failure to respond to such notice without justification shall constitute a waiver of the opportunity to represent such opinion.

(5) If the subject of the intended restriction represents its opinion pursuant to the provisions of subsection (3) above, the person in charge of such affairs in the Invested Institution shall keep the record of the opinion so represented in writing and have the person present verify and sign the same.

Article 25 (Administrative Protest)

(1) The person (for the purpose of this Article, hereinafter referred to as "Protester") who has suffered any unfavourable treatment from the President or Contracting Officer of an Invested Institution, due to the matters as described below, in the course of a procurement contract through an international tender may lodge a protest with the President of the Invested Institution concerned, requesting cancellation or correction of such treatment:

1. Matters related to the scope of the procurement contract to be entered into by the Invested Institution through an international tender;
2. Matters related to qualifications for participating in the tender;
3. Matters related to the tender announcement;
4. Matters related to selecting the successful bidder.

(2) The Protester under subsection (1) above shall lodge a protest with the President of the Invested Institution concerned, within 15 days from the date when the action constituting the cause of such administrative protest has occurred or within 10 days after the Protester becomes aware of such action.

(3) Within 10 days after receipt of such protest as mentioned in subsection (1) above, the President of the Invested Institution concerned shall examine it and notify the Protester of the result thereof.

(4) The person having an objection to the result under subsection (3) above may file a petition for review (hereinafter referred to as "Petition for Review") with the Commission on Mediation of Disputes over the International Contracts by a Government-invested Institutions, within 15 days from the date of receipt of such notice.

Article 26 (Commission on Mediation of Disputes over the International Contract by a Government-invested Institutions)

(1) The Commission on Mediation of Disputes over the International Contract by a Government-invested Institution (hereinafter referred to as "Commission") shall be established, within the Ministry of Finance and Economy, for the purpose of reviewing and mediating Petitions for Review.

(2) The Commission shall have the right to review the Petition for Review filed with it, through an administrative protest, by the person having suffered any unfavourable treatment due to the matters as described in subsection (1) of Article 25 hereof, in the course of a procurement contract to be entered into by an Invested Institution through an international tender conducted pursuant to the provisions of the Agreement on Government Procurement and a bilateral agreement by any organization other than an Invested Institution among those listed in Schedule 3, Appendix I of the Agreement on Government Procurement.

Article 27 (Composition of Commission)

(1) The Commission shall consist of not more than 15 members, including the chairman.

(2) The Deputy Minister of Finance and Economy shall be chairman and other members of the Commission shall be appointed as follows;

1. The persons nominated by the head of the respective organization concerned among the public servants of Level 2 or 3 recognized as candidates for the Commission member by the Ministries of Finance and Economy, Defense, Government Administration and Home Affairs, Commerce, Industry and Energy, Information and Communication, and Construction and Transportation, Public Procurement Office and the Minister;
2. The persons commissioned by the Minister to be a Commission member, among those satisfying the following requirements:
 - a. Having been in office as associate professor or higher level specialized in law, finance, foreign trade or accounting at a college under relevant Education Act for a period of 5 years or more;
 - b. Having the lawyer's license and the experience of being engaged in legal services for a period of 10 years or more; or
 - c. Having sufficient knowledge of and experience in the government's accounting and procurement activities.

(3) The term of office of a Commission member who is not a public servant shall be 2 years and such a member may be reappointed, provided that the term of office of a member appointed to fill a vacancy shall be the remainder of the term of office of his/her predecessor.

(4) A Commission member who is not a public servant shall not be discharged from the Commission membership against his/her own will, unless sentenced to imprisonment or heavier punishment or unable to fulfil the duty as a Commission member due to psychosomatic breakdown continuing for a long period.

Article 28 (The Role of Commission)

Upon receipt of a Petition for Review, the Commission shall notify the Invested Institution concerned thereof and shall review and mediate the subject of such Petition for Review.

Article 29 (Suspension of Contracting Procedures)

(1) The Commission has the right to direct the Invested Institution concerned to suspend the applicable procedures for the tender at issue or stop executing the contract at issue until completion of mediation concerning the Petition for Review, when it is deems necessary, taking into account the opinion of the president of the Invested Institution concerned. In such a case, the aforementioned suspension or stopping shall be directed in writing by the Commission within 7 days after receipt of the opinion under Article 32 hereof, unless circumstances require otherwise.

(2) In the event that, in accordance with the terms of the Agreement on Government Procurement, the Commission elects not to direct suspension of the procedures for the tender to be suspended or execution of the contract under subsection (1) above since it may be likely to adversely affect the public interest or the interest of parties concerned the Commission shall notify the Protester and the Invested Institution concerned in reason in writing.

Article 30 (Chairman's Responsibilities)

(1) The Chairman shall be responsible for overall management of the Commission's activities and represent the Commission.

(2) If the Chairman is unable to perform his/her duties as chairman due to a cause beyond his/her reasonable control, the member nominated by the Minister shall act on his/her behalf.

Article 31 (The Commission's Meeting)

(1) The Commission's meeting shall be convened by the Chairman.

(2) A quorum for holding the Commission's meeting shall be the majority of all members in office. All resolutions of the Commission shall be adopted by the affirmative vote of a majority of the members present at a meeting at which a quorum is present.

(3) The Commission shall appoint an executive secretary to deal with the affairs of the Commission.

Article 32 (Review)

(1) Upon receipt of the notice as to the content of the Petition for Review under the provisions of Article 28 hereof, the president of the Invested Institution concerned shall submit to the Commission in writing his/her opinion about such Petition for Review within 14 days from the date of receipt of the notice mentioned above.

(2) If it is deemed necessary, the Commission may request the Protester, the President of the Invested Institution concerned to submit to the Commission the necessary documents related to the subject of such Petition for Review and also request appropriate professional organizations to appraise, diagnose or test the same.

(3) Prior to completion of mediation as to the Petition for Review, the Commission shall allow the Protester or his/her representative an opportunity to represent his/her opinion and may the Protester, the President of the Invested Institution, witnesses, appropriate experts attend the Commission's meeting to hear their opinions.

Article 33 (Suspension of Mediation)

If a lawsuit concerning the matter that is identical to the subject of such Petition for Review as filed with the Commission is under way in court, the Commission may suspend review and mediation thereof, in which case the Commission shall notify the Protester of the reason for such suspension.

Article 34 (Mediation)

(1) The Commission shall prepare a mediation statement based upon the result of having reviewed the Petition for Review and notify the same to the Protester.

(2) If, in preparing the mediation statement as referred to in subsection (1) above, the Commission is of an opinion that the Protester has suffered any unfavourable treatment due to the matters as described in subsection (1) of Article 25 hereof, the Commission shall include in such mediation statement necessary measures for cancelling or correcting such actions of the President or Contracting Officer of the Invested Institution concerned, or damages or indemnities for loss resulting therefrom.

(3) The damages or indemnities for loss under subsection (2) above may be limited to the expenses incurred in the course of preparing for the tender and filing a Petition for Review.

Article 35 (Allowances)

The Commission may pay allowances, within the budget, to the Commission members and appropriate experts present at the Commission's meetings.

Article 36 (Related Expenses)

The expenses incurred in relation to the review and mediation of a Petition for Review shall be borne by the Protester, unless otherwise agreed by the parties to such petition.

Article 37 (Detailed Enforcement Regulations)

(1) The necessary matters concerning enforcement of these Regulations shall be prescribed and notified by the Minister.

(2) The President of an Invested Institution may set forth the necessary detailed matters concerning enforcement of these Regulations, within the limit of the notification by the Minister under subsection (1) above.

ADDENDA <No. 107, dated 21 October 1999>

- (1) (Effective Date) These Regulations shall come into effect on the date of promulgation hereof.
 - (2) (Validity) The provisions of Article 17 hereof shall remain valid until 31 December 2000.
 - (3) (Exception in Applying Payment of Interests on Bid Bond, etc.) The provisions of Article 19 hereof shall not apply to any bid bond received on or before 6 July 1995.
 - (4) (Transitional Measure concerning the Actions done in compliance with previous Notifications) All the activities done in accordance with the notification prescribed by the Minister pursuant to the provisions of subsection (3), Article 20 of the previous Framework Act on the Management of Government-invested Institutions (meaning Legislation No. 5812 "Framework Act on the Management of Government-invested Institutions" before revised by an amendment thereto.) shall be deemed to have been done in compliance with these Regulations.
-

**THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED
IN NATIONAL CURRENCIES FOR 2004-2005**

SINGAPORE

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 2004-2005.

The information notified by Singapore is reproduced below. Other submissions will be compiled in addenda to this document.

1. Calculation of threshold figures in national currency

Annex 1 Entities	Threshold Value (SDR)	Threshold Value in Singapore Dollars (rounded)
1. Goods and services other than construction services	130,000	307,200
2. Construction services	5,000,000	11,817,000

Annex 3 Entities	Threshold Value (SDR)	Threshold Value in Singapore Dollars (rounded)
1. Goods and services other than construction services	400,000	945,300
2. Construction services	5,000,000	11,817,000

2. Method of calculation

The calculation of national threshold is based on the monthly average exchange rate of SDR to Singapore Dollars over 24 months from October 2001 to September 2003.

Month	Exchange Rate of Singapore Dollars to 1 SDR	Month	Exchange Rate of Singapore Dollars to 1 SDR
October 2001	2.3305	October 2002	2.3337
November 2001	2.3179	November 2002	2.3402
December 2001	2.3262	December 2002	2.3608
January 2002	2.2754	January 2003	2.3920
February 2002	2.2777	February 2003	2.3821
March 2002	2.2972	March 2003	2.4255
April 2002	2.2936	April 2003	2.4552
May 2002	2.3044	May 2003	2.4563
June 2002	2.3476	June 2003	2.4608
July 2002	2.3324	July 2003	2.4495
August 2002	2.3211	August 2003	2.4202
September 2002	2.3504	September 2003	2.4714

Source: International Financial Statistics, IMF

The average exchange rate of SDR to Singapore Dollars is:

Singapore Dollar 56.7221 / 24 months = Singapore Dollar 2.3634

**PROPOSED MODIFICATIONS TO APPENDICES II, III AND IV OF
THE REPUBLIC OF KOREA**

Notification from the Republic of Korea under Article XXIV:6(a)¹ of the GPA

The following notification from the Permanent Mission of the Republic of Korea was received on 10 November 2003 with the request that it be circulated to the Parties to the Agreement on Government Procurement.

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement (1994), the Republic of Korea wishes to notify the Committee on Government Procurement of the following modifications to Appendices II to IV of the GPA.

- (a) Appendix II - Publications Utilized by Parties for the Publication of Notices of Intended Procurements – Paragraph 1 of Article IX, and of Post-Award Notices – Paragraph 1 of Article XVIII

Delete:

"Kwanbo (The Korean Government's Official Gazette)
The Seoul Shinmun"

Replace with:

"The Korean e-Procurement System: G2B (<http://www.g2b.go.kr>)
and
Daily Press (if necessary)

For Entities Listed in Annex 2, The Korean e-Procurement System (G2B)
and
Internet Home Page of Each Entity"

¹ Article XXIV, 6(a) provides that "if the rectification, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII".

- (b) Appendix III - Publications Utilized by Parties for the Publication Annually of Information on Permanent Lists of Qualified Suppliers in the Case of Selective Tendering Procedures – Paragraph 9 of Article IX

Delete:

"Kwanbo (The Korean Government's Official Gazette)"

Replace with:

"The Korean e-Procurement System: G2B (<http://www.g2b.go.kr>)"

- (c) Appendix IV - Publications Utilized by Parties for the Publication of Laws, Regulations, Judicial Decisions, Administrative Rulings of General Application and Any Procedure regarding Government Procurement Covered by This Agreement – Paragraph 1 of Article XIX

Delete:

"Kwanbo (The Korean Government's Official Gazette)"

Replace with:

"Kwanbo (The Korean Government's Official Gazette)
and/or

The Korean e-Procurement System: G2B (<http://www.g2b.go.kr>)"

Accordingly, page 3/4 of Appendix II (English, French and Spanish); page 2/4 of Appendix III (English, French and Spanish); page 4/5 of Appendix IV (English, French and Spanish) should be modified as in Attachment A to this document (redlined version). Attachment B shows the relevant pages of the loose-leaf system after certification by the WTO Secretariat.

KOREA'S PROPOSED WITHDRAWAL OF KOREA TOBACCO & GINSENG CORPORATION AND DAEHAN PRINTING AND PUBLISHING CO., LTD (GPA/W/250)

Communication from the United States

The following communication, dated 8 November 2003, has been received from the Permanent Mission of the United States with the request that it be circulated to the Committee on Government Procurement.

Based upon Korea's responses in document GPA/W/270 to questions of the United States in document GPA/W/264, the United States hereby withdraws its objections set out in document GPA/W/258 to the proposed withdrawal of Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd from Annex 3 of Appendix I of the Agreement on Government Procurement.

COMMUNICATION FROM CANADA

Responses from Canada to Questions from Hong Kong, China (GPA/W/218)
Regarding Proposed Modifications to Canada's Annex 1
of Appendix I (GPA/W/203)

Corrigendum

In GPA/W/229 "Responses from Canada to Questions from Hong Kong, China (GPA/W/218) Regarding Proposed Modifications to Canada's Annex 1 of Appendix I (GPA/W/203)", on page 4, in the "Side-by-Side Comparison", under item 17, the following phrase should be inserted immediately following "Department of Fisheries and Oceans" in the right-hand column: "*(Not including procurements respecting FSCs 36, 70 and 74.)*". This statement, including brackets, should appear immediately prior to the bracketed statement that begins "*(For purposes...)*".

This phrase, "*(Not including procurements respecting FSCs 36, 70 and 74.)*", appears correctly in the right-hand column under item 17 of Canada's original submission in GPA/W/203 (Attachment 1) in both the English and French versions.

**QUESTIONS TO THE REPUBLIC OF KOREA RELATING TO THE PROPOSED
WITHDRAWAL OF KOREA TOBACCO & GINSENG CORPORATION
AND DAEHAN PRINTING AND PUBLISHING CO. LTD**

Communication from the European Communities

The following communication, dated 23 October 2003, has been received from the Permanent Delegation of the European Commission with the request that it be circulated to the Committee on Government Procurement.

The European Communities would appreciate the Republic of Korea's responses to the following questions relating to its proposed withdrawal of Korea Tobacco & Ginseng Corporation (KT&G) and Daehan Printing and Publishing Co. Ltd. (Daehan) from Annex 3 of Appendix I of the Agreement on Government Procurement (GPA/W/250).

KT&G

1. Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, *de jure* or de facto, influence the appointment of the directors of KT&G.
2. Please describe all financing, including grants, guarantees and loans, that KT&G may have obtained from the Government of Korea, other Korean public entities or publicly-owned companies.
3. Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, *de jure* or de facto, influence management decisions of KT&G.
4. Please describe the main features of the laws, regulations and measures that apply specifically to tobacco manufacturing companies.
5. Please provide the full text of Article 25 of the Tobacco Business Act and all measures giving effect to this provision, and explain what kind of assistance could be required. Has this provision ever been used, and if so, please describe how and under which circumstances?
6. Please describe the conditions that apply for obtaining a licence to manufacture tobacco, the customs tariffs that apply to the import of cigarettes and leaf tobacco, and the market shares of all tobacco manufacturers.

Daehan

7. Please indicate if the Government of Korea, other Korean public agencies or publicly-owned companies own or used to own shares in Daehan. If yes, please provide details on these shareholdings, including the number of these shares, voting rights attached to these shares, and indicate when such shares were sold to private parties.
 8. Please indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, *de jure* or de facto, influence the appointment of the directors of Daehan.
 9. Please describe all financing, including grants, guarantees and loans, that Daehan may have obtained from the Government of Korea, other Korean public entities or publicly-owned companies.
 10. indicate to what extent the Government of Korea, other Korean public entities or publicly-owned companies may, *de jure* or de facto, influence management decisions of Daehan.
 11. Please describe and provide a copy of the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement (Presidential Decree 15187) and the Accounting Regulation for Government Invested Enterprises (Minister of Finance and Economy Decree 107). Please indicate if there are other instruments that apply to Daehan and not to other printing or publishing companies.
 12. Please indicate if the Regulations referred to in question 11 are applicable to National Textbook Ltd.
 13. Please explain why the purchase of National Textbook Ltd. – a company not included in Annex 3 of Appendix I - justifies the withdrawal of Daehan from this Annex 3.
 14. Please set out on which markets Daehan and its subsidiaries, if any, operate, and indicate to what extent these markets have been liberalized. Please describe the structure of the Korean market for textbooks.

MODIFICATIONS TO APPENDIX I OF THE AGREEMENT ON GOVERNMENT PROCUREMENT RELATING TO JAPAN POST PROPOSED BY JAPAN IN GPA/W/255, DATED 4 MARCH 2003

Communication from the European Community

The following communication, dated 13 October 2003, has been received from the Permanent Delegation of the European Commission with the request that it be circulated to the Committee on Government Procurement.

The European Community (EC) hereby withdraws its objections contained in GPA/W/262, dated 4 April 2003, against the modifications of Appendix I of the WTO Agreement on Government Procurement proposed by Japan in GPA/W/255, dated 4 March 2003, relating to Japan Post.

The EC understands that the notification results from Japan Post becoming legally independent from the competent ministry, and agrees that such entities should be covered under Annex 3 rather than Annex 1 of Appendix I of the Agreement. In this respect, the EC notes that, pursuant to general note 3 to Annex 3 of Appendix I of Japan, the Agreement does not apply to contracts which entities in Group A of Annex 3 award for the purpose of "their" daily profit-making activities which are exposed to competitive forces in the market. The present acceptance of the proposed modifications is without prejudice to the question which activities, if any, of Japan Post are directly exposed to competition on markets to which access is not restricted.

Furthermore, the EC notes Japan's unilateral engagement to maintain the Annex 1 threshold.

Committee on Government Procurement

Original: English

PROPOSED MODIFICATION TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)¹ of the GPA

The following notification from the Permanent Mission of Japan was received on 12 September 2003 with the request that it be circulated to the Parties to the Agreement on Government Procurement.

1. Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement (GPA), the Government of Japan wishes to notify the Committee on Government Procurement of the following modification of a purely formal nature relating to Annex 3 of Appendix I of the GPA (cf. WT/Let/446):

- add "- Japan Nuclear Energy Safety Organization" after "- National Printing Bureau" in Group B in the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4".

2. The above modification is the result of the following organizational change relating to a central government entity in Annex 1. It does not alter the level of the mutually agreed coverage provided in the Agreement:

- (1) Through Japan's central government reform process, part of the undertakings, which have been operated by internal sub-divisions of the Nuclear and Industrial Safety Agency (an independent organization of the Ministry of Economics, Trade and Industry in Annex 1) are to be conducted by the Japan Nuclear Energy Safety Organization. Under the Law Concerning the Japan Nuclear Energy Safety Organization (Law No. 179 of 18 December 2002) and the relevant ordinances, this organizational change shall be implemented as of 1 October 2003. The Japan

¹ Article XXIV:6(a) reads as follows: "Rectifications, transfers of an entity from one Annex to another or, in exceptional cases, other modifications relating to Appendices I through IV shall be notified to the Committee, along with information as to the likely consequences of the change for the mutually agreed coverage provided in this Agreement. If the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII."

Nuclear Energy Safety Organization shall be established as an Independent Administrative Institution (IAI), legally independent from the government, to perform transferred undertakings efficiently and effectively.

- (2) Since this new Organization does not fall within the central government entities covered by the Accounts Law, and is not provided for in the National Government Organization Law, nor in the Law establishing the Cabinet Office, Japan has decided to add this entity to Annex 3 regarding both supplies and services (under Group B in the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4"). In this way, the Agreement will apply to the Japan Nuclear Energy Safety Organization, with the same thresholds and conditions as stipulated in Annex 1 for central government entities.
- (3) This entity will have accounting rules as of 1 October 2003 to implement the relevant thresholds and procedures under the Agreement. Challenge procedures, as provided for in Article XX of the Agreement, will apply to procurement conducted by this entity, which will fall under the control of the Ministry of Economics, Trade and Industry.

3. Attachment A² contains the proposed modification to Annex 3 of Appendix I in red-line/strikeout form. Attachment B² indicates how Annex 3 of Appendix I would appear after the proposed modification has been made.

² Attachments A and B are in English only.

Notes to Annex 3

1. Products and services procured with a view to resale or with a view to use in the production of goods for sale are not included.
2. This Agreement shall not apply to contracts to be awarded to co-operatives or associations in accordance with laws and regulations existing at the time of the entry into force of this Agreement for Japan.

3. This Agreement shall not apply to contracts which the entities in Group A award for purposes of their daily profit-making activities which are exposed to competitive forces in markets. This note shall not be used in a manner which circumvents the provisions of this Agreement.

4. Notes to specific entities:

- (a) Procurement related to operational safety of transportation is not included.
- (b) Procurement which could lead to the disclosure of information incompatible with the purpose of the Treaty on the Non-Proliferation of Nuclear Weapons or with international agreements on intellectual property rights is not included. Procurement for safety-related activities aiming at utilization and management of radioactive materials and responding to emergencies of nuclear installation is not included.
- (c) Procurement related to geological and geophysical survey is not included.
- (d) Procurement of advertising services, construction services and real estate services is not included.
- (e) Procurement of ships to be jointly owned with private companies is not included.
- (f) Procurement of public electrical telecommunications equipment and of services related to operational safety of telecommunications is not included.
- (g) Procurement of the services specified in Annex 4, other than construction services, is not included.

GPA/W/274

23 September 2003

(03-5029)

Committee on Government Procurement

Original: English

PROPOSED MODIFICATIONS TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)¹ of the GPA

The following notification from the Permanent Mission of Japan was received on 12 September 2003 with the request that it be circulated to the Parties to the Agreement on Government Procurement.

1. Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement (GPA), the Government of Japan wishes to notify the Committee on Government Procurement of the following modifications of a purely formal nature relating to Annex 3 of Appendix I of the GPA:

- (a) Delete the following from the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4":

Group A:

- Water Resource Development Public Corporation
- Japan Green Resources Corporation
- Japan Science and Technology Corporation
- Japan Consumers Information Center
- RIKEN (The Institute of Physical and Chemical Research)
- National Stadium and School Health Center of Japan
- Association for Welfare of the Mentally and Physically Handicapped

¹ Article XXIV:6(a) reads as follows: "Rectifications, transfers of an entity from one Annex to another or, in exceptional cases, other modifications relating to Appendices I through IV shall be notified to the Committee, along with information as to the likely consequences of the change for the mutually agreed coverage provided in this Agreement. If the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII."

Group B:

- National Agriculture Research Organization.

- (b) Add the following to the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4":

Group A:

- Japan Water Agency
- Japan Green Resources Agency
- Japan Science and Technology Agency
- National Consumer Affairs Center of Japan
- RIKEN
- National Agency for the Advancement of Sports and Health
- National Center for Persons with Severe Intellectual Disabilities, Nozominosono

Group B:

- National Agriculture and Bio-oriented Research Organization.

2. The above modifications are the results of the following organizational changes relating to entities listed in Annex 3:

- (a) "Water Resources Development Public Corporation" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "Japan Water Agency".
- (b) "Japan Green Resources Corporation" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "Japan Green Resources Agency".
- (c) "Japan Science and Technology Corporation" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "Japan Science and Technology Agency".
- (d) "Japan Consumers Information Center" has been renamed "National Consumer Affairs Center of Japan" as of 1 October 2003.
- (e) "RIKEN (The Institute of Physical and Chemical Research)" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "RIKEN".
- (f) "National Stadium and School Health Center of Japan" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "National Agency for the Advancement of Sports and Health".
- (g) "Association for Welfare of the Mentally and Physically Handicapped" is to be abolished on 1 October 2003 and its remaining functions are to be assigned to "National Center for Persons with Severe Intellectual Disabilities, Nozominosono".
- (h) "National Agricultural Research Organization" is to be abolished on 1 October 2003 and its functions are to be assigned to "National Agriculture and Bio-oriented Research Organization".

3. Attachment A² contains the proposed modification to Annex 3 of Appendix I in red-line/strikeout form. Attachment B² indicates how Annex 3 of Appendix I would appear after the proposed modifications have been made.

² Attachments A and B are in English only.

Notes to Annex 3

1. Products and services procured with a view to resale or with a view to use in the production of goods for sale are not included.
2. This Agreement shall not apply to contracts to be awarded to co-operatives or associations in accordance with laws and regulations existing at the time of the entry into force of this Agreement for Japan.

3. This Agreement shall not apply to contracts which the entities in Group A award for purposes of their daily profit-making activities which are exposed to competitive forces in markets. This note shall not be used in a manner which circumvents the provisions of this Agreement.

4. Notes to specific entities:

- (a) Procurement related to operational safety of transportation is not included.
- (b) Procurement which could lead to the disclosure of information incompatible with the purpose of the Treaty on the Non-Proliferation of Nuclear Weapons or with international agreements on intellectual property rights is not included. Procurement for safety-related activities aiming at utilization and management of radioactive materials and responding to emergencies of nuclear installation is not included.
- (c) Procurement related to geological and geophysical survey is not included.
- (d) Procurement of advertising services, construction services and real estate services is not included.
- (e) Procurement of ships to be jointly owned with private companies is not included.
- (f) Procurement of public electrical telecommunications equipment and of services related to operational safety of telecommunications is not included.
- (g) Procurement of the services specified in Annex 4, other than construction services, is not included.

**RESPONSES TO QUESTIONS FROM THE UNITED STATES RELATING TO
KOREA TOBACCO & GINSENG CORPORATION AND
DAEHAN PRINTING AND PUBLISHING CO. LTD**

Communication from the Republic of Korea

Please find below Korea's responses to questions from the United States (GPA/W/264) regarding Korea's notification to the Committee on Government Procurement on the withdrawal of Korea Tobacco & Ginseng Corporation (KT&G) and Daehan Printing and Publishing Co. Ltd. (Daehan) from Annex 3 of Appendix I of the Agreement on Government Procurement (GPA) (GPA/W/250).

KT&G

1. *With respect to KT&G, please provide a copy of the laws, regulations and other measures that authorized the Korean Government's sale of its shares in KT&G, that transformed KT&G from a government enterprise into a private entity and that demonstrate that KT&G is no longer subject to laws, regulations or other measures that apply to government enterprises.*

The Korea Tobacco & Ginseng Corporation was privatized in accordance with the following law:

- The Act on Corporate Governance Improvement and Privatization of Government-Invested Enterprises.¹

2. *Please describe all laws, regulations and other measures that Korea enacted or adopted to ensure that KT&G's procurement is consistent with the GPA. What measures would be required to alter such regulation of KT&G's procurement if it were withdrawn from GPA coverage?*

The Korean Government enacted the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement (Presidential Decree 15187), the Special Administrative Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement (Prime Minister's Decree 603) and the Accounting Regulation for Government Invested Enterprises (Minister of Finance and Economy's Decree 107) to ensure that the procurement of entities listed in the GPA Annex 3 is consistent with the GPA. They are also applied to the KT&G.

¹ For the details, please refer to Attachment 1 to this document.

In the event that KT&G is withdrawn from the GPA coverage, no special measures will be required to alter the regulation of KT&G's procurement. In this case, KT&G will be excluded automatically from the scope of application of above-described regulations.

The following are the relevant provisions in the Accounting Regulation for Government Invested Enterprises:

< The Accounting Regulation for Government Invested Enterprises >

Article 11 (Scope of Government Invested Enterprise's Procurement Contracts subject to International Tendering)

(1) The government invested enterprise's procurement contracts subject to international tendering are defined as contracts that exceed the amount determined and publicly announced by the Minister of Finance and Economy pursuant to the Government Procurement Agreement, signed on 15 April 1994 in Marrakesh (hereafter referred to as the "Government Procurement Agreement") and relevant international rules based on the Government Procurement Agreement. However, the following cases are excluded from the scope of application of the Government Procurement Agreement:

1. In case of procuring products and services necessary to resale or to use in the production of goods or provision of services for sale.
2. In case of manufacturing and/or purchasing any goods produced by small and medium enterprises pursuant to the Small and Medium Enterprises Products Promotion Act.
3. In case of purchasing any agricultural, fishery or livestock products according to the Foodgrains Management Law and the Law Concerning Marketing and Price Stabilization of Agricultural and Fishery Products, or the Livestock Law.
4. In case the Korean Electric Power Corporation purchases certain heavy electronic equipment (HS 8504,8535,8537,8544) based on the Korea Electric Power Corporation Act.
5. In case of contracts by single tendering pursuant to the Provision of Article 15.

(2) In case of contracts by international tendering stipulated in the Paragraph (1), the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement and the Special Administrative Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement shall apply *mutatis mutandis* to the contract methods and procedures except as otherwise provided by this regulation.

3. *Are there any laws, regulations or other measures that restrict KT&G from hiring former Korean Government employees? If so, please provide a copy.*

Under Article 17 of the Public Service Ethics Act, the Korean Government restricts retired public officials from filling a position in related private enterprises.

Pursuant to the provisions of Clause 2, Article 17 of the Act, KT&G has been publicly notified by the Ministry of Government Administration and Home Affairs as a private company subject to the employment restriction in 2003.

Thus, retired public officials of Grade IV (Director level) or higher are not allowed to work for private companies including KT&G for two years after their retirement.

The following are the relevant provisions in the Public Service Ethics Act (Act 6494), the Enforcement Decree of the Public Service Ethics Act (Presidential Decree 17538), and the Notification of the Ministry of Government Administration and Home Affairs.

< Public Service Ethics Act >²

Article 3 (Persons Liable for Registration)

(1) Any public official who falls under any of the following subparagraphs (hereinafter referred to as the "person liable for registration") shall register property under the provisions of this Act:

1. National and local public officials of Grade IV or higher in general service, and public officials in special service, who receive remuneration equivalent thereto;

Article 17 (Restriction on Employment of Retired Public Officials in Related Private Enterprises, etc.)

No public official or officers or employee of a public service-related organization who was engaged in a grade of position or field of duties as prescribed by the Presidential Decree may be employed in a profit-making private enterprise larger than a specified size (hereinafter referred to as the "profit-making private enterprise") connected closely with the duties which he performed at the competent department within three years immediately before his retirement, for a period of two years immediately after his retirement, or the organization established for the joint profits and mutual cooperation, etc. of private enterprises (hereinafter referred to as the "association").

< Enforcement Decree of the Public Service Ethics Act >³

Article 31 (Persons whose Employment is Restricted)

Public officials and officers and employees of public service-related organizations whose employment is restricted under Article 17(1) of the Act shall be those liable for registration as provided in Article 3 of the Act.

< Notification No. 2002-23 of the Ministry of Government Administration and Home Affairs >

Pursuant to the provisions of Clause 2, Article 17 of the Public Service Ethics Act and Clause 3, Article 33 of the Enforcement Decree of the Public Service Ethics Act, the Ministry of Government Administration and Home Affairs hereby notifies private enterprises subject to the employment restriction in 2003:

No.	Corporate Name	Type of Industry	Location
2074	Korea Tobacco & Ginseng Corporation	Manufacturing	Daejeon Daedeok Pyungchon 100

² For the details, please refer to Attachment 2 to this document.

³ For the details, please refer to Attachment 3 to this document.

4. *Please describe all financing, including direct grants, guarantees and loans at preferential rates, that KT&G may have obtained prior to the Korean Government's sale of its shares in KT&G.*

None.

5. *Please describe any special conditions attendant to the Korean Government's sale of its shares in KT&G, such as no election of new directors until "X" years after the sale.*

None.

Daehan Printing and Publishing

6. *Please explain the change in circumstances that justify Daehan's withdrawal from Annex 3 at this time.*

As part of privatization, a policy tool that enhances efficiency and transparency of both the government and the private sectors, the Korean Government sought to privatize National Textbook Ltd.(hereafter referred to as "National Textbook") which was a state enterprise. As a result, in December 1998, Daehan Printing and Publishing Co. Ltd. (hereafter referred to as "Daehan") purchased the entire government-owned share of National Textbook through an open tendering procedure. In May 1999, the merger of National Textbook with Daehan was completed. Daehan as a private entity since its establishment in 1948 has been only subject to the Commercial Act or other measures that apply to all private companies, before and after its merger with National Textbook.

7. *Has Daehan ever been subject to laws, regulations or measures, other than the Commercial Act or other measures that apply to all private companies? If so, please describe and provide a copy of such laws, regulations or other measures.*

Please refer to the reply to question 6 above.

8. *Please describe all laws, regulations and other measures that Korea enacted or adopted to ensure that the Daehan's procurement is consistent with the GPA. What measures would be required to alter such regulation of Daehan procurement if it were withdrawn from GPA coverage?*

The Korean Government enacted the Special Regulation of the Enforcement Decree of the Act relating to Contracts to which the State is a party for specific procurement (Presidential Decree 15187) and the Accounting Regulation for Government Invested Enterprises (Minister of Finance and Economy' Decree 107) to ensure that the procurement of entities listed in the GPA Annex 3 is consistent with the GPA. They are also applied to Daehan.

In the event that Daehan is withdrawn from the GPA coverage, no special measures will be required to alter the regulation of Daehan's procurement. In this case, Daehan will be excluded automatically from the scope of application of above-described regulations.⁴

9. *Has Korea named or selected any directors of Daehan's Board of Directors? If so, do any such directors remain on Daehan's Board?*

No, Daehan's directors have been appointed at the general meeting of shareholders without any control or influence from the Korean Government.

⁴ For the details, please refer to the reply to question 2 above.

10. *According to the information provided with regard to Daehan, Daehan has no foreign ownership. Are there any restrictions that preclude foreign ownership of any shares of Daehan? If so, please provide a copy.*

No, there is no restriction that precludes foreign ownership of any shares of Daehan, stocks of which are unlisted.

ATTACHMENT 1*

**THE ACT ON CORPORATE GOVERNANCE IMPROVEMENT AND PRIVATIZATION OF
GOVERNMENT-INVESTED ENTERPRISES**

ACT NO. 6607

Article 1 Purpose

The purpose of this Act is to contribute to the creation of sound corporate culture and the balanced development of national economy, by introducing a management system run by specialized executives and to hold the management accountable for its performance, thereby enhancing management efficiency and facilitating privatization, while preventing the concentration of economic power in the process.

Article 2 Applicable Enterprises

This Act shall apply to those corporations falling into any of the following subparagraphs (hereinafter referred to as "Applicable Enterprises") <Amended 26 January 1999, 14 January 2002>:

1. Korea Tobacco and Ginseng Corporation transformed into a joint stock company subject to the Commercial Law, pursuant to the Act on the Abolishment of Korea Tobacco and Ginseng Corporation Act.
2. Korea Telecommunication Corporation transformed into a joint stock company subject to the Commercial Law, pursuant to the Act on the Abolishment of Korea Telecommunication Corporation Act.
3. Korea Gas Corporation established pursuant to the Korea Gas Corporation Act.
4. HANJUNG (Korea Heavy Industry Incorporated).
5. Incheon International Airport Corporation established pursuant to the Incheon International Airport Corporation Act.
6. Korea Aerospace Corporation established pursuant to the Korea Aerospace Corporation Act.

Article 3 Relationship with Other Laws and Regulations

(1) This Act shall supersede other laws and regulations concerning the organization, shareholder rights, and the equity sale for privatization of Applicable Enterprises.

(2) Applicable Enterprises pursuant to Article 2, Paragraph 1 through 3, Paragraph 5, and Paragraph 6 shall not be considered as government Investment Institutions subject to the Framework Act on the Management of Government-Invested Institutions <Amended 26 January 1999, 14 January 2002>.

* Attachments 1-3 are in English only.

(3) Matters concerning Applicable Enterprises (with the exception of Korea Gas Corporation) other than those provided for herein shall be stipulated by the Commercial Law provisions concerning joint stock company.

(4) Matters concerning Korea Gas Corporation other than those provided for herein shall be stipulated by the Korea Gas Corporation Act.

Article 4 President

(1) The president shall be appointed at the shareholders' general meeting.

(2) The term of the president shall be three (3) years, and cannot be dismissed without due reason except in the case set forth in Article 13, Paragraph 3.

(3) The president, in applying the Commercial Law, shall be deemed the chairman of the board of directors.

Article 5 Directors

(1) Directors shall be classified into standing directors and non-standing directors, and shall be appointed at the shareholders' general meeting.

(2) The quorum of standing directors including the president shall account for less than 50 per cent (%) of the total quorum of directors.

(3) The term of directors shall be three (3) years. The term of successors to a vacant non-standing director's seat shall be the remaining term of the predecessor.

(4) One-third of the quorum of non-standing directors shall be appointed annually.

Article 6 Board of Directors

(1) The president shall convene a board of directors meeting ex officio or upon request by more than one quarter (1/4) of registered directors, and shall be the chairman.

(2) In case the president cannot participate in the resolution of the board of directors pursuant to this Act, or cannot perform the duty of the chairman of board of directors due to compelling reasons, the director as stipulated by the Articles of Incorporation shall act on the president's behalf.

Article 7 Remuneration of the President and Standing Directors

(1) The board of directors shall determine, upon its resolution, the criteria and payment method of the remuneration of the president and standing directors, and report to the shareholders' general meeting.

(2) The criteria of remuneration as set forth in Paragraph 1 shall be formulated in such a way as to reflect the management performance of Applicable Enterprise to the determination of remuneration.

(3) The president and standing directors cannot participate in the resolution of board of directors pursuant to Paragraph 1.

Article 8 Recommendation of the Director Candidate

- (1) In case the president recommends the standing director candidate, the recommendation shall be approved by the board of directors. In this case, standing directors except the president cannot participate in the board of directors' resolution.
- (2) Non-standing director candidates shall be recommended by either a shareholder or shareholder association, pursuant to the Articles of Incorporation.

Article 9 Qualifications for Non-Standing Director

- (1) Candidates eligible for non-standing director shall be those with specialized knowledge or experiences in economics, business management, law, or relevant technology.
- (2) Notwithstanding Paragraph 1, those with material interest in the Applicable Enterprise cannot be a non-standing director.
- (3) The scope of those with material interest pursuant to provision set forth in Paragraph 2 shall be stipulated by the Articles of Incorporation.

Article 10 Non-Standing Director's Rights to Demand Materials

A non-standing director can request the president for the provision of materials required for performing duties. In this case, the president shall respond to the demand unless there are special circumstances.

Article 11 President Recommendation Committee

- (1) For the purpose of recommending candidates for president, each Applicable Enterprise shall establish its respective President Recommendation Committee (hereinafter referred to as "Committee").
- (2) The Committee shall be composed of a few non-standing directors, one of former or incumbent presidents pursuant to the Articles of Incorporation, and a few non-official members entrusted by the Committee (with the exception of the employees of Applicable Enterprise in question and government officials). In this case, the quorum of Committee members who are non-standing directors shall account for the majority of the total quorum of members.
- (3) The number of non-standing directors entrusted with the Committee membership pursuant to Paragraph 2 shall be less than one half (1/2) of the total quorum of non-standing directors.
- (4) The Committee chairman shall be appointed among non-standing directors by the board of directors. In this case, the president and standing directors cannot take part in the board of directors' resolution.
- (5) The Committee shall make decisions, with the agreement of majority of registered Committee members, excluding the Committee chairman. In this case, the Committee chairman does not have voting rights.
- (6) Necessary matters concerning the composition and operation of the Committee other than those provided for herein shall be stipulated by the Presidential Decree.

Article 12 Appointment of President

- (1) The president shall be appointed among those who are qualified for a chief executive officer, with extensive knowledge on business management and economics or with extensive management experiences.
- (2) Applicable Enterprise shall post a public notice on recruitment of president candidates on major daily newspapers, and can separately investigate candidates for president who are deemed appropriate for the post, or request a specialized agency for investigation.
- (3) Committee shall examine those recruited pursuant to Paragraph 2, according to the Presidential Candidate Examination Criteria as determined by the board of directors.
- (4) In selecting the president candidates, the Committee shall consult with those to be recommended as candidates on the terms and conditions of contract on management target determined by the board of directors, and where it is deemed necessary in the process of consultation, can modify the contract terms and conditions determined by the board of directors.
- (5) In accordance with the results of examination pursuant to Paragraph 3 and consultation pursuant to Paragraph 4, the Committee shall both recommend the presidential candidates and submit draft contract to the shareholders' general meeting.
- (6) Standing directors including the president, cannot attend the board of directors' meeting held for the purpose of determining the Presidential Candidate Examination Criteria pursuant to Paragraph 3, and the president cannot attend the board of directors' meeting held for the purpose of determining the terms and conditions of the contract on management target pursuant to Paragraph 4. In this case, the chairman of the board of directors shall be the Committee chairman.

Article 13 Contract with the President

- (1) Upon the approval by shareholders' general meeting of the draft contract submitted pursuant to Article 12 Paragraph 5, the Applicable Enterprise shall sign the contract with the president. In this case, the Committee chairman shall sign the contract as the representative of the Applicable Enterprise.
- (2) Pursuant to Paragraph 1, the board of directors can evaluate the performance of contract signed with the president, or request a specialized agency for the evaluation. In this case, the president and standing directors cannot participate in the resolution of board of directors.
- (3) In case the evaluation results pursuant to Paragraph 2 leads to a determination that the president's performance falls short of management target, the board of directors can propose the president's dismissal to the shareholders' general meeting. In this case, the president and standing directors cannot participate in the board of directors' resolution.

Article 14 Establishment of Shareholders Association

- (1) Where it is deemed necessary for the effective operation of shareholders' general meeting, as stipulated in the Presidential Decree, the Applicable Enterprise can establish and operate a shareholders association composed of some shareholders.
- (2) Necessary matters concerning the qualifications for the shareholders association membership and its operation shall be stipulated by the Articles of Incorporation.

Article 15 Provisions on Special Cases Concerning Audit by the Board of Audit and Inspection

Inspection of Applicable Enterprises pursuant to Article 24 Paragraph 1 Subparagraph 3 of the Board of Audit and Inspection Act shall not be carried out unless there is an accident or a concrete evidence of the occurrence of accident.

Article 16 Exercise of Shareholder's Right by the Government

(1) The shareholder's right of Applicable Enterprise's shares held by the government shall be exercised by competent minister, upon consultation with the Minister of Finance and Economy.

(2) Necessary matters concerning the consultation pursuant to Paragraph 1 shall be stipulated by the Presidential Decree.

Article 17 Exercise of Minority Shareholder's Right

The provisions set forth in the Securities Transactions Act Article 191 Paragraph 13 and Article 191 Paragraph 14 shall be applied to the exercise of minority shareholder's right and shareholder proposal right, even when the Applicable Enterprise's shares are not listed on the securities market.

Article 18 Single Person Stock Ownership Ceiling

(1) One (1) shareholder and the person in special relationship with that shareholder as stipulated by the Presidential Decree (hereinafter referred to as "Single Person") shall neither own stocks exceeding the ratio stipulated by the Article of Incorporation within 15 per cent (%) of total number of issued stocks with voting rights, nor de facto control the Applicable Enterprise <Amended 29 January 1999>.

(2) In case a single person owns stocks above the ceiling stipulated in Paragraph 1 or de facto controls Applicable Enterprise, the single person shall immediately dispose of the exceeding amount of stocks. In this case, even before the disposal of exceeding amount, the scope of single person's voting rights exercise shall be restricted to the ceiling stipulated in Paragraph 1.

(3) Single person's ownership or de facto control as stipulated in Paragraph 1 and Paragraph 2 means a single person exercising voting rights by owning stocks under its own or borrowed name, or by collusion.

Article 19 Foreign Stock Ownership Ceiling

(1) Acquisition of the Applicable Enterprise's stocks by foreigner or foreign corporation can be separately restricted pursuant to the Article of Incorporation, in addition to the restriction pursuant to Article 18 Paragraph 1.

(2) The provisions set forth in Article 18 Paragraph 2 shall be applied *mutatis mutandis* to those foreigners or foreign corporations owning stocks above the ceiling or de facto controlling Applicable Enterprise, as stipulated in the Articles of Incorporation pursuant to Paragraph 1 <Inserted 29 January 1999>.

Article 20 Equity Sale Method

(1) The stocks held by the government, government-invested institution, or Korea Development Bank established pursuant to the Korea Development Bank Act (hereinafter referred to as

"Government-equivalent") can be sold on consignment or assignment to agencies stipulated by the Presidential Decree, including but not limited to financial institution and securities firm.

(2) In selling stocks held by government-equivalent, where it is deemed necessary for alleviating the repercussions on stock market, widely diversifying stocks, and enhancing international competitiveness of the Applicable Enterprise, the Minister of Finance and Economy can restrict the qualifications for the buyer of stocks in question or the amount of stocks available for purchase <Amended 29 January 1999>.

(3) Upon the request of an employee stockholders association member, government-equivalent can sell, with priority, the stocks to the employee stockholders association of the corporation in question within the ceiling as stipulated in Article 18 Paragraph 1.

(4) In case of selling stocks pursuant to Paragraph 3, matters including but not limited to the allocation of stocks to the employee stockholders association members, and the disposal of that stock shall be stipulated by the Securities Transactions Act Article 191 Paragraph 3.

(5) Notwithstanding the Budget and Accounting Act, the cost for selling government held stocks pursuant to Paragraph 1 can be disbursed from the proceeds from equity sale.

Article 21 Preclusion from Application

(1) Once an Applicable Enterprise falling into any of the Article 2 Subparagraphs 1 through 3 fulfills any of the requirements set forth in the following Subparagraphs, this Act shall not apply to that enterprise from the date of shareholders' general meeting first convened thereafter:

1. The ratio of voting stocks held by government-equivalent is within the ceiling set forth in Article 18 Paragraph 1.
2. The ratio of voting stocks held by single person other than government-equivalent is larger than that held by government-equivalent.

(2) Among the stocks of Korea Heavy Industry Incorporated, Article 18 and Article 19 shall not apply to the person who acquires the stocks held by government-equivalent through the tendering for equity sale, and once the ratio of the stocks with voting rights held by single person and person falling into any of the following Subparagraphs exceeds 51 per cent (%) of the total issued stocks with voting rights, this Act shall not be applied from the date of shareholders' general meeting first convened thereafter:

1. Person who aims at joint capital participation and management pursuant to contract.
2. The person pursuant to Subparagraph 1 and person who is in special interest with the person as stipulated by the Presidential Decree pursuant to Article 18 Paragraph 1.

(3) In case the government made investment in-kind in Korea Development Bank, The Export-Import Bank of Korea, and Industrial Bank of Korea pursuant to the Act on the Investment In-kind of State Properties, Article 18 shall not be applied <Inserted 29 January 1999>.

ANNEX <NO. 5379, 28 AUGUST 1997>

Article 1 Effective Date

This Act shall take effect as of 1 October 1997.

Article 2

<Deleted 29 January 1999>.

Article 3 Recommendation of the First Non-Standing Director

(1) For the purpose of selecting the person to recommend as the first non-standing director (hereinafter referred to as the "Non-Standing Director Designee"), an Ad-hoc Committee on Non-Standing Director Recommendation shall be established under relevant department in Applicable Enterprises.

(2) The members of the Ad-hoc Committee on Non-Standing Director Recommendation pursuant to Paragraph 1 shall be composed of shareholder representative, non-official member with specialized knowledge in area relevant to Applicable Enterprise, and public official from relevant central government agency.

(3) Necessary matters concerning the composition and operation of the Ad-hoc Committee on Non-Standing Director Recommendation shall be stipulated by the Presidential Decree.

(4) The Ad-hoc Committee on Non-Standing Director Recommendation shall recommend the non-standing director designee to shareholders' general meeting as a non-standing director candidate.

(5) In recommending non-standing director designee as a non-standing director candidate pursuant to Paragraph 4, the Ad-hoc Committee on Non-Standing Director Recommendation, notwithstanding Article 5 Paragraph 3, shall equally divide the quorum of non-standing directors by three (3), and separately recommend non-standing directors with respective terms of one (1) year, two (2) years, and three (3) years. In case the quorum of non-standing directors cannot be equally divided by three (3), the recommended candidates for the longer-term directors shall be more than shorter-term director candidates.

Article 4 Appointment of the First President

(1) For the purpose of recommending candidate for the first president to be appointed at the shareholders' general meeting after the enactment of this Act, an Ad-hoc Committee on President Recommendation shall be established.

(2) Provisions of Article 11 and Article 12 shall be applied *mutatis mutandis* to the composition and operation of the Ac-hoc Committee on President Recommendation pursuant to Paragraph 1 and the appointment of the first president. In this case, "non-standing director" shall be interpreted as "non-standing director designee", and "board of directors" as "non-standing director designees' meeting".

Article 5 Provisions on Special Cases Concerning Incumbent Executives of Applicable Enterprises

(1) The term of incumbent chief director of Applicable Enterprise at the time of enforcement of this Act shall be deemed terminated at the point this Act is enforced.

(2) The president, directors, and auditor of Applicable Enterprise at the time of enforcement of this Act shall be deemed president, directors, and auditor pursuant to this Act, provided that their term is effective until new president, directors, and auditor are appointed at the shareholders' general meeting pursuant to this Act.

ATTACHMENT 2
PUBLIC SERVICE ETHICS ACT
ACT NO.6494

CHAPTER I - GENERAL PROVISIONS

Article 1 (Purpose)

The purpose of this Act is to prescribe matters including, but not limited to, the institutionalized registration and disclosure of the property of public officials and candidates for public offices, the regulation of property acquisition, reporting of gifts by public officials who take advantage of their public office, and restriction of employment of retired public officials, all intended to thereby prevent them from accumulating unlawful property while securing the fairness in the execution of their official duties in order to establish the ethics of public officials as servants of the people.

[This Article Wholly Amended by Act No. 4566, 11 June 1993]

Article 2 (Livelihood Guarantee, etc.)

The State shall guarantee the livelihood of public officials so as to enable them to devote themselves to public service, and shall strive for establishing ethics in public service.

CHAPTER II - REGISTRATION AND DISCLOSURE OF PROPERTY

Article 3 (Persons Liable for Registration)

(1) Any public official who falls under any of the following subparagraphs (hereinafter referred to as the person liable for registration) shall register property under the provisions of this Act: *<Amended by Act No. 4566, 11 June 1993; Act No. 5454, 13 December 1997; Act No. 5491, 31 December 1997; Act No. 5681, 21 January 1999; Act No. 6087, 31 December 1999; Act No. 6306, 29 December 2000; Act No. 6388, 26 January 2001>*

1. National public officials in political service, such as the President, the Prime Minister, members of the State Council, and members of the National Assembly.
2. Public officials in Political Service of local governments, such as the heads of local governments, and local councilmen.
3. National and local public officials of Grade IV or higher in general service, and public officials in special service, who receive remuneration equivalent thereto.
4. Public officials in foreign service prescribed by the Presidential Decree, Grade IV or higher staff members of the National Intelligence Service, and public officials in security service of equivalent grade of the Presidential Security Service.
5. Judges and public prosecutors.

6. Military officers with the rank of colonel or higher, and civilian employees with the equivalent rank.
7. Presidents and vice-presidents of universities, presidents of graduate schools, deans (including deans of universities), deans of junior colleges and heads of various schools equivalent to colleges, and the superintendents of boards of education, directors of district educational offices and members of educational committee of the Special Metropolitan City, Metropolitan Cities and *Dos* among public officials in the educational service.
8. Police officers with the rank of police superintendent or higher, and public officials in fire-fighting service with the rank of national and local fire-fighting superintendents or higher.
- 8-2. Public officials in contractual service appointed to the positions to be appointed by public officials under subparagraphs 3 through 6 and 8, or to the positions equivalent thereto.
9. Heads, deputies and permanent auditors of government-invested institutions, governor, deputy governor and auditor of the Bank of Korea, governor, deputy governor and auditor of the Financial Supervisory Service, presidents and permanent auditors of National Agricultural Cooperatives Federation and National Federation of Fisheries Cooperatives.
10. Officers of such institutions and organizations of those falling under any of the following items as are prescribed by the Presidential Decree (hereinafter referred to as the public service-related organizations):
 - (a) government-invested institutions, the Bank of Korea, government-contributed or subsidized institutions and organizations, and other institutions and organizations conducting governmental tasks under the entrustment of the Government;
 - (b) local government-invested public corporations and local government public corporations established under the Local Public Corporations Act, local government-contributed or subsidized institutions and organizations, and other institutions and organizations carrying out local governmental tasks under the entrustment of local governments; and
 - (c) institutions and organizations, the appointment of whose officers is required to be approved, or the officers of which are appointed by the head of the central administrative agency or the head of the local government.
11. Other public officials and personnel of public service-related organizations working in specified fields as prescribed by the National Assembly Regulations, the Supreme Court Regulations and the Presidential Decree.

(2) Deleted <by Act No. 4566, 11 June 1993>

Article 4 (Property to be Registered)

(1) The property to be registered by a person liable for registration shall be the property of the person falling under any of the following subparagraphs (including the property in *de facto* possession, regardless of the name of its owner, property contributed to a nonprofit corporation, and

property located in a foreign country; hereinafter the same shall apply): <Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>

1. person liable for registration;
2. spouse (including any person having a *de facto* matrimonial relation; hereinafter the same shall apply); and
3. lineal ascendants and descendants of the person liable for registration: *Provided*, That married daughters, maternal grandparents and children of daughters are excluded, and if the person liable for registration has entered his name in her husband's or his wife's family register by marriage, the lineal ascendants and descendants of his spouse.

(2) The property to be registered by the person liable for registration shall be as follows: <Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>

1. The ownership, superficies and rights of lease on a deposit basis pertaining to real estate.
2. Mining rights, fishery rights and other rights to which the provisions concerning real estate shall apply *mutatis mutandis*.
3. Movables, securities, claims, obligations and intangible property rights falling under one of the following items:
 - (a) cash (including checks) not less than ten million won in total by the owner;
 - (b) deposits not less than ten million won in total by the owner;
 - (c) securities such as stocks, national and public bonds, debentures not less than ten million won in total by the owner;
 - (d) claims not less than ten million won in total by the owner;
 - (e) obligation not less than ten million won in total by the owner;
 - (f) gold and platinum (including gold and platinum products) not less than five million won in total by the owner;
 - (g) precious stones not less than five million won by item;
 - (h) curios and artistic works not less than five million won by item;
 - (i) memberships not less than five million won by membership;
 - (j) intangible property rights yielding returns not less than ten million won per annum by the owner; and
 - (k) automobiles, construction machines, vessels and aircraft.
4. Shares of investment in unlimited and limited partnerships and the limited liability corporations.

(3) The methods of calculation and indications of value by category of property to be registered under paragraph (1) shall be as follows: <Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994; Act No. 5108, 29 December 1995; Act No. 6388, 26 January 2001>

1. In case of land, the publicly assessed individual land price under the Public Notice of Values and Appraisal of Lands, etc. Act (if there exist no publicly assessed individual land prices of the pertinent land, it refers to the amount calculated on the basis of the publicly assessed land prices under Article 10 of said Act).

2. In case of an apartment house, such as an apartment or tenement house, the standard market price as prescribed by the Income Tax Act.
3. In case of houses other than apartment houses as referred to in subparagraph 2, commercial quarters, buildings, officetels and other real estate, the aggregate amount of the value of the building sites calculated by the publicly assessed individual land prices under the Public Notice of Values and Appraisal of Lands, etc. Act (if there exist no publicly assessed individual land prices of the pertinent land it refers to the amount calculated on the basis of the publicly assessed land prices under Article 10 of the said Act) and the value of buildings calculated by the highest price out of the official value notified publicly by the State or the local governments (in a case where there is any acquisition value, such value shall also be included).
4. In case of rights to which the provisions concerning real estate shall apply *mutatis mutandis*, particulars of kinds, quantities, contents of such rights (in a case where there is any acquisition value, such value shall be included).
5. In case of cash, deposits, claims and obligations, the amounts thereof.
6. In case of securities, such as national and public bonds or debentures, the face value thereof.
7. Stocks traded in the means similar to the securities markets from among those listed on the Korea Stock Exchange, those registered with the Korea Securities Dealers Association, and those traded over-the-counter under Article 194 of the Securities and Exchange Act, the final prices quoted on the base day of property registration (if the Stock Exchange is closed prior to the base day of property registration, the final prices on such closing day: *Provided*, That in the case of stocks traded in the means similar to the securities markets from among those traded over-the-counter under Article 194 of the Securities and Exchange Act, referring to the traded price prescribed by the Presidential Decree), and in the case of other stocks than these, the face value thereof.
8. In case of investment shares in unlimited partnerships, limited partnerships and limited liability corporations, the ratio of shares and the annual revenues of such entities in recent business years.
9. In case of gold and platinum (including gold and platinum products), the kind, contents and weight thereof.
10. In case of precious stones, the specifications of, *inter alia*, the kinds, size, color tone thereof.
11. In case of curios and artistic works, the specifications of works, such as kinds, sizes, authors, and production years.
12. In case of memberships, the acquisition value: *Provided*, That in case of golf memberships it shall be the standard market price as prescribed by the Income Tax Act.
13. In case of automobiles, construction machines, vessels and aircraft, the specifications of, *inter alia*, their kinds, manufacture year and manufacturers, and registration numbers.

(4) The methods of value calculation and indication of any property to be registered, other than that as referred to in paragraph (3), and other matters necessary for registration shall be prescribed by the Presidential Decree. <Newly Inserted by Act No. 4566, 11 June 1993>

(5) With respect to such property as referred to in paragraph (2), information such as the date and particulars of acquisition and the source of income of such property or any explanations included thereof may be mentioned or appended by the owner. <Newly Inserted by Act No. 4566, 11 June 1993>

(6) Out of the property to be registered under paragraph (1), property contributed to a nonprofit corporation shall be indicated separately from other property to be registered, and the position of the person liable for registration in the corporation statute shall be specified. <Newly Inserted by Act No. 4566, 11 June 1993>

Article 5 (Registration Agency and Time for Registration of Property)

(1) Any public official shall register the property as of the day on which he becomes liable for registration with any of the following agencies (hereinafter referred to as the registration agency) within one month from the date of his liability for registration: *Provided*, That this shall not apply to the case where the liability for registration is exempted within one month from the date of becoming a person liable for registration, if a person who is exempted from the liability for registration due to, *inter alia*, a transfer, demotion or retirement, again becomes liable for registration within three years (in case of retirement, one year), the registration may be substituted only by making a report on any change after the transfer, demotion or retirement, or a report on change in property as referred to in Article 11 (1): <Amended by Act No. 4017, 5 August 1988; Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994; Act No. 5454, 13 December 1997; Act No. 5681, 21 January 1999; Act No. 6388, 26 January 2001>

1. In case of a member of the National Assembly or other public officials under the control of the National Assembly, the National Assembly Secretariat.
2. In case of judges or other public officials under the control of courts, the Office of Court Administration.
3. In case of the president, justices or public officials under the control of the Constitutional Court, the Secretariat of the Constitutional Court.
4. In case of public officials under the control of the National Election Commission or other election commissions, the Secretariat of the National Election Commission.
5. In case of public officials under the control of the Ministries and Administrations of the Government (including the administrative agencies such as the committees prescribed by the Presidential Decree; hereinafter the same shall apply), the pertinent Ministries and Administrations.
6. In case of public officials under the control of the Board of Audit and Inspection, the Secretariat of the Board of Audit and Inspection.
7. In case of public officials under the control of the National Intelligence Service, the National Intelligence Service.
8. In case of public officials under the jurisdiction of local governments, the pertinent local government.

9. In case of councilmen or public officials under the control of local councils, the pertinent local council.
10. In case of public officials under the control of educational offices of the Special Metropolitan City, Metropolitan Cities and *Dos*, educational offices of the Special Metropolitan City, Metropolitan Cities and *Dos*, as applicable.
11. In case of members of educational committees of the Special Metropolitan City, Metropolitan Cities and *Dos*, and public officials belonging to them, the educational committees, as applicable.
12. In case of officers or employees of public service-related organizations, the Ministry, and Administration exercising supervision over such organizations: *Provided*, That in case of officers or employees of public service-related organizations under the supervision of the Special Metropolitan City, Metropolitan Cities, *Dos*, and *Si/Gun/Gu* (limited to the autonomous *Gu*; hereinafter the same shall apply), the Special Metropolitan City, Metropolitan Cities, *Dos* and *Si/Gun/Gu* as applicable.
13. In case of persons liable for registration, other than those referred to in subparagraphs 1 through 12, and public officials under the supervision of the Ministries, and Administrations of the Government, the Board of Audit and Inspection, the National Intelligence Service, and officers of public service-related organizations for whom matters concerning property registration are open to the public under Article 10 (1), notwithstanding the provisions of subparagraphs 5 through 7 and the text of subparagraph 12, the Ministry of Government Administration.

(2) In the case as referred to in the provisions of paragraph (1), if the then-pertinent registrar is different from the previous one, the head of the previous registrar shall transfer documents pertaining to the property registration to the head of the new registrar within one month after a person who is exempted from liability for registration due to, *inter alia*, a transfer, again becomes liable for registration. This provision shall also apply in a case where the registration agency is changed without the person liable for registration being exempted from liability for registration due to, *inter alia*, such transfer.

(3) In case of a registration agency out of those as referred to in paragraph (1) 5, which has any difficulty in effecting the registration because there are so many persons liable for registration of property, part of its subordinate organizations may be designated as registration agency under the provisions of the Presidential Decree. <Newly Inserted by Act No. 4853, 31 December 1994>

Article 6 (Report on Changed Matters)

(1) Any person liable for registration shall report to the registration agency matters concerning any change in property which has taken place between January 1 and December 31 in each year by the end of January of the next year: *Provided*, That in a report on changed matters, made first after the first registration or the report as prescribed in the provisions of Article 5 (1), matters changed up until December 31 of the current year from the day on which he becomes liable for registration shall be reported to the registration agency. <Amended by Act No. 4566, 11 June 1993>

(2) If a person liable for registration retires from his office, he shall make a report to the registration agency having jurisdiction over him at the time of his retirement regarding any changed matters in his property between January 1 of the current year (if he becomes liable for registration after 1 January, the day on which he becomes liable for registration) and the retirement day, within one month after his retirement: *Provided*, That if he again becomes liable for registration within one month after his retirement, the report on changed matters as referred to in paragraph (1) shall

supersede the above report. *<Newly Inserted by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>*

(3) If a person becomes liable for registration during December, changed matters in his property between the day on which he becomes liable for registration and December 31 of the current year may be reported, including the changed matters of the following year, or the changed matters relating to the retired person as referred to in paragraph (2), and if the person liable for registration retires from his office during January, the changed matters, as referred to in paragraph (1), may be reported, including the changed matters relating to the retired person as referred to in paragraph (2). *<Newly Inserted by Act No. 4853, 31 December 1994>*

(4) The provisions of paragraph (2) shall apply *mutatis mutandis* to such person out of those who are liable for registration as provided in Article 3 (1) 9 through 11 and is exempted from the liability for registration because the agency or organization to which he belongs is excluded from the public services-related organizations. *<Newly Inserted by Act No. 4853, 31 December 1994>*

(5) In a case where a report as referred to in paragraphs (1) and (2) is made, any materials to explain and justify clearly the cause of increase or decrease, such as a sales contract or receipts (including copies thereof), shall be attached, or the reason for such increase or decrease shall be specified. *<Amended by Act No. 4566, 11 June 1993>*

(6) The scope and contents of changed matters in property to be reported under paragraphs (1) and (2) shall be prescribed by the Presidential Decree. *<Amended by Act No. 4566, 11 June 1993>*

Article 6-2 (Report on Detail of Stock Trade)

(1) Persons liable for registration corresponding to those subject to the opening to the public under each subparagraph of Article 10 (1) shall report to the registrar on the details of stock trades pertaining to acquisition or transfer of stocks by those falling under any of the subparagraphs of Article 4 (1), at the time of reporting on the changes in property under Article 6 or 11 (1).

(2) Matters necessary for the scope of stock trade subject to report and the method of report at the time of reporting on the details of stock trade under paragraph (1), shall be prescribed by the Presidential Decree.

(3) The content of report on the details of stock trade under paragraph (1) shall not be open to the public.

(4) The provisions of Articles 8, 8-2, 12 through 14 and 14-3 shall be applicable to the report under paragraph (1) and the examination and management of reported matters.
[This Article Wholly Amended by Act No. 6388, 26 January 2001]

Article 6-3 (Deferment of Report on Modified Matters)

(1) The head of the registrar may, in case where the persons liable for registration apply for the deferment of report on modified matters as they come to fall under one of the following subparagraphs, defer the report on modified matters under Article 6 (1) or 11 (1) for the relevant period within the limit of 3 years:

1. where to be sent to a foreign country for dispatched services under the provisions of Acts and subordinate statutes;
2. where to be suspended from duty under the provisions of Acts and subordinate statutes;

3. where to serve at the overseas mission or the office stationed overseas; and
4. where to fall under other reasons prescribed under the Presidential Decree.

(2) Persons liable for registration who are granted a deferment of report on modified matters under paragraph (1) shall make a report on modified matters on property after the final property registration or the report on modified matters within one month from the extinction of relevant causes for deferment.

[This Article Wholly Amended by Act No. 6388, 26 January 2001]

Article 7 (Extension of Registration Period)

In case where a person liable for registration (including retired public officials as prescribed in Article 6(2); hereinafter the same shall apply to Articles 8, 10, 12, 13 and 24) requests an extension of the period for the property registration (including the report; hereinafter the same shall also apply) for any unavoidable reason, if the reason is deemed appropriate, the head of the registrar extend the registration period for all or part of the property. In this case, the person liable for registration shall make the registration within the extended period. *<Amended by Act No. 4566, 11 June 1993>*

Article 8 (Examination of Registered Matters)

(1) The public service ethics committee as provided in Article 9 (1) shall examine registered matters.

(2) If a person liable for registration is deemed to have omitted by negligence, *inter alia*, a part of the property to be registered, or there are errors in writing in the sum of the values, the public service ethics committee may order the person liable for registration to supplement the property registration papers within a specified period of time.

(3) If it is deemed necessary for the examination, as referred to in paragraph (1), the public service ethics committee may demand any person liable for registration to present materials, ask any question in writing, or conduct any investigation for confirmation of facts. In this case, the public service ethics committee shall give the person liable for registration an opportunity to present materials for explanation or vindication.

(4) The public service ethics committee may demand the head of government agencies, local governments, public service-related organizations, or other public institutions to make any report or present materials, necessary for the examination as referred to in paragraph (1). In this case, the head of such agency, institution or organization may not refuse such report or presentation of materials notwithstanding the provisions of other Acts. *<Amended by Act No. 4853, 31 December 1994>*

(5) Notwithstanding the provisions of Article 4 of the Act on Real Name Financial Transactions and Guarantee of Secrecy, if it is deemed necessary to confirm the details of any financial transaction for the examination as referred to in paragraph (1), the public service ethics committee may demand that the head of any financial institution present materials on the details of financial transactions. Such demand shall be made by a document specifying the personal matters in compliance with such criteria as prescribed by the National Assembly Regulations, the Supreme Court Regulations, the Constitutional Court Regulations, the National Election Commission Regulations, or the Presidential Decree, and any person who is engaged in the financial institution concerned shall not refuse such demand. *<Newly Inserted by Act No. 4853, 31 December 1994; Act No. 5493, 31 December 1997>*

(6) The public service ethics committee may demand attendance of any person liable for registration and his spouse, lineal ascendants and descendants, and other interested parties in matters of property registration, and may ask them to make statements.

(7) With respect to any person liable for registration under a considerable suspicion of false registration or of an acquisition of property or profits from assets by utilizing the secrets obtained on duty as a result of the examination under paragraph (1), the public service ethics committee shall, by appending the relevant verifying documents, request that the Minister of Justice (in case of military or military civilian employees, the Minister of National Defense) conduct an investigation with fixing the period. <Amended by Act No. 6388, 26 January 2001>

(8) The Minister of Justice or Minister of National Defense, as applicable, shall, upon receiving the request for investigation under paragraph (7), cause any public prosecutor or prosecuting attorney to conduct an investigation without delay, and notify the public service ethics committee of the result of such investigation. <Amended by Act No. 4853, 31 December 1994>

(9) Such provisions of Acts and subordinate statutes relating to criminal lawsuits (including the Military Court Act) as pertaining to criminal investigations shall apply *mutatis mutandis* to the investigation conducted by a public prosecutor or prosecuting attorney under paragraph (8): *Provided*, That this shall not apply to the provisions concerning the restraint of personal liberty. <Amended by Act No. 4853, 31 December 1994>

(10) The public service ethics committee shall complete the examination of all public officials who are subject to the disclosure of property within three months after the registered matters as provided in Article 5(1) or after the changed matters reported under Article 6 are made open to the public under Article 10(1): *Provided*, That the public service ethics committee may, in case where deemed necessary, extend the period of examination under its resolution within the limit of 3 months. <Amended by Act No. 6388, 26 January 2001>

(11) The public service ethics committee may entrust the head of the registrar or other related agency with the examination of registered matters of persons liable for registration other than those subject to the disclosure of property, and the head of the entrusted agency shall report the results of examination to the competent public service ethics committee.

(12) The provisions of paragraphs (2) through (9) shall apply *mutatis mutandis* in the case of entrustment as referred to in paragraph (11). In such case, if any person wishes to request presentation of materials concerning the details of financial transactions as referred to in paragraph (5), or to entrust any examination as referred to in paragraph (7), he shall obtain the approval from the competent public service ethics committee. <Amended by Act No. 4853, 31 December 1994>
[This Article Wholly Amended by Act No. 4566, 11 June 1993]

Article 8-2 (Transaction of Results of Examination)

(1) If it is deemed, as a result of the examination of registered matters under Article 8, that any property to be registered is recorded falsely, or omitted or erroneously reported through gross negligence, or that any property or profits from assets are acquired by utilizing the secrets obtained on duty, the public service ethics committee as provided in Article 9 (1) shall take measures which fall under one of the following subparagraphs: <Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January 2001>

1. warning and corrective measures;
2. imposition of a fine for negligence under Article 30;

3. publication of falsely registered matters in advertisement column of daily newspapers; and
4. request for decision on dismissal or discipline (including removal from office).

(2) The public service ethics committee may take measures as referred to in subparagraph 3 among those as referred to in paragraph (1) together with other measures.

(3) The public service ethics committee shall, upon taking measures as referred to in paragraph (1), notify the heads of the registrar and other related organizations thereof. *<Newly Inserted by Act No. 4853, 31 December 1994>*
[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 9 (Public Service Ethics Committee)

(1) In order to examine and decide the matters falling under one of the following subparagraphs, the public service ethics committees shall be established in the National Assembly, the Supreme Court, the Constitutional Court, the National Election Commission, the Government, local governments, and educational offices of the Special Metropolitan City, Metropolitan Cities and *Dos*, respectively: *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994; Act No. 5454, 13 December 1997>*

1. examination of registered matters concerning property, and measures taken from the results thereof;
2. approval as provided in the latter part of Article 8 (12);
3. approval as provided in the provisions of Article 17 (1) (proviso); and
4. other matters as provided by the power of the public service ethics committee under this Act or other Acts and subordinate statutes.

(2) Each public service ethics committee shall exercise jurisdiction over the matters which fall under one of the following subparagraphs: *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994; Act No. 5454, 13 December 1997>*

1. the public service ethics committee in the National Assembly shall preside over matters concerning the members of the National Assembly, other public officials under the control of the National Assembly, and retired public officials of the National Assembly;
2. the public service ethics committee in the Supreme Court shall preside over matters concerning judges, other public officials under the control of the courts, and retired public officials of the courts;
3. the public service ethics committee in the Constitutional Court shall preside over matters concerning justices of the Constitutional Court, other public officials under the control of the Constitutional Court, and retired public officials of the Constitutional Court;
4. the public service ethics committee in the National Election Commission shall preside over matters concerning public officials under the control of the National Election Commission and other election commissions, and retired public officials of election commissions;

5. the public service ethics committees in the Special Metropolitan City, Metropolitan Cities and *Dos* shall preside over matters concerning public officials under the control of the Special Metropolitan City, Metropolitan Cities and *Dos*, respectively, officers and employees of the competent public service-related organizations, members of the Special Metropolitan City Council, Metropolitan City councils and *Do* councils and public officials under their control, and retired public officials thereof respectively;
6. the public service ethics committees in the *Si/Gun/Gu* shall preside over matters concerning public officials under the control of the *Si/ Gun/Gu*, respectively, officers and employees of the competent public service related organizations, members of the *Si/Gun/Gu* councils and public officials under their control, and retired public officials thereof respectively;
7. the public service ethics committees in the Special Metropolitan City, Metropolitan Cities and *Dos* educational offices shall preside over matters concerning public officials under the control of the Special Metropolitan City, Metropolitan Cities and *Dos* educational offices, respectively, members of educational committees and public officials under the control of educational committees, and retired public officials thereof respectively; and
8. the public service ethics committee in the Government shall preside over matters concerning public officials other than those as referred to in subparagraphs 1 through 7, and retired public officials thereof.

(3) The public service ethics committee shall be composed of nine members including a chairman and a vice-chairman, and five of them, including the chairman, shall be appointed from among judges, educators, other persons of learning and high moral character, or persons recommended by the citizens' organization (referring to the nonprofit non-governmental organization under Article 2 of the Assistance for Nonprofit Non-Governmental Organizations Act; hereinafter the same shall apply): *Provided*, That the *Si/Gun/Gu* public service ethics committees shall each be composed of five members including a chairman and a vice-chairman, and three of them, including the chairman, shall be appointed from among judges, educators, other learned and reputable persons, or persons recommended by the citizens' organization. <Amended by Act No. 4566, 11 June 1993; Act No. 6388, 26 January 2001>

(4) The term and appointment of members of the public service ethics committees, the procedures of examination and other necessary matters shall be determined by the provisions which fall under one of the following subparagraphs: <Newly Inserted by Act No. 4566, 11 June 1993; Act No. 5454, 13 December 1997>

1. in case of the public service ethics committee in the National Assembly, the National Assembly Regulations;
2. in case of the public service ethics committee in the Supreme Court, the Supreme Court Regulations;
3. in case of the public service ethics committee in the Constitutional Court, the Constitutional Court Regulations;
4. in case of the public service ethics committee in the National Election Commission, the National Election Commission Regulations;

5. in case of the public service ethics committee in the Government, the Presidential Decree; and
6. in case of the public service ethics committees in Special Metropolitan City, Metropolitan Cities and *Dos* and the public service ethics committees in the *Si/Gun/Gu* and the public service ethics committees in the educational offices of Special Metropolitan City, Metropolitan Cities and *Dos*, the Municipal Ordinances of the relevant local governments.

(5) The public service ethics committees may make rules relating to the operation thereof within the scope of the Regulations, the Presidential Decree and the Municipal Ordinance prescribed by this Act and respective subparagraphs of paragraph (4). *<Newly Inserted by Act No. 4566, 11 June 1993>*

Article 10 (Opening of Registered Property to Public)

(1) The public service ethics committee shall open to the public the registered matters concerning the property of such public officials out of those liable for registration under its jurisdiction falling under any of the following subparagraphs, as well as the property of such officials spouses and lineal ascendants and descendants, as well as the contents of the report on the changed matters as provided in Article 6, by inserting them in the Gazette or public bulletins, within one month after the period of registration or report expires: *<Amended by Act No. 4566, 11 June 1993; Act No. 5454, 13 December 1997; Act No. 5491, 31 December 1997; Act No. 5681, 21 January 1999; Act No. 6306, 29 December 2000; Act No. 6388, 26 January 2001>*

1. national public officials in political service, such as the President, the Prime Minister, members of the State Council, members of the National Assembly, Director General and Directors of the National Intelligence Service;
2. public officials in Political Service of local governments, such as the heads of local governments, and local councilmen;
3. national and local public officials of Grade I in general service, and public officials in special service, who receive remuneration equivalent to that of the former;
4. public officials in foreign service prescribed by the Presidential Decree, and chief of the Planning and Coordination Office of the National Intelligence Service;
5. judges higher than the chief judge of the High Court, public prosecutors higher than chief of the public prosecutor's office, and public prosecutors who are the heads of public prosecutor's branch offices to which deputy chief public prosecutors are assigned;
6. officers higher than the lieutenant general;
7. presidents and deputy presidents of universities, deans of colleges (excluding deans of universities), deans of junior colleges and heads of various schools equivalent to universities and colleges, superintendents of educational boards and members of educational committees of the Special Metropolitan City, Metropolitan Cities and *Dos*;
8. police officials higher than senior superintendent general, and directors of local police administration in the Special Metropolitan City, Metropolitan Cities and *Dos*;

9. directors of the District Tax Office, and superintendents of customhouses who are public officials of Grade II or III;
- 9-2. public officials in contractual service appointed to positions the positions to be appointed by public officials under subparagraphs 3 through 6, 8 and 9 or to the positions equivalent thereto: *Provided*, That with respect to positions designated from among subparagraphs 4, 5, 8 and 9, limited to the public officials in contractual service appointed to the relevant positions;
10. directors, deputy directors and permanent auditors of government-invested institutions, the governor, deputy governor and auditor of the Bank of Korea, governor, deputy governor and auditor of the Financial Supervisory Service, presidents and permanent auditors of the National Agricultural Cooperatives Federation and National Fisheries Cooperatives Federation and officers of public service-related organizations as prescribed by the Presidential Decree;
11. other public officials of the Government, who are prescribed by the Presidential Decree; and
12. persons who are retired from the offices as referred to in subparagraphs 1 through 11 (limited only to the case as provided in Article 6 (2)).

(2) If a person liable for registration becomes, after the registration, one who is subject to the opening of his property to the public under paragraph (1), due to, *inter alia*, a promotion or transfer, he shall re-register the property as of the day on which he becomes one who is subject to the opening of property to the public with the registrar under the text of Article 5 (1), within one month after he becomes such person, and the public service ethics committee shall open it to the public under paragraph (1): *Provided*, That if the person concerned was transferred to a position which is not subject to the opening of property to the public, and thereafter becomes a person who is subject to the opening of property to the public within three years, he shall open to the public only the matters changed after the last opening is made. <Newly Inserted by Act No. 4853, 31 December 1994>

(3) No person shall inspect or reproduce registered matters concerning the property of any person liable for registration, or have another person do so, without obtaining permission of the head of the public service ethics committee or registration agency, except in cases falling under paragraphs (1) and (2). <Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>

(4) The head of the public service ethics committee or registration agency may not grant any permission as referred to in paragraph (3), except cases falling under one of the following subparagraphs: <Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>

1. where it is required for investigation of crime or misconduct against a person liable for registration, or for a trial relevant to it;
2. where a member of the National Assembly demands materials of the inspection and investigation of the state administration under Article 128 (1) of the National Assembly Act, Article 10 (1) of the Act on Inspection and Investigation of State Administration, and Article 4 of the Act on Testimony, Appraisal, etc. before the National Assembly, or it is required for investigation as to whether any activity of a specified public official is connected to a concrete misconduct. In this case, the head of the public service ethics committee or the registration agency is not permitted to disclose externally the details of registered matters concerning the property;

3. where it is required to judge for the head of any government agency, local government or public service-related organization, if a public official under his control is connected to any misconduct; and
4. where a person who is or was liable for registration requests an inspection or reproduction of registered matters concerning himself.

Article 10-2 (Opening of Property of Candidates for Election of Public Officials to Public)

(1) When a person who wishes to be a candidate for the President, a member of the National Assembly, a head of the local government or the local council makes a registration for such candidacy, he shall submit a report, as provided in Article 4, regarding the property to be registered as of the 31st of December of the preceding year, to the competent election commission, and the commission shall make public the reported matters concerning the property of the candidate at the time the registration of candidate is announced publicly: *Provided*, That if the person who wishes to be a candidate opens the property to be registered on and after the 31st of December of the preceding year under Article 10 (1) prior to the registration of candidates for such election, this provision shall not apply, but the candidate shall submit to the competent election commission exercising the jurisdiction over the constituency concerned the documents to confirm the opening of such property as provided in Article 49 (4) of the Act on the Election of Public Officials and the Prevention of Election Malpractices. *<Amended by Act No. 4739, 16 March 1994; Act No. 4853, 13 December 1994>*

(2) When a proposal of approval on appointment of a public official whose appointment is required to be approved by the National Assembly, such as the Chief Justice of the Supreme Court, President of the Constitutional Court, Prime Minister, Chairman of the Board of Audit and Inspection, justices of the Supreme Court, secretary-general of the National Assembly Secretariat, or a proposal of election of public officials who are elected by the National Assembly, such as judges of the Constitutional Court or members of the National Election Commission, is submitted, a report on the property to be registered under Article 4 concerning the candidate for public office shall be submitted to the National Assembly, and the Speaker of the National Assembly shall open without delay to the public the reported matters concerning the property of the candidate for public office: *Provided*, That if the candidate for public office opens, under Article 10 (1) the property to be registered on and after December 31 of the preceding year to the public prior to the time the proposal of the approval on appointment or of the election is filed, this provision shall not apply, but the documents to confirm the opening of such property to the public shall be submitted to the National Assembly. *<Amended by Act No. 4853, 31 December 1994; Act No. 5454, 13 December 1997>*

(3) The public service ethics committees in the National Election Commission and the National Assembly shall examine the reported matters concerning the property as referred to in paragraph (1) or (2), and may open the results of the examination to the public.

(4) The provisions of Article 8 (2) through (6) shall apply *mutatis mutandis* to the examination as referred to in paragraph (3). *<Amended by Act No. 4853, 31 December 1994>*

(5) The forms of the report as referred to in paragraphs (1) and (2), the methods of opening to the public, and other necessary matters shall be prescribed by the National Assembly Regulations or the National Election Commission Regulations.

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 11 (Report on Property of Transferred Person)

(1) If a person liable for registration is exempted from the liability for registration due to, *inter alia*, a transfer, retaining the status as a public official or an officer or an employee of a public service-related organization (including the case where he becomes a public official or an officer or an employee of a public service-related organization within one month after retirement), he shall report to the previous registration agency the changed matters concerning the property until the day on which, e. g., the transfer is made after the 1st of January of the year in which he is transferred (if he becomes a person liable for registration after the 1st of January, the day on which he becomes liable therefor) within one month after his transfer, and thereafter make a report each year for two years on the changed matters in the property during the preceding year in the month the cause of such transfer has occurred: *Provided*, That if he retires from his office during the period in which he is liable for reporting on the changed matters in the property, the provisions of Article 6 (2) shall apply *mutatis mutandis*. <Amended by Act No. 4853, 31 December 1994>

(2) With respect to the report as referred to in paragraph (1) and the control of such reported matters, the provisions of Articles 6 through 8, 8-2, 10, 12 through 14 and 14-3 shall apply *mutatis mutandis*. <Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January 2001>

Article 12 (Liability for Truthful Registration)

(1) No person liable for registration shall make a false entry of the property to be registered under Article 4 in the property registration papers, or of the value, acquisition date and details of acquisition of the property, and the sources of his income. <Amended by Act No. 4566, 11 June 1993>

(2) Any person liable for registration shall faithfully comply with any examination of the public service ethics committee, etc. on the registered matters. <Amended by Act No. 4566, 11 June 1993>

(3) Any person as provided in Article 4 (2) 2 or 3 shall comply faithfully with the registration of property by a person liable for registration or the examination on the reported matters by the public service ethics committee. <Amended by Act No. 4566, 11 June 1993>

(4) Notwithstanding the provisions of paragraph (3), such a person out of those referred to in Article 4(1) 3, as is not a dependent of a person liable for registration may refuse to report on the matters concerning the registration of his property, and in this case, the person liable for registration shall designate so on the property registration papers. <Amended by Act No. 4566, 11 June 1993>

Article 13 (Prohibition of Use of Registered Matters Concerning Property for Different Purposes and Related Matters)

Any person liable for registration shall not be subject to any disadvantageous treatment or disposition for reasons of registered matters except in case of false registration or other causes as prescribed by this Act, and no person shall use the registered matters concerning the property for any purpose other than those as prescribed by this Act. <Amended by Act No. 4566, 11 June 1993>

Article 14 (Keeping of Secrets)

No person who is or was engaged in affairs of property registration, or no other person who has learned of such matters in the course of performing his duties shall disclose them to other persons.

Article 14-2 (Prohibition of Property Acquisition by Taking Advantage of Secrets in Respect of One Duties)

No person liable for registration shall acquire any property or property interest taking advantage of secrets which he has learned in the course of performing his duties.

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 14-3 (Prohibition of Furnishing and Disclosure of Materials on Financial Transactions)

No person who has materials concerning the details of financial transactions furnished under Article 8 (5) shall furnish or disclose them to another person, or use them for any purpose other than proper ones.

[This Article Newly Inserted by Act No. 4853, 31 December 1994]

CHAPTER III - REPORT ON GIFTS

Article 15 (Report on Receipt of Gifts from Foreign Governments, etc.)

(1) If a public official (including members of local councils and educational committees; hereinafter the same shall apply in Articles 22 and 23 (1)) or an officer or an employee of any public service-related organization has received any gift from a foreign country or a foreigner in connection with his duties (including foreign organizations; hereinafter the same shall apply), he shall report it without delay to the head of the agency or organization to which he belongs, and hand over such gift thereto. This provision shall also apply in case where his family receives any gift from a foreign country or a foreigner in connection with the duties of such officials, or officers or employees of public service-related organizations. *<Amended by Act No. 4566, 11 June 1993; Act No. 4853, 31 December 1994>*

(2) The value of the gift to be reported under paragraph (1) shall be prescribed by the Presidential Decree.

Article 16 (Reversion, etc. of Gift to National Treasury)

(1) Any gift reported under Article 15 (1) shall be reverted to the National Treasury immediately after it is reported.

(2) Matters concerning, *inter alia*, the management or maintenance of reported gifts shall be prescribed by the Presidential Decree.

CHAPTER IV – RESTRICTION ON EMPLOYMENT OF RETIRED PUBLIC OFFICIALS

Article 17 (Restriction on Employment of Retired Public Officials in Related Private Enterprises, etc.)

(1) No public official or officer or employee of a public service-related organization who was engaged in a grade of position or field of duties as prescribed by the Presidential Decree may be employed in a profit-making private enterprise larger than a specified size (hereinafter referred to as the profit-making private enterprise) connected closely with the duties which he performed at the competent department within three years immediately before his retirement, for a period of two years immediately after his retirement, or the organization established for the joint profits and mutual cooperation, etc. of private enterprises (hereinafter referred to as the association): *Provided*, That this shall not apply if such employment is approved by the competent public service ethics committee. *<Amended by Act No. 6388, 26 January 2001>*

(2) In the case as referred to in paragraph (1), the scope of close connection between the duties at the competent department performed by the retired public official and the profit-making private enterprise, and the size of such private enterprise and the scope of related associations shall be prescribed by the National Assembly Regulations, the Supreme Court Regulations, the Constitutional Court Regulations, the Central Election Management Commission Regulations or the Presidential Decree. *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993; Act No. 6388, 26 January 2001>*

(3) In determining and applying the scope of duties at the competent department in the case of paragraph (2), the due consideration shall be paid so as not to unlawfully infringe on the freedom and rights of the retired public officials. *<Newly Inserted by Act No. 6388, 26 January 2001>*

Article 18 (Request for Approval of Employment)

Any retired public official who wishes to obtain approval of employment under the proviso of Article 17 (1) shall make a request for approval of employment to the competent public service ethics committee through the head of the agency to which he belonged, under the provisions of the National Assembly Regulations, the Supreme Court Regulations, the Constitutional Court Regulations, the Central Election Management Commission Regulations or the Presidential Decree. *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993>*

Article 19 (Demand, etc. for Dismissal of Employee)

(1) If a person who has held an office in a government agency, the local government or a public service-related organization (in case of the chairman of the public service ethics committee, whose employment is restricted under Article 17 (1)) is employed in violation of the provisions of Article 17 (1), the chairman of the public service ethics committee and the head of the government agency, the local government or public service-related organization shall request the head of the pertinent central administrative agency (in case of the National Assembly, the Secretary-General of the National Assembly; in case of the Supreme Court, the director of the Office of Court Administration; in case of the Constitutional Court, the Secretary-General of the Secretariat of the Constitutional Court; and in case of the Central Election Management Commission, the Secretary-General of the Central Election Management Commission; hereinafter the same shall apply) to take measures for the dismissal of the person concerned from the employment, and the head of the relevant central administrative agency shall, upon receiving such request, demand a dismissal of such employee to the head of the profit-making private enterprise or the association in which the person in question is employed. *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993; Act No. 6388, 26 January 2001>*

(2) The head of the profit-making private enterprise or the association who receives a request for the dismissal under paragraph (1) shall comply with such request without delay. *<Amended by Act No. 6388, 26 January 2001>*

CHAPTER V - SUPPLEMENTARY PROVISIONS

Article 20 (Agency in Charge of Planning and General Affairs)

The Minister of Government Administration and Home Affairs shall preside over the planning and general affairs concerning the registration of property and opening thereof to the public, the report of gifts and the restriction on employment of retired public officials under this Act. *<Amended by Act No. 4566, 11 June 1993; Act No. 6388, 26 January 2001>*

Article 20-2 (Report to National Assembly)

(1) The public service ethics committees in the National Assembly, the Supreme Court, the Constitutional Court, the Central Election Management Commission and the Government shall submit each year to the plenary session of the National Assembly an annual report on the actual conditions of, and control over, the registration of property, report of gifts and restriction on employment of retired public officials and other activities in the preceding year.

(2) Matters necessary for preparing the annual report as referred to in paragraph (1) shall be prescribed by the Presidential Decree.

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 21 (Delegated Provisions)

Matters necessary for the enforcement of this Act shall be prescribed by the National Assembly Regulations, the Supreme Court Regulations, the Constitutional Court Regulations, the Central Election Management Commission Regulations, the Presidential Decree or the Municipal Ordinance of the local government. *<Amended by Act No. 4408, 30 November 1991; Act No. 4566, 11 June 1993>*

CHAPTER VI – DISCIPLINARY ACTION AND PENAL PROVISIONS

Article 22 (Disciplinary Action, etc.)

If a public official or an officer or an employee of a public service-related organization falls under any of the following subparagraphs, the public service ethics committee concerned may demand a resolution on dismissal or discipline for such reason: *<Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January, 2001>*

1. where he fails to register his property in violation of the provisions of Article 5 (1);
2. where he fails to make a report on the changed matters or the report on the details of stock trade, or to attach explanatory materials, in violation of the provisions of Article 6 (1) (including the provisions of Article 6 (3) concerning the report on the changed matters in case where he becomes liable for registration in December) and Articles 6 (5), 6-2 and 11 (1);
3. where he inspects or reproduces registered matters or has another person do so, without permission, in violation of the provisions of Article 10 (3) (including the case where it is applied *mutatis mutandis* under Article 11(2));
4. where he has in bad faith registered his property, such as making a false registration, etc., in violation of the provisions of Article 12 (1) (including the cases of application *mutatis mutandis* in Articles 6-2 (4) and 11 (2));
5. where he fails to comply with an examination of, *inter alia*, the public service ethics committee, etc. on the registered matters, in violation of the provisions of Article 12 (2) (including the cases of application *mutatis mutandis* in Articles 6-2 (4) and 11 (2));
6. where he uses matters regarding the property registration for any purpose other than that as prescribed by this Act, in violation of the provisions of the latter part of Article 13 (including the case where it is applied *mutatis mutandis* under Articles 6-2 (4) and 11(2));

7. where he discloses matters regarding the property registration to another person in violation of the provisions of Article 14 (including the case where it shall apply *mutatis mutandis* under Articles 6-2 (4) and 11 (2)); and
8. where he fails to report or hand over any gift received from a foreign country or a foreigner in violation of the provisions of Article 15.

[This Article Wholly Amended by Act No. 4566, 11 June 1993]

Article 23 Deleted. <by Act No. 6494, 24 July 2001>

Article 24 (Crime of Refusal of Property Registration)

(1) Any person liable for registration who refuses to register the property without any justifiable reason shall be punished by imprisonment for not more than one year or by a fine not exceeding ten million won.

(2) Any candidate for an election public office as provided in Article 10-2 (1) and (2), who fails to submit a report on any property to be registered without any justifiable reason shall be punished by imprisonment for not more than six months or by a fine not exceeding five million won.

[This Article Wholly Amended by Act No. 4566, 11 June 1993]

Article 25 (Crime of Submission, etc. of False Materials)

If the head of each agency or organization which is required to submit a report or materials as provided in Article 8 (4) and (5) (including the cases of applications *mutatis mutandis* in Articles 6-2 (4) and 11 (2)) by the public service ethics committee (including the head of a registration agency who is delegated the authority on matters regarding the property registration by the public service ethics committee under Article 8 (11); hereinafter the same shall apply in Article 26) submits a false report or materials, or refuses to submit the report or materials, without any justifiable reason, he shall be punished by imprisonment for not more than one year or a fine not exceeding ten million won.

<Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January 2001>

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 26 (Crime of Refusal of Attendance)

Any person who has received the demand from the public service ethics committee under Article 8 (6) (including the cases of applications *mutatis mutandis* in Articles 6-2 (4) and 11 (2)) to appear before the committee, but fails to comply with such demand without any justifiable reason shall be punished by imprisonment for not more than six months or by a fine not exceeding five million won. <Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January 2001>

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 27 (Crime of Inspection and Reproduction without Permission)

Any person who inspects or reproduces matters regarding the property registration or makes another person do it, without permission, in violation of the provisions of Article 10 (3) (including the cases of applications *mutatis mutandis* in Article 11 (2)), shall be punished by imprisonment for not more than one year or by a fine not exceeding ten million won. <Amended by Act No. 4853, 31 December 1994; Act No. 6388, 26 January 2001>

[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 28 (Crime of Disclosure of Secret)

(1) If a person who is or was engaged in the property registration affairs, or other person who has learned of matters regarding any property registration in the course of performing his duties, discloses the matters regarding property registration other than those which are made open to the public, without any justifiable reason in violation of the provisions of Article 14 (including the cases of applications *mutatis mutandis* in Articles 6-2 (4) and 11 (2)), he shall be punished by imprisonment for not more than one year or by a fine not exceeding ten million won. <Amended by Act No. 6388, 26 January 2001>

(2) If a person who has materials concerning the details of financial transactions, furnishes or discloses such materials or details to another person, or uses them for a purpose in violation of the provisions of Article 14-3 (including the cases of applications *mutatis mutandis* in Articles 6-2 (4) and 11 (2)), he shall be punished by imprisonment for not more than three years, or by a fine not exceeding twenty million won. <Newly Inserted by Act No. 4853, 13 December 1994; Act No. 6388, 26 January 2001>

(3) The imprisonment and the fine as referred to in paragraph (2) may be imposed concurrently. <Newly Inserted by Act No. 4853, 31 December 1994>
[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 29 (Crime of Violation against Restriction on Employment)

Any retired public official who is employed in a profit-making private enterprise or the association in violation of the provisions of Article 17 (1) shall be punished by imprisonment for not more than one year or by a fine not exceeding ten million won. <Amended by Act No. 6388, 26 January 2001>
[This Article Newly Inserted by Act No. 4566, 11 June 1993]

Article 30 (Fine for Negligence)

(1) Any person who is determined by the public service ethics committee as a person on whom the fine for negligence is to be imposed, under of Article 8-2 (1) 2 (including the cases of applications *mutatis mutandis* in Articles 6-2 (4) and 11 (2)), shall be punished by a fine not exceeding twenty million won. <Amended by Act No. 6388, 26 January 2001>

(2) The public service ethics committee shall notify the court of the offense of the person who is subject to a fine for negligence under paragraph (1) for a trial on the fine for negligence under the Non-Contentious Case Litigation Procedure Act.
[This Article Newly Inserted by Act No. 4566, 11 June 1993]

ADDENDUM

This Act shall enter into force on 1 January 1983.

ADDENDA <Act No. 3993, 4 December 1987>

Article 1 (Enforcement Date)

This Act shall enter into force on 25 February 1988.

Articles 2 through 4 Omitted.

ADDENDA <Act No. 4017, 5 August 1988>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 September 1988. (Proviso Omitted.)

Articles 2 through 8 Omitted.

ADDENDA <Act No. 4408, 30 November 1991>

Article 1 (Enforcement Date)

This Act shall enter into force on the date of its promulgation.

Articles 2 and 3 Omitted.

ADDENDA <Act No. 4566, 11 June 1993>

Article 1 (Enforcement Date)

This Act shall enter into force one month after its promulgation: *Provided*, That the provisions regarding the property registration and opening of registered matters to the public with respect to the heads of local government, local councilmen, members of educational committees, public officials under the control of local government and officers and employees of competent public service-related organizations under the control of local government shall enter into force two months after its promulgation.

Article 2 (Transitional Measures)

(1) Any person liable for registration at the time when this Act enters into force shall register his property existing on the enforcement date of this Act with the registration agency within one month after the enforcement date of this Act.

(2) With respect to public officials whose property is to be made open to the public at the time when this Act enters into force, the competent public service ethics committee shall open to the public such registered matters as referred to in paragraph (1) by inserting them in the official Gazette or public bulletins within one month after the expiration of the registration period.

(3) With respect to matters registered by a public official whose property is to be made open to the public at the time when this Act enters into force, the competent public service ethics committee shall complete the examination as provided in Article 8 within three months after such opening of materials to the public as referred to in paragraph (2).

(4) Documents concerning the public official property registration submitted to the registration agency under the previous provisions at the time when this Act enters into force shall be repealed on the enforcement date of this Act.

ADDENDA <Act No. 4739, 16 March 1994>

Article 1 (Enforcement Date)

This Act shall enter into force on the date of its promulgation.

Articles 2 through 11 Omitted.

ADDENDUM <Act No. 4853, 31 December 1994>

This Act shall enter into force on the date of its promulgation.

ADDENDA <Act No. 5108, 29 December 1995>

Article 1 (Enforcement Date)

This Act shall enter into force six months after the date of its promulgation.

Articles 2 through 8 Omitted.

ADDENDUM <Act No. 5454, 13 December 1997>

This Act shall enter into force on 1 January 1998. (Proviso Omitted.)

ADDENDA <Act No. 5491, 31 December 1997>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 April 1998.

Articles 2 through 8 Omitted.

ADDENDA <Act No. 5493, 31 December 1997>

Article 1 (Enforcement Date)

This Act shall enter into force on the date of its promulgation.

Articles 2 through 14 Omitted.

ADDENDA <Act No. 5681, 21 January 1999>

Article 1 (Enforcement Date)

This Act shall enter into force on the date of its promulgation.

Articles 2 through 4 Omitted.

ADDENDA <Act No. 6087, 31 December 1999>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 January 2000.

Articles 2 through 4 Omitted.

ADDENDA <Act No. 6306, 29 December 2000>

Article 1 (Enforcement Date)

This Act shall enter into force on 1 July 2001.

Articles 2 through 12 Omitted.

ADDENDA <Act No. 6388, 26 January 2001>

Article 1 (Enforcement Date)

This Act shall enter into force three months after the date of its promulgation.

Article 2 (Application Example)

The amendments to Article 6-2 shall be applicable to the stock trade performed after the enforcement date of this Act, and those to Article 17 to the persons retired after the enforcement date of this Act.

Article 3 Omitted.

ADDENDA <Act No. 6494, 24 July 2001>

Article 1 (Enforcement Date)

This Act shall enter into force six months after the date of its promulgation.

Article 2 Omitted.

ATTACHMENT 3

ENFORCEMENT DECREE OF THE PUBLIC SERVICE ETHICS ACT

PRESIDENTIAL DECREE NO. 17538

Article 1 (Purpose)

The purpose of this Decree is to prescribe matters delegated by the Public Service Ethics Act (hereinafter referred to as the "Act") and those matters necessary for its enforcement.

Article 2 (Scope, etc. of Public Service-Related Organizations)

(1) The public service-related organizations as provided in subparagraph 10 of Article 3 of the Act (hereinafter referred to as "public service-related organizations") shall be specified in the attached Table 1.

(2) For the purpose of subparagraph 10 of Article 3 of the Act, the term "officers" means permanent officers with a rank not lower than directors and auditors (including those in charge of duties equivalent thereto, regardless of their titles).

Article 3 (Persons Liable for Registration)

(1) The term "public officials in foreign service prescribed by the Presidential Decree" in subparagraph 4 of Article 3 of the Act means public officials whose duty grade ranks Grade VI or higher under the provision of Article 51 of Rules on Remuneration of Public Officials. *<Newly Inserted by Presidential Decree No. 17275, 30 June 2001>*

(2) The term "civilian employees with the equivalent rank" in subparagraph 6 of Article 3 of the Act means civilian employees of Grade II or higher.

(3) Public officials and employees of public service-related organizations working in specific fields, who are liable for registration of property under subparagraph 11 of Article 3 of the Act shall be as follows: *<Amended by Presidential Decree No. 14441, 23 December 1994; Presidential Decree No. 14498, 31 December 1994; Presidential Decree No. 16608, 7 December 1999; Presidential Decree No. 16784, 18 April 2000; Presidential Decree No. 17213, 27 April 2001; Presidential Decree No. 17420, 29 November 2001>*

1. public officials in research service as provided in subparagraph 1 (a) through (c), 2 (a) and (b), and 3 (a) of the attached Table 2 of the Rules of the Appointment, etc. of Public Officials Engaged in Research and Technical Advice Service, and those in technical advice service as provided in subparagraph 1 (a) and (b), 2 (a) and (b), and 3 (a) of the attached Table 2-2, who are officials in research and technical advice service equivalent to Grade IV or higher in general government service;
2. supervisory officials and educational research officials who are assigned to positions equivalent to public officials of Grade IV or higher in general government service;
3. professors and associate professors who are assigned to positions of department chiefs or office chiefs of universities and colleges (including various schools equivalent to universities and colleges);

4. public officials of Grade V or lower to Grade VII or higher under the control of the Board of Audit and Inspection, who are appointed for general government service and equivalent special government service;
- 4-2. public officials of Grade V or lower to Grade VII or higher under the control of the Korea Independent Commission Against Corruption, who are appointed for general government service and equivalent special government service;
5. captains, inspectors, lieutenants and sergeants among police officials;
6. fire-fighting superintendents, inspectors, lieutenants and sergeants and local fire-fighting superintendents, inspectors, lieutenants and sergeants among fire-fighting officials;
7. public officials of Grade V or lower to Grade VII or higher under the control of the National Tax Administration and the Korea Customs Service, who are appointed for general government service and equivalent special service;
8. public officials of Grade V or lower to Grade VII or higher under the control of the Ministry of Justice and the Public Prosecution Administration, who are appointed for prosecutory service and narcotics investigation service;
9. of public officials under the control of central administrative agencies (including the subordinate organizations; hereafter the same in this Article shall apply) and local governments (excluding those under the jurisdiction of the *Eup/Myeon/Dong*; hereinafter the same shall apply), those who are working in specified service, those who are appointed for Grade V or lower to Grade VII or higher in general government service and equivalent special service, and their senior supervisors, who are assigned to the positions whose principal function is to conduct inspection activities (in case of the central administrative agency, it refers to the smallest unit of auxiliary organ and the position to which a person of Grade equivalent thereto is assigned, under the Government Organization Act, and in case of a local government, it refers to the minimum unit of auxiliary agency and the position to which a person of Grade equivalent thereto is assigned, under the Municipal Ordinance or Municipal Rule; hereafter the same in this Article shall apply);
- 9-2. public officials of Grade V or lower to Grade VII or higher who are appointed for general government service, specific government service, special government service and their senior supervisors in charge of the certification and licensing, approval, investigation, supervision and guidance-control involving civil petitions in the areas of construction, civil engineering, environment and food sanitation from among public officials belonging to central administrative agencies or local governments;
10. of public officials under the control of the local government, those of Grade V or lower to Grade VII or higher in general government service and equivalent special service, and their senior supervisors, who are assigned to positions in charge of affairs concerning the imposition, collection, investigation and examination of taxes;
11. temporary public officials who are appointed to posts and positions or equivalent posts and positions that make it possible to appoint them as the public officials provided for in subparagraphs 1, 2, and 4 through 10; and
12. the employees of Grade II or higher working for the Financial Supervisory Commission.

(4) The posts and positions referred in paragraph (3) 9-2 shall be prescribed by the head of the relevant registration agency (excluding the head of the registration agency as prescribed in Article 5 (3) of the Act). *<Newly Inserted by Presidential Decree No. 17213, 27 April 2001; Presidential Decree No. 17275, 30 June 2001>*

Article 4 (Methods of Indicating Property to be Registered)

(1) Deleted. *<by Presidential Decree No. 14498, 31 December 1994>*

(2) Any intangible property right to be registered under Article 4 (2) 3 (j) of the Act shall be indicated by specifying the kinds, content, duration, other specifications of such right, annual amount of income derived from such right, and how the income is generated.

(3) The property contributed to a nonprofit corporation to be registered under Article 4 (1) and (6) of the Act shall be indicated by specifying the details of such property, the name of the nonprofit corporation, seat of its principal office, its representative, its projects to be accomplished, other specifications of the nonprofit corporation, and the position of the person liable for registration in the nonprofit corporation.

(4) The term "transaction price prescribed by the Presidential Decree" in Article 4 (3) 7 of the Act means the base price as of the basic date of property registration (referring to the weighted average value of transaction volume; hereafter the same shall apply): *Provided*, that in the event that the transaction closes prior to the basic date of property registration, the closing date shall be the basic date. *<Newly Inserted by Presidential Decree No. 17213, 27 April 2001>*

Article 4-2 (Registration Agency)

(1) The term "administrative agencies such as the committees prescribed by the Presidential Decree" in Article 5 (1) 5 of the Act means the administrative agencies falling under any of the following subparagraphs: *<Amended by Presidential Decree No. 17420, 29 November 2001>*

1. the Fair Trade Commission;
2. the Financial Supervisory Commission; and
3. the Korea Independent Commission Against Corruption.

(2) The registration agency as prescribed in Article 5 (3) of the Act shall be as follows:

1. for public officials belonging to any local environmental office prescribed by the Minister of Environment, the relevant local environmental office;
2. for public officials belonging to any office prescribed by the Minister of Construction and Transportation, the relevant office;
3. for public officials belonging to any regional tax office prescribed by the Commissioner of the National Tax Service, the relevant regional tax office; and
4. for public officials belonging to any local police agency prescribed by the Commissioner of the National Police Agency, the relevant local police agency.

[This Article Wholly Amended by Presidential Decree No. 17213, 27 April 2001]

Article 5 (Scope and Contents of Report on Changed Matters)

The scope and contents of changed matters concerning the property to be reported under Article 6 (1) and (2) of the Act shall be as follows: <Amended by Presidential Decree No. 14498, 31 December 1994>

1. matters changed due to, *inter alia*, sale, donation, etc. (excluding any case where only the value is changed) of the property falling under Article 4 (2) 1 and 2 of the Act;
2. changed matters concerning increases or decreases in, *inter alia*, items, quantities or amounts of the property falling under Article 4 (2) 3 of the Act: *Provided*, That in case of the property as provided in Article 4 (2) 3 (c), (f) through (i) and (k) of the Act, if only the value thereof is changed, it needs be excluded; and
3. in case of the property contributed to a nonprofit corporation under Article 4 (1) and (6) of the Act, changed matters in those categories as provided in Article 4 (3).

Article 5-2 (Scope and Method of Reporting Details of Stock Transaction)

(1) The stock, details of whose transaction are required to file a report thereon under Article 6-2 (1) of the Act shall be as follows:

1. the stock listed on the Korea Stock Exchange;
2. the stock listed on the Korea Securities Dealers Association; and
3. the stock that is traded in a manner similar to that on the valuable securities market from among stocks traded on the over-the-counter market under Article 194 of the Securities and Exchange Act.

(2) The scope of stock transaction required to be reported shall be all stocks traded during a period in which traded stocks are required to be reported under paragraph (1).

(3) The report on details of stock transaction shall be accompanied by a report on change in stock appended by a statement detailing the number of commission accounts issued by a financial institution, the date of stock transaction, items, quantity and the amount of actual transaction, etc., or a copy of the commission account ledger.

[This Article Newly Inserted by Presidential Decree No. 17213, 27 April 2001]

Article 5-3 (Permission for Deferring Report on Changed Matters)

(1) The head of any registration agency shall, when any person liable for registration applies for deferring the report on changed matters in accordance with Article 6-3 (1) of the Act, notify without delay such person liable for registration of whether he grants or denies the requested deferment.

(2) Any person liable for registration may, in the event the period of deferment as prescribed in each subparagraph of Article 6-3 (1) of the Act exceed 3 years, apply again to the head of the registration agency for deferring the report on change in stock within the limit of 3 years after filing the report on changed matters under Article 6-3 (2) of the Act.

[This Article Newly Inserted by Presidential Decree No. 17213, 27 April 2001]

Article 6 (Notification of Matters concerning Change of Person Liable for Registration)

If any public official of a government agency or an officer or an employee of a public service-related organization becomes liable for registration or is relieved from such liability due to, *inter alia*, a new appointment, promotion, transfer of position, change of occupation or retirement the head of such agency or organization shall report without delay the official announcement of such personnel affairs to the pertinent registrars as provided in Articles 5 (1) and (3) and 6 (2) of the Act at the same time as the official announcement thereof is made. <Amended by Presidential Decree No. 14498, 31 December 1994>

Article 7 (Permission for Extension of Property Registration Period)

When a person liable for registration requests an extension of the property registration period under Article 7 of the Act, the head of the registration agency (referring to registration agency as provided in Article 5 (1) 5 through 7, main text of 12, and (3) of the Act; hereinafter the same shall apply) shall notify without delay the person as to whether such period may be extended. In this case, the extension of the property registration period shall not exceed 20 days for any discloser of his property under Article 10 (1) and (2) of the Act and 30 days for any other person liable for the registration of his property (for any person who is on a sick leave, in overseas stay or under arrest in excess of 30 days, the relevant period). <Amended by Presidential Decree No. 14498, 31 December 1994; Presidential Decree No. 17213, 27 April 2001>

Article 8 (Report on Current Status of Property Registration)

The head of the registration agency shall report the current status of the property registration conducted until the last month to the government public service ethics committee (hereinafter referred to as the "committee") by the 10th day of each month: *Provided*, That the head of the registration agency as provided in Article 5 (1) 5 of the Act shall make a comprehensive report on the current status of the property registration with the registration agency in accordance with Article 4-2. <Amended by Presidential Decree No. 14498, 31 December 1994>

Article 9 (Transfer of Property Registration Papers)

When the committee demands the head of the registration agency to transfer the property registration papers necessary for examining registered matters, the head of the registration agency shall transfer without delay such papers which he has received and has in his custody.

Article 10 (Supplement of Property Registration Papers and Submission, etc. of Materials)

(1) Any person liable for registration who receives an order to supplement his property registration papers under Article 8 (2) or 8-2 (1) of the Act shall file a supplementary report within twenty days from the date on which he is ordered unless there exists any special ground. <Newly Inserted by Presidential Decree No. 17213, 27 April 2001>

(2) Any person liable for registration who receives a demand for submission of materials or a question in writing from the committee under Article 8 (3) of the Act shall submit such materials or a written answer within twenty days after he receives such demand or question, unless there exists any special reason.

(3) The head of the government agency, local government, public service-related organization, other public institution or financial institution which receives a demand for a report or submission of materials from the competent public service ethics committee under Article 8 (4) and (5) of the Act shall file such a report or submit such materials within twenty days after he receives such demand,

unless there exists any special reason. *<Amended by Presidential Decree No. 14498, 31 December 1994>*

Article 10-2 (Submission, etc. of Materials on Financial Transactions)

If the committee wishes to demand that the head of a financial institution submit materials on details of any financial transactions under Article 8 (5) of the Act, it may make such demand only in cases falling under one of the following cases within the scope of the minimum limit necessary for the purpose of examination:

1. where it is deemed, in light of the details of the registered property, that the financial property is not registered truthfully;
 2. where a person liable for registration has caused a social criticism with respect to whether or not his property is acquired by lawful means;
 3. where the property shows an excessive increase or decrease in value without any special reason; and
 4. where there is a suspicion of omission in matters concerning the property registration.
- [This Article Newly Inserted by Presidential Decree No. 14498, 31 December 1994]*

Article 11 (Demand for Attendance of Person Liable for Registration, Person Concerned, etc.)

- (1) If the committee demands any attendance under Article 8 (6) of the Act, it shall be done by a written demand for attendance. *<Amended by Presidential Decree No. 14498, 31 December 1994>*
- (2) Any person liable for registration, his spouse, lineal ascendant or descendant, or other person concerned in matters concerning the property registration who receives the demand for attendance as referred to in paragraph (1) shall attend the committee at the designated date and time.
- (3) If a person who has received on two or more occasions a demand for attendance under paragraph (1) refuses to comply with a written demand for attendance or fails to attend without any justifiable reason, the committee shall lodge a complaint against him with the competent public prosecution administration.

Article 12 (Hearing on Statement, etc.)

- (1) The committee may ask the person liable for registration, etc. who is present pursuant to Article 8 (6) of the Act, any question on matters concerning the property registration. In this case, it shall give the person present an opportunity to make a sufficient statement. *<Amended by Presidential Decree No. 14498, 31 December 1994>*
- (2) Any person liable for registration, etc. as referred to in paragraph (1) may request the attendance of any witness. In this case, the committee shall decide whether it will accept such request.

Article 13 (Report on Results of Examination of Delegated Agency on Registered Matters)

- (1) The head of the agency delegated with the examination of registered matters under Article 8 (11) of the Act shall report the results of examination to the committee within one month after completion of the examination. In this case, the provisions of Article 8 shall apply *mutatis mutandis* to the report. *<Amended by Presidential Decree No. 14498, 31 December 1994>*

(2) The report on the results of the examination as referred to in paragraph (1) shall include the following matters:

1. current status of property registration with the delegated agency;
2. summary of examination;
3. results of examination (including the opinion on measures to be taken); and
4. other matters necessary for preparing an annual report as provided in Article 36.

Article 14 (Supervision and Inspection over Delegated Agency)

(1) The committee may supervise or inspect the management of delegated affairs of the agency which has been delegated with the examination of registered matters under Article 8 (11) of the Act.

(2) The Minister of Environment, the Minister of Construction and Transportation, the Commissioner of the National Tax Service or the Commissioner of the National Police Agency shall, when they designate government offices under their control as registration agencies under Article 4-2 (2), supervise or inspect their delegated registration affairs. *<Amended by Presidential Decree No. 17213, 27 April 2001>*

[This Article Wholly Amended by Presidential Decree No. 14498, 31 December 1994]

Article 14-2 (Method of Examination of Registered Property)

In acknowledging, as a result of the examination of the registered matters, the fact that any property to be registered is omitted or erroneously stated by a gross negligence, the committee shall take into consideration as a whole factor such as the registered property, the scope, kinds and value of the omitted property, and the circumstances leading to such omission, etc.

[This Article Newly Inserted by Presidential Decree No. 14498, 31 December 1994]

Article 15 (Notification on Result of Measures Taken against Request for Decision on Disciplinary Action)

The head of the agency or public service-related organization to which a public official or an officer or an employee against whom a request for dismissal or demand for decision on disciplinary action is made under Articles 8-2 (1) 4 and 22 of the Act shall notify the committee of the result of measures taken thereby.

Article 16 (Method of Composition and Appointment of Government Public Service Ethics Committees)

The president shall commission and appoint five members of the committee, including the chairman, from among the persons falling under the main sentence of Article 9 (3) of the Act and four members including the vice-chairman from among public officials under the control of the Government. *<Amended by Presidential Decree No. 17213, 27 April 2001>*

Article 17 (Term of Chairman and Members)

(1) The term of the chairman and members shall be two years, and they may be reappointed only once.

(2) Notwithstanding the provisions of paragraph (1), the term of members who are appointed from among public officials under the control of the Government shall be the period of their service in the position at the time of their appointment.

Article 18 (Duties of Chairman and Vice-Chairman)

(1) The chairman shall represent the committee and exercise a general supervision and control over the affairs of the committee.

(2) If the chairman is unable to perform his duties by any accident, the vice-chairman shall act as chairman on his behalf.

Article 19 (Meeting, etc. of Committee)

(1) The chairman shall convene a meeting of the committee and preside over it.

(2) The meeting of the committee shall commence with the attendance of a majority of all registered members, and shall make decisions by an affirmative vote of a majority of members present: *Provided*, That the following matters shall be decided by an affirmative vote of not less than two-thirds of all registered members: *<Amended by Presidential Decree No. 14498, 31 December 1994>*

1. request and approval on a request for examination under Article 8 (7) and (12) of the Act;
2. measures taken under Article 8-2 of the Act;
3. demand for a dismissal or disciplinary action under Article 22 of the Act; and
4. accusation against those who fall under Articles 23 through 29 of the Act.

(3) No member shall participate in any examination or decision of the committee with respect to the following matters:

1. matters related directly to the member himself;
2. matters related to a person who has or has had a familial relation with the member himself; and
3. matters with respect to which the member himself is a witness or an expert.

(4) Members who are not permitted to participate in an examination or decision of the committee under paragraph (3) shall be excluded from the calculation of the number of registered members as referred to in paragraph (2).

Article 20 (Executive Secretary, etc. of Committee)

(1) In order to manage the affairs of the committee and conduct an examination of facts, etc., several executive secretaries and clerks shall be assigned to the committee.

(2) The executive secretaries shall be appointed by the Minister of Government Administration and Home Affairs from among officials who belong to the Ministry of Government Administration and Home Affairs. *<Amended by Presidential Decree No. 16608, 7 December 1999>*

Article 21 (Allowance, etc.)

The chairman, vice-chairman and members of the committee may receive allowance, travel expenses and other necessary expenses within the limit of the budget.

Article 22 (Operational Rules of Committee)

Matters other than those as prescribed by this Decree, which are necessary for the operation of the committee, shall be prescribed by the rules of the committee.

Article 23 (Designation of Person in Charge)

The head of the registration agency shall designate a person in charge of affairs concerning the property registration, report on gifts and restriction on employment of retired public officials, from among the employees under his control and notify the committee thereof.

Article 24 (Persons whose Property is Subject to Opening to Public)

(1) "Public officials in foreign service prescribed by the Presidential Decree" in Article 10 (1) 4 of the Act means public officials in foreign service whose duty grade ranks in between Grades VII and XIV under the provision of Article 51 of the Rules on Remuneration of Public Officials. <Newly Inserted by Presidential Decree No. 17275, 30 June 2001>

(2) The officers of public service-related organizations whose property is to be made open to the public under Article 10 (1) 10 of the Act shall be specified in the attached Table 2.

(3) The public officials of the Government whose property is to be made open to the public under Article 10 (1) 11 of the Act shall be as follows: <Amended by Presidential Decree No. 16784, 18 April 2000; Presidential Decree No. 17213, 27 April 2001>

1. research officials, guidance officials, supervisory officials and educational research officials who are assigned to positions equivalent to those of public officials of Grade I in general government service; and
2. temporary public officials who are appointed to the posts that make it eligible for them to be appointed as the public officials of paragraph (1).

Article 25 (Submission of List of Property to be Made Open to Public)

Those whose property is to be made open to the public under Article 10 (1) and (2) of the Act shall prepare a list of registered property to be made open to the public, and submit such list to the registration agency at the time when they register the property or report the changed matters under Articles 5 and 6 of the Act. <Amended by Presidential Decree No. 14498, 31 December 1994>

Article 26 (Permission for Inspection and Reproduction of Registered Matters)

The persons who are entitled to permit the inspection and reproduction as provided in Article 10 (3) of the Act shall be as follows: <Amended by Presidential Decree No. 14498, 31 December 1994>

1. for permission regarding the inspection and reproduction falling under Article 10 (4) 1 through 3 of the Act, the committee [if the authority on examination is delegated to the head of the registration agency under Article 8 (10) of the Act, then the head of

the registration agency concerned (limited to the case falling under Article 10 (4) 3 of the Act)]; and

2. for permission regarding the inspection and reproduction falling under Article 10 (4) 4 of the Act, the head of the registration agency (if the property registration documents are transferred to the committee under Article 9, then the committee).

Article 27 (Refusal, etc. of Notification of Matters concerning Property Registration)

(1) If a lineal ascendant or descendant of the person liable for registration who is not a dependent of such person refuses a notification of matters concerning property registration under Article 12 (4) of the Act, the person liable for registration shall state such fact on the property registration documents and submit a written justification for such refusal.

(2) For the purpose of Article 12 (4) of the Act, the term "dependent" means any ascendant or descendant who has no income or a low income, and who is therefore unable to maintain an independent livelihood, and is supported by the person liable for registration.

Article 28 (Value of Gift)

Gifts to be reported under Article 15 (1) of the Act shall be those which amount to one hundred US dollars or more at the market price in the donating country or the country to which the foreign donator belongs, or one hundred thousand won or more at the domestic market price at the time the gifts are received.

Article 29 (Management and Maintenance of Gifts)

(1) If the head of the agency or public service-related organization has received a report on gifts under Article 15 (1) of the Act, he shall transfer such gifts to the head of the registration agency as provided in Article 5 (1) of the Act within thirty days after he receives the report under the provisions of the Ordinance of the Ministry of Government Administration and Home Affairs: *Provided*, That the heads of the registration agencies of the Government and public service-related organizations under the control of the Government ministries and administrations shall transfer such gifts to the Minister of Government Administration and Home Affairs (in case of military personnel and military service officials, to the Minister of National Defense). *<Amended by Presidential Decree No. 16608, 7 December 1999>*

(2) The head of the agency or organization which has gifts transferred under paragraph (1) shall manage and maintain them, but those gifts which have any cultural or artistic merit and are required to be preserved permanently shall be transferred to the Minister of Culture and Tourism, and those gifts deemed more to be efficiently managed and maintained by other agencies, to the head of such agency, as applicable. *<Amended by Presidential Decree No. 16608, 7 December 1999>*

Article 30 (Disposal of Gifts)

(1) The head of the agency to which gifts are transferred under Article 29 may transfer any such gifts which are deemed unnecessary to be managed and maintained continuously as national property to the Administrator of the Office of Supply to dispose of such gifts through consultation with the Minister of Foreign Affairs and Trade. *<Amended by Presidential Decree No. 16608, 7 December 1999>*

(2) In disposing of any gift, if the person who reported the receipt thereof wishes to purchase it, the Administrator of the Office of Supply shall allow the reporting person to purchase such gift on a

priority basis at the price appraised by a specialized institution which is entrusted by the Administrator.

Article 31 (Persons whose Employment is Restricted)

Public officials and officers and employees of public service-related organizations whose employment is restricted under Article 17 (1) of the Act shall be those liable for registration as provided in Article 3 of the Act.

Article 32 (Scope of Connection with Profit-Making Private Enterprise in which Employment is Restricted)

(1) The term "duties of an office which he performed" in the main sentence of Article 17 (1) of the Act means the duties of a division (including any office equivalent to the division) for the chief of the relevant division and public officials under his control, and the duties of an office with respect of the service regulations, the articles of incorporation, rules or controlling and supervising the duties for any public official higher than the chief of the division in his rank. In this case, with respect to any official seconded, his duties shall be determined based on the duties of an office in an institution or an organization to which he is seconded. *<Amended by Presidential Decree No. 17213, 27 April 2001>*

(2) The scope of close connection between the affairs of an office to which a retired public official belongs and a profit-making private enterprise as provided in Article 17 (2) of the Act shall refer to any case where a person liable for registration has been in charge of affairs falling under any of the following subparagraphs within 3 years before his retirement: *<Amended by Presidential Decree No. 17213, 27 April 2001>*

1. affairs for providing any financial assistance, such as allocating and granting, directly or indirectly, any subsidy, bounty or grant-in-aid;
2. affairs related directly to any, *inter alia*, authorization, permission, license, patent, or approval;
3. affairs related directly to any inspection or audit of, *inter alia*, production methods, standards, or accounting methods;
4. affairs related directly to a survey, imposition and collection of taxes;
5. affairs related directly to any contract, inspection and examination concerning a public project work or purchase of goods;
6. affairs for exercising direct control under Acts and subordinate statutes; and
7. other affairs deemed to have a direct and considerable influence on any property right of enterprises depending on the method of handling affairs.

Article 33 (Size of Profit-Making Private Enterprise and Association where Employment is Restricted)

(1) The size of a profit-making private enterprise as provided in Article 17 (2) of the Act shall be an enterprise whose capital amounts to not less than 5 billion won and annual turnover amounts to not less than 15 billion won. *<Amended by Presidential Decree No. 17213, 27 April 2001>*

(2) The scope of the related association under Article 17 (2) of the Act shall be an association with which any profit-making private enterprise whose employment is restricted under Article 17 (1) of the Act is affiliated: *Provided*, that the association falling under any of the following subparagraphs shall be excluded: *<Newly Inserted by Presidential Decree No. 17213, 27 April 2001>*

1. an association entrusted with the administrative affairs of the State of a local government; and
2. any association whose officers are appointed by the State or a local government or their selections and appointments are subject to the approval of the State or a local government.

(3) The Minister of Government Administration and Home Affairs shall make a definite determination as profit-making private enterprises as referred to in paragraph (1), and make a public notice thereof through the Gazette in December of each year. *<Amended by Presidential Decree No. 16608, 7 December 1999>*

(4) The Commissioner of the National Tax Service shall prepare, as a digital file for determining the profit-making private enterprises as referred to in paragraph (3), a statement of profit-making private enterprises whose capital amounts to not less than 5 billion won and annual turnover amounts to not less than 15 billion won on the basis of the taxable period or the end of the fiscal year of each profit-making private enterprise in the preceding year, and notify the Minister of Government Administration and Home Affairs thereof not later than the 31st of October of each year. *<Amended by Presidential Decree No. 16608, 7 December 1999; Presidential Decree No. 17213, 27 April 2001>*

Article 33-2 (Request for Confirming whether Employment is Restricted)

Any person who is subject to the restrictions of employment under Article 31 shall, if he intends to take up an employment in a profit-making private enterprise published under Article 33 (3) or an association published under Article 33 (2) within 2 years from his retirement, file a request with the head of a relevant central administrative agency or the head of a relevant local government through the head of the agency or the public service-related organization to which he belonged at the time of his retirement (if such agency or organization has since been abolished, then to the head of the agency or public service-related organization which has succeeded the duties thereof; hereinafter the same shall apply), to confirm whether such profit-making private enterprise or such association is subject to the restrictions of his employment.

[This Article Newly Inserted by Presidential Decree No. 17213, 27 April 2001]

Article 33-3 (Confirmation of Whether Employment is Restricted)

(1) The head of the relevant agency or the head of the relevant public service-related organization shall, upon receiving a request for confirming whether the employment is restricted under Article 33-2, check and confirm the matters falling under each of the following subparagraphs and submit the results of such check and confirmation, accompanied with his opinion, to the head of the relevant central administrative agency or the head of the relevant local government:

1. whether the private enterprise in which he intends to take up an employment falls under a profit-making private enterprise that is published under Article 33 (3);
2. whether the duties of an office, which the person who has asked to confirm whether his employment is restricted performed three years prior to his retirement had a close link as prescribed in Article 32 to the profit-making private enterprise in which he intends to take an employment; and

3. whether the association in which he intends to take an employment falls under the association as prescribed in Article 33 (2).

(2) The head of the relevant central administrative agency or the head of the relevant local government shall examine the confirmation request filed and notify the person who has asked for the confirmation of whether his employment is restricted in the profit-making enterprise or the association under the main sentence of Article 17 (1) of the Act through the head of the relevant agency or the head of the relevant public service-related organization. In this case, if his employment is restricted, a notice thereon shall be served on the person who has asked for his employment confirmation and if his employment is approved by the competent public service ethics committee, a notice shall be served on him that his employment is possible.

[This Article Newly Inserted by Presidential Decree No. 17213, 27 April 2001]

Article 34 (Approval for Employment)

(1) Any retired public official who intends to obtain approval for his employment under the proviso of Article 17 (1) of the Act shall file an application for his employment with the competent public service ethics committee 15 days prior to the commencement of his employment through the head of an agency or the head of a public service-related organization, or the head of a central administrative agency or the head of a local government to which he belonged at the time of his retirement.

(2) The head of the central administrative agency or the head of the local government to which the employment applicant belonged at the time of his retirement shall append his opinion (if the employment applicant falls under each subparagraph of paragraph (3), the grounds thereof shall be included) to the application for approving the employment after examining the matters of each subparagraph of Article 33-3 (1).

(3) The competent public service ethics committee may, if it recognizes the existence of the special grounds falling under each of the following subparagraphs taking into account the opinion of paragraph (2), the job performance of the employment applicant prior to his retirement and his potential of exerting influence after his employment, etc., gives approval for his employment under the proviso of Article 17 (1) of the Act and the competent public service ethics committee shall, when he falls under subparagraph 2, give approval for his employment unless the special grounds exist that make it impossible for it to do so:

1. where the applicant's employment is needed for national security or bolstering the national competitiveness and enhancing the public interest;
2. where the applicant is dismissed regardless of his will due to the abolishment of posts or excessive staffing following the revision of the service regulations and the number or budget cuts, etc.;
3. where the management of a profit-making enterprise invested by the State or a local government needs to be improved;
4. where a qualification holder in the technical field under the National Technical Qualifications Act (including any civil qualification holder that is officially recognized by the State under the Framework Act on Qualifications) who is judged to make contributions to the development of the relevant industrial area and the promotion of science and technologies;

5. where the applicant is selected and appointed as a manager, an officer or an employee of the relevant profit-making enterprise or the relevant association in compliance with a decision made by the court or under the provisions of the Acts and subordinate statutes; and
6. where a close link does not exist between the duties that the retired public official was in charge and the profit-making enterprise, and the possibility of his exerting influence after his employment is extremely slim.

[This Article Wholly Amended by Presidential Decree No. 17213, 27 April 2001]

Article 35 (Confirmation of Employment, etc.)

(1) If a person whose employment is restricted under Article 31 retires from his office, the head of the government agency, a local government or public service-related organization shall confirm whether the person is employed in the relevant profit-making private enterprise and the relevant association through a direct inquiry or an inquiry to agencies concerned about him as provided in Article 17 of the Act for two years after retirement, and make at least once each year a report on the results of such examination to the competent public service ethics committee. *<Amended by Presidential Decree No. 17213, 27 April 2001>*

(2) The head of an agency, the head of a public service-related organization, the head of a central administrative agency or the competent public service ethics committee may, if it is necessary to confirm whether the employment is restricted or to give approval for the employment under Articles 33-3, 34 (2) and (3) and 35 (1), ask the head of agency concerned and the head of organization concerned to furnish relevant materials, and the head of such agency and the head of such organization shall, upon receiving such request, promptly furnish such materials except as specially provided for in other Acts and subordinate statutes. *<Newly Inserted by Presidential Decree No. 17213, 27 April 2001>*

Article 36 (Preparation, etc. of Annual Report)

- (1) The annual report as provided in Article 20-2 of the Act shall include the following matters:
 1. actual and operational situations of the property registration, report on gifts and the restriction on employment of retired public officials during the preceding year;
 2. examination of matters concerning property registration and the measures taken for the results thereof during the preceding year, as well as the supervision thereof;
 3. matters concerning the opening of matters concerning property registration to the public during the preceding year; and
 4. other matters concerning activities of the public service ethics committees.

(2) The head of the registration agency as provided in Article 5 (1) of the Act and the head of the agency which is delegated with the examination of registered matters under Article 8 (11) of the Act shall report to the competent public service ethics committee the actual situation of, *inter alia*, or activities, etc. pertaining to the property registration, report on gifts and restriction on employment of retired public officials during the preceding year, which are necessary for preparing the annual report as referred to in paragraph (1), not later than the 31st of March of each year. In this case, the provisions of the proviso of Article 8 shall apply *mutatis mutandis* to the submission. *<Amended by Presidential Decree No. 14498, 31 December 1994>*

Article 36-2 (Computerization of Affairs of Property Registration)

The head of the Public Service Ethics Committee or registration agency or the head of agency entrusted the examination of registered matters under the provisions of Article 8 (11) of the Act may provide the data input in a diskette or a disk or through computer networks, in case where falling under any of the following subparagraphs:

1. in case where persons liable for registration of the properties or make a report on changed matters or provide the data, etc.; and
2. in case where the heads of government agencies, local governments, public service-related organizations, other public institutions and financial institutions under the provisions of Article 8 (4), (5) and (12) of the Act make a report or provide the data.

[This Article Newly Inserted by Presidential Decree No. 16608, 7 December 1999]

Article 37 (Method of Entering Secret Matters)

Matters included in the report or list as provided in Articles 8, 13, 25 and 36, which are classified as secrets pursuant to the related Acts and subordinate statutes may be entered by such methods as not to disclose the detailed contents.

Article 38 (Enforcement Regulations)

Matters necessary for the enforcement of this Decree shall be prescribed by the Ordinance of the Ministry of Government Administration and Home Affairs. *<Amended by Presidential Decree No. 16608, 7 December 1999>*

ADDENDA

Article 1 (Enforcement Date)

This Decree shall enter into force on the date of its promulgation.

Article 2 (Transitional Measures)

Any person liable for registration at the time when this Decree enters into force shall register the property on the enforcement date of this Decree with the registration agency within one month after this Decree enters into force.

PROPOSED MODIFICATIONS TO APPENDIX I OF HONG KONG, CHINA

Notification from Hong Kong, China under Article XXIV:6(a)¹

The following notification from the Hong Kong Economic and Trade Office was received on 1 July 2003, with the request that it be circulated to the Parties to the Agreement on Government Procurement.

1. Pursuant to paragraph 6(a) of Article XXIV of the Agreement on Government Procurement (1994), Hong Kong, China hereby notifies the Committee on Government Procurement of the following modifications of a purely formal or minor nature relating to Annex 1 of Appendix I of the Agreement:

(a) add the following to Annex 1:

- Government Logistics Department
- Joint Secretariat for the Advisory Bodies on Civil Service and Judicial Salaries and Conditions of Service

(b) delete the following from Annex 1:

- Government Land Transport Agency
- Government Supplies Department
- Management Services Agency
- Official Languages Agency
- Printing Department
- Secretariat, Standing Commission on Civil Service Salaries and Conditions of Service
- Secretariat, Standing Committee on Disciplined Services Salaries and Conditions of Service

¹ Article XXIV:6(a) provides that "if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII".

2. The above modifications arise from the following re-organizations:
 - (a) the Government Land Transport Agency, the Government Supplies Department and the Printing Department were merged to form the Government Logistics Department on 1 July 2003. All procurement functions of the former three entities have been taken up by the Government Logistics Department;
 - (b) the Official Languages Agency was merged with the Civil Service Bureau of the Government Secretariat on 1 July 2003. All procurement functions of the Official Languages Agency have been taken up by the Government Secretariat which is already listed in Annex 1 of Appendix I of the Agreement;
 - (c) the Secretariat, Standing Commission on Civil Service Salaries and Conditions of Service and the Secretariat, Standing Committee on Disciplined Services Salaries and Conditions of Service were merged to form the Joint Secretariat for the Advisory Bodies on Civil Service and Judicial Salaries and Conditions of Service on 1 December 2001. All procurement functions of the former two entities have been taken up by the Joint Secretariat for the Advisory Bodies on Civil Service and Judicial Salaries and Conditions of Service;
 - (d) the Management Services Agency was merged with the Efficiency Unit of the Government Secretariat on 22 July 2002. All procurement functions of the Management Services Agency have been taken up by the Government Secretariat which is already listed in Annex 1 of Appendix I of the Agreement.
3. All the above modifications do not alter the level of mutually agreed coverage provided in the Agreement.
4. Accordingly, pages 1/2 and 2/2 of Annex 1 to Appendix I of Hong Kong, China should be modified as in Attachment A to this document (red-lined version). Attachment B shows the relevant pages of the loose-leaf system as they would look after the acceptance of the modification.²

² The Attachments are in English only.

Committee on Government Procurement

Original: English/
French

MODIFICATION TO APPENDIX I OF SWITZERLAND

Notification from Switzerland under Article XXIV:6(a)¹ of the GPA

The following communication from the Permanent Mission of Switzerland was received on 23 June 2003, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I am writing to you concerning a modification to Appendix I of the Agreement on Government Procurement (GPA), which follows the results of consultations between Hong Kong, China and Switzerland. Article XXIV of the GPA contains the provisions on its entry into force and it is in conformity with paragraph 6(a) of Article XXIV that I hereby inform you of a modification to the Swiss General Notes in Appendix I of the GPA.

The proposed modification is based on the results of consultations between Hong Kong, China and the Swiss Confederation referring to procurement of public authorities and public bodies at the level of the cities and districts.

On 6 December 2002, Switzerland transmitted to the Secretariat a notification under Article XXIV:6(a) of the GPA referring to Switzerland's agreement to liberalize procurement of public authorities and public bodies at the level of the cities and districts with the European Community, Norway, Iceland and Liechtenstein by adding in the GPA a new point 3 in Annex 2 of Appendix I under the list of entities. Switzerland has also added a new alinea under General Note 1 as the new point 3 in Annex 2 of Appendix I does not apply to other Members.

On 10 January 2003, Hong Kong, China transmitted to the Secretariat a communication registering reservations on the Swiss notification.

¹ Article XXIV:6(a) provides that "if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII".

On the basis of bilateral consultations and as discussed at the meeting of the Committee on Government Procurement on 6 February 2003, Switzerland has accepted, after compliance of internal procedures, to extend the liberalization of procurement of public authorities and public bodies at the level of the cities and districts to Hong Kong, China and Hong Kong, China has, on this basis, lifted reservations on the Swiss notification of 12 December 2002. Accordingly, Switzerland proposes deleting the reference to "Hong Kong, China" from the second alinea under General Note 1 of Appendix I.

Attachment A to this document contains the proposed modification to the General Notes in red-line/strikeout form and Attachment B contains the revised General Notes after acceptance of the proposed modifications.²

² Both attachments are in the original language only.

ANNEX

**MODIFICATION TO SWITZERLAND'S APPENDIX I TO THE
AGREEMENT ON GOVERNMENT PROCUREMENT**

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the Government of Switzerland submits to the Committee on Government Procurement the following modification to the Swiss General Notes in Appendix I of the Agreement:

- delete the reference to "Hong Kong, China" from the second alinea in the Swiss General Note 1. After deletion, the alinea will read:

"en ce qui concerne les marchés passés par les entités mentionnées au chiffre 3 de l'Annexe 2 aux fournisseurs de produits et de services des Etats-Unis d'Amérique; d'Israël; du Japon; de la Corée; de Singapour; et d'Aruba".

ATTACHMENT A

NOTES GENERALES ET DEROGATIONS AUX DISPOSITIONS
DE L'ARTICLE III

1. La Suisse n'étendra pas le bénéfice des dispositions du présent accord:
- en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 2 aux fournisseurs de produits et de services du Canada;
 - en ce qui concerne les marchés passés par les entités mentionnées au chiffre 3 de l'Annexe 2 aux fournisseurs de produits et de services des Etats-Unis d'Amérique; d'Israël; du Japon; de la Corée; ~~de Singapour; et d'Aruba;~~
 - en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 3 dans les secteurs suivants:
 - eau: aux fournisseurs de produits et de services du Canada, des Etats-Unis d'Amérique et du Singapour;
 - électricité: aux fournisseurs de produits et de services du Canada, du Japon et du Singapour;
 - aéroports: aux fournisseurs de produits et de services du Canada, de la Corée et des Etats-Unis d'Amérique;
 - ports: aux fournisseurs de produits et de services du Canada;
 - transports urbains: aux fournisseurs de produits et de services du Canada, d'Israël, du Japon, de la Corée et des Etats-Unis d'Amérique;
- tant qu'elle n'aura pas constaté que les Parties concernées assurent aux entreprises suisses un accès comparable et effectif aux marchés considérés;
- aux fournisseurs de services des Parties qui n'incluent pas, dans leurs propres listes, les marchés de services passés par les entités mentionnées aux Annexes 1 à 3 et concernant les catégories de services visées aux Annexes 4 et 5.
2. Les dispositions de l'Article XX ne sont pas applicables aux fournisseurs de produits et de services des pays suivants:
- Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication de marchés par les organismes mentionnés à l'Annexe 2, chiffre 2, tant que la Suisse n'a pas constaté que ces pays ont complété la liste des entités des gouvernements sous-centraux;
 - Japon, Corée et Etats-Unis d'Amérique en ce qui concerne les recours intentés contre l'adjudication de marchés à un fournisseur de produits ou de services d'autres Parties au

Deleted: de Hong Kong, Chine;

7 February 2003 (WT/Let/437)

présent accord, lorsque ledit fournisseur est une entreprise petite ou moyenne au sens du droit suisse, tant que la Suisse n'aura pas constaté que ces pays n'appliquent plus de mesures discriminatoires pour favoriser certaines petites entreprises nationales ou certaines entreprises nationales détenues par les minorités;

- Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication par des entités suisses de marchés dont la valeur est inférieure au seuil appliqué à la même catégorie de marchés par lesdites Parties.

3. Tant que la Suisse n'aura pas constaté que les Parties concernées assurent l'accès de leurs marchés aux fournisseurs suisses de produits et de services suisses, elle n'étendra pas le bénéfice des dispositions du présent accord aux fournisseurs de produits et de services des pays suivants:

- Canada, en ce qui concerne les marchés portant sur les produits relevant des n° 36, 70 et 74 de la FSC (machines industrielles spéciales; matériel d'informatique général, logiciel, fournitures et matériel auxiliaire (sauf 7010: Configurations d'équipement de traitement automatique des données); machines de bureau, matériel de bureautique et d'informatique de bureau;
- Canada, en ce qui concerne les marchés portant sur les produits relevant du n° 58 de la FSC (matériel de communications, matériel de détection des radiations et d'émission de rayonnement cohérent) et Etats-Unis d'Amérique en ce qui concerne les équipements de contrôle du trafic aérien;
- Corée et Israël en ce qui concerne les marchés passés par les entités énumérées à l'Annexe 3, chiffre 2 pour les produits relevant des n° 8504, 8535, 8537 et 8544 du SH (transformateurs électriques, prises de courant, interrupteurs et câbles isolés); Israël, en ce qui concerne les produits relevant des n° 8501, 8536 et 902830 du SH;
- Canada et Etats-Unis d'Amérique en ce qui concerne les marchés de fournitures et de services entrant dans le cadre de marchés qui, tout en étant passés par une entité relevant du champ d'application du présent accord, ne sont pas eux-mêmes soumis à ce dernier.

4. Le présent accord n'est pas applicable aux marchés passés en vertu:

- d'un accord international et portant sur la réalisation ou l'exploitation en commun d'un ouvrage par les Etats signataires;
- de la procédure spécifique d'une organisation internationale.

5. Le présent accord n'est pas applicable aux marchés de produits agricoles passés en application de programmes de soutien à l'agriculture ou de programmes d'aide alimentaire.

6. Les engagements pris par la Suisse dans le domaine des services au titre du présent accord sont limités aux engagements initiaux spécifiés dans l'offre finale suisse présentée dans le cadre de l'Accord général sur le commerce des services.

1. La Suisse n'étendra pas le bénéfice des dispositions du présent accord:
 - en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 2 aux fournisseurs de produits et de services du Canada;
 - en ce qui concerne les marchés passés par les entités mentionnées au chiffre 3 de l'Annexe 2 aux fournisseurs de produits et de services des Etats-Unis d'Amérique; d'Israël; du Japon; de la Corée; de Singapour; et d'Aruba;
 - en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 3 dans les secteurs suivants:
 - eau: aux fournisseurs de produits et de services du Canada, des Etats-Unis d'Amérique et du Singapour;
 - électricité: aux fournisseurs de produits et de services du Canada, du Japon et du Singapour;
 - aéroports: aux fournisseurs de produits et de services du Canada, de la Corée et des Etats-Unis d'Amérique;
 - ports: aux fournisseurs de produits et de services du Canada;
 - transports urbains: aux fournisseurs de produits et de services du Canada, d'Israël, du Japon, de la Corée et des Etats-Unis d'Amérique;

tant qu'elle n'aura pas constaté que les Parties concernées assurent aux entreprises suisses un accès comparable et effectif aux marchés considérés;

 - aux fournisseurs de services des Parties qui n'incluent pas, dans leurs propres listes, les marchés de services passés par les entités mentionnées aux Annexes 1 à 3 et concernant les catégories de services visées aux Annexes 4 et 5.

2. Les dispositions de l'Article XX ne sont pas applicables aux fournisseurs de produits et de services des pays suivants:
 - Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication de marchés par les organismes mentionnés à l'Annexe 2, chiffre 2, tant que la Suisse n'a pas constaté que ces pays ont complété la liste des entités des gouvernements sous-centraux;
 - Japon, Corée et Etats-Unis d'Amérique en ce qui concerne les recours intentés contre l'adjudication de marchés à un fournisseur de produits ou de services d'autres Parties au

... 2003 (WT/Let/...)

- présent accord, lorsque ledit fournisseur est une entreprise petite ou moyenne au sens du droit suisse, tant que la Suisse n'aura pas constaté que ces pays n'appliquent plus de mesures discriminatoires pour favoriser certaines petites entreprises nationales ou certaines entreprises nationales détenues par les minorités;
- Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication par des entités suisses de marchés dont la valeur est inférieure au seuil appliqué à la même catégorie de marchés par lesdites Parties.
3. Tant que la Suisse n'aura pas constaté que les Parties concernées assurent l'accès de leurs marchés aux fournisseurs suisses de produits et de services suisses, elle n'étendra pas le bénéfice des dispositions du présent accord aux fournisseurs de produits et de services des pays suivants:
- Canada, en ce qui concerne les marchés portant sur les produits relevant des n° 36, 70 et 74 de la FSC (machines industrielles spéciales; matériel d'informatique général, logiciel, fournitures et matériel auxiliaire (sauf 7010: Configurations d'équipement de traitement automatique des données); machines de bureau, matériel de bureautique et d'informatique de bureau;
 - Canada, en ce qui concerne les marchés portant sur les produits relevant du n° 58 de la FSC (matériel de communications, matériel de détection des radiations et d'émission de rayonnement cohérent) et Etats-Unis d'Amérique en ce qui concerne les équipements de contrôle du trafic aérien;
 - Corée et Israël en ce qui concerne les marchés passés par les entités énumérées à l'Annexe 3, chiffre 2 pour les produits relevant des n° 8504, 8535, 8537 et 8544 du SH (transformateurs électriques, prises de courant, interrupteurs et câbles isolés); Israël, en ce qui concerne les produits relevant des n° 8501, 8536 et 902830 du SH;
 - Canada et Etats-Unis d'Amérique en ce qui concerne les marchés de fournitures et de services entrant dans le cadre de marchés qui, tout en étant passés par une entité relevant du champ d'application du présent accord, ne sont pas eux-mêmes soumis à ce dernier.
4. Le présent accord n'est pas applicable aux marchés passés en vertu:
- d'un accord international et portant sur la réalisation ou l'exploitation en commun d'un ouvrage par les Etats signataires;
 - de la procédure spécifique d'une organisation internationale.
5. Le présent accord n'est pas applicable aux marchés de produits agricoles passés en application de programmes de soutien à l'agriculture ou de programmes d'aide alimentaire.
6. Les engagements pris par la Suisse dans le domaine des services au titre du présent accord sont limités aux engagements initiaux spécifiés dans l'offre finale suisse présentée dans le cadre de l'Accord général sur le commerce des services.

**RESPONSES TO QUESTIONS FROM THE UNITED STATES
RELATING TO KOREA TELECOM (KT)**

Communication from the Republic of Korea

Please find below Korea's responses to questions from the United States (GPA/W/242) regarding Korea's notification to the Committee on Government Procurement on the withdrawal of Korea Telecom (KT Corporation) from Annex 3 of Appendix I of the GPA (GPA/W/207).

1. *Please provide a copy of the law(s) or other measures that authorized the ROKG to sell its shares in KT and that transformed KT from a government entity into a private entity.*

As explained during the bilateral consultations with the United States, KT was privatized in accordance with the following law:

- Act on Restructuring and Privatization of State Enterprises (hereinafter referred to as Privatization Act).*

2. *Please describe all laws, regulations and other measures that the ROKG enacted or adopted to ensure that KT's procurement is consistent with the Agreement. What measures would be required to alter such regulation of KT's procurement if it is withdrawn from GPA coverage? Please provide a copy of the procurement procedures that KT used before and after the ROKG sold its shares in KT.*

ROKG adopted "the Special Rule on Procurement Contracts of Specific Items (Prime Minister's Decree 603, hereinafter referred to as Special Rules)" to ensure that KT's procurement is consistent with the GPA. For that purpose, KT also adopted "KT Special Rules on International Contracts (hereinafter referred to as Contract Rules)":

- (i) The Special Rules stipulate special procedures related to the government procurement of specific telecommunications items (including communication network equipments and other communication devices) conceded by mutual agreement with foreign countries.
- (ii) The Contract Rules stipulate what procedures KT should take when it procures items covered by the GPA.**

* For details, please refer to Attachment 1 of this document.

** For details, please refer to Attachment 2 of this document.

In the event that KT is withdrawn from GPA coverage, the next step will be simply to exclude KT from the list of "entities that procure specific items in accordance with special procurement contracts" of the Special Rules.

With regard to the procurement procedures of KT, since the enactment of the Privatization Act in 1997, KT, as a commercial corporation identical with other private companies, has independently made its accounting and procurement decisions free from any government control or influence. And such a procurement procedure hasn't changed at all even after the government completely sold off its shares in KT.

3. *In the three years prior to the ROKG's sale of its shares in KT, what percentage of KT's purchases were from foreign suppliers? Please provide details on the size of these procurements and the goods and services procured.*

Before ROKG fully sold off its shares in KT, KT's purchases from foreign suppliers represented 9.8 per cent in 1999, 4.9 per cent in 2000, 1.8 per cent in 2001 and 2.1 per cent in 2002. The complete replacement of switching system and the global slowdown in the IT sector have contributed to the decline. Major foreign items procured are as follows:

- Y2K Solution from Lucent Technologies, Sagem SA, Ericsson Telecom AB;
- Wide Band Digital Equipment from Marconi Communications;
- Digital Circuit Multiplication from ECT Telecom Ltd.;
- DSR from General Instrument.

4. *It is our understanding that KT is regulated by the Ministry of Information and Communications. Does the Ministry review the corporate plans of KT or require or encourage KT to consult with it before making any business decisions?*

Since the establishment of the Privatization Act in 1997, KT has been as much independent as other private companies in devising business plans and making other business decisions without the Government's intervention.

The Ministry of Information and Communication (MIC) does not request KT, a private company, to consult with the MIC in reviewing or making a decision on its business plans. Furthermore, the Ministry neither has such a right nor has ever done so to KT.

5. *Since the sale of the remainder of the ROKG's shares in KT, is KT subject to any formal or informal regulations or other measures that are different from its private sector competitors in the telecommunications sector?*

KT is subject to regulations imposed generally on a dominant operator in the fixed-line market. However, the regulation is equivalent to the one SK Telecom, a dominant operator in the wireless telecom market, is subject to. Thus, there are no formal or informal regulations exclusively applied to KT.

6. *Are there any laws or regulations that restrict KT from hiring former ROKG employees? If so, please provide a copy.*

1. After Privatization:

- (i) Under Article 17 of the Public Service Ethics Act, the ROKG restricts retired public officials from filling a position in related private enterprises. The Act is applied to public servants required to register their property, or officers or employees of public service-related organizations.

- (ii) With its full privatization on 21 May 2002, KT has been publicly notified as a private company subject to the Public Service Ethics Act.
- (iii) Thus, retired MIC officials of Grade IV (director level) or higher are not allowed to work for private telecommunication companies including KT for two years after their retirement.
- (iv) The following are the relevant provisions in the Public Service Ethics Act, Enforcement Ordinance of the Public Service Ethics Act, and the Notification of the Ministry of Government Administration and Home Affairs.

< Public Service Ethics Act >

Article 3 (Persons Liable for Registration)

(1) Any public official who falls under any of the following subparagraphs (hereinafter referred to as the "person liable for registration") shall register property under the provisions of this Act:

- 3. National and local public officials of Grade IV or higher in general service, and public officials in special service, who receive remuneration equivalent thereto;

Article 17 (Restriction on Employment of Retired Public Officials in Related Private Enterprises, etc.)

(1) No public official or officers or employee of a public service-related organization who was engaged in a grade of position or field of duties as prescribed by the Presidential Decree may be employed in a profit-making private enterprise larger than a specified size (hereinafter referred to as the "profit-making private enterprise") connected closely with the duties which he performed at the competent department within three years immediately before his retirement, for a period of two years immediately after his retirement, or the organization established for the joint profits and mutual cooperation, etc. of private enterprises (hereinafter referred to as the "association").

< Enforcement Ordinance of the Public Service Ethics Act >

Article 31 (Persons whose Employment is Restricted)

Public officials and officers and employees of public service-related organizations whose employment is restricted under Article 17(1) of the Act shall be those liable for registration as provided in Article 3 of the Act.

< Notification No. 2002-23 of the Ministry of Government Administration and Home Affairs >

Pursuant to the provisions of Clause 2, Article 17 of the Public Service Ethics Act and Clause 3, Article 33 of the Enforcement Decree of the Public Service Ethics Act, the Ministry of Government Administration and Home Affairs hereby notifies private enterprises subject to the employment restriction in 2003:

No.	Corporate Name	Type of Industry	Location
1823	KT Corporation	Telecommunication	206, Jeongja-dong, Bundang-gu, Seongnam, Kyunggi Province

2. Before Privatization:

Pursuant to the Privatization Act effective as of October 1997, *ex officio* directorship of the government was abolished. Instead, KT ensured a completely independent human resources management, including the appointment of president and directors through shareholders' general meeting:

- (i) More specifically, KT's president is appointed at the shareholders' general meeting among president candidates recruited through public notice and recommended by the Corporate President Recommendation Committee. The Corporate President Recommendation Committee is composed of outside directors and members selected from private sectors, which makes government officials ineligible for committee membership.
- (ii) Standing directors, outside directors and auditors are also appointed at the shareholders general meeting. Any person who served as a government official over the recent two (2) years is not eligible for the position of outside director.

7. *Please list all former KT employees who are currently senior officials (with over 15 years combined employment in supervisory positions) in the Ministry of Information and Communications (MOIC), the Electronics and Telecommunications Research Institute (ETRI), the Telecommunications Technology Association (TTA) or similar telecommunications organizations with ties to the ROKG.*

None.

8. *Please list all current senior KT officials who were previously employed by MOIC, ETRI, TTA or similar telecommunications organizations with ties to the ROKG and their current and past positions in these organizations.*

None.

9. *Please describe the extent of financial and other support that KT provided to ETRI and similar organizations with ties to the ROKG prior to the commencement of the ROKG's sale of its shares in KT. Please indicate whether, and if so indicate how, such support has changed since ROKG completed its sale of KT shares.*

No financial support has been provided to organizations with ties to the Government since KT was subject to the Privatization Act in 1997.

10. *Has the ROKG ever encouraged KT and other Korean entities to purchase goods and services from foreign suppliers? If so, please provide details and documentation.*

None.

11. *Please describe all financing, including direct grants, guarantees and loans at preferential rates that KT may have obtained prior to ROKG's sale of its KT shares.*

None.

12. *Please describe all financing that KT received from private sources, but that it obtained on preferential terms due to the ownership interest of ROKG.*

None.

13. *Do any KT directors, named by ROKG, remain on KT's Board of Directors?*

None.

14. *Please describe any unusual conditions attendant to ROKG's sale of its shares (e.g., no election of new directors until X years after sale).*

None.

ATTACHMENT 1*

ACT ON RESTRUCTURING AND PRIVATIZATION OF STATE ENTERPRISES ACT NO. 6607

Article 1 – Purpose

The purpose of this Act is to contribute to the creation of sound corporate culture and the balanced development of national economy, by introducing a management system run by specialized executives and to hold the management accountable for its performance, thereby enhancing management efficiency and facilitating privatization, while preventing the concentration of economic power in the process.

Article 2 - Applicable Enterprises

This Act shall apply to those corporations falling into any of the following Subparagraphs (hereinafter referred to as "Applicable Enterprises"). <Amended 26 January 1999, 14 January 2002>:

1. **Korea Tobacco and Ginseng Corporation** transformed into a joint stock company subject to the **Commercial Law**, pursuant to the **Act on the Abolishment of Korea Tobacco and Ginseng Corporation Act**
2. **Korea Telecommunication Corporation** transformed into a joint stock company subject to the **Commercial Law**, pursuant to the **Act on the Abolishment of Korea Telecommunication Corporation Act**
3. **Korea Gas Corporation** established pursuant to the **Korea Gas Corporation Act**.
4. HANJUNG (Korea Heavy Industry Incorporated)
5. **Incheon International Airport Corporation** established pursuant to the **Incheon International Airport Corporation Act**
6. **Korea Aerospace Corporation** established pursuant to the **Korea Aerospace Corporation Act**

Article 3 - Relationship with Other Laws and Regulations

- (1) This Act shall supersede other laws and regulations concerning the organization, shareholder rights, and the equity sale for privatization of Applicable Enterprises.
- (2) Applicable Enterprises pursuant to Article 2 Paragraph 1 through 3, Paragraph 5, and Paragraph 6 shall not be considered as government Investment Institutions subject to the **Framework Act on the Management of Government-Invested Institutions** <Amended 26 January 1999, 14 January 2002>
- (3) Matters concerning Applicable Enterprises (with the exception of **Korea Gas Corporation**) other than those provided for herein shall be stipulated by the **Commercial Law** provisions concerning joint stock company.

* English only.

- (4) Matters concerning **Korea Gas Corporation** other than those provided for herein shall be stipulated by the **Korea Gas Corporation Act**.

Article 4 - President

- (1) The president shall be appointed at the shareholders' general meeting.
- (2) The term of the president shall be three (3) years, and cannot be dismissed without due reason except in the case set forth in Article 13, Paragraph 3.
- (3) The president, in applying the **Commercial Law**, shall be deemed the chairman of Board of Directors.

Article 5 - Directors

- (1) Directors shall be classified into standing directors and non-standing directors, and shall be appointed at the shareholders' general meeting.
- (2) The quorum of standing directors including president shall account for less than 50 per cent (%) of the total quorum of directors.
- (3) The term directors shall be three (3) years. The term of successor to a vacant non-standing director's seat shall be the remaining term of the predecessor.
- (4) One-third of the quorum of non-standing directors shall be appointed annually.

Article 6 – Board of Directors

- (1) The president shall convene a board of directors meeting *ex officio* or upon request by more than one quarter (1/4) of registered directors, and shall be the chairman.
- (2) In case the president cannot participate in the resolution of the board of directors pursuant to this Act, or cannot perform the duty of the chairman of board of directors due to compelling reasons, the director as stipulated by the Articles of Incorporation shall act on the president's behalf.

Article 7 – Remuneration of the President and Standing Directors

- (1) The board of directors shall determine, upon its resolution, the criteria and payment method of the remuneration of the president and standing directors, and report to the shareholders' general meeting.
- (2) The criteria of remuneration as set forth in Paragraph 1 shall be formulated in such a way as to reflect the management performance of Applicable Enterprise to the determination of remuneration.
- (3) The president and standing directors cannot participate in the resolution of board of directors pursuant to Paragraph 1.

Article 8 - Recommendation of the Director Candidate

- (1) In case the president recommends the standing director candidate, the recommendation shall be approved by the board of directors. In this case, standing directors except the president cannot participate in the board of directors' resolution.
- (2) Non-standing director candidates shall be recommended by either a shareholder or shareholder association, pursuant to the Articles of Incorporation.

Article 9 - Qualifications for Non-Standing Director

- (1) Candidates eligible for non-standing director shall be those with specialized knowledge or experiences in economics, business management, law, or relevant technology.
- (2) Notwithstanding Paragraph 1, those with material interest in the Applicable Enterprise cannot be a non-standing director.
- (3) The scope of those with material interest pursuant to provision set forth in Paragraph 2 shall be stipulated by the Articles of Incorporation.

Article 10 - Non-Standing Director's Rights to Demand Materials

A non-standing director can request the president for the provision of materials required for performing duties. In this case, the president shall respond to the demand unless there are special circumstances.

Article 11 – President Recommendation Committee

- (1) For the purpose of recommending candidates for president, each Applicable Enterprise shall establish its respective President Recommendation Committee (hereinafter referred to as "Committee").
- (2) The Committee shall be composed of a few non-standing directors, one of former or incumbent presidents pursuant to the Articles of Incorporation, and a few non-official members entrusted by the Committee (with the exception of the employees of Applicable Enterprise in question and government officials). In this case, the quorum of Committee members who are non-standing directors shall account for the majority of the total quorum of members.
- (3) The number of non-standing directors entrusted with the Committee membership pursuant to Paragraph 2 shall be less than one half (1/2) of the total quorum of non-standing directors.
- (4) The Committee chairman shall be appointed among non-standing directors by the board of directors. In this case, the president and standing directors cannot take part in the board of directors' resolution.
- (5) The Committee shall make decisions, with the agreement of majority of registered Committee members, excluding the Committee chairman. In this case, the Committee chairman does not have voting rights.
- (6) Necessary matters concerning the composition and operation of the Committee other than those provided for herein shall be stipulated by the Presidential Decree.

Article 12 - Appointment of President

- (1) The president shall be appointed among those who are qualified for a chief executive officer, with extensive knowledge on business management and economics or with extensive management experiences.
- (2) Applicable Enterprise shall post a public notice on recruitment of president candidates on major daily newspapers, and can separately investigate candidates for president who are deemed appropriate for the post, or request a specialized agency for investigation.
- (3) Committee shall examine those recruited pursuant to Paragraph 2, according to the Presidential Candidate Examination Criteria as determined by the board of directors.
- (4) In selecting the president candidates, the Committee shall consult with those to be recommended as candidates on the terms and conditions of contract on management target determined by the board of directors, and where it is deemed necessary in the process of consultation, can modify the contract terms and conditions determined by the board of directors.
- (5) In accordance with the results of examination pursuant to Paragraph 3 and consultation pursuant to Paragraph 4, the Committee shall both recommend the presidential candidates and submit draft contract to the shareholders' general meeting.
- (6) Standing directors including the president, cannot attend the board of directors' meeting held for the purpose of determining the Presidential Candidate Examination Criteria pursuant to Paragraph 3, and the president cannot attend the board of directors' meeting held for the purpose of determining the terms and conditions of the contract on management target pursuant to Paragraph 4. In this case, the chairman of the board of directors shall be the Committee chairman.

Article 13 - Contract with the President

- (1) Upon the approval by shareholders' general meeting of the draft contract submitted pursuant to Article 12 Paragraph 5, the Applicable Enterprise shall sign the contract with the president. In this case, the Committee chairman shall sign the contract as the representative of the Applicable Enterprise.
- (2) Pursuant to Paragraph 1, the board of directors can evaluate the performance of contract signed with the president, or request a specialized agency for the evaluation. In this case, the president and standing directors cannot participate in the resolution of board of directors.
- (3) In case the evaluation results pursuant to Paragraph 2 leads to a determination that the president's performance falls short of management target, the board of directors can propose the president's dismissal to the shareholders' general meeting. In this case, the president and standing directors cannot participate in the board of directors' resolution.

Article 14 - Establishment of Shareholders Association

- (1) Where it is deemed necessary for the effective operation of shareholders' general meeting, as stipulated in the Presidential Decree, the Applicable Enterprise can establish and operate a shareholders association composed of some shareholders.
- (2) Necessary matters concerning the qualifications for the shareholders association membership and its operation shall be stipulated by the Articles of Incorporation.

Article 15 - Provisions on Special Cases Concerning Audit by the Board of Audit and Inspection

Inspection of Applicable Enterprises pursuant to Article 24 Paragraph 1 Sub-paragraph 3 of the **Board of Audit and Inspection Act** shall not be carried out unless there is an accident or a concrete evidence of the occurrence of accident.

Article 16 - Exercise of Shareholder's Right by the Government

- (1) The shareholder's right of Applicable Enterprise's shares held by the government shall be exercised by competent minister, upon consultation with the Minister of Finance and Economy.
- (2) Necessary matters concerning the consultation pursuant to Paragraph 1 shall be stipulated by the Presidential Decree.

Article 17 - Exercise of Minority Shareholder's Right

The provisions set forth in the **Securities Transactions Act** Article 191 Paragraph 13 and Article 191 Paragraph 14 shall be applied to the exercise of minority shareholder's right and shareholder proposal right, even when the Applicable Enterprise's shares are not listed on the securities market.

Article 18 - Single Person Stock Ownership Ceiling

- (1) One (1) shareholder and the person in special relationship with that shareholder as stipulated by the Presidential Decree (hereinafter referred to as "Single Person") shall neither own stocks exceeding the ratio stipulated by the Article of Incorporation within 15 per cent (%) of total number of issued stocks with voting rights, nor *de facto* control the Applicable Enterprise. <Amended 29 January 1999>
- (2) In case a single person owns stocks above the ceiling stipulated in Paragraph 1 or *de facto* controls Applicable Enterprise, the single person shall immediately dispose of the exceeding amount of stocks. In this case, even before the disposal of exceeding amount, the scope of single person's voting rights exercise shall be restricted to the ceiling stipulated in Paragraph 1.
- (3) Single person's ownership or *de facto* control as stipulated in Paragraph 1 and Paragraph 2 means a single person exercising voting rights by owning stocks under its own or borrowed name, or by collusion.

Article 19 - Foreign Stock Ownership Ceiling

- (1) Acquisition of the Applicable Enterprise's stocks by foreigner or foreign corporation can be separately restricted pursuant to the Article of Incorporation, in addition to the restriction pursuant to Article 18 Paragraph 1.
- (2) The provisions set forth in Article 18 Paragraph 2 shall be applied *mutatis mutandis* to those foreigners or foreign corporations owning stocks above the ceiling or *de facto* controlling Applicable Enterprise, as stipulated in the Articles of Incorporation pursuant to Paragraph 1. <Inserted 29 January 1999>

Article 20 - Equity Sale Method

- (1) The stocks held by the government, government-invested institution, or *Korea Development Bank* established pursuant to the **Korea Development Bank Act** (hereinafter referred to as "Government-equivalent") can be sold on consignment or assignment to agencies stipulated by the Presidential Decree, including but not limited to financial institution and securities firm.
- (2) In selling stocks held by government-equivalent, where it is deemed necessary for alleviating the repercussions on stock market, widely diversifying stocks, and enhancing international competitiveness of the Applicable Enterprise, the Minister of Finance and Economy can restrict the qualifications for the buyer of stocks in question or the amount of stocks available for purchase. <Amended 29 January 1999>
- (3) Upon the request of an employee stockholders association member, government-equivalent can sell, with priority, the stocks to the employee stockholders association of the corporation in question within the ceiling as stipulated in Article 18 Paragraph 1.
- (4) In case of selling stocks pursuant to Paragraph 3, matters including but not limited to the allocation of stocks to the employee stockholders association members, and the disposal of that stock shall be stipulated by the **Securities Transactions Act** Article 191 Paragraph 3.
- (5) Notwithstanding the **Budget and Accounting Act**, the cost for selling government held stocks pursuant to Paragraph 1 can be disbursed from the proceeds from equity sale.

Article 21 - Preclusion from Application

- (1) Once an Applicable Enterprise falling into any of the Article 2 Subparagraphs 1 through 3 fulfills any of the requirements set forth in the following Subparagraphs, this Act shall not apply to that enterprise from the date of shareholders' general meeting first convened thereafter.
 1. The ratio of voting stocks held by government-equivalent is within the ceiling set forth in Article 18 Paragraph 1.
 2. The ratio of voting stocks held by single person other than government-equivalent is larger than that held by government-equivalent.
- (2) Among the stocks of **Korea Heavy Industry Incorporated**, Article 18 and Article 19 shall not apply to the person who acquires the stocks held by government-equivalent through the tendering for equity sale, and once the ratio of the stocks with voting rights held by single person and person falling into any of the following Subparagraphs exceeds 51 per cent (%) of the total issued stocks with voting rights, this Act shall not be applied from the date of shareholders' general meeting first convened thereafter.
 1. Person who aims at joint capital participation and management pursuant to contract.
 2. The person pursuant to Subparagraph 1 and person who is in special interest with the person as stipulated by the Presidential Decree pursuant to Article 18 Paragraph 1.
- (3) In case the government made investment in-kind in **Korea Development Bank, The Export-Import Bank of Korea, and Industrial Bank of Korea** pursuant to the **Act on the Investment In-kind of State Properties**, Article 18 shall not be applied. <Inserted 29 January 1999>

ANNEX <NO. 5379, 28 AUGUST 1997>

Article 1 - Effective Date

This Act shall take effect as of 1 October 1997.

Article 2 - Deleted <29 January 1999>

Article 3 - Recommendation of the First Non-Standing Director

- (1) For the purpose of selecting the person to recommend as the first non-standing director (hereinafter referred to as the "Non-Standing Director Designee"), an Ad-hoc Committee on Non-Standing Director Recommendation shall be established under relevant department in Applicable Enterprises.
- (2) The members of the Ad-hoc Committee on Non-Standing Director Recommendation pursuant to Paragraph 1 shall be composed of shareholder representative, non-official member with specialized knowledge in area relevant to Applicable Enterprise, and public official from relevant central government agency.
- (3) Necessary matters concerning the composition and operation of the Ad-hoc Committee on Non-Standing Director Recommendation shall be stipulated by the Presidential Decree.
- (4) The Ad-hoc Committee on Non-Standing Director Recommendation shall recommend the non-standing director designee to shareholders' general meeting as a non-standing director candidate.
- (5) In recommending non-standing director designee as a non-standing director candidate pursuant to Paragraph 4, the Ad-hoc Committee on Non-Standing Director Recommendation, notwithstanding Article 5 Paragraph 3, shall equally divide the quorum of non-standing directors by three (3), and separately recommend non-standing directors with respective terms of one (1) year, two (2) years, and three (3) years. In case the quorum of non-standing directors cannot be equally divided by three (3), the recommended candidates for the longer-term directors shall be more than shorter-term director candidates.

Article 4 - Appointment of the First President

- (1) For the purpose of recommending candidate for the first president to be appointed at the shareholders' general meeting after the enactment of this Act, an Ad-hoc Committee on President Recommendation shall be established.
- (2) Provisions of Article 11 and Article 12 shall be applied *mutatis mutandis* to the composition and operation of the Ad-hoc Committee on President Recommendation pursuant to Paragraph 1 and the appointment of the first president. In this case, "non-standing director" shall be interpreted as "non-standing director designee", and "board of directors" as "non-standing director designees' meeting".

Article 5 - Provisions on Special Cases Concerning Incumbent Executives of Applicable Enterprises

- (1) The term of incumbent chief director of Applicable Enterprise at the time of enforcement of this Act shall be deemed terminated at the point this Act is enforced.
- (2) The president, directors, and auditor of Applicable Enterprise at the time of enforcement of this Act shall be deemed president, directors, and auditor pursuant to this Act, provided that their term is effective until new president, directors, and auditor are appointed at the shareholders' general meeting pursuant to this Act.

ATTACHMENT 2**

KT'S CORPORATE REGULATION

SPECIAL REGULATIONS ON INTERNATIONAL CONTRACTS

Regulation No. 538 (30 December 2000)

Article 1 - (Purpose)

The purpose of these Regulations is to define principles, procedures, etc. related to international tendering and contracts for Korea Telecom (hereinafter referred to as "the Company"), pursuant to the provisions of Article 87 of the Contract Regulations.

Article 2 - (Definitions)

As used in these Regulations, the term:

1. "International tendering" shall mean a tendering procedure for contracts to be entered into with domestic and foreign entities or foreign entities only, to supply goods, construction, or services, and the contracts shall include a contract through limited tendering.
2. "International contract" shall mean the signing of a contract after an international tendering, as provided in these Regulations.
3. "List of Qualified Suppliers" shall mean a list of prospective suppliers (hereinafter referred to as "qualified suppliers") whose proposals have been evaluated pursuant to the provisions of Article 16 of the Company's Procurement Regulations, and found to be advantageous to the Company, in overall consideration of the characteristics of the project, the price, quality level of the proposed goods, convenience of the contract, stable supply, quality attainment, conditions of maintenance and repair, etc.
4. "Telecommunications goods" shall mean telecommunication network equipment and other telecommunication facilities, as well as incidental services and related software (programs and plans, technical specifications, and other documents used for programming).

Article 3 - (Scope of Application)

- (1) Any of the following cases shall be subject to international contracts:
 1. manufacturing or purchase of goods, the cost of which is estimated to exceed 450,000 SDR. Provided, however, that in the case of telecommunications items, the cost of which is estimated to exceed 130,000 SDR;
 2. construction, the cost of which is estimated to exceed 15 million SDR; or
 3. if it is deemed favorable to the Company's interests to procure under an international contract.

** English only.

- (2) Notwithstanding the provisions of Subparagraphs 1 and 2 of Paragraph (1), the following cases may not be subject to international contracts:
 1. if a contract through limited tendering is to be signed, pursuant to the provisions of Subparagraphs 2 through 8 of Article 37 of the Contract Regulations;
 2. if an emergency contract is to be executed, pursuant to the provisions of Article 56 of the Contract Regulations; and
 3. if it is barred from international tendering by other related laws and regulations.
- (3) Calculation of estimated costs, stated in Paragraph (1), and the exchange rate of SDR to the Korean currency shall be as provided elsewhere.

Article 4 - (Principles of International Contracts)

The official in charge of the contract shall select the other party to an international contract in an impartial manner, not provide contract-related information in a discriminatory manner, and abide by the following requirements:

1. the method of calculating the estimated price shall not be manipulated or a split order shall not be placed for the purpose of avoiding an international contract;
2. any rules of origin, which are different from the provisions of the Overseas Trade Act and the Customs Act, shall not be applied; and
3. a fixed ratio of localized parts, technology transfer, offsets, etc. shall not be called for in the process of evaluating the eligibility of prospective suppliers, evaluation of proposals, and award of contracts, with a view to restricting entries or contract conditions thereof.

Article 5 - (Method of Contract)

International contracts may be concluded through open tendering, selective tendering, or limited tendering.

Article 6 - (Language)

- (1) The language used for international contracts shall, in principle, be Korean. Provided, however, that if contracting parties operate primarily in a particular region and it is deemed inevitable to use a foreign language, the language used in the region, or one language among English, French and Spanish may be used.
- (2) In the case of announcing an international tendering, the official in charge of the contract shall state the following matters at the bottom of the tendering announcement in English, French or Spanish:
 1. object of the contract;
 2. deadline for presentation of tender and application for tendering; and
 3. name and address of the organization in charge of execution.

- (3) If multiple languages are allowed to be used in preparing the tender for an international tendering, the official in charge of contract shall include one or more languages among English, French and Spanish.
- (4) If any provision written in a foreign language, pursuant to the provisions of Paragraphs (2) and (3), is different from what is stated in Korean, the Korean text shall prevail.

Article 7 - (Eligibility and Review of Applicants for Open Tendering)

- (1) The official in charge of the contract may establish the requirements for eligibility of applicants for open tendering, with regard to performance of a similar kinds of contracts, performing capability, technological capability, status of management, and other necessary matters, depending on the type and scale of the contract, in addition to the requirements stated in Subparagraphs 1 through 3 and 5 of Article 13 of the Contract Regulations, as deemed necessary for a successful concluding of an international contract.
- (2) Upon request by a prospective applicant for open tendering, the official in charge of contract shall review the eligibility thereof, pursuant to the provisions of the above Paragraph (1), and notify the prospective applicant of the result.
- (3) The official in charge of the contract may not conduct a review, as provided in Paragraph (2), of those registered in the List of Qualified Suppliers.
- (4) The official in charge of the contract shall promptly take steps to review the eligibility, if any one who has not been through the eligibility review pursuant to the provisions of Paragraph (1) of Article 8, requests to participate in the tendering. If it is deemed that there is sufficient time for completing the eligibility review by the day before the deadline for tender submission, the official in charge shall allow him to submit the tender.

Article 8 - (List of Qualified Suppliers)

- (1) The official in charge of the contract may prepare and display the List of Qualified Suppliers in such a manner that all participants in the tendering may have ready access.
- (2) In the event the List of Qualified Suppliers has expired or any party is removed from the List, the official in charge of the contract shall notify the parties concerned to that effect.

Article 9 - (Public Notice)

- (1) Tendering shall be announced 40 days prior to the day before the deadline for tender submission.
- (2) Notwithstanding the provisions of Paragraph (1), if the tendering falls under any of the following circumstances and it is deemed impossible to procure the intended object under the contract under the normal schedule, tendering may be announced 10 days prior to the day before the deadline for tender submission:
 1. if it is urgent; or
 2. if tendering is to be announced again, pursuant to the provisions of Article 38 of the Contract Regulations.
- (3) When public notice has been announced and the content thereof is revised or corrected, a correction notice shall be made with the submission deadline extended by at least 10 days.

- (4) Notwithstanding the provisions of Paragraph (1), public notice of tendering may be made 25 days prior to the day before the deadline for tender submission, if it falls under any of the following cases:
1. if a separate 40-day pre-announcement has been made within the past 12 months; or
 2. if individual requests for supply are made in a certain grouping or instalments under the contract (hereinafter referred to as "recurring contract"), and the notice is a follow-up to a previous one.
- (5) The provision of Paragraph (1) of Article 17 of the Contract Regulations shall apply to any public notice of tendering, pursuant to the provisions of Paragraphs (1) through (4), as necessary.

Article 10 - (Content of Public Notice)

If a public notice, pursuant to the provisions of Article 9, is to be made, the official in charge of the contract shall include the following matters, in addition to those set forth in the provisions of Article 18 of the Contract Regulations, in said public notice:

1. matters concerning any additional procurement conditions in regard to the said contract, and the scheduled date of public notice of a subsequent tendering in the case of a recurring contract;
2. method of open tendering or selective tendering, and whether negotiation procedures are included;
3. type of contract to be used by the organization that placed the order—purchase, lease, instalment purchase, etc.;
4. address, deadline for submission, and required language for the application for review of the eligibility for tendering, the application for tendering, tender, etc.; and
5. applicability of the GPA.

Article 11 - (Submission and Receipt of Tender)

- (1) The official in charge of the contract may receive tenders and related documents submitted by telegraph, telegram, fax, etc., as necessary.
- (2) In the event tenders, etc. are submitted pursuant to the provisions of the above Paragraph (1), the applicant shall be requested to immediately submit hard copies thereof with signature for confirmation. In such case, if there are any discrepancies in the content between what is sent by telegraph, etc. and the signed hard copy submitted after the deadline, the copy sent earlier by telegraph, etc. shall prevail.

Article 12 - (Determination of the Successful Applicant)

- (1) The official in charge of the contract shall determine the successful applicants for open tendering by examining the applicants' capability of executing the relevant contract in the order of the lowest tender under the ceiling.

- (2) The examination, stated in the above Paragraph (1), shall be made to determine the eligibility, considering the applicant's performance record, technological capability, financial status, faithful execution of previous contracts, etc., pursuant to a separate set of examination criteria.
- (3) Notwithstanding the provisions of Paragraph (1), the capability of executing the relevant contract may not be reviewed in any of the following cases:
 1. if the tendering is pursuant to the provisions of Subparagraph 3 of Paragraph (2) of Article 3;
 2. if any party registered on the List of Qualified Suppliers, as stated in the provisions of Article 8, submits the lowest tender; or
 3. if a party who has during the past three years supplied items equal to or higher than the level of the contract object to the Company or public organizations, as listed in Article 2 of the Act on Promotion of Small- and Medium-Sized Companies and Purchase of Products, submits the lowest tender.

Article 13 - (Release of Information, etc.)

- (1) When the official in charge of the contract selects the successful applicant or the party to international contract (hereinafter referred to as "successful applicant"), the following matters shall be announced within seven (7) days of the selection of the successful applicant:
 1. object, amount and price of the successful tender or the intended procurement through limited tendering;
 2. name and address of the successful applicant or party to the contract through limited tendering;
 3. address of the organization that placed the order;
 4. procedures that were followed in determining the successful applicant or party to the contract through limited tendering;
 5. procedures of public notice in the case of open tendering;
 6. in the case of limited tendering, the reason for adopting the method of limited tendering; and
 7. other matters regarding the determination of the successful applicant.
- (2) If applicants for tendering request information related to the said tendering, the official in charge shall release the following information:
 1. procurement practices and procedures of the organization that placed the order;
 2. reasons for rejection of an application for review of eligibility for tendering, suspension of any existing eligibility, and not being designated as eligible; and
 3. reasons for non-selection as the successful applicant, name of the successful applicant, characteristics and strengths of the successful tender.

- (3) Notwithstanding the provisions of Paragraph (2), information about the successful tender may not be released in any of the following circumstances:
1. if release of the information, etc. is feared to undermine public interest;
 2. if release of the information, etc. is feared to undermine due commercial interests of a particular company or adversely affect fair competition; or
 3. if release of the information, etc. is feared to cause an inadvertent disclosure of the Company's commercial or corporate secrets.

Article 14 - (Selective Tendering)

In the case of a selective tendering pursuant to the provisions of Article 34 of the Contract Regulations, the official in charge of the contract shall establish the eligibility of applicants for the selective tendering and standards of invitation, in consideration of the matters provided in Article 8 and characteristics of the subject matter of the contract, etc.

Article 15 - (Designation and Notification of Applicants for Selective Tendering)

- (1) If the official in charge of the contract deems it desirable to execute a selective tendering, he shall designate the eligible applicants who meet the invitation standards pursuant to Article 14, and at the same time notify the designated applicants of matters regarding the public notice of tendering, as set forth in Article 10.
- (2) The provisions of Article 9 shall apply to the notification pursuant to the above Paragraph (1), as necessary. In the case of a selective tendering for which the List of Qualified Suppliers is not to be used, the deadline for submission of the application for selective tendering shall be at least 25 days prior to the day before the date of tendering announcement.

Article 16 - (Application of Provisions on Open Tendering, as necessary)

The provisions of Articles 7 through 13 shall apply to selective tendering, as necessary.

Article 17 - (Contract through Limited Tendering)

International contracts may be concluded through limited tendering in any of the following cases:

1. when an open tendering attracts no applicant; if tender by mutual consent is submitted; or, no tender meets the conditions required in the public notice of tendering, etc.;
2. if it is related to art works, patent rights, publishing rights and other proprietary rights for which there is no proper substitute or alternative, or if procurement must be made from a particular supplier for technical reasons;
3. if procurement cannot be made through open tendering within a given period, for reasons of extreme urgency;
4. if procurement is for replacement of parts of already supplied objects or expansion of facilities (this shall apply only to such case where manufacturing or supply of items by those other than the existing manufacturer/supplier of the said items may cause problems related to compatibility or interoperability);

5. if prototypes, etc. developed at the request of the organization that placed the order are to be procured (This shall not apply to the case where the subsequent items, not prototypes, are to be procured after such contract is fulfilled);
6. if additional construction services which were not included in the initial contract become necessary, through unforeseeable circumstances, and the organization that placed the order needs to award contracts for the additional construction services to the contractor carrying out the construction services concerned since the separation of the additional construction services from the initial contract would be difficult for technical or economic reasons and cause significant inconvenience to the organization. However, the total value of contracts awarded for the additional construction services shall not exceed 50 percent of the amount of the main contract;
7. if it is new construction service consisting of the repetition of similar construction services which conform to a basic project for which an initial contract was awarded through international tendering and for which the organization that placed the order indicated in the notice of intended procurement concerning the initial construction service that limited tendering procedures might be used in awarding contracts for such new construction services;
8. if goods are to be purchased from the raw materials market (commodity market, etc.);
9. if a contract is to be signed with the winner of a design contest; or
10. if procurement of items from a particular company is significantly more advantageous to the Company.

Article 18 - (Filing of Objections, etc.)

Matters and specific procedures related to the formation, operation, etc. of a committee in charge of reviewing or resolution of objections to international contracts shall be based on "The Guide to Dispute Settlement Regarding International Procurement".

Article 19 - (Relationship with the Contract Regulations)

The Contract Regulations shall apply to matters that are not specifically provided for in these Regulations. Provided, however, that this shall not apply to the provisions of Articles 30 through 33 and Paragraph (2) of Article 47 of the Contract Regulations.

Article 20 - (Application of International Commercial Practices)

Notwithstanding the provisions of Article 19, the official in charge of the contract may execute international contracts, pursuant to international commercial practices, if it is unavoidable due to the currency, type and period of security payment, method of payment with L/C, inspection, and execution of other contract procedures.

Article 21 - (Establishment of the Guide, etc.)

- (1) The official in charge of the contract may establish and enforce a guide for the sake of the enforcement of these Regulations.
- (2) If a guide is to be established pursuant to the provisions of the above Paragraph (1), approval of the Director of the Finance Office shall be obtained.

ADDENDA

These Regulations shall become effective on the date of promulgation.

QUESTIONS TO THE REPUBLIC OF KOREA RELATING TO THE PROPOSED WITHDRAWAL OF KOREA TOBACCO & GINSENG CORPORATION AND DAEHAN PRINTING AND PUBLISHING CO. LTD

Communication from the United States

The United States would appreciate the Republic of Korea's responses to the following questions relating to its proposed withdrawal of Korea Tobacco & Ginseng Corporation (KT&G) and Daehan Printing and Publishing Co. Ltd. (Daehan) from Annex 3 of Appendix I of the Agreement on Government Procurement (GPA) (GPA/W/250).

KT&G

1. With respect to KT&G, please provide a copy of the laws, regulations and other measures that authorized the Korean Government's sale of its shares in KT&G, that transformed KT&G from a government enterprise into a private entity and that demonstrate that KT&G is no longer subject to laws, regulations or other measures that apply to government enterprises.
2. Please describe all laws, regulations and other measures that Korea enacted or adopted to ensure that KT&G's procurement is consistent with the GPA. What measures would be required to alter such regulation of KT&G's procurement if it were withdrawn from GPA coverage?
3. Are there any laws, regulations or other measures that restrict KT&G from hiring former Korean Government employees? If so, please provide a copy.
4. Please describe all financing, including direct grants, guarantees and loans at preferential rates, that KT&G may have obtained prior to the Korean Government's sale of its shares in KT&G.
5. Please describe any special conditions attendant to the Korean Government's sale of its shares in KT&G, such as no election of new directors until "X" years after the sale.

Daehan Printing and Publishing

6. Please explain the change in circumstances that justify Daehan's withdrawal from Annex 3 at this time.
7. Has Daehan ever been subject to laws, regulations or measures, other than the Commercial Act or other measures that apply to all private companies? If so, please describe and provide a copy of such laws, regulations or other measures.
8. Please describe all laws, regulations and other measures that Korea enacted or adopted to ensure that the Daehan's procurement is consistent with the GPA. What measures would be required to alter such regulation of Daehan procurement if it were withdrawn from GPA coverage?

./.

9. Has Korea named or selected any directors of Daehan's Board of Directors? If so, do any such directors remain on Daehan's Board?

10. According to the information provided with regard to Daehan, Daehan has no foreign ownership. Are there any restrictions that preclude foreign ownership of any shares of Daehan? If so, please provide a copy.

NOTIFICATION FROM JAPAN UNDER ARTICLE XXIV:6 OF THE AGREEMENT ON GOVERNMENT PROCUREMENT (GPA/W/255)

Communication from the European Community

The following communication, dated 1 April 2003, has been received from the Permanent Delegation of the European Commission with the request that it be circulated to the Committee on Government Procurement.

We refer to the recent notification of Japan, dated 3 March 2003, proposing modifications to Annexes 3 and 5 and the General Notes of its Appendix I of the Agreement on Government Procurement relating to Japan Post (GPA/W/255).

The European Community objects to this proposed modification pursuant to Article XXIV.6 of the Agreement on Government Procurement. The European Community requires additional time to study this matter and to seek additional information through consultations with the Government of Japan.

The European Community will conduct a review of the notification in the light of Article XXIV.6 of the Agreement in an expeditious manner, and will keep the Committee advised of its progress and of the outcome of its review.

The European Community reserves all rights in respect of Japan's notification.

NOTIFICATION FROM THE REPUBLIC OF KOREA UNDER ARTICLE XXIV:6 OF THE AGREEMENT ON GOVERNMENT PROCUREMENT (GPA/W/250)

Communication from the United States

The following communication, dated 15 March 2003, has been received from the Permanent Mission of the United States with the request that it be circulated to the Committee on Government Procurement.

The Republic of Korea has notified three proposed modifications to Annex 3 of Appendix I of the Agreement on Government Procurement (GPA). This notification was circulated by the Secretariat on 17 February 2003 (GPA/W/250), providing 30 days for other Parties to object prior to the modifications becoming effective.

The United States has no objection to the proposed deletion of the Housing & Commercial Bank, based on its merger with the Kookmin Bank, which is listed in Annex 3 of Appendix I of the GPA, and the representation of the Government of Korea that it will have an "inconsequential" effect on GPA coverage. However, the United States requires additional time to study and to seek clarification through consultations with the Government of Korea in order to determine whether, pursuant to Article XXIV:6(b), "government control or influence" over Korea Tobacco & Ginseng Corporation (KT&G) and Daehan Printing and Publishing Co. Ltd "has been effectively eliminated". For these reasons, the United States objects to these two proposed modifications taking effect upon expiration of the 30-day review period. The United States will endeavour to conduct the necessary study and consultations as expeditiously as possible, and will keep the Committee advised of the progress and outcome of this review.

NOTIFICATION FROM THE REPUBLIC OF KOREA UNDER ARTICLE XXIV:6 OF THE AGREEMENT ON GOVERNMENT PROCUREMENT (GPA/W/250)

Communication from the European Community

The following communication, dated 14 March 2003, has been received from the Permanent Delegation of the European Commission with the request that it be circulated to the Committee on Government Procurement.

We refer to the recent notification of the Republic of Korea, dated 17 February 2003, proposing the withdrawal of Housing & Commercial Bank, Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. from Annex 3 of Appendix I of the Agreement on Government Procurement (GPA/W/250).

The European Community objects to the proposed modification pursuant to Article XXIV:6 of the Agreement on Government Procurement, as regards the withdrawal of Korea Tobacco & Ginseng Corporation and Daehan Printing and Publishing Co. Ltd. from Annex 3 of Appendix I. The European Community requires additional time to study this matter and to seek additional information through consultations with the Government of the Republic of Korea.

The European Community will conduct a review of the notification in the light of Article XXIV:6 of the Agreement on Government Procurement in an expeditious manner, and will keep the Committee advised of its progress and of the outcome of its review.

The European Community reserves all rights in respect of the Republic of Korea's notification.

PROPOSED MODIFICATION TO APPENDIX I OF HONG KONG, CHINA

Notification from Hong Kong, China under Article XXIV:6(a)¹

The following notification from the Hong Kong Economic and Trade Office was received on 3 March 2003, with the request that it be circulated to the Parties to the Agreement on Government Procurement.

1. Pursuant to paragraph 6(a) of Article XXIV of the Agreement on Government Procurement (1994), Hong Kong, China hereby notifies the Committee on Government Procurement of the following modification of a minor nature relating to Annex 1 of Appendix I of the Agreement:

- Delete "Education Department".

2. Arising from a re-organization, the Education Department was merged with the Education and Manpower Bureau of the Government Secretariat on 28 February 2003. All procurement functions originally carried out by the Education Department are taken up by the Government Secretariat. As the Government Secretariat is already listed in Annex 1 of Appendix I of the Agreement, the above modification does not alter the level of mutually agreed coverage provided in the Agreement.

3. Accordingly, pages 1/2 and 2/2 of Annex 1 to Appendix I of Hong Kong, China should be modified as in Attachment A to this document (red-lined version). Attachment B shows the relevant pages of the loose-leaf system as they would look after the acceptance of the modification.²

¹ Article XXIV:6(a) provides that "if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII".

² The Attachments are in English only.

Committee on Government Procurement

Original: English

PROPOSED MODIFICATIONS TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)¹ of the GPA

The following notification from the Permanent Mission of Japan was received on 3 March 2003 with the request that it be circulated to the Parties to the Agreement on Government Procurement.

Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement (GPA), the Government of Japan wishes to notify the Committee on Government Procurement of the following rectifications of a purely formal nature with regard to Annexes 3 and 5 and the General Notes of Appendix I of the Agreement (cf. WT/Let/400 and WT/Let/425/Rev.1):

- delete "- Postal Life Insurance Welfare Corporation" in Group A in the "List of Entities" in Annex 3;
- add "- Japan Post" in Group A in the "List of Entities" in Annex 3;
- modify the relevant thresholds for construction services in Annex 3 as follows:

"Construction services:

4,500 thousand SDR for Japan Post in Group A

15,000 thousand SDR for **all other** entities in Group A

4,500 thousand SDR for entities in Group B

Architectural, engineering and other technical services covered by this Agreement:
450 thousand SDR";

¹ Article XXIV:6(a) reads as follows: "Rectifications, transfers of an entity from one Annex to another or, in exceptional cases, other modifications relating to Appendices I through IV shall be notified to the Committee, along with information as to the likely consequences of the change for the mutually agreed coverage provided in this Agreement. If the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII."

- delete "- Postal Life Insurance Welfare Corporation" in Group A in the "List of Entities which procure the services, specified in Annex 4" in Annex 3;
- add "- Japan Post" in Group A in the " List of Entities which procure the services, specified in Annex 4" in Annex 3;
- modify the relevant thresholds in Annex 5 as follows:

"4,500 thousand SDR for entities set out in ANNEX 1;
15,000 thousand SDR for those in ANNEX 2;
4,500 thousand SDR for Japan Post in Group A in ANNEX 3;
15,000 thousand SDR for **all other entities** in Group A in ANNEX 3; and
4,500 thousand SDR for **entities** in Group B in ANNEX 3";
- modify paragraph 1 of "GENERAL NOTES" as follows:

"1. For goods and services (including construction services) of Canada and suppliers of such goods and services, this Agreement does not apply to procurement by the entities listed in Annexes 2 and 3 (except for **Japan Post in Group A and the entities** in Group B set out in Annex 3)."

The above rectifications are the result of the following organizational changes relating to a central government entity listed in Annex 1 and an entity in Annex 3:

- (1) In the reform process of Japan's central government and public corporations, the following two organs are to be abolished:
 - the Postal Service Agency, an independent organ of the Ministry of Public Management, Home Affairs, Posts and Telecommunications in Annex 1, and
 - the Postal Life Insurance Welfare Corporation in Group A of Annex 3.

The undertakings, which have been in the past carried out by the above-mentioned two organs, are now to be conducted by Japan Post. Under the Law Concerning Japan Post (Law No. 97 of 31 July 2002) and the relevant ordinances, this organization change will be implemented as of 1 April 2003. Japan Post will be established as a public corporation, legally independent from the government, and will perform transferred undertakings efficiently and effectively. (The outline of this entity is contained in Attachment A hereto.)

- (2) Since this new organization does not fall within the central government entities covered by the Accounts Law, and is not provided for in the National Government Organization Law, nor in the Law establishing the Cabinet Office, Japan has decided to add this entity to Annex 3 regarding both supplies and services (under Group A in the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4") with the following thresholds and conditions, in order to maintain a balance of rights and obligations and a comparable level of mutually agreed coverage in this Agreement prior to this notification.

Although the threshold of 15,000 thousand SDR for construction services has been applied to the Postal Life Insurance Welfare Corporation in Group A of Annex 3, the new entity (Japan Post) shall have a threshold of 4,500 thousand SDR for construction services, which is the figure currently applied to the Postal Service Agency of the Ministry of Public Management, Home Affairs, Posts and Telecommunications in Annex 1.

- (3) The new entity will implement accounting rules as of 1 April 2003 to apply the relevant thresholds and procedures under the Agreement. The challenge procedures, as provided for in Article XX of the Agreement, will apply to procurement conducted by this entity, which will fall under the control of the Ministry of Public Management, Home Affairs, Posts and Telecommunications.

Attachment B² provides a summary of the modifications proposed by Japan to pages 1 and 3 of Annex 3, Annex 5 and the General Notes of Appendix I. Attachment C² indicates how Annexes 3 and 5 and the General Notes of Appendix I would appear after the proposed modifications have been made.

² Attachments B and C are in English only.

ATTACHMENT A
OUTLINE OF JAPAN POST
(TO BE ESTABLISHED AS OF 1 APRIL 2003)

A. PURPOSE

To comprehensively and efficiently carry out the work related to postal services, postal savings, postal money orders, postal transfers, postal life insurance, etc. as a government-owned public corporation, but which is financially self sufficient.

B. SCOPE OF THE WORK

- (1) Work related to postal services, postal savings, postal money orders, postal transfers and postal life insurance.
- (2) The sale of revenue stamps and the issuance of pensions and other treasury funds through entrustment from the State.
- (3) Other services (e.g. the invitation of subscriptions to government bonds, foreign currency exchange, the treatment of traveller's cheques).

C. ORGANIZATION

Head Office: Tokyo
Other Post Offices: 24,700 offices nationwide

D. RELATIONS WITH THE CENTRAL GOVERNMENT

The competent ministry for this organization is the Ministry of Public Management, Home Affairs, Posts and Telecommunications.

Committee on Government Procurement

Original: English

PROPOSED MODIFICATIONS TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)¹ of the GPA

The following notification from the Permanent Mission of Japan was received on 22 February 2003 with the request that it be circulated to the Parties to the Agreement on Government Procurement.

Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement (GPA), the Government of Japan wishes to notify the Committee on Government Procurement of the following rectifications of a purely formal nature with regard to Annex 3 of Appendix I of the Agreement (cf. WT/Let/425/Rev.1):

- to add "- National Statistics Center" after "- National Agency for Vehicle Inspection" in Group B in the "List of Entities"; and
- to add "- National Statistics Center" after "- National Agency for Vehicle Inspection" in Group B in the "List of Entities which procure the services, specified in Annex 4".

The above rectifications are the result of the following organizational changes relating to a central government entity listed in Annex 1. Such rectifications do not alter the level of the mutually agreed coverage provided in the Agreement:

- (1) Through Japan's central government reform process, a part of the undertakings, which have been carried out by an auxiliary organization of the Ministry of Public Management, Home Affairs, Posts and Telecommunications in Annex 1, are to be conducted by the National Statistics Center. In accordance with the Law Concerning the National Statistics Center (Law No. 219 of 22 December 1999) and its relevant ordinances, this organizational change will be implemented as of 1 April 2003. The

¹ Article XXIV:6(a) reads as follows: "Rectifications, transfers of an entity from one Annex to another or, in exceptional cases, other modifications relating to Appendices I through IV shall be notified to the Committee, along with information as to the likely consequences of the change for the mutually agreed coverage provided in this Agreement. If the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII."

National Statistics Center will be established as an Independent Administrative Institution, which shall be legally independent from the government, to perform transferred undertakings efficiently and effectively. (The outline of this entity is contained in Attachment A hereto.)

- (2) Since this new organization does not fall within the central government entities covered by the Accounts Law, and is not provided for in the National Government Organization Law, nor in the Law establishing the Cabinet Office, Japan has decided to add this entity to Annex 3 regarding both supplies and services (under Group B in the "List of Entities" and the "List of Entities which procure the services, specified in Annex 4"). In this way, the Agreement will apply to the National Statistics Center, with the same thresholds and conditions as stipulated in Annex 1 for central government entities.
- (3) This entity will have accounting rules as of 1 April 2003 to implement the relevant thresholds and procedures under the Agreement. Challenge procedures, as provided for in Article XX of the Agreement, will apply to procurement conducted by this entity, which will fall under the control of the Ministry of Public Management, Home Affairs, Posts and Telecommunications.
- (4) The above-mentioned rectifications are consistent with the relevant notification from Japan (GPA/W/129, dated 19 March 2001), which became effective on 5 September 2001 (WT/Let/400).

Attachment B² provides a summary of the modifications proposed by Japan to Annex 3 of Appendix I. Attachment C² indicates how Annex 3 of Appendix I would appear after the proposed modifications have been made.

² Attachments B and C are in English only.

ATTACHMENT A

**OUTLINE OF THE NATIONAL STATISTICS CENTER
(TO BE ESTABLISHED AS OF 1 APRIL 2003)**

A. PURPOSE

The purpose of the National Statistics Center is to tabulate the data from censuses and surveys concerning the fundamental issues of the nation, for example a population census, and to make an integral research on statistical techniques with the aim of contributing to securing the truth behind statistics and to improving statistical techniques as a whole.

B. SCOPE OF THE WORK

- (1) To tabulate the data form censuses and surveys, for example a population census, with regard to the fundamental issues of the nation.
- (2) To tabulate the data from surveys through entrustment from the administrative bodies of the nation and the local governments.
- (3) To accumulate and process the necessary data concerning the compilation and utilization of statistics.
- (4) To do research on statistical techniques and other related affairs with regard to items (1) to (3) above.

C. ORGANIZATION

Head Office: Tokyo
Branch Offices: None

D. RELATIONS WITH THE CENTRAL GOVERNMENT

The competent ministry for this organization is the Ministry of Public Management, Home Affairs, Posts and Telecommunications.
