Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)

The following notification from the Permanent Mission of Japan was received on 26 November 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the Government of Japan wishes to notify the Committee on Government Procurement of the following rectification of a purely formal or minor nature to the Lists in Annex 3, Appendix I for Japan of the Agreement on Government Procurement:

Delete: • Mutual Aid Association of Private School Personnel • and • Japan Private School Promotion Foundation • from • List of Entities • and • List of Entities which procure the services, specified in Annex 4 • respectively.

Add: • Promotion and Mutual Aid Corporation for Private Schools of Japan • to each of the lists mentioned above.

¹Article XXIV:6(a) provides that •if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII•.

This rectification is based on the fact that the •Mutual Aid Association of Private School Personnel• and •Japan Private School Promotion Foundation• are scheduled to be merged to form the •Promotion and Mutual Aid Corporation for Private Schools of Japan• on 1 January 1998 and it will not alter the current coverage of the Agreement on Government Procurement with respect to Japan.

Communication from Norway

The following communication from the Permanent Mission of Norway was received on 18 November 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement. In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹

On the occasion of the deposit of the instruments of accession by the Government of Singapore to the Agreement on Government Procurement on 20 September 1997, Norway hereby notifies the WTO that Norway's General Note 1 of its Appendix I should be amended as follows: •Singapore• should be added as regards the award of contracts by entities listed in Annex 3, with respect to the suppliers and service providers in the electricity sector. We kindly ask you to inform the Members of the Committee on Government Procurement that Norway's General Note 1 should be amended accordingly (see Annex).

¹Article XXIV:6(a) provides that •if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII•.

RECTIFICATIONS OR MODIFICATIONS REGARDING
PUBLICATIONS
IN APPENDICES II, III AND IV OF THE AGREEMENT ON
GOVERNMENT PROCUREMENT (1994)

Notification from Canada pursuant to Article XXIV:6(a)

The following notification from the Permanent Mission of Canada was received on 31 October 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹

Pursuant to the provisions set out in Article XXIV:6(a) - Rectifications or Modifications, Canada hereby notifies the Committee on Government Procurement of its intention to modify information regarding publications in Appendices II, III and IV of the Agreement on Government Procurement (1994).

As stated at the meeting of the Committee on 21 May 1997, a new contractor has been selected to operate the Government's national electronic tendering service. The new contractor, Cebra Inc., took over from Information Systems Management (ISM) Corporation on 27 October 1997. The name of the national electronic tendering service has changed from •Open Bidding Service• to

¹Article XXIV:6(a) provides that •if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII•.

•MEXX•. MEXX is a coined name, the initials do not stand for anything and the name is spelled the same in any language.

Accordingly, Canada intends to modify information regarding publications in Appendices II, III and IV of the Agreement on Government Procurement (1994) as set out below:

- for Appendix II, concerning publications used for the publication of notices of intended procurements and of post-award notices, the reference •Open Bidding Service, ISM Publishing• should be deleted and replaced by •MEXX, Cebra Inc.;*
- for Appendix III, concerning publications used for the publication annually of information on permanent lists of qualified suppliers in the case of selective tendering procedures, the reference •Open Bidding Service, ISM Publishing• should be deleted and replaced by •MEXX, Cebra Inc.; and*
- for Appendix IV, concerning publications used for the publication of administrative rulings and procedures, the reference •Open Bidding Service, ISM Publishing• should be deleted and replaced by •MEXX, Cebra Inc..*

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF KOREA

Notification from the Republic of Korea under Article XXIV:6(a)

The attached notification from the Permanent Mission of the Republic of Korea was received on 16 October 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹*

I am writing to you concerning the modifications to Appendix I of the Government Procurement Agreement, which follow on from the reorganization of Korean government agencies and revision of the relevant law.

Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement, the Government of the Republic of Korea wishes to notify the Committee on Government Procurement of the following rectifications of a purely formal nature relating to Annex 1 in Appendix I of the WTO Agreement on Government Procurement. As is clear from the following

*English only

¹Article XXIV:6(a) provides that if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII.

explanation, none of these rectifications alters the coverage which has mutually been agreed upon.

1) *Delete •Economic Planning Board• and •Ministry of Finance•. Add •Ministry of Finance and Economy•, instead. This rectification is based on the fact that the •Economic Planning Board• and the •Ministry of Finance• have been merged to form the •Ministry of Finance and Economy•.*

2) *Delete •Ministry of Agriculture, Forestry and Fisheries•, •Fisheries Administration• and •Korea Maritime and Port Administration•. Add •Ministry of Agriculture and Forestry• and •Ministry of Maritime Affairs and Fisheries•, instead, respectively. These rectifications are based on the fact that the •Fisheries Administration•, the •Korea Maritime and Port Administration• and the Bureau of Fisheries of the •Ministry of Agriculture, Forestry and Fisheries• have been merged to form the •Ministry of Maritime Affairs and Fisheries• and that the remaining parts of the •Ministry of Agriculture, Forestry and Fisheries• have been replaced by the •Ministry of Agriculture and Forestry•.*

3) *Delete •Ministry of Construction• and •Ministry of Transportation•. Add •Ministry of Construction and Transportation•, instead. This rectification is based on the fact that the •Ministry of Construction• and the •Ministry of Transportation• have been merged to form the •Ministry of Construction and Transportation•.*

4) *Delete •Industrial Advancement Administration•. Add •Small and Medium Business Administration•, instead. This rectification is based on the fact that the •Industrial Advancement Administration• has been replaced by the •Small and Medium Business Administration•.*

5) *Add •National Maritime Police Agency (except purchases for the purpose of maintaining public order, as provided in Article XXIII of the Code)•. This rectification is based on the fact that the •National Maritime Police Agency• has been separated from the •National Police Administration•.*

6) *Delete •Ministry of Health and Social Affairs•. Add •Ministry of Health and Welfare•. This rectification is based on the fact that the •Ministry of Health and Social Affairs• has been renamed as the •Ministry of Health and Welfare•.*

7) *Korea newly enacted •the Act Relating to Contracts to which the State is a Party•, in line with the GPA, as the basis regulation for government procurement. Thus the Budget and Account Law shall be replaced by •the Act Relating to Contracts to which the State is a Party• in Note 3 to Annex 1.*

ATTACHMENT

Korea's New List of Central Government Entities (Annex 1)

- Board of Audit and Inspection
- Prime Minister's Secretariat
- Office of Administrative Coordination
- First Minister of Political Affairs
- Second Minister of Political Affairs

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF JAPAN

Notification from Japan under Article XXIV:6(a)

The following notification from the Permanent Mission of Japan was received on 20 October 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the Government of Japan wishes to notify the Committee on Government Procurement of the following rectification of a purely formal or minor nature to the Lists in Annex 3, Appendix I for Japan of the Agreement on Government Procurement:

*Delete:•Maritime Credit Corporation (e)• and
•Rail Development Fund• from •List of Entities• and •List of Entities which
procure the services, specified in Annex 4•,
respectively.*

*Add:•Corporation for Advanced Transport & Technology (e)• to each of
the lists mentioned above.*

¹Article XXIV:6(a) provides that •if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII•.

This rectification is based on the fact that the •Maritime Credit Corporation• and the •Rail Development Fund• have been merged to form the •Corporation for Advanced Transport & Technology• since 1 October 1997 and it does not alter the coverage which has been agreed upon among the Parties to the Agreement on Government Procurement.

MODIFICATIONS TO APPENDIX I OF SWITZERLAND

Communication from Switzerland

The following communication from the Permanent Mission of Switzerland was received on 14 October 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement. In accordance with Article XXIV:6(a), any Party with an objection to the proposed changes is invited to notify the Secretariat within 30 days from the date of issue of this document.¹

On the occasion of the deposit of the instruments of accession by the Government of Singapore to the Agreement on Government Procurement on 20 September 1997, Switzerland hereby notifies the WTO that Switzerland's General Note 1 of its Appendix I should be amended in the following way: Singapore should be added as regards the award of contracts by entities listed in Annex 3, with respect to the suppliers and service providers in the water and electricity sectors. We kindly ask you to inform the Members of the Committee on Government Procurement before 20 October 1997 that Switzerland's General Note 1 should be amended accordingly (see Annex).

¹Article XXIV:6(a) provides that if the rectifications, transfers or other modifications are of a purely formal or minor nature, they shall become effective provided there is no objection within 30 days. In other cases, the Chairman of the Committee shall promptly convene a meeting of the Committee. The Committee shall consider the proposal and any claim for compensatory adjustments, with a view to maintaining a balance of rights and obligations and a comparable level of mutually agreed coverage provided in this Agreement prior to such notification. In the event of agreement not being reached, the matter may be pursued in accordance with the provisions contained in Article XXII.

Committee on Government Procurement

*QUESTIONNAIRE ON INFORMATION TECHNOLOGY
IN GOVERNMENT PROCUREMENT*

Response by Hong Kong, China

Addendum

The attached communication contains the replies from the Hong Kong Economic and Trade Office to the questionnaire on Information Technology in Government Procurement contained in document GPA/W/24, dated 22 August 1996.

REPLIES BY HONG KONG, CHINA TO THE QUESTIONNAIRE ON
INFORMATION TECHNOLOGY

1) *Could delegations give a brief description of any steps taken or planned to introduce information technology into public procurement? If so, does this cover contracts which are covered under the 1994 Agreement? At all levels of government? In the event that delegations are not considering introducing information technology into public procurement, could they explain the reasons?*

The Government of the HKSAR has established several Internet homepages to provide information on procurements conducted by all central and subcentral entities. Information provided includes forecast of public works tenders, tender notices, procurement procedures and contract awards. The Hong Kong Housing Authority, an Annex 3 entity, also maintains an Internet website for the dissemination of tender notices and for the collection of bids relating to procurement of computers. Most of the tenders covered by the WTO GPA are publicized in these homepages.

2) *What function(s) would information technology serve in such systems and who will be the users?*

Information technology is currently being used mainly for notification of tender invitation and dissemination of tender information. Entities are considering the feasibility to extend the use of information technology to functions such as dissemination of tender documents, submission of tenders, communication of clarifications on the tender documents, etc.

All Internet subscribers can access the information through the Internet. All interested suppliers could contact the officers stated in tender notices for a set of the tender documents and any additional information on the tenders.

3) *Could delegations describe the technical aspects of the systems in use or planned? In particular as regards infrastructure/hardware-software and its options/standards?*

The homepages are accessible by computers of configuration 386 or above through modems. Connection software is provided by Internet Service Providers (ISP).

4) *Could delegations describe any limitations affecting access to information available and use of systems? How wide is potential access to interested suppliers? What are the access possibilities for suppliers of other signatory countries? What possible obstacles to access might arise for suppliers in other signatory countries?*

The access to the homepages is open to suppliers all over the world, regardless of whether they are from signatories of the WTO GPA or not.

5) For those Parties who use databases which list government procurement opportunities:

(i) What are the names of their databases?

Names of the Internet homepages are:

Finance Bureau (FB) Homepage
(<http://www.info.gov.hk/fb>)

Works Bureau (WB) Homepage
(<http://www.wb.wpelb.gov.hk>)

Government Supplies Department (GSD) Homepage
(<http://www.info.gov.hk/gsd/tender.htm>)

Printing Department (PD) Homepage
(<http://www.info.gov.hk/pd>)

Urban Services Department (USD) Homepage
(<http://www.usd.gov.hk>)

Regional Services Department (RSD) Homepage
(<http://www.info.gov.hk/rsd/index.htm>)

Housing Authority (HA) Homepage
(<http://www.info.gov.hk/hd/index.htm>)

Kowloon-Canton Railway (KCRC) Homepage
(<http://www.kcrc.com>)

(ii) How long have the databases been operational and how many suppliers use the databases?

The GSD Homepage has been in operation since December 1995 with approximately 6,000 accesses to the database per month.

The FB Homepage, WB Homepage, PD Homepage have been in operation since 1996. No statistics on the number of accesses to these Homepages has been kept.

(iii) Is a fee charged to suppliers using the system? If so, how much, and what is included in the fee?

Access to these Homepages is free of charge.

(iv) Can suppliers obtain tender documentation electronically? If so, how?

Tender documentation in electronic format is not yet available. Interested suppliers can, however, request for hard copies of tender documents by email or by fax. In some cases, tender specification in CD-ROM will be issued to consultants, contractors and tenderers on a project basis. A special team is now working on the feasibility of using the Internet and related technologies for the dissemination of tender documentation and receipt of bids.

(v) How is information on the databases organized?

The tender information is grouped according to the respective closing dates and procuring entities. A brief outline of the procurement information would be listed out for selection by suppliers.

(vi) Do the databases offer any other features?

No.

(vii) What is the approximate number of procurement opportunities listed on the databases annually?

Approximately 800 procurement opportunities are listed annually on GSD's Homepage. No statistics were kept on the number of procurement opportunities published in other homepages.

(viii) Are the systems managed by the government or a private company?

The Homepages are managed and updated by the respective bureaux and departments of the HKSAR Government.

(ix) Can Parties' databases be interrogated using international standards, such as SQL - Standard Query Language?

Not at the moment.

(x) Are all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - also available on databases? If so, do such notices contain at least the minimum information required to be published under Articles IX and XVIII:1?

Tender notices and tender awards publicized on the Internet contain all the information required to be published under Articles IX and XVIII:1 of the Agreement.

(xi) How are Agreement-covered notices identified?

For those purchases that are covered by the Agreement, the tender information will include a remark stating that the tender is covered by the Agreement.

(xii) To what extent does each type of notice contained in databases conform to a standard structure?

Standard formats are being used as far as possible so as to ensure that all necessary information is included.

(xiii) Is any particular classification used in such notices to describe purchases and, if so, what classification?

No.

(xiv) Where databases exist in a non-WTO language, to what extent are notices and information summarized in a WTO language?

The Homepages are in English which is one of the official languages of the WTO.

6) For those Parties who are involved in action in the area of electronic commerce:

(i) Please provide full information on projects and plans with regard to electronic commerce.

The Government Supplies Department (GSD) which is the central procurement agent for the Government of the HKSAR is currently conducting a feasibility study on electronic commerce. A Project Team was set up in May 1997 to conduct an Internet Pilot study on GSD's procurement processes. Objectives of the study are:

-to identify means of improving service delivery and information exchange between GSD, its suppliers and government departments using Internet and related technologies;

-to enhance the efficiency of GSD's procurement process; and

-to build the foundation for broader development of Internet usage within Government.

The Works Bureau which oversees the public works projects is planning to make use of information technology to facilitate tenders for works contracts. The trial project will include four phases:

(1) All tender notices and awards on works contracts of the HKSAR will be publicized on the WB Homepage;

(2)contract documents now in hard copies will be converted into the appropriate software format;

(3)trial on computerization of tender processing will be conducted;

(4)a study on tendering through the Internet will be conducted.

(ii)Could those Parties who have experience with electronic commerce provide information on such experiences?

N.A.

MODIFICATIONS TO APPENDICES I-IV OF THE EUROPEAN
COMMUNITY

Addendum

The following communication, dated 3 September 1997, has been received from the Permanent Mission of the United States to the WTO with the request that it be circulated to the Parties to the Agreement on Government Procurement.

I write to you regarding the recent communication from the European Community regarding modifications to its Appendices I-IV of the Agreement on Government Procurement. This communication was circulated by the Secretariat on 13 August 1997 (GPA/W/51), providing 30 days for other Parties to object prior to the modifications becoming effective. The United States requires more time to review these detailed modifications and, therefore, cannot agree to their taking effect upon expiration of the 30-day review period. We will endeavour to complete our review prior to the next meeting of the Committee on Government Procurement on 29 September 1997.

MODIFICATIONS TO APPENDIX I OF THE EUROPEAN COMMUNITY

Notification from the European Community under Article XXIV:6(a)

The attached notification from the Permanent Delegation of the European Community was received on 27 August 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), the modifications relating to Appendix I will become effective provided there is no objection within 30 days from the date of issue of this document.

I am writing to you concerning modifications to Appendix I of the Government Procurement Agreement, which follow on from the agreement reached between the European Community and the State of Israel which came into force on 1 August 1997.¹ Article XXIV of the Agreement contains the provisions on its entry into force and it is in conformity with paragraph 6(a) of Article XXIV that I hereby inform you of modifications to the EC General Notes in Appendix I of the Agreement.

In accordance with our understanding with the Government of the State of Israel you should receive a parallel communication from the Delegation of the State of Israel. The enclosed communication should be circulated to the Parties of the Committee on Government Procurement in a document dated 28 August 1997 so that the modification will become effective 30 days from that date provided there is no objection.

¹Published in the Official Journal of the European Communities L202/85 of 30 July 1997.

ANNEX

Communication from the European Community with Respect to Modifications to
Appendix I
of the Agreement on Government Procurement

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the European Community submits to the Committee on Government Procurement the following modification to the EC General Notes in Appendix I of the Agreement:

In General Note 1, second indent, letter (e) to read:

- (urban transport) to the suppliers and service providers of Canada, Japan, Korea and the USA; to the suppliers and service providers of Israel, as regards bus services•.*

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF ISRAEL

Notification from Israel under Article XXIV:6(a)

The following notification from the Permanent Mission of Israel was received on 25 August 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement. In accordance with Article XXIV:6(a), the modifications relating to Appendix I will become effective provided there is no objection within 30 days from the date of issue of this document.

I am writing to you concerning certain modifications to Appendix I of the Government Procurement Agreement, which follow from an agreement reached between Israel and the European Community. In conformity with paragraph 6(a) of Article XXIV, I hereby inform you of the following modifications to Israel's Annexes 1, 3 and 4 in Appendix I of the Agreement.

1) *Amend Note to Annex 1 regarding medical dressings as follows:*

Medical dressings (bandages, adhesive tapes excluding gauze bandage and gauze pads).

2) *In Annex 3, relabel Note (3) as Note (2a).*

3) *Add to the List of Entities in Annex 3:*

All entities operating in the field of urban transport, except those operating in the field of bus services (2b).

4) *Add Note (2b) to Annex 3 as follows:*

With regard to procurement by entities operating in the field of urban transport, except those operating in the field of bus services, this Agreement shall apply only to goods and services, including construction services, of the European Community.

Israel is willing to negotiate the opening of procurement by entities operating in the field of urban transport, except those operating in the field of bus services, to other Parties to the Agreement under the condition of reciprocity.

5) *Add the following services to the list of Annex 4:*

6112, 6122, 633, 886 Maintenance and repair services

874, 82201-82206 Building-cleaning services and property management services

88442 Publishing and printing services on a fee or contract basis

Committee on Government Procurement

RESPONSES TO THE REQUEST FOR INFORMATION PURSUANT TO
PARAGRAPHS 1 AND 3 OF ARTICLE XIX OF THE
AGREEMENT ON GOVERNMENT PROCUREMENT

Communication from the United States

The following responses to the request for information by the Government of Japan pursuant to paragraphs 1 and 3 of Article XIX of the Agreement on Government Procurement, dated 8 August 1997, have been received from the Permanent Mission of the United States with the request that they be distributed to the Members of the Committee on Government Procurement.¹

The Government of the United States provides the following responses to the questions posed by the Government of Japan in its request for information pursuant to paragraphs 1 and 3 of Article XIX of the Agreement on Government Procurement (document GPA/W/39).

The Government of Japan, pursuant to paragraphs 1 and 3 of Article XIX of the GPA, hereby requests the Government of the United States to provide the following information. This information is needed to determine whether the relevant provisions of the Act are consistent with the requirements of the GPA.

1.A copy of the full text of •An Act Regulating State Contracts with Companies Doing Business with or in Burma (Myanmar)• enacted on 25 June 1996 by the State of Massachusetts and a copy of the latest restricted purchase list issued by the State.

¹A copy of the Guide for State Procurement Officials• Application of the WTO Agreement on Government Procurement, a list of frequently asked questions by state governments on the implementation of the WTO Agreement on Government Procurement and answers to these are available for consultation in Office 3014.

A copy of the text of the Act is attached.

2.Information on a method of publication of the Act as required by paragraph 1 of Article XIX of the GPA.

Article XIX of the Government Procurement Agreement (GPA) requires that each Party promptly publish any law, regulation, judicial decision, administrative ruling of general application, and any procedure regarding government procurement covered by this Agreement, in the appropriate publications listed in Appendix IV and in such a manner as to enable other Parties and suppliers to become acquainted with them.

Accordingly, the United States has specified in Appendix IV to the GPA that laws, judicial decisions, administrative rulings and procedures regarding government procurement for entities listed in United States Annexes 2 and 3 are available through relevant state and local publications or directly from the listed entities. The laws and regulations governing procurement by the Commonwealth of Massachusetts are contained in Chapters 7 and 29 of the Massachusetts General Laws and the Code of Massachusetts Regulations (801 CMR 21.00). In addition, the Executive Office for Administration and Finance for the Commonwealth of Massachusetts publishes a Policies and Procedures Handbook.

The law enacted by the Commonwealth of Massachusetts (Act Regulating State Contracts with Companies Doing Business with or in Burma [Myanmar]) is codified in section 22 of Chapter 7 of the Massachusetts General Laws. In addition, a summary of the subject law as well as the restricted purchase list established pursuant to the law are published on the internet site for the Commonwealth of Massachusetts Executive Office for Administration and Finance, Operational Services Division. Please refer to the Operational Services Division's internet Home Page at <http://www.magnet.state.ma.us/osd>. Furthermore, a copy of the text of the Act may be obtained at the State House Book Store located at the Massachusetts State House, Boston, Massachusetts 02133. The telephone number for the book store is (617) 722-2834.

3.Information on procedures for renewing the restricted purchase list and the method of publication of this list as required by paragraph 1 of Article XIX of the GPA.

Article XIX of the GPA requires that each Party be prepared, upon request, to explain to any other Party its government procurement procedures.

The restricted purchase list (attached) is divided into four categories: US Companies, non-US companies, the subsidiaries of US companies and the subsidiaries of non-US companies. The restricted purchase list is published on the internet site for the Commonwealth of Massachusetts Executive Office for Administration and Finance, Operational Services Division. Please refer to the Operational Services Division's internet Home Page at

<http://www.magnet.state.ma.us/osd>. The list was updated on 7 March 1997 and will be updated periodically.

4. Information on any communication or guidance between the United States federal agencies and the state agencies of Massachusetts regarding the adoption of procurement procedures and a restricted purchase list as stipulated in the Act.

The United States Government worked closely with state governments throughout the negotiations on the Government Procurement Agreement (GPA) and continues to provide guidance on implementation of the GPA. The United States Government produced and provided to the 37 states listed in the United States Annex 2 a guide for state government procurement officials to application of the GPA. In addition, representatives of the United States Government regularly conduct briefings for state government officials, including the National Governors' Association, the National Conference of State Legislators and the National Association of Attorneys General, and regularly attend conferences held by the National Association of State Procurement Officials.

5. Information on bid challenge procedures available regarding procurement by the executive offices of the State of Massachusetts.

With respect to procurements by Massachusetts executive offices, all suppliers and potential suppliers have access to the court system to challenge procurement procedures or decisions. In addition, suppliers may be given the opportunity for a debriefing during which they may discuss strengths and weaknesses of their proposal with the procuring department.

6. An example of tender documentation stipulating, in accordance with paragraph 2(h) of Article XII of the GPA, the criteria for awarding the contracts to be used in government procurement covered by the Act.

Information forthcoming.

7. An example of a case, if any, in which any tenderer on the restricted purchase list has actually been excluded from consideration for the award of a contract based on Section 22H(a) of the Act, or has been awarded a contract in spite of the legislation.

We are not aware of any cases where a supplier has been excluded from consideration for the award of a contract based on Section 22H(a) of the Act.

8. Information on an explanation concerning the consistency of the requirements under the Act with the following provisions of the GPA:

(a) Article III, paragraph 1

Under the Act, is a supplier of a foreign country which is a Party to the GPA on the restricted purchase list, in terms of requirements for qualifications and

award of the contracts, given a treatment less favourable than that accorded to non-listed suppliers either of the United States or of another party to the GPA?

(b) Article III, paragraph 2(a)

Under the Act, is a locally-established supplier on the restricted purchase list, who is the majority-owned subsidiary of a person whose principal place of business is Myanmar, subject to a less favourable treatment?

(c) Article VIII, paragraph (b)

Does the Act impose on a tendering company conditions which are not essential to ensure the suppliers' capability to fulfil the contract in question?

(d) Article X, paragraph 3

Does the Act virtually limit the number of suppliers qualified to participate in procurement for the reasons other than the efficient operation of the procurement system?

(e) Article XIII, paragraph 4(b)

Pursuant to Sections 22G and 22H(d) of the Act, may the entity not award the contract to the supplier on that list who submitted the lowest bid if there is a responsive and responsible bid which is no more than 10 per cent greater than that lowest bid?

At the request of Japan and the European Community, the United States participated in consultations on 22 July under the Government Procurement Agreement (GPA) and the Understanding on Rules and Procedures Governing the Settlement of Disputes regarding the Massachusetts law. During the consultations, the delegation of Japan incorporated by reference the questions submitted by Japan under Article XIX of the GPA. Because the Massachusetts law is currently the subject of dispute settlement consultations, the United States is presently reviewing these issues and is not in a position to provide responses to these questions at this time.

9. Information on what specific action, if any, the United States Federal Government has taken, or intends to take, in response to:

(a) the current legislation;

(b) a case, if any, in which the United States Federal Government identifies inconsistency with any provision of the GPA.

The United States regrets that Japan and the European Community took the action of requesting dispute settlement consultations regarding the Massachusetts law. Given the shared concerns of Japan, the European Community and the United States regarding the flagrant disregard for human

rights demonstrated by the Burmese regime and our shared interest in encouraging democracy there, we were very disappointed that this action was taken. The United States continues to believe that only by taking unified action to reinforce the international community's message that human rights reform in Burma is imperative will we accomplish our shared objective of encouraging representative government in Burma.

Nevertheless, because the concerns of Japan and the European Community have been brought to the attention of the United States, we are continuing to work with Massachusetts officials to address such concerns. Representatives of the United States Government have had frequent consultations with Massachusetts officials in the Governor's Office, the Massachusetts Attorney General's Office as well as with key Massachusetts legislators.

10. Updated information on similar state laws and regulations enacted or drafted in any other states, or any state legislation to be applied to suppliers doing business with or in any country other than Myanmar.

We are not aware of any laws that have been enacted by state governments other than the Commonwealth of Massachusetts regarding procurement from suppliers doing business with or in Burma.

Committee on Government Procurement

APPLICATION FOR ACCESSION TO THE AGREEMENT ON
GOVERNMENT

PROCUREMENT AND REQUEST FOR OBSERVER STATUS IN THE
COMMITTEE ON GOVERNMENT PROCUREMENT

Panama

The following communication, dated 15 August 1997, has been received from the Permanent Mission of the Republic of Panama.

The Permanent Mission of the Republic of Panama to the WTO presents its compliments to the Secretariat of the World Trade Organization and has the honour to communicate the interest of the Government of the Republic of Panama in acceding to the Agreement on Government Procurement (1994), and in participating in the work of the Committee on Government Procurement.

With a view to the negotiations to be held between the Government of the Republic of Panama and the signatories to the aforementioned Agreement, the Government of the Republic of Panama requests the members of the Committee on Government Procurement to grant it observer status in the Committee.

The Government of the Republic of Panama's initial offer was submitted in document GPA/SPEC/3.

Committee on Government Procurement

MODIFICATIONS TO APPENDICES I-IV OF THE EUROPEAN
COMMUNITY

Communication from the European Community

The attached modifications were communicated by the Permanent Delegation of the European Commission on 3 July and 30 July 1997 with the request that they be circulated to the Parties to the Agreement on Government Procurement (1994).

In accordance with Article XXIV:6(a), these modifications relating to Appendices I-IV will become effective provided there is no objection within 30 days from the date of issue of this document.

I am writing to you concerning the updating of Appendices I to IV of the Government Procurement Agreement for the European Communities, as agreed by the Committee on Government Procurement at its meeting on 24 February 1997 (GPA/M/5 of 11 April 1997).

I have the honour to notify to you herewith the updated versions of these documents.

Explanatory Note

Subject: Appendices of the European Community to the Agreement on Government Procurement.

1. General presentation of all the Appendices in three languages (English, French, Spanish) as the three official languages of WTO are also official languages of the EC.

2. No substantive change in Appendices II to IV. The publications from Austria, Finland and Sweden, however, have been integrated into the Community Appendices, which had not been done in document GPA/W/32.

3. Appendix I, Annex I

-European Community entities: list unchanged.

-State entities: the changes made are the result of ministerial reorganization in certain member States. This does not extend or diminish the European Community's offer.

Austria: bilingual presentation. Changes due to ministerial reorganization.

Belgium: changes due to ministerial reorganization.

Denmark: changes due to ministerial reorganization.

Germany: bilingual presentation. Changes due to ministerial reorganization.

Spain: changes due to ministerial reorganization.

Finland: no changes.

France: no changes.

Greece: bilingual presentation.¹ Changes due to ministerial reorganization.

Ireland: no changes.

Italy: bilingual presentation. Changes due to ministerial reorganization.

Luxembourg: changes due to ministerial reorganization.

Netherlands: bilingual presentation. Changes due to ministerial reorganization.

¹(European Community submission did not allow this.)

Portugal: bilingual presentation. Changes due to ministerial reorganization.

Sweden: changes due to ministerial reorganization.

United Kingdom: changes due to ministerial reorganization and privatization.

The list of equipment purchased by Ministries of Defence has been adapted in order to take account of the Austrian and Swedish lists. It is presented in three languages.

4. *Appendix I, Annex 2*

The definition of a public law body within the meaning of Directive 93|37 of the European Community is included (in comparison with document GPA|W|32, which does not include this definition).

The orientation list attached to the previous version of the annexes can be found in Annex I to this Directive. A copy of the Annex to the Directive is attached. Nevertheless, the list is for guidance. What counts is the definition of a public law body.

If the Annex to this Directive is amended or modified, the Community will notify the changes in due time.

5. *Appendix I, Annex 3*

Paragraph (e) of the list of entities has been amended in order to clarify coverage. This paragraph only covered urban transport (in reference to Annex VII of EC Directive 93|38), but the former wording could be misleading. The new wording proposed clarifies this point.

The relevant annexes to Directive 93|38 are attached for information. These lists are however only for guidance and the definitions that count are those in Annex 3. If the Annexes to this Directive are amended or modified, the Community will notify the changes in due time.

6. *Appendix I, Annex 4*

Version in three languages. The substance remains unchanged.

7. *Appendix I, Annex 5*

The French and Spanish versions only reflect the titles of groups in Division 51, CPC. In any event, the offer does not change.

Committee on Government Procurement

INFORMATION TECHNOLOGY AND PUBLIC PROCUREMENT

Contribution from the European Community

The following communication from the Permanent Delegation of the European Commission, dated 30 July 1997, has been received with the request that it be distributed to the members of the Committee.

1) Introduction

This document presents the EC views on some aspects of information technology linked to public procurement in order to contribute to the Committee's debate on this issue. It builds on the papers previously tabled by the Community and other delegations, as well as the Secretariat and seeks to stimulate debate on certain issues which to date have been less fully addressed.

In particular, the paper will focus on two aspects. It is true that the use of information technology advances can help to improve the present procurement system and that the present rules do not take sufficient account of those advances. However, the debate does not necessarily end at that point. A wider use of electronic tools could put into question the traditional approach of government purchasing, and reflection on this issue is also needed. Finally, one cannot forget that non-discrimination is a fundamental principle of the GPA, and its respect should be ensured.

2) Use of electronic tools to improve the current government procurement system

Today's information technology advances could provide the tools to create significant improvements in providing relevant information about procurement opportunities to potential suppliers.

Advertising opportunities and the transmission of documents between bidders and purchasers are generally considered as the main areas in which information technology can play a role. However, it is also widely recognized that the various legal frameworks are not yet adapted to the use of information technology. As regards the GPA, this has been already highlighted by the Secretariat's paper of 22 August 1996 and the Canadian non-paper recently distributed. It should also be noted that the full benefit of this technology could only be achieved if agreement on harmonized standards for coded information can be reached. This would facilitate the use of search devices to browse through the information contained in the different databases. Furthermore, the EC would like to suggest the use of a harmonized multilingual procurement vocabulary system to describe the purchases, as has been done at EC level with the CPV. Security of data transmission also needs to be ensured.

Two of the categories defined in the Secretariat's paper are of particular interest. They relate to the wider use of selective tendering and the implications of information technology for the deadlines laid down in the Agreement. As regards the use of selective tendering, information technology could put into question the present scheme. This issue will be dealt with in the following section.

It has been stated that deadlines could be shortened to take account of the increasing use of information technology. As it is recognized by Article XI of the GPA, any prescribed time-limit shall be adequate to allow suppliers to prepare and submit tenders. Information technology advances certainly help to shorten the time for submission, publication and dissemination of tenders. However, the time needed to prepare tenders is likely to remain the same in most cases. As long as submission by normal mail and electronic tools coexists, it could be discussed if entities using electronic transmission should be offered the advantage of shorter deadlines.

3) New schemes of government purchasing as a result of wide use of electronic tools

Information technology could also revolutionize the whole way of doing business between purchasing entities and suppliers. This path opens the way to full electronic tendering or electronic commerce systems. It is not only in the context of relations between purchasers and suppliers that changes are to be expected. In addition, new electronic tools provide opportunities for purchasing bodies to cooperate via the exchange of information, ideas and experiences. This option would require further consideration on security aspects, interoperability of systems, as well as on legal questions such as the acceptance of digital signatures.

The extent to which classic rules of public procurement are able to face these new challenges needs discussion. Some examples are provided below which show that the traditional behaviour of contracting entities inviting suppliers to tender could be put into question by new technological opportunities. These examples could serve as the basis for debate in the Committee.

The traditional view of public procurement is a procedure in which the purchasing entity advertises a particular contract and waits for bids to be submitted, in other words, the potential supplier searches for a purchaser. However, information technology could also facilitate the reverse approach, whereby the purchasing entity searches actively for suitable suppliers in order to increase competition. This is particularly linked to qualification systems. In the traditional approach, qualification systems are demand-driven, at the request of contracting entities or public authorities. However, the use of information technology for qualification could facilitate the development of different approaches. On the one hand, lists of selected suppliers could be made accessible to other contracting entities, leading to the establishment of effective and efficient harmonized systems. On the other hand, one should also not exclude the possibility that suppliers themselves may wish to create a sort of private qualification system providing a quality label and competing among themselves. Therefore, information technology allows contracting entities to increase competition among qualified suppliers or among different systems of qualification. In that sense, a key issue for debate should be the mutual-recognition principle if discrimination is to be avoided.

Not only could information technology help contracting entities to identify suitable suppliers, it could also facilitate contracting entities' direct purchases. Similarly to normal markets, virtual procurement markets could be imagined. In such a framework, entities would actually directly purchase in an electronic market where the system would identify, based on supplier information available on the World Wide Web, the best offer. Information technology could help to identify opportunities and where to find the best value for money. This kind of virtual market could be quite efficient for purchases of off-the-shelf products, where price is the major criterion for the award of the contract and the contract value is low.

4) Ensuring non-discrimination

A key issue for the Committee's debate on the use of information technology systems in public procurement remains how to ensure the transition to a streamlined, less cumbersome and more focused procurement process in such a way that all players, whether purchasers or suppliers, will benefit from the use of new electronic tools in government procurement. In particular, the use of information technology should promote the aims of open, non-discriminatory and efficient government procurement.

As it is stated in the GPA Secretariat's paper of 10 May 1996 (GPA|W|15), the increased flow of information, if not properly handled, could put foreign suppliers at a disadvantage, even where formally applied on a non-discriminatory basis.

At present, non-discrimination should address at least the questions of the ease of access to information sources (including establishing links between databases and ensuring interoperability) and the ease of use of information tools (including search devices, common nomenclatures ...).

There is another element which has to be taken into account in the use of advanced information technology tools. Indeed, one should avoid that it creates or widens the gap between entities and suppliers in particular SMEs, which can effectively operate in the information age, and those which cannot, thus creating a competitive advantage in favour of the former group. This gap also appears at international level given that not all countries are at the same level of social and technological development with respect to the information society. Therefore, consideration would have to be given as to how to take account of the differing levels to which GPA members make use of information technology, as well as the potential needs of newly acceding members in the future.

5) Conclusions

The European Community is convinced that a political discussion on the role information technology should play in the review process of the Agreement is necessary before the Committee considers specific changes to existing articles of the Agreement. This debate will have to focus on ensuring non-discrimination.

The choices made at this stage will determine the extent to which the aim of simplifying the Agreement in order to make it more attractive to signatory candidates will be attained.

This paper mentions the major technical and legal questions arising with the use of information technology in government procurement. The European Community requests that the Committee deal with these points in its discussions on these issues. The EC will at that stage table concrete solutions for these questions.

Committee on Government Procurement

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS
EXPRESSED

IN NATIONAL CURRENCIES FOR 1996/1997

Hong Kong, China

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 1996-1997.

The information notified by Hong Kong, China is reproduced below.

1) Calculation of Threshold Figures in National Currency

Annex 1 Entities	Threshold value (SDR)	Threshold value in HK Dollar
1. Goods and services other than construction services	130,000	1,474,000
2. Construction services	5,000,000	56,678,000

Annex 2 Entities	Threshold value (SDR)	Threshold value in HK Dollar
-------------------------	----------------------------------	---

<i>1. Goods and services other than construction services</i>	<i>200,000</i>	<i>2,267,000</i>
<i>2. Construction services</i>	<i>5,000,000</i>	<i>56,678,000</i>

<i>Annex 3 Entities</i>	<i>Threshold value (SDR)</i>	<i>Threshold value in HK Dollars</i>
1. <i>Goods and services other than construction services</i>	400,000	4,534,000
2. <i>Construction services</i>	5,000,000	56,678,000

2) Method of Calculation

The calculation of national threshold is based on the monthly average exchange rate of SDR to Hong Kong Dollar over 24 months from November 1993 to October 1995.

<i>Month</i>	<i>Exchange rate of HKD to SDR</i>	<i>Month</i>	<i>Exchange rate of HKD to SDR</i>
November 1993	10.73370	November 1994	11.37700
December 1993	10.69354	December 1994	11.23536
January 1994	10.60903	January 1995	11.35223
February 1994	10.72622	February 1995	11.42914
March 1994	10.83267	March 1995	11.87715
April 1994	10.84973	April 1995	12.18996
May 1994	10.93143	May 1995	12.04796
June 1994	11.03316	June 1995	12.09522
July 1994	11.25841	July 1995	12.05310
August 1994	11.23786	August 1995	11.69739
September 1994	11.31104	September 1995	11.48186
October 1994	11.41540	October 1995	11.58648

The average exchange rate of HKD to SDR is: HK\$272.05504/24 months • HK\$11.33563.

MODIFICATIONS TO APPENDIX I OF NORWAY

Notification from Norway under Article XXIV:6(a)

The following notification from the Permanent Representative of Norway was received on 5 June 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). In accordance with Article XXIV:6(a), the modifications relating to Appendix I will become effective provided there is no objection within 30 days from the date of issue of this document.

With reference to Appendix I, Annexes 1-3 of Norway, please find enclosed a list of changes in the Norwegian entity list.

Under •List of Entities• the present wording •The following contracting authorities of the State• should be changed to read: •Central government entities including:•.

The main reason for the adjustments is the reorganizing of Norwegian governmental agencies. Some agencies have closed down; some new ones have been established and some were left out in the previous notification due to an oversight. The list is still not complete and we have therefore made the above-mentioned amendment of the heading.

ANNEX 1

•The following contracting authorities of the State• under •List of Entities• shall be altered to •Central government entities including•:

Changes in the entity list:

Existing name in Norwegian in Appendix I, Annex 1	Existing name in Norwegian in Appendix I, Annex 1 shall be changed to	English name
Administrasjonsdepartementet	Planleggings- og samordningsdepartementet	Ministry of National Planning and Coordination
Pristilsynet	Konkurransetilsynet	Norwegian Competition Authority
New entity, not listed in Appendix I, Annex 1	Fylkesmannsembetene	The County Governors
Statsbygg, shall be listed here, not in the end		The Directorate of Public Construction and Property
Forsvarsdepartementet		Ministry of Defence
New entity, not listed in Appendix I, Annex 1	Forsvarets bygningstjeneste	Norwegian Defence Construction Service
New entity, not listed in Appendix I, Annex 1	Forsvarets tele- og datatjeneste	Norwegian Defence Communications and Data Services Administration
Justis- og politidepartementet		Ministry of Justice (and the Police)
Statsadvokatembetene:	Statsadvokatembetene	Offices of the District Public Prosecutor
Eidsivating		
Vestfold og Telemark		

Existing name in Norwegian in Appendix I, Annex 1	Existing name in Norwegian in Appendix I, Annex 1 shall be changed to	English name
Agder		
Rogaland		
Hordaland		
Møre og Romsdal, Sogn og Fjordane		
Trondheim		
Nordland og Finnmark

MODIFICATION TO APPENDIX I OF THE EUROPEAN COMMUNITY

Communication from the European Community

The following communication from the Permanent Delegation of the European Community was received on 2 June 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I have the honour to inform you that the European Communities have taken note of the information circulated in WTO document GPA/14 of 23 May 1997 that the Government of Hong Kong has deposited its instrument of accession to the Agreement on Government Procurement with the WTO (WT/Let/141) and that the Agreement will enter into force for Hong Kong on 19 June 1997.

In the light of this situation, I am writing to you concerning a consequential modification to the General Notes in Appendix I of the European Communities to the Government Procurement Agreement according to Article XXIV of the Agreement which contains the provisions on modifications to the Appendices. This communication is to be considered a formal notification under sub-paragraph (a) of paragraph 6 of Article XXIV of the Agreement.

The modification which the European Communities hereby notify is that the words: •Hong Kong• be deleted from the European Communities General Note 1 in Appendix I, third indent, point (b).

MODIFICATION TO APPENDIX I OF SWITZERLAND

Communication from Switzerland

The following communication from the Permanent Mission of Switzerland was received on 6 June 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

Switzerland has taken notice of the instrument of accession to the WTO Agreement on Government Procurement (GPA) deposited by the Government of Hong Kong with the Director-General of the WTO on 20 May 1997, and hereby notifies that it will extend the benefits of the GPA to the suppliers and service providers of Hong Kong with regard to the award of contracts by entities in the electricity sector under the conditions laid down in the Swiss Appendix I. The extension of these benefits will enter into force as soon as the internal ratification procedures will be completed. These ratification procedures are expected to be completed by September 1997.

MODIFICATIONS TO APPENDIX I OF THE UNITED STATES

Communication from the United States

The following communication from the Permanent Representative of the United States to the WTO was received on 23 May 1997, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I am writing to you concerning the modifications to Appendix I of the Government Procurement Agreement, which follow on from the agreement reached between the United States of America and Switzerland. Article XXIV of the Agreement contains the provisions on its entry into force and it is in conformity with paragraph 6(a) of Article XXIV that I hereby inform you of modifications to the United States General Notes in Appendix I of the Agreement.

In accordance with our understanding with the Government of Switzerland, you should today receive a parallel communication from the Swiss Delegation.

The enclosed communication should be circulated to Members of the Committee on Government Procurement in a document dated 23 May 1997 so that the modification will become effective 30 days from that date provided there is no objection.

Committee on Government Procurement

REQUEST FOR INFORMATION PURSUANT TO PARAGRAPHS 1
AND 3 OF ARTICLE XIX OF THE AGREEMENT
ON GOVERNMENT PROCUREMENT

Communication from Japan

The following communication, dated 10 March 1997, has been received from the delegation of Japan with the request that it be distributed to the Members of the Committee on Government Procurement.

The Government of Japan (GOJ) reiterates its concern about consistency with the WTO Agreement on Government Procurement (GPA) of the application and implementation of the •Act Regulating State Contracts with Companies Doing Business with or in Burma (Myanmar)• (hereinafter referred to as the •Act•) enacted on 25 June 1996 by the State of Massachusetts.

The Act effectively restricts state agencies of Massachusetts including all the executive offices to procure any goods or services from any person on the restricted purchase list established and maintained by the State.

It is the GOJ's understanding that all of the eleven executive offices in Massachusetts covered under the United States commitment specified in Annex 2 in Appendix I of the GPA are currently subject to the Act, and that listed entities include more than thirty Japanese-owned companies.

The GOJ, pursuant to paragraphs 1 and 3 of Article XIX of the GPA, hereby requests the Government of the United States to provide the following information. This information is needed to determine whether the relevant provisions of the Act are consistent with the requirements of the GPA.

- (1) *A copy of the full text of •An Act Regulating State Contracts with Companies Doing Business with or in Burma (Myanmar)• enacted on 25 June 1996 by the State of Massachusetts and a copy of the latest restricted purchase list issued by the State.*
- (2) *Information on a method of publication of the Act as required by paragraph 1 of Article XIX of the GPA.*
- (3) *Information on procedures for renewing the restricted purchase list and the method of publication of this list as required by paragraph 1 of Article XIX of the GPA.*
- (4) *Information on any communication or guidance between the United States federal agencies and the state agencies of Massachusetts regarding the adoption of procurement procedures and a restricted purchase list as stipulated in the Act.*
- (5) *Information on bid challenge procedures available regarding procurement by the executive offices of the State of Massachusetts.*
- (6) *An example of tender documentation stipulating, in accordance with paragraph 2(h) of Article XII of the GPA, the criteria for awarding the contracts to be used in government procurement covered by the Act.*
- (7) *An example of a case, if any, in which any tenderer on the restricted purchase list has actually been excluded from consideration for the award of a contract based on Section 22H(a) of the Act, or has been awarded a contract in spite of the legislation.*
- (8) *Information on an explanation concerning the consistency of the requirements under the Act with the following provisions of the GPA:*

(a) Article III, paragraph 1

Under the Act, is a supplier of a foreign country which is a Party to the GPA on the restricted purchase list, in terms of requirements for qualifications and award of the contracts, given a treatment less favourable than that accorded to non-listed suppliers either of the United States or of another party to the GPA?

(b) Article III, paragraph 2(a)

Under the Act, is a locally-established supplier on the restricted purchase list, who is the majority-owned subsidiary of a person whose principal place of business is Myanmar, subject to a less favourable treatment?

(c) Article VIII, paragraph (b)

Does the Act impose on a tendering company conditions which are not essential to ensure the suppliers' capability to fulfil the contract in question?

(d) Article X, paragraph 3

Does the Act virtually limit the number of suppliers qualified to participate in procurement for the reasons other than the efficient operation of the procurement system?

(e) Article XIII, paragraph 4(b)

Pursuant to Sections 22G and 22H(d) of the Act, may the entity not award the contract to the supplier on that list who submitted the lowest bid if there is a responsive and responsible bid which is no more than 10 per cent greater than that lowest bid?

(9) Information on what specific action, if any, the United States Federal Government has taken, or intends to take, in response to:

(a) the current legislation;

(b) a case, if any, in which the United States Federal Government identifies inconsistency with any provision of the GPA.

(10) Updated information on similar state laws and regulations enacted or drafted in any other states, or any state legislation to be applied to suppliers doing business with or in any country other than Myanmar.

If any of the documents or information provided involves confidentiality, the GOJ undertakes to respect such confidentiality and to use such documents and information for the sole purpose of determining whether the relevant provisions of the Act are consistent with the requirements of the GPA. As provided for under paragraph 2 of Article XIX of the GPA, if release of the documents and information would prejudice competition in future procurement, the GOJ will consult with the United States Government prior to release.

LOOSE-LEAF SYSTEM FOR THE APPENDICES TO THE AGREEMENT

Note by the Secretariat

I. At its meeting of 4 June 1996, the Committee agreed to establish a loose-leaf system with legal effect to maintain up to date the Appendices to the Agreement. With a view to providing a starting point for the loose-leaf system, the Committee requested the Secretariat to prepare a draft set of Appendices that would reflect the Appendices attached to the Agreement as signed at Marrakesh and the subsequent rectifications, modifications and new concessions made under the procedures adopted by the Interim Committee and under the Agreement itself. The Committee agreed that a period of 60 days would be provided from the date of distribution of the draft for delegations to review whether the rectifications, modifications and new concessions had been accurately incorporated and whether the draft reflected fully the present legal state of the Appendices.

II. The attachment to this note contains such a draft loose-leaf set of Appendices, incorporating all changes effective on 30 January 1997. Delegations are invited to communicate to the Secretariat (Mrs. Vesile Kulacoglu, tel. 739 5187, fax. 739 5790) any points concerning the accuracy and completeness of the consolidation of the Appendices within 60 days from the date on this document. To facilitate the review of the draft by delegations, the annex to this covering note contains a synoptic table which identifies, in its column 4, the source of the material incorporated in respect of each element of the draft loose-leaf schedules. Given that the loose-leaf system will be the authoritative record of the legal status of the Appendices to the Agreement, it will be certified by the Director-General in accordance with normal procedures in respect of rectifications under WTO instruments, after the expiry of the 60-day period (provided, of course, there is no unresolved point of difference).

III. The Appendix I of a Party is only authentic in the language or languages in which it was submitted. Accordingly, Appendix I of the loose-leaf system is only in that language or those languages. Appendices II, III and IV are authentic in all three official WTO languages and are therefore reproduced in the loose-leaf system in the three languages.

IV. As suggested in document GPA/W/3, it is proposed that the Committee agree that Parties wishing to make future rectifications and modifications to their Appendices pursuant to the provisions of Article XXIV:6 should notify them to the Committee in the form of relevant replacement or additional pages to be inserted in the loose-leaf system, identifying the proposed changes. As hitherto, these proposed rectifications and modifications will be circulated to Members in the GPA/W/- series. Once they have become effective and been certified pursuant to the procedures under Article XXIV:6, the new or amended pages will be circulated with a cover note indicating where the insertions (and/or deletions) are to be made in the loose-leaf system. Certified true copies of these replacement or additional pages will also be circulated in the WTO/Let/- series of documents. At the foot of each new or replacement page will be indicated its date, which will be that on which the changes recorded in it became effective. Initially, all pages will bear the date that the loose-leaf system becomes effective (e.g. 1 April 1997).

V. In addition to being made available in hard-copy form, the loose-leaf system and future new or replacement pages will be circulated to Parties and other WTO Members in electronic form through the WTO Document Dissemination Facility. An up to date copy of the loose-leaf system will also be available to the general public through a government procurement site on the WTO Home Page on the Internet.

Note to Annex 1

The General Notes apply to this Annex.

ANNEX 2

Sub-Central Government Entities

*Thresholds: 355,000 SDRs
355,000 SDRs*

- Goods

-Services to be specified initially on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new Government Procurement Agreement.

5,000,000 SDRs

-Construction Services to be specified initially on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new Government Procurement Agreement.

List of Entities:

The Canadian Government offers to cover entities in all ten provinces on the basis of commitments obtained from provincial governments. The initial provincial entities list will be specified on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new Government Procurement Agreement.

Notes to Annex 2

1. *Exceptions for all Provinces: steel, motor vehicles and coal*

Province-specific exceptions: in addition, a limited number of individual provincial exceptions may be specified at a later date in accordance with commitments received from such provinces.

2. *Nothing in this offer shall be construed to prevent any provincial entity from applying restrictions that promote the general environmental quality in that province, as long as such restrictions are not disguised barriers to international trade.*

3. *This offer shall not apply to any procurement made by a covered entity on behalf of a non-covered entity.*

4. *The General Notes apply to this Annex.*

ANNEX 3

Government Enterprises

<i>Thresholds:</i>	355,000 SDRs	-	Goods
	355,000 SDRs	-	Services covered in Annex 4
	5,000,000 SDRs	-	Construction covered in Annex 5

Federal Enterprises

1. *Canada Post Corporation*
2. *National Capital Commission*
3. *St. Lawrence Seaway Authority (For greater certainty, Article XIX:4 applies to procurements by St. Lawrence Seaway Authority respecting the protection of the commercial confidentiality of information provided.)*
4. *Royal Canadian Mint (not including procurement by or on behalf of the Royal Canadian Mint of direct inputs for use in minting anything other than Canadian legal tender. For greater certainty, Article XIX:4 applies to procurements by the Royal Canadian Mint respecting the protection of the commercial confidentiality of information provided.)*
5. *Canadian Museum of Civilization*
6. *Canadian Museum of Nature*
7. *National Gallery of Canada*
8. *National Museum of Science and Technology*
9. *Defence Construction (1951) Ltd.*

Sub-central Enterprises

Coverage of Sub-central Enterprises for Goods, Services and Construction Services is to be specified initially on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new Government Procurement Agreement.

Note to Annex 3

The General Notes apply to this Annex.

ANNEX 4

Services

Canada offers to include in this •Services• Annex Federal entities listed under Annex 1 and Federal enterprises listed under Annex 3. The inclusion of •Services• for sub-central entities under Annex 2 and sub-central enterprises under Annex 3 are to be specified initially on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new Government Procurement Agreement. With respect to the terms of this Agreement, those services to be included are as identified within the document MTN.GNS/W/120. Domestically, Canada will be utilizing the •Common Classification System• for purposes of implementing this Agreement. This list of services may be revised following further technical work among the Parties and adjustments, as appropriate, to establish equitable coverage.

Canada offers to cover the following services with respect to the CPC services classification system:

861 Legal Services (advisory services on foreign and international law only)

862 Accounting, auditing and book-keeping services

863 Taxation Services (excluding legal services)

8671 Architectural services

8672 Engineering services

8673 Integrated engineering services (excluding 86731 Integrated engineering services for transportation infrastructure turnkey projects)

8674 Urban planning and landscape architectural services

841 Consultancy services related to the installation of computer hardware

842 Software implementation services, including systems and software consulting services, systems analysis, design, programming and maintenance services

843 Data processing services, including processing, tabulation and facilities management services

844 Data base services

845 Maintenance and repair services of office machinery and equipment including computers

1 April 1997

849 *Other computer services*

821 *Real estate services involving own or leased property*

822 *Real estate services on a fee or contract basis*

83106

to 83109

only Leasing or rental services concerning machinery and equipment without operator

83203

to 83209

only Leasing or rental services concerning personal and household goods

86501 *General management consulting services*

86503 *Marketing management consulting services*

86504 *Human resources management consulting services*

86505 *Production management consulting services*

8660 *Services related to management consulting (except 86602 Arbitration and conciliation services)*

8676 *Technical testing and analysis services including quality control and inspection (except with reference to FSC 58 and transportation equipment)*

8814 *Services incidental to forestry and logging, including forest management*

883 *Services incidental to mining, including drilling and field services*

633 *Repair services of personal and household goods*

8861

to 8864,

and 8866 *Repair services incidental to metal products, machinery and equipment*

874 *Building-cleaning services*

876 *Packaging services*

7512 *Commercial courier services (including multi-modal)*

7523 *Electronic mail*

7523 *Voice mail*

7523 *On-line information and data base retrieval*

7523 *Electronic data interchange (EDI)*

7523 *Enhanced/value-added facsimile services, including store and forward, store and retrieve*

Code and protocol conversion

843 *On-line information and/or data processing (including transaction processing)*

940 *Sewage and refuse disposal, sanitation and similar services*

641 *Hotel and similar accommodation services*

642/3 *Food and beverage serving services*

7471 *Travel agency and tour operator services*

Notes to Annex 4

1. *The General Notes apply to this Annex.*

2. *This offer is subject to the terms and conditions set out in the Canadian offer on trade in services.*

3. *Canada's offer in telecommunications is limited to enhanced or value added services for the supply of which the underlying telecommunications facilities are leased from providers of public telecommunications transport networks.*

4. *The Canadian offer does **not** include the following:*

**management and operation contracts of certain government or privately-owned facilities used for government purposes, including federally-funded research and development;*

**coin minting;*

**public utilities;*

**architectural and engineering related to airfield, communications and missile facilities;*

1 April 1997

**shipbuilding and repair and related architectural and engineering services;*

**all services, with reference to those goods purchased by the Department of National Defence, the Royal Canadian Mounted Police and the Canadian Coast Guard which are not identified as subject to coverage by this agreement;*

**services procured in support of military forces located overseas;*

**printing and publishing services; and,*

**procurement of transportation services that form a part of, or are incidental to, a procurement contract.*

*ANNEX 5**Construction Services*

Canada offers to include in this •Construction Services• Annex, Federal entities listed under Annex 1 and Federal enterprises listed under Annex 3. The inclusion of •Construction Services• for sub-central entities under Annex 2 and sub-central enterprises under Annex 3 are to be specified initially on or before 15 April 1994 with the final list to be provided within eighteen months after the conclusion of the new government procurement agreement.

Definition:

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification.

List of Division 51, CPC:

All services contained in Division 51 CPC.

Notes to Annex 5

1. Notwithstanding anything in this Agreement, this Agreement does not apply to procurements in respect of:

(a) Dredging; and

(b) Construction contracts tendered on behalf of the Departments of Transport.

2. The General Notes apply to this Annex.

GENERAL NOTES

1. Notwithstanding anything in these Annexes, the Agreement does not apply to procurements in respect of:

(a) shipbuilding and repair;

(b) urban rail and urban transportation equipment, systems, components and materials incorporated therein as well as all project related materials of iron or steel;

(c) contracts respecting FSC 58 (communications, detection and coherent radiation equipment);

(d) set-asides for small and minority businesses;

(e) agricultural products made in furtherance of agricultural support programs or human feeding programs;

(f) national security exemptions include oil purchases related to any strategic reserve requirements; and,

(g) national security exceptions including procurements made in support of safeguarding nuclear materials or technology.

2. Procurement in terms of Canadian coverage is defined as contractual transactions to acquire property or services for the direct benefit or use of the government. The procurement process is the process that begins after an entity has decided on its requirement and continues through to and including contract award. It does not include non-contractual agreements or any form of government assistance, including but not limited to, cooperative agreements, grants, loans, equity infusions, guarantees, fiscal incentives, and government provision of goods and services, given to individuals, firms, private institutions, and sub-central governments. It does not include procurements made with a view to commercial resale or made by one entity or enterprise from another entity or enterprise of Canada.

3. Any exclusion that is related either specifically or generally to Federal or sub-central entities or enterprises in Annex 1, Annex 2 or Annex 3 will also apply to any successor entity or entities, enterprise or enterprises, in such a manner as to maintain the value of this offer.

4. Until such time as there is a mutually agreed list of services to be covered by all Parties, a service listed in Annex 4 is covered with respect to a particular Party only to the extent that such Party has provided reciprocal access to that service.

5. *Where a contract to be awarded by an entity is not covered by this Agreement, this Agreement shall not be construed to cover any good or service component of that contract.*
6. *The offer by Canada, with respect to goods and services (including construction) in Annexes 2 and 3, is subject to negotiation of mutually acceptable commitments (including thresholds) with other Parties, with initial commitments to be specified on or before 15 April 1994 and specific commitments to be confirmed within eighteen months after the conclusion of the new Government Procurement Agreement.*
7. *The Agreement shall not apply to contracts under an international agreement and intended for the joint implementation or exploitation of a project.*
8. *For the European Union, Canada's offer excludes procurements of FSC 70, 74 and 36 until such time as reciprocal access is provided.*
9. *For the European Union, this Agreement shall not apply to contracts awarded by entities in Annexes 1 and 2 in connection with activities in the field of drinking water, energy, transport or telecommunications.*

99. *Divers*

Note relative à l'Annexe 1

Les Notes générales s'appliquent à la présente annexe.

ANNEXE 2

Entités des gouvernements sous-centraux

- Valeurs de seuil:* 355 000 DTS - **Produits**
 355 000 DTS-**Services** dont la liste initiale sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel accord sur les marchés publics.
- 5 000 000 DTS-**Services de construction** dont la liste initiale sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel accord sur les marchés publics.

Liste des entités:

Le gouvernement canadien offre d'inclure des entités des dix provinces sur la base des engagements obtenus des gouvernements provinciaux. La liste initiale des entités provinciales sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel Accord sur les marchés publics.

Notes relatives à l'Annexe 2

1. *Exceptions valables pour toutes les provinces: acier, véhicules automobiles et charbon.*

Exceptions propres à certaines provinces: en outre, un nombre limité d'exceptions concernant les différentes provinces pourront être spécifiées à une date ultérieure, conformément aux engagements reçus des provinces.

2. *Rien dans la présente offre ne sera interprété comme empêchant une entité d'une province d'appliquer des restrictions visant à promouvoir la qualité générale de l'environnement dans cette province, pour autant que ces restrictions ne constituent pas des obstacles déguisés au commerce international.*

3. *La présente offre ne s'applique pas aux marchés passés par une entité visée pour le compte d'une entité non visée.*

4. *Les Notes générales s'appliquent à la présente annexe.*

1 April 1997

ANNEXE 3

Entreprises publiques

<i>Valeurs de seuil:</i>	355 000 DTS	-	Produits
	355 000 DTS	-	Services visés à l'Annexe 4
	5 000 000 DTS	-	Travaux visés à l'Annexe 5

Entreprises fédérales

1. *Société canadienne des postes*
2. *Commission de la capitale nationale*
3. *Administration de la voie maritime du Saint-Laurent. (Pour plus de précision, les dispositions du paragraphe 4 de l'article XIX s'appliquent aux marchés passés par l'Administration de la voie maritime du Saint-Laurent, aux fins de la protection des renseignements commerciaux communiqués à titre confidentiel.)*
4. *Monnaie royale canadienne (à l'exclusion des marchés passés par la Monnaie royale canadienne, ou en son nom, pour l'achat de matières premières destinées à être utilisées directement pour frapper de la monnaie n'ayant pas cours légal au Canada. Pour plus de précision, les dispositions du paragraphe 4 de l'article XIX s'appliquent aux marchés passés par la Monnaie royale canadienne aux fins de la protection des renseignements commerciaux communiqués à titre confidentiel).*
5. *Musée canadien des civilisations*
6. *Musée canadien de la nature*
7. *Musée des beaux-arts du Canada*
8. *Musée national des sciences et de la technologie*
9. *Construction de Défense (1951) Limitée.*

Entreprises sous-centrales

La liste initiale des entreprises sous-centrales qui entrent dans le champ d'application de l'accord pour ce qui est des produits, des services et des services de construction sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel Accord sur les marchés publics.

Note relative à l'Annexe 3

Les Notes générales s'appliquent à la présente annexe.

ANNEXE 4

Services

Le Canada offre d'inclure dans la présente annexe relative aux Services les entités fédérales énumérées à l'Annexe 1 et les entreprises fédérales énumérées à l'Annexe 3. Pour ce qui est des entités sous-centrales visées à l'Annexe 2 et des entreprises sous-centrales visées à l'Annexe 3, la liste initiale des services entrant dans le champ d'application de l'accord sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel Accord sur les marchés publics. S'agissant des termes du présent accord, les services qui seront inclus sont ceux qui sont indiqués dans le document MTN.GNS/W/120. Sur le plan intérieur, le Canada utilisera le Système commun de classification aux fins de la mise en oeuvre du présent accord. La présente liste de services pourra être révisée à la suite d'autres travaux techniques entre les Parties et des ajustements pourront y être apportés, selon qu'il sera approprié, afin que le contenu en soit équitable.

Le Canada offre d'inclure les services suivants classés selon le système de classification des services de la CPC:

861 Services juridiques (conseils juridiques en matière de droit international et de droit étranger uniquement)

862 Services comptables, d'audit et de tenue de livres

863 Services de conseil fiscal (à l'exclusion des services juridiques)

8671 Services d'architecture

8672 Services d'ingénierie

8673 Services intégrés d'ingénierie (sauf 86731: Services intégrés d'ingénierie pour les projets de construction clés en main d'infrastructures de transport)

8674 Services d'aménagement urbain et d'architecture paysagère

841 Services de consultations en matière d'installation des matériels informatiques

842 Services de réalisation de logiciels, y compris les services de consultations en matière de systèmes et de logiciels, ainsi que les services d'analyse de systèmes, de conception, de programmation et de maintenance

843 Services de traitement de données, y compris les services de traitement, de tabulation et de gestion des installations

844 Services de base de données

845 Services d'entretien et de réparation de machines et de matériel de bureau, y compris les ordinateurs

849 Autres services informatiques

821 Services immobiliers se rapportant à des biens propres ou loués

822 Services immobiliers à forfait ou sous contrat

83106 à Services de location simple ou en crédit-bail de machines et de matériel, sans
83109 opérateurs
uniquement

83203 à Services de location simple ou en crédit-bail d'articles personnels et
83209 domestiques
uniquement

86501 Services de consultations en matière de gestion générale

86503 Services de consultations en matière de gestion de la commercialisation

86504 Services de consultations en matière de gestion des ressources humaines

86505 Services de consultations en matière de gestion de la production

8660 Services connexes aux services de consultations en matière de gestion
(sauf 86602: Services d'arbitrage et de conciliation)

8676 Services d'essais et d'analyses techniques, y compris d'inspection et de contrôle de la qualité (à l'exclusion du matériel de transport et du numéro 58 de la FSC)

8814 Services annexes à la sylviculture et à l'exploitation forestière, y compris la gestion des forêts

883 Services annexes aux industries extractives, y compris les services d'exploration et de forage

633 Services de réparation d'articles personnels et domestiques

8861 à Services de réparation annexes à la fabrication de produits en métaux, de machines
8864 et de matériel
et 8866

874 Services de nettoyage de bâtiments

876 Services de conditionnement

7512 Services commerciaux de courrier (y compris les services de courrier multimodaux)

7523 Services de courrier électronique

7523 Services d'audiomessagerie téléphonique

7523 Services directs de recherche d'informations permanente et de serveur de base de données

7523 Services d'échange électronique de données

7523 Services améliorés/à valeur ajoutée de télécopie, y compris enregistrements et retransmission et enregistrement et recherche

Services de conversion de codes et de protocoles

843 Services de traitement en direct de l'information et/ou de données (y compris traitement de transactions)

940 Services d'assainissement et d'enlèvement des ordures, services de voirie et services analogues

641 Services d'hôtellerie et services d'hébergement analogues

642-643 Services de restauration et de vente de boissons

7471 Services d'agences de voyages et d'organismes touristiques

Notes relatives à l'Annexe 4

1. Les Notes générales s'appliquent à la présente annexe.

2. La présente offre est faite sous réserve des conditions énoncées dans l'offre du Canada relative au commerce des services.

3. Dans le domaine des télécommunications, l'offre du Canada se limite aux services améliorés ou à valeur ajoutée qui sont fournis au moyen d'installations de télécommunications de base louées à des fournisseurs de réseaux publics de transport des télécommunications.

4. L'offre du Canada ne comprend **pas** ce qui suit:

*les contrats de gestion et d'exploitation de certaines installations publiques ou privées utilisées à des fins publiques, y compris la recherche-développement financée par le gouvernement fédéral;

*la frappe de la monnaie;

*les services d'utilité publique;

*les services d'architecture et d'ingénierie se rapportant à des aéroports ainsi qu'à des installations de communications ou de missiles;

*la construction navale et la réparation de navires ainsi que les services d'architecture et d'ingénierie s'y rapportant;

*s'agissant des produits achetés par le Ministère de la défense nationale, la Gendarmerie royale du Canada et la Garde côtière canadienne, tous les services qui ne sont pas indiqués comme entrant dans le champ d'application du présent accord;

*les services achetés pour appuyer les forces militaires se trouvant à l'étranger;

*les services d'imprimerie et d'édition; et

*les marchés de services de transport qui font partie d'un marché ou qui y sont accessoires.

*ANNEXE 5**Services de construction*

Le Canada offre d'inclure dans la présente annexe relative aux Services de construction les entités fédérales énumérées à l'Annexe 1 et les entreprises fédérales énumérées à l'Annexe 3. Pour ce qui est des entités sous-centrales visées à l'Annexe 2 et des entreprises sous-centrales visées à l'Annexe 3, la liste initiale des services de construction entrant dans le champ d'application de l'accord sera établie au plus tard pour le 15 avril 1994, la liste définitive devant être communiquée dans un délai de 18 mois après la conclusion du nouvel Accord sur les marchés publics.

Définition:

Un contrat de services de construction est un contrat qui a pour objectif la réalisation, par quelque moyen que ce soit, de travaux de construction d'ouvrages de génie civil ou de bâtiments, au sens de la division 51 de la Classification centrale de produits (CPC).

Liste de services relevant de la division 51 de la CPC:

Tous les services énumérés dans la division 51 de la CPC.

Notes relatives à l'Annexe 5

1. Nonobstant les dispositions du présent accord, celui-ci ne s'applique pas:

a) aux marchés portant sur des travaux de dragage; ni

b) aux marchés de travaux passés pour le compte des ministères des transports.

2. Les Notes générales s'appliquent à la présente annexe.

NOTES GENERALES

1. Nonobstant les présentes annexes, l'accord n'est pas applicable dans les cas suivants:

a) construction navale et réparation de navires;

b) chemins de fer urbains et matériel de transport urbain, systèmes, composants et matériaux entrant dans leur fabrication, ainsi que tout le matériel en fer ou en acier destiné à des ouvrages;

c) marchés portant sur les produits relevant du n° 58 de la Classification fédérale des approvisionnements (matériel de communication, matériel de détection des radiations et d'émission de rayonnement cohérent);

d) marchés réservés aux petites entreprises et aux entreprises détenues par des minorités;

e) marchés de produits agricoles passés en application de programmes de soutien à l'agriculture ou de programmes d'aide alimentaire;

f) exemptions pour des raisons de sécurité nationale, visant notamment les achats de pétrole nécessaires au maintien de réserves stratégiques;

g) exceptions pour des raisons de sécurité nationale, visant notamment les marchés passés aux fins du contrôle des matières ou des technologies nucléaires.

2. Pour le Canada, les marchés entrant dans le champ d'application s'entendent de transactions contractuelles visant l'acquisition de biens ou de services devant bénéficier directement au gouvernement ou être utilisés directement par celui-ci. Le processus de passation d'un marché débute après qu'une entité a défini ses besoins et se poursuit jusques et y compris l'adjudication. Ne sont pas compris les accords non contractuels et toute forme d'aide publique, y compris, mais pas uniquement, les accords de coopération, les subventions, les prêts, les apports en capital, les garanties, les incitations fiscales et la fourniture par le gouvernement fédéral de produits et de services à des particuliers, des entreprises, des institutions privées et des gouvernements sous-centraux. Ne sont pas compris non plus les achats réalisés à des fins de revente commerciale ou effectués par une entité ou une entreprise auprès d'une autre entité ou d'une autre entreprise du Canada.

3. Toute exclusion liée expressément ou d'une manière générale à des entités ou à des entreprises fédérales ou sous-centrales énumérées à l'Annexe 1, à l'Annexe 2 ou à l'Annexe 3 s'appliquera également à toute entité ou entreprise qui pourrait leur succéder, afin de maintenir la valeur de la présente offre.

4. *Tant que toutes les Parties ne seront pas convenues d'un commun accord d'une liste des services entrant dans le champ d'application, un service énuméré à l'Annexe 4 ne sera visé pour ce qui concerne une Partie donnée que dans la mesure où cette Partie aura accordé un accès réciproque au service considéré.*
5. *Dans le cas où une entité adjudgera un marché qui n'est pas visé par le présent accord, celui-ci ne sera pas interprété comme s'appliquant à tout produit ou service entrant dans ce marché.*
6. *S'agissant des produits et des services (y compris les travaux) énumérés aux Annexes 2 et 3, l'offre du Canada est subordonnée à la négociation avec les autres Parties d'engagements mutuellement acceptables (y compris de seuils), les engagements initiaux devant être spécifiés au plus tard pour le 15 avril 1994 et les engagements spécifiques confirmés dans un délai de 18 mois après la conclusion du nouvel Accord sur les marchés publics.*
7. *L'accord ne s'applique pas aux marchés passés en vertu d'un accord international et portant sur la réalisation ou l'exploitation en commun d'un ouvrage.*
8. *En ce qui concerne l'Union européenne, le Canada exclut de son offre les marchés portant sur les produits relevant des n° 70, 74 et 36 de la FSC tant qu'un accès réciproque ne lui aura pas été accordé.*
9. *En ce qui concerne l'Union européenne, le présent accord ne s'applique pas aux marchés passés par les entités visées aux Annexes 1 et 2 et portant sur des activités dans les secteurs de l'eau potable, de l'énergie, des transports et des télécommunications.*

EUROPEAN COMMUNITY

ANNEX 1

Page 57/56

*Welsh Higher Education Funding Council
Welsh National Health Service Authorities and Trusts
Welsh Rent Assessment Panels*

3. List of supplies and equipment purchased by **Ministries of Defence in Belgium, Denmark, the Federal Republic of Germany, Spain, Finland, France, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and the United Kingdom** that are covered by the Agreement:

Chapter 25: Salt; sulphur; earths and stone; plastering materials, lime and cement.

Chapter 26: Metallic ores, slag and ash

Chapter 27: Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes

except:

ex 27.10: special engine fuels

Chapter 28: Inorganic chemicals; organic and inorganic compounds of precious metals, of rare-earth metals, of radio-active elements and isotopes

except:

ex 28.09: explosives

ex 28.13: explosives

ex 28.14: tear gas

ex 28.28: explosives

ex 28.32: explosives

ex 28.39: explosives

ex 28.50: toxic products

ex 28.51: toxic products

ex 28.54: explosives

Chapter 29: Organic chemicals

except:

ex 29.03: explosives

ex 29.04: explosives

ex 29.07: explosives

ex 29.08: explosives

ex 29.11: explosives

ex 29.12: explosives

ex 29.13: toxic products

ex 29.14: toxic products

ex 29.15: toxic products

ex 29.21: toxic products

ex 29.22: toxic products

ex 29.23: toxic products

ex 29.26: explosives

ex 29.27: toxic products

ex 29.29: explosives

Chapter 30: Pharmaceutical products

Chapter 31: Fertilizers

Chapter 32: Tanning and dyeing extracts; tannings and their derivatives; dyes, colours, paints and varnishes; putty, fillers and stoppings; inks

Chapter 33: Essential oils and resinoids; perfumery, cosmetic or toilet preparations

Chapter 34: Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes polishing and scouring preparations, candles and similar articles, modelling pastes and dental waxes

Chapter 35: Albuminoidal substances; glues; enzymes

Chapter 37: Photographic and cinematographic goods

Chapter 38: Miscellaneous chemical products

except:

ex 38.19: toxic products

Chapter 39: Artificial resins and plastic materials, cellulose esters and ethers; articles thereof

except:

ex 39.03: explosives

Chapter 40: Rubber, synthetic rubber, factice, and articles thereof

except:

ex 40.11: bullet-proof tyres

Chapter 41: Raw hides and skins (other than furskins) and leather

Chapter 42: Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles of animal gut (other than silk-worm gut)

- Chapter 43: Furskins and artificial fur; manufactures thereof*
- Chapter 44: Wood and articles of wood; wood charcoal*
- Chapter 45: Cork and articles of cork*
- Chapter 46: Manufactures of straw of esparto and of other plaiting materials; basketware and wickerwork*
- Chapter 47: Paper-making material*
- Chapter 48: Paper and paperboard; articles of paper pulp, of paper or of paperboard*
- Chapter 49: Printed books, newspapers, pictures and other products of the printing industry; manuscripts, typescripts and plans*
- Chapter 65: Headgear and parts thereof*
- Chapter 66: Umbrellas, sunshades, walking-sticks, whips, riding-crops and parts thereof*
- Chapter 67: Prepared feathers and down and articles made of feathers or of down; artificial flowers; articles of human hair*
- Chapter 68: Articles of stone, of plaster, of cement, of asbestos, of mica and of similar materials*
- Chapter 69: Ceramic products*
- Chapter 70: Glass and glassware*
- Chapter 71: Pearls, precious and semi-precious stones, precious metals, rolled precious metals, and articles thereof; imitation jewellery*
- Chapter 73: Iron and steel and articles thereof*
- Chapter 74: Copper and articles thereof*
- Chapter 75: Nickel and articles thereof*
- Chapter 76: Aluminium and articles thereof*
- Chapter 77: Magnesium and beryllium and articles thereof*

Chapter 78: Lead and articles thereof

Chapter 79: Zinc and articles thereof

Chapter 80: Tin and articles thereof

Chapter 81: Other base metals employed in metallurgy and articles thereof

Chapter 82: Tools, implements, cutlery, spoons and forks, of base metal; parts thereof

except:

ex 82.05: tools

ex 82.07: tools, parts

Chapter 83: Miscellaneous articles of base metal

Chapter 84: Boilers, machinery and mechanical appliances; parts thereof

except:

ex 84.06: engines

ex 84.08: other engines

ex 84.45: machinery

ex 84.53: automatic data-processing machines

ex 84.55: parts of machines under heading No 84.53

ex 84.59: nuclear reactors

Chapter 85: Electrical machinery and equipment; parts thereof

except:

ex 85.13: telecommunication equipment

ex 85.15: transmission apparatus

Chapter 86: Railway and tramway locomotives, rolling-stock and parts thereof; railway and tramway tracks fixtures and fittings; traffic signalling equipment of all kinds (not electrically powered)

except:

ex 86.02: armoured locomotives, electric

ex 86.03: other armoured locomotives

ex 86.05: armoured wagons

ex 86.06: repair wagons

ex 86.07: wagons

Chapter 87: Vehicles, other than railway or tramway rolling-stock, and parts thereof

except:

87.08: tanks and other armoured vehicles

ex 87.01: tractors

ex 87.02: military vehicles

ex 87.03: breakdown lorries

ex 87.09: motorcycles

ex 87.14: trailers

Chapter 89: Ships, boats and floating structures

except:

89.01 A: warships

Chapter 90: Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus; parts thereof

except:

ex 90.05: binoculars

ex 90.13: miscellaneous instruments, lasers

ex 90.14: telemeters

ex 90.28: electrical and electronic measuring instruments

ex 90.11: microscopes

ex 90.17: medical instruments

ex 90.18: mechano-therapy appliances

ex 90.19: orthopaedic appliances

ex 90.20: X-ray apparatus

Chapter 91: Clocks and watches and parts thereof

Chapter 92: Musical instruments; sound recorders or reproducers; television image and sound recorders or reproducers; parts and accessories of such articles

Chapter 94: Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings

except:

ex 94.01 A: aircraft seats

Chapter 95: Articles and manufactures of carving or moulding material

Chapter 96: Brooms, brushes, powder-puffs and sieves

Chapter 98: Miscellaneous manufactured articles

4. List of supplies and equipment purchased by defence agencies in **Austria** are those contained in Annex I, Part II, Austria of the Agreement on Government Procurement.

5. List of supplies and equipment purchased by defence agencies in **Sweden**:

ANNEX 3**Other Entities that Procure in Accordance
With the Provisions of this Agreement****Supplies****Services** specified in Annex 4²¹*Thresholds: SDR 400,000***Works** specified in Annex 5*Threshold: SDR 5,000,000**Entities in the water, electricity, urban transport, port and airport sectors:***1. List of Entities for Belgium, Denmark, the Federal Republic of Germany, Spain, France, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and the United Kingdom:***The contracting entities within the meaning of Article 2 of Directive 93/38/EEC which are public authorities or public undertakings and which have as one of their activities any of those referred to below or any combination thereof:*

- (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water to such networks;*
- (b) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity or the supply of electricity to such networks;*
- (c) the provision of airport or other terminal facilities to carriers by air;*
- (d) the provision of maritime or inland port or other terminal facilities to carriers by sea or inland waterway;*

²¹ Under the conditions provided for in Directive 93/38/EEC

(e) the operation of networks providing a service to the public in the field of transport by railway²², automated systems, tramway, trolley bus, bus or cable in accordance with Directive 93/38/EEC.

The public authorities or public undertakings listed in Annex I (production, transport or distribution of drinking water), Annex II (production, transport or distribution of electricity), Annex VII (contracting entities in the field of urban railway, tramway, trolley bus or bus services), Annex VIII (contracting entities in the field of airport facilities) and Annex IX (contracting entities in the field of maritime or inland port or other terminal facilities) of Directive 93/38/EEC fulfil the criteria set out above (copies attached).

2. List of Entities for Austria:

2.1 Entities in the water and energy sector

The covered entities are those which exercise as a principal activity, the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport and distribution of drinking water, and electricity.

2.2 Entities in the transport sector

The covered entities are those which exercise as a principal activity:

(i) the operation of networks providing a service to the public in the field of transport by trolley bus, bus or cable;

(ii) the exploitation of a geographical area for the purpose of the provision of inland port or other terminal facilities to carrier by inland waterway or the provision of airports or other terminal facilities by air.

3. List of Entities for Finland:

Public entities and activities as specified in Article 2 of •Laki julkisista hankinnoista (1505/92)• (Public Procurement Act) and in Articles 1-4 of •Asetus Euroopan talousalueesta tehdyss ä sopimuksessa tarkoitetuista vesi- ja energiahuollon, liikenteen ja teletoiminnan alalla toimivien yksiköiden hankinnoista• (1351/93) (Decree concerning utilities) under the conditions provided for in Directive 90/531/EEC in the sectors of:

3.1 Urban transport:

²²Not including the entities listed in Annex VI of Directive 93/38/EEC (copy attached)

The operation of networks providing a service to the public in the field of transport by tramway, metro or bus by public entities according to •Laki (343/91) luvanvaraisesta henkilöliikenteestä tiellä• and Helsingin kaupungin liikennelaitos (Helsinki Transport Board), which provides metro and tramway services to the public.

3.2 Airports:

The provision of airport or other terminal facilities to carriers operated by •Ilmailulaitos• (National Aviation Agency) pursuant to •Ilmailulaki (595/64)•, inter alia

- *Helsinki-Vantaa Airport*
- *Ivalo Airport*
- *Joensuu Airport*
- *Jyväskylä Airport*
- *Kemi Airport*
- *Kittilä Airport*
- *Kuopio Airport*
- *Lappeenranta Airport*
- *Oulu Airport*
- *Rovaniemi Airport*
- *Vaasa Airport*

3.3 Ports:

The provision of maritime or inland ports or other terminal facilities to carriers by sea or inland waterways by municipal authorities pursuant to •Laki kunnallisista satamajärjestyksistä ja liikennemaksuista (955/76)•, inter alia

- *Port of Hamina*
- *Port of Hanko*
- *Port of Helsinki*
- *Port of Kotka*
- *Port of Naantali*
- *Port of Turku*
- *Port of Vaasa*

3.4 Water:

The provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water to such network by public entities pursuant to Article 1 of •Laki yleisistä vesi- ja viemärlaitoksista (982/77)• of December 1977, inter alia

- Helsinki Water Board
(Helsingin kaupungin vesilaitos)
- Turku Water Board
(Turun kaupungin vesilaitos)
- Tampere Water Board
(Tampereen kaupungin vesilaitos)

3.5 Electricity:

The provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity or the supply of electricity to such networks where municipal entities operate on the basis of a special or an exclusive right or on the basis of a concession pursuant to Article 27 of •Sähkölaki (319/79)• of 16 March 1979, inter alia

- Helsinki Energy Board
(Helsingin kaupungin energialaitos)
- Tampere Energy Board
(Tampereen kaupungin sähkölaitos)
- Turku Energy Board
(Turun kaupungin sähkölaitos)

4. List of Entities for Sweden:

4.1 Electricity

Entities which have as one of their activities the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport, distribution or the supply of electricity on the basis of a concession pursuant to •Lag (1902:71) innefattande vissa bestämmelser om elektriska anläggningar•, inter alia;

Vattenfall AB
Stockholm Energi Produktion AB
Swedish International Grid
Sydkraft AB
Trollhätte kanalverk

4.2 Urban transport

Entities which have as one of their activities the operation of networks providing a service to the public in the field of transport by automated systems, urban railway, tramway, trolley bus, bus or cable according to •Lag (1978:438) om huvudmannaskap för viss kollektiv persontrafik•, for urban railway or tramway services pursuant to •Lag

(1990:1157) om järnvägssäkerhet• and for trolley bus or bus services in accordance with •Lag (1988:263) om yrkestrafik•, inter alia;

Storstockholms Lokaltrafik AB, SL

4.3 Airports

Entities which have as one of their activities the exploitation of a geographical area for the purpose of the provision of airport facilities e.g. publicly owned and operated airports in accordance with •Lag (1957:297) om luftfart• having as their result the reservation for one or more entities of the exploitation of the activities described, inter alia;

Civil Aviation Administration

4.4 Ports

Entities which have as one of their activities the exploitation of a geographical area for the purpose of the provision of port facilities e.g. publicly owned and/or operated ports and terminal facilities according to •Lag (1988:293) om inrättande, utvidgning och avlysning av allmän farled och allmän hamn•, •Förordning (1983:744) om trafiken på Göta kanal•, inter alia;

Gävle port

Göteborg port

Luleå port

Stockholm port

Trelleborg port

Uddevalla port

4.5 Water

Local authorities and municipal companies which have as one of their activities the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water according to •Lag (1970:244) om allmänna vatten- och avloppsanläggningar•.

ANNEX 4

Services

Of the Universal List of Services, as contained in document MTN.GNS/W/120, the following services are included:

<i>Subject</i>	<i>CPC Reference No</i>
<i>Maintenance and repair services</i>	<i>6112, 6122, 633, 886</i>
<i>Land transport services, including armoured car services, and 71235), 7512, 87304 courier services, except transport of mail</i>	<i>712 (except</i>
<i>Air transport services of passengers and freight, except transport of mail</i>	<i>73 (except 7321)</i>
<i>Transport of mail by land, except rail, and by air</i>	<i>71235, 7321</i>
<i>Telecommunications services 7524, 7525, 7526)</i>	<i>752* (except</i>
<i>Financial services</i>	<i>ex 81</i>
<i>(a) Insurance services</i>	<i>812, 814</i>
<i>(b) Banking and investments services**</i>	
<i>Computer and related services</i>	<i>84</i>
<i>Accounting, auditing and bookkeeping services</i>	<i>862</i>
<i>Market research and public opinion polling services</i>	<i>864</i>
<i>Management consulting services and related services</i>	<i>865, 866***</i>
<i>Architectural services; engineering services and integrated engineering services, urban planning and landscape architectural services; related scientific and technical consulting services; technical testing and analysis services</i>	<i>867</i>
<i>Advertising services</i>	<i>871</i>

<i>Building-cleaning services and property management services</i>	874, 82201 -
<i>82206</i>	
<i>Publishing and printing services on a fee or contract basis</i>	88442
<i>Sewage and refuse disposal; sanitation and similar services</i>	94

Notes to Annex 4

* *except voice telephony, telex, radiotelephony, paging and satellite services*

***except contracts for financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments, and central bank services. In Finland, payments from governmental entities (expenses) shall be transacted through a certain credit institution (Postipankki Ltd) or through the Finnish Postal Giro System. Havenschap Vlissingen, set up by the wet van 10 september 1970 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Vlissingen.

Havenschap Terneuzen, set up by the wet van 8 april 1970 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Terneuzen.

Havenschap Delfzijl, set up by the wet van 31 juli 1957 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Delfzijl.

Industrie- en havenschap Moerdijk, set up by gemeenschappelijke regeling tot oprichting van het Industrie- en havenschap Moerdijk van 23 oktober 1970, approved by Koninklijke Besluit nr. 23 van 4 maart 1972.

PORTUGAL

Porto do Lisboa set up pursuant to Decreto Real do 18 de Fevereiro de 1907 and operating pursuant to Decreto-Lei n 36976 de 20 de Julho de 1948.

Porto do Douro e Leixões set up pursuant to Decreto-Lei n 36977 de 20 de Julho de 1948.

Porto de Sines set up pursuant to Decreto-Lei n 508/77 de 14 de Dezembro de 1977.

Portos de Setúbal, Aveiro, Figueira de Foz, Viana do Castelo, Portimão e Faro operating pursuant to the Decreto-Lei n 37754 de 18 de Fevereiro de 1950.

UNITED KINGDOM

Harbour Authorities within the meaning of section 57 of the Harbours Act 1964 providing port facilities to carriers by sea or inland water way.

*GENERAL NOTES AND DEROGATIONS FROM THE PROVISIONS OF
ARTICLE III*

1. The EC will not extend the benefits of this Agreement:

-as regards the award of contracts by entities listed in Annex 2 to the suppliers and service providers of Canada;

-as regards the award of contracts, other than for suppliers, listed in Annex 2 to the suppliers and service providers of the USA;

-as regards the award of contracts by entities listed in Annex 3 paragraph

(a)(water), to the suppliers and service providers of Canada and the USA;

(b)(electricity), to the suppliers and service providers of Canada, Hong Kong and Japan;

(c)(airports), to the suppliers and service providers of Canada, Korea and the USA;

(d) (ports), to the suppliers and service providers of Canada;

(e)(urban transport), to the suppliers and service providers of Canada, Israel, Japan, Korea and the USA

until such time as the EC has accepted that the Parties concerned give comparable and effective access for EC undertakings to the relevant markets;

-to service providers of Parties which do not include service contracts for the relevant entities in Annexes 1 to 3 and the relevant service category under Annexes 4 and 5 in their own coverage.

2. The provisions of Article XX shall not apply to suppliers and service providers of:

-Israel, Japan, Korea and Switzerland in contesting the award of contracts by entities listed under Annex 2 paragraph 2, until such time as the EC accepts that they have completed coverage of sub-central entities;

-Japan, Korea and the USA in contesting the award of contracts to a supplier or service provider of Parties other than those mentioned, which are small or medium sized enterprises under the relevant provisions of EC law, until such time as

1 April 1997

the EC accepts that they no longer operate discriminatory measures in favour of certain domestic small and minority businesses;

-Israel, Japan and Korea in contesting the award of contracts by EC entities, whose value is less than the threshold applied for the same category of contracts awarded by these Parties.

3. *Until such time as the EC has accepted that the Parties concerned provide access for EC suppliers and service providers to their own markets the EC will not extend the benefits of this Agreement to suppliers and service providers of:*

-Canada, as regards procurement of FSC 36,70 and 74 (special industry machinery, general purpose automatic data processing equipment, software supplies and support equipment (except 7010 ADPE configurations), office machines, visible record equipment and ADP equipment);

-Canada, as regards procurement of FSG 58 (communications, protection and coherent radiation equipment) and the USA as regards air traffic control equipment;

-Korea and Israel as regards procurement by entities listed in Annex 3 paragraph (b), as regards procurement of HS Nos 8504, 8535, 8537 and 8544 (electrical transformers, plugs, switches and insulated cables); and for Israel, HS Nos 8501, 8536 and 902830;

-the USA as regards procurement by entities listed in Annex 3 paragraph (d), as regards procurement of dredging services and procurement related to shipbuilding;

-Canada and the USA as regards contracts for good or service components of contracts which, although awarded by an entity covered by this Agreement, are not themselves subject to this Agreement.

4. *The Agreement shall not apply to contracts awarded under:*

-an international agreement and intended for the joint implementation or exploitation of a project by the signatory States;

-an international agreement relating to the stationing of troops;

-the particular procedure of an international organization.

5. *The Agreement shall not apply to procurement of agricultural products made in furtherance of agricultural support programmes and human feeding programmes.*
6. *Contracts awarded by entities in Annexes 1 and 2 in connection with activities in the fields of drinking water, energy, transport or telecommunications are not included.*
7. *This Agreement shall not apply to contracts awarded by entities in Annex 3:*
- for the purchase of water and for the supply of energy or of fuels for the production of energy;*
 - for purposes other than the pursuit of their activities as described in this Annex or for the pursuit of such activities in a non-member country;*
 - for purposes of re-sale or hire to third parties, provided that the contracting entity enjoys no special or exclusive right to sell or hire the subject of such contracts and other entities are free to sell or hire it under the same conditions as the contracting entity.*
8. *This Agreement shall not be applicable to contracts:*
- for the acquisition or rental of land, existing buildings or other immovable property or concerning rights thereon;*
 - for the acquisition, development, production or co-production of programme material by broadcasters and contracts for broadcasting time.*
9. *This Agreement shall not be applicable to the award of service contracts by Spanish entities listed in Annex 3 before 1 January 1997 or to the award of contracts by Greek or Portuguese entities listed in Annex 3 before 1 January 1998.*
10. *The provision of services, including construction services, in the context of procurement procedures according to this Agreement is subject to the conditions and qualifications for market access and national treatment as will be required by Austria in conformity with her commitments under the GATS.*
11. *This Agreement shall not apply to contracts awarded to an entity in Finland which itself is a contracting authority within the meaning of the Public Procurement Act: •Laki julkisista hankinnoista• (1505/92), or in Sweden within the meaning of the •Lag om offentlig upphandling• (1992:1528), on the basis of an exclusive right which it enjoys pursuant to a law, regulation or administrative provision or to contracts of employment in Finland and Sweden.*

1 April 1997

12. When a specific procurement may impair important national policy objectives, the Finnish or Swedish Governments may consider it necessary in singular procurement cases to deviate from the principle of national treatment in the Agreement. A decision to this effect will be taken at Cabinet level. Finland also reserves its position with regard to the application of this Agreement to the Åland Islands (Ahvenanmaa).

(1) *Procurement of cables is excluded.*

(2) *With regard to procurement by Bezek, this Agreement shall apply only to goods and services of the US.*

Israel is willing to negotiate the opening of its telecommunication sector also to other Code members under the condition of reciprocity.

(3) *Excluded products: cables (H.S. 8544), electro-mechanic meters (ex. H.S. 9028), transformers (H.S. 8504), disconnectors and switchers (H.S. 8535-8537), electric motors (H.S. 8501).*

1 April 1997

*ANNEX 4**Services*

Of the Universal List of Services, as contained in document MTN.GNS/W/120, the following services are included:

<i>CPC</i>	<i>Description</i>
<i>8672-3</i>	<i>Architectural services</i>
<i>8671</i>	<i>Engineering services</i>
<i>8674</i>	<i>Urban planning</i>
<i>841-3</i>	<i>Computer and related services</i>
<i>871</i>	<i>Advertising services</i>
<i>864</i>	<i>Market research and public opinion</i>
<i>865-6</i>	<i>Management consulting</i>
<i>9401-5</i>	<i>Environmental services</i>

Note to Annex 4

The offer regarding services (including construction) is subject to the limitation and conditions specified in Israel's offer under the GATS negotiation.

*ANNEX 5**Construction Services**Definition:*

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification.

Threshold: 8,500,000 SDR

List of construction services offered

<i>CPC</i>	<i>Description</i>
<i>511</i>	<i>Pre-erection work at construction sites</i>
<i>512</i>	<i>Construction work for buildings</i>
<i>513</i>	<i>Construction work for civil engineering</i>
<i>514</i>	<i>Assembly and erection of prefabricated construction</i>
<i>515</i>	<i>Special trade construction work</i>
<i>516</i>	<i>Installation work</i>
<i>517</i>	<i>Building completion and finishing work</i>
<i>518</i>	<i>Renting services related to equipment for construction</i>

1 April 1997

GENERAL NOTES

- (1) The Agreement shall not apply to contracts awarded for purposes of re-sale or hire to third parties, provided that the contracting entity enjoys no special or exclusive right to sell or hire the subject of such contracts and other entities are free to sell or hire it under the same conditions as the contracting entity.*
- (2) The Agreement shall not apply to contracts for the purchase of water and for the supply of energy and of fuels for the production of energy.*
- (3) The Agreement shall not apply to the acquisition or rental of land, buildings or other immovable property, or concerning rights thereon.*

*NOTE**Offset*

1. Having regard to Article XVI and to general policy considerations regarding development, Israel may operate provisions which require the limited incorporation of domestic content, offset procurement or transfer of technology, in the form of objective and clearly defined conditions for participation in procedures for the award of contracts, which do not discriminate between other Parties.

This shall be done under the following terms:

(a) Israel shall ensure that its entities indicate the existence of such conditions in their tender notices and specify them clearly in the contract documents.

(b) Suppliers will not be required to purchase goods that are not offered on competitive terms, including price and quality, or to take any action which is not justified from a commercial standpoint.

(c) Offsets in any form may be required up to 35 per cent of the contract going down to 30 per cent after five years and 20 per cent after nine years, beginning from the date Israel implements the Agreement.

2. (a) At the end of each period of five and four years Israel will submit a report concerning the implementation of this Note.

(b) When the level of the offset has reached 20 per cent, Israel will consult with the Parties to this Agreement on the level of the use of offset by Israel. The review shall take into consideration inter alia general and economic developments in Israel, its trade balance, the actual performance within the framework of this Agreement and the views of the other Parties.

Notes to Annex 4

1. *Maintenance and repair services are not included with respect to those motor vehicles, motorcycles and snowmobiles which are specifically modified and inspected to meet regulations of the entities.*
2. *Courier services are not included with respect to letters.*
3. *Architectural, engineering and other technical services related to construction services, with the exception of the following services when procured independently, are included:*
 - *Final design services of CPC 86712 Architectural design services;*
 - *CPC 86713 Contract administration services;*
 - *Design services consisting of one or a combination of final plans, specifications and cost estimates of either CPC 86722 Engineering design services for the construction of foundations and building structures, or CPC 86723 Engineering design services for mechanical and electrical installations for buildings, or CPC 86724 Engineering design services for the construction of civil engineering works; and*
 - *CPC 86727 Other engineering services during the construction and installation phase.*
4. *Publishing and printing services are not included with respect to materials containing confidential information.*

*ANNEX 5**Construction Services**Definition:*

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification (CPC).

List of Division 51, CPC:

All services listed in Division 51.

*Threshold: 4,500 thousand SDR for entities set out in ANNEX 1;
15,000 thousand SDR for those in ANNEX 2; and
15,000 thousand SDR for those in ANNEX 3.*

GENERAL NOTES

1. For goods and services (including construction services) of Canada and suppliers of such goods and services, this Agreement does not apply to procurement by the entities listed in Annexes 2 and 3.

2. In case Parties do not apply Article XX to suppliers or service providers of Japan in contesting the award of contract by entities, Japan may not apply the Article to suppliers or service providers of the Parties in contesting the award of contracts by the same kind of entities.

Asterisks () designate part of as described in detail in the Revised Conditional Offer of the Republic of Korea Concerning Initial Commitments on Trade in Services.*

ANNEX 5

*Construction Services**Definition:*

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification.

*Threshold: 5,000,000 SDR for entities set out in Annex 1
15,000,000 SDR for entities set out in Annex 2
15,000,000 SDR for entities set out in Annex 3*

List of construction services offered:

<i>CPC</i>	<i>Description</i>
<i>511</i>	<i>Pre-erection work at construction sites</i>
<i>512</i>	<i>Construction work for buildings</i>
<i>513</i>	<i>Construction work for civil engineering</i>
<i>514</i>	<i>Assembly and erection of prefabricated construction</i>
<i>515</i>	<i>Special trade construction work</i>
<i>516</i>	<i>Installation work</i>
<i>517</i>	<i>Building completion and finishing work</i>

GENERAL NOTES

1. *Korea will not extend the benefits of this Agreement*

(a) as regards the award of contracts by the National Railroad Administration,

(b) as regards procurement for airports by the entities listed in Annex 1,

(c) as regards procurement for urban transportation (including subways) by the entities listed in Annexes 1 and 2

to the suppliers and service providers of member States of the European Communities, Austria, Norway, Sweden, Finland and Switzerland, until such time as Korea has accepted that those countries give comparable and effective access for Korean undertakings to their relevant markets.

2. For goods and services (including construction services) of Canada and suppliers of such goods and services, this Agreement does not apply to procurement by the entities listed in Annexes 2 and 3. Korea is prepared to amend this note at such time as coverage with respect to these Annexes can be resolved with Canada.

3. A service listed in Annex 4 is covered with respect to a particular party only to the extent that such party has included that service in its Annex 4.

Note to Annex 1

Procurement by defence entities (marked with an "*") covers products falling under the CCCN chapters specified in the General Notes.

ANNEX 2

*Entities which Procure in Accordance
With the Provisions of this Agreement*

Supplies

Threshold: SDR 200,000

Services (specified in Annex 4)

Threshold: SDR 200,000

Works (specified in Annex 5)

Threshold: SDR 5,000,000

List of Entities:

1. Contracting authorities of the regional or local public authorities (all counties (19) and municipalities (435)).
2. Bodies governed by public law, or associations formed by one or more such authorities or bodies governed by public law²³, including:

Norsk Rikskringkasting

The Norwegian Broadcasting Corporation

Norges Bank

Norges Bank

Statistisk Sentralbyrå

Statistics Norway

²³A body is considered to be governed by public law when it:

- is established for the specific purpose of meeting needs in the general interest, not being of a commercial or industrial nature, and
- has legal personality, and
- is financed for the most part by the State, or regional or local authorities, or other bodies governed by public law, or is subject to management supervision by those bodies, or has an administrative, managerial or supervisory board more than half of whose members are appointed by the State, regional or local authorities, or other bodies governed by public law.

*Other Entities which Procure in Accordance
With the Provisions of this Agreement*

Supplies

Threshold: SDR 400,000

Services (specified in Annex 4)**

Threshold: SDR 400,000

Works (specified in Annex 5)

Threshold: SDR 5,000,000

*List of Entities:*1. *The electricity sector:****

Public entities producing, transporting or distributing electricity pursuant to Lov om bygging og drift av elektriske anlegg (LOV 1969-06-19), Lov om erverv av vannfall, bergverk og annen fast eiendom m.v., Kap. I, jf. kap. V (LOV 19-17-24 16, kap. I), or Vassdragsreguleringsloven (LOV 1917-12-14 17) or Energiloven (LOV 1990-06-29 50).

2. *Urban transport:*

Public entities which have as one of their activities the operation of networks providing a service to the public in the field of transport by automated systems, urban railway, tramway, trolley bus, bus or cable according to Lov om anlegg og drift av jernbane, herunder sporvei, tunellbane og forstadsbane m.m. (LOV 1993-06-11 100), or Lov om samferdsel (LOV 1976-06-04 63) or Lov om anlegg av taugbaner og løipestrenger (LOV 1912-06-14 1).

3. *Airports:*

Public entities providing airport facilities pursuant to Lov om luftfart (LOV 1960-12-16 1).

Luftfartsverket
Administration

National

Civil

Aviation

1 April 1997

4. *Ports:*

Public entities operating pursuant to Havneloven (LOV 1984-06-08 51).

5. *Water supply:****

Public entities producing or distributing water pursuant to Forskrift om Drikkevann og Vannforsyning (FOR 1951 - 09-28).

Notes to Annex 3

* Annex 3 is subject to Parliamentary approval of additional EEA-legislation in this field.

** This Agreement shall not apply to service contracts which:

- (a) a contracting entity awards to an affiliated undertaking;
- (b) are awarded by a joint venture formed by a number of contracting entities for the purpose of carrying out a relevant activity within the meaning of paragraphs 1-5 of this Annex to one of those contracting entities or to an undertaking which is affiliated with one of these contracting entities;

provided that at least 80 per cent of the average turnover of that undertaking with respect to services arising within the EEA for the three preceding years derives from the provision of such services to undertakings with which it is affiliated. When more than one undertaking affiliated with the contracting entity provides the same service or similar services, the total turnover deriving from the provision of services by those undertakings shall be taken into account.

***The supply of drinking water and electricity to networks which provide a service to the public by a contracting entity other than a public authority shall not be considered as a relevant activity within the meaning of paragraphs 1 and 5 of Annex 3 where:

-the production of drinking water or electricity by the entity concerned takes place because its consumption is necessary for carrying out an activity other than that referred to in paragraphs 1 and 5 of this Annex, and

-supply to the public network depends only on the entity's own consumption and has not exceeded 30 per cent of the entity's total production of drinking water or energy, having regard to the average for the preceding three years, including the current year.

ANNEX 4

Services

Of the Universal List of Services, as contained in document MTN.GNS/W/120, the following services are included:*

<i>Subject</i>	<i>CPC Reference N</i>
Maintenance and repair services	6112, 6122, 633, 886
Land transport services, including armoured car 7512, 87304 services, and courier services, except transport of mail	712 (except 712235),
Air transport services of passengers and freight, except transport of mail	73 (except 7321)
Transport of mail by land, except rail, and by air	71235, 7321
Telecommunications services 7525, 7526)	752** (except 7524,
Financial services	ex 81
(a) Insurance services	812, 814
(b) Banking and investment services***	
Computer and related services	84
Accounting, auditing and bookkeeping services	862
Market research and public opinion polling services	864
Management consulting services and related services	865, 866****
Architectural services; engineering services and integrated engineering services, urban planning	867

1 April 1997

and landscape architectural services; related scientific and technical consulting services; technical consulting services; technical testing and analysis services

Advertising services

871

Building-cleaning services and property management services

874, 82201-82206

Subject

CPC Reference N

Publishing and printing services on a fee or contract basis

88442

Sewage and refuse disposal; sanitation and similar services

94

Notes to Annex 4

*except for services which entities have to procure from another entity pursuant to an exclusive right established by a published law, regulation or administrative provision

**except voice telephony, telex, radiotelephony, paging and satellite services

***except contracts for financial services in connection with the issue, sale, purchase, or transfer of securities or other financial instruments, and central bank services

****except arbitrations and conciliation services

ANNEX 5

*Construction Services**Definition:*

A construction service contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification (CPC).

List of Division 51, CPC:

All public works/construction services of Division 51.

GENERAL NOTES AND DEROGATIONS FROM THE PROVISIONS OF ARTICLE III

1. Norway will not extend the benefits of this Agreement:

-as regards the award of contracts by entities listed in Annex 2 to the suppliers and service providers of Canada;

-as regards the award of contracts, other than for supplies, listed in Annex 2 to the suppliers and service providers of the USA;

- as regards the award of contracts by entities listed in Annex 3 paragraph

(1)(electricity), to the suppliers and service providers of Canada, Hong Kong and Japan;

(2)(urban transport), to the suppliers and service providers of Canada, Israel, Japan, Korea and the USA;

(3)(airports), to the suppliers and service providers of Canada, Korea and the USA;

(4)(ports), to the suppliers and service providers of Canada;

(5)(water), to the suppliers and service providers of Canada and the USA;

until such time as Norway has accepted that the Parties concerned give comparable and effective access for Norwegian undertakings to the relevant markets;

-to service providers of Parties which do not include the relevant service contracts for the relevant entities in Annexes 1 to 3 and the relevant service category under Annexes 4 and 5 in their own coverage.

2. The provisions of Article XX shall not apply to suppliers and service providers of:

-Israel, Japan, Korea and Switzerland in contesting the award of contracts by entities listed under Annex 2, paragraph 2, until such time as Norway accepts that they have completed coverage of sub-central entities;

-Japan, Korea and the USA in contesting the award of contracts to a supplier or service provider of Parties other than those mentioned, which are small or

1 April 1997

medium-sized enterprises under the relevant provisions in Norway, until such time as Norway accepts that they no longer operate discriminatory measures in favour of certain domestic small and minority businesses;

-Israel, Japan and Korea in contesting the award of contracts by Norwegian entities, whose value is less than the threshold applied for the same category of contracts awarded by these Parties.

3. Until such time as Norway has accepted that the Parties concerned provide access for Norwegian suppliers and service providers to their own markets, Norway will not extend the benefits of this Agreement to suppliers and service providers of:

-Canada as regards procurement of FSC 36, 70 and 74 (special industry machinery; general purpose automatic data processing equipment, software, supplies and support equipment (except 7010 ADPE configurations); office machines, visible record equipment and ADP equipment);

-Canada as regards procurement of FSC 58 (communications, protection and coherent radiation equipment) and the USA as regards air traffic control equipment.

-Israel and Korea as regards procurement by entities listed in Annex 3, paragraph 1, as regards procurement of HS Nos 8504, 8535, 8537 and 8544 (electrical transformers, plugs, switches and insulated cables); and for Israel, HS Nos 8501, 8536 and 902830;

-Canada and the USA as regards contracts for good or service components of contracts which, although awarded by an entity covered by this Agreement, are not themselves subject to this Agreement.

4. Contracts awarded by entities in Annexes 1 and 2 in connection with activities in the fields of drinking water, energy, transport or telecommunications, are not included.

5. With regard to Annex 3, this Agreement shall not apply to the following contracts:

-contracts which the contracting entities under paragraph 5 award for the purchase of water;

- contracts which the contracting entities under paragraph 1 award for the supply of energy or of fuels for the production of energy;
- contracts which the contracting entities award for purposes other than the pursuit of their activities as described in this Annex or for the pursuit of such activities in a non-EEA country;
- contracts awarded for purposes of re-sale or hire to third parties provided that the contracting entity enjoys no special or exclusive right to sell or hire the subject of such contracts and that other entities are free to sell or hire it under the same conditions as the contracting entity;
- contracting entities exercising activities in the bus transportation sector where other entities are free to offer the same services in the same geographical area and under substantially the same conditions.

6. With regard to Annex 4, this Agreement shall not apply to the following:

- contracts for the acquisition or rental, by whatever financial means, of land, existing buildings, or other immovable property or concerning rights thereon;
- contracts for the acquisition, development, production or co-production of programme material by broadcasters and contracts for broadcasting time;
- contracts awarded to an entity which is itself a contracting authority within the meaning of the Public Procurement Act: "Lov om offentlige anskaffelser m.v." (LOV 1992-11-27 116) on the basis of an exclusive right which it enjoys pursuant to a published law, regulation or administrative provision;
- contracts of employment.

7. The Agreement shall not apply to contracts awarded under:

- an international agreement and intended for the joint implementation or exploitation of a project by the signatory States;
- an international agreement relating to the stationing of troops;
- the particular procedure of an international organization.

8. The Agreement shall not apply to procurement of agricultural products made in furtherance of agricultural support programmes and human feeding programmes.
9. The thresholds in the Annexes will be applied so as to conform with the public procurement thresholds of the EEA agreement.
10. This Agreement does not apply to procurement subject to secrecy or other particular restrictions with regard to the safety of the realm.
11. When a specific procurement may impair important national policy objectives, the Norwegian Government may consider it necessary in singular procurement cases to deviate from the principle of national treatment in the Agreement. A decision to this effect will be taken at the Norwegian Cabinet level.
12. Norway reserves its position with regard to the application of this Agreement to Svalbard, Jan Mayen Island and Norway's Antarctic possessions.

Defence Entities:

Procurement by defence entities (marked with an "*" in Annex 1) covers the following:

Chapter 25: Salt; sulphur; earths and stone; plastering materials, lime and cement

Chapter 26: Metallic ores, slag and ash

Chapter 27: Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes

except:

ex 27.10 special engine fuels

Chapter 28: Inorganic chemicals; organic and inorganic compounds of precious metals, of rare earth metals, of radio-active elements and of isotopes

except:

ex 28.09 explosives

ex 28.13 explosives

ex 28.14 tear gas

ex 28.28 explosives

ex 28.32 explosives

ex 28.39 explosives

ex 28.50 toxic products

ex 28.51 toxic products

ex 28.54 explosives

Chapter 29: Organic chemicals

except:

ex 29.03 explosives

ex 29.04 explosives

ex 29.07 explosives

ex 29.08 explosives

ex 29.11 explosives

ex 29.12 explosives

ex 29.13 toxic products

ex 29.14 toxic products

ex 29.15 toxic products

ex 29.21 toxic products

ex 29.22 toxic products

ex 29.23 toxic products

ex 29.26 explosives

ex 29.27 toxic products

ex 29.29 explosives

Chapter 30: Pharmaceutical products

Chapter 31: Fertilizers

Chapter 32: Tanning and dyeing extracts; tannins and their derivatives; dyes, colours, paints and varnishes, putty, fillers and stoppings, inks

Chapter 33: Essential oils and resinoids; perfumery, cosmetics and toilet preparations

Chapter 34: Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes, polishing and scouring preparations, candles and similar articles, modelling pastes and "dental waxes"

Chapter 35: Albuminoidal substances; glues; enzymes

Chapter 37: Photographic and cinematographic goods

Chapter 38: Miscellaneous chemical products

except:

ex 38.19 toxic products

Chapter 39: Artificial resins and plastic materials, cellulose esters and ethers, articles thereof

except:

ex 39.03 explosives

Chapter 40: Rubber, synthetic rubber, factice, and articles thereof

except:

ex 40.11 bullet-proof tyres

Chapter 41: Raw hides and skins (other than furskins) and leather

Chapter 42: Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles of animal gut (other than silk-worm gut)

Chapter 43: Furskins and artificial fur; manufactures thereof

Chapter 44: Wood and articles of wood; wood charcoal

- Chapter 45: Cork and articles of cork
- Chapter 46: Manufactures of straw of esparto and of other plaiting materials; basketware and wickerwork
- Chapter 47: Paper-making material
- Chapter 48: Paper and paperboard; articles of paper pulp, of paper or of paperboard
- Chapter 49: Printed books, newspapers, pictures and other products of the printing industry; manuscripts, typescripts and plans
- Chapter 65: Headgear and parts thereof
- Chapter 66: Umbrellas, sunshades, walking-sticks, whips, riding-crops and parts thereof
- Chapter 67: Prepared feathers and down and articles made of feathers or of down; artificial flowers; articles of human hair
- Chapter 68: Articles of stone, of plaster, of cement, of asbestos, of mica and of similar materials
- Chapter 69: Ceramic products
- Chapter 70: Glass and glassware
- Chapter 71: Pearls, precious and semi-precious stones, precious metals, rolled precious metals, and articles thereof; imitation jewellery
- Chapter 73: Iron and steel and articles thereof
- Chapter 74: Copper and articles thereof
- Chapter 75: Nickel and articles thereof
- Chapter 76: Aluminium and articles thereof
- Chapter 77: Magnesium and beryllium and articles thereof
- Chapter 78: Lead and articles thereof
- Chapter 79: Zinc and articles thereof
- Chapter 80: Tin and articles thereof
- Chapter 81: Other base metals employed in metallurgy and articles thereof
- Chapter 82: Tools, implements, cutlery, spoons and forks, of base metal; parts thereof
- except:
- ex 82.05 tools
- ex 82.07 tools, parts
- Chapter 83: Miscellaneous articles of base metal
- Chapter 84: Boilers, machinery and mechanical appliances; parts thereof
- except:
- ex 84.06 engines
- ex 84.08 other engines
- ex 84.45 machinery
- ex 84.53 automatic data-processing machines
- ex 84.55 parts of machines under heading 84.53
- ex 84.59 nuclear reactors
- Chapter 85: Electrical machinery and equipment; parts thereof

- except:
 ex 85.13 telecommunication equipment
 ex 85.15 transmission apparatus
- Chapter 86: Railway and tramway locomotives, rolling-stock and parts thereof
 except:
 ex 86.02 armoured locomotives, electric
 ex 86.03 other armoured locomotives
 ex 86.05 armoured wagons
 ex 86.06 repair wagons
 ex 86.07 wagons
- Chapter 87: Vehicles, other than railway or tramway rolling-stock, and parts thereof
 except:
 ex 87.01 tractors
 ex 87.02 military vehicles
 ex 87.03 breakdown lorries
 ex 87.08 tanks and other armoured vehicles
 ex 87.09 motorcycles
 ex 87.14 trailers
- Chapter 89: Ships, boats and floating structures
 except:
 ex 89.01A warships
- Chapter 90: Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus; parts thereof
 except:
 ex 90.05 binoculars
 ex 90.13 miscellaneous instruments, lasers
 ex 90.14 telemeters
 ex 90.28 electrical and electronic measuring instruments
 ex 90.11 microscopes
 ex 90.17 medical instruments
 ex 90.18 mechano-therapy appliances
 ex 90.19 orthopaedic appliances
 ex 90.20 X-ray apparatus
- Chapter 91: Clocks and watches and parts thereof
- Chapter 92: Musical instruments; sound recorders or reproducers; television image and sound recorders or reproducers; parts and accessories of such articles
- Chapter 94: Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
 except:
 ex 94.01A aircraft seats
- Chapter 95: Articles and manufactures of carving or moulding material

Chapter 96: Brooms, brushes, powder-puffs and sieves

Chapter 98: Miscellaneous manufactured articles

SUISSE

(La version française fait foi)

ANNEXE 1

*Entités du gouvernement fédéral qui passent des marchés
conformément aux dispositions du présent accord*

Fournitures

Valeur de seuil: 130 000 DTS

Services (spécifiés à l'Annexe 4)

Valeur de seuil: 130 000 DTS

Toutes les autres entités qui passent des marchés conformément aux dispositions du présent accord

Fournitures

Valeur de seuil: 400 000 DTS

Services (spécifiés à l'Annexe 4)

Valeur de seuil: 400 000 DTS

Services de construction (spécifiés à l'Annexe 5)

Valeur de seuil: 5 000 000 DTS

Liste des entités:

Les entités adjudicatrices qui sont des pouvoirs publics²⁸ ou des entreprises publiques²⁹ et qui exercent au moins une des activités suivantes:

1. la mise à disposition ou l'exploitation de réseaux fixes destinés à fournir un service au public dans le domaine de la production, du transport ou de la distribution

²⁸ *Pouvoir public: L'Etat, les collectivités territoriales, les organismes de droit public, les associations formées par une ou plusieurs de ces collectivités ou de ces organismes de droit public. Est considéré comme un organisme de droit public tout organisme:*

- *créé pour satisfaire spécifiquement des besoins d'intérêt général ayant un caractère autre qu'industriel ou commercial,*
- *doté d'une personnalité juridique et*

-dont soit l'activité est financée majoritairement par l'Etat, les collectivités territoriales ou d'autres organismes de droit public, soit la gestion est soumise à un contrôle par ces derniers, soit l'organe d'administration, de direction ou de surveillance est composé de membres dont plus de la moitié est désignée par l'Etat, les collectivités territoriales ou d'autres organismes de droit public.

²⁹ *Entreprise publique: toute entreprise sur laquelle les pouvoirs publics peuvent exercer directement ou indirectement une influence dominante du fait de la propriété, de la participation financière ou des règles qui la régissent. L'influence dominante est présumée lorsque les pouvoirs publics, directement ou indirectement, à l'égard de l'entreprise:*

- *détiennent la majorité du capital souscrit de l'entreprise ou*
- *disposent de la majorité des voix attachées aux parts émises par l'entreprise ou*
- *peuvent désigner plus de la moitié des membres de l'organe d'administration, de direction ou de surveillance de l'entreprise.*

1 April 1997

d'eau potable ou l'alimentation de ces réseaux en eau potable (spécifiés sous titre I);

2.la mise à disposition ou l'exploitation de réseaux fixes destinés à fournir un service au public dans le domaine de la production, du transport ou de la distribution d'électricité ou l'alimentation de ces réseaux en électricité (spécifiés sous titre II);

3.l'exploitation de réseaux destinés à fournir un service au public dans le domaine du transport par chemin de fer urbain, systèmes automatiques, tramway, trolleybus, autobus ou câble (spécifiés sous titre III);

4.l'exploitation d'une aire géographique dans le but de mettre à la disposition des transporteurs aériens des aéroports ou d'autres terminaux de transport (spécifiés sous titre IV);

5.l'exploitation d'une aire géographique dans le but de mettre à la disposition des transporteurs fluviaux des ports intérieurs ou d'autres terminaux de transport (spécifiés sous titre V).

I. Production, transport ou distribution d'eau potable

Pouvoirs publics ou entreprises publiques de production, de transport et de distribution d'eau potable. Ces pouvoirs publics et entreprises publiques opèrent conformément à la législation cantonale ou locale, ou encore par le biais d'accords individuels respectant ladite législation.

Par exemple:

- Wasserverbund Regio Bern AG
- Hardwasser AG
- Gruppenwasserversorgung Liechtensteiner Oberland
- Gruppenwasserversorgung Liechtensteiner Unterland

II. Production, transport ou distribution d'électricité

Pouvoirs publics ou entreprises publiques de transport et de distribution d'électricité auxquels le droit d'expropriation peut être accordé conformément à la "loi fédérale du 24 juin 1902 concernant les installations électriques à faible et à fort courant".

Pouvoirs publics ou entreprises publiques de production d'électricité conformément à la "loi fédérale du 22 décembre 1916 sur l'utilisation des forces hydrauliques" et à la "loi fédérale du 23 décembre 1959 sur l'utilisation pacifique de l'énergie atomique et la protection contre les radiations".

Par exemple:

- Bernische Kraftwerke AG
- Nordostschweizerische Kraftwerke AG
- Liechtensteinische Kraftwerke

III. Transport par chemin de fer urbain, tramway, systèmes automatiques, trolleybus, autobus ou câble

Pouvoirs publics ou entreprises publiques exploitant des tramways au sens de l'article 2, 1er alinéa, de la "loi fédérale du 20 décembre 1957 sur les chemins de fer".

Pouvoirs publics ou entreprises publiques offrant des services de transport public au sens de l'article 4, 1er alinéa, de la "loi fédérale du 29 mars 1950 sur les entreprises de trolleybus".

Entreprise suisse des postes, téléphones et télégraphes (PTT) au sens de l'article 2 de la "loi fédérale du 18 juin 1993 sur le transport de voyageurs et les entreprises de transport par route".

Pouvoirs publics ou entreprises publiques qui, à titre professionnel, effectuent des courses régulières de transport de personnes selon un horaire, au sens de l'article 4 de la "loi fédérale du 18 juin 1993 sur le transport de voyageurs et les entreprises de transport par route".

Par exemple:

- Transports publics genevois

- Verkehrsbetriebe Zürich

IV. Aéroports

Pouvoirs publics ou entreprises publiques exploitant des aéroports en vertu d'une concession au sens de l'article 37 de la "loi fédérale du 21 décembre 1948 sur la navigation aérienne".

Par exemple:

- Flughafen Zürich-Kloten
- Aéroport de Genève-Cointrin
- Aérodrome civil de Sion

V. Ports intérieurs

Ports fluviaux des deux Bâle: pour le canton de Bâle-Ville, est déterminante la "loi du 13 novembre 1919 concernant l'administration des installations portuaires rhénanes de la ville de Bâle"; pour le canton de Bâle-Campagne est déterminante la "loi du 26 octobre 1936 sur la mise en place d'installations portuaires, de voies ferroviaires et de routes sur le "Sternenfeld" à Birsfelden, et dans l'"Au" à "Muttenz".

Notes relatives à l'Annexe 3

Le présent accord ne s'applique pas:

1. Aux marchés que les entités adjudicatrices passent à des fins autres que la poursuite de leurs activités décrites dans cette Annexe ou pour la poursuite de ces activités en dehors de Suisse.
2. Aux marchés passés à des fins de revente ou de location à des tiers, lorsque l'entité adjudicatrice ne bénéficie d'aucun droit spécial ou exclusif pour vendre ou louer l'objet de ces marchés et lorsque d'autres entités peuvent librement le vendre ou le louer dans les mêmes conditions que l'entité adjudicatrice.

1 April 1997

3. Aux marchés passés pour l'achat d'eau.
4. Aux marchés passés par une entité adjudicatrice autre que les pouvoirs publics, qui assure l'alimentation en eau potable ou en électricité des réseaux destinés à fournir un service au public, lorsque la production d'eau potable ou d'électricité par l'entité concernée a lieu parce que sa consommation est nécessaire à l'exercice d'une activité autre que celle visée dans cette Annexe sous chiffre I et II et lorsque l'alimentation du réseau public ne dépend que de la consommation propre de l'entité et n'a pas dépassé 30% de la production totale d'eau potable ou d'énergie de l'entité prenant en considération la moyenne des trois dernières années, y compris l'année en cours.
5. Aux marchés passés pour la fourniture d'énergie ou de combustibles destinés à la production d'énergie.
6. Aux marchés passés par les entités adjudicatrices assurant au public un service de transport par autobus, lorsque d'autres entités peuvent librement fournir ce service, soit d'une manière générale, soit dans une aire géographique spécifique, dans les mêmes conditions que les entités adjudicatrices.

ANNEXE 4

Services

Les services suivants qui figurent dans la Classification sectorielle des services reproduite dans le document MTN.GNS/W/120 sont inclus:

Objet Numéros de référence CPC (Classification centrale des produits)

Services d'entretien et de réparation	6112, 6122, 633, 886
Services de transport terrestre, y compris les services de véhicules blindés et les services de courrier, à l'exclusion des transports de courrier	712 (sauf 71235) 7512, 87304
Services de transport aérien: transport de voyageurs et de marchandises, à l'exclusion des transports de courrier	73 (sauf 7321)
Transport de courrier par transport terrestre (à l'exclusion des services de transport ferroviaire) et par air	71235, 7321
Services de télécommunications	752 ³⁰ (sauf 7524, 7525, 7526)
Services financiers:	ex 81
a) services d'assurances	812, 814
b) services bancaires et d'investissement ³¹	
Services informatiques et services connexes	84
Services comptables, d'audit et de tenue de livres	862

³⁰A l'exclusion des services de téléphonie vocale, de télex, de radiotéléphonie, de radiomessagerie et de télécommunication par satellite

³¹A l'exclusion des marchés des services financiers relatifs à l'émission, à l'achat, à la vente et au transfert de titres ou d'autres instruments financiers, ainsi que des services fournis par des banques centrales

APPENDIX I	SWITZERLAN D	ANNEX 4	French	Page 2/3
------------	-----------------	---------	--------	----------

Services d'études de marché et de sondages	864
Services de conseil en gestion et services connexes	865, 866 ³²
Services d'architecture; services d'ingénierie et services intégrés d'ingénierie; services d'aménagement urbain et d'architecture paysagère; services connexes de consultations scientifiques et techniques; services d'essais et d'analyses techniques	867
Services de publicité	871
Services de nettoyage de bâtiments et services de gestion de propriétés	874, 82201-82206
Services de publication et d'impression sur la base d'une redevance ou sur une base contractuelle	88442
Services de voirie et d'enlèvement des ordures: services d'assainissement et services analogues	94

Notes relatives à l'Annexe 4

Le présent accord ne s'applique pas:

1. Aux marchés de services attribués à une entité qui est elle-même un pouvoir adjudicateur au sens de l'Annexe 1, 2 ou 3 sur la base d'un droit exclusif dont elle bénéficie en vertu de dispositions législatives, réglementaires ou administratives publiées.
2. Aux marchés de services qu'une entité adjudicatrice passe auprès d'une entreprise liée ou passés par une coentreprise, constituée de plusieurs entités adjudicatrices aux fins de la poursuite des activités au sens de l'Annexe 3, auprès d'une de ces entités adjudicatrices ou d'une entreprise liée à une de ces entités adjudicatrices, pour autant que 80% au moins du chiffre d'affaires moyen que cette entreprise a réalisé au cours des trois dernières années en matière de services provienne de la

³²A l'exclusion des services d'arbitrage et de conciliation

fourniture de ces services aux entreprises auxquelles elle est liée. Lorsque le même service ou des services similaires sont fournis par plus d'une entreprise liée à l'entité adjudicatrice, il doit être tenu compte du chiffre d'affaires total résultant de la fourniture de services par ces entreprises.

3. Aux marchés de services qui ont pour objet l'acquisition ou la location, quelles qu'en soient les modalités financières, de terrains, de bâtiments existants ou d'autres biens immeubles ou qui concernent des droits sur ces biens.
4. Aux marchés de l'emploi.
5. Aux marchés visant l'achat, le développement, la production ou la coproduction d'éléments de programmes par des organismes de radiodiffusion et aux marchés concernant les temps de diffusion.

ANNEXE 5

*Services de Construction**Définition:*

Un contrat de services de construction est un contrat qui a pour objectif la réalisation, par quelque moyen que ce soit, de travaux de construction d'ouvrages de génie civil ou de bâtiments, au sens de la division 51 de la Classification centrale de produits (CPC).

Liste de services relevant de la division 51 de la CPC

Travaux de préparation des sites et chantiers de construction	511
Travaux de construction de bâtiments	512
Travaux de construction d'ouvrages de génie civil	513
Assemblage et construction d'ouvrages préfabriqués	514
Travaux d'entreprises de construction spécialisées	515
Travaux de pose d'installations	516
Travaux d'achèvement et de finition des bâtiments	517
Autres services	518

Valeur de seuil: 5 000 000 DTS

1 April 1997

Liste des matériels civils de la défense et de la protection civile soumis à l'accord

Chapitre 25: Sel; soufre; terres et pierres; plâtres; chaux et ciments

Chapitre 26: Minerais métallurgiques, scories et cendres

Chapitre 27: Combustibles minéraux, huiles minérales et produits de leur distillation; matières bitumineuses; cires minérales

Chapitre 28: Produits chimiques inorganiques; composés inorganiques ou organiques de métaux précieux, d'éléments radioactifs, de métaux des terres rares et d'isotopes

à l'exception de:

ex 28.09 : explosifs

ex 28.13 : explosifs

ex 28.14 : gaz lacrymogènes

ex 28.28 : explosifs

ex 28.32 : explosifs

ex 28.39 : explosifs

ex 28.50 : produits toxicologiques

ex 28.51 : produits toxicologiques

ex 28.54 : explosifs

Chapitre 29: Produits chimiques organiques

à l'exception de:

ex 29.03 : explosifs

ex 29.04 : explosifs

ex 29.07 : explosifs

ex 29.08 : explosifs

ex 29.11 : explosifs

ex 29.12 : explosifs

ex 29.13 : produits toxicologiques

ex 29.14 : produits toxicologiques

ex 29.15 : produits toxicologiques

ex 29.21 : produits toxicologiques

ex 29.22 : produits toxicologiques
 ex 29.23 : produits toxicologiques
 ex 29.26 : explosifs
 ex 29.27 : produits toxicologiques
 ex 29.29 : explosifs

Chapitre 30: Produits pharmaceutiques

Chapitre 31: Engrais

Chapitre 32: Extraits tannants ou tinctoriaux; tanins et leurs dérivés; matières colorantes, couleurs, peintures, vernis et teintures, mastics, encres

Chapitre 33: Huiles essentielles et résinoïdes; produits de parfumerie ou de toilette et cosmétiques

Chapitre 34: Savons, produits organiques tensio-actifs, préparations pour lessives, préparations lubrifiantes, cires artificielles, cires préparées, produits d'entretien, bougies et articles similaires, pâtes à modeler et "cires pour l'art dentaire"

Chapitre 35: Matières albuminoïdes; colles, enzymes

Chapitre 36: Poudres et explosifs; articles de pyrotechnie; allumettes; alliages pyrophoriques; matières inflammables

à l'exception de:

ex 36.01 : poudres
 ex 36.02 : explosifs préparés
 ex 36.04 : détonateurs
 ex 36.08 : explosifs

Chapitre 37: Produits photographiques et cinématographiques

Chapitre 38: Produits divers des industries chimiques

à l'exception de:

ex 38.19 : produits toxicologiques

Chapitre 39: Matières plastiques artificielles, éthers et esters de la cellulose, résines artificielles et ouvrages en ces matières

à l'exception de:

ex 39.03 : explosifs

Chapitre 40: Caoutchouc naturel ou synthétique, factice pour caoutchouc et ouvrages en caoutchouc

à l'exception de:

ex 40.11 : pneus

Chapitre 43: Pelleteries et fourrures, pelleteries factices

Chapitre 44: Bois, charbon de bois et ouvrages en bois

Chapitre 45: Liège et ouvrages en liège

Chapitre 46: Ouvrages de sparterie et de vannerie

Chapitre 47: Matières servant à la fabrication du papier

Chapitre 48: Papiers et cartons; ouvrages en pâte de cellulose, en papier et en carton

Chapitre 49: Articles de librairie et produits des arts graphiques

Chapitre 65: Coiffures et parties de coiffures

Chapitre 66: Parapluies, parasols, cannes, fouets, cravaches et leurs parties

Chapitre 67: Plumes et duvet apprêtés et articles en plumes ou en duvet; fleurs artificielles; ouvrages en cheveux

Chapitre 68: Ouvrages en pierres, plâtre, ciment, amiante, mica et matières analogues

Chapitre 69: Produits céramiques

Chapitre 70: Verre et ouvrages en verre

Chapitre 71: Perles fines, pierres gemmes et similaires, métaux précieux, plaqués ou doublés de métaux précieux et ouvrages en ces matières; bijouterie de fantaisie

Chapitre 73: Fonte, fer et acier

Chapitre 74: Cuivre

Chapitre 75: Nickel

Chapitre 76: Aluminium

Chapitre 77: Magnésium, beryllium (glucinium)

Chapitre 78: Plomb

Chapitre 79: Zinc

Chapitre 80: Etain

Chapitre 81: Autres métaux communs

Chapitre 82: Outillage; articles de coutellerie et couverts de table, en métaux communs

Chapitre 83: Ouvrages divers en métaux communs

Chapitre 84: Chaudières, machines, appareils et engins mécaniques

Chapitre 85: Machines et appareils électriques et objets servant à des usages électrotechniques

à l'exception de:

ex 85.03 : Piles électriques

ex 85.13 : Télécommunications

ex 85.15 : Appareils de transmission

Chapitre 86: Véhicules et matériaux pour voies ferrées; appareils de signalisation non électriques pour voies de communication

à l'exception de:

ex 86.02 : Locomotives blindées

ex 86.03 : autres locoblindées

ex 86.05 : Wagons blindés

ex 86.06 : Wagons ateliers

ex 86.07 : Wagons

Chapitre 87: Voitures automobiles, tracteurs, cycles et autres véhicules terrestres

à l'exception de:

87.08 : Cars et automobiles blindés

ex 87.02 : Camions lourds

ex 87.09 : Motocycles

ex 87.14 : Remorques

Chapitre 88: Navigation aérienne

à l'exception de:

ex 88.02 : Avions

Chapitre 89: Navigation maritime et fluviale

Chapitre 90: Instruments et appareils d'optique, de photographie et de cinématographie, de mesure, de vérification, de précision; instruments et appareils médico-chirurgicaux

à l'exception de:

ex 90.05 : Jumelles

ex 90.13 : Instruments divers, lasers

ex 90.14 : Télémètres

ex 90.28 : Instruments de mesure électriques ou électroniques

Chapitre 91: Horlogerie

Chapitre 92: Instruments de musique; appareils d'enregistrement ou de reproduction du son; appareils d'enregistrement ou de reproduction des images et du son en télévision; parties et accessoires de ces instruments et appareils

Chapitre 93: Armes et munitions

à l'exception de:

ex 93.01 : Armes blanches

ex 93.02 : Pistolets

ex 93.03 : Armes de guerre

ex 93.04 : Armes à feu

ex 93.05 : Autres armes

ex 93.07 : Projectiles et munitions

Chapitre 94: Meubles; mobilier médico-chirurgical; articles de literie et similaires

Chapitre 95: Matières à tailler et à mouler, à l'état travaillé (y compris les ouvrages)

Chapitre 96: Ouvrages de broserie et pinceaux, balais, houppes et articles de tamiserie

Chapitre 98: Ouvrages divers

APPENDIX I	SWITZERLAND	GENERAL	<i>French</i>	Page 1/2
	D	NOTES		

NOTES GENERALES ET DEROGATIONS AUX DISPOSITIONS
DE L'ARTICLE III

1. La Suisse n'étendra pas le bénéfice des dispositions du présent accord:

-en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 2 aux fournisseurs de produits et de services du Canada et des Etats-Unis d'Amérique;

-en ce qui concerne les marchés passés par les entités mentionnées à l'Annexe 3 dans les secteurs suivants;

-eau: aux fournisseurs de produits et de services du Canada et des Etats-Unis d'Amérique;

-électricité: aux fournisseurs de produits et de services du Canada, de Hong Kong, du Japon et des Etats-Unis d'Amérique;

-aéroports: aux fournisseurs de produits et de services du Canada, de la Corée et des Etats-Unis d'Amérique;

-ports: aux fournisseurs de produits et de services du Canada et des Etats-Unis d'Amérique;

-transports urbains: aux fournisseurs de produits et de services du Canada, d'Israël, du Japon, de la Corée et des Etats-Unis d'Amérique;

tant qu'elle n'aura pas constaté que les Parties concernées assurent aux entreprises suisses un accès comparable et effectif aux marchés considérés;

-aux fournisseurs de services des Parties qui n'incluent pas, dans leurs propres listes, les marchés de services passés par les entités mentionnées aux Annexes 1 à 3 et concernant les catégories de services visées aux Annexes 4 et 5.

2. Les dispositions de l'Article XX ne sont pas applicables aux fournisseurs de produits et de services des pays suivants:

-Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication de marchés par les organismes mentionnés à l'Annexe 2, chiffre 2, tant que

APPENDIX I	SWITZERLAND	GENERAL	<i>French</i>	Page 2/2
	D	NOTES		

la Suisse n'a pas constaté que ces pays ont complété la liste des entités des gouvernements sous-centraux;

-Japon, Corée et Etats-Unis d'Amérique en ce qui concerne les recours intentés contre l'adjudication de marchés à un fournisseur de produits ou de services d'autres Parties au présent accord, lorsque ledit fournisseur est une entreprise petite ou moyenne au sens du droit suisse, tant que la Suisse n'aura pas constaté que ces pays n'appliquent plus de mesures discriminatoires pour favoriser certaines petites entreprises nationales ou certaines entreprises nationales détenues par les minorités;

-Israël, Japon et Corée en ce qui concerne les recours intentés contre l'adjudication par des entités suisses de marchés dont la valeur est inférieure au seuil appliqué à la même catégorie de marchés par lesdites Parties.

3. Tant que la Suisse n'aura pas constaté que les Parties concernées assurent l'accès de leurs marchés aux fournisseurs suisses de produits et de services suisses, elle n'étendra pas le bénéfice des dispositions du présent accord aux fournisseurs de produits et de services des pays suivants:

-Canada, en ce qui concerne les marchés portant sur les produits relevant des n° 36, 70 et 74 de la FSC (machines industrielles spéciales; matériel d'informatique général, logiciel, fournitures et matériel auxiliaire (sauf 7010: Configurations d'équipement de traitement automatique des données); machines de bureau, matériel de bureautique et d'informatique de bureau;

-Canada, en ce qui concerne les marchés portant sur les produits relevant du n° 58 de la FSC (matériel de communications, matériel de détection des radiations et d'émission de rayonnement cohérent) et Etats-Unis d'Amérique en ce qui concerne les équipements de contrôle du trafic aérien;

-Corée et Israël en ce qui concerne les marchés passés par les entités énumérées à l'Annexe 3, chiffre 2 pour les produits relevant des n° 8504, 8535, 8537 et 8544 du SH (transformateurs électriques, prises de courant, interrupteurs et câbles isolés); Israël, en ce qui concerne les produits relevant des n° 8501, 8536 et 902830 du SH;

-Canada et Etats-Unis d'Amérique en ce qui concerne les marchés de fournitures et de services entrant dans le cadre de marchés qui, tout en étant passés par

APPENDIX I	SWITZERLAND	GENERAL NOTES	<i>French</i>	Page 3/2
------------	-------------	------------------	---------------	----------

une entité relevant du champ d'application du présent accord, ne sont pas eux-mêmes soumis à ce dernier.

4. Le présent accord n'est pas applicable aux marchés passés en vertu:
 - d'un accord international et portant sur la réalisation ou l'exploitation en commun d'un ouvrage par les Etats signataires;
 - de la procédure spécifique d'une organisation internationale.
5. Le présent accord n'est pas applicable aux marchés de produits agricoles passés en application de programmes de soutien à l'agriculture ou de programmes d'aide alimentaire.
6. Les engagements pris par la Suisse dans le domaine des services au titre du présent accord sont limités aux engagements initiaux spécifiés dans l'offre finale suisse présentée dans le cadre de l'Accord général sur le commerce des services.

UNITED STATES

(Authentic in the English language only)

ANNEX 1

*Central Government Entities which Procure in Accordance
With the Provisions of this Agreement*

Threshold: 130,000 SDRs for supplies and services
5 million SDRs for construction

List of Entities:

1. Department of Agriculture (not including procurement of agricultural products made in furtherance of agricultural support programmes or human feeding programmes)
2. Department of Commerce (not including shipbuilding activities of NOAA, as excluded in Annex 4)
3. Department of Education
4. Department of Health and Human Services
5. Department of Housing and Urban Development
6. Department of the Interior (including the Bureau of Reclamation)
7. Department of Justice
8. Department of Labor
9. Department of State
10. United States Agency for International Development (not including procurement for the direct purpose of providing foreign assistance)
11. Department of the Treasury
12. Department of Transportation (not including procurement by the Federal Aviation Administration, and pursuant to Article XXIII, the national security considerations applicable to the Department of Defense are equally applicable to the Coast Guard, a military unit of the United States)
13. Department of Energy (pursuant to Article XXIII, national security exceptions include procurements made in support of safeguarding nuclear materials or technology and entered into under the authority of the Atomic Energy Act, and oil purchases related to the Strategic Petroleum Reserve)

1 April 1997

14. General Services Administration (except Federal Supply Groups 51 and 52 and Federal Supply Class 7340)
15. National Aeronautics and Space Administration
16. The Department of Veterans Affairs
17. Environmental Protection Agency
18. United States Information Agency
19. National Science Foundation
20. Panama Canal Commission
21. Executive Office of the President
22. Farm Credit Administration
23. National Credit Union Administration
24. Merit Systems Protection Board
25. ACTION
26. United States Arms Control and Disarmament Agency
27. Office of Thrift Supervision
28. Federal Housing Finance Board
29. National Labor Relations Board
30. National Mediation Board
31. Railroad Retirement Board
32. American Battle Monuments Commission
33. Federal Communications Commission
34. Federal Trade Commission
35. Interstate Commerce Commission
36. Securities and Exchange Commission
37. Office of Personnel Management
38. United States International Trade Commission
39. Export-Import Bank of the United States
40. Federal Mediation and Conciliation Service
41. Selective Service System
42. Smithsonian Institution
43. Federal Deposit Insurance Corporation
44. Consumer Product Safety Commission
45. Equal Employment Opportunity Commission
46. Federal Maritime Commission
47. National Transportation Safety Board
48. Nuclear Regulatory Commission
49. Overseas Private Investment Corporation
50. Administrative Conference of the United States
51. Board for International Broadcasting
52. Commission on Civil Rights
53. Commodity Futures Trading Commission
54. Peace Corps

55. National Archives and Records Administration
56. Advisory Commission on Intergovernmental Relations
57. African Development Foundation
58. Alaska Natural Gas Transportation System
59. Appalachian Regional Commission
60. Commission of Fine Arts
61. Delaware River Basin Commission
62. Federal Election Commission
63. Federal Emergency Management Agency
64. Federal Home Loan Mortgage Corporation
65. Federal Maritime Commission
66. Federal Mine Safety and Health Review Commission
67. Federal Reserve System
68. Federal Retirement Thrift Investment Board
69. Holocaust Memorial Council
70. Inter-American Foundation
71. National Capital Planning Commission
72. National Commission on Libraries and Information Science
73. National Council on Disability
74. National Foundation on the Arts and the Humanities
75. Occupational Safety and Health Review Commission
76. Office of Government Ethics
77. Office of the Nuclear Waste Negotiator
78. Office of Special Counsel
79. Resolution Trust Corporation Oversight Board
80. Small Business Administration
81. Susquehanna River Basin Commission
82. Pennsylvania Avenue Development Corporation
83. Federal Crop Insurance Corporation
84. Federal Prison Industries, Inc.
85. Government National Mortgage Association
86. Uranium Enrichment Corporation
87. Department of Defense, including the Corps of Army Engineers

This Agreement will not apply to the following purchases of the Department of Defense:

- (a) Federal Supply Classification (FSC) 83 - all elements of this classification other than pins, needles, sewing kits, flagstuffs, flagpoles, and flagstaff trucks;
- (b) FSC 84 - all elements other than sub-class 8460 (luggage);
- (c) FSC 89 - all elements other than sub-class 8975 (tobacco products);
- (d) FSC 2310 - (buses only);

1 April 1997

- (e) Speciality metals, defined as steels melted in steelmanufacturing facilities located in the United States or its possessions, where the maximum alloy content exceeds one or more of the following limits, must be used in products purchased by DOD: (1) manganese, 1.65 per cent; silicon, 0.60 per cent; or copper, 0.06 per cent; or which contains more than 0.25 per cent of any of the following elements: aluminium, chromium, cobalt, columbium, olybdenum, nickel, titanium, tungsten, or vanadium; (2) metal alloys consisting of nickel, iron-nickel and cobalt base alloys containing a total of other alloying metals (except iron) in excess of 10 per cent; (3) titanium and titanium alloys; or (4) zirconium base alloys;
- (f) FSC 19 and 20 - that part of these classifications defined as naval vessels or major components of the hull or superstructure thereof;
- (g) FSC 51 and 52;
- (h) Following FSC categories are not generally covered due to application of Article XXIII, paragraph 1: 10, 12, 13, 14, 15, 16, 17, 19, 20, 28, 31, 58, 59, 95.

This Agreement will generally apply to purchases of the following FSC categories subject to United States Government determinations under the provisions of Article XXIII, paragraph 1.

- FSC 22 Railway Equipment
- 23 Motor Vehicles, Trailers, and Cycles (except buses in 2310)
- 24 Tractors
- 25 Vehicular Equipment Components
- 26 Tyres and Tubes
- 29 Engine Accessories
- 30 Mechanical Power Transmission Equipment
- 32 Woodworking Machinery and Equipment
- 34 Metalworking Machinery
- 35 Service and Trade Equipment
- 36 Special Industry Machinery
- 37 Agricultural Machinery and Equipment
- 38 Construction, Mining, Excavating, and Highway Maintenance Equipment
- 39 Materials Handling Equipment
- 40 Rope, Cable, Chain and Fittings
- 41 Refrigeration and Air Conditioning Equipment
- 42 Fire Fighting, Rescue and Safety Equipment
- 43 Pumps and Compressors
- 44 Furnace, Steam Plant, Drying Equipment and Nuclear Reactors
- 45 Plumbing, Heating and Sanitation Equipment
- 46 Water Purification and Sewage Treatment Equipment
- 47 Pipe, Tubing, Hose and Fittings

48Valves
49Maintenance and Repair Shop Equipment
53Hardware and Abrasives
54Prefabricated Structures and Scaffolding
55Lumber, Millwork, Plywood and Veneer
56Construction and Building Materials
61Electric Wire, and Power and Distribution Equipment
62Lighting Fixtures and Lamps
63Alarm and Signal Systems
65Medical, Dental, and Veterinary Equipment and Supplies
66Instruments and Laboratory Equipment
67Photographic Equipment
68Chemicals and Chemical Products
69Training Aids and Devices
70General Purpose ADPE, Software, Supplies and Support Equipment
71Furniture
72Household and Commercial Furnishings and Appliances
73Food Preparation and Serving Equipment
74Office Machines, Visible Record Equipment and ADP Equipment
75Office Supplies and Devices
76Books, Maps and Other Publications
77Musical Instruments, Phonographs, and Home Type Radios
78Recreational and Athletic Equipment
79Cleaning Equipment and Supplies
80Brushes, Paints, Sealers and Adhesives
81Containers, Packaging and Packing Supplies
85Toiletries
87Agricultural Supplies
88Live Animals
91Fuels, Lubricants, Oils and Waxes
93Non-metallic Fabricated Materials
94Non-metallic Crude Materials
96Ores, Minerals and their Primary Products
99Miscellaneous

Note to Annex 1

The conditions specified in the General Notes apply to this Annex.

1 April 1997

ANNEX 2

*Sub-Central Government Entities which Procure in Accordance
With the Provisions of this Agreement*

Threshold: 355,000 SDRs for supplies and services
5 million SDRs for construction

List of Entities:

Arizona

Executive branch agencies

Arkansas

Executive branch agencies, including universities but excluding the Office of Fish and Game and construction services

California

Executive branch agencies

Colorado

Executive branch agencies

Connecticut

Department of Administrative Services
Connecticut Department of Transportation
Connecticut Department of Public Works
Constituent Units of Higher Education

Delaware*

Administrative Services (Central Procurement Agency)
State Universities
State Colleges

1 April 1997

Florida*

Executive branch agencies

Hawaii

Department of Accounting and General Services (with the exception of procurements of software developed in the state and construction)

Idaho

Central Procurement Agency (including all colleges and universities subject to central purchasing oversight)

Illinois*

Department of Central Management Services

Iowa*

Department of General Services
Department of Transportation
Board of Regents' Institutions (universities)

Kansas

Executive branch agencies, excluding construction services, automobiles and aircraft

Kentucky

Division of Purchases, Finance and Administration Cabinet, excluding construction projects

Louisiana

Executive branch agencies

Maine*

Department of Administrative and Financial Services
Bureau of General Services (covering state government agencies)

and school construction)
Maine Department of Transportation

Maryland*

Office of the Treasury
Department of the Environment
Department of General Services
Department of Housing and Community Development
Department of Human Resources
Department of Licensing and Regulation
Department of Natural Resources
Department of Public Safety and Correctional Services
Department of Personnel
Department of Transportation

Massachusetts

Executive Office for Administration and Finance
Executive Office of Communities and Development
Executive Office of Consumer Affairs
Executive Office of Economic Affairs
Executive Office of Education
Executive Office of Elder Affairs
Executive Office of Environmental Affairs
Executive Office of Health and Human Service
Executive Office of Labor
Executive Office of Public Safety
Executive Office of Transportation and Construction

Michigan*

Department of Management and Budget

Minnesota

Executive branch agencies

Mississippi

Department of Finance and Administration (does not include services)

Missouri

Office of Administration
Division of Purchasing and Materials Management

Montana

Executive branch agencies (only for services and construction)

New York*

State agencies
State university system
Public authorities and public benefit corporations, with the exception of those entities with multi-state mandates

In addition to the exceptions noted at the end of this annex, transit cars, buses and related equipment are not covered.

Nebraska

Central Procurement Agency

New Hampshire*

Central Procurement Agency

Oklahoma*

Office of Public Affairs and all state agencies and departments subject to the Oklahoma Central Purchasing Act, excluding construction services.

Oregon

Department of Administrative Services

Pennsylvania*

Executive branch agencies, including:

Governor's Office
Department of the Auditor General

Treasury Department
Department of Agriculture
Department of Banking
Pennsylvania Securities Commission
Department of Health
Department of Transportation
Insurance Department
Department of Aging
Department of Correction
Department of Labor and Industry
Department of Military Affairs
Office of Attorney General
Department of General Services
Department of Education
Public Utility Commission
Department of Revenue
Department of State
Pennsylvania State Police
Department of Public Welfare
Fish Commission
Game Commission
Department of Commerce
Board of Probation and Parole
Liquor Control Board
Milk Marketing Board
Lieutenant Governor's Office
Department of Community Affairs
Pennsylvania Historical and Museum Commission
Pennsylvania Emergency Management Agency
State Civil Service Commission
Pennsylvania Public Television Network
Department of Environmental Resources
State Tax Equalization Board
Department of Public Welfare
State Employees' Retirement System
Pennsylvania Municipal Retirement Board
Public School Employees' Retirement System
Pennsylvania Crime Commission
Executive Offices

Rhode Island

Executive branch agencies, excluding boats, automobiles, buses and related equipment

South Dakota

Central Procuring Agency (including universities and penal institutions)

In addition to the exceptions noted at the end of this annex, procurements of beef are not covered.

Tennessee

Executive branch agencies (excluding services and construction)

Texas

General Services Commission

Utah

Executive branch agencies

Vermont

Executive branch agencies

Washington

Washington State executive branch agencies, including:

General Administration

Department of Transportation

State Universities

In addition to the exceptions noted at the end of this annex, procurements of fuel, paper products, boats, ships and vessels are not covered.

Wisconsin

Executive branch agencies, including

Department of Administration

State Correctional Institutions
Department of Development
Educational Communications Board
Department of Employment Relations
State Historical Society
Department of Health and Social Services
Insurance Commissioner
Department of Justice
Lottery Board

Administration for Public Instruction
Racing Board
Department of Revenue
State Fair Park Board
Department of Transportation
State University System

Wyoming*

Procurement Services Division
Wyoming Department of Transportation
University of Wyoming

Notes to Annex 2

In addition to the conditions specified in the General Notes, the following conditions apply:

1. For those states marked by an asterisk with pre-existing restrictions, the Agreement does not apply to procurement of construction-grade steel (including requirements on subcontracts), motor vehicles and coal.
2. The Agreement shall not apply to preferences or restrictions associated with programs promoting the development of distressed areas and businesses owned by minorities, disabled veterans and women.
3. Nothing in this annex shall be construed to prevent any state entity from applying restrictions that promote the general environmental quality in that state, as long as such restrictions are not disguised barriers to international trade.
4. The Agreement shall not apply to any procurement made by a covered entity on behalf of non-covered entities at a different level of government.
5. The Agreement shall not apply to restrictions attached to Federal funds for mass transit and highway projects.

ANNEX 3

*All Other Entities which Procure in Accordance
With the Provisions of this Agreement*

Threshold: 400,000 SDRs for supplies and services (except as specified below)
5 million SDRs for construction

List of Entities:

The following entities at the SDR equivalent of \$250,000 for supplies and services:

Tennessee Valley Authority
Power Marketing Administrations of the Department of Energy
-Bonneville Power Administration
-Western Area Power Administration
-Southeastern Power Administration
-Southwestern Power Administration
-Alaska Power Administration
-St. Lawrence Seaway Development Corporation

The following entities are 400,000 SDRs for supplies and services:

The Port Authority of New York and New Jersey with the following exceptions:

- Maintenance, repair and operating materials and supplies (e.g., hardware, tools, lamps/lighting, plumbing);
- In exceptional cases, individual procurements may require certain regional production of goods if authorized by the Board of Directors;
- Procurements pursuant to multi-jurisdictional agreement (i.e., for contracts which have initially been awarded by other jurisdictions).

The Port of Baltimore (subject to the conditions specified for the state of New York in Annex 2)

The New York Power Authority (subject to the conditions specified for the state of New York in Annex 2)

1 April 1997

Rural Electrification Administration Financing:

- (1)waiver of Buy American restriction on financing for all power generation projects (restrictions on financing for telecommunication projects are excluded from the Agreement);
- (2)application of Code-equivalent procurement procedures and national treatment to funded projects exceeding the thresholds specified above.

Notes to Annex 3

- 1.With respect to these entities, the Agreement shall not apply to restrictions attached to Federal funds for airport projects.
- 2.The conditions specified in the General Notes apply to this Annex.

ANNEX 4

Services

Of the Universal List of Services, as contained in document MTN.GNS/W/120, the following services are excluded:

1. All transportation services, including Launching Services (CPC Categories 71, 72, 73, 74, 8859, 8868).

Note: Transportation services, where incidental to a contract for the procurement of supplies, are not subject to this Agreement.

2. Dredging.

3. All services purchased in support of military forces located overseas.

4. Management and operation contracts of certain government or privately-owned facilities used for government purposes, including federally-funded research and development centers (FFRDCs).

5. Public utilities services, including telecommunications and ADP-related telecommunications services except enhanced (i.e., value-added) telecommunications services.

6. Research and Development.

7. Printing Services (for Annex 2 entities only).

Note to Annex 4

The conditions specified in the General Notes also apply to this Annex.

ANNEX 5

*Construction Services**Definition:*

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification.

List of Division 51, CPC:

All services listed in Division 51.

Note to Annex 5

The conditions specified in the General Notes apply to this Annex.

GENERAL NOTES

1. Notwithstanding the above, this Agreement will not apply to set asides on behalf of small and minority businesses.
2. Except as specified otherwise in this Appendix, procurement in terms of U.S. coverage does not include non-contractual agreements or any form of government assistance, including cooperative agreements, grants, loans, equity infusions, guarantees, fiscal incentives, and governmental provision of goods and services to persons or governmental authorities not specifically covered under U.S. annexes to this agreement.
3. Procurement does not include the acquisition of fiscal agency or depository services, liquidation and management services for regulated financial institutions, and sale and distribution services for government debt.
4. Where a contract to be awarded by an entity is not covered by this Agreement, this Agreement shall not be construed to cover any good or service component of that contract.
5. For goods and services (including construction) of the following countries and suppliers of such goods and services, this Agreement does not apply to procurement by the entities listed in Annexes 2 and 3 or the waiver described in Annex 3:

Canada
Switzerland

The United States is prepared to amend this note at such time as coverage with respect to these annexes can be resolved with a Party listed above.
6. For construction services of the Republic of Korea and suppliers of such services, this Agreement applies only to procurement of the entities listed in Annexes 2 and 3 above a threshold of 15 million SDRs.
7. For goods and services (including construction) of Japan and suppliers of such goods and services, this Agreement does not apply to procurement by the National Aeronautics and Space Administration.
8. A service listed in Annex 4 is covered with respect to a particular Party only to the extent that such Party has included that service in its Annex 4.

1 April 1997

9. The United States will not extend the benefits of this Agreement to Japan as regards the award of contracts by entities listed in Annex 3 that are responsible for the generation or distribution of electricity.

Committee on Government ProcurementTHE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSEDIN NATIONAL CURRENCIES FOR 1996/1997Republic of Korea

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 1996-1997.

The information notified in response by the Republic of Korea is reproduced below.

1) Calculation of Threshold Figures in National Currency

Annex 1 Entities	Threshold value (SDR)	Threshold value in national currency (won)
1. Supplies and services	130,000	151,000,000
2. Construction services	5,000,000	5,830,000,000

Annex 2 Entities	Threshold value (SDR)	Threshold value in national currency (won)
-------------------------	------------------------------	---

<i>1. Supplies and services</i>	<i>200,000</i>	<i>233,000,000</i>
<i>2. Construction services</i>	<i>15,000,000</i>	<i>17,490,000,000</i>

<i>Annex 3 Entities</i>	<i>Threshold value (SDR)</i>	<i>Threshold value in national currency (won)</i>
<i>1. Supplies and services</i>	<i>450,000</i>	<i>524,000,000</i>
<i>2. Construction services</i>	<i>15,000,000</i>	<i>17,490,000,000</i>

2) Method of Calculation

It is the average of monthly rate of the national currency in terms of the SDR over the two-year period from November 1994 to October 1996. The conversion rates published by the IMF in its monthly •International Fiscal Statistics• was used for this calculation. The example of this calculation is attached.

3) Example of Calculation

<i>Period</i>	<i>Exchange rate (Unit: won/SDR)</i>	<i>Period</i>	<i>Exchange rate (Unit: won/SDR)</i>
<i>November 1994</i>	<i>1,157.1</i>	<i>November 1995</i>	<i>1,143.1</i>
<i>December 1994</i>	<i>1,151.4</i>	<i>December 1995</i>	<i>1,151.6</i>
<i>January 1995</i>	<i>1,161.7</i>	<i>January 1996</i>	<i>1,138.6</i>
<i>February 1995</i>	<i>1,174.6</i>	<i>February 1996</i>	<i>1,146.6</i>
<i>March 1995</i>	<i>1,203.9</i>	<i>March 1996</i>	<i>1,143.7</i>
<i>April 1995</i>	<i>1,198.3</i>	<i>April 1996</i>	<i>1,129.2</i>
<i>May 1995</i>	<i>1,197.8</i>	<i>May 1996</i>	<i>1,136.3</i>
<i>June 1995</i>	<i>1,189.3</i>	<i>June 1996</i>	<i>1,170.0</i>
<i>July 1995</i>	<i>1,179.8</i>	<i>July 1996</i>	<i>1,191.9</i>
<i>August 1995</i>	<i>1,150.9</i>	<i>August 1996</i>	<i>1,194.4</i>
<i>September 1995</i>	<i>1,157.5</i>	<i>September 1996</i>	<i>1,182.0</i>
<i>October 1995</i>	<i>1,144.1</i>	<i>October 1996</i>	<i>1,200.4</i>

-The exchange rates are quoted from the IFS. It is the rate at the end of each month.

-Example of calculation:

-The average exchange rate of won in terms of SDR

27,994.2 won/24 months • 1,166.425 won

*130,000 (SDR) * 1,166.425 won • 151,635,250 won*

-The final conversion rate: 151,000,000 won

*(*The figures under million won are deleted for simplicity of implementation.)*

Committee on Government Procurement

REQUEST FOR OBSERVER STATUS

Communication from Hong Kong

The following communication, dated 23 January 1997, has been received from the Permanent Representative of Hong Kong with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

With reference to the Decision of the Committee on Government Procurement on 27 February 1996, I have the honour to inform the Secretariat that Hong Kong is interested in participating as an observer in the Committee on Government Procurement.

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF THE EUROPEAN COMMUNITY
AND THE UNITED STATES*

Communication from the European Community and the United States

The attached communication, dated 30 September 1996, has been received on 12 December 1996 from the Permanent Delegation of the Commission of the European Communities and Permanent Mission of the United States to the World Trade Organization. The modifications communicated below will become effective 30 days from the date of issue of this document provided there is no objection.

We are writing to you concerning the modifications to Appendices I through IV and General Notes to the Government Procurement Agreement, which follow on from the agreement reached between the European Communities and the United States following the enlargement of the European Communities on 1 January 1995 to include Austria, Finland and Sweden. Article XXIV of the Agreement contains the provisions on modifications to the Appendices and, in conformity with those provisions, I have the honour to send to you this communication.

This communication from the delegations of the European Communities and the United States contains (i) the General Notes contained in Appendix I of the European Communities plus the relevant Annexes, and (ii) the General Notes contained in Appendix I of the United States, as amended.

This communication is to be considered a formal notification under subparagraph (a) of paragraph 6 of Article XXIV of the Agreement.

* English only

The communication is the •second communication• referred to in our earlier letter of 22 December 1995 notifying the results of the EU-US bilateral agreement and subsequently circulated in the WTO under reference GPA/IC/10.

*AMENDMENT TO GENERAL NOTES OF APPENDIX I
OF THE UNITED STATES OF AMERICA*

Delete from Note 5: •Austria•, •Finland• and •Sweden•.

EC (cont•d)

EUROPEAN COMMUNITIES

ANNEX 3

*Other Entities that Procure in Accordance
With the Provisions of this Agreement*

Supplies

Services specified in Annex 4²¹

Thresholds: SDR 400,000

Works specified in Annex 5

Threshold: SDR 5,000,000

Entities in the water, electricity, urban transport, port and airport sectors:

1. List of Entities for Belgium, Denmark, the Federal Republic of Germany, Spain, France, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and the United Kingdom:

The contracting entities within the meaning of Article 2 of Directive 93/38/EEC which are public authorities or public undertakings and which have as one of their activities any of those referred to below or any combination thereof:

- (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water to such networks;*
- (b) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity or the supply of electricity to such networks;*
- (c) the provision of airport or other terminal facilities to carriers by air;*
- (d) the provision of maritime or inland port or other terminal facilities to carriers by sea or inland waterway;*
- (e) the operation of networks providing a service to the public in the field of transport by railway²², automated systems, tramway, trolley bus, bus or cable in accordance with Directive 93/38/EEC.*

²¹ Under the conditions provided for in Directive 93/38/EEC

²² Not including the entities listed in Annex VI of Directive 93/38/EEC (copy attached)

EC (cont•d)

The public authorities or public undertakings listed in Annex I (production, transport or distribution of drinking water), Annex II (production, transport or distribution of electricity), Annex VII (contracting entities in the field of urban railway, tramway, trolley bus or bus services), Annex VIII (contracting entities in the field of airport facilities) and Annex IX (contracting entities in the field of maritime or inland port or other terminal facilities) of Directive 93/38/EEC fulfil the criteria set out above (copies attached).

2. List of Entities for Austria:

2.1 Entities in the water and energy sector

The covered entities are those which exercise as a principal activity, the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport and distribution of drinking water, and electricity.

2.2 Entities in the transport sector

The covered entities are those which exercise as a principal activity:

- (i) the operation of networks providing a service to the public in the field of transport by trolley bus, bus or cable;*
- (ii) the exploitation of a geographical area for the purpose of the provision of inland port or other terminal facilities to carrier by inland waterway or the provision of airports or other terminal facilities by air.*

3. List of Entities for Finland:

Public entities and activities as specified in Article 2 of •Laki julkisista hankinnoista (1505/92)• (Public Procurement Act) and in Articles 1-4 of •Asetus Euroopan talousalueesta tehdyss ä sopimuksessa tarkoitetuista vesi- ja energiahuollon, liikenteen ja teletoiminnan alalla toimivien yksiköiden hankinnoista• (1351/93) (Decree concerning utilities) under the conditions provided for in Directive 90/531/EEC in the sectors of:

3.1 Urban transport:

The operation of networks providing a service to the public in the field of transport by tramway, metro or bus by public entities according to •Laki (343/91) luvanvaraisesta henkilöliikenteestä tiellä• and Helsingin kaupungin liikennelaitos (Helsinki Transport Board), which provides metro and tramway services to the public.

3.2 Airports:

EC (cont•d)

The provision of airport or other terminal facilities to carriers operated by •Ilmailulaitos• (National Aviation Agency) pursuant to •Ilmailulaki (595/64)•, inter alia

- *Helsinki-Vantaa Airport*
- *Ivalo Airport*
- *Joensuu Airport*
- *Jyväskylä Airport*
- *Kemi Airport*
- *Kittilä Airport*
- *Kuopio Airport*
- *Lappeenranta Airport*
- *Oulu Airport*
- *Rovaniemi Airport*
- *Vaasa Airport*

3.3 Ports:

The provision of maritime or inland ports or other terminal facilities to carriers by sea or inland waterways by municipal authorities pursuant to •Laki kunnallisista satamajärjestyksistä ja liikennemaksuista (955/76)•, inter alia

- *Port of Hamina*
- *Port of Hanko*
- *Port of Helsinki*
- *Port of Kotka*
- *Port of Naantali*
- *Port of Turku*
- *Port of Vaasa*

3.4 Water:

The provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water to such network by public entities pursuant to Article 1 of •Laki yleisistä vesi- ja viemärlaitoksista (982/77)• of December 1977, inter alia

- *Helsinki Water Board*
(Helsingin kaupungin vesilaitos)
- *Turku Water Board*
(Turun kaupungin vesilaitos)
- *Tampere Water Board*
(Tampereen kaupungin vesilaitos)

3.5 Electricity:

The provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity or the supply of electricity to such networks where municipal entities operate on the basis of a

special or an exclusive right or on the basis of a concession pursuant to Article 27 of •Sähkölaki (319/79)• of 16 March 1979, inter alia

- *Helsinki Energy Board
(Helsingin kaupungin energialaitos)*
- *Tampere Energy Board
(Tampereen kaupungin sähkölaitos)*
- *Turku Energy Board
(Turun kaupungin sähkölaitos)*

4. *List of Entities for Sweden:*

4.1 *Electricity*

Entities which have as one of their activities the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport, distribution or the supply of electricity on the basis of a concession pursuant to •Lag (1902:71) innefattande vissa bestämmelser om elektriska anläggningar•, inter alia;

*Vattenfall AB
Stockholm Energi Produktion AB
Swedish International Grid
Sydkraft AB
Trollhätte kanalverk*

4.2 *Urban transport*

Entities which have as one of their activities the operation of networks providing a service to the public in the field of transport by automated systems, urban railway, tramway, trolley bus, bus or cable according to •Lag (1978:438) om huvudmannaskap för viss kollektiv persontrafik•, for urban railway or tramway services pursuant to •Lag (1990:1157) om järnvägssäkerhet• and for trolley bus or bus services in accordance with •Lag (1988:263) om yrkestrafik•, inter alia;

Storstockholms Lokaltrafik AB, SL

4.3 *Airports*

Entities which have as one of their activities the exploitation of a geographical area for the purpose of the provision of airport facilities e.g. publicly owned and operated airports in accordance with •Lag (1957:297) om luftfart• having as their result the reservation for one or more entities of the exploitation of the activities described, inter alia;

Civil Aviation Administration

4.4 *Ports*

EC (cont•d)

Entities which have as one of their activities the exploitation of a geographical area for the purpose of the provision of port facilities e.g. publicly owned and/or operated ports and terminal facilities according to •Lag (1988:293) om inrättande, utvidgning och avlysning av allmän farled och allmän hamn•, •Förordning (1983:744) om trafiken på Göta kanal•, inter alia;

Gävle port

Göteborg port

Luleå port

Stockholm port

Trelleborg port

Uddevalla port

4.5 Water

Local authorities and municipal companies which have as one of their activities the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water according to •Lag (1970:244) om allmänna vatten- och avloppsanläggningar•.

EC (cont'd)

ANNEX 4

Services

Of the Universal List of Services, as contained in document MTN.GNS/W/120, the following services are included:

<i>Subject</i>	<i>CPC Reference No</i>
<i>Maintenance and repair services</i>	6112, 6122, 633, 886
<i>Land transport services, including armoured car services, and 71235), 7512, 87304 courier services, except transport of mail</i>	712 (except
<i>Air transport services of passengers and freight, except transport of mail</i>	73 (except 7321)
<i>Transport of mail by land, except rail, and by air</i>	71235, 7321
<i>Telecommunications services 7524, 7525, 7526)</i>	752* (except
<i>Financial services</i>	ex 81
<i>(a) Insurance services</i>	812, 814
<i>(b) Banking and investments services**</i>	
<i>Computer and related services</i>	84
<i>Accounting, auditing and bookkeeping services</i>	862
<i>Market research and public opinion polling services</i>	864
<i>Management consulting services and related services</i>	865, 866***
<i>Architectural services; engineering services and integrated engineering services, urban planning and landscape architectural services; related scientific and technical consulting services; technical testing and analysis services</i>	867
<i>Advertising services</i>	871

Juntas de Puertos operating pursuant to the Lei 27/68 de 20 de junio de 1968 ; Puertos y Faros. Juntas de Puertos y Estatutos de Autonomía and to the Decreto de 9 de abril de 1970, no 1350/70. Juntas de Puertos. Reglamento.

Ports managed by the Comisión Administrativa de Grupos de Puertos, operating pursuant to the Ley 27/68 de 20 de junio de 1968, Decreto 1958/78 de 23 de junio de 1978 and Decreto 571/81 de 6 de mayo de 1981.

Ports listed in the Real Decreto 989/82 de 14 de mayo de 1982. Puertos. Clasificación de los de interés general.

FRANCE

Port autonome de Paris set up pursuant to loi 68/917 du 24 octobre 1968 relative au port autonome de Paris.

Port autonome de Strasbourg set up pursuant to the convention du 20 mai 1923 entre l'État et la ville de Strasbourg relative à la constitution du port rhénan de Strasbourg et à l'exécution de travaux d'extension de ce port, approved by the loi du 26 avril 1924.

Other inland waterway ports set up or managed pursuant to article 6 (navigation intérieure) of the décret 69-140 du 6 février 1969 relatif aux concessions d'outillage public dans les ports maritimes.

Ports autonomes operating pursuant to articles L 111-1 et suivants of the code des ports maritimes.

Ports non autonomes operating pursuant articles R 121-1 et suivants of the code des ports maritimes.

EC (cont•d)

Ports managed by regional authorities (départements) or operating pursuant to a concession granted by the regional authorities (départements) pursuant to article 6 of the loi 86-663 du 22 juillet 1983 complétant la loi 83-8 du 7 janvier 1983 relative à la répartition de compétences entre les communes, départements et l'État.

IRELAND

Ports operating pursuant to the Harbour Acts 1946 to 1976.

Port of Dun Laoghaire operating pursuant to the State Harbours Act 1924.

Port of Rosslare Harbour operating pursuant to the Finguard and Rosslare Railways and Harbours Act 1899.

ITALY

State ports and other ports managed by the Capitaneria di Porto pursuant to the Codice della navigazione, Regio Decreto 30 marzo 1942, n. 32.

Autonomous ports (enti portuali) set up by special laws pursuant to Article 19 of the Codice della navigazione, Regio Decreto 30 marzo 1942, n. 327.

LUXEMBOURG

Port de Mertert set up and operating pursuant to loi du 22 juillet 1963 relative à l'aménagement et à l'exploitation d'un port fluvial sur la Moselle.

NETHERLANDS

Havenbedrijven, set up and operating pursuant to the Gemeentewet van 29 juni 1851.

Havenschap Vlissingen, set up by the wet van 10 september 1970 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Vlissingen.

Havenschap Terneuzen, set up by the wet van 8 april 1970 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Terneuzen.

Havenschap Delfzijl, set up by the wet van 31 juli 1957 houdende een gemeenschappelijke regeling tot oprichting van het Havenschap Delfzijl.

Industrie- en havenschap Moerdijk, set up by gemeenschappelijke regeling tot oprichting van het Industrie- en havenschap Moerdijk van 23 oktober 1970, approved by Koninklijke Besluit nr. 23 van 4 maart 1972.

PORTUGAL

Porto do Lisboa set up pursuant to Decreto Real do 18 de Fevereiro de 1907 and operating pursuant to Decreto-Lei n 36976 de 20 de Julho de 1948.

EC (cont'd)

Porto do Douro e Leixões set up pursuant to Decreto-Lei n 36977 de 20 de Julho de 1948.

Porto de Sines set up pursuant to Decreto-Lei n 508/77 de 14 de Dezembro de 1977.

Portos de Setúbal, Aveiro, Figueira de Foz, Viana do Castelo, Portimão e Faro operating pursuant to the Decreto-Lei n 37754 de 18 de Fevereiro de 1950.

UNITED KINGDOM

Harbour Authorities within the meaning of section 57 of the Harbours Act 1964 providing port facilities to carriers by sea or inland water way.

EC (cont•d)

*GENERAL NOTES AND DEROGATIONS FROM THE PROVISIONS OF
ARTICLE III*

1. The EC will not extend the benefits of this Agreement:

-as regards the award of contracts by entities listed in Annex 2 to the suppliers and service providers of Canada;

-as regards the award of contracts, other than for suppliers, listed in Annex 2 to the suppliers and service providers of the USA;

-as regards the award of contracts by entities listed in Annex 3 paragraph

(a)(water), to the suppliers and service providers of Canada and the USA;

(b)(electricity), to the suppliers and service providers of Canada, Hong Kong and Japan;

(c)(airports), to the suppliers and service providers of Canada, Korea and the USA;

(d) (ports), to the suppliers and service providers of Canada;

(e)(urban transport), to the suppliers and service providers of Canada, Israel, Japan, Korea and the USA

until such time as the EC has accepted that the Parties concerned give comparable and effective access for EC undertakings to the relevant markets;

-to service providers of Parties which do not include service contracts for the relevant entities in Annexes 1 to 3 and the relevant service category under Annexes 4 and 5 in their own coverage.

2. The provisions of Article XX shall not apply to suppliers and service providers of:

-Israel, Japan, Korea and Switzerland in contesting the award of contracts by entities listed under Annex 2 paragraph 2, until such time as the EC accepts that they have completed coverage of sub-central entities;

-Japan, Korea and the USA in contesting the award of contracts to a supplier or service provider of Parties other than those mentioned, which are small or medium sized enterprises under the relevant provisions of EC law, until such time as the EC accepts that they no longer operate discriminatory measures in favour of certain domestic small and minority businesses;

-Israel, Japan and Korea in contesting the award of contracts by EC entities, whose value is less than the threshold applied for the same category of contracts awarded by these Parties.

EC (cont•d)

3. *Until such time as the EC has accepted that the Parties concerned provide access for EC suppliers and service providers to their own markets the EC will not extend the benefits of this Agreement to suppliers and service providers of:*

- Canada, as regards procurement of FSC 36,70 and 74 (special industry machinery, general purpose automatic data processing equipment, software supplies and support equipment (except 7010 ADPE configurations), office machines, visible record equipment and ADP equipment);*
- Canada, as regards procurement of FSG 58 (communications, protection and coherent radiation equipment) and the USA as regards air traffic control equipment;*
- Korea and Israel as regards procurement by entities listed in Annex 3 paragraph (b), as regards procurement of HS Nos 8504, 8535, 8537 and 8544 (electrical transformers, plugs, switches and insulated cables); and for Israel, HS Nos 8501, 8536 and 902830;*
- the USA as regards procurement by entities listed in Annex 3 paragraph (d), as regards procurement of dredging services and procurement related to shipbuilding;*
- Canada and the USA as regards contracts for good or service components of contracts which, although awarded by an entity covered by this Agreement, are not themselves subject to this Agreement.*

4. *The Agreement shall not apply to contracts awarded under:*

- an international agreement and intended for the joint implementation or exploitation of a project by the signatory States;*
- an international agreement relating to the stationing of troops;*
- the particular procedure of an international organization.*

5. *The Agreement shall not apply to procurement of agricultural products made in futherance of agricultural support programmes and human feeding programmes.*

6. *Contracts awarded by entities in Annexes 1 and 2 in connection with activities in the fields of drinking water, energy, transport or telecommunications are not included.*

7. *This Agreement shall not apply to contracts awarded by entities in Annex 3:*

- for the purchase of water and for the supply of energy or of fuels for the production of energy;*
- for purposes other than the pursuit of their activities as described in this Annex or for the pursuit of such activities in a non-member country;*

EC (cont•d)

-for purposes of re-sale or hire to third parties, provided that the contracting entity enjoys no special or exclusive right to sell or hire the subject of such contracts and other entities are free to sell or hire it under the same conditions as the contracting entity.

8.This Agreement shall not be applicable to contracts:

-for the acquisition or rental of land, existing buildings or other immovable property or concerning rights thereon;

-for the acquisition, development, production or co-production of programme material by broadcasters and contracts for broadcasting time.

9.This Agreement shall not be applicable to the award of service contracts by Spanish entities listed in Annex 3 before 1 January 1997 or to the award of contracts by Greek or Portuguese entities listed in Annex 3 before 1 January 1998.

10.The provision of services, including construction services, in the context of procurement procedures according to this Agreement is subject to the conditions and qualifications for market access and national treatment as will be required by Austria in conformity with her commitments under the GATS.

11.This Agreement shall not apply to contracts awarded to an entity in Finland which itself is a contracting authority within the meaning of the Public Procurement Act: •Laki julkisista hankinnoista• (1505/92), or in Sweden within the meaning of the •Lag om offentlig upphandling• (1992:1528), on the basis of an exclusive right which it enjoys pursuant to a law, regulation or administrative provision or to contracts of employment in Finland and Sweden.

12.When a specific procurement may impair important national policy objectives, the Finnish or Swedish Governments may consider it necessary in singular procurement cases to deviate from the principle of national treatment in the Agreement. A decision to this effect will be taken at Cabinet level. Finland also reserves its position with regard to the application of this Agreement to the Åland Islands (Ahvenanmaa).

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF JAPAN

Communication from Japan

The following communication, dated 3 December 1996, has been received from the Permanent Representative of Japan, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994). The modification communicated below will become effective 30 days from the date of issue of this document provided there is no objection.

Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement, the Government of Japan wishes to notify the Committee on Government Procurement the following rectifications of a purely formal nature relating to Annex 3 in Appendix I of the WTO Agreement on Government Procurement:

Delete •- Social Development Research Institute• from •List of Entities• regarding supplies and •List of Entities which procure the services, specified in Annex 4•, respectively.

This rectification is based on the fact that •Social Development Research Institute• was abolished as of 1 December 1996 and its function was transferred to the National Institute of Population and Social Security Research as an attached organization of the Ministry of Health and Welfare, which is already listed in Annex 1 in Appendix I of this Agreement. Therefore, such a rectification does not alter the coverage which has mutually been agreed upon.

*QUESTIONNAIRE ON INFORMATION TECHNOLOGY
IN GOVERNMENT PROCUREMENT*

Response by Korea

The attached communication contains the replies from the delegation of Korea to the questionnaire on Information Technology in Government Procurement contained in document GPA/W/24, dated 22 August 1996.

REPLIES BY KOREA TO THE QUESTIONNAIRE ON
INFORMATION TECHNOLOGY¹

1) *Could delegations give a brief description of any steps taken or planned to introduce information technology into public procurement? If so, does this cover contracts which are covered under the 1994 Agreement? At all levels of government?*

With the expansion of the VAN project and its dissemination by the government, procurement information related to certain procurement agencies is provided through GINS (Goldstar Information Network Services).

-This does not include the contracts of all procurement agencies covered by the Agreement. It provides information on contracts of the Office of Supply, Military Procurement Headquarters of the Ministry of Defense, Korea Housing Corporation, Korea Subway Corporation, Land Development Corporation, Korea Telecom, KEPCO, and some local governments.

2) *What function(s) would information technology serve in such systems and who will be the users?*

The functions and users of information technology are as follows:

-Functions: notification of tender opportunities regarding product and facilities construction, notification of contract awards, tender-related legislation, yearly purchase plans.

-Users: procuring entities, suppliers.

3) *Could delegations describe the technical aspects of the systems in use or planned? In particular as regards infrastructure/hardware-software and its options/standards?*

n.a.

4) *Could delegations describe any limitations affecting access to information available and use of systems? How wide is potential access to interested suppliers? What are the access possibilities for suppliers of other signatory countries? What possible obstacles to access might arise for suppliers in other signatory countries?*

Interested suppliers are not affected by access limitations to the system when using PCs with modems. However, the PCs must have a registration number in the GINS, which uses a Korean-language software program.

5) *For those Parties who use databases which list government procurement opportunities:*

(i) What are the names of their databases?

¹Please take into consideration that not all the questions fall under the purview of the Office of Supply. Only those related to GINS, a value-added telecommunications network, are responded here.

GINS.

(ii) How long have the databases been operational and how many suppliers use the databases?

The database has been operational for seven years and is used by 1,400 suppliers.

(iii) Is a fee charged to suppliers using the system? If so, how much, and what is included in the fee?

A monthly fee of W 33,000 is charged, which includes value-added tax.

(iv) Can suppliers obtain tender documentation electronically? If so, how?

Not for the time being.

(v) How is information on the databases organized?

It is collected by a private company, LG Information Telecommunications.

(vi) Do the databases offer any other features?

The database also has an electronic mail (E-mail) function.

(vii) What is the approximate number of procurement opportunities listed on the databases annually?

The approximate number of procurement opportunities listed in the database annually is about 7,000. This figure only covers the notification of tender opportunities by the Office of Supply.

(viii) Are the systems managed by the government or a private company?

The system is managed by a private company, LG Information Telecommunications.

(ix) Can Parties' databases be interrogated using international standards, such as SQL - Standard Query Language?

n.a.

(x) Are all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - also available on databases? If so, do such notices contain at least the minimum information required to be published under Articles IX and XVIII:1?

Not all notices required to be published under the Agreement are available on the database. Among the minimum information required to be published under Articles IX and XVIII, the database includes the following items on GINS:

(a) Notification of tender opportunities:

-the kind and number of products to be covered under procurement, and the name of the procuring entity;

-the procedure for participating in tender;

-the date of delivery;

-the period of registration for companies eligible to participate in tender;

-companies eligible to participate in tender;

-the telephone number of the procuring entity through which documents related to tender can be obtained.

(b) Notification of contract awards:

-the kind, number and name of products for which the contract is awarded;

-procuring entity;

-the date of the contract award;

-the name of the company which is awarded the contract;

-the amount of the contract award in dollar terms.

(xi) How are Agreement-covered notices identified?

At the moment, there is no particular code in the database to identify whether the notices are covered by the Agreement or not.

(xii) To what extent does each type of notice contained in databases conform to a standard structure?

n.a.

(xiii) Is any particular classification used in such notices to describe purchases and, if so, what classification?

n.a.

(xiv) Where databases exist in a non-WTO language, to what extent are notices and information summarized in a WTO language?

Currently, GINS provides information only in Korean.

6) For those Parties who are involved in action in the area of electronic commerce:

(i) Please provide full information on projects and plans with regard to electronic commerce.

Korea has been conducting electronic commerce by utilizing EDI in the area of foreign trade. However, electronic commerce has not been utilized in the government procurement sector, and Korea does not yet have a plan to introduce electronic commerce in government procurement.

(ii) Could those Parties who have experience with electronic commerce provide information on such experiences?

n.a.

Committee on Government Procurement

REQUEST FOR OBSERVER STATUS

Communication from the European Free Trade Association

The following communication, dated 30 October 1996, has been received from the Secretary-General of the European Free Trade Association.

I am writing to you to request that the European Free Trade Association (EFTA) be granted observer status in the Committee on Government Procurement of the World Trade Organization pursuant to the •Guidelines for Observer Status of International Intergovernmental Organizations in the WTO• adopted by the General Council on 18 July 1996. As you may be aware, EFTA enjoyed full observer status in the old GATT system. Observer status has been granted to EFTA on an ad hoc basis in several WTO bodies of particular interest since the establishment of the World Trade Organization. In the light of the above-mentioned Guidelines a more permanent arrangement is sought by EFTA.

The work done in the Committee on Government Procurement is of immediate relevance to EFTA, not only in terms of relations between its Member States (i.e. Iceland, Liechtenstein, Norway and Switzerland), but also as regards implementation of the Agreement establishing the European Economic Area and the Free-Trade Agreements concluded with 12 third-country partners. Provisions in the Stockholm Convention establishing EFTA and the above-mentioned Agreements relate directly to the work of WTO. It is vital for EFTA and its Secretariat to have the possibility to observe the development, implementation and interpretation of WTO rules and provisions. The immediate interest is to ensure the compatibility of EFTA activities with WTO provisions and that the two develop in harmony. In a wider context, EFTA believes that a complementary, mutually reinforcing relationship should exist between the multilateral trading system on the one hand and regional trade agreements on the other. I believe

EFTA has much to contribute towards that end and that its relations with the WTO will prove mutually beneficial.

GOVERNMENT PROCUREMENT

Hong Kong

The following communication, dated 31 October 1996, has been received from the Permanent Representative of Hong Kong to the WTO with the request that it be circulated to the Signatories to the Agreement on Government Procurement (1994).

I have the honour to inform you that the Government of Hong Kong is interested in acceding to the Agreement on Government Procurement 1994 (the Agreement) and would be grateful if you could convey this communication to the Signatories of the Agreement.

A draft offer from the Government of Hong Kong is attached at Attachment 1. Lists of relevant publications corresponding to Appendices II, III and IV of the Agreement are attached at Attachments 2, 3 and 4 respectively.

The Government of Hong Kong wishes to draw to the attention of the Signatories of the Agreement the following points:

- (a) the draft offer at Attachment 1 is essentially the same as the final offer submitted by Hong Kong at the concluding stages of negotiations for the Agreement and which is appended to the legal text of the Agreement. There are only a few changes which are not of a substantive nature in Annex 1 and Annex 4 of the attached draft offer. They reflect organizational changes in the Hong Kong Government and updated nomenclature of a few types of services. An explanatory note on these changes is at Attachment 5; and*

(b) notwithstanding Hong Kong's intention to discharge fully its obligations under the Agreement upon accession, the Hong Kong Government would wish to seek a deferment by one year of the application of Article XX to Hong Kong to allow time for the setting up of a Bid Challenge System in the territory.

A final decision by the Hong Kong Government to accede to the Agreement on Government Procurement will also be dependent on all the sectoral non-application measures in the Agreement specifically aimed at Hong Kong being removed and the Signatories agreeing to launch an early review of the Agreement with a view in particular to removing all discriminatory measures and practices which distort open procurement.

The Government of Hong Kong stands ready to discuss with and respond to any questions from the Signatories of the Agreement on Government Procurement relating to our communication.

Attachment 1

DRAFT OFFER

*For inclusion in Appendix I of the Agreement on Government Procurement
(1994)*

ANNEX 1

*Central Government Entities which Procure in Accordance
With the Provisions of this Agreement*

Supplies

Threshold: 130,000 SDR for goods and services other than construction services

5,000,000 SDR for construction services

List of Entities:

- 1. Agriculture and Fisheries Department*
- 2. Architectural Services Department*
- 3. Audit Department*
- 4. Auxiliary Medical Services*
- 5. Buildings Department*
- 6. Census and Statistics Department*
- 7. Civil Aid Services*
- 8. Civil Aviation Department*
- 9. Civil Engineering Department*

10. *Civil Service Training and Development Institute*
11. *Companies Registry*
12. *Correctional Services Department*
13. *Customs and Excise Department*
14. *Department of Health*
15. *Drainage Services Department*
16. *Education Department*
17. *Electrical and Mechanical Services Department*
18. *Environmental Protection Department*
19. *Fire Services Department*
20. *Government Flying Service*
21. *Government Laboratory*
22. *Government Land Transport Agency*
23. *Government Property Agency*
24. *Government Secretariat*
25. *Government Supplies Department*
26. *Highways Department*
27. *Home Affairs Department*
28. *Hong Kong Monetary Authority*
29. *Hospital Services Department*
30. *Immigration Department*
31. *Independent Commission Against Corruption*
32. *Industry Department*
33. *Information Services Department*
34. *Information Technology Services Department*
35. *Inland Revenue Department*
36. *Intellectual Property Department*
37. *Judiciary*
38. *Labour Department*
39. *Lands Department*
40. *Land Registry*
41. *Legal Department*
42. *Legal Aid Department*
43. *Marine Department*
44. *Office of the Commissioner for Administrative Complaints*
45. *Office of the Telecommunications Authority*
46. *Official Receiver's Office*
47. *Planning Department*
48. *Post Office*
49. *Printing Department*
50. *Public Service Commission*
51. *Radio Television Hong Kong*
52. *Rating and Valuation Department*
53. *Royal Hong Kong Police Force (including Royal Hong Kong Auxiliary Police Force)*
54. *Royal Observatory*
55. *Social Welfare Department*
56. *Secretariat, Independent Police Complaints Council*

57. *Secretariat, Standing Commission on Civil Service Salaries and Conditions of Service*
58. *Secretariat, Standing Committee on Disciplined Services Salaries and Conditions of Service*
59. *Student Financial Assistance Agency*
60. *Technical Education and Industrial Training Department*
61. *Television and Entertainment Licensing Authority*
62. *Territory Development Department*
63. *Trade Department*
64. *Transport Department*
65. *Treasury*
66. *Secretariat, University Grants Committee*
67. *Water Supplies Department*
68. *Management Services Agency*
69. *Official Languages Agency*
70. *Registration and Electoral Office*

ANNEX 2

*Sub-Central Entities which Procure in Accordance
With the Provisions of this Agreement*

Threshold: 200,000 SDR for goods and services other than construction services

5,000,000 SDR for construction services

List of Entities:

- 1. Urban Council and Urban Services Department*
- 2. Regional Council and Regional Services Department*

ANNEX 3

*All Other Entities which Procure in Accordance
With the Provisions of this Agreement*

Threshold: 400,000 SDR for supplies and services other than construction services

5,000,000 SDR for construction services

List of Entities:

- 1. Housing Authority and Housing Department*
- 2. Hospital Authority*
- 3. Airport Authority*
- 4. Mass Transit Railway Corporation*
- 5. Kowloon-Canton Railway Corporation*

ANNEX 4

Services

The following services, classified according to the United Nations Central Product Classification (CPC) Code on Goods and Services, will be covered:

CPC

1. *Computer and Related Services*

<i>-Data base and processing services</i>	843•844
<i>-Maintenance and repair service of office machinery and equipment including computers</i>	845
<i>-Other Computer Services</i>	849

2. *Rental/Leasing Services Without Operators*

<i>-Relating to ships</i>	83103
<i>-Relating to aircraft</i>	83104
<i>-Relating to other transport equipment</i>	83101•83102•83105
<i>-Relating to other machinery and equipment</i>	83106•83109

3. *Other Business Services*

Maintenance and repair of equipment (not including maritime vessels, aircraft or other transport equipment) 633•8861•8866

Market Research & Public Opinion Polling Services 864

Security Services 87304

Building-Cleaning Services 874

Advertising Services 871

4. *Courier Services*

5. *Telecommunications Services (Provisions of certain types of service may require licensing under the Telecommunication Ordinance)*

Value-added telecommunications services 7523, 843

Basic telecommunications services 7521, 7529

Telecommunications-related services 754

6. *Environmental Services*

- Sewage services 9401
- Refuse disposal services 9402

7. *Financial Services* *ex 81*

- All Insurance and Insurance-Related Services(exceptions are set out in paragraph 5 of General Conditions)

- Banking and other financial services

8. *Transport Services*

- Air transportation services 731, 732, 734
(excluding transportation of mail)
- Road transport services 712, 6112, 8867

ANNEX 5

Construction Services

Definition:

A construction services contract is a contract which has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification (CPC).

List of Division 51 CPC

All services of Division 51 of the CPC

Threshold: 5,000,000 SDR

*GENERAL CONDITIONS APPLICABLE TO ENTITIES AND SERVICES
SPECIFIED IN ANNEXES 1 TO 5*

1. *Notwithstanding anything in the Annexes 1-5, the Agreement shall not apply to:*

-All consultancy and franchise arrangements

-Transportation of mail by air

-Statutory insurances including third party liability in respect of vehicles and vessels and employer's liability insurance in respect of employees

-Purchase of office or residential accommodation by the Government Property Agency.

2. *Hong Kong's commitments on telecommunications services are subject to the terms of the licence held by Hong Kong Telecommunications International Ltd. (HKTI) until 30 September 2006 for the exclusive provision of external telecommunications circuits and certain external telecommunications services. The exclusive services covered by the licence are listed below.*

(a)Circuits by radio for the provision of external public telecommunications services.

(b)The operation of circuits by submarine cable for the provision of external public telecommunications services.

(c)External and internal Public Telegram Service.

(d)External and internal Public Telex Service.

(e)External public telephone services to subscribers to the Public Switched Telephone Network by radio, submarine cable and such overland cables as are authorized.

(f)External dedicated and leased telephone circuit services by radio, submarine cable and such overland cables as are authorized.

(g)External dedicated and leased circuits for -

*telegraph
data
facsimile.*

(h)Hong Kong coast stations and coast earth stations of the Maritime Mobile service and Maritime Mobile - Satellite Service.

(i) Hong Kong Aeronautical Stations of the Aeronautical Mobile Service and Aeronautical Mobile - Satellite Service for radio communications services between aircraft operating agencies and their aircraft in flight.

(j) International telecommunications services routed in transit via Hong Kong.

(k) Except to the extent that the Governor-in-Council may from time to time otherwise in writing direct, external television and voice programme transmission services to and from Hong Kong.

3. Operators of telecommunications services may require licensing under the Telecommunication Ordinance. Operators applying for the licences are required to be established in Hong Kong under the Companies Ordinance.

4. Hong Kong Government shall not be obliged to permit the supply of such services cross-border, or through commercial presence or the presence of natural persons.

5. The following services are excluded from the Financial Services under Annex 4

1. CPC 81402

Insurance and pension consultancy services

2. CPC 81339

Money broking

3. CPC 8119•81323

Asset management, such as cash or portfolio management, all forms of collective investment management, pension fund management, custodial depository and trust services.

4. CPC 81339 or 81319

Settlement and clearing services for financial assets, including securities, derivative products, and other negotiable instruments.

5. CPC 8131 or 8133

Advisory and other auxiliary financial services on all the activities listed in subparagraphs 5(a)(v) to (xvi) in the Annex on Financial Services in the General Agreement on Trade in Services, including credit reference and analysis, investment and portfolio research and advice, advice on acquisitions and on corporate restructuring and strategy.

6. CPC 81339•81333•81321

Trading for own account or for account of customers, whether on an exchange, in an over-the-counter market or otherwise, the following:

- money market instruments (cheques, bills, certificate of deposits, etc.)*
- foreign exchange*
- derivative products including, but not limited to futures and options*
- exchange rate and interest rate instruments, including products such as swaps, forward rate agreement, etc.*
- transferable securities*
- other negotiable instruments and financial assets, including bullion.*

SUMMARY OF PRESENTATIONAL CHANGES TO HONG KONG'S
OFFER (1994 vs 1996)

Annex 1: *Central Government Entities which Procure in Accordance With the Provisions of this Agreement*

(a) *Item 7 in 1994 Offer: •City and New Territories Administration•*

Deleted. Its functions have been taken up by the •Government Secretariat• and the •Home Affairs Department•, which are included as Items 24 and 27 respectively in the 1996 Offer.

(b) *Item 11 in 1994 Offer: •Civil Service Training Centre•*

Renamed •Civil Service Training & Development Institute• and included as Item 10 in 1996 Offer.

(c) *Item 53 in 1994 Offer: •Registry of Trade Unions•*

Deleted. Functions of this registry have been taken up by the •Labour Department•, which is included as Item 38 in the 1996 Offer.

(d) *Item 56 in 1994 Offer: •Senior Staff Course Centre•*

Deleted. Functions of this centre have been taken up by the •Civil Service Training & Development Institute• which is included as Item 10 in 1996 Offer.

(e) *Item 68 in 1996 Offer •Management Services Agency•*

New addition to 1996 Offer arising from creation of this new agency.

(f) *Item 69 in 1996 Offer •Official Languages Agency•*

New addition to 1996 Offer arising from creation of this new agency. Previously existed as a unit under •Government Secretariat• (Item 24 in 1996 Offer).

(g) *Item 70 in 1996 Offer •Registration & Election Office•*

New addition to 1996 Offer arising from creation of this new office. Previously existed as a unit under •Government Secretariat• (Item 24 in the 1996 Offer).

(h) *Note to Annex 1 of 1994 Offer: Included in General Conditions of 1996 Offer.*

Annex 2: *Sub-Central Entities which Procure in Accordance With the Provisions of this Agreement*

No change.

Annex 3: *All Other Entities which Procure in Accordance With the Provisions of this Agreement*

Item 3 in 1994 Offer •Provisional Airport Authority (Airport Authority)• now renamed as •Airport Authority• and included as Item 3 in 1996 Offer.

Annex 4: *Services*

Item 5: •Telecommunication Services• in 1994 Offer

Details listed in the 1994 Offer were drawn up on the basis of the grouping of telecommunication services used in the Uruguay Round negotiations. Details for the same item in the 1996 Offer follow the latest grouping into value-added and basic telecommunication services. The substance of the Offer remains unchanged.

Annex 5: *Construction Services*

No change.

General Conditions applicable to entities and services specified in Annexes 1 to 5

(a) Last indent of paragraph 1 in 1996 Offer

Incorporated note to Annex 1 of 1994 Offer.

(b) Paragraph 4 in the 1996 Offer

Minor semantic changes.

(c) Paragraph 5 subparagraph 5 in 1996 Offer

Change made to refer to the •Annex on Financial Services• of the General Agreement on Services, instead of document MTN.TNC/W/50.

Committee on Government Procurement

*QUESTIONNAIRE ON INFORMATION TECHNOLOGY
IN GOVERNMENT PROCUREMENT*

Response by Canada

The attached communication contains the replies from the delegation of Canada to the questionnaire on Information Technology in Government Procurement contained in document GPA/W/24, dated 22 August 1996.

QUESTIONNAIRE ON INFORMATION TECHNOLOGY

1) *Could delegations give a brief description of any steps taken or planned to introduce information technology into public procurement? If so, does this cover contracts which are covered under the 1994 Agreement? At all levels of government?*

The Canadian Government uses the Open Bidding Service (OBS), an internationally accessible electronic database. Most PWGSC bidding opportunities for goods and services valued at over \$25,000 are advertised on the OBS, as well as construction, maintenance, architecture, engineering and leasing opportunities over \$60,000, communications professional services valued at over \$50,000 and printing requirements valued at over \$10,000. All procurement covered by the WTO Agreement is advertised on the OBS (a code is used to indicate WTO coverage).

2) *What function(s) would information technology serve in such systems and who will be the users?*

The OBS has approximately 25,000 subscribers. On-line subscribers can order documents directly while linked to the database. Suppliers that do not use the on-line feature of the OBS, for example users of the Government Business Opportunities publication or subscribers to the OBS bid matching service, can call the Bid Request Line (phone or fax) to order bid documents. The OBS offers several options for the delivery of bid documents (fax, mail, courier, pick up or download via Internet for PWGSC opportunities).

Within the OBS matching service, suppliers provide to OBS a description of the goods and services they sell. Using this information, OBS scans its database and automatically faxes to subscribers those opportunities that match their profile. Suppliers can then order the bid documents from the Bid Request Line. The OBS also lists a number of international procurement opportunities from other countries which are open to Canadian suppliers. The OBS system also contains news, information and advice on doing business with the government, export information from Foreign Affairs and International Trade, and Public Works and Government Services Canada's Standard Acquisition Clauses and Conditions manual.

3) *Could delegations describe the technical aspects of the systems in use or planned? In particular as regards infrastructure/hardware-software and its options/standards?*

The OBS is accessible by any microcomputer and modem. Communications software provided by the OBS is for IBMs or compatibles. The basic technical requirement for OBS communications can be met with a 286 computer and modem. Telecommunications software is included with the OBS on-line subscription. The service is available seven days a week, 24 hours a day. Easy-to-use menus and key word search capability are available in both French and English.

4) *Could delegations describe any limitations affecting access to information available and use of systems? How wide is potential access to interested suppliers? What are the*

access possibilities for suppliers of other signatory countries? What possible obstacles to access might arise for suppliers in other signatory countries?

Access to the database is open to both domestic and international suppliers. Using the on-line service, firms have immediate access to opportunity notices on the day they are published. Bid documents can be ordered and be on their way in as little as four hours. To subscribe to the OBS, call (613) 737-3374 or 1 (800) 361-4637. The OBS Web site address on the Internet is <http://www.obs.ism.ca>.

5) *For those Parties who use databases which list government procurement opportunities:*

(i) *What are the names of their databases?*

The database is called the Open Bidding Service (OBS).

(ii) *How long have the databases been operational and how many suppliers use the databases?*

The OBS was introduced in 1992 and has approximately 25,000 subscribers.

(iii) *Is a fee charged to suppliers using the system? If so, how much, and what is included in the fee?*

OBS subscriber costs are as follows:

- *On-line subscription* *\$130/year*
- or*
- *Bid Request Line* *\$37/year*
- or*
- *Bid Matching including On-line Subscription* *\$395/year*
- or*
- *Bid Matching including the Bid Request Line*
for Construction and Maintenance, Architectural
and Engineering Services *\$195/year*

An additional pre-payment deposit account of \$100 which is drawn down to cover the costs of on-line time (\$0.40/minute or \$24/hour) for subscribers accessing through datapac lines or \$12.00/month through the Internet, bid documents, bid updates and bid matching leads.

(iv) *Can suppliers obtain tender documentation electronically? If so, how?*

The OBS offers several options for the delivery of bid documents (fax, mail, courier, pick up or download via Internet for PWGSC opportunities).

(v) *How is information on the databases organized?*

Suppliers can browse through the listings or do a quick search using key words to find opportunities that are of interest.

(vi) *Do the databases offer any other features?*

The OBS offers a bid matching service. On-line suppliers can also find out which other companies have ordered bid documents. The OBS also lists a number of international procurement opportunities from other countries which are open to Canadian suppliers. The OBS system contains news, information and advice on doing business with the government, export information from Foreign Affairs and International Trade and on Public Works and Government Services Canada's Standard Acquisition Clauses and Conditions manual.

By accessing the database of former procurement opportunities, subscribers can find what the government has purchased in the past, from which companies and the total dollar value of the awarded contracts.

(vii) *What is the approximate number of procurement opportunities listed on the databases annually?*

In total there are approximately 23,000 bid opportunities listed annually.

(viii) *Are the systems managed by the government or a private company?*

The government contracts this service to a private firm, ISM Information Systems Management Corporation.

(ix) *Can Parties' databases be interrogated using international standards, such as SQL - Standard Query Language?*

The OBS offers user-friendly search features: menu driven, keyword, date, solicitation number, truncation, logical and proximity connectors.

(x) *Are all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - also available on databases? If so, do such notices contain at least the minimum information required to be published under Articles IX and XVIII:1?*

Procurement notices that are required to be published under Articles IX and XVIII:1 for entities in Annex 1, Federal Government Entities, are published on the OBS.

The notices on the database contain all the information for which publication is required under Articles IX and XVIII:1, including the means of identifying the original tender notices to which the award notices relate.

(xi) *How are Agreement-covered notices identified?*

A code is used to identify that a procurement is covered by the WTO Agreement.

(xii) *To what extent does each type of notice contained in databases conform to a standard structure?*

Each type of notice is prepared using a standard •Procurement Notice• form.

(xiii) Is any particular classification used in such notices to describe purchases and, if so, what classification?

Purchases are identified summarily using the Federal Supply Classification for goods, and the NAFTA Common Classification System for services and construction. The Common Classification System for construction work is based on the United Nations Central Product Classification.

(xiv) Where databases exist in a non-WTO language, to what extent are notices and information summarized in a WTO language?

Procurement opportunities appear in Canada's two official languages, French and English.

6) *For those Parties who are involved in action in the area of electronic commerce:*

(i) Please provide full information on projects and plans with regard to electronic commerce.

Since 1992, Canada has used an electronic tendering system called the Open Bidding Service (OBS), to advertise procurement opportunities, distribute the documents necessary for a supplier to submit a formal bid, and advertise contract award notices. All procurement covered by the WTO Agreement is advertised on the OBS. A large number of Government of Canada non-WTO-covered procurements, as well as opportunities from the Provinces of Alberta, Manitoba, Ontario, Quebec, New Brunswick and Saskatchewan are also advertised on the service.

The OBS, managed by a private company, currently has approximately 25,000 subscribers. Subscription options vary, from on-line access via the Internet, to bid requests via a toll-free telephone line, to •bid matching• where suppliers are automatically notified by the service provider of opportunities matching a profile provided by the supplier. Any individual or organization worldwide may subscribe. At any given time, there are more than 1,000 active opportunities posted on the OBS, with approximately 60 new notices posted each day.

The contract for the existing OBS expires in May 1997, and the procurement for a successor service is well under way. While the exact makeup of the new service is not known at this time, it is felt that the process of contracting for a new service provides the opportunity to continue those features considered to be of value to suppliers, while affording the flexibility to make improvements to the services in such areas as technology, ease of use, and price.

It is anticipated that the new service will be easily accessible to all suppliers worldwide, and will feature all WTO-covered procurement plus many non-WTO-covered opportunities. Suppliers will be able to choose from electronic and hard copy document delivery. Detailed information on the features available from the new service will be available in May 1997.

(ii) Could those Parties who have experience with electronic commerce provide information on such experiences?

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF JAPAN

Communication from Japan

The following communication, dated 3 October 1996, has been received from the Permanent Representative of Japan, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

Pursuant to Article XXIV, paragraph 6(a) of the WTO Agreement on Government Procurement, the Government of Japan wishes to notify the Committee on Government Procurement the following rectifications of a purely formal nature relating to Annex 3 in Appendix I of the WTO Agreement on Government Procurement. As is clear from the following explanation, none of these rectifications alters the coverage which has mutually been agreed upon.

1. *Delete •- Research Development Corporation of Japan• and •- Japan Information Center of Science and Technology• from •List of Entities• regarding supplies and •List of Entities which procure the services, specified in Annex 4•, respectively.*

Add •- Japan Science and Technology Corporation•, instead, to each of the lists mentioned above.

This rectification is based on the fact that •Research Development Corporation of Japan• and •Japan Information Center of Science and Technology• have been merged to form •Japan Science and Technology Corporation•.

2. *Delete •- Livestock Industry Promotion Corporation• and •- Japan Raw Silk and Sugar Price Stabilization Agency• from •List of Entities• regarding supplies and •List of Entities which procure the services, specified in Annex 4•, respectively.*

Add •- Agriculture and Livestock Industries Corporation•, instead, to each of the lists mentioned above.

This rectification is based on the fact that •Livestock Industry Promotion Corporation• and •Japan Raw Silk and Sugar Price Stabilization Agency• have been merged to form •Agriculture and Livestock Industries Corporation•.

3. *Delete •- Coal Mining Areas Restoration Agency• from •List of Entities• regarding supplies and •List of Entities which procure the services, specified in Annex 4•, respectively.*

This rectification is based on the fact that •Coal Mining Areas Restoration Agency• has been integrated to •New Energy and Industrial Technology Development Organization• listed respectively in the above-mentioned lists.

Committee on Government Procurement

THE THRESHOLDS IN APPENDIX I OF THE AGREEMENT AS EXPRESSED IN NATIONAL CURRENCIES FOR 1996/1997

In pursuance of the agreed procedures (GPA/1, Annex 3), delegations have been invited to notify their respective national thresholds for the period 1996-1997.

The information notified in response by Norway is reproduced below.

NORWAY

Threshold calculations - for period 1996-1997.

The calculation of the thresholds of the WTO Agreement in Norwegian crowns (NOK) has been based on the average daily SDR to ECU and ECU to NOK exchange rates over 24 months from September 1993 through August 1995.

The Norwegian GPA threshold values are calculated in the following way; the SDR threshold values are multiplied with the exchange rate between ECU and SDR in the two-year period (1.2013) and then multiplied with 0.87 (1-13 per cent VAT) again multiplied with the exchange rate between Norwegian crowns and ECU (8.3075) in the same time period. The value of the thresholds is expressed net of value-added tax (VAT) because the threshold values are expressed net of VAT in Norway.

ANNEX 1

	SDR	NOK	Rounded Thresholds NOK
1. Supplies and services	130,000	1,128,715	1,100,000
2. Construction	5,000,000	43,412,129	41,500,000

ANNEX 2

	SDR	NOK	Rounded Thresholds NOK
1. Supplies and services	200,000	1,736,485	1,650,000
2. Construction	5,000,000	43,412,129	41,500,000

ANNEX 3

	SDR	NOK	Rounded Thresholds NOK
1. Supplies and services	400,000	3,472,970	3,300,000
2. Construction	5,000,000	43,412,129	41,500,000

Norway is bound, under the terms of the Agreement on the European Economic Area (EEA), by the thresholds for public procurement in this Agreement, which are expressed in ECU. The thresholds under the EEA Agreement are ECU 200,000, ECU 400,000 and ECU 5,000,000. The thresholds according to the EEA Agreement for the period 1996 and 1997 are as follows:

$$\text{ECU } 200,000 * 8.3075 = \text{NOK } 1,661,500$$

$$\text{ECU } 400,000 * 8.3075 = \text{NOK } 3,323,000$$

$$\text{ECU } 5,000,000 * 8.3075 = \text{NOK } 41,537,500$$

The value of the SDR has been higher than the value of the ECU in the 24-month calculation period, making the SDR thresholds higher than the ECU-based thresholds. In order to comply with both the WTO Government Procurement Agreement and the EEA Agreement, Norway has determined to set rounded thresholds based on the lowest values for Annex 2 and 3 entities and for the construction threshold. Hence the Norwegian threshold values for the period 1996 and 1997 are the following:

SDR	130,000	200,000	400,000	5,000,000
NOK	1,100,000	1,650,000	3,300,000	41,500,000

*QUESTIONNAIRE ON INFORMATION TECHNOLOGY
IN GOVERNMENT PROCUREMENT*

Response by Norway

The attached communication contains the replies from the delegation of Norway to the questionnaire on Information Technology in Government Procurement contained in document GPA/W/24, dated 22 August 1996.

QUESTIONNAIRE ON INFORMATION TECHNOLOGY

1) *Could delegations give a brief description of any steps taken or planned to introduce information technology into public procurement? If so, does this cover contracts which are covered under the 1994 Agreement? At all levels of government?*

Public entities can purchase programs for filling in tender notices electronically. Electronic transmission of notices to the Norwegian gazette and to the EC Publication Office in Luxembourg is being planned. Norway also participates in the SIMAP project under the European Communities.

All Norwegian Agreement-covered tender notices are available on the TED (Tenders Electronic Daily) database of the European Communities. The TED database is the electronic version of the Official Journal Supplement S of the European Communities. This database can be accessed by firms directly, or through specialized consultants who offer monitoring of TED for companies.

The Norwegian government gazette, Norsk lysingsblad, appears every Friday on the Internet. It is compulsory for state entities to publish in this gazette, and all these notices are found in the electronic version. Most of the municipalities and counties also publish their procurement above the WTO-GPA threshold values in this gazette. Short versions of all the notices in the European Communities TED database are also available through this Internet address.

An English-Norwegian CPV dictionary will be available on disk next year.

2) *What function(s) would information technology serve in such systems and who will be the users?*

The Internet version of the government gazette is meant for companies of any size. Electronic access to TED and the government gazette gives interested suppliers quicker and more easily available information than paper-based versions regarding notices for public contracts.

3) *Could delegations describe the technical aspects of the systems in use or planned? In particular as regards infrastructure/hardware-software and its options/standards?*

The government gazette is available for everybody with an Internet connection. TED can be accessed by special programs designed for this purpose.

4) *Could delegations describe any limitations affecting access to information available and use of systems? How wide is potential access to interested suppliers? What are the access possibilities for suppliers of other signatory countries? What possible obstacles to access might arise for suppliers in other signatory countries?*

The information in the government gazette is available for all suppliers with an Internet connection. The text in the government gazette is in Norwegian. Access to TED is more complicated and usually done by specialized firms.

5) *For those Parties who use databases which list government procurement opportunities:*

(i) *What are the names of their databases?*

The Internet address of the government gazette is: <http://norsk.lysingsblad.no/>

(ii) *How long have the databases been operational and how many suppliers use the databases?*

The government gazette on Internet started as a pilot project on 1 July 1996, ending 31 December this year. It is planned to become permanent in 1997. It is not known how many interested suppliers have accessed this database. Regarding the TED database, there are approximately 10 consultants that monitor the database on behalf of interested suppliers in Norway and Sweden.

(iii) *Is a fee charged to suppliers using the system?*

Not yet, but perhaps in 1997.

(iv) *Can suppliers obtain tender documentation electronically? If so, how?*

In some cases only, but it is becoming increasingly common. The Government Administration Services offer tender documentation electronically in connection with framework agreements. Very often documentation is sent by facsimile.

(v) *How is information on the databases organized?*

Weekly in the government gazette on Internet. In TED according to the type of tender notice (contract awards, services notices etc.).

(vi) *Do the databases offer any other features?*

The government gazette also contains articles related to public procurement of interest to suppliers.

(vii) *What is the approximate number of procurement opportunities listed on the databases annually?*

Approximately 2,500 Norwegian tender notices will be published in TED in 1996. In the government gazette there will be approximately 2,000 notices.

(viii) *Are the systems managed by the government or a private company?*

The government gazette on Internet is managed by the Government Administration Services. The TED database is managed by the Publication Office of the European Communities.

(ix) Can Parties' databases be interrogated using international standards, such as SQL - Standard Query Language?

No, not for the government gazette.

(x) Are all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - also available on databases? If so, do such notices contain at least the minimum information required to be published under Articles IX and XVIII:1?

Yes, either in the government gazette or through TED or in both databases.

(xi) How are Agreement-covered notices identified?

Almost all the Norwegian notices that appear in TED will be covered by the GPA. Only in a few cases entities publish notices in TED for supplies, services or works that are below the GPA threshold values. In the government gazette, there will be notices for state procurement which are not covered by the GPA. Whether the notices in the government gazette are covered by the GPA or not, suppliers will have to estimate when they read the notices. Suppliers can also contact the entities to enquire whether a procurement is covered by the GPA or not.

(xii) To what extent does each type of notice contained in databases conform to a standard structure?

Both in TED and in the government gazette there is a standard layout for notices.

(xiii) Is any particular classification used in such notices to describe purchases and, if so, what classification?

All Agreement-covered notices are described by the CPV nomenclature.

(xiv) Where databases exist in a non-WTO language, to what extent are notices and information summarized in a WTO language?

All Norwegian tender notices appear in TED in an EC language. Almost all of these notices appear in English.

6) For those Parties who are involved in action in the area of electronic commerce:

(i) Please provide full information on projects and plans with regard to electronic commerce.

EDIRAM is a pilot project on electronic exchange of information between public purchasers and suppliers in the process of putting framework agreements into operational work. The purchaser shall be able to order goods by electronic mail, and the suppliers to return invoices as well as other relevant information in demand to the purchasers (GPA/IC/W/7/Add.6/Suppl.1). This project is operational on a small scale and will be extended in 1997. The EDIRAM project will be succeeded by other projects on electronic commerce and payment. In these projects, Norway uses the EC's EDIFACT standard.

(ii) Could those Parties who have experience with electronic commerce provide information on such experiences?

Committee on Government Procurement

ACCESSION OF THE KINGDOM OF THE NETHERLANDS
WITH RESPECT TO ARUBA

Communication from the Kingdom of the Netherlands
with Respect to Aruba

The following communication, dated 23 August 1996, has been received from the Permanent Mission of the Kingdom of the Netherlands.

On 27 February 1996 the Committee on Government Procurement approved the application for accession to the GPA 1994 of the Kingdom of the Netherlands with respect to Aruba (Decision GPA/2). Furthermore it decided that said decision would expire six months after the date of its adoption, i.e. 27 August 1996, unless extended by mutual consent between the Committee and the Kingdom of the Netherlands with respect to Aruba (GPA/2, paragraph 3).

Aruba has already completed its domestic legislative process but due to unforeseen circumstances the Kingdom of the Netherlands with respect to Aruba will not be able to deposit the instrument of accession within said deadline, but soon thereafter, hopefully already before the next meeting of the Committee on Government Procurement 1994 on 20 September 1996.

In conformity with above-mentioned paragraph 3 of Decision GPA/2, I therefore kindly request a brief extension of the deadline for the depositing of the instrument of accession.

INFORMATION TECHNOLOGY: REVISED QUESTIONNAIRE

Note from the Secretariat

At the invitation of the Interim Committee, the Secretariat prepared, on 16 September 1994, a questionnaire on the use of information technology in government procurement in the various Signatories (GPA/IC/W/4/Rev.1). Replies were received from Sweden, Japan, Switzerland, Finland, the European Communities, the United States, Norway, Austria, Canada, Korea and Israel (GPA/IC/W/7 and Addenda 1, 2, 3, 4, 5, 6 and Suppl. 1, 7, 8, 9 and 10, respectively). At its meeting of 4 June 1996, the Committee on Government Procurement asked the Secretariat to revise the questionnaire in the way proposed in document GPA/W/15, Information Technology: Compilation of Issues (GPA/M/2, paragraphs 44 and 45).

The main differences between the attached revised questionnaire and the earlier questionnaire are the additional subpoints (ix) to (xiv) to Question 5 and Question 6 which focused on electronic procurement. The old Question 5 has been deleted because the normative aspects of the matter are under discussion in the Committee and the factual aspects are picked up in Question 6. Parties are invited to provide updated responses to the questionnaire as a whole, where possible before the Committee meeting of 20 September 1996 and, in any event, by 15 October 1996.

QUESTIONNAIRE ON INFORMATION TECHNOLOGY

1) *Could delegations give a brief description of any steps taken or planned to introduce information technology into public procurement? If so, does this cover contracts which are covered under the 1994 Agreement? At all levels of government? In the event that delegations are not considering introducing information technology into public procurement, could they explain the reasons?*

2) *What function(s) would information technology serve in such systems and who will be the users?*

Examples of functions: management of procedures, notification of tender opportunities, exchange of tender information, distribution of tender documentation, submission of tenders, notification of contract awards, payment, added value services, including technical assistance to users, surveillance.

Examples of users: contracting entities, suppliers (SMEs in particular), supervisory authorities.

3) *Could delegations describe the technical aspects of the systems in use or planned? In particular as regards infrastructure/hardware-software and its options/standards?*

4) *Could delegations describe any limitations affecting access to information available and use of systems? How wide is potential access to interested suppliers? What are the access possibilities for suppliers of other signatory countries? What possible obstacles to access might arise for suppliers in other signatory countries?*

For example, in the event that an electronic database is available, how can suppliers (both domestic and foreign) access the database?

5) *For those Parties who use databases which list government procurement opportunities:*

(i) What are the names of their databases?

(ii) How long have the databases been operational and how many suppliers use the databases?

(iii) Is a fee charged to suppliers using the systems? If so, how much, and what is included in the fee?

(iv) Can suppliers obtain tender documentation electronically? If so, how?

(v) How is information on the databases organized?

- (vi) *Do the databases offer any other features?*
- (vii) *What is the approximate number of procurement opportunities listed on the databases annually?*
- (viii) *Are the systems managed by the government or a private company?*
- (ix) *Can Parties' databases be interrogated using international standards, such as SQL - Standard Query Language?*
- (x) *Are all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - also available on databases? If so, do such notices contain at least the minimum information required to be published under Articles IX and XVIII:1?*
- (xi) *How are Agreement-covered notices identified?*
- (xii) *To what extent does each type of notice contained in databases conform to a standard structure?*
- (xiii) *Is any particular classification used in such notices to describe purchases and, if so, which classification?*
- (xiv) *Where databases exist in a non-WTO language, to what extent are notices and information summarized in a WTO language?*
- 6) *For those Parties who are involved in action in the area of electronic commerce:*
- (i) *Please provide full information on projects and plans with regard to electronic commerce.*
- (ii) *Could those Parties who have experience with electronic commerce provide information on such experiences?*

In responding to these questions, Parties are invited to:

- provide any additional information to respond to the points in Questions 4 and 5 as they relate to electronic procurement systems;*
- indicate the present and planned coverage of procurement operations by electronic systems and how this relates to GPA coverage;*
- indicate the extent to which electronic procurement is planned to co-exist with or replace hard-copy-based procedures;*
- indicate the standards used/planned for electronic communication under the systems and how these relate to the UN EDIFACT standard;*

- indicate any experience/plans in regard to deadlines for submission of tenders and other time-limits;*
- indicate any experience with the number of tenders received under electronic procurement systems compared to hard-copy-based systems;*
- provide information on techniques evolved for ensuring the confidentiality and security of information exchanged and payments made and the legal validity of documents submitted.*

Committee on Government Procurement

PROVISIONS OF THE AGREEMENT WHICH MIGHT NEED TO BE RE-
EXAMINED
IN THE LIGHT OF INFORMATION TECHNOLOGY

Note by the Secretariat

1) *With a view to ensuring that the Agreement does not constitute an unnecessary obstacle to technical progress, Article XXIV:8 of the Agreement calls on Parties to consult regularly in the Committee on developments in the use of information technology in government procurement and, if necessary, to negotiate modifications to the Agreement itself. This provision requires consultations to aim in particular at ensuring that the use of information technology promotes the aims of open, non-discriminatory and efficient government procurement through transparent procedures, that contracts covered under the Agreement are clearly identified and that all available information relating to a particular contract can be identified. The delegations of the United States, the European Communities and Norway have submitted communications identifying a number of areas that might require examination to accommodate developments in information technology (GPA/IC/W/36, GPA/W/13 and GPA/W/14). At its meeting on 4 June 1996, the Committee requested the Secretariat to prepare a factual note on the aspects of the Agreement that it had been suggested might need to be re-examined in the light of information technology, setting out the relevant provisions of the Agreement and drawing attention to any pertinent information on their negotiating history.*

2) *This note addresses, in turn, the provisions of the Agreement relating to the following issues that have been raised in the Committee's discussions on this matter: (a) publication requirements; (b) submissions of tenders and other communications between the tenderer and the procuring entity; (c) selective tendering; (d) deadlines; and (e) non-discriminatory treatment.*

3) *Paragraph 8 of Article XXIV was added in the last stages of the negotiation of the 1994 Agreement in recognition of the fact that the Agreement*

did not take account of the rapidly emerging use of information technology in government procurement. Indeed, as is demonstrated below, most of the procedural provisions in the Agreement stem from the text of the 1988 Agreement, which in turn follows closely the original Tokyo Round text. The main differences in the procedural rules (apart from challenge) concern adaptations to allow for the addition of Annex 2 and Annex 3 entities and a restructuring of the presentation in an attempt to make it more user-friendly.

(a) Publication requirements

4) *It has been said that the Agreement contains various provisions regarding publication that are ambiguous regarding use of electronic means and the suggestion has been made that these provisions should be reviewed and clarified.*

5) *The main publication requirement is contained in paragraph 1 of Article IX, which reads as follows:*

- 1. *In accordance with paragraphs 2 and 3, entities shall publish an invitation to participate for all cases of intended procurement, except as otherwise provided for in Article XV (limited tendering). The notice shall be published in the appropriate publication listed in Appendix II. •*

While this provision, which corresponds to Article V:4 of the 1988 Agreement, was no doubt originally drafted with hard-copy publication in mind, it does not explicitly prejudge the form of the publication except to the extent that this is determined by the specific publications listed in Appendix II. The publications listed or referred to there would appear to be essentially hard-copy publications, although some are also now available in electronic form. Exceptions are the Open Bidding Service (OBS) in Canada and the publications for certain States of the United States of America, in respect of which the additional information made available by the United States delegate at the Interim Committee's meeting of 7 December 1995 includes some electronic publications.¹ The text of Appendix II as it presently stands is contained in Attachment 1 to this note.

6) *Article IX requires publication in a number of its other provisions. Paragraph 9 of Article IX stipulates that entities maintaining permanent lists of qualified suppliers shall publish annually a notice in one of the publications listed in Appendix III. The Open Bidding Service in Canada would appear to be the only electronic publication in Appendix III. The present text of Appendix III can be found at Attachment 2 to this note. When such a notice is used as an invitation to participate, the notice shall, in addition, include other specified information. As such, this notice shall be published in a publication listed in Appendix II. Paragraph 8 of Article IX contains the obligation, in all cases of intended procurement, to publish a summary notice.*

¹ For instance Delaware Internet Home Page, Florida Administrative Weekly (also available soon on the Internet), Kansas Internet Home Page, Massachusetts Internet address.

7) *Article XVII:1(b) and Article XVIII:1 also contain publication provisions, which once more do not explicitly prejudge the nature of the publication, except to the extent that this is determined by the publications listed in Appendix II.*

8) *While these publication provisions do not explicitly prejudge the nature of the publication to be used, it would seem clear, given that for the most part they correspond to provisions in the 1988 and Tokyo Round Agreements, that the drafters had hard-copy rather than electronic publication in mind. This is also borne out by language of Article XI:1(b), concerning time-limits for tendering and delivery, which requires each party to ensure that its entities shall take due account of publication delays when setting the final date for receipt of tenders or of applications to be invited to tender. The provisions of Article IX correspond to those in paragraphs 4, 5, 7(a) and 9 of Article V of the 1988 Agreement. Specific provisions have been added to Article IX to take account of entities in Annexes 2 and 3, in particular Article IX:3-5, Article IX:7 and the second part of Article IX:9. Article XVII:1 is new to the 1994 Agreement. With a change in the delay period from 60 to 72 days, Article XVIII:1 is based on the old Article VI:1, which was introduced in the 1988 Revision of the Tokyo Round Agreement.*

(b) Submissions of tenders and other communications between the tenderer and the procuring entity

9) *It has been stated that the various provisions of the Agreement relating to these matters are ambiguous regarding the use of electronic means and should be reviewed and clarified. It has also been suggested that special safeguard measures may be required where the electronic submission of tenders is allowed.*

10) *Article XIII:1(a) reads as follows (emphasis added):*

- 1. *The submission, receipt and opening of tenders and awarding of contracts shall be consistent with the following:*

*(a) tenders shall normally be submitted **in writing directly or by mail**. If tenders by **telex, telegram or facsimile** are permitted, the tender made thereby must include all the information necessary for the evaluation of the tender, in particular the definitive price proposed by the tenderer and a statement that the tenderer agrees to all the terms, conditions and provisions of the invitation to tender. The tender must be confirmed promptly **by letter or by the despatch of a signed copy of the telex, telegram or facsimile**. Tenders presented by telephone shall not be permitted. The content of the telex, telegram or facsimile shall prevail where there is a difference or conflict between that content and any documentation received after the time-limit; and•*

11) *Article X:4 reads as follows (emphasis added):*

- 4. *Requests to participate in selective tendering procedures may be submitted by **telex, telegram or facsimile.***
- 12) *Article XIV:4(b), which concerns negotiated procurement, reads as follows:*
- 4. *Entities shall not, in the course of negotiations, discriminate between different suppliers. In particular, they shall ensure that:*
 - (a) ...
 - (b) *all modifications to the criteria and to the technical requirements are transmitted in writing to all remaining participants in the negotiations;*
- 13) *Article XVIII:3 reads as follows:*
- 3. *Entities shall promptly inform participating suppliers of decisions on contract awards and, upon request, in writing.*
- 14) *Other provisions of Article X, XIII, XIV and XVIII also deal with aspects of communications between actual or potential tenderers and procurement authorities, as does also Article VIII on qualification of suppliers and Article XII on tender documentation. These provisions would appear to be silent on whether such communications need be in hard-copy form (although, no doubt, this was in the minds of the drafters).*
- 15) *Article XIII is entirely taken over from the 1988 Agreement, which in turn, for the most part, corresponded to the Tokyo Round Agreement. The new Article XIII:1 was the old Article V:15(a) and (b); the new Article XIII:2 was the old Article V:15(c); the new Article XIII:3 is inspired by the old Article V:15(d) but is a little less specific. In regard to the award of contracts, the new Article XIII:4(a) was the old Article V:15(e); the new Article XIII:4(b) was the old Article V:15(f); the new Article XIII:4(c) was the old Article V:15(j) which was added in the 1988 Revision of the Agreement; the new Article XIII:5 was the old Article V:15(i) which was also added in the 1988 Revision of the Agreement. Article X:4 on selective tendering was the old Article V:15(a), last sentence. Article XIV:4 on negotiation with participants originated in old Article V:15(g). Article XVIII:3 on decisions on contract awards was the old Article VI:4.*
- (c) *Selective tendering*
- 16) *It has been stated that, due to the fact that utilizing electronic commerce may result in a significantly greater volume of bids submitted, procurement authorities may rely more heavily on selective tendering procedures; and that it may therefore be necessary to re-examine the provisions of Article X with a view to considering ways to ensure that foreign suppliers can participate on an equal*

footing with domestic suppliers in selective tendering procedures that arise from the use of electronic commerce.

17) *Article X reads as follows:*

•Article X

Selection Procedures

1. *To ensure optimum effective international competition under selective tendering procedures, entities shall, for each intended procurement, invite tenders from the maximum number of domestic suppliers and suppliers of other Parties, consistent with the efficient operation of the procurement system. They shall select the suppliers to participate in the procedure in a fair and non-discriminatory manner.*
2. *Entities maintaining permanent lists of qualified suppliers may select suppliers to be invited to tender from among those listed. Any selection shall allow for equitable opportunities for suppliers on the lists.*
3. *Suppliers requesting to participate in a particular intended procurement shall be permitted to submit a tender and be considered, provided, in the case of those not yet qualified, there is sufficient time to complete the qualification procedure under Articles VIII and IX. The number of additional suppliers permitted to participate shall be limited only by the efficient operation of the procurement system.*
4. *Requests to participate in selective tendering procedures may be submitted by telex, telegram or facsimile. •*

18) *Also relevant to safeguards to ensure effectively non-discriminatory use of selective tendering procedures are the requirements of Article VIII concerning qualification of suppliers. In the discussion on the question of selective tendering and the use of information technology in procurement, reference has also been made to Article VI relating to technical specifications. It has been suggested that any threats to the efficient operation of procurement processes resulting from a proliferation of tenders might be responded to through a more careful formulation of contract specifications.*

19) *Article X has been taken over from the 1988 Agreement as it stands: the new Article X:1 was the old Article V:6; the new Article X:2 was the old Article V:7(b); the new Article X:3 was the old Article V:8; the new Article X:4 was the last part of the old Article V:15(a). The provisions were rearranged in this way to put everything pertaining to selective tendering together in one Article.*

(d)Deadlines

20) *It has been suggested that Article XI, on time-limits for tendering and delivery, should be reviewed in the light of the fact that electronic publication can reduce the lead time necessary for informing interested suppliers of potential procurement opportunities (through the notices of intended procurement in Article IX) and the electronic submission of tenders can decrease the time required by potential suppliers for submitting responsive tenders.*

21) *Paragraph 1 of Article XI contains general considerations that should govern the setting of time-limits for tendering and delivery, which make it clear that the time-limits in the Agreement were set with hard-copy publication and submission of tenders by mail in mind. Paragraph 1 of Article XI reads as follows:*

•1.(a)Any prescribed time-limit shall be adequate to allow suppliers of other Parties as well as domestic suppliers to prepare and submit tenders before the closing of the tendering procedures. In determining any such time-limit, entities shall, consistent with their own reasonable needs, take into account such factors as the complexity of the intended procurement, the extent of subcontracting anticipated and the normal time for transmitting tenders by mail from foreign as well as domestic points.

(b)Each Party shall ensure that its entities shall take due account of publication delays when setting the final date for receipt of tenders or of applications to be invited to tender. •

22) *Paragraphs 2 and 3 of Article XI set out the minimum deadlines for receipt by entities of tenders submitted by interested suppliers, i.e. the time allowed to potential suppliers to prepare and submit tenders and, in the case of selective tendering, to submit an application to be invited to tender.*

23) *The new Article is largely taken over from the old Article V of the 1988 Agreement. Article XI:1(a) and (b) correspond to Article V:10(a) and Article V:11(f) respectively, of the 1988 Agreement. The old Article V:11(f) was introduced in the 1988 Revision of the Tokyo Round Agreement. Article XI:2(a) corresponds to the Article V:11(a) of the 1988 Agreement in which the period for receipt of tenders was extended to 40 days from 30 days in the Tokyo Round Agreement; Article XI:2(b) corresponds to the Article V:11(b) of the 1988 Agreement, in which the period for submitting an application to be invited to tender was reduced to 25 days from 30 days in the Tokyo Round Agreement, and the period for receipt of tenders was extended to 40 days from 30 days; Article XI:2(c) corresponds to the Article V:11(c) of the 1988 Agreement, in which the period for receipt of tenders was extended to 40 days from 30 days in the Tokyo Round Agreement. Article XI:3(a) is new and corresponds to what has been described as a •pre-qualification notice•; Article XI:3(b) corresponds to the old Article V:11(d) with the period for receipt of tenders of 25 days introduced in the 1988 Revision of the Tokyo Round Agreement and changed to 24 days in the 1994*

Agreement; Article XI:3(c) corresponds to the old Article V:11(e) which is added in the 1988 Revision of the Tokyo Round Agreement; Article XI:3(d) is new in the 1994 Agreement, since it deals with entities which were not covered by the 1988 and Tokyo Round Agreements. Article XI:4 corresponds to the old Article V:10 (b), which was redrafted in the 1988 Revision of the Tokyo Round Agreement.

(e) *Non-discriminatory treatment*

24) Concern has been expressed that, unless appropriate safeguards are established, the use of information technology in government procurement may lead to de facto discrimination against foreign suppliers, even where it is formally applied on a non-discriminatory basis. The main possible areas for cooperation to prevent any such outcome that have been referred to are the technical and content-related compatibility of different electronic systems and cost. The question has been raised of whether additional rules, or clarification of existing rules, should be built into the Agreement to ensure that procedures administered electronically give the same or better guarantees of non-discriminatory access.

25) The basic national treatment and non-discrimination rules are contained in Article III. These relate to •all laws, regulations, procedures and practices regarding government procurement covered by this Agreement•. Paragraph 1 of Article VII requires that •each Party shall ensure that the tendering procedures of its entities are applied in a non-discriminatory manner and are consistent with the provisions contained in Articles VII through XVI•. Articles VII through XVI contain minimum standards that procurement procedures have to comply with, in addition to compliance with the basic national treatment and non-discrimination rules.

INFORMATION TECHNOLOGY: COMPILATION OF ISSUES

Note by the Secretariat

Corrigendum

Paragraph 34, Section IV of document GPA/W/15, should read as follows:

34. The discussions so far would seem to indicate widespread acceptance of two basic guidelines that should inform the future work of the Committee on information technology:

-that the work should be governed by the objectives of the Government Procurement Agreement and the specific provisions of Article XXIV:8;

-that work on aspects aimed at safeguarding and promoting open and non-discriminatory procurement should proceed in parallel with work on aspects aimed at promoting efficient procurement.

Paragraph 36, Section IV of document GPA/W/15, should read as follows:

36. In regard to the issues discussed in Section II, a number of quite technical matters have been raised and the question arises as to whether work on these matters would be facilitated by the establishment of a sub-group of experts and/or by the use of a consultant. However, it ~~w~~could be that a more in-depth and systematic examination of these issues in the Committee itself would be a necessary preliminary for the Committee to be able to determine ~~to~~the appropriateness of such steps and the mandate to be given to any sub-group and/or consultant. In doing so, members might also have regard to the issues earlier identified in document GPA/IC/W/18 (reproduced at Annex 1).

Committee on Government Procurement

ACCESSION OF SINGAPORE

Note by the Secretariat

Addendum

In accordance with the Committee decision of 4 June 1996 (GPA/M/2, paragraphs 21 and 22), the Secretariat drew up, and circulated on 20 June 1996, a draft Decision on Accession, to which were attached the terms of its accession submitted by Singapore to the Secretariat on 14 June 1996, for consideration and adoption by the Committee (GPA/W/21). This Decision would be considered adopted if no objections or requests for extension of the time-limit were received from Parties within 30 days of the date of the issue of the document, i.e. by 20 July 1996.

The Secretariat was informed by some Parties on 19 July 1996 that they would wish to have additional time for consideration of the Decision before its adoption.

It is the Secretariat's understanding that consultations between these Parties and Singapore are underway. Members of the Committee will be kept informed of developments.

MODIFICATIONS TO APPENDIX I OF NORWAY

Communication from Norway

The following communication from the Permanent Representative of Norway has been received on 17 July 1996, with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I am writing to you concerning the modifications to Appendix I of the Government Procurement Agreement, which follow on from the agreement reached between Norway and the United States of America. Article XXIV of the Agreement contains the provisions on its entry into force and it is in conformity with paragraph 6(a) of Article XXIV that I hereby inform you of modifications to the Norwegian General Notes in Appendix I of the Agreement.

In accordance with our understanding with the Government of the United States of America, you should today receive a parallel communication from the Delegation of the United States of America.

The enclosed communication should be circulated to Members of the Committee on Government Procurement in a document dated 17 July 1996 so that the modification will become effective 30 days from that date provided there is no objection.

./.

ANNEX

MODIFICATIONS TO NORWAY'S GENERAL NOTES IN APPENDIX I

1) In General Note 1, delete •USA• from the first tic covering entities in Annex 2, and add a new tic reading:

•... as regards the award of contracts, other than for supplies, listed in Annex 2 to the suppliers and service providers of the USA. •

2) In General Note 1, delete •USA• from (1) and (4) under the second tic.

Committee on Government Procurement

ACCESSION OF SINGAPORE

Note by the Secretariat

At its meeting on 4 June 1996, the Committee on Government Procurement agreed that the Secretariat would draw up, and circulate, in the week of 17 June 1996, a draft Decision on Accession for consideration and adoption by the Committee. This Decision would be considered adopted if no objections or requests for extension of the time-limit for consideration were received from Parties within 30 days of the date of this document.

Attached is the draft Decision on the accession of Singapore, to which are attached the terms of its accession submitted by Singapore to the Secretariat in a communication dated 14 June 1996, for the Committee's action and approval. The attached terms of accession replace the offer which was tabled by Singapore at the Committee meeting on 4 June 1996 and subsequently circulated as document GPA/SPEC/2.

In accordance with the Committee decision of 4 June 1996, this Decision, including the terms of accession, shall be deemed to be approved by the Committee if no objections or requests for extension of the time-limit are received from Parties by 20 July 1996.

ACCESSION OF SINGAPORE

Draft Decision

The Committee,

Having regard to the application for accession to the Agreement on Government Procurement (1994) by Singapore, contained in document GPA/IC/W/33 of 15 November 1995, and the consultations held with the Parties to the Agreement on Government Procurement in pursuance thereof;

Decides as follows:

- 1. In accordance with the provisions of Article XXIV:2 of the Agreement on Government Procurement (1994), the Government of Singapore may accede to this Agreement on the terms attached.*
- 2. The Agreement on Government Procurement will enter into force for Singapore on the thirtieth day following the date of its accession, i.e. the date on which the instrument of accession reproducing the attached terms has been received by the Director-General.*
- 3. This Decision shall expire one year¹ after the date of its adoption by the Committee on Government Procurement unless it is extended by that Committee by mutual consent between the Committee and Singapore.*

¹*Upon request by the Singapore authorities. Because of an imminent dissolution of Parliament and elections, Singapore is at this time not sure when it can complete its internal domestic procedures.*

Notes to Annex 4:

1. The offer regarding services is subject to the limitations and conditions specified in the Government of Singapore's offer under the GATS negotiations.

2. *The Agreement shall not apply to any procurement made by a covered entity on behalf of a non-covered entity.*

ANNEX 5

Construction Services

The following construction services in the sense of Division 51 of the Central Product Classification as contained in the document MTN.GNS/W/120 are offered (others being excluded):

*Threshold: SDR 5,000,000 for entities as set out in Annex 1
SDR 5,000,000 for entities as set out in Annex 3*

List of construction services offered:

<i>CPC</i>	<i>Description</i>
<i>512</i>	<i>General construction work for buildings</i>
<i>513</i>	<i>General construction work for civil engineering</i>
<i>514, 516</i>	<i>Installation and assembly work</i>
<i>517</i>	<i>Building completion and finishing work</i>
<i>511, 515, 518</i>	<i>Others</i>

Notes to Annex 5:

1. *The offer regarding construction services is subject to the limitations and conditions specified in the Government of Singapore's offer under the GATS negotiations.*

2. *The Agreement shall not apply to any procurement made by a covered entity on behalf of a non-covered entity.*

Committee on Government Procurement

REQUEST FOR INFORMATION PURSUANT TO ARTICLE XIX
OF THE AGREEMENT ON GOVERNMENT PROCUREMENT

Communication from the United States

The following communication, dated 6 June 1996, has been received from the delegation of the United States with the request that it be distributed to the Members of the Committee on Government Procurement.

The United States hereby requests information from the Government of Japan under Article XIX:2 of the WTO Government Procurement Agreement (GPA) on the May 1996 procurement by the Tokyo Metropolitan Fire Defense Agency (TMFDA) of an AS 365 helicopter. This information is needed to determine that the contract award was made fairly and impartially and in accordance with the procedural requirements of the Government Procurement Agreement.

This procurement is subject to the GPA. The TMFDA is a sub-central government entity covered by Japan's Annex 2, and the value of the procurement exceeds the Annex 2 threshold of 200,000 SDRs.

The United States is particularly concerned about receiving information on the technical basis for each of the seven specifications listed in the bid documents. The United States would appreciate:

- (i) an explanation of the performance requirement for each specification - for instance, what is the technical performance reason that the rotor must rotate clockwise rather than counter-clockwise; and*
- (ii) technical information used in developing each of the specifications, such as experts' opinions and engineering studies.*

In addition, the United States would like a list and description of all contacts, as well as copies of all written communications, between the winning bidder and TMFDA, Ministry of Home Affairs officials and Ministry of Foreign Affairs officials.

In order to judge the fairness and impartiality of the contract award, the United States also requests copies of any communications between TMFDA and officials of the Ministries of Home Affairs and Foreign Affairs regarding TMFDA's implementation of the GPA. The United States would like to know if TMFDA's specifications differ from those of other sub-central procuring entities and, if so, how.

Finally, the United States would appreciate receiving copies of all the final tender document and a copy of TMFDA's bid protest procedures.

The United States undertakes to respect the confidentiality of any documents and information provided and to use such documents and information for the sole purpose of determining whether the contract award was fair and impartial. As provided for under Article XIX:2, if release of the documents and information would prejudice competition in future procurements, the United States will consult with the Government of Japan prior to release.

Committee on Government Procurement

APPLICATION FOR ACCESSION TO THE AGREEMENT
ON GOVERNMENT PROCUREMENT OF SINGAPORE

Replies to the Questions on the Government Procurement
Régime of Singapore

The following communication, dated 5 June 1996, has been received from the delegation of Singapore.

In response to the questions submitted to Singapore by the Committee on Government Procurement, and compiled in an Informal Note by the Secretariat dated 13 May 1996, we are pleased to provide the additional information on Singapore's government procurement régime in the attached document. Please circulate this as a GPA document to the Members of the Committee.

REPLIES TO THE QUESTIONS ON THE GOVERNMENT
PROCUREMENT

REGIME OF SINGAPORE

Singapore provided information on its government procurement régime in document GPA/W/10, dated 5 March 1996. The following additional information is given in response to questions, relating to paragraph 2.2 of that document on Outline of Procurement Policies and Practices, as compiled by the Secretariat in an Informal Note, dated 13 May 1996.

Paragraph 2.2(b)

1) Could the delegation of Singapore list the publication(s) which it will include under Appendix II of the Agreement?

Singapore will list in Appendix II of the GPA text the •Republic of Singapore Government Gazette•.

2) Will tender notices always appear in English?

In accordance with Article IX:8 of the GPA which stipulates that notices of intended procurement be published in one of the official languages of the WTO, Singapore will publish such notices in English.

3) Does the practice of restricting certain tenders to registered suppliers under specific Supply and/or Financial categories correspond to the use of qualification systems as described in Article VIII of the Agreement?

Registration status is accorded to suppliers based on objective criteria such as having sufficient resources, experience and technical expertise to undertake contracts of a nature and size as defined by the supply and financial categories allocated. The objectives of Singapore's supplier registration system are to:

- i) register qualified suppliers who wish to participate in government tenders, and exempt them from the need to pay tender deposits for participation in individual tenders;
- ii) provide a pool of dependable suppliers who can undertake public sector projects;
- iii) ensure that only suppliers who achieved the stipulated level/standard in the provision of stores, works or services for which they are registered, remain on the register.

Singapore's supplier registration system complies with the disciplines set out in Article VIII of the GPA.

Paragraph 2.2(e)

4) Could the delegation of Singapore describe how the registration system for local and foreign suppliers functions? Does the system apply to all types of procurement, including open tendering procedures? How high is the registration fee?

Generally, only companies or firms that are registered as government contractors, whether local or foreign, with the Construction Industry Development Board [CIDB], Pharmaceutical Department [PD] and Expenditure Policies Unit (of the Ministry of Finance, Budget Division) [EPU] under the appropriate supply and financial categories are allowed to participate in all tenders for GP. Such registered tenderers are issued with registration cards showing the categories of stores, works or services they are eligible to tender for and the financial limits within which they may tender. The registration fees for fresh applications are:

i) S\$200 to S\$600, depending on the financial category (CIDB);

ii) S\$50 per supply category subject to a maximum of S\$500 (EPU and PD).

All companies seeking registration as government suppliers must fulfill all of the following criteria:

i) be registered with Singapore's Registry of Companies & Businesses (RCB). Companies incorporated under foreign jurisdiction must furnish copies of Form 79 (Return by Foreign Company Giving Particulars of Directors and Changes of Particulars) and Form 83 (Certificate of Registration as a Foreign Company) issued by the RCB;

ii) subject to the value of contracts normally undertaken, it will be generally eligible for registration in a financial category not exceeding 20 times the value of its positive capital;

iii) subject to its financial standing, it will generally be eligible for registration in a financial category approximately 4 times the highest value of contracts undertaken (for EPU suppliers), or equal to the total value of projects undertaken for the last 3 years (for CIDB suppliers);

iv) for selected supply categories, applicants may have to fulfill additional eligibility criteria e.g., they must have personnel possessing prescribed technical qualifications, possession of specialized plant and equipment, etc.;

v) for applications seeking registration with PD, have proof of agencies for medical products they wish to apply.

The registration card entitles a registered tenderer to obtain from any Ministry and Statutory Board, an invitation to tender for those categories of stores, works or services within the financial limits of the registration.

Suppliers who have provided good service in contracts within their registered financial category would be considered for upgrading to a higher financial category, while those who fail to deliver to specified level/quality of stores, works or services could be debarred from participation in GP tenders.

Paragraph 2.2(g)

5) *In awarding the contract, is the only criterion used that of lowest bid meeting tender specifications in full, or is the criterion of most economic advantageous bid used as well?*

In our view, the lowest bid that meets specifications in full is the offer that is economically most advantageous. In line with its procurement policy of transparency, Singapore Government tender specifications are drawn up to correspond closely with the standard evaluation criteria comprising prices (whether capital cost or life-cycle cost depending on the item), delivery lead-time and performance testing results, if required. Any offer which is able to meet such specifications fully, thereby fulfilling the evaluation criteria, is the best offer. Singapore Government tenders are also designed to obtain for the Government only what it requires, as stipulated in the tender specifications.

Paragraph 2.2(j)

6) *Could the delegation of Singapore describe in what way local contractors with consistent good performance in government construction works are given preference? What is the view of the delegation of Singapore on the compatibility of this practice with provisions of the Agreement on Government Procurement, in particular Article III?*

Under Singapore's Preferential Margin Scheme for Construction Quality (PMS), any local contractor who meets the eligibility criteria of obtaining an Average CONQUAS (Construction Quality Assessment System) Score of 65 for his 3 most recently completed projects, will be given a preference of 0.2% for every point it scores above 65. A contractor's performance in the execution of the contract will be assessed by the procuring agency and the CIDB. The contractor will be awarded the contract if his tender price does not exceed the lowest tender by the computed preferential margin. The amount of premium is subject to a ceiling based on the total value of the scored projects that qualify the contractor for the premium, the maximum amount that a contractor can enjoy being 5% or S\$5 million, whichever is lower. If a firm is given preferential margin under Building works, it will not be able to use this tendering advantage for projects under Civil Engineering works and vice versa.

Singapore will make the necessary adjustments to the scheme to make it consistent with Article III of the GPA.

Paragraph 2.2(l)

7) Could the delegation of Singapore describe its views on the compatibility of the ASEAN Preferential Trading Agreement, in particular its provisions allowing for members to accord each other a preferential margin of 2.5 per cent up to a certain level, with the Agreement on Government Procurement, in particular Article III?

Article III 1(b) of the GPA states that "... each party shall provide immediately and unconditionally to the products, services and suppliers of other Parties offering products or services of the Parties treatment no less favourable than that accorded to products, services and suppliers of any other Party."

Singapore believes that this provision allows it to extend preferential treatment to the other ASEAN countries as none of them is a party to the GPA.

Paragraph 2.2(m)

8) Could the delegation of Singapore provide further details on its challenge procedures and their conformity with the provisions of Article XX of the Agreement on Government Procurement? In doing so, could details be provided about provision allowing for preliminary rulings be given, those on the review of procurement cases, on annulment of proceedings and decisions on indemnities? Given that the Ministry of Finance is at the same time the investigating body of complaints and appeals from suppliers, formulates the government procurement policies and is a listed entity in Singapore's offer, how are challenge procedures to be organized of a supplier wishing to initiate challenge procedures regarding procurements undertaken by the Ministry of Finance itself?

Ministry of Finance (Budget Division), with the assistance of relevant authorities, is in the process of setting out detailed guidelines and procedures to institute challenge procedures to be consistent with Article XX of the GPA.

Committee on Government Procurement

UNIFORM CLASSIFICATION SYSTEMS

Note by the Chairman

At the Committee's last meeting, the Chairman was requested to come forward with proposals for classification systems in the area of goods and services for the purposes of statistical reporting, on the basis of the work done in the Working Group on Statistical Reporting established under the Interim Committee on Government Procurement and submissions by delegations. This Note is intended to respond to this request.

I. GOODS

At its last meeting, the Committee endorsed the recommendation of the Working Group on Statistical Reporting that the system of 26 product categories be used as a basis for a classification system for products. With a view to identifying the precise level of detail desirable in the system of 26 product categories, delegations agreed to submit their ideas by 15 April 1996 on what categories of the 26 product categories could be usefully divided into sub-headings, and, where a further breakdown would be suggested, to identify the precise product coverage of the proposed new categories.

So far, two submissions have been received. One suggests dividing category 14, office machinery and automatic data processing equipment, into two sub-headings, and category 15, telecommunications and sound recording and reproducing apparatus and equipment, also into two sub-headings. According to the other submission, the existing 26 categories are appropriate in their present form without further sub-headings. At a meeting of the Working Group, one other delegation also suggested subdividing categories 14 and 15.

Based on these submissions, the product classification system at Annex 1 is suggested for consideration and action by the Committee. It maintains the system of 26 product categories as it is, except for a sub-division of categories 14 and 15.

II. SERVICES

It is recalled that, at its last meeting, the Committee endorsed the recommendation of the Working Group on Statistical Reporting that the UNCPC be used as the classification system for services. With a view to reaching some conclusions on the level of detail which would be desirable, delegations agreed to review the 30 UNCPC divisions with a view to advising which of these divisions should be combined and if any sub-divisions would be desirable and to submit their ideas to the Secretariat by 15 April.

Two submissions have been received. One submission suggests to keep in particular category 75, Post and Telecommunication Services, in its present form. According to this submission, the maximum convenience would be attained by maintaining the headings as they figure in Parties' respective Annexes. Another submission stresses the merit of using the UNCPC at its division level rather than at any more detailed level with a view to keeping the number of categories to be reported to a minimum. However, this submission states that some subdivisions are misleading, for instance printing and publishing services (88442) which is classified under Division 88, agriculture, mining and manufacturing services. Based on its own national coverage, this delegation suggests to combine a number of divisions, such as Divisions 82 and 87, (Division 82 contains real estate services involving own or leased property (821) and •on a fee or contract basis• (822), while Division 87 lists •other business services•), as well as to group together Division 71 (land transport) and Division 73 (air transport) into one category, called •transport•.

Based on these submissions, the product classification system at Annex 2 is suggested for consideration and action by the Committee. It maintains 28 UNCPC divisions as they are, except for a sub-division of Division 88 (Agricultural, mining and manufacturing services) into a sub-division 88(a) which would refer to all of Division 88 except printing and publishing, plus a sub-division 88(b) which would refer to subclass 88442: publishing and printing, on a fee or contract basis. Of UNCPC Section 5, •Construction work and construction•, only Division 51 is retained since this is the only division of that section which figures in the •Universal list of services• contained in document MTN/GNS/W/120 which negotiators agreed to use as the basis for listing their concessions in Annexes 4 and 5 of Appendix I. These changes bring the total number of categories retained to 29.

WORLD TRADE ORGANIZATION

(96-1831)

Committee on Government Procurement

INFORMATION TECHNOLOGY: COMPILATION OF ISSUES

Note by the Secretariat

1) At its meeting on 27 February 1996, the Committee requested the Secretariat to prepare a compilation of issues and, in conjunction with the Chairman and based on inputs from delegations, identify options for carrying forward work in the area of information technology.

2) This Note is an attempt to respond to this request. It is based on the discussions in the meetings of the Interim Committee and the Committee on this topic, replies to the questionnaire drawn up by the Secretariat (GPA/IC/W/4/Rev.1; replies are contained in documents GPA/IC/W/7 plus Addenda), and other papers presented to the Committee (documents GPA/IC/W/18, GPA/IC/W/19, GPA/IC/W/36, GPA/W/13 and GPA/W/14).

3) Article XXIV:8 of the Agreement reads as follows:

With a view to ensuring that the Agreement does not constitute an unnecessary obstacle to technical progress, Parties shall consult regularly in the Committee regarding developments in the use of information technology in government procurement and shall, if necessary, negotiate modifications to the Agreement. These consultations shall in particular aim to ensure that the use of information technology promotes the aims of open, non-discriminatory and efficient government procurement through transparent procedures, that contracts covered under the Agreement are clearly identified and that all available information relating to a particular contract can be identified. When a Party intends to innovate, it shall endeavour to take into account the views expressed by other Parties regarding any potential problems.

4) In the discussions, two major concerns have emerged:

-that, where necessary, the Agreement should accommodate use of information technology, in order to enable its benefits to be harnessed and to ensure the continued relevance of the Agreement;

-but, in doing so, non-discriminatory access should be protected and, where possible, enhanced.

Based on these concerns, issues have arisen as to whether certain provisions of the Agreement should be reviewed and modified and whether other forms of cooperation between Parties might be warranted.

5) The discussions have related to two types of use of information technology:

-information on procurement opportunities on databases;

-electronic procurement or commerce (the situation where a significant part or all of the procurement process is conducted through electronic means, going beyond dissemination of information on opportunities to include such elements as demand and receipt of documentation and specifications, tender submissions and invoicing).

While initially discussions were mainly focused on issues relating to databases giving information on procurement opportunities, recently the emphasis in the discussions seems to have shifted towards issues of electronic commerce.

6) In the light of the above, the compilation of issues part of the paper is organized under these headings:

-summary of the factual information provided by Parties on the use of information technology in their procurement operations and of issues raised regarding the provision of such information;

-issues related to ensuring that access to procurement opportunities on a non-discriminatory basis is maintained and enhanced;

-issues related to ensuring that the Agreement does not stand in the way of greater efficiency in procurement processes through use of information technology.

The final section of the paper attempts to identify, for consideration by the Committee, options for carrying forward the work in the area of information technology.

I. INFORMATION ON THE USE OF INFORMATION TECHNOLOGY

(a) Summary of the information provided

7) The following information is based on delegations' responses to the Secretariat's questionnaire, contained in document GPA/IC/W/4/ Rev.1 and on the discussion in the Interim Committee and the new Committee on Government Procurement, including the practical demonstration which was organised in June of 1995. In view of the rapid technological progress in the area of information technology, some of the information described below may already have been overtaken by more recent developments.

(i) Systems in place/planned

8) In most Parties, internal developments seem, for the time being, focused on the establishment of databases which list government procurement opportunities, rather than on electronic commerce. In the European Communities, the central element of this is its database called Tenders Electronic Daily (TED). Under the project, entitled SIMAP (Système d'Information Marchés Publics), in which Norway and Switzerland also participate, a number of initiatives are either underway or soon to be undertaken at the European level to enhance the current TED system. The Canadian government has introduced the Open Bidding System (OBS), an internationally accessible electronic database on government procurement. In the United States, Electronic Commerce architecture provides for the VANs to receive calls for tender as they are issued; commercial VANs are used as the interface to the suppliers.

9) In some countries, like Canada, Korea and the United States, suppliers can order and in some cases, obtain tender documentation electronically.

10) The United States Government is in the process of moving from a paper-based system to an electronic process for conducting procurements (electronic commerce) which, for the time being operates in parallel with the system of the hard copy publications. For contracts of a value less than \$100,000, electronic publication is already replacing hard copy publication. The Government is planning to develop and implement, no later than 1 January 2000, a Federal Acquisition Computer Network architecture ("FACNET") that would be government-wide and provide interoperability among users. FACNET would be introduced gradually, with the initial focus on purchases below the simplified acquisition threshold.

11) In Finland, several public sector organizations are using EDI (Electronic Data Interchange) in procurement processes (i.e. municipalities, governmental organizations and companies owned by the government).

12) Israel is considering building a database that would include all public procurement of goods and services covered by the new Agreement. While, at the moment, in Korea procurement information at all levels of government can be obtained via the GINS (Goldstar Information Network Service), operated by a private firm, the Korean government intends to establish a computerized network on government procurement. Chinese Taipei's GPIS (Government Procurement Information System) provides a single source for disseminating tender information by government entities; Chinese Taipei is planning to carry out a feasibility study on electronic commerce.

13) Finland and Norway are involved in pilot projects concerning the use of information technology in public procurement, focusing both on databases containing information on procurement opportunities and on electronic commerce.

(ii) Coverage of the systems: what level of entities?

14) The databases of Chinese Taipei, the European Communities and Korea contain procurement opportunities of all levels of procurement under the new Agreement. The databases in Japan and the United States as well as the US electronic commerce initiative only cover central government entities. It is noted that in the United States, procurement opportunities in several of its States can be accessed through an Internet

Homepage. The Canadian Open Bidding System includes procurements for goods and service contracts valued at more than \$25,000,- and construction and maintenance opportunities valued at more than \$60,000,- and include those subject to the GATT Procurement Code.

(iii) Factors affecting access.

15) In the United States, commercial VAN's are used as the interface to the business community. Access to interested suppliers depends on the access capabilities provided by the VANs. The Electronic Commerce system under development is intended to operate through a wide range of VANs, allowing both foreign and domestic vendors the opportunity to access government-wide FACNET databases when they become available.

16) Access to the European TED database system is possible worldwide. Efficient use of the system is dependant upon familiarity with query commands and search strategies. Suppliers (or information brokers), both domestic and foreign, access it via the public switched network (X - 25) connecting to a Network User Address.

17) The databases of Canada, Japan and Chinese Taipei containing information on procurement opportunities are on-line and can be accessed through the Internet, allowing for world-wide access.

18) While in some Parties (Canada, countries providing information on the TED database, Korea, the United States) fees are charged to use their database(s), others are free of charge (Chinese Taipei, Japan).

19) In terms of language, some Parties indicate that their databases only list the contract opportunities in the national language, while others also provide summary information in English.

(iv) Standards used in the databases

20) In the United States, Electronic Commerce Hardware and telecommunications infrastructure consists of internal agency automated purchase systems that are interconnected to vendor-automated systems through a hub that, in turn, is interconnected to commercially available national and international Value Added Networks (VANs). In most cases, commercial off-the-shelf software is used to translate agency purchase data into standard electronic formats that are then broadcast to the VAN's to be accessed by vendors. The standard currently used in the United States by the contracting authorities for electronic commerce is the ANSI X-12 standard language which, according to the United States representative, can be immediately translated into the EDIFACT standard. However, the US representative stated in the Interim Committee in April of 1995 that it was his government's intention to move to the EDIFACT standard in a year or two.

21) The European TED database system is built on Siemens hardware using DIMDI as its database management system. In terms of the development of an electronic commerce system, the European Communities is using the EDIFACT and X-400 standards. The UN/EDIFACT message group MD 12 (or UN/ECE WP.4/MD12),

chaired by the European Commission, is developing EDI messages for public procurement. The aim is to draw up EDIFACT messages, on the one hand, between the awarding authorities and the suppliers and, on the other hand, between the awarding authorities and the Official Publications Office of the EC and the Commission of the EC.

22) Japan, Norway, Switzerland and Chinese Taipei are using or have announced their intention to use the EDIFACT standard in future.

(v) Who provides the database services: public or private?

23) The databases in the European Communities, Japan and Chinese Taipei are managed by a public authority, while in Canada the operation of the service has been contracted out to private firms. In Korea, the system is also operated by a private firm. The US "FACNET" is managed by the government but access to suppliers is provided by private VANs. In Finland, four private databases/services exist where a company can get information - stored on the EC's TED system - about public calls for tender.

(b) Issues raised regarding the provision of information

(i) Issues on databases containing procurement opportunities

24) It has been suggested that additional information needs to be collected on the following:

- whether all notices which are required to be published under Articles IX and XVIII:1 of the Agreement - for entities in Annexes 1, 2 and 3 - are also available on databases, and whether such notices contain at least the minimum information required to be published under Articles IX and XVIII:1;

-how Agreement-covered notices are identified;

-to what extent each type of notice contained on databases conforms to a standard structure;

-whether any particular classification is used in such notices to describe purchases, and if so, which classification;

-as regards the compatibility of databases containing procurement opportunities, whether Parties' databases can be interrogated using international standards, such as SQL - Standard Query Language.

-where databases exist in a non-WTO language, to what extent notices and information are summarized in a WTO language.

(ii) Electronic commerce

25) The point has been made that up till now, most of the information provided by Parties has concerned databases of procurement opportunities. However, Parties seem to be increasingly involved in action in the area of electronic commerce. The question has arisen as to whether Parties should be invited to give fuller and more information on

their projects and plans with regard to electronic commerce and in particular whether those Parties who have experience with electronic commerce could share more fully such experiences with the Committee.

II. ENSURING ACCESS TO PROCUREMENT OPPORTUNITIES ON A NON-DISCRIMINATORY BASIS

26) In the discussions, it has been widely recognised that information technology can provide a means for increased access to procurement opportunities, by making information about them more readily available and facilitating compliance with procurement procedures. At the same time, the concern has been raised that increased use of information technology, if not properly handled, could put foreign suppliers at a disadvantage, even where formally applied on a non-discriminatory basis. The following specific points of concern have been mentioned:

- Problems resulting from the existence of a multitude of information technology systems for accessing information and/or conducting electronic commerce. Typically a supplier will be more familiar with operating a national system. Having to come to grips with other ones will entail an additional input of time and energy which potential suppliers may not be willing to make.
- This will be particularly the case where different technical standards are used by information technology systems, whether for the structuring and presentation of information, search facilities or the computer languages used for electronic communication.
- The question of the cost of access to databases and electronic procurement systems has also been mentioned, as has been traditional problems of language.
 - The concern that procurement officials under an increasing pressure to procure more efficiently and quickly using information technology might, in some cases, resort to an increased use of exceptions under the Agreement.

27) In relation to the use of databases for information on procurement opportunities, a number of options for addressing these problems have been mentioned in the work on this matter:

- Ensuring effective non-discriminatory access to foreign databases and electronic tendering systems.** Whereas no evidence has been put forward suggesting that access to national systems is not formally available to suppliers of other GPA signatories on a non-discriminatory basis, the point has been made that there may nonetheless be *de facto* discriminatory effects, unless appropriate forms of international cooperation, aimed at ensuring that national systems are readily usable by foreign suppliers, are agreed. The possible areas for such cooperation that have been referred to are technical and content-related compatibility and cost. In this context, the issue of common guidelines

regarding format has come up, in particular the question to what extent such guidelines are required in order to assist foreign as well as domestic suppliers retrieve information and ensure that they can quickly and painlessly find the tenders relevant to their line of business. The point has been made that the use by Parties of a tool such as Graphical Users Interface (GUI) is important as would be the sharing of information on the Database Management Systems (DBMS) and the hardware upon which the databases are built.

-The incorporation into national databases of information on procurement opportunities contained in the databases of other GPA Members, for example through data swaps. Such cooperation would give rise to a number of practical issues in relation to technical and content-related compatibility, security, cost, copyright and licensing, especially where there are differences in the ownership/control arrangements of national databases. The issues in question are thus in some ways similar to those referred to in the first indent, with the difference that, in this case, the questions relate to the interface between national computerized databases and, in the case above, the question concerns the interface between individual national systems and individual foreign users. The point has been made that to the extent that progress is made on the issues referred to in the first indent, the issue of dataswaps becomes less important.

-The establishment of a single, or at least a coordinated, international system. The question has been raised as to whether in an ideal world it would not be optimal to have an integrated international database through which suppliers could obtain information about all Agreement-covered opportunities. Such a system could either co-exist with or be complementary to national systems. Two less ambitious possible forms of cooperation in the same direction have been mentioned: facilitating the generation of a private sector value-added network (VAN) providing for such a system; the establishment of a WTO procurement home page through which direct access could be gained by suppliers to national database systems on the Internet.

28) In relation to electronic commerce, the main emphasis in the discussions about non-discriminatory access has been the use of compatible standards for electronic communication. In particular stress has been placed on the desirability of general adoption of the EDIFACT standard. However, it has also been suggested that use of a common standard is not necessarily desirable as long as national standards are compatible with each other. The question has also been raised as to whether international systems providing for electronic commerce among Parties to the Agreement and their suppliers could be organized through one or more privately operated VANs.

29) In regard to questions of cost, the suggestion has been made that the scope for preferential tariffs to be applied on a non-discriminatory basis in favour of small and medium-sized enterprises might be explored.

30) In regard to problems of language, the suggestion has been made that electronic systems might themselves be able to incorporate tools to help alleviate such difficulties, and that the experience of the European Communities in this regard might be examined.

31) The point has been made that the Agreement on Government Procurement contains detailed rules on procurement procedures aimed at ensuring that such procedures provide effective non-discriminatory access to foreign suppliers. Such rules, however, were drawn up with the hard copy world in mind. The questions therefore arise as to:

- whether additional rules, or clarifications of the existing rules, should be built into the Agreement to ensure that procedures administered electronically give the same or better guarantees of non-discriminatory access;
- whether such safeguards ensuring effective non-discriminatory access are only needed in the event that the Agreement is modified to allow information technology to substitute, in some measure, for hard copy procedures, or whether such safeguards should also be considered in situations where information technology procedures co-exist with hard copy ones;
- whether other forms of cooperation of a more technical nature, without involving modifications to the Agreement itself, might be warranted.

III. ENABLING ADVANTAGE TO BE TAKEN OF INFORMATION TECHNOLOGY

32) It has been suggested that three aspects of the Agreement may need to be reexamined in order that the contribution that information technology can make to increasing the efficiency of procurement operations can be harnessed:

- (i) Allowing electronic means of publication or submission of bids. It has been said that the provisions of the Agreement are ambiguous as to whether its obligations can be satisfied through electronic means of publication or submission of bids and that the relevant provisions should be reviewed and clarified as to treatment of electronic transmission. The examples of Article IX, which does not explicitly refer to electronic publication, and Article XIII, which does not refer to new forms of electronic submission of tenders, have been cited.

A number of observations about this suggestion have been made:

- for the time being at least, electronic based systems should be a complement and not a substitute for hard copy notices and tendering;
- Parties should not be authorized to rely exclusively on information technology until such time as the suppliers of all other Parties were able to use such technology;

- account should also be taken of the possible disincentive effect of such a move on potential applicant WTO Members to the Agreement;
- in the event that requiring electronic rather than hard copy submission of tenders was allowed as meeting the obligations of the Agreement, special safeguards ensuring effective non-discriminatory access might be necessary;
- special account needs to be taken of the situation of small- and medium-sized enterprises which may be less well situated to cope with electronic systems;
- the dangers of reliance on electronic systems giving rise to unintended discrimination and obstacles may vary from sector to sector, according to the extent to which the industry in question has ingested information technology;

(ii) Reviewing deadlines. The point has been made that the minimum periods required by the Agreement for the different stages of the procurement process were drafted with hard copy transmissions in mind and therefore the need to allow for transmission by international mail. It has been suggested that the deadlines under Article XI should be reviewed in the light of the fact that electronic publication can reduce the lead time necessary for informing interested suppliers of potential procurement opportunities and electronic submission of tenders can decrease the time required by bidders for submitting responsive tenders.

In the discussion on this matter, the point has been made that, before amending deadlines, it will be necessary to ensure that all Parties to the GPA have in place the necessary electronic transmission systems and that account should be taken of the position of possible new Parties. In this regard the suggestion has been made that thought should be given to ways of ensuring that electronic systems with different degrees of sophistication can coexist.

(iii) Greater use of selective tendering procedures. The suggestion has been made that, because electronic commerce may result in a significantly greater volume of bids, procurement authorities may rely more heavily on selective tendering, and that it might therefore be necessary to consider ways to ensure that foreign suppliers can participate on an equal footing with domestic suppliers in selective tendering procedures under Article X arising from the use of electronic commerce.

In the discussion on this matter, the following points have been made:

- an increased volume of bids should not be considered a problem if it results in greater competition and therefore more cost-effective procurement;
- before recourse to selective tendering is facilitated under the GPA, it should be assessed whether technology can be used to alleviate the burden

on a purchasing entity from too many bids, while guaranteeing non-discrimination. Suitable tools for making a rapid selection of tenders on the basis of simple, effective and non-discriminatory criteria could perhaps be developed;

-the question has been raised as to whether electronic databases and commerce would necessarily be the real source of a problem of excessively numerous bids. It has been suggested that perhaps the solution lies more in greater precision in the specifications and qualification criteria to be built into the tender documentation.

33) The point has also been made that the Committee may want to exercise caution in taking any action which would require amendments to the Agreement in view of their implications for domestic legislative processes.

IV. OPTIONS FOR CARRYING THE WORK FORWARD

34) The discussions so far would seem to indicate widespread acceptance of two basic guidelines that should inform the future work of the Committee on information technology:

-that the work should be governed by the objectives of the Government Procurement Agreement and the specific provisions of Article XXIV:8;

-that work on aspects aimed at safeguarding and promoting open and discriminatory procurement should proceed in parallel with work on aspects aimed at promoting efficient procurement.

35) In regard to the factual information available to the Committee on practices and projects using information technology, the summary in Section I above indicates that much of the information provided could benefit from updating and completion, especially in regard to electronic commerce. The Committee may wish to consider asking the Secretariat to revise the questionnaire on information technology (document GPA/IC/W/4/Rev.1) to include the elements referred to in Section I(b)(paragraphs 24-25) above and agree that members would provide responses in time for the September meeting of the Committee.

36) In regard to the issues discussed in Section II, a number of quite technical matters have been raised and the question arises as to whether work on these matters would be facilitated by the establishment of a sub-group of experts and/or by the use of a consultant. However, it would be that a more in-depth and systematic examination of these issues in the Committee itself would be a necessary preliminary for the Committee to be able to determine to appropriateness of such steps and the mandate to be given to any sub-group and/or consultant. In doing so, members might also have regard to the issues earlier identified in document GPA/IC/W/18 (reproduced at Annex 1).

37) In regard to the issues set out in Section III, a more detailed examination of the three aspects of the Agreement that it has suggested may need to be re-examined in the

light of information technology would also seem warranted. To facilitate such consideration, the Committee might wish to request the Secretariat to prepare a factual note setting out the relevant provisions of the Agreement and drawing attention to any pertinent information on their negotiating history.

38) A further aspect to which the Committee might wish to give thought in deciding how to carry forward the work is the possibility of establishing a pilot project of some sort. Mention has been made of a pilot project being launched in the APEC framework, which consists of creating a home page on the World Wide Web of the Internet, which would enable individual national databases to be accessed by clicking on their icons. There may be other ideas for possible pilot projects, for example aimed at assessing the degree of compatibility of the various national systems.

ANNEX 1

Issues Identified in Document GPA/IC/W/18

1. Document GPA/IC/W/18 reproduces the list of possible issues for examination identified as a result of consultations with delegations that was submitted by the Chairman to the Interim Committee on Government Procurement at its meeting on 4 April 1995. This list was drawn up by the Chairman as agreed by the Interim Committee at its meeting of 15 November 1994.

Access to Procurement Opportunities

2. Compatibility of databases. To what extent do the existing and planned databases of signatories have, in common with each other, information they contain and the structure within which it is organized and what are the implications of this for the compatibilities of different systems?

3. What common guidelines regarding format are required in order to assist foreign, as well as domestic, suppliers retrieve information, encourage them to compete, and ensure that they can quickly and painlessly find the tenders relevant to their line of business?

4. How should access be set up and who should pay for it? Will suppliers have to subscribe to each system, or will it be set up on the Internet, free for anyone who has an Internet account?

5. Data swaps among Parties. Where databases are being developed or exist, should a possibility exist or be developed to swap data among Parties? Do delegations consider data swaps economically viable? What obstacles currently exist, such as licensing restrictions, etc.?

6. If so, would it be desirable to find ways and means to facilitate those swaps? It would appear that this would to some extent depend on the existence of a minimum amount of common, structured, information and the possibility to establish correspondences between classification systems used by signatories in their respective databases (any given object of procurement, e.g. a pen, should be identified by all signatories in a recognizable way in their databases).

Electronic Procurement

7. The question was raised whether, to the extent information technology had been, or was being brought into use in procurement systems, appropriate use would be made of the international standards to ensure that data interchange be carried out in a structured standardized manner, allowing for international use. The question was also raised whether, in the event that this was not the case, delegations could make a commitment to use these standards in future, with a precise time-table.

8. In the event VANs are being used and to the extent that international access to them is desirable, how can ways and means be defined to ensure such international access?

Concerning Both Categories

9. Compatibility of the provisions of the Agreement with the use of information technology in government procurement. To what extent are the provisions of the Agreement sufficiently flexible to allow for the use of information technology in government procurement? Should governments be allowed to require firms to tender exclusively by electronic means? If so, for what types and/or values of contracts?

INFORMATION TECHNOLOGY

Communication from Norway

The following communication from the delegation of Norway, dated 22 April 1996, has been received with the request that it be distributed to the members of the Committee.

At present, information technology does not play a major role in public procurement in Norway, nor, as far as we know, in most other Parties. This will probably change in the course of some years.

In document GPA/IC/W/36, the United States mentions the following three points on which discussion concerning possible amendments of the Agreement could begin:

- 1. selective tendering procedures under Article X;*
 - 2. areas of ambiguity such as Article XIII and Article IX;*
 - 3. deadlines under Article IX.*
- 1) Selective tendering procedures under Article X*

It is assumed that information technology will enhance the number of bidders to such a large extent that entities will prefer to use selective tendering instead of open procedures. We believe this might be the case for some types of products, but not for all products. We do however, as already mentioned, not have the same experience with electronic commerce as for instance the United States. We agree with the United States that it will be necessary to find ways of ensuring foreign suppliers equal access to domestic markets in selective tendering procedures

in connection with electronic commerce. We would like to emphasize that we find a large number of tenders to be the best way of achieving real competition.

2) *Concerning areas of ambiguity such as Article XIII and Article IX*

Concerning these articles, they might have to be amended to facilitate electronic commerce.

3) *Deadlines under Article IX*

If the deadlines for responding to invitations to tender are shortened, it is important to ensure that the electronic tendering systems in use are transparent, compatible and readily accessible to suppliers of all Parties. Otherwise, one can experience a situation where domestic suppliers are favoured. In our opinion, it could hence be necessary to keep longer deadlines to ensure that contracts are effectively open to international competition.

Concerning compatibility, there are two different technical standards that are in use for electronic commerce in the United States and Europe at present. In addition, other systems may be in use in other Parties. In Europe we use EDIFACT and X.400 whereas the US contracting authorities use ANSI X 12. At present, these different systems are not compatible.

We would like to emphasize that all amendments that shall be made to the GPA to take account of technological progress must be based on a genuine principle of non-discrimination which goes beyond the concept of national treatment. We believe that it is important to make sure that any amendments to the Agreement aiming at taking information technology into account do not undermine the transparency and international opening-up of procurement in the Parties.

Committee on Government Procurement

INFORMATION TECHNOLOGY: CONSEQUENCES FOR THE GPA
OF THE DEVELOPMENT OF INFORMATION TECHNOLOGY
IN THE FIELD OF PUBLIC PROCUREMENT

Communication from the European Community

The following communication from the delegation of the European Community, dated 25 April 1996, has been received with the request that it be distributed to the members of the Committee.

1) *Information technology will play a major role in public procurement. One of the ways of making public purchasing procedures more efficient is to promote maximum transparency; using new means of communication will enable this objective to be achieved more effectively. The question to be addressed is therefore not whether these technologies will have a role to play in practice in the public procurement field but what role they will play.*

2) *Although the GPA alludes to new technology, it was drawn up without the topic specifically in mind. Given the particularly rapid pace of change in this area, it will soon prove necessary to amend certain aspects of the Agreement. This was foreseen by the drafters of the Agreement, who considered that any such amendments should be aimed at •ensuring that the Agreement does not constitute an unnecessary obstacle to technical progress• (Article XXIV(8)). The Community accordingly shares the opinion already expressed by the United States in document GPA/IC/W/36 of 21 December 1995, to the effect that the GPA should evolve in line with developments in the field if it is not to become too far removed from the realities of public procurement.*

3) *The United States mentions in that document three points on which discussions could begin, namely more extensive use of the restricted procedure, the possibility of publishing notices electronically, and shortening deadlines. The*

Community agrees that these are topics on which discussions will have to begin in the near future.

As far as the first point is concerned, excessive transparency could admittedly be difficult to cope with for certain types of product (especially basic products), as the purchasing entity could find itself swamped with tenders. This is not the case for all products, however. Furthermore, the aim of public procurement is to secure the best value for money by selecting the best offer. Increasing the number of tenders can help to achieve this. Too many tenders for products that are too simple can undeniably result in extra costs and delays. But before recourse to the restricted procedure is facilitated under the GPA, it should be seen whether technology cannot be used to alleviate the burden on the purchasing entity while guaranteeing non-discrimination. Suitable tools for making a rapid selection of tenders on the basis of simple, effective and non-discriminatory criteria could perhaps be developed.

The texts of the GPA will furthermore probably have to be amended in order to make it clear that electronic publication and electronic transmission are allowed.

Once more efficient means of communication have been set in place, consideration could be given to the possibility of shortening deadlines in order to speed up the selection process. It would have to be certain, however, that all signatories to the GPA had set up electronic transmission systems. We should not forget here that possible new parties to the Agreement may not have such systems. Thought will therefore have to be given to ways and means of ensuring that electronic systems with different degrees of sophistication can coexist.

4) *For the Community, however, the fundamental question to be addressed is the need to ensure that the development of new technologies does not have the effect in practice of hindering access to contracts in the countries of the other signatories. This issue is closely bound up with the question of how the national treatment clause is to be interpreted. The emergence of electronic tendering can paradoxically have the effect of blocking access to contracts in the countries of the other signatories. A few simple examples will suffice to explain why.*

If a signatory country were to develop an electronic system which is accessible to all suppliers, it would formally be complying with the principle of national treatment. But if that system was incompatible with those existing in the other signatory countries, the effect in practice could be to restrict access for suppliers from those other countries, who would be faced with an unfamiliar system. Electronic tendering can boost transparency, but the systems themselves must also be transparent, compatible and readily accessible to all suppliers.

This would apply all the more so if the deadlines for responding to invitations to tender were shortened. Even if there was no apparent difference in treatment between domestic suppliers and suppliers established in other signatory countries, the practical effect, if the deadlines were extremely short, would be to favour domestic suppliers since the others would first have to find the information in an electronic system which was not

their own. It should therefore always be borne in mind that, if it were decided to pursue this course, it could still prove necessary to keep longer deadlines in order to ensure that contracts are genuinely open to international competition.

Lastly, electronic tendering does nothing to reduce the language barrier. Experience in the Community shows that language can be a major barrier which is not overcome per se through the use of electronic transmission. It will therefore be necessary to develop tools that make it possible to achieve greater transparency in this connection despite language differences, which will remain. Electronic transmission can, however, facilitate such developments.

These different problems already exist at present, but the use of new technologies can, in particular by speeding up the purchasing process and making it less transparent, have paradoxical effects which will have to be monitored closely.

The Community therefore takes the view that all the changes that could be made to the GPA to take account of technological progress should be based on a genuine principle of non-discrimination which goes beyond the concept of national treatment. The US suggestions may be understood as aiming to make the procedural rules more flexible in the case of contracts awarded partly with the aid of information technology. While the introduction of information technology can indeed make for greater transparency and can justify more flexibility in certain specific cases, it should be backed up by reinforcement of some of the basic rules of the GPA so that the opening-up of procurement is not undermined.

APPLICATION FOR ACCESSION BY SINGAPORE

Description of the Government Procurement Regime in Singapore¹

The following communication has been received from the delegation of Singapore with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

¹ *This note was earlier distributed as an informal document, dated 26 February 1996.*

BRIEF WRITE-UP ON THE GOVERNMENT PROCUREMENT REGIME IN SINGAPORE

1. Economy-wide Information

1.1 The government procurement activities in Singapore are undertaken by the Government Ministries and Departments, as well as Statutory Boards.

1.2 As a city state, Singapore does not have sub-central government entities.

1.3 With the closure of the Central Procurement Office from 1 May 1995, the centralized purchasing of a very limited number of products such as paper, rice is now under the responsibility of the Expenditure Policies Unit of the Ministry of Finance (Budget Division). As for the remaining items which constitute the bulk of government purchasing activities, they are decentralized to individual Ministries, Departments or Statutory Boards, who will make their own arrangements. There is no value limit for each purchase/contract. However, all the government procuring entities have to adhere to central policies and guidelines issued by the Ministry of Finance (Budget Division).

1.4 In general, no fixed procurement schedules are drawn up by the procuring entities; instead the procurement is performed as and when required.

1.5 As explained in paragraph 1.3 above, the bulk of government purchasing activities have been decentralized to individual Ministries, Departments or Statutory Boards. However, there are several central government procurement functions which are performed by the following entities:

(a) Ministry of Finance (Budget Division)

-Formulate the government procurement policies and guidelines which need to be complied with by all the Government Ministries and Departments as well as Statutory Boards.

(b) Expenditure Policies Unit of the Ministry of Finance (Budget Division)

-Perform centralized purchasing of a very limited number of products such as paper and rice for Ministries and Departments.

-Register the suppliers for government procurement in respect of general goods and services.

(c) Pharmaceutical Department of the Ministry of Health

-Perform centralized purchasing of pharmaceutical products for Ministries, Departments and Statutory Boards.

-Register the suppliers for government procurement in respect of pharmaceutical products.

(d) Construction Industry Development Board

-Register the suppliers for government procurement in respect of construction services.

2. General Procurement Policies and Practices

2.1 *Outline of economy-wide procurement policies*

- (a) The Singapore Government adopts the fundamental principles of fairness, openness and competitiveness for its government procurement policies.
- (b) All the government procuring entities of Singapore are required to follow the central policies and guidelines issued by the Ministry of Finance (Budget Division).
- (c) In general, Singapore has no special government procurement programmes to achieve specific social and economic objectives such as assistance to SMEs, disadvantaged regions, or to support specific industry sectors or infant industry.

2.2 *Outline of procurement policies and practices*

- (a) Government procurement procedures in Singapore are based on a tendering system. Tenders are invited by using the open, selective or limited tendering procedures.
- (b) Open procedures are used for all tenders exceeding S\$30,000. An open tender requires that the tender be given the widest possible circulation to attract the largest number of tenderers. This is done by advertising the tenders in the local or international press. Publishing in the Government Gazette may be done if it is advantageous to do so. These advertisements will provide the minimum information necessary for firms to know what is required, over what period, and whether the issue of tenders is restricted to registered suppliers under specific Supply and/or Financial categories. Advertisements will ask tenderers to apply to the procuring entities for tender forms. English is the preferred language in which the notices appear.

The following details are included in a typical tender notice: name of procuring entity, description of products/services/construction services to be procured, tender opening and closing dates, conditions of participation, instruction on payment and collection of tender documents.

Selective tendering is normally conducted for all tenders under S\$30,000. It is also used in exceptional cases where the project is confidential or sensitive. In such instances, invitations to tender are sent to selected firms.

Limited tendering is used in cases involving purchase of specialized systems and equipment from sole suppliers. It is also used in cases of emergency or when it is manifestly in the public interest. The circumstances and reasons for granting such waivers are endorsed by the Permanent Secretary and submitted for approval to the Tenders Board.

On the average, open competition accounts for about 85 per cent of the total number of tenders called or about 60 per cent of the value of tenders, when excluding defence procurement contracts.

- (c) When drawing out the tender specifications, the procuring entities are required to use functional specifications wherever possible without specifying brand names. They also need to ensure that no preference is given to any tenderer.

- (d) The minimum period of tender notice (i.e. the number of days from invitation to closing of tender) for contracts which are advertised locally is not less than 3 or 8 weeks for conventional and design-and-build projects respectively. And if the contracts are advertised both locally and overseas, then the minimum period is not less than 12 weeks.
- (e) All local and foreign suppliers interested in participating in Singapore's public sector tenders are required to register as government contractors under the appropriate Supply and Financial categories with the Expenditure Policies Unit, Pharmaceutical Department or Construction Industry Development Board.
- Companies or firms seeking registration will have their background, finances and ability to provide a satisfactory service checked by the registration authorities, and are required to pay a non-refundable registration fee. Non-registered firms could be allowed to participate only in tenders for non-recurring goods, services or works where local expertise is lacking, or in cases where the local contractors are unable to execute their contracts, or are unable to reach a certain high standard.
- (f) A rotating list of suppliers is generally not used except for professional services such as auditing and legal services.
- (g) Tenders are awarded to the lowest bid meeting tender specification in full. Successful tenders are notified upon approval by the Tenders Board.
- (h) A successful tenderer will be required to give a security deposit for supply of goods, services or works which are to be contracted for over a period. The security deposit can be paid in the form of a cheque, banker's guarantee, insurer's guarantee, or a guarantee from a finance company. The security deposit should be 5 per cent of the estimated value of the tendered goods, services or works. When the contract expires, the security deposit or any balance due to the contractor should be refunded in accordance with the terms of the contract.
- (i) Singapore does not give specific preferences to domestic suppliers in government procurement except for local contractors with consistent good performance in government construction works.
- (j) Singapore does not maintain any local-content schemes and there are no policies to encourage the use of domestic inputs, even in the context of government procurement.
- (k) There is no preference for small- and medium-size enterprises in government procurement of Singapore.
- (l) Within the framework of the ASEAN Preferential Trading Arrangements, ASEAN countries accord each other a preferential margin of 2.5 per cent, which should not exceed US\$40,000 worth of preferences per tender, in respect of international tenders for government procurement of goods and auxiliary services from untied loans. The preferential margin should be applied on the basis of the lowest evaluated and acceptable tender (Article 7 of the Agreement on ASEAN Preferential Trading Arrangements).

(m)The Ministry of Finance (Budget Division) investigates complaints/appeals from the suppliers and initiates any remedy action if this is deemed necessary.

3. Laws and Regulations Related to Government Procurement

Currently, there is only one law which is related to government procurement. It is the Government Contracts Act (Chapter 118) which provides a list of public officers who can execute and sign contracts on behalf of the Government.

There are no legislation or regulations that give exemption to the normal government procurement practices.

POSSIBLE LOOSE-LEAF SYSTEM FOR
PERIODICALLY UPDATING THE APPENDICES

Note by the Secretariat

Introduction

1) *In the context of discussions held in the Interim Committee on Government Procurement on the desirability and modalities of establishing a practical guide under the new Agreement on Government Procurement, the view has been expressed that there might be merit in establishing a loose-leaf system for the periodic up-dating of the Appendices as a separate and distinct exercise from the publication of any practical guide. At its meeting on 7 December 1995, the Interim Committee on Government Procurement requested the Secretariat to prepare a brief note outlining how such a loose-leaf system might work, taking into consideration experience in other areas of the WTO such as tariff schedules. This note is an attempt to reply to this request.*

Past Experiences in GATT/WTO

- Tokyo Round Agreement on Government Procurement

2) *The Committee under the Tokyo Round Agreement on Government Procurement agreed at its first meeting that the Secretariat should introduce a loose-leaf system which would have no legal status in itself, but which would, on a continuous basis, contain the correct information relating to Annexes I-IV of the Agreement (GPR/M/1, paragraph 51). This system was later considered redundant by delegations once the Practical Guide came into being and was subsumed into the latter.*

- Tariff Schedules in GATT/WTO

3) *On 26 March 1980, the CONTRACTING PARTIES to the GATT adopted a proposal by the Director-General to create a loose-leaf system for the schedules of tariff concessions, which could continuously be kept up to date (document C/107/Rev.1, in BISD S27/22-24). This system, which is still being*

used under the WTO, has legal status; the loose-leaf system of tariff schedules is the legal expression of the rights and obligations of GATT contracting parties]WTO Members in the area of tariff concessions. Only those entries in the schedules which are indicated in the latest certified version of the loose-leaf system have legal value. To this end, after a particular change to the schedules has been agreed, the Director-General of the WTO certifies it and the Secretariat circulates certified true copies of the replacement pages under cover of a WT/Let/- document to all Members of the WTO. Discussions are currently under way in the Committee on Market Access with regard to the preparation of consolidated WTO schedules in loose-leaf format (document G/MA/TAR/W/4/Rev.2 refers).

Legal Status

4) *Delegations would have to consider whether loose-leaf schedules under the new Agreement on Government Procurement would have legal status; that is to say, whether the loose-leaf system of Appendices would be the legal record of the Parties• concessions. There seem to be two options:*

-One option would be for the Committee not to give legal status to the loose-leaf system. This would mean that the practice of having a system of certification of changes to the Appendices distributed through the WT/Let/- document series in the form in which the rectification or modification was notified and agreed according to the procedures of Article XXIV:6 would be continued and that a loose-leaf system of the Appendices, which would not have any legal status, would exist in parallel. Such was the formula adopted by the Committee under the Tokyo Round Agreement.

-Alternatively, the Committee could decide to give legal status to the loose-leaf system. Any changes to the Appendices would need to be made in the form of replacements]additions to the pages of the loose-leaf record of the Appendices and, once they would have been adopted according to the procedures of Article XXIV:6 and certified by the Secretariat, these pages would be circulated to the Parties under cover of a WT/Let/- document for insertion in the loose-leaf system. Only those entries in the Appendices which would be indicated in the latest version of the loose-leaf system would have legal value.

5) *If the decision were taken to give legal status to the loose-leaf system, it would be necessary to provide the starting point for the loose-leaf set in a way which incorporates the changes which will already have been made and agreed in accordance with the provisions of Article XXIV:6 or other relevant decisions by the Informal Working Group or Interim Committee on Government Procurement. This could be done by the Committee requesting the Secretariat to produce and distribute such an updated set of the Appendices. A period of, for example, sixty days would be foreseen from the date of its distribution for delegations to review whether the agreed changes had been correctly reflected in the loose-leaf system. This should not be a complicated or contentious operation because all changes to Appendices which have been notified so far clearly indicate new wording (for*

example documents GPA|IC|W|8 and 10 and GPA|W|1 and W|2) or include replacement pages (document GPA|IC|10).

Modalities

6) *In the event that the Committee decides to give legal status to the loose-leaf system, it would be desirable that it be agreed that notifications of changes pursuant to Article XXIV:6 by delegations take the form of relevant new or amended loose-leaf pages identifying the changed items. Once agreed and certified, these would be circulated under cover of the WT|Let|- document series.*

7) *A system should be designed to deal with a situation where a change in Appendices involves a change in the number of pages. One way of handling a situation in which the change results in additional pages would be to issue any page in addition to page x as page x.1, page x.2, page x.3 etc. In case the change would result in a lesser number of pages, a note would have to be inserted to this effect. For example, one could have one page with more than one page number, for example page 81|82|83.*

8) *The date on which the change became or becomes effective could be indicated at the bottom of each replacement page. At the outset, each page might carry the date of the first publication of the loose-leaf set.*

9) *As far as the language of the loose-leaf system is concerned, the Committee might want to consider publishing Appendix I only in its authentic languages. It is recalled that the IWG decided that the texts of the Annexes in Appendix I would be authentic only in the language(s) in which they were submitted. Since, by its nature, most of the material is readily understandable even to persons not fluent in the WTO language in question, this should not be a major problem. Appendices II, III and IV are of course in the three official WTO languages and this would be maintained.*

Distribution

- Distribution to Parties, Observers and other WTO Members

10) *This would be done by the Secretariat each time a change in the Appendices would have been agreed and certified. The Secretariat would distribute certified true copies of the relevant loose-leaf pages in the normal WT|Let|- series. The WT|Let|- series is currently being distributed to all WTO Members.¹ Delegations might want to consider adopting a procedure for the transmission of WT|Let documents regarding the Agreement on Government Procurement to observers to the Committee who are not Members of the WTO.*

¹The WT|Let series with relevant annexes are sent to the Ministries of Foreign Affairs of all WTO Members.

- *Distribution to the wider public*

11) *Assuming the desirability of a wide general distribution of the Agreement, including its coverage, the Committee might consider making the loose-leaf system available to the public, as a complement to any future practical guide. Consideration might be given to the possibility of doing this on the Internet. It might also be explored whether a hard copy version would be needed, but it would have to be assessed whether the market would be sufficient to enable this to be done on a cost-recovery basis.*

REQUEST FOR OBSERVER STATUS

Communication from the Separate Customs Territory of Taiwan,
Penghu, Kinmen and Matsu

The following communication, dated 6 February 1996, has been received from the Representation of the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu to WTO.

I have the honour to inform you that my government wishes to participate in the work of the Committee on Government Procurement as an observer so as to acquaint itself with the activities and operations of the Committee. I would appreciate it very much if necessary measures could be taken at the first Committee meeting.

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF JAPAN

Communication from Japan

The following communication from the Permanent Representative of Japan has been received with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I am writing to you concerning the modifications to Appendix I of the Government Procurement Agreement, which follow on from the agreement reached between Japan and the United States of America. Article XXIV of the Agreement contains the provisions on its entry into force and, it is in conformity with paragraph 6(a) of Article XXIV, that I hereby inform you of modifications to Japan's General Notes in Appendix I of the Agreement.

In accordance with our understanding with the Government of the United States of America, you should today receive a parallel communication from the U.S. Delegation.

The enclosed communication should be circulated to Members of the Committee on Government Procurement in a document dated 26 January 1996 so that the modification will become effective 30 days from that date provided there is no objection.

./

ANNEX

Communication from Japan with respect to Modifications to Appendix I

Under Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the Government of Japan submits to the Committee on Government Procurement the following modifications of a minor nature to Japan's General Notes in Appendix I of the Agreement.

Modifications to Japan's General Notes in Appendix I:

In paragraph 1, delete •and the United States. •

Committee on Government Procurement

MODIFICATIONS TO APPENDIX I OF THE UNITED STATES

Communication from the United States

The following communication from the Permanent Representative to the WTO of the United States has been received with the request that it be circulated to the Parties to the Agreement on Government Procurement (1994).

I am writing to you concerning the modifications to Appendix I of the Government Procurement Agreement, which follow on from the agreement reached between the United States of America and Japan. Article XXIV of the Agreement contains the provisions on its entry into force and, it is in conformity with paragraph 6(a) of Article XXIV, that I hereby inform you of modifications to the U.S. General Notes in Appendix I of the Agreement.

In accordance with our understanding with the Government of Japan, you should today receive a parallel communication from the Japanese Delegation.

The enclosed communication should be circulated to Members of the Committee on Government Procurement in a document dated 26 January 1996 so that the modification will become effective 30 days from that date provided there is no objection.

./.

ANNEX

Communication from the United States with respect to Modifications
to Appendix I of the Agreement on Government Procurement

Pursuant to Article XXIV, paragraph 6(a) of the Agreement on Government Procurement, the Government of the United States of America submits to the Committee on Government Procurement the following modifications of a minor nature to the United States• General Notes in Appendix I of the Agreement.

1. *In paragraph 5, delete •Japan•.*

2. *Add a new paragraph:*

•The United States will not extend the benefits of this Agreement to Japan as regards the award of contracts by entities listed in Annex 3 that are responsible for the generation or distribution of electricity.•

Offentlige indkøbsregler i

WTO

Delrapport 1: GPA-reglerne og danske virksomheders erfaringer og interesser i offentligt indkøb indenfor WTO

Forord

Den stigende globalisering afføder en stigende samhandel mellem landene og mellem kontinenterne. Dette gælder såvel den private handel samt den handel, der sker på det offentlige kontraktmarked. Indenfor WTO er det offentliges indkøb reguleret af Government Procurement Agreement, GPA-aftalen. Udover samtlige EU-lande har 10 andre lande underskrevet denne aftale, heraf de vigtigste af Danmarks oversøiske samhandelslande.

WTO planlægger i løbet af 1999 en generel revision af GPA-reglerne. Konkurrencestyrelsen, der er den ansvarlige danske myndighed indenfor dette område, har på denne baggrund taget initiativ til nærværende rapport.

Rapporten har to formål. For det første skal den skabe et markedskendskab for de danske virksomheder, der overvejer at påbegynde eksport til den offentlige sektor i GPA-landene, eller de virksomheder, der kun har begrænsede erfaringer på dette marked. Da der ofte er tale om markeder, der er meget forskellige – både kulturelt, økonomisk og politisk – fra danske forhold, vil en grundig forberedelse og gode kontakter på de pågældende markeder være en forudsætning for at få succès. For det andet skal rapporten skabe et overblik over danske virksomheders erfaringer på området med henblik på at tilvejebringe en dansk holdning til den kommende revision af GPA-reglerne. Dette er sigtet med delrapport 1, hvor resultaterne af en række interviews, der har været foretaget med brancheorganisationer og virksomheder, og resultaterne fra en telefoninterview undersøgelse med et større antal danske virksomheder, præsenteres. Interviewene har bidraget til at skabe et generelt billede af de danske virksomheders erfaringer med GPA-reglerne med henblik på at udforme anbefalinger til revisionen af reglerne. Delrapport 1 indeholder ligeledes nogle overordnede betragtninger om det offentlige indkøb marked samt en beskrivelse af WTO-reglerne om offentlige indkøb og EUs overvejelser vedrørende offentlige udbud i WTO.

Delrapport 2 har en kort oversigt over WTO-reglerne og indeholder tillige konkrete beskrivelser af de for Danmark 8 mest relevante lande udenfor EU, der er omfattet af GPA-reglerne. Det drejer sig om USA, Japan, Hong Kong, Singapore, Korea, Schweiz, Canada og Polen. For en nærmere beskrivelse af markedsmulighederne indenfor EU henvises til Konkurrencestyrelsens tre guider, Det offentlige udbudsmarked i EU, for henholdsvis tjenesteydelser, varer og bygge- og anlægsområdet.

Delrapport 1 er blevet til i samarbejde mellem Konkurrencestyrelsen og direktør, cand.scient. pol. Hans Martens, Martens International Consulting, S.L. Konkurrencestyrelsen takker Hans Martens for et godt samarbejde i denne anledning.

English Summary

The market for public procurement is very substantial. In the European Union alone, the market is valued at a least 5.000 billion DKK per year, and the market under the WTO Agreement on Public Procurement is probably three times as large. The Public Procurement markets have, however, not yet become true transactional markets despite several attempts to open them for international competition. Amongst the most important such attempts have been made in the European Union through a number of Directives concerning Public Procurement, and in the WTO where the Government Procurement Agreement (GPA) establishes a similar attempt to open the procurement markets amongst some 25 of WTO's member countries.

The present report has been made on behalf of the Danish Competition Authority in order to establish part of the background for a Danish position in relation to the review of the GPA, which is expected to be carried out during 1999. The report describes the present regime, and on the basis of interviews with a number of Danish enterprises and organisations presents suggestions for a Danish viewpoint as the GPA is concerned.

The GATT Agreement (General Agreement on Tariffs and Trade) excluded Public Procurement, and therefore a number of GATT signatories decided to try to make an agreement concerning trans-border competition on bids for procurement from the public sector. This resulted in the first GPA, which was negotiated under the Tokyo-Round (1973-79). This agreement entered into force in 1981, but has since been revised under the Uruguay Round and the revised agreement has been in force since January 1 1996. This consequently led to a revision of the EU Directives on Public Procurement, including a revision of the thresholds.

The GPA is a *plurilateral* agreement as opposed to most WTO agreements, which are *multilateral*. The reason is that even as the GPA is open for all WTO Member States, it is only binding for those countries that have signed-up to the agreement. At present only a fraction of WTO members have signed the agreement, but economically the signatories are very important: Besides the EU, Japan and the United States are amongst the countries presently covered by the GPA.

Besides the GPA there are other initiatives in the WTO concerning Public Procurement. Negotiations about a multilateral agreement on *Transparency in Procurement* are ongoing. The end result is expected to stipulate obligations to make Public Procurement rules and procedures transparent, but not necessarily at the same time provide market access.

The multilateral agreement on international trade in services (GATS) has a reference to a possible inclusion of Public Procurement in services, and attempts are being made to establish a multilateral agreement on the inclusion of services in Public procurement.

Members of GPA

At present the GPA is therefore the only international agreement on Public Procurement in force, and it covers the EU and its 15 Member States (Austria,

Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Spain, Sweden, Portugal and the United Kingdom), Canada, China (Hong Kong), Korea, Israel, Japan, Liechtenstein, Norway, Singapore, Switzerland and the United States. A number of WTO Member States have an observer status vis a vis the GPA, namely Argentina, Australia, Bulgaria, Chile, Colombia, Iceland, Mongolia, Panama, Poland, Slovenia and Turkey. Four non-WTO members also have an observer status, namely China (Taipei), Estonia, Latvia and Lithuania. IMF and OECD are also enjoying an observer status.

GPA does not only cover central government but also subcentral governmental institutions. This could be for instance utility companies or it could be, as in the case of the United States, government institutions at state level (37 states). In any case institutions covered will be mentioned in annexes to the agreement.

Sectors covered

GPA covers all sectors of Public Procurement, including supplies, provision of services and construction. Precisely which items are covered can vary from country to country, as the GPA – or rather the GPA annexes – stipulates which items are covered between which countries. This pattern of mutual agreements on various forms of supplies, services and construction works makes it difficult to establish a precise view of the exact coverage of the GPA.

Thresholds

Also thresholds vary. The general threshold for supplies and services procurement by central government institutions is SDR 130,000 and for construction works SDR 5,000,000. For sub-central government institutions and other institutions covered by the agreement, the usual threshold for supplies and services is SDR 200,000. The United States and Canada use a threshold value of SDR 355,000.

Technical specifications

The GPA recommends the use of international specifications (for quality, performance, safety, dimensions, packaging, labelling, etc.) rather than national in Public Procurement. The use of standards should not prohibit equal treatment of bidders.

Equal treatment

The GPA does not allow discrimination between bidders based on nationality, and all bidders must be treated equal and therefore be given time and practical opportunities for participating in tenders. The GPA also specifies that only criteria relevant for the bid must be used to evaluate bidders.

Procuring authorities are not allowed to seek advice for the drafting of Terms of References from anybody who has an economic interest in the tender itself.

Tender procedures

Three forms of tenders can be applied:

- Open tenders, where all interested suppliers may submit a tender
- Selective tenders, where suppliers invited to participate may submit a tender
- Limited tendering procedures, where the public authority contacts suppliers individually. (This form can only be used under certain specific circumstances).

Invitation to participate in tenders

Intended procurement must be published in an appropriate publication (mentioned in an annex to the agreement), and the invitation must (at least) contain information about:

- Nature and quantity of items or work
- Tender procedure to be used
- Information on where to obtain specifications and other detailed information
- Timing
- Payment conditions.

There is no central source of information about forthcoming tenders. Some information and links to national publications can be obtained from the WTO home page (<http://www.org/wto/govt/govt.htm>).

Complaint Procedures

All parties to the GPA must establish 'non-discriminatory, timely, transparent and effective procedures' enabling suppliers to challenge alleged breaches of the GPA arising in the context of procurements in which they have, or have had, an interest.

For member states conflicts about the application of the GPA can be referred to Settlement of Disputes procedures in WTO.

There is no informal system for conflict resolution established under the GPA. It can therefore be difficult to maintain commercial opportunities for firms that have experienced problems in connection with bids.

Expected results of the 1999 review

It is not expected that there will be a large number of new signatories to the GPA. Most developing countries are hesitant to give access to their procurement markets. This is one of the reasons why the negotiations on a multilateral agreement on

transparency in government procurement may result only in increased transparency and not in market access.

At present some pressure is applied on new members of WTO to sign the GPA when they become members of WTO. Some of the smaller applicant countries have declared their readiness to do so. Whether this will also be the case for some of the larger applicant countries, including Russia and China, remains to be seen.

Attempts will no doubt be made to ‘clear-up’ the situation as the many bilateral exceptions in the annexes to the GPA is concerned. This could lead to a more transparent and efficient GPA in the future.

Electronic tendering is increasingly being discussed – also in relation to GPA. Presently the European Union is introducing electronic information and tendering systems, and in some other GPA member states electronic tendering is widely used. Increased use of electronic tendering under the GPA should therefore be expected in the future, and this could contribute to increased international competition on the Public procurement markets.

Model Agreements and Technical Assistance

Public Procurement rules are covering internationally and the core of the procurement rules are reflected in the UNCITRAL law models, which includes a model solution for Public Procurement.

The ITC (International Trade Centre) is providing technical assistance for the introduction of public procurement rules based on the UNCITRAL principles in a number of developing countries. This is happening partly to open the markets, and partly to contribute to the development of sound government procedures in general.

Practical experiences with GPA

Practical experience with GPA is limited in Danish enterprises. For this report surveys have been carried out amongst Danish companies that have export to GPA countries.

It should be noted that two thirds of all exports from Denmark is directed towards European Union member states, and if Norway is included (Norway is covered by the same Public Procurement rules as EU member states under the European Economic Area Agreement), the figure reaches nearly 72%.

If it is assumed that export to the public sector follows the same pattern more or less as export in general, it is obvious that EU rules for Public Procurement are more directly relevant than GPA rules. The survey have shown that many companies do in fact export to the public sector in GPA countries outside of the EU, but that most of them do so without being aware of the rights and obligations given by the GPA.

It is – seen from a market opening perspective – in a sense less important that GPA rules are known as long as market opportunities are provided. It is believed, however, that better knowledge of the GPA would contribute to create new market

opportunities and at the same time ensure a fair treatment in connection with bids to the public sector.

As regards the negotiations on a review of the GPA, points of view of a number of organisations and enterprises with experience in export to GPA countries and knowledge about the GPA itself, have been identified.

Common problems experienced in relation to procurement under the GPA are:

- The need for a clarification of GPA – in particular the bilateral agreements and exceptions
- Use of technical standards and specifications in a protectionist way
- Inefficient complaint procedures
- Insufficient overview of forthcoming tenders
- Lack of information about the GPA and the opportunities it provides.

The report identifies a number of issues that could be included in a Danish position for a review of the GPA:

- Simplification of the GPA, and in particular the annexes, leading to a more transparent agreement
- An improved system for information about planned tenders
- Increased use of electronic information and tendering
- Increasing the number of GPA countries
- Elimination of the use of technical specifications and standards in a protectionistic way
- The review of the GPA should not lead to complication of EU rules, and should in no way deteriorate existing Danish standards in the field of environment and safety and health regulations
- More efficient complaint procedures
- Transparent rules for the use of ‘green’ clauses in public tendering.

1. Det offentlige indkøbsmarked

Det offentlige indkøbsmarked er gigantisk. Det skønnes alene i EU-landene at udgøre omkring 5.000 milliarder kroner om året. Hvis man dertil lægger de lande, som er omfattet af WTO-aftalerne, og de udbud, der foregår gennem internationale organisationer som EU, Den Europæiske Bank for Genopbygning og Udvikling, Den Europæiske Investeringsbank, Den Nordiske Investeringsbank, Verdensbanken og de mange andre internationale udviklingsbanker og bistandsorganisationer, bliver tallet formentlig fordoblet.

For den enkelte virksomhed er markedet ofte ikke særlig forskelligt fra andre markeder. Mulighederne skal identificeres, kunderne skal plejes og der skal foregå et salgsarbejde, som hvis man solgte til den private sektor. Det er i øvrigt heller ikke ualmindeligt, at store, private virksomheder benytter sig af regler for deres indkøbsfunktioner, som ligner dem, der anvendes af offentlige myndigheder.

Det offentlige indkøbsmarked er dog forskelligt fra det private på nogle punkter. Først og fremmest er det politisk reguleret.

Det har således været god latin gennem de senere år at arbejde politisk for at sikre, at de offentlige indkøbsordrer bliver omfattet af konkurrence – i hvert fald hvis de har en vis størrelse og dermed betydning. Det er sket på EU-plan, hvor man måske har det mest omfattende og detaljerede system for regulering af offentlige indkøb, der findes på mellemstatsligt plan. EU-reglerne har gennem deres anvendelse på EØS-landene – og i et vist omfang på ansøgerlandene i Øst- og Centraleuropa – et omfang, der rækker ud over de 15 EU-lande.

De internationale organisationer, herunder udviklingsbankerne, har ligeledes udviklet detaljerede systemer til regulering af de offentlige indkøb, og i FN-regie har UNCITRAL (the UN Commission on International Trade Law) i 1993-94 vedtaget to modellove, henholdsvis the UNCITRAL Model Law on Procurement of Goods and Construction (1993) og the UNCITRAL Model Law on Procurement of Goods and Construction and services (1994).

På et bredere internationalt plan gøres der i WTO i øjeblikket forsøg på at udvikle et regelsæt for offentlige indkøb, der dækker alle organisationens medlemmer. Men der er allerede udviklet et sæt af regler, som dog kun anvendes af et fåtal af WTOs medlemmer. Målt i volumen er betydningen dog større, idet denne aftale – GPA eller Government Procurement Agreement – fortrinsvis omfatter rige lande, nemlig de 15 EU-lande og 10 andre lande, heriblandt USA og Japan. EU, USA og Japan står for et bruttonationalprodukt på tilsammen 18,414 milliarder euro (1998). Det svarer til ca. 145 trilliarder kroner.

Heraf udgør den offentlige sektor ca. 6,000 – 10,000 milliarder euro. En stor del af dette beløb er overførselsindkomster og løn til offentligt ansatte, men selv hvis man sætter de offentlige indkøb af varer, tjenester og byggerier til f.eks. 20 pct. af de samlede offentlige udgifter, bliver det alligevel et beløb på 2,000 milliarder euro, svarende til ca. 15.000 trilliarder danske kroner.

Ikke alle indkøb til den offentlige sektor er omfattet af indkøbsreglerne, men en række kilder anslår, at der under WTO-aftalen om offentlige indkøb er åbnet for konkurrence til en værdi af over 2,5 trilliarder kroner årligt.

De offentlige indkøb er også politiske på andre måder. Først og fremmest er der ofte stor politisk interesse for og prestige i en række af de projekter, der bliver udbudt fra den offentlige sektor. Det gælder naturligvis først og fremmest de store bygge- og anlægsarbejder, hvor der ofte er en interesse i at fastholde arbejdet på nationale hænder. Tendensen synes dog at være, at det i større og større omfang accepteres, at også den type opgaver skal udbydes i international konkurrence.

Der indgår ofte andre typer af politiske overvejelser i de offentlige indkøb. Der inddrages således ofte beskæftigelsespolitiske overvejelser i store udbudsforretninger, og der gøres i stigende omfang forsøg på at bruge offentlige indkøb til at fremme andre typer af politiske målsætninger, f.eks. om gennemførelse af tekniske standarder, kvalitetsstandarder og miljømålsætninger.

På globalt plan spiller en nationalistisk indkøbspolitik en stor rolle. Der er f.eks. i USA en stærk 'Buy American' bevægelse, og det er under alle omstændigheder givet, at et 'noget-for-noget' princip er gældende i de internationale relationer. Det vil i praksis sige, at man åbner for virksomheders adgang til at byde på de samme markeder, som man selv har adgang til i det pågældende land. Dette er særdeles fremtrædende i WTO-aftalerne.

Dilemmaet for den offentlige sektor og dens politiske ledere er, at konkurrence om de offentlige indkøb – nationalt og/eller internationalt – giver 'value for money'. Skatteyderne får som hovedregel mere for deres penge, når leverandører konkurrerer i stedet for at have et monopol på leverancer eller at kunne forhandle alene med den offentlige myndighed. Prisen for at opnå sådanne økonomiske fordele er, at den offentlige sektor til en vis grad mister kontrollen med sine leverandører og derved – igen til en vis grad – mister muligheder for at kunne anvende de offentlige indkøb til at fremme bestemte politikker – herunder en lokal beskæftigelsespolitik.

Det vil derfor altid være en politisk afgørelse, hvad man vælger, men for verdens industrilande synes der ikke at være nogen tvivl om, at den liberalistiske løsning er den, der vælges. Value for money står over andre hensyn.

Konkret betyder aftalerne i WTO ikke mange ændringer for den offentlige sektor i Danmark. Den sag er sådan set afgjort ved, at Danmark er med under EUs udbudsregime. Det fastlægger principperne om international konkurrence, og WTO-aftalerne øger i princippet kun antallet af potentielle leverandører – og det vil i praksis kun være af begrænset omfang. Der er gode chancer for, at reglerne i stedet kan blive til en samlet samfundsøkonomisk fordel, fordi WTO-reglerne formentlig øger danske virksomheders muligheder for at eksportere til den offentlige sektor i lande som USA og Japan i højere grad end den i praksis giver amerikanske og japanske virksomheder adgang til det danske offentlige indkøbmarked.

Endelig er offentlige indkøb en politisk sag i forhold til udviklingslandene. Det er karakteristisk, at ingen udviklingslande har tilsluttet sig internationale aftaler om offentlige indkøb. Argumentet er først og fremmest, at udviklingslandene ikke mener

at kunne få noget ud af at deltage i sådanne aftaler. Det kunne sandsynligvis give udviklingslandene billigere indkøb, hvis der var en sådan international konkurrence om dem, men dette argument vejer tilsyneladende ikke så tungt som dette, at udviklingslandene føler, at deltagelse i internationale aftaler om offentlige indkøb vil åbne deres markeder for industrilandenets virksomheder, uden at de selv vil være i stand til at levere noget særligt på industrilandenets markeder.

Der er til gengæld – ikke mindst i FN-kredse – en klar holdning til, at en sund offentlig indkøbspolitik er et godt middel til en sund offentlig administration generelt. Korrupsion og bestikkelse er ikke ukendte fænomener i offentlig indkøbspolitik på verdensplan. Der gøres i øjeblikket forsøg såvel på bilateralt som på multilateralt plan på at indarbejde regler for offentlige indkøb (primært baseret på UNCITRAL-modeller) i udviklingslande.

Opmærksomheden skal i øvrigt henledes på visse bilaterale aftaler, som EU har indgået, og som på nogle punkter giver videre markedsadgang end de resultater, der indtil videre har kunnet opnås inden for rammerne af GPA. Det drejer sig foreløbigt om aftaler med Israel, Korea og Schweiz. Ikke mindst sidstnævnte aftale, indeholder muligheder for adgang til et relativt nært marked, der ligger meget tæt op ad de muligheder i så henseende, som EU-reglerne indebærer.

Danske virksomheder og de internationale aftaler

Danske virksomheder udnytter formentlig ikke fuldt ud mulighederne i de internationale aftaler om offentlige indkøb. Der kan være mange grunde til dette.

Mange virksomheder lader sig måske skræmme af, at reglerne ofte er meget utilgængelige. Dette forhold har måske været afskrækkende for nogle virksomheder i EU-sammenhæng, men her findes der trods alt rimeligt tilgængelige oversigter over regelsæt, klageprocedurer, etc. Ikke mindst i Danmark, hvor konkurrencestyrelsen har gjort en helt speciel indsats for informere virksomhederne og gøre dem interesserede i at benytte sig af mulighederne i indkøbsreglerne.

Vender man sig til WTO-reglerne – mere konkret GPA – findes der ingen let tilgængelige regler, som kan bruges umiddelbart af den typiske virksomhed, og reglerne er i sig selv særdeles komplicerede og fyldt med undtagelser, særbestemmelser osv. Klagebestemmelserne er heller ikke let tilgængelige, og det er vanskeligt at finde en samlet oversigt over de udbud, der foretages under reglerne. Der er ikke, som i EU, et samlet sted, hvor alle udbud publiceres.

Spørgsmålet er så, om virksomhederne overhovedet behøver at kende reglerne.

Det er ikke nemt at give et helt entydigt svar på dette spørgsmål. På den ene side synes det klart, at mange danske virksomheder stort set er ligeglade med, hvad reglerne siger. Disse virksomheder byder på ordrer, de får kendskab til, og får de ordren, er det godt. Får de den ikke, er det ærgerligt, men ikke ærgerligt på anden måde, end det er at tabe en hvilken som helst anden ordremulighed. Mange af virksomhederne siger direkte, at de ikke kunne drømme om at hænge de offentlige organer op på reglerne, endsige gennemføre en klagesag.

På den anden side er det klart, at udbudsregler faktisk giver virksomhederne nogle rettigheder, som – hvis de anvendes rigtigt – kan bruges til at effektivisere arbejdet med at vinde offentlige indkøbsordrer. Det gælder procedureregler, regler der skal forhindre forskelsbehandling, og det gælder klageregler.

Der er virksomheder, som er bange for at blive udelukket fra fremtidige ordremuligheder, hvis de opfører sig for 'besværligt'. Denne frygt findes i et vist omfang på nationalt plan i Danmark. Den findes – mere udbredt – i EU-landene, og den synes endnu mere udbredt på bredere internationalt plan.

Det er som om frygten for at bruge reglerne, som de er tænkt, er mindst, jo bedre man som virksomhed kender det miljø, der arbejdes i. Jo mere transparent systemet er, jo bedre tør man klage over manglende overholdelse af reglerne. Erfaringen fra arbejdet med EU-reglerne har vist, at man kan indgyde virksomhederne mere tillid til at bruge reglerne, hvis der dels findes en ordentlig forklaring til virksomhederne, dels er en offentlig instans – i dette tilfælde Konkurrencestyrelsen – som kan og vil bakke virksomhederne op.

Et andet problem med klager over manglende overholdelse af reglerne er, at klagesystemerne ofte er for langsommelige til, at de kan medvirke til at fastholde kommercielle muligheder. For en virksomhed er det ikke særlig interessant at skulle ofre penge og andre ressourcer på f.eks. en retssag, som ikke kan sikre virksomheden en afgørelse i tide, eller endog sikre, at virksomheden, selv hvis den får ret, kan have nogen rimelig chance for at vinde den ordre, den oprindeligt bød på.

Derfor har det naturligvis stor betydning for danske virksomheder, at der nu findes et netværk mellem konkurrencemyndighederne i en række af de EU-lande, som er vigtigst for danske virksomheder, og som medvirker til konfliktløsninger på et uformelt plan og så betids, at virksomhederne får en chance for at fastholde de kommercielle muligheder.

Noget sådant findes ikke bare tilnærmelsesvist, når det gælder WTO-reglerne. Der findes ingen letfattede oversigter. Der findes intet centralt sted, hvor man kan hente oplysninger om udbud. Der findes intet netværk, som kan hjælpe virksomheder, der føler sig dårligt eller ukorrekt behandlet.

Revision af reglerne i 1999

Denne rapport behandler WTO-reglerne. Den forklarer reglerne, som de er i dag, forud for den revision, der skal ske af GPA. Den behandler ligeledes det, der bliver den sandsynlige holdning på EU-plan, idet EU er forhandlingspartner i forhold til WTO-aftaler. Den fremlægger ligeledes de synspunkter, som danske organisationer og virksomheder har tilkendegivet som deres ønsker for en revision af aftalen, og den giver – set med virksomhedernes øjne - endelig et bud på en dansk holdning i forhold til revisionen af aftalen. Det bemærkes i den forbindelse, at rapporten primært har en erhvervsmæssig indfaldsvinkel og derfor først og fremmest fokuserer på erhvervsmæssige interesser i modsætning til eksempelvis spørgsmål om varetagelsen af miljø-, arbejdsmiljø- og sociale hensyn i forbindelse med udbudsforretninger.

2. WTO-reglerne for offentlige indkøb

Baggrund for aftalerne

Ifølge økonomisk teori kan omkostningerne ved at 'købe nationalt', når der købes ind til det offentlige, blive høje, især hvis mange lande benytter diskriminatoriske indkøbspolitikker. Det sandsynlige resultat heraf på globalt plan vil – igen ifølge økonomisk teori – blive et velfærdstab i forhold til den situation, hvor der købes ind på den økonomisk mest effektive måde. Selv set i forhold til det enkelte land, kan en national indkøbspolitik give et resultat, der ikke er så økonomisk effektivt som det formentlig var forudsat, da beslutningen om at købe ind nationalt blev taget.

Disse ræsonnementer var hovedårsagen til, at en række regeringer allerede i 1960'erne inden for OECD begyndte at diskutere mulige internationale aftaler om offentlige indkøb. Resultatet heraf blev dog ikke en OECD-aftale, men en aftale i GATT-regie i slutningen af 1970'erne. Denne aftale – *The Agreement on Government Procurement* – blev forhandlet under Tokyo-runden (1973-79), og den placerede offentlige indkøb fra specificerede offentlige organer under international konkurrence.

Government Procurement Agreement (GPA) fra 1979 fandt kun anvendelse på de GATT-medlemmer, der underskrev aftalen, hvilket især var en afspejling af, at GATT-overenskomsten udtrykkeligt ekskluderer offentlige indkøb fra det generelle GATT-princip om ikke-diskrimination mellem leverandører efter nationalitet. Dette var gældende i den oprindelige GATT-overenskomst fra 1947 og i den genforhandlede aftale fra 1994. Undtagelsen for de offentlige indkøb findes i GATT-overenskomstens artikel III, stk. 8.

Denne undtagelse indebærer også, at GPA har en selvstændig karakter i forhold til de øvrige GATT/WTO-regler, og ikke i væsentligt omfang er direkte afledt af traktaten.

Det var et generelt princip i GATT-overenskomsten – og er det fortsat i WTO – at de handelsmæssige fordele, en underskriver af aftalen giver til ét land eller gruppe af lande, skal gives til alle andre parter, der er dækket af aftalen. Dette princip kaldes *Most Favoured Nation-princippet* (MFN).

Selv om GATT-overenskomsten specifikt fratager området offentlige indkøb fra princippet, er dette dog selvstændigt indeholdt i GPA i den forstand, at én underskriver af GPA skal give den behandling, man giver et andet GPA-land til alle GPA-lande. GPA er dog på den anden side også fundamentalt i strid med dette princip. Således har GPA-parterne i konkrete tilfælde fraveget princippet ud fra reciprocitetsbetragtninger; dvs. at parterne i GPA alene giver hinanden adgang til deres respektive offentlige indkøbsmarkeder i det omfang en sådan markedsadgang er gensidig. Omfanget af en sådan markedsadgang bestemmes ved bilaterale forhandlinger mellem parterne.

Man kan derfor beskrive GPA som en 'paraplyaftale', der lægger rammer for et sæt af bilaterale aftaler mellem aftalens parter.

Et andet fundamentalt GATT-princip er *princippet om national behandling*. Dvs. at man skal behandle udenlandske varer, tjenester og leverandører på en måde, som ikke er mindre favorabel, end den behandling man giver indenlandske varer, tjenester og leverandører. Det betyder, at alle parter under GPA skal give varer, tjenesteydelser og leverandører fra andre lande, der er part i aftalen, en behandling, der ikke er mindre gunstig end den, man giver indenlandske varer, tjenesteydelser og leverandører og man skal også give en sådan lige behandling for varer, tjenesteydelser og leverandører fra alle andre GPA-lande.

GPA er – på grund af det begrænsede antal medlemmer – en plurilateral aftale i modsætning til de fleste WTO-aftaler, som er multilaterale. Den er samtidig frivillig og binder kun de parter, der har underskrevet den. I den formelle WTO terminologi hører de plurilaterale aftaler under betegnelsen Annex IV-aftaler.

Aktuelle initiativer i WTO vedrørende offentlige indkøb

Der findes i dag ikke nogen global aftale eller aftale mellem alle WTOs medlemmer om offentlige indkøb. Men der arbejdes for tiden i WTO med offentlige indkøb på tre områder, nemlig:

Revisionen af den omtalte *plurilaterale* aftale, der er indgået mellem 25 lande, *Government Procurement Agreement* – GPA

Forhandlingerne om en *multilateral* aftale omfattende alle WTO-lande om *Transparency in Procurement* (som ikke i sig selv omfatter markedsadgang)

GATS – den *multilaterale* aftale om liberalisering af handel med tjenesteydelser, der også på sigt kan tænkes at indeholde aspekter af offentlige indkøb af tjenesteydelser, jfr. nedenfor.

Government Procurement Agreement

GPA blev forhandlet parallelt med Uruguay-runden. Aftalen blev underskrevet i Marrakesh i april 1994 og trådte i kraft 1. januar 1996. Den førte til en række ændringer af EU-direktiverne om offentlige udbud, som var nødvendige for, at EU-landene kunne overholde aftalen. En af ændringerne var justering af grænseværdierne for udbud, som på grund af GPAs fastsættelse af grænseværdierne i SDR (Special Drawing Rights) medførte de nuværende, 'skæve' grænseværdier i EU-direktiverne.

GPA dækker nu 25 af WTOs medlemmer, men aftalen er åben for andre medlemmer, der måtte ønske at tilslutte sig, og den indeholder særligt gunstige regler for udviklingslande, der måtte ønske at tilslutte sig.

Aftalen dækker i dag EU og de 15 medlemslande, og desuden Canada, Kina (Hong Kong), Israel, Japan, Korea, Liechtenstein, Norge, Singapore, Schweiz og USA. Desuden repræsenterer Holland Aruba. 10 WTO-medlemslande har observatørstatus, nemlig Argentina, Australien, Bulgarien, Chile, Colombia, Island, Mongoliet, Panama, Polen, Slovenien og Tyrkiet. Fire ikke-WTO medlemmer, Kina (Taipei), Estland, Letland og Litauen samt IMF og OECD har ligeledes observatørstatus.

(Status pr. 30. oktober 1998). Island, Panama og Kina (Taipei) har i juni 1998 anmodet om at kunne tiltræde aftalen. (Oplysningerne er de seneste fra WTOs Internetside 18.01.1999).

GPA dækker kun de administrative enheder, der er nævnt i annekser til aftalen for hvert enkelt deltagende land. Dækningen er dog blevet udvidet over tid gennem periodiske aftaler, som er forudset i aftalen.

GPA bygger som nævnt på fundamentale WTO-principper som national behandling og mestbegunstigelsesklausulen (MFN), men kun mellem de parter, som har underskrevet aftalen (se ovenfor).

Den er på den anden side også fundamentalt i strid med en række af principperne. Således er aftalen som nævnt fyldt med undtagelser på bilateralt plan, hvor lande gensidigt undtager sektorer eller områder fra den generelle aftale. Det skyldes primært, at parterne har fundet denne aftale meget følsom, idet den vedrører en direkte, konkret og omgående adgang til markederne i modsætning til en række andre WTO-aftaler, som er af mere principiel karakter og med knap så direkte virkninger.

Det skal også nævnes her, at der findes en række regionale aftaler mellem grupper af lande, som overlapper GPA-kredsen. Først og fremmest optræder de 15 EU-lande som én blok i forhold til GPA, men desuden er der i APEC og i NAFTA en vis koordination af og regler for offentlige udbud.

Revision af aftalen

Det er planen, at aftalen skal revideres frem mod den tredje WTO ministerkonference, der er planlagt afholdt i slutningen af 1999. Der forventes udarbejdet et forhandlingsgrundlag i løbet af sommeren 1999, og intensive forhandlinger mellem parterne skulle begynde i løbet af efteråret 1999.

På dagsordenen er først og fremmest en forbedring og forenkling af GPA, herunder at øge antallet af parter omfattet af aftalen, men parterne vil parallelt diskutere muligheden for at fjerne diskriminatoriske tiltag, som forhindrer en effektiv konkurrence om udbuddene, og desuden en udvidelse af aftalens dækningsområde (kontraktstyper og myndighedsniveau).

GPA's hovedelementer

Selve GPA er som sådan relativt kort og præcis, og den følger det mønster, der efterhånden er ved at blive 'international standard' for udbudsregler. Aftalen indeholder en række bestemmelser om udbud og udbudsprocedurer, som forklares nedenfor.

Derimod bliver billedet meget forvirrende, når man ser på dækningsområderne. GPA giver i sig selv ingen indikation af de dækkede områder. Der er derimod tale om et enstrengt system af regler, som skal gælde for alle typer af udbud i alle sektorer.

De dækkede sektorer fremgår i stedet af bilagene til GPA, og her findes der et utal af undtagelser, som gør en vurdering af anvendelsen uklar. Også dette forhold omtales

nærmere i det følgende. Når f.eks. telekommunikation ikke er dækket af GPA, skyldes det ikke nogen principiel undtagelse af denne sektor i selve aftalen, men at ingen af parterne har nævnt sektoren under de dækkede områder som beskrevet i annekserne. Det skal også tilføjes, at der er en vis fleksibilitet indbygget her. En regering kan således fjerne f.eks. en forsyningsvirksomhed fra annekserne, hvis den ikke længere har kontrollen med den pågældende virksomhed – f.eks. som følge af privatisering.

Dækkede områder:

GPA retter sig som udgangspunkt både mod de centrale myndigheder samt mod udbud på niveauer under det centrale regeringsniveau. Medlemmerne af GPA forpligter sig ved tiltrædelsen af aftalen på centralt niveau ved angivelsen af disse myndigheder i tillæg I, bilag 1 til aftalen, samt i bilag 2, hvilke myndigheder under det centrale administrative niveau, der ligeledes er omfattet. Endelig er det i bilag 3 angivet, hvilke offentlige forsyningsvirksomheder der er omfattet. For USAs vedkommende har den føderale regering således ikke kunnet forpligte alle delstater, og der er derfor - ud over det føderale niveau - kun 37 delstater med under aftalen.

Den nuværende GPA dækker både bygge- og anlægsvirksomhed samt indkøb af varer og tjenesteydelser. Hvilke tjenesteydelser, der er dækket, er dog i realiteten noget uklart, idet dette område på grund af uoverensstemmelser mellem deltagerne i aftalen er dækket af bilaterale aftaler. Udbud af tjenesteydelser vil derfor kun været dækket af GPA-procedurer, såfremt myndighederne hos såvel udbyderen som leverandøren er enige om, at den pågældende tjenesteydelse er dækket. Som eksempel kan nævnes, at EU, USA og EFTA-landene har indgået en aftale om, at finansielle tjenesteydelser skal være omfattet af aftalen, mens Japan ikke ønskede dette. Derfor er USA samt EU- og EFTA-landene ikke forpligtede til at tage japanske leverandører i betragtning ved udbud om leverance af finansielle tjenesteydelser.

I aftalens tillæg 1 findes der i bilag 4 en oversigt over de tjenesteydelser, som er omfattet af aftalen, mens bilag 5 specificerer de omfattede tjenester i forbindelse med bygge- og anlægsarbejder.

Som eksempel kan nævnes undtagelser, EU har indført i dækningen:

Drikkevandsforsyning, energi, visse transportydelser, telekommunikation, indkøb af vand og brændstof til energiforsyning, taletelefoni, telex, radiotelefoni, satellittjenester, visse finansielle tjenesteydelser, mæglingsydelser, landbrugsstøtteordninger, erhvervelse af land og ejendomme, beskæftigelsestjenester og programmaterialer til radio og tv.

Grænseværdier:

De fleste deltagere i aftalen anvender samme grænseværdier for udbud fra centrale myndigheder, nemlig SDR 130,000 for varer og tjenesteydelser og SDR 5.000.000 for bygge- og anlægsområdet. For myndigheder under det centrale niveau og for andre

dækkede myndigheder varierer billedet noget: For varer og tjenesteydelser SDR 200.000, undtagen for USA og Canada, som anvender en værdi på SDR 355.000. For bygge- og anlægsarbejder gælder den almindelige grænse på SDR 5.000.000. For en detaljeret oversigt over grænseværdierne, se denne rapport's bilagssider.

Grænseværdierne i EUs udbudsregler følger nu de samme grænseværdier, som gælder for EU-landene under GPA.

Tekniske specifikationer:

Det forudsættes som et generelt princip i GPA, at de tekniske specifikationer for produkter eller tjenester retter sig mod opnåelse af resultater snarere end mod design karakteristika. GPA anbefaler endvidere anvendelse af internationale standarder snarere end nationale i forbindelse med tilrettelæggelse af udbud (artikel VI). Endvidere må der som hovedregel ikke stilles krav om eller henvises til bestemte varemærker m.v.

Der gælder altså ikke, som i EU, et princip om gensidig anerkendelse af standarder, hvis der ikke findes internationalt gældende standarder, men der tilstræbes alligevel en ligestilling mellem tilbudsgivere.

Ligebehandling og habilitet:

Generelt siger GPA-reglerne klart, at der ikke må diskrimineres mellem tilbudsgivere på grund af nationalitet, ligesom der skal være ligebehandling i den forstand, at alle potentielle tilbudsgivere skal have tid og praktisk mulighed for at kunne deltage med et bud. Desuden siger aftalen, at der ikke må lægges andre kvalifikationskriterier ind for bedømmelse af tilbudsgivere end dem, der direkte siger noget om evnen til at kunne påtage sig den konkrete opgave.

Habilitetsspørgsmålet kommer også ind på en anden måde. I GPA (Art. VI.4) siges det, at en *ordregiver ikke på en måde, der kan have til følge at udelukke konkurrencen, må søge eller modtage rådgivning, der kan benyttes i forbindelse med udarbejdelsen af specifikationer til en bestemt udbudsforretning, fra virksomheder, som måtte have en forretningsmæssig interesse i den pågældende udbudsforretning.*

Dette spørgsmål vedrører især rådgiveres rolle i forhold til både at kunne vejlede udbudsgiver og at kunne deltage i selve udbudsforretningen. Hvor langt man kan gå i denne 'tekniske dialog' uden at komme i konflikt med de habilitetsregler, der er citeret oven for, er ikke klart, og der er ikke på nuværende tidspunkt en praksis, som kan vejlede på området. Det er formentlig også sikkert, at man vil forholde sig forskelligt til dette spørgsmål i GPA-landene, men GPA-reglerne er nu også indarbejdet i EU-direktiver, dog med en lille drejning. I EU-direktiverne har man nemlig formuleret sig på en mere positiv måde, end tilfældet er i GPA, idet EU-reglerne nu slår fast, at ordregivende myndigheder godt må modtage rådgivning vedrørende udbudspecifikationer, forudsat at der ikke derved sker en udelukkelse af konkurrencen.

Udbudsprocedurer:

Der kan anvendes tre former for udbud, nemlig:

- *Offentlige udbud*, hvor alle interesserede kan afgive bud (artikel VII:3a)
- *Begrænsede udbud*, hvor kun inviterede virksomheder kan byde (artikel VII:3b)
- *Udbud efter forhandling*, hvor en myndighed kontakter leverandører individuelt efter specielle regler (artikel VII:3c og artikel XV).

GPA fastslår, at man normalt skal anvende de to førstnævnte udbudsformer. Hvis begrænsede udbud anvendes, skal den udbydende myndighed 'sikre en effektiv international konkurrence og maksimere antallet af udenlandske leverandører, der inviteres til at afgive bud'.

Den sidstnævnte form (udbud efter forhandling) kan kun anvendes, hvis der ikke er modtaget bud efter et åbent eller et begrænset udbud, hvor der er kunstværker eller prototyper involveret i udbuddet, hvis der er tale om 'ekstremt hastede' udbudsforretninger, hvis der er tale om supplerende leverancer til et allerede foretaget udbud, eller hvis der ikke er risiko for at skade den internationale konkurrence (artikel XV).

De udbudsformer, der anvendes under GPA, er de samme, som er kendt dels fra 'standardregler' for offentlige udbud, dels fra EUs regler. I GPA er der, som i EUs regler, lagt op til, at man i princippet skal anvende de offentlige og de begrænsede udbud, mens udbud efter forhandling skal være undtagelsen, og – som i EU – skal anvendelse af hasteprocedurer, der kan tænkes at blive anvendt for at diskriminere mod udenlandske bydende, kun kunne anvendes i deciderede undtagelsestilfælde.

Meddelelse om udbud:

Der skal ske meddelelse om udbuddene i en officiel publikation, og meddelelser skal mindst indeholde oplysninger om følgende forhold:

Udbuddets karakter og omfang
Den udbudsform, der vil blive anvendt
Den kvalifikationsprocedure, som vil blive anvendt
Hvorfra man kan få specifikationer og anden detaildokumentation
Afleveringsfrister
Betalingsforhold og -frister.

I tillæg II , III og IV til aftalen findes opregnet de publikationer, der anvendes til forhåndsmeddelelser, meddelelser om leverandørlistor og til meddelelse om formelle regler vedrørende offentlige indkøb.

Der findes således ikke nogen central informationskilde for udbuddene i WTO-regie eller andetsteds, og der findes heller ikke (endnu) nogen form for centraliseret database, der samler oplysninger om alle udbud under reglerne.

Der findes en WTO-Internetside (<http://www.wto.org/wto/govt/govt.htm>). Den giver nogle links til nogle af de nationale publikationskilder, men denne oversigt synes at være noget tilfældig og usystematisk og kan derfor ikke bruges til systematisk informationsindhentning.

Nedenstående tabel viser, til hvilke kilder for lande der henvises på Internetsiden den 18. januar 1999:

Land	Kilde
Australien	Government Electronic Marketplace (GEMS)
Canada	MERX
EU	SIMAP
Finland	Information Technology Development Center, TIEKE
Kina (Hong Kong)	Supply Administration
Japan	Government Procurement Data Base System
Korea	Supply Administration
Mexico	COMPRANET
New Zealand	NBR Network
Polen	Public Procurement Bulletin
Singapore	The Government Internet Tendering Information System (GITIS)
Kina (Taipei)	Government Procurement Information System (GPIS)
USA	Commerce Business Daily

Information er naturligvis altid godt, men henvisningerne er som nævnt ret usystematiske. Der findes for EU således kun henvisningen til SIMAP, samtidig med, at et medlemsland – Finland – optræder særskilt. Endvidere er der observatørlande med, som ikke er omfattet af aftalen, mens en række lande, som er med i aftalen, ikke er nævnt. Man skal heller ikke regne med, at disse informationssider i alle tilfælde giver præcise oplysninger om kommende udbud. I nogle tilfælde er der mest tale om generelle oplysninger om udbudsorganisation og udbudsregler.

Problemets kerne er, at der ikke findes en central informationskilde til GPA-udbud, og WTO-sekretariatets forsøg på at etablere et overblik er nok al ære værd, men det er ikke effektivt set i forhold til virksomhedernes behov.

GPA fastslår i øvrigt, at andre typer virksomheder end de centrale regeringsinstitutioner kan anvende meddelelse om planlagte udbud eller en meddelelse om kvalifikationsrunder som en invitation til deltagelse i udbud.

Forud for selve udbuddet er udbudsgiver forpligtet til at udsende en forhåndsmeddelelse (tender notice) i en offentligt tilgængelig publikation (som er opregnet i tillæg II til aftalen).

Den manglende centrale database, hvorfra oplysningerne ville kunne hentes, vanskeliggør også til en vis grad overgangen til et elektronisk system for meddelelser om udbud under GPA (se også nedenfor).

Forhandlinger med tilbudsgiver:

Der kan forhandles med potentielle tilbudsgivere, hvis det er meddelt i udbudsannonceringen, eller hvis det ligger klart, at der ikke er ét tilbud, som klart er det bedste i forhold til de offentliggjorte kriterier. Reglerne siger, at forhandlinger skal bruges til at klarlægge styrke og svagheder hos tilbudsgiverne, og at forhandlingerne skal foregå fortroligt, og endelig at der ikke må diskrimineres mellem tilbudsgiverne (artikel XIV).

Forhandlinger med tilbudsgivere er et noget omdiskuteret emne i EU-sammenhæng, hvor spørgsmålet bl.a. er taget op i forbindelse med Grønbogen om udbudsreglerne og i efterfølgende meddelelser fra Europa-Kommissionen om teknisk dialog (se også ovenfor under 'habilitet'). Der er delte meninger om, hvor langt man skal gå med hensyn til forhandlinger eller dialog. Der er givetvis behov for en vis dialog mellem parterne i en udbudsforretning, men der er også altid en risiko for, at ligebehandlingsprincipper overtrædes – uden at det altid vil være klart for andre end de forhandlende parter, hvad der er foregået.

Tildelingskriterier:

Udbydere skal tildele kontrakter til den tilbudsgiver, som dels fuldt ud er i stand til at løse opgaven, dels er enten den billigste eller har givet det mest fordelagtige tilbud. Det sidste kan bedømmes i forhold til kriterier som kvalitet, teknisk kvalitet, leveringsomkostninger og pris. Vurderingen skal under alle omstændigheder foregå på basis af de kriterier og grundlæggende krav, der er specificeret i udbudsannonceringen. Der er her tale om en parallel til EU-reglerne, som også giver mulighed for at vælge mellem det billigste eller det økonomisk mest fordelagtige bud.

Myndighederne skal endvidere meddele, hvem der har vundet kontrakterne inden for 72 dage efter kontraktens tildeling. Man skal meddele:

- karakter og omfang af udbuddet,
- den vindende virksomheds navn og adresse,
- værdien af det vindende bud eller det dyreste og det billigste tilbud, der er taget i betragtning,
- hvilken type udbudsforretninger, der er anvendt, og
- hvis udbud efter forhandling er anvendt, da en begrundelse herfor.

Hvis en virksomhed beder om det, skal den kunne få detaljerede oplysninger om, hvorfor den pågældendes bud eventuelt ikke blev antaget, hvorfor virksomheden eventuelt ikke blev fundet kvalificeret, hvem der har vundet udbuddet og hvilke særlige forhold, udbyderen har lagt vægt på i valget af det vindende bud (artikel XVIII)

Klagemuligheder:

Alle parter, som er omfattet af GPA, skal etablere 'ikke-diskriminatoriske, hensigtsmæssige, gennemsigtige og effektive procedurer', som kan benyttes af utilfredse bydende til at klage over udbudsforretningen. Der skal i alle lande være adgang til at få en uafhængig vurdering af påståede uoverensstemmelser med reglerne. Det kan ske i form af en domstol eller et særligt organ, som skal være uafhængigt af resultatet af udbudsforretningen, uden konkret interesse i udbudsforretningen, og bestå af medlemmer, der er sikret mod indflydelse fra tredjeparter.

Hvis det organ, der vælges, ikke er en domstol, skal det sikres at:

- klagerne har mulighed for at blive hørt og at deltage i alle led af sagsbehandlingen. Klageren skal endvidere have ret til at føre vidner.
- forhandlingerne om sagen skal kunne foregå i offentlighed, og
- beslutninger skal meddeles sammen med beslutningsgrundlaget.

Hvis det findes, at der har været tale om et brud på aftalen, skal der være mulighed for at ændre på det skete, og/eller at give økonomisk kompensation for eventuelt tab. Det påhviler også ethvert land, som har underskrevet GPA, at sørge for, at der findes hurtige og effektive metoder til at rette op på fejltagelser i udbudsforløbet for dermed at fastholde de kommercielle muligheder i forbindelse med udbuddet.

Dette system, der minder om de konfliktløsningsmekanismer, som – gennem netværk mellem myndighederne i Danmark og en række EU-lande, og det påbegyndte pilotprojekt i EU – bruges af Konkurrencestyrelsen, findes imidlertid ikke i GPA-regie uden for EU-landenes kreds. Der findes tilsyneladende ikke nogen praksis for at benytte sådanne mekanismer, ligesom det ikke har været muligt at spore nogen form for uformelt netværkssamarbejde med det formål at løse konflikter om reglerne mellem parterne i GPA-regie.

Det skal endelig bemærkes, at GPA for medlemslandene – men ikke for den enkelte virksomhed direkte – åbner mulighed for løsning af konflikter i WTO gennem paneler, herunder de såkaldte 'Settlement of Disputes' regler (artikel XXII:1). Processen er realistisk set alene brugbar til store og/eller mere principielle sager, og spørgsmål garanterer ikke på nogen måde en hurtig problemløsning, der kan bevare det 'kommercielle potentiale'.

Kontrol med overholdelse af aftalen – statistik og information

WTO-sekretariatet har ikke som Europa-Kommissionen et mandat til at følge implementering af aftalen eller af dens praktiske anvendelse. WTOs karakter af en mellemstatslig organisation spiller klart ind her, da der ingen overnationale beføjelser

er. Derfor er det medlemmerne selv, der kontrollerer hinanden, bl.a. gennem 'Reviews' i GPA komiteen. Indtil nu har 6 'lande' (EU og fem andre) indsendt oplysninger om implementering af aftalen. I oktober 1998 er man startet med reviews af de enkelte landes implementering samt diskussion af eventuelle problemsager (challenge procedures).

Der har været meget få tilbagemeldinger om brugen af de nationale klagebehandlingssystemer, men WTO påpeger, at det ikke nødvendigvis betyder at reglerne ikke er effektive, da de givetvis har en afskrækkende effekt.

I denne forbindelse skal det også understreges, at WTO-sekretariatet er meget tyndt besat (kvantitativt) på udbudsområdet, hvor i realiteten kun én sagsbehandler er direkte involveret. Til gengæld synes denne sagsbehandler at besidde gode kvalifikationer og tilsyneladende også ambitioner, som kunne fremmes ved hjælp af støtte fra særligt interesserede medlemslande.

Det kræves i aftalens artikel XIX:5, at der på årlig basis skal udarbejdes statistikker over indkøb dækket af aftalen. De statistiske oplysninger, der findes i WTO-sekretariatet over brug af aftalen, er imidlertid af ret begrænset omfang, og der kan på basis af de få data, der findes, kun tegnes et utydeligt billede af situationen. Derfor kan man vanskeligt få et overblik over anvendelse af aftalen fra centralt hold.

Med hensyn til kontrolmulighederne mærkes der en markant forskel til EU, bl.a. fordi Europa-Kommissionen i rollen som 'traktatens vogter' kan starte retssager ved Europa-Domstolen mod lande, der ikke overholder reglerne. WTO-sekretariatet kan ikke – på grund af WTOs position som en mellemstatslig organisation og på grund af GPAs karakter af en plurilateral aftale – spille en rolle, der bare ligner den, Kommissionen har. I stedet er løsning af konflikter om aftalen overladt til medlemslandene – enten i WTO eller i nationale organer - og til de procedurer, der i den forbindelse er fastsat i GPA.

Forventninger til revisionen

Ud over arbejdet i WTO-regie spiller samarbejdet mellem EU og USA en meget stor rolle for, hvor langt samarbejdet vil kunne gå. De to blokke stiller i stigende grad WTO-dagsordenen og på en række områder er aftaler mellem EU og USA de facto også blevet WTO-aftaler i og med at andre dele af verden har sluttet sig til transatlantiske aftaler.

Af særlig betydning er her den såkaldte Trans-Atlantic Business Dialogue (TABD), som er drivkraften i det atlantiske handelssamarbejde. Det er her virksomhedsledere fra begge sider arbejder med praktiske problemer – især problemer som kan give handelshindringer – og bl.a. diskuterer 'Government Procurement' Vedrørende GPA forventes 'Review and Improvement of Text' forhandlingerne afsluttet ultimo 1999. Forhandlingerne om dækningsområderne vil givetvis tage længere tid.

Medlemskredsen

Selv om det strengt taget ikke er i overensstemmelse med WTO-reglerne, er det blevet praksis, at lande, som ønsker at tilslutte sig WTO, også 'opfordres indgående' til at

underskrive GPA i forbindelse med medlemskabet. Letland har f.eks. accepteret denne forpligtelse, og det samme forventes at ske med Estland, Litauen, Bulgarien og Mongoliet. Det vides endnu ikke, om de store lande, som Rusland og Kina, vil acceptere samme forpligtelse, men forsøget på at få dem ind under GPA fra starten af WTO-medlemskabet vil blive gjort.

Et tegn på mulig interesse fra kinesisk side for at tilslutte sig aftalen er dog, at den kinesiske regering i marts 1999 meddelte, at den agter at søge en ny lovgivning om offentlige indkøb gennemført. Ifølge kinesiske medier indebærer dette, at alle former for offentlige indkøb af varer, tjenester samt bygge- og anlægsarbejder skal følge udbudsregler og at kontrakttildelingerne skal ske på basis af egentlige udbud. Der foreligger endnu ikke oplysninger om detaljerne i dette initiativ, ligesom det i øvrigt endnu ikke vides, i hvilket omfang Kina vil blive tilknyttet WTO på det generelle plan. I givet fald kunne man - for så vidt angår offentlige udbud - tænke sig, at Kina ville indføre en lovgivning på grundlag af UNCITRALs lovmodel af 1993 og 1994 henholdsvis om offentlige indkøb af varer, byggeri og tjenesteydelser. En sådan regulering kunne i givet fald være med til at bane vejen for en senere tilslutning til f.eks. GPA.

Man kunne endvidere forestille sig, at EU ville lægge pres på ansøgerlandene fra Øst- og Centraleuropa for at tilslutte sig GPA, bl.a. som en forberedelse på dette punkt til EU-medlemskab, men her er vurderingen fra WTO-sekretariatet, at selv om denne interesse er til stede, så er den begrænset i og med at disse lande gradvist skal indføre EUs udbudsregler som led i Europa-aftalerne. WTO vurderer derfor, at EU har større interesse i at få eksempelvis Kina og Saudi Arabien med under GPA.

Ansøgerlandene fra Øst- og Centraleuropa har indgået associeringsaftaler med EU på vejen mod fuldt medlemskab. Disse såkaldte Europa-aftaler er asymmetriske i den forstand, at de giver østlandene mere favorable betingelser end EU-landene. Således har virksomheder fra ansøgerlandene i en række tilfælde allerede i dag - som følge af Europa-aftalerne - adgang til EUs offentlige indkøbsmarkeder, mens det omvendte ikke gælder. Det er imidlertid klart, at alle ansøgerlandene inden et medlemskab kan træde i kraft skal have tilpasset deres nationale lovgivning til EUs *acquis communautaire*, inkl. udbudsreglerne, og det er næppe et område, hvor ansøgerlandene vil blive indrømmet hverken overgangsregler eller undtagelser.

Det skal også nævnes, at elleve lande (heriblandt Polen) og internationale organisationer har en rolle som observatører i forhold til GPA. Dette indebærer kun adgang til møder og dokumenter, men ingen forpligtelser i forhold til aftalen.

I forhold til den nuværende medlemskreds vil en eventuel udvidelse heraf primært kunne bestå af Kina og Rusland samt en række (udviklings)lande i Asien, Afrika og Latinamerika. Her er holdningen, at det ville være ønskeligt, at sådanne lande deltog, først og fremmest for gennem udbudsreglerne at sikre, at de får en bedre og mere effektiv administration, idet gode udbudsregler ses som et værn imod korrupsion og uhæderlig administration. Til gengæld har de pågældende landes interesse i at tilslutte sig aftalen været beskeden, og arbejdet med at indføre udbudsregler af internationalt tilsnit ses derfor ofte mere som et led i den tekniske bistand end som en direkte forberedelse til tilslutning til GPA.

Udvidelse af dækningen

Der er i øjeblikket ikke de helt store forventninger til udvidelse af det sektorvise dækningsområde for GPA i forbindelse med den igangværende revision. Der forventes derimod en indsats for at få ryddet op i de mange bilaterale undtagelser, som er kritiseret af WTO-medlemmer uden for GPA, da det ud over at stride mod det fundamentale MFN-princip også gør aftalen uigennemsigtig og uoverskuelig.

Det forventes også, at der i fremtiden bliver en bedre koordination af oplysninger om de medier, hvor meddelelse om udbud findes, og at disse oplysninger i højere grad samles – f.eks. på WTOs Internetside.

For så vidt angår spørgsmålet om forenkling af GPA kan det nævnes, at det er EU-Kommissionens opfattelse, at revisionen af GPA bl.a. bør resultere i en mere enkel aftale med en klarere – dvs. gerne en kortere og mere overskuelig – tekst: Kommissionen har – efter drøftelse med EU-medlemslandene - løbende forelagt konkrete ideer hertil i WTO-regie, jf. nedenfor.

Elektronisk tilbudsgivning

GPA forudsætter kommunikation af data ved hjælp af telex, telegrammer og fax. Den har ikke umiddelbart taget højde for anvendelse af informationsteknologi i forbindelse med indkøb. Med henblik på at sikre, at aftalen ikke kommer til at udgøre en hindring for anvendelse af moderne teknologi, er det forudsat, at der skal holdes regelmæssige konsultationer i WTOs komite vedrørende offentlige indkøb om udvikling i informationsteknologien og dens mulige anvendelse.

For de fleste af de lande, som er med under aftalen, skulle der ikke være de store vanskeligheder ved at øge den elektroniske tilbudsgivning. I EU er man i gang med at indføre den elektroniske tilbudsgivning via SIMAP-projektet, og i lande som USA, Norge og Singapore er den elektroniske tilbudsgivning vidt udbredt. Man kunne argumentere for, at øget anvendelse af elektronisk tilbudsgivning kunne gøre det vanskeligere for andre lande at slutte sig til aftalen. Problemet synes især stort for udviklingslandene, som i mange tilfælde i dag ikke har den nødvendige infrastruktur eller systematik i udbuddene.

Det skal bemærkes, at International Trade Centre (ITC, der 'ejes' af WTO og UNCTAD i fællesskab), aktivt søger at promovere indførelse af elektronisk tilbudsgivning i de udviklingslande, hvor organisationen arbejder.

Modelaftaler, de internationale organisationer og udviklingslandene

I UNCITRALs modellove fra 1993 og 1994, henholdsvis om offentlige indkøb af varer og byggeri samt om offentlige indkøb af varer, byggeri og tjenesteydelser, foreligger et forslag til den samlede retlige regulering af regelsæt for offentlige udbud. Disse regler er i deres grundsubstans de samme som de regler, der er grundlaget i GPA, og som de regler, der følges af store internationale organisationer som Verdensbanken og andre udviklingsbanker.

Der gøres i øjeblikket en betydelig indsats af ITC for indførelse af udbudsregler, baseret på UNCITRALs modellove fra 1993 og 1994 i udviklingslande, dels for at åbne markederne, dels for at give et bidrag til udvikling af en hæderlig og korruptionsfri offentlig administration. Nogle lande, som f.eks. Schweiz, har valgt at støtte dette arbejde finansielt i lande, som har en særlig interesse for schweiziske virksomheders leverancer.

ITC har udarbejdet et betydeligt materiale om anvendelse af UNCITRAL-modellen i udviklingslande (se bilag for eksempler).

Udviklingslandenes generelt ringe interesse i at tilslutte sig GPA synes at indicere, at denne gruppe af lande ikke mener, at de økonomiske argumenter, der blev nævnt i indledningen, gælder for dem. Det kan skyldes, at de mener, at en åbning af udbudsmarkederne primært vil betyde, at industrilandene får adgang til deres markeder, mens udviklingslandene ikke har tilsvarende muligheder for at levere til industrilandenes markeder for offentlige indkøb. Det skal bemærkes, at en del leverancer til udviklingslandene alligevel er omfattet af udbudsregler, idet alle leverancer finansieret af internationale donorer vil være omfattet af udbudsregler (der ofte ligner GPA-reglerne), hvilket indebærer, at modtagerlandene ikke har hånds- og halsret over valget af leverandører.

Udsigterne for Transparency-aftalen

WTOs ministerkonference besluttede i december 1996 at nedsætte en Working Group on Transparency in Government Procurement (WGTGP). Formålet var 'at gennemføre en studie i gennemsigtigheden i offentlig indkøbspraksis og at identificere elementer, der ville kunne indgå i en passende aftale'. En sådan aftale ville fastsætte de første multilaterale regler – om end af begrænset rækkevidde – om offentlige indkøb.

Med transparens menes i denne sammenhæng kun, at information om offentlige indkøbsregler og -praksis gøres umiddelbart tilgængelig for alle, som er interesserede heri. Det gælder selvsagt primært potentielle leverandører. Øget transparens kan dog også medvirke til at opmuntre til et mere åbent og konkurrencebetonet indkøb marked, og dermed indirekte medvirke til at øge markedsadgang. Spørgsmålet om øget anvendelse af informationsteknologi diskuteres i arbejdsgruppen, og det er oplagt, at elektroniske informationssystemer og indkøbsprocedurer kan medvirke til at øge transparensen og tilgængeligheden af informationer.

Alle WTOs medlemmer deltager i dette arbejde, og det gør naturligvis landegruppen noget mere heterogen end den gruppe, der har etableret GPA. Derfor er arbejds måden og ambitionerne anderledes. Det kan ikke forventes, at de detaljerede og præskriptive regler i GPA umiddelbart kan overføres til den brede landekreds, der udgør WTOs medlemmer, og der er således et godt stykke vej til opstilling af grundlaget for en ny generel (multilateral) aftale om gennemsigtighed i indkøb. Der udtrykkes dog fra forskellig side optimisme med henblik på at kunne nå til enighed om en aftale inden for en overskuelig tid. Men det understreges, at en aftale om gennemsigtighed i offentlige indkøb ikke (nødvendigvis) vil rumme elementer af markedsadgang. Specielt fastholder mange udviklingslande, at arbejdet med definition og applikation af transparens ikke har og heller ikke bør have sammenhæng med spørgsmålet om markedsadgang. Disse lande mener heller ikke, at arbejdsgruppen (WGTGP) overhovedet har mandat til at diskutere dette spørgsmål.

Det skal tilføjes, at det er Europa-Kommissionens vurdering, at en gennemførelse af en Transparency-aftale ikke vil medføre ændringer i EUs udbudsregler. Samtidig er det EUs politik at sikre, at der vil være overensstemmelse mellem en eventuel Transparency-aftale og GPA – også i den form, GPA måtte have efter afslutningen af forhandlingerne om en revision af denne aftale.

Det skal dog nævnes her, at man fra EUs side – uden at man på nuværende tidspunkt har lagt sig fast på formen herfor – på længere og mere overordnet sigt ønsker en multilateral aftale, som sikrer en liberalisering af de offentlige indkøbsmarkeder, jf. nedenfor under afsnit 3.

Udsigterne for GATS

GATT-overenskomsten og senere WTO-overenskomster har traditionelt beskæftiget sig med varehandel, men med den stigende betydning af tjenesteydelser i det internationale handelsbillede er det blevet utilfredsstillende, at handelen med vigtige tjenesteydelser som f.eks. telekommunikation og finansvirksomhed ikke er reguleret i særligt omfang i de internationale aftaler.

Der opstod derfor et ønske om – i begyndelsen især fra amerikansk side – at få tjenesteydelser med under de generelle internationale handelsaftaler. Dette ønske er stødt på modstand fra bl.a. udviklingslandene, som med deres gennemgående svage tjenestesektor ikke har set nogen interesse i at liberalisere området, fordi det ville give de udviklede lande fri adgang til deres markeder, uden at de kunne tilbyde noget til gengæld på de udviklede landes markeder.

I forbindelse med afslutningen af Uruguay-runden lykkedes det imidlertid alligevel at opnå enighed om den multilaterale GATS-aftale, som er en rammeaftale, der rummer en række generelle forpligtelser om handel med tjenesteydelser, herunder krav om gennemsigtighed og MFN-behandling.

Ud over de mere generelle principper bygger GATS på en såkaldt 'bottom-up' metode. Den indebærer, at der ikke er nogen forpligtelse for et WTO-medlem til at give markedsadgang og ligebehandling, før der er anmeldt konkrete forpligtelser – 'commitments' – i forhold til aftalen.

Handel med tjenesteydelser er ikke helt så entydig at definere som handel med fysiske varer. Derfor definerer GATS heller ikke begrebet 'handel med tjenester' som sådan. I stedet anføres fire forskellige måder, tjenester kan leveres på, nemlig:

- Grænseoverskridende levering af tjenester
- Forbrug af tjenester i udlandet
- Kommerciel tilstedeværelse i landet med henblik på levering
- Tilstedeværelse af personer med henblik på levering.

Leverancer af tjenesteydelser kompliceres naturligvis yderligere med den udbredelse af elektronisk handel, der er sket, og som forventes at ville ske i den kommende tid.

GATS undtager specifikt love og andre regler, der vedrører offentlige indkøb, fra MFN, national behandling og markedsadgang. I den forbindelse defineres offentlige indkøb som: *tjenester der indkøbes til brug for myndigheder uden tanke på videresalg med et kommercielt perspektiv*. Undtagelsen gælder dog ikke andre vigtige forhold i forbindelse med offentlige indkøb, herunder gennemsigtighed. Det indebærer f.eks., at et WTO-medlem er forpligtet til at gøre de andre WTO-medlemmer bekendt med eventuelle nationale regler vedrørende offentlige indkøb af tjenesteydelser, men det kan næppe fortolkes så langt som til, at de enkelte indkøb skal publiceres – endsize at der skal ske en annoncering inden for WTO-kredsen vedrørende sådanne indkøb. Under alle omstændigheder sker dette ikke, og det synes uantastet og derfor generelt accepteret.

Der er en yderligere vinkel til udbudsreglerne i forhandlingerne om GATS. Der findes således i GATS en opfordring til multilaterale forhandlinger om offentlige udbud af tjenesteydelser inden to år fra WTO-aftalens ikrafttræden.

Forhandlingerne synes imidlertid ikke at gøre fremskridt. Fra den til formålet nedsatte arbejdsgruppes side har man også understreget nødvendigheden af at koordinere indsatsen med arbejdet i arbejdsgruppen om Transparency in Government Procurement. I praksis betyder dette for mange lande, at der ikke er villighed til at bringe GATS-forhandlingerne fremad, før der foreligger en afklaring af, hvad transparensdrøftelserne ender med.

3. EUs overvejelser vedr. offentlige udbud i WTO

Generelt

Som nævnt foregår der allerede på nuværende tidspunkt en revision af GPA med henblik på en forbedring og forenkling af aftalen samt med henblik på at øge antallet af parter omfattet af aftalen. Sideløbende hermed føres der forhandlinger om fjernelse af diskriminerende foranstaltninger samt udvidelse af GPAs dæknings-/anvendelsesområde.

På denne baggrund har man inden for rammerne af GPA – i medfør af den automatiske 3-årige revisionsbestemmelse om yderligere forhandlinger med henblik på at forbedre aftalen og opnå den størst mulige udvidelse af dens anvendelsesområde - iværksat et "early review" af aftalen med det sigte at udforme GPA således, at den kan tiltrække flere deltagere. Det har i denne forbindelse navnlig været på tale at arbejde hen imod en simplificering af GPAs relativt komplicerede og tekniske bestemmelser om procedurer ved offentlige indkøb, som vel nok må siges først og fremmest at være tilpasset forholdene i højt udviklede lande.

Samtidig er der som nævnt ovenfor igangsat et arbejde vedrørende offentlige indkøb på to andre fronter i en bredere WTO- (og ikke alene GPA-) sammenhæng. Dette foregår dels i den såkaldte transparensarbejdsgruppe nedsat under WTO-ministerkonferencen i Singapore i december 1996, dels inden for rammerne af den internationale aftale om handel med tjenesteydelser (General Agreement on Trade in Services, GATS). Det er her forudsat, at der skal indledes drøftelser om offentlige indkøb af tjenesteydelser, jf. også ovenfor. Men GPA-reglerne omfatter som bekendt både varer og tjenesteydelser samt bygge- og anlægsarbejder.

Ændringsdrøftelserne inden for rammerne af GPA foregår på basis af diskussionsoplæg vedrørende forskellige aspekter af aftalen fra de interesserede deltagerlande. EU har i denne forbindelse spillet et central rolle og har løbende fremlagt nogle overordnede ideer til en forenkling og forbedring af GPA. Drøftelserne herom i EU foregår dels i art. 113-komiteen, dels i Kommissionens Rådgivende Udvalg for Offentlige Aftaler. EU har ligeledes og på lignende vis spillet en aktiv rolle i forbindelse med arbejdet i transparensarbejdsgruppen.

Samtidig foregår der i EU drøftelser om en revision af de interne fællesskabsregler. Disse drøftelser har en væsentlig længere tidshorisont, idet der forventes at gå op imod 3 år før holdningen til udvalgte emner er færdigbehandlet. Dette forhold – at det endnu ikke vides, hvorledes de fremtidige EU-regler på udvalgte områder vil blive udformet – har indtil videre krævet, at man ved drøftelserne af ændringer i GPA samtidig er opmærksom på, at man ikke herved på uønsket vis normerer indholdet af den kommende regelændring internt i EU. I samme forbindelse drøftes også spørgsmålet om adgangen til efter de eksisterende EU-regler at stille miljø- og arbejdsmiljøkrav samt krav om klausuler med socialt indhold i forbindelse med udbudsforretninger. Omfanget af adgangen hertil ligger ikke fast på nuværende tidspunkt.

Kommissionens dokument 22/99 af 18. januar 1999 til 113-komiteén ("New Round Preparation – Public Procurement"):

Kommissionen har den 18. januar 1999 fremlagt et udkast til forberedelse af de kommende WTO-forhandlinger vedrørende offentligt udbud for 113-komiteén til orientering og diskussion. Udkastet indeholder en grundig analyse af status quo samt Kommissionens bud på, hvilke fremtidige mål der bør søges opnået inden for offentligt udbud i WTO-regie.

Dokumentet er inddelt i en række afsnit:

- A: Baggrund,
- B: EU mål,
- C: Delvise skridt, der på kort og mellem sigt kan tages mod det langsigtede mål,
- D: Væsentlige nøglespørgsmål/resultater,
- E: Nøglespørgsmål vedrørende forberedelsen af 1999-ministerkonferencen,
- F: Nøgleskridt ved forberedelsen af 1999-ministerkonferencen,
- G: Resultater i en ny runde.

Relevante punkter fra de enkelte afsnit vil blive gengivet i det følgende.

A:

Under pkt. A anfører Kommissionen bl.a., at der ikke eksisterer multilaterale regler, som dækker offentligt udbud, idet GATT-overenskomstens art. III.8 og GATS art. XIII.I undtager offentligt udbud fra de mest basale WTO-principper. Derfor bliver mange regeringer ved med at fastholde udbudspolitikker og -fremgangsmåder, som er handelsforvridende.

Den plurilaterale aftale - GPA - dækker til dels dette tomrum, idet den bl.a. opstiller et sæt regler, som styrer medlemslandenes udbudsaktiviteter samt foreskriver markedsadgangsmuligheder. En række ikke uvæsentlige mangler ved aftalen er dog bl.a., at deltagelsen vedbliver med at være meget begrænset selv blandt udviklede lande, uden tegn på ændringer vedrørende dette forhold. Dette skyldes ifølge Kommissionen til dels, at den nuværende aftale opfattes som bureaukratisk og ufleksibel. Selv visse deltagerlande i GPA opfatter reglerne som for detaljerede og restriktive samt betvivler, at reglerne er eller bliver korrekt implementeret og håndhævet af andre medlemmer, især på regionalt (sub-føderalt) niveau.

Markedsadgangen i GPA er endvidere snarere betinget af reciprocitet end af MFN-princippet, og GPA kan derfor ikke ses som mere end en paraply dækkende en række bilaterale aftaler blandt deltagerlandene. Resultatet af dette fortsat sorte hul i de multilaterale WTO-regler er, at EU-virksomheder reelt ikke har adgang til markedsmuligheder i milliard-klassen, hverken hvad angår varer, tjenesteydelser eller bygge- og anlægsarbejder, og heller ikke har nogen lovformelig garanti herfor. Den bedste måde at gribe dette an på vil derfor være en fuldstændig markedsåbning på multilateral basis.

B:

EU har en væsentlig interesse i, at offentligt udbud i stigende grad indføres i WTO-disciplinerne samt i at få elimineret de nuværende undtagelser fra princippet om national behandling i GATT- og GATS-overenskomsterne.

Derfor er målet på længere sigt at opnå et enkelt sæt multilaterale regler om offentligt udbud baseret på principperne om national behandling og MFN. Dette kan endeligt nås:

- a) ved etableringen af en multilateral aftale om offentligt udbud og/eller
- b) ved at reducere anvendelsesområdet for de nuværende undtagelser vedrørende offentligt udbud i de generelle WTO-regler.

Inden for en kortere periode er det væsentligt, at de to igangværende multilaterale processer i WTO (Transparency og GATS) er sammenhængende og i overensstemmelse med hinanden, så det vil være muligt at føre dem sammen på baggrund af en ny runde for at opnå nævnte mål. Den tredje streng af den indbyggede dagsorden – GPA-reviewet – er i stigende grad ved at blive et separat emne. GPA vil næppe blive en multilateral aftale, bl.a. fordi ikke-medlemmer, med eller uden grund, vedbliver at betragte denne aftale med stor mistro.

C:

Processen mod målet – at opnå multilaterale regler – vil blive langvarig og trinvis, men ikke desto mindre bør og skal en række skridt tages i forbindelse med forberedelsen af en ny runde.

- Transparency-arbejdet med mandat i Singapore-konferencen bør fuldføres i 1999. Dette kan evt. resultere i en formel aftale, hvis resultater bør kunne anvendes på såvel varer som tjenesteydelser, og
- GATS-arbejdet bør fortsættes og fremskridt bør søges opnået i 1999,
- GATS- og Transparency-arbejdet bør sammenlægges på et tidspunkt, så en enkelt gruppe beskæftiger sig med multilaterale udbudsretlige emner dækkende både varer- og tjenesteydelsesvinkler.

D:

Transparens-arbejdsgruppen er begyndt at gøre gode fremskridt, og visse nøglemedlemmer nævner muligheden for at færdiggøre en formel transparensaftale i 1999. Det er dog væsentligt at mærke sig, at hvad der opnås enighed om i transparensammenhæng vedrørende horisontale emner (definition, anvendelses- og dækningsområde), og anvendelse af WTOs tvistbilægningssystem, vil danne præcedens for det fremtidige arbejde, herunder i GATS-sammenhængen. Dette taler for at anvende den fornødne tid til at opnå det bedste mulige resultat i stedet for at

stræbe efter hurtige løsninger, herunder om emner af særskilt interesse for EU, i håbet om at man kan genoptage emnet på et senere tidspunkt.

Det er væsentligt at notere sig, at der kan gøres meget i WTO, hvad enten det er i GPA eller i fremtidige multilaterale forhandlinger, ved at arbejde hen imod en løsning baseret på principper i lighed med den måde, hvorpå andre WTO-aftaler er blevet udformet og uden at det vil være nødvendigt at ændre EU-reglerne på området. Kunststykket vil være at afbalancere opretholdelsen af klare regler i EU med behovet for fleksible men meningsfulde WTO-regler, som tager hensyn til forskelligheden af udbudssystemer verden over.

E:

Hvis der skal ske fremskridt inden for transparensarbejdet er det nødvendigt med omhyggelig/forsigtig håndtering og timing, idet et for "hårdt skub" for tidligt i en ny runde vil kunne forstærke den nervøsitet, der allerede nu spores hos flere udviklingslande ved udsigten til – formentlig – at blive tvunget til at åbne sine offentlige indkøbsmarkeder for udenlandske konkurrenter.

EU vil derfor blive nødt til at overbevise andre – især udviklingslandene – om, at offentligt udbud bør sættes på dagsordenen for den kommende runde. I denne sammenhæng er det vigtigt, at EU accepterer – og gør klart – at introduktionen af markedsadgangsforpligtelser vil skulle indføres gradvist over tid, som det traditionelt har været fremgangsmåden på andre WTO-områder.

F:

I 1999 bør transparensarbejdet søges fuldført efter det ovenfor nævnte "træk", ligesom fremskridt i GATS-arbejdet bør søges, for at der kan opretholdes en høj og sikker profil for offentligt udbud i optakten til ministerkonferencen.

Alle GPA-medlemmer går ind for, at der skal gælde multilaterale bestemmelser vedrørende offentligt udbud, men de enkelte medlemmers mål er ikke nødvendigvis de samme som EUs mål (USA og Canada har få om nogen ambitioner vedrørende offentligt udbud på sub-føderalt niveau, og USA vil sandsynligvis søge at opretholde sine begunstigelser og undtagelser). Nylige tegn fra flere kanter tyder på en formindsket interesse i USA for en ny runde vedrørende offentligt udbud. Tæt koordination med andre nøgle-partnere – især Schweiz, Norge, Hong Kong og Singapore – men også med ikke-GPA-medlemmer, der er kendt som positive over for sådant arbejde i en ny runde, så som Australien, bør holde det fortsatte arbejde på sporet.

G:

Mens den endelige "ramme" for et enkelt sæt multilaterale regler om offentligt udbud, som måtte fremkomme i forbindelse med en ny runde, ikke er afgørende på dette tidspunkt, er indholdet det derimod. I enhver endelig aftale må EU presse på for et højt niveau af gennemsigtighed i offentligt udbud (som bygger på resultaterne af transparensarbejdsgruppens arbejde) sammenkoblet med et program for markedsåbning. Markedsåbning kunne ske ved en forhandlet tidsplan om a) at fjerne

undtagelser fra principperne om ikke-diskrimination (national behandling og MFN) og b) at udvide dækningen, formentlig ved at begynde på centralt niveau (central government procurement). I tillæg er det afgørende, at dette er sammenkoblet med effektive regler for at sikre håndhævelse heraf.

EUs initiativer vedrørende GPA

Ændringsdrøftelserne inden for rammerne af GPA er som ovenfor nævnt foregået på basis af diskussionsoplæg vedrørende forskellige aspekter af aftalen fra de interesserede deltagerlande. EU har i denne forbindelse i WTO-regie fremlagt en række dokumenter med ideer til en forenkling og forbedring af GPA (bl.a. vedrørende håndhævelses- og overvågningsmekanismer og statistiske indberetninger). Fremlæggelsen er sket efter drøftelser i Kommissionens Rådgivende Udvalg for Offentlige Aftaler, ligesom Konkurrencestyrelsen fra dansk side har udtalt sig om en række initiativer fra Europa-Kommissionens side vedrørende ”procurement methods og -procedures”.

4. Danske virksomheders problemer og erfaringer med GPA

I forbindelse med en vurdering af betydningen af GPA for dansk eksport, kan det være værd at sætte eksporten til de enkelte GPA-lande i et statistisk perspektiv.

Det er ikke muligt statistisk at belyse, i hvor høj grad dansk eksport går til den offentlige sektor i de enkelte eksportlande, endsige at belyse, hvorvidt den danske eksport er blevet mulig, fordi de pågældende ordrer er omfattet af internationale aftaler om offentlige indkøb.

Hvis man imidlertid går ud fra, at forholdet mellem eksporten generelt og salget under indkøbsregler til den offentlige sektor ikke varierer for meget fra land til land, kan man gennem den almindelige eksportstatistik få et billede af betydningen af de forskellige dele af verden.

Det kan først og fremmest slås fast, at største delen af dansk eksport er afhængig af EU og dermed af EU regler for markedsadgang m.v. I 1996 gik 65,6 pct. af al dansk eksport til EU-lande. Lægges man dertil eksporten til Norge, som er dækket af EU-regler på lige fod med EU-landene på langt de fleste områder, kommer man op på 71,6 pct.

Derfor må man også gå ud fra, at størstedelen af den danske udbudseksport er dækket ind af EU-reglerne, og det kan måske forklare, hvorfor interessen for disse regler er så meget større end interessen for GPA-reglerne, som tilfældet er.

Den danske eksport fordelte sig således på GPA-landene i 1996:

Land	Pct. af samlet dansk eksport
EU-lande	65,5 pct.
Norge	6,1 pct.
EØS-lande i alt	71,6 pct.
USA	4,1 pct.
Canada	0,4 pct.
Hong Kong	0,6 pct.
Japan	3,2 pct.
Korea	1,0 pct.
Singapore	0,4 pct.
Schweiz og Liechtenstein	1,5 pct.
Israel	0,3 pct.
GPA-lande i alt	83,1 pct.

Kilde: Danmarks Statistik.

Den danske handelsstatistik fortæller naturligvis ikke hele historien. Der sælges også i en række lande via danske datterselskaber, men om man vil anse dette for at være en

egentlig dansk eksport, som nyder godt af GPA-reglerne, eller om man vil anse det for at være en lokal forretning, er lidt af en smagssag, men i denne rapportes sammenhæng er salg via lokale datterselskaber ikke at anse som dansk udbudseksport.

Der findes en statistik på baggrund af den 'gamle' GPA, som giver et bud på sammenhængen mellem BNP og værdien af de offentlige indkøb, der blev foretaget efter GPA-reglerne, og dermed over disses tærskelværdier. Tallene er fra 1992 og derfor desværre langt fra aktuelle, men de giver formentlig fortsat et rimeligt godt bud på denne sammenhæng.

Land	Udbudskontrakter i pct. af BNP
Østrig	0,23
Belgien	0,19
Canada	0,49
Danmark	1,33
Finland	0,89
Frankrig	0,25
Tyskland	0,11
Irland	0,48
Israel	0,10
Italien	0,16
Japan	0,26
Luxembourg	0,27
Holland	0,40
Norge	0,69
Singapore	0,07
Sverige	0,53
Schweiz	0,28
UK	0,64
USA	0,49

Kilde: Law and Policy in Public Purchasing, Ann Arbor 1997.

Som nævnt vedrører tallene et enkelt år (1992), og man skal derfor være forsigtig med at drage for vidtgående konklusioner af tallene. Et enkelte, eller nogle få store, udbud i dette år kan påvirke tallene, men det er nok alligevel værd at bemærke, at tallet for Danmark er markant større end for andre lande.

For at bedømme åbenheden i de forskellige land, kan man også se på en statistik (for årene 1990-92), som viser, hvor stor en del af samtlige udbud over GPA-tærskelværdierne, der gik til indenlandske firmaer. Det skal bemærkes, at man for de daværende 12 EU-lande opgør kontrakter til virksomheder inden for EU som indenlandske. Statistikkerne for EU-landene er opgjort på denne måde, og det er ikke muligt at se i hvilket omfang, der har været tale om nationale leverandører eller om leverandører fra andre EU-lande.

På denne baggrund er der derfor ikke underligt, at de fleste af de 12 daværende EU-lande har en meget høj andel af indenlandske leverandører, men der er alligevel nogle markante forskelle. Tre mindre EU-lande, nemlig Danmark, Holland og Irland, har

hentet mellem ca. 15 og 20 pct. af leverancerne uden for EU, mens øvrige EU-lande stort set kun har leverandører fra EU-lande – herunder formentlig i høj grad fra deres egne lande. Helt ekstrem er situationen i Belgien, hvor statistikkerne viser, at ikke en eneste ordre under GPA er gået til virksomheder uden for EU. Men de store EU-lande, Tyskland, Storbritannien, Frankrig og Italien ligger også tæt på 100 pct. EU-leverancer.

Land	Udbudskontrakter til indenlandske firmaer
Østrig	41,5
Belgien	100,0
Canada	81,0
Danmark	71,9
Finland	69,1
Frankrig	96,5
Tyskland	99,1
Irland	81,2
Israel	25,6
Italien	96,7
Japan	85,1
Luxembourg	96,6
Holland	79,6
Norge	28,8
Singapore	65,1
Sverige	41,3
Schweiz	45,5
UK	99,5
USA	91,7
Hong Kong	2,5

Kilde: Law and Policy in Public Purchasing, Ann Arbor 1997.

Der er ikke nogen helt fast tendens i disse tal. Dog synes der generelt at være tale om mere lukkede systemer i de større lande, og så er der lande, som er særdeles åbne: Uden for EU i udpræget grad Hong Kong, men også Israel og Norge har en meget lav egenandel i leverancerne.

Kontakt til virksomheder

For at belyse danske virksomheders kendskab til WTO-reglerne om offentlige indkøb og indhente eventuelle synspunkter på reglerne og deres måde at fungerer på, har der været foretaget dels en telefonisk undersøgelse af et større antal virksomheder og dels en række interviews med et antal danske erhvervsvirksomheder og organisationer. Formålet har været at tilvejebringe et input til en dansk holdning til revisionen af GPA-aftalen fra de virksomheder, som arbejder med denne i praksis.

Der er ligeledes rettet henvendelse til en række danske ambassader og generalkonsulater i GPA-lande med henblik på at få en vurdering af danske virksomheders aktiviteter på disse udbudsmarkeder.

Det kan konkluderes, at kun meget få danske virksomheder kender og bruger reglerne i GPA, men at et større antal danske virksomheder forventer at orientere sig mere mod eksport til den offentlige sektor indenfor GPA-landene. I dette lys er det vigtigste måske heller ikke i første omgang, at virksomhederne kender reglerne, men at aftalen findes, og at den kan medvirke til at åbne markederne.

Der ville alligevel være fordele ved, at virksomhederne kender deres rettigheder og muligheder – og at de kender udbudsgivernes forpligtigelser samt klagesystemerne. Dette vil kunne medvirke til at få danske virksomheder til at fokusere mere på mulighederne og medvirke til at få reglerne til at virke bedre.

På grund af virksomheders forholdsvis beskedne kendskab til reglerne, er de danske ønsker til en revision af aftalen endvidere blevet suppleret af de relevante organisationers ønsker, og de 'common sense' holdninger, som på virksomhedernes vegne kan formuleres vedrørende mere gennemskuelige regler og bedre information om reglerne og deres anvendelse i praksis.

Telefon-undersøgelse

I alt 2314 danske virksomheder har oplyst, at de har eksport (privat eller offentlig) til USA, Canada, Japan, Hong Kong, Singapore, Korea, eller Israel. Af disse er 1179 blevet udvalgt og interviewet. Dette betyder, at omkring halvdelen af alle danske virksomheder, som er aktive på disse eksportmarkeder har været kontaktet. Med en så stor stikprøve ud af den totale population bliver konklusionerne i denne undersøgelse forholdsvis valide.

Af de 1179 har eller overvejer 17% af virksomhederne, 202 virksomheder, salg til de offentlige myndigheder i de nævnte lande. Forsigtigt sat betyder dette, at omkring 400 danske virksomheder i alt (populationen er dobbelt så stor som stikprøven) er aktive eller forventer at være aktive med salg til den offentlige sektor i GPA-landene.

Af de 202 virksomheder stammer mere end halvdelen af virksomheder fra fire brancher: jern- og metalbranchen, møbelindustri, IT/elektronik og finansiering og forretningsservice.

Ser man på virksomhedsstørrelsen fremgår det af nedenstående, at 63% af de virksomheder, som er aktive med salg til den offentlige sektor i disse lande, har under 100 ansatte. Selvom den danske erhvervsstruktur er domineret af mange små og mellemstore virksomheder, er det alligevel overraskende, at disse virksomheder kan begå sig på dette specialiserede marked.

Virksomhedsstørrelse	Andel af stikprøven
0-19 ansatte	23%
20-49 ansatte	23%
50-99 ansatte	17%
100-199 ansatte	10%
200-499 ansatte	15%
500-+	10%

Antal virksomheder	202
--------------------	-----

Med hensyn til disse virksomheders salgskanaler ved eksport til de nævnte lande, svarer 45% af virksomhederne, at de sælger gennem agenter, 33% sælger direkte til den offentlige sektor i det pågældende land, mens 24% sælger gennem datterselskab. Virksomhederne har typisk afgivet flere svar på dette spørgsmål. Kendskabet til udbudene stammer også typisk fra agenter (34%), henvendelse fra kunder (16%), fra forhandlere (10%) eller fra søster/datterselskaber (8%). Internet anvendes kun i begrænset omfang.

De 202 virksomheder har følgende kendskab til GPA-reglerne:

Kendskab til GPA-reglerne	Andel af stikprøven
Kender til GPA-reglerne	28%
Kender ikke GPA-reglerne	64%
Ved ikke	8%
Antal virksomheder	202

Af de 202 virksomheder har således 28%, i alt 57 virksomheder, kendskab til GPA-reglerne. Af disse 57 virksomheder har følgende rent faktisk afgivet tilbud under reglerne:

Tilbudsafgivelse under GPA	Andel af stikprøven
Afgivet tilbud under GPA	28%
Ikke afgivet tilbud under GPA	60%
Ved ikke	12%
Antal virksomheder	57

Der er således kun 28% af de 57 virksomheder, svarende til 16 virksomheder, der har afgivet tilbud under GPA-reglerne. Størstedelen af de resterende 202 virksomheder afgiver tilbud (eller overvejer at give tilbud) til den offentlige sektor i de pågældende lande udenom GPA-reglerne.

De 16 virksomheder, der har erfaringer med GPA-reglerne, har oplevet erfaringerne således:

Erfaringer med GPA	Andel af stikprøven
Positive erfaringer	19%
Reglerne er OK	13%
Neutrale	13%
Regler for omstændige	6%
Ingen erfaringer	56%
Antal virksomheder	16

På trods af det sparsomme antal virksomheder med erfaringer med GPA-reglerne, er danske virksomheders erfaringer med disse generelt gode. Sammenlignet med erfaringerne omkring EU-udbud tyder talmaterialet op, at der er betydeligt færre

barrierer ved GPA-udbud, hvilket antageligt hænger sammen med, at de virksomheder, der eksporterer til den offentlige sektor i GPA-landene, er relativt erfarne eksportører.

De virksomheder, der har deltaget eller overvejer eksport til den offentlige sektor i GPA-landene, er blevet spurgt, om de forventer at orientere sig mere mod dette marked fremover. Hele 43% af 202 virksomheder forventer at orientere sig mere mod eksport til den offentlige sektor i disse lande. Dette udtrykker, at selv om virksomhederne ikke deltager i denne type udbudsforretninger idag, er de øjensynlig opmærksomme på de forretningsmæssige muligheder, som salg til GPA-landene indebærer.

Kun 2 virksomheder, der deltager i offentlige udbud i GPA-landene, har erfaring med at klage over udbudene, hvilket ikke er et tilstrækkeligt grundlag til at drage konklusioner på.

De virksomheder, der deltager eller overvejer at deltage i offentlige udbud til GPA-landene, ser følgende barrierer:

Type barriere	Andel af stikprøven
Bureaukrati	12%
Manglende information/indsigt	9%
Økonomi/prisniveau	7%
Favorisering af lokale producenter	7%
Sproglige kulturelle	4%
Afstand/leveringstid	3%
Danske virksomhed for lille	3%
Andet	6%
Ingen	14%
Ved ikke	40%
Antal virksomheder	202

De samme virksomheder er blevet spurgt om, hvilke forhold, der kunne forbedre danske virksomheders muligheder for deltagelse i den nævnte type udbud:

Forhold, der kan styrke virksomhedernes deltagelse i GPA-udbud	Andel af stikprøven
Større klarhed i reglerne	15%
Anvendelse af elektroniske udbud	11%
Større anvendelse af grønne klausuler	9%
Mere information	8%
Flere lande omfattet af aftalen	5%
Udformning og anvendelse af klageregler	3%
Andet	7%
Ingen mening	7%
Ved ikke	58%

Antal virksomheder	202
--------------------	-----

Interviewundersøgelse

For at supplere telefon-undersøgelsen med mere kvalitative vurderinger, er der rettet henvendelse til 46 danske virksomheder (for en nærmere oversigt over virksomhederne, se bilagene til rapporten). Størstedelen er blevet foreslået af Dansk Industri.

Af disse 46 virksomheder oplyste ti, at de ikke bød på de pågældende markeder (de bød primært i EU eller eksporterede slet ikke) og syv oplyste, at de aldrig bød på offentlige udbud, men var aktive på markederne. Eksempelvis oplyste én virksomhed, at den aldrig direkte havde budt på en offentlig kontrakt, men hyppigt var med som underleverandør på oversøiske markeder gennem et netværk af agenter.

14 virksomheder oplyste, at offentlige udbud blev varetaget af datterselskaber eller lokale agenter, hvorfor de kun havde perifert kendskab til området, da det danske moderselskab udelukkende ville blive involveret, såfremt det skulle sikre, at der er tilstrækkeligt lager/produktion til store leverancer. Datterselskaberne var i flere tilfælde så "lokale", at de udenlandske offentlige myndigheder næppe ville være opmærksomme på at et tilbud kom fra en danskejet virksomhed. Dette var typisk tilfældet såfremt datterselskabet var resultat af et køb af en eksisterende lokal virksomhed.

To af de virksomheder, der var med i undersøgelsen, sendte vores henvendelse videre til oversøiske datterselskaber, men der kom ikke respons.

Mindre virksomheder benytter sig typiske af agenter / importører, mens de større virksomheder har oprettet datterselskaber eller er del af et multinationalt selskab. Med mindre den danske afdeling var yderst specialiseret i forhold til de øvrige afdelinger i et multinationalt selskab, ville den danske afdeling ikke blive involveret i forbindelse med offentlige udbud.

En virksomhed, som desværre ikke ville interviewes nærmere, bød på og vandt kontrakter hos offentlige nødhjælpsorganisationer i enkelte af de relevante lande, hvor destinationen for leverancen var et tredje land (eks. hospitalsudstyr til Afrika leveret gennem amerikanske nødhjælpsorganisationer).

Tre virksomheder beklagede, at de p.t. ikke havde tid til et møde eller skriftligt besvare evt. spørgsmål. To virksomheder svarede trods vedvarende opfølgning ikke på om de bød på offentlige kontrakter i de på gældende lande.

Af de resterende ni virksomheder blev der foretaget længere interview per telefon af varierende varighed med tre virksomheder og aftalt møde med fem, hvoraf et møde blev aflyst af virksomheden, men virksomheden besvarede senere spørgsmålene skriftligt.

Udover virksomhederne har det været rettet henvendelse til flere erhvervsorganisationer.

Fra Dansk Industri er der udover bistand til at finde virksomheder, som kunne interviewes vedrørende GPA-reglerne, fremsat en række synspunkter på revisionen af aftalen. Der er således et ønske om en udvidelse af den kreds af lande, som er omfattet af aftalen, specielt med Kina, der ses som det store, nye marked – også for offentlige indkøb. Desuden ønsker DI mere vægt på elektroniske udbudsforretninger og – information i fremtiden, ligesom man gerne ser en mere entydig annoncering af udbuddene.

Det Danske Handelskammer oplyste, at eftersom det var vanskeligt at få virksomheder til at byde på kontrakter uden for Danmark, koncentrerer de sig om offentlige udbud i Sverige og ikke på oversøiske markeder.

Fra rådgiverorganisationer har Praktiserende Arkitekters Råd gjort opmærksom på, at det mest interessante udbudsområde er det danske, at EU-området har nogen interesse for de danske arkitekter, men at foreningen ikke havde nogen speciel interesse i eller synspunkter på GPA-landene uden for EU. Får danske arkitekter ordrer uden for EU, vil det tilsyneladende næsten altid være i forbindelse med internationale arkitektkonkurrencer, der under alle omstændigheder ville blive udbudt – GPA-regler eller ej.

Fra Foreningen af Rådgivende Ingeniører (FRI) blev det slået fast, at *internationale aftaler om udbud af offentlige indkøb blandt alle virksomheder i alle de lande, som er omfattet af aftalerne, har kun en begrænset direkte forretningsmæssig betydning for producenter af tjenesteydelser uden for udbudslandet*. Arkitektbyråder og rådgivende ingeniørtjenester leveres kun grænseoverskridende, når dette sker efter et udtrykkeligt ønske fra udbudsgiver om internationale konkurrence, siger FRI. Foreningen siger også, at hvis en dansk tjenesteyder er interesseret i et givet nationalt marked, vil det blive betjent via etableringer på dette marked.

FRI siger dog også, at de internationale aftaler har stor betydning for udbuddene, men især på grund af den betydning, de har på de nationale markeder. Da GPA for Danmarks vedkommende er implementeret via EU-reglerne, vil betydningen af de internationale aftaler på det danske marked i realiteten være bestemt af EU-reglerne og ikke af GPA.

Foreningen understreger, at den nuværende GPA medførte en række uønskede ændringer af EU-direktiverne om offentlige udbud. For det første gjorde GPA EUs grænseværdier komplicerede (fordi de er 'oversat' fra SDR til Euro), og samtidig gjorde begrænsningerne i GPAs dækning udbudsmarkedet mere uoverskueligt.

Desuden peger FRI på, at indførelsen af bestemmelser vedrørende 'teknisk dialog' (se oven for i rapporten) har været med til at give store problemer i EU-direktiverne og dermed i praksis.

FRI konkluderer derfor, at der i forbindelse med GPA bør holdes skarpt øje med konsekvenserne for EU-reglerne, og at ændringer i GPA ikke må føre til forringelser i EUs udbudsdirektiver. Endelig siger foreningen, at der for tjenesteydelser bør ske en opjustering af tærskelværdierne. Justeringen bør medføre en fordobling af tærskelværdierne for tjenesteydelser – til ca. Euro 400.000. Årsagen er, at

omkostningerne ved at udarbejde tilbud er så store, at det ved mindre udbud simpelthen ikke er realistisk at forvente, at nogen vil gøre sig ulejlighed med at byde i andre lande.

Resultater af interview-undersøgelsen

Overordnet bekræftede undersøgelsen, at kendskab til GPA er begrænset. Selv de virksomheder, som var aktive på oversøiske markeder i forbindelse med offentlige udbud eller, som i et tilfælde, hvor virksomheden tilmed udelukkende solgte til offentlige myndigheder, kendte ikke til aftalen.

Hvordan virksomhederne så mulighederne var delte. Blandt det flertal af virksomheder, som enten aldrig havde forsøgt at byde eller vundet et udbud, var der en klar skeptisk holdning. Det var "spild af tid" at forsøge og kontrakttildelingen "altid var givet på forhånd", eksempelvis gennem præcise specifikationer, der favoriserer bestemte leverandører (både nationale, men også udenlandske leverandører, jf. nedenfor vedrørende japanske virksomheders dominans). En virksomhed havde forsøgt at få Udenrigsministeriets assistance i forbindelse med udbud, hvilket "altid har vist sig at være forgæves". Vedkommende virksomhed havde desuden en enkelt gang bedt en eksportstipendiat i Canada om assistance til en tender, som "blev tabt, da stipendiaten ikke havde læst udbudsmaterialet ordentligt". Virksomheden havde ikke siden budt på offentlige kontrakter.

Kendetegnende for de virksomheder, som var aktive i forbindelse med offentlige udbud på oversøiske markeder, var en mere pragmatisk holdning – man kendte spillets uskrevne regler og spillede med. Dette ses eksempelvis ved spørgsmålet om hvordan man får succes på området: Man skal kende til kommende udbud og påvirke myndigheden inden udbudsmaterialet udarbejdes. En virksomhed, aktiv i USA, Canada, Schweiz, Polen og Kina, oplyste således at den forsøgte, ofte med held, at sørge for "at vinde inden leverancen kommer i udbud". Alle virksomheder understregede i den forbindelse betydningen af at have lokal tilstedeværelse, enten gennem datterselskab, agent eller konsulent, som sørger for kendskab til udbud inden de offentliggøres formelt.

Flere virksomheder peger på bureaukratiet, som en væsentlig barrierer. Ligesom EU-udbudsreglerne blandt mange danske virksomheder har fået et ry, som værende meget komplicerede, er dette også gældende for GPA-reglerne.

Mht. udbudsproceduren kendte kun få af virksomhederne til de forskellige former i GPA, men mange mente, at det normalt drejede sig om en måneds frist rent formelt. Dette var dog ret underordnet, da det ofte er for sent. Man skal kende til et udbud inden det finder sted, jf. ovenstående.

Tekniske standarder og specifikationer

Med hensyn til specifikationer i udbudsmaterialet så virksomhederne de største muligheder for diskrimination. Specifikationerne er ofte særdeles besynderlige. Eksempelvis i Fjernøsten var japanske virksomheder så veletablerede og havde opbygget et nært samarbejde med regionens myndigheder, at specifikationerne udelukkede alle andre virksomheder end de japanske.

De danske virksomheder understregede, at det var vigtigt at have al dokumentation og certifikater klar og sørge for løbende at opdatere oplysningerne skulle der ske den mindste ændring i produktet. Man må følge med i "hvad, der tales om i verden", så man er klar med de rette dokumentationer – man må eksempelvis ikke lade sig overraske over krav om miljøcertifikater og lignende. Denne ofte omfattende dokumentation skal foreligge på de lokale sprog.

Flere virksomheder peger på manglende information og manglende indsigt, som en væsentlige barriere for deltagelse i offentlige udbud i GPA-landene.

Mange markeder i Fjernøsten er åbne på papiret, men der er "formidable barrierer" i realiteten. Singapore er blevet nævnt som et godt eksempel herpå. Landet virker umiddelbart åbent, men lokale karteller – som de offentlige myndigheder kender til og ofte ønsker – er de eneste, der kan vinde offentlige kontrakter, hævdes det. Virksomhederne understreger derfor vigtigheden af at finde lokale partnere eller købe lokale virksomheder, men fastholde deres nationale identitet.

Klagesystemerne

Mht. at klage over en uretfærdig eller uklar behandling havde kun få virksomheder erfaringer med at klage. Flere virksomheder havde "været tæt på" at klage, men ingen ville "ødelægge et godt forhold til kunden, det er svært at anklage kunden". Det er den samme barriere, "black-listning", der ses som en begrundelse for ikke at klage i relation til EU-udbud.

Alle virksomheder mente, at *en mere uformel klageprocedure inden tildelingen af kontrakter givetvis ville være ønskværdig*. En virksomhed var eksempelvis blevet groft diskrimineret i Fjernøsten, men havde været i stand til at vinde alle efterfølgende udbud gennem et vedholdende pres på relevante ministerier og ved Udenrigsministeriets hjælp. Samme virksomhed understregede naturligt nok, at det kræver en "stor investering og tålmodighed", at etablere sig på denne måde. Kun én virksomhed forsøger regelmæssigt at få begrundelse for afslag, men "får det sjældent".

Mht. hjælp fra offentlige myndigheder var der nogen ros til Udenrigsministeriet, da det ofte var behjælpelig med certifikater og at finde rette dokumentation. De lokale danske ambassader var noget mere vanskelige at arbejde med, da de "skal finde en balance mellem at hjælpe den danske virksomhed og fastholde gode relationer til myndighederne i det land ambassaden befinder sig". Fra organisatorisk side nævner virksomhederne udelukkende DI's seminarer og klubber, hvor der er et stort erfaringsgrundlag, som kan og bliver benyttet.

Konklusion mht. interview af danske virksomheder.

Det kan være noget vanskeligt at konkludere ud fra de kvalitative svar, virksomhederne har givet, men det synes at være et gennemgående træk, at lokal tilstedeværelse, en pragmatisk holdning til udbudsprocedurerne og de offentlige myndigheder samt langsigtede investeringer og strategier er nødvendigt for at få succes på området. En opstramning af de formelle klageprocedurer synes ikke at være

særligt ønsket, men derimod synes etableringen af et uformelt klagesystem, der kan hjælpe virksomhederne med vanskeligheder samtidig med, at de kommercielle muligheder bevares, at være langt mere ønsket af virksomhederne.

5. Sammenfatning af erhvervsønsker i forbindelse med den kommende revision af GPA.

På baggrund af de input, der er givet til denne undersøgelse fra virksomheder, fra brancheorganisationer og fra Følgegruppen for EU-udbud, kan en række synspunkter identificeres som vigtige i forbindelse med en revision af GPA.

Der er først og fremmest brug for en forbedring og forenkling af GPA-reglerne, så de bliver mere overskuelige og anvendelige. Hertil kommer, at GPA bygger på en række grundlæggende principper om offentlige indkøb, herunder om ligebehandling, gennemsigtighed og ikke-diskrimination m.v. Disse principper er i sig selv klare nok, men bør udtrykkes i selve aftaleteksten.

Endvidere giver aftalen et forvirrende billede på grund af de mange bilaterale undtagelser vedrørende markedsadgang i GPA. De kan næppe helt fjernes, da undtagelserne typisk er udtryk for manglende gensidighed fra den anden parts side på bilateralt plan, men en kritisk gennemgang af undtagelserne, eventuelt inkl. deres økonomiske betydning, kan overvejes med henblik på at skabe forenklinger. Det vil være naturligt fra dansk side specielt at satse på en forenkling i forhold til de undtagelser, der vedrører Danmark (eller EU som blok) med henblik på at skabe større klarhed og – ikke mindst – større markedsadgang.

Der er ligeledes et meget stort behov for at få skabt en mere effektiv form for meddelelser om udbuddene, så de bliver overskuelige for virksomhederne. Det synes naturligt at bygge på de tanker om elektronisk meddelelse af udbud, der foregår i EU.

Der er fra erhvervsorganisationer udtrykt ønske om en øget anvendelse af elektroniske udbud og elektronisk tilbudsgivning. De nye elektroniske muligheder, og især Internettets store udbredelse, gør det naturligt at benytte sig af de muligheder, som ligger der. Disse muligheder var langt mindre kendte og fremtrædende, da den nugældende aftale blev forhandlet på plads. Samtidig kan det bemærkes, at med den medlemskreds der findes i GPA nu, og som kan forventes i tiden fremover, skulle det ikke være vanskeligt at benytte de elektroniske former i stort omfang, ligesom det næppe umiddelbart vil betyde nogen konkurrenceforvridning mellem landene.

Der er fra erhvervsside rejst ønske om en udvidelse af medlemskredsen. Dette punkt er ikke til forhandling i forbindelse med selve revisionen, men er dog et helt overordnet mål i sig selv. Det er som nævnt ovenfor gældende WTO-politik, at nye medlemslande automatisk opfordres til at tilslutte sig GPA. Denne fremgangsmåde – at betragte medlemskab af WTO og GPA i sammenhæng – bør fortsættes og har allerede i et vist omfang indebåret, at visse nye medlemmer i WTO har forpligtet sig til at tiltræde GPA. Om fremgangsmåden vil blive generelt anerkendt, kan kun fremtiden vise. Blandt de lande, der kunne komme på tale som nye WTO-medlemmer, er det især Kina og i mindre grad Rusland, der står på den danske ønskeliste, men disse lande har hidtil været afvisende over for at knytte udbudsretlige forpligtelser til et medlemskab af WTO. De østeuropæiske lande vil for de flestes vedkommende i løbet af kort tid komme under EUs regler, enten fordi de bliver medlemmer af EU, eller fordi de er forpligtet til at indføre reglerne i større eller mindre omfang under Europa-aftalerne.

Den ultimative løsning på dette problem samt det helt centrale ønske om øget markedsadgang inden for offentlige indkøb vil være at indgå en generel, multilateral aftale (dækkende alle WTO-medlemmerne), om offentlige indkøb – og især vedrørende markedsadgang i forbindelse med de offentlige indkøb. Det ser dog ikke på nuværende tidspunkt ud til at kunne lykkes før tidligst i forbindelse med en helt ny WTO-runde i det nye årtusinde. I mellemtiden vil det være vigtigt at sikre en konsistens mellem på den ene side revisionen af GPA (der i denne omgang således må forventes at forblive en plurilateral aftale) samt forhandlingerne om Transparency-aftalen og indkøb af services (GATS). Dette vil til sin tid kunne medvirke til mere klare og konsistente regler på alle områder – og medvirke til at øge mulighederne for i det hele taget – i en eller anden form - at få en fuldt dækkende, multilateral aftale om offentlige indkøb i WTO.

Også spørgsmålet om mulige ændringer, der kan føre til forringelser i EU-direktiverne er rejst som et problem. Derfor bør der holdes et skarpt øje til konsekvenserne for EU-direktiverne under forhandlingerne.

Spørgsmålet om anvendelse af tekniske standarder og specifikationer på en protektionistisk måde er nævnt fra virksomhedsside. Der bør derfor i højere grad fokuseres herpå, herunder at gældende forpligtelser efter GPA art. VI – hvorefter bl.a. internationale standarder så vidt muligt anvendes, hvor de findes – overholdes. Eventuelle reviderede regler herom må ikke føre til en forringelse af det nuværende danske beskyttelsesniveau på miljø- og arbejdsmiljøområdet.

Der er behov for mere enkle og effektive klagemuligheder. Det vil formentlig bedst kunne ske parallelt til de netværksløsninger, der nu opbygges i forbindelse med EU-udbud, da mulighederne for at ændre på de formelle klagemuligheder i GPA må vurderes at have lange udsigter.

Man kan i denne forbindelse også pege på det forslag, som EU har sendt til parterne i GPA om uafhængige nationale organer, der bl.a. skal fungere som hurtigtvirkende og uformelle kontaktpunkter i forbindelse med vanskeligheder ved udbudsprocedurer. Desuden skulle sådanne organer give bistand til kontraktparter, kunne intervenere og checke udbudspraksis samt behandle klager.

Spørgsmålet om 'grønne udbud' rejses oftere og oftere. Det er ikke et punkt, der i særligt omfang er rejst fra erhvervslivet i forbindelse med denne undersøgelse. Punktet skal alligevel nævnes her, fordi det har en politisk bevågenhed, og fordi man fra officiel dansk side formentlig vil have brug for en holdning til, hvordan miljøregler og miljøstandarder kan eller bør indgå i en revideret GPA.

USA	250,000 eller 400,000	250,000 eller 400,000	5,000,000

*) Arkitektydelser: 1,500,000

2. Delstater i USA der er omfattet af GPA

GPA omfatter som nævnt ikke alene det centrale regeringsniveau, men også niveauer herunder. I USA har den føderale regering ikke kunnet binde delstaterne på dette område, og derfor har kun en del af dem valgt at være med i aftalen. Det gælder i alt 37 delstater, som er nævnt nedenfor. Billedet kompliceres dog yderligere af, at det ikke er alle myndigheder i de pågældende delstater, som er omfattet af aftalen. Detaljerne herom fremgår af annekserne til GPA.

3. Eksempler på ITC arbejde i udviklingslandene

International Trade Centre (ITC) arbejder som nævnt i rapporten bl.a. med udbredelse af gode udbudsregler i udviklingslandene.

I den strategi, der anvendes, indgår en analyse af de eksisterende udbudssystemer i det pågældende land. Denne analyse leder til en identifikation af problemer i det nationale udbudssystem. ITC tilbyder udviklingslandet en række diagnostiske værktøjer til undersøgelser af såvel processer som personale, og der anvendes et standard kompendium for udbudssystemer (se nedenfor).

Efter analysen starter man med målrettet teknisk bistand, som bl.a. sigter mod at reformere de eksisterende systemer, herunder de lovmæssige rammer, institutionelle og operationelle aspekter. Desuden arbejdes der med de menneskelige ressourcer i form af træning og karriereplanlægning.

ITC anvender i denne proces modelsystemer for udbud (UNCITRAL) og desuden nu i høj grad elektroniske handelssystemer. Til træningen har man et modulopbygget træningssystem.

ITCs modelkompendium har følgende indhold (her på engelsk):

1. Application and Scope of Procurement
2. Public Goals/Policies
3. Transparency
4. Accountability
5. Competitive Procedures
6. Qualifications
7. Non-discrimination
8. Value for Money
9. Preferences
10. Solicitations

11. Responsiveness/Evaluation
12. Award/Performance/Remedies
13. Tendering
14. Restricted Tendering
15. Requests for Proposal
16. Selective Two-Stage Tendering
17. Competitive Negotiations
18. Requests for Quotations
19. Single Source Procurement
20. Other Methods and Procedures
21. Legal Environment

ITCs træningsmoduler vedrører:

1. Determining Requirements
2. Analysing Supply Markets
3. Appraising Suppliers
4. Developing Supply Strategies
5. Preparing the Contract
6. Sourcing
7. Negotiating
8. Managing the Supply Contract
9. Managing International Logistics
10. Managing Inventory
11. Measuring Performance in Supply Management
12. Exploring the Corporate Environment
13. Understanding the National Environment

Offentlige indkøbsregler i WTO

**Delrapport 2: Danske virksomheders
muligheder ved offentlige indkøb i en
række WTO-lande**

Forord

Den stigende globalisering afføder en stigende samhandel mellem landene og mellem kontinenterne. Dette gælder såvel den private handel samt den handel, der sker på det offentlige kontraktmarked. Indenfor WTO er det offentlige indkøb reguleret af Government Procurement Agreement, GPA-aftalen. Udover samtlige EU-lande har 10 andre lande underskrevet denne aftale, heraf de vigtigste af Danmarks oversøiske samhandelslande.

WTO planlægger i løbet af 1999 en generel revision af GPA-reglerne. Konkurrencestyrelsen, der er den ansvarlige danske myndighed indenfor dette område, har på denne baggrund taget initiativ til nærværende rapport.

Rapporten har to formål. For det første skal den skabe et markedskendskab for de danske virksomheder, der overvejer at påbegynde eksport til den offentlige sektor i GPA-landene, eller de virksomheder, der kun har begrænsede erfaringer på dette marked. Da der ofte er tale om markeder, der er meget forskellige – både kulturelt, økonomisk og politisk – fra danske forhold, vil en grundig forberedelse og gode kontakter på de pågældende markeder være en forudsætning for at få succes. For det andet skal rapporten skabe et overblik over danske virksomheders erfaringer på området med henblik på at tilvejebringe en dansk holdning til den kommende revision af GPA-reglerne. Dette er sigtet med delrapport 1, hvor resultaterne af en række interviews, der har været foretaget med brancheorganisationer og virksomheder, og resultaterne fra en telefoninterview undersøgelse med et større antal danske virksomheder, præsenteres. Interviewene har bidraget til at skabe et generelt billede af de danske virksomheders erfaringer med GPA-reglerne med henblik på at udforme anbefalinger til revisionen af reglerne. Delrapport 1 indeholder ligeledes nogle overordnede betragtninger om det offentlige indkøbsmarked samt en beskrivelse af WTO-reglerne om offentlige indkøb og EUs overvejelser vedrørende offentlige udbud i WTO.

Delrapport 2 har en kort oversigt over WTO-reglerne og indeholder tillige konkrete beskrivelser af de for Danmark 8 mest relevante lande udenfor EU, der er omfattet af GPA-reglerne. Det drejer sig om USA, Japan, Hong Kong, Singapore, Korea, Schweiz, Canada og Polen. For en nærmere beskrivelse af markedsmulighederne indenfor EU henvises til Konkurrencestyrelsens tre guider, Det offentlige udbudsmarked i EU, for henholdsvis tjenesteydelser, varer og bygge- og anlægsområdet.

Delrapport 2 er udarbejdet for Konkurrencestyrelsen af direktør, cand.scient. pol. Hans Martens, Martens International Consulting, S.L. Konkurrencestyrelsen takker Hans Martens for et godt samarbejde i denne anledning.

Konkurrencestyrelsen, juli 1999

Finn Lauritzen

1. Offentlige indkøb i WTO-regié

1.1 Indledning

Det offentlige indkøbsmarked er enormt. Det skønnes alene i EU-landene at udgøre omkring 5.000 milliarder kroner om året. Hvis man dertil lægger de lande, som er omfattet af WTO-aftalerne og de udbud, der foregår gennem internationale organisationer som EU, Den Europæiske Bank for Genopbygning og Udvikling, Den Europæiske Investeringsbank, Den Nordiske Investeringsbank, Verdensbanken og de mange andre internationale udviklingsbanker og bistandsorganisationer bliver tallet formentlig fordoblet.

WTO-reglerne undtager generelt offentlige indkøb fra sit anvendelsesområde. Der er imidlertid vedtaget et regelsæt om offentlige indkøb, Government Procurement Agreement eller GPA. Ikke alle indkøb til den offentlige sektor er omfattet af indkøbsreglerne, men en række kilder anslår, at der under WTO-aftalen om offentlige indkøb er åbnet for konkurrence til en værdi af over 2,5 trilliarder kroner årligt.

Konkret betyder GPA ikke mange ændringer for den offentlige sektor i Danmark, der længe har været underlagt EUs udbudsregler. Principperne om/for international konkurrence er således allerede fastlagt, i hvilken forbindelse GPA alene øger antallet af potentielle leverandører. Derimod øger GPA danske virksomheders muligheder for at eksportere varer til den offentlige sektor i de lande, der er omfattet af aftalen.

Aftalen omfatter fortrinsvist rige lande, nemlig de 15 EU-lande og 10 andre lande, heriblandt USA og Japan. Ingen udviklingslande har på nuværende tidspunkt tilsluttet sig internationale aftaler om offentlige indkøb, jf. nedenfor.

1.2 Danske virksomheder og internationale aftaler

Udbudsreglernes sigte er især at stræbe efter integration mellem markederne for offentlige udbud i de enkelte lande og opnå effektiv konkurrence, herunder at den offentlige sektor i den forbindelse følger markedsøkonomiske principper i sin indkøbspolitik og ikke benytter politisk baserede kriterier for sine afgørelser. Formålet med konkurrencen er både at tilgodese og ligestille virksomhederne og at sikre, at offentlige indkøbere får så høj kvalitet for pengene som muligt. Integrationsformålet er udmøntet i regler, der sigter mod at hindre, at virksomheder fra andre lande end ordregiveren stilles ringere end nationale eller lokale virksomheder.

Udbudsreglerne fastsætter således spillereglerne for offentlige myndigheders udbud af større kontrakter og virksomhedernes deltagelse i konkurrencen om kontrakterne som – hvis de bruges rigtigt og er klare og overskuelige og ikke unødigt bureaukratiske – kan bruges til at effektivisere myndighedernes arbejde med at foretage udbud af ordrer og i den forbindelse opnå mest ”value for money”. Herved – via en sund offentlig indkøbspolitik – skabes samtidig en sund offentlig administration, der virker som et værn mod korruption og bestikkelse. Endvidere kan udbudsreglerne effektivisere private virksomheders indsats for at vinde offentlige indkøbsordrer. Det gælder procedureregler, regler der skal forhindre forskelsbehandling, og det gælder klageregler.

Danske virksomheder udnytter formentlig ikke fuldt ud mulighederne i de internationale aftaler om offentlige indkøb. Dette antages især at skyldes, at der ikke vedrørende GPA findes nogen let tilgængelige kilder, der kan bruges umiddelbart af den typiske virksomhed, ligesom reglerne i sig selv er særdeles komplicerede og fyldt med undtagelser, særbestemmelser osv. Klagebestemmelserne er heller ikke harmoniserede, og det er vedrørende klager over manglende overholdelse af reglerne anført, at klagesystemerne ofte er for langsommelige til, at de kan medvirke til at fastholde kommercielle muligheder. Endvidere er det vanskeligt at finde en samlet oversigt over de udbud, der foretages under reglerne. Der er således ikke, som i EU, et samlet sted, hvor alle udbud publiceres.

1.3 Aktuelle initiativer vedrørende offentlige indkøb i WTO

Der findes som nævnt i dag ikke nogen global aftale eller aftale mellem alle WTOs medlemmer om offentlige indkøb. På nuværende tidspunkt arbejdes der i WTO med offentlige indkøb på tre områder, nemlig:

- Revisionen af den omtalte *plurilaterale* aftale, der er indgået mellem 25 lande, *Government Procurement Agreement – GPA*
- Forhandlingerne om en *multilateral* aftale omfattende alle WTO-lande om *Transparency in Procurement* (som ikke i sig selv omfatter markedsadgang)
- GATS – den *multilaterale* aftale om liberalisering af handel med tjenesteydelser, der også på sigt kan tænkes at indeholde aspekter af offentlige indkøb af tjenesteydelser, jf. nedenfor.

1.4 Government Procurement Agreement

Den oprindelige GPA: Den første plurilaterale aftale om offentlige indkøb i multilateralt regie (GATT) blev indgået i 1979. Denne aftale (GPA) fastlagde alene forpligtelser med hensyn til deltagerlandenes indkøb af varer foretaget af centrale regeringsmyndigheder. Samtidig var den – som en række andre særlige regelsæt (aftaler/koder) - et "à la carte"-arrangement, dvs. at ikke alle GATT's Kontraherende Parter var forpligtet automatisk til at deltage heri.

Den nuværende GPA: Da den seneste multilaterale handelsforhandlingsrunde (Uruguay-Runden) blev lanceret i 1986, var der allerede igangsat en (mindre) revision af GPA 1979. Den nye GPA blev undertegnet i april 1994 samtidig med at Verdenshandelsorganisationen WTO blev etableret som erstatning for GATT.

De ændringer, der blev foretaget i GPA, bærer i høj grad et "EU-fingeraftryk". Den nuværende GPA dækker en meget stor del af det område, der er reguleret i den interne fællesskabsret, således både offentlige kontrakter om bygge- og anlægsarbejder, vareindkøb og tjenesteydelser samt visse kontrakter omfattet af EUs forsyningsvirksomhedsdirektiv. Samtidig omfatter GPA nu ikke blot centrale regeringsmyndigheders kontraktindgåelser, men også kontrakter, der indgås af regionale og lokale myndigheder samt private og offentlige forsyningsvirksomheder inden for visse sektorer. Endelig er der indføjet bestemmelser, der forpligter deltagerlandene til at etablere nationale klageprocedurer svarende til de forpligtelser, som påhviler EU-landene.

Det var et generelt princip i GATT-overenskomsten – og er det fortsat i WTO – at de handelsmæssige fordele, en underskriver af aftalen giver til ét land eller gruppe af lande, skal gives til alle andre parter, der er dækket af aftalen. Dette princip kaldes *Most-Favoured-Nation-princippet* (MFN). GATT-overenskomsten fratager specifikt området offentlige indkøb fra princippet, der dog er selvstændigt indeholdt i GPA i den forstand, at én underskriver af GPA skal give den behandling, man giver et andet GPA-land til alle andre GPA-lande. GPA er dog på den anden side også fundamentalt i strid med dette princip. Således har GPA-parterne i konkrete tilfælde fraveget princippet ud fra reciprocitetsbetragtninger; dvs. at parterne i GPA alene giver hinanden adgang til deres respektive offentlige indkøbsmarkeder i det omfang en sådan markedsadgang er gensidig. Omfanget af en sådan markedsadgang bestemmes ved bilaterale aftaler mellem parterne, hvor det således kan hænde, at lande gensidigt undtager sektorer eller områder fra den generelle aftale. Man kan derfor beskrive GPA som en 'paraplyaftale', der lægger rammer for et sæt af bilaterale aftaler mellem aftalens parter. Det kan tilføjes, at der er ingen tvivl om, at aftalen findes meget følsom, idet den konkret indebærer adgang til markederne i modsætning til en række andre WTO-aftaler, som er af mere principel karakter og med knap så direkte virkninger.

Et andet fundamentalt princip i GPA er *princippet om national behandling*. Dvs. at man skal behandle udenlandske varer, tjenester og leverandører på en måde, som ikke er mindre favorabel, end den behandling man giver indenlandske varer, tjenester og leverandører. Det betyder, at alle parter under GPA skal give varer, tjenesteydelser og leverandører fra andre lande, der er part i aftalen, en behandling, der ikke er mindre gunstig end den, man giver indenlandske varer, tjenesteydelser og leverandører og man skal også give en sådan lige behandling for varer, tjenesteydelser og leverandører fra alle andre GPA-lande.

Drøftelser om revision af GPA: GPA er en plurilateral aftale i modsætning til de fleste WTO-aftaler, som er multilaterale. Den er samtidig frivillig, og binder kun de parter, der har underskrevet den. På denne baggrund har man inden for rammerne af GPA iværksat et "early review" af aftalen med sigte på at udforme GPA således, at den kan tiltrække flere deltagere. Det har i denne forbindelse navnlig været på tale at arbejde hen imod en simplificering af GPA's relativt komplicerede og tekniske bestemmelser om procedurer ved offentlige indkøb, som vel nok må betegnes som tilpasset først og fremmest til forholdene i højt udviklede lande. Parterne diskuterer parallelt hermed muligheden for at fjerne diskriminatoriske tiltag (enkelte landes undtagelse af sektorer eller områder fra aftalen), som forhindrer en effektiv konkurrence om udbuddene, og

desuden en udvidelse af aftalens dækningsområde (kontraktstyper og myndighedsniveau).

Det er planen, at aftalen skal revideres frem mod den tredje WTO ministerkonference, der er planlagt afholdt i slutningen af 1999.

Ændringsdrøftelserne inden for rammerne af GPA foregår på basis af diskussionsoplæg vedrørende forskellige aspekter af aftalen fra de interesserede deltagerlande. EU har i denne forbindelse spillet et central rolle og har løbende fremlagt nogle overordnede ideer til en forenkling og forbedring af GPA. Drøftelserne herom i EU foregår dels i art. 113-komiteen, dels i Kommissionens Rådgivende Udvalg for Offentlige Aftaler.

Samtidig foregår der i EU drøftelser om en revision af de interne fællesskabsregler. Disse drøftelser har en væsentlig længere tidshorisont, idet der forventes at gå op imod 3 år før holdningen til udvalgte emner er færdigbehandlet. Dette forhold – at det endnu ikke vides, hvorledes de fremtidige EU-regler på udvalgte områder vil blive udformet – har indtil videre krævet, at man ved drøftelserne af ændringer i GPA samtidig er opmærksom på, at man ikke herved på uønsket vis normerer indholdet af den kommende regelændring internt i EU. I samme forbindelse drøftes også spørgsmålet om adgangen til efter de eksisterende EU-regler at stille miljø- og arbejdsmiljøkrav samt krav om klausuler med socialt indhold i forbindelse med udbudsforretninger. Omfanget af adgangen hertil ligger ikke fast på nuværende tidspunkt.

1.5 Oversigt over indholdet af GPA

Medlemmer: GPA har nu 25 af WTOs medlemmer, men aftalen er åben for andre medlemmer, der måtte ønske at tilslutte sig, og den indeholder i den forbindelse særligt gunstige regler for udviklingslande, der måtte ønske at tilslutte sig. Aftalen dækker i dag EU og de 15 medlemslande, og desuden Canada, Kina (Hong Kong), Israel, Japan, Korea, Liechtenstein, Norge, Singapore, Schweiz og USA. Desuden repræsenterer Holland Aruba. 11 WTO-medlemslande har observatørstatus, nemlig Argentina, Australien, Bulgarien, Chile, Colombia, Island, Mongoliet, Panama, Polen, Slovenien og Tyrkiet. Fire ikke-WTO medlemmer, Kina (Taipei), Estland, Letland og Litauen samt IMF og OECD har ligeledes observatørstatus. Island, Panama og Kina (Taipei) har i juni 1998 anmodet om at kunne tiltræde aftalen.

Dækkede områder og grænseværdier: Selve GPA er som sådan relativt kort og præcis, og den følger det mønster, der efterhånden er ved at blive 'international standard' for udbudsregler. Aftalen indholder en række bestemmelser om udbud og udbudsprocedurer. Derimod bliver billedet meget forvirrende, når man ser på dækningsområderne. GPA giver i sig selv ingen indikation af de dækkede områder. Der er derimod tale om et enstrengt system af regler, som skal gælde for alle typer af udbud i alle sektorer. De dækkede sektorer fremgår i stedet af bilagene til GPA, og her findes der et utal af undtagelser, som gør en vurdering af anvendelsen uklar.

GPA retter sig som udgangspunkt både mod de centrale myndigheder samt mod udbud på niveauer under det centrale regeringsniveau. Medlemmerne af GPA forpligter sig ved tiltrædelsen af aftalen på centralt niveau ved angivelsen af disse myndigheder i tillæg I, bilag 1 til aftalen. I bilag 2 angives de myndigheder under det centrale administrative niveau, der ligeledes er omfattet. Endelig angives i bilag 3 de forsyningsvirksomheder, der er omfattet.

Den nuværende GPA dækker såvel bygge- og anlægsvirksomhed som indkøb af varer og tjenesteydelser. Hvilke tjenesteydelser, der er dækket, er dog i realiteten noget uklart, idet dette område er dækket af bilaterale aftaler. Udbud af tjenesteydelser vil derfor kun været dækket af GPA-procedurer, såfremt myndighederne hos såvel udbyderen som leverandøren er enige om, at den pågældende tjenesteydelse er dækket. Som eksempel kan nævnes, at EU, USA og EFTA-landene har indgået en aftale om, at finansielle tjenesteydelser skal være omfattet af aftalen, mens Japan ikke ønskede dette. Derfor er USA samt EU- og EFTA-landene ikke forpligtigede til at tage japanske leverandører i betragtning ved udbud om levering af finansielle tjenesteydelser.

I aftalens tillæg 1 findes der i bilag 4 en oversigt over de tjenesteydelser, som er omfattet af aftalen, mens bilag 5 specificerer de omfattede tjenester i forbindelse med bygge- og anlægsarbejder.

Som eksempel på undtagelser, som EU har indført i dækningen, kan nævnes: *Drikkevandsforsyning, energi, visse transportydelser, telekommunikation, indkøb af vand og brændstof til energiforsyning, taletelefoni, telex, radiotelefoni, satellittjenester, visse finansielle tjenesteydelser, mæglingssydelser, landbrugsstøtteordninger, erhvervelse af land og ejendomme, beskæftigelsestjenester og programmaterialer til radio og tv.*

De fleste deltagere i aftalen anvender samme grænseværdier for udbud fra centrale myndigheder. For myndigheder under det centrale niveau og for

andre dækkede myndigheder varierer billedet derimod. For bygge- og anlægsarbejder gælder den almindelige grænse på SDR 5.000.000. Grænseværdierne i EUs udbudsregler følger nu de samme grænseværdier, som gælder for EU-landene under GPA. For en oversigt over grænseværdierne henvises til bilag 1 til denne rapport.

Ligebehandling og habilitet: Generelt siger GPA-reglerne, at der ikke må diskrimineres mellem tilbudsgivere på grund af nationalitet, ligesom der skal være ligebehandling i den forstand, at alle potentielle tilbudsgivere skal have tid og praktisk mulighed for at kunne deltage med et bud. Desuden siger aftalen, at der ikke må lægges andre kvalifikationskriterier ind for bedømmelse af tilbudsgivere end dem, der direkte siger noget om evnen til at kunne påtage sig den konkrete opgave.

Tekniske specifikationer: Det forudsættes som et generelt princip i GPA, at de tekniske specifikationer for produkter eller tjenester retter sig mod opnåelse af resultater snarere end mod design karakteristika. GPA anbefaler endvidere anvendelse af internationale standarder snarere end nationale i forbindelse med tilrettelæggelse af udbud. Endvidere må der som hovedregel ikke stilles krav om eller henvises til bestemte varemærker m.v.

Udbudsprocedurer og tildelingskriterier: Der kan anvendes tre former for udbud, nemlig offentlige udbud, hvor alle interesserede kan afgive bud, begrænsede udbud, hvor kun inviterede virksomheder kan byde og udbud efter forhandling, hvor en myndighed kontakter leverandører individuelt efter specielle regler. GPA fastslår, at man normalt skal anvende de to førstnævnte udbudsformer. Udbud efter forhandling kan ligesom EUs udbudsdirektiver foreskrives kun anvendes undtagelsesvist.

Udbydere skal tildele kontrakter til den tilbudsgiver, som dels fuldt ud er i stand til at løse opgaven, dels er enten den billigste eller har givet det mest fordelagtige tilbud. Vurderingen skal foregå på basis af de kriterier og grundlæggende krav, der er specificeret i udbudsannonceringen. Der er her tale om en parallel til EU-reglerne.

Meddelelse om udbud: Der skal ske meddelelse om udbuddene i en officiel publikation med en lang række pligtige oplysninger, herunder udbudets karakter og omfang, udbudsform, kvalifikationsprocedure, hvorfra man kan få specifikationer og anden detailedokumentation, afleveringsfrister og betalingsforhold og -frister.

Forud for selve udbudet skal udbudsgiver udsende en forhåndsmeddelelse (tender notice) i en offentligt tilgængelig publikation (som er opregnet i tillæg II til aftalen). Der skal ligeledes inden for 72 dage efter tildeling af en

kontrakt bekendtgøres en række oplysninger om art/mængde af produkter/tjenester i kontrakten, navn m.v. på den vindende tilbudsgiver og budets værdi eller det højeste og laveste bud taget i betragtning.

I tillæg II , III og IV til aftalen opregnes de publikationer, der anvendes til forhåndsmeddelelser, meddelelser om leverandørliste og meddelelse om formelle regler om offentlige indkøb. Der findes ikke nogen central informationskilde for udbud i WTO-regie eller andetsteds, eller nogen form for centraliseret database (endnu), der samler oplysninger om alle udbud under reglerne. Der findes en WTO-Internetside (<http://www.wto.org/wto/govt/govt.htm>), som giver nogle links til nogle af de nationale publikationskilder, men denne oversigt synes at være noget tilfældig og usystematisk, og kan derfor ikke bruges til systematisk informationsindhentning. Ligeledes vanskeliggør disse forhold til en vis grad overgangen til et elektronisk system for meddelelser om udbud under GPA (jf. nedenfor).

Klagemuligheder: Alle parter, som er omfattet af GPA, skal etablere 'ikke-diskriminatoriske, hensigtsmæssige, gennemsigtige og effektive procedurer', som kan benyttes af utilfredse bydende til at klage over udbudsforretningen. Der skal i alle lande oprettes en mulighed for at få en uafhængig vurdering af påståede uoverensstemmelser med reglerne. Det kan ske i form af en domstol eller et særligt organ, som skal være uafhængigt.

Det påhviler også ethvert land, som har underskrevet GPA, at sørge for, at der findes hurtige og effektive metoder til at rette op på fejltagelser i udbudsforløbet for dermed at fastholde de kommercielle muligheder i forbindelse med udbuddet. Der findes – uden for EU-landenes kreds - tilsyneladende ikke nogen praksis for at benytte sådanne mekanismer, ligesom det ikke har været muligt at spore nogen form for uformelt netværkssamarbejde med det formål at løse konflikter om reglerne mellem parterne i GPA-regie.

GPA åbner herudover for medlemslandene - men ikke for den enkelte virksomhed direkte - mulighed for løsning af konflikter i WTO gennem paneler - de såkaldte 'Settlement of Disputes' regler. Processen er realistisk set alene brugbar til store og/eller mere principielle sager og spørgsmål garanterer ikke på nogen måde en hurtig problemløsning, der kan bevare det 'kommercielle potentiale'.

Kontrol med overholdelse af aftalen – statistik og information: WTO-sekretariatet har ikke, som Europa-Kommissionen, et mandat til at følge implementering af aftalen eller af dens praktiske anvendelse. WTOs karakter af en mellemstatslig organisation spiller klart ind her, da der ingen overnationale beføjelser er. Derfor er det medlemmerne selv, der kontrollerer

hinanden, bl.a. gennem 'Reviews' i GPA komiteen. Indtil nu har 6 'lande' (EU og fem andre) indsendt oplysninger om implementering af aftalen. I oktober 1998 er man startet med reviews af de enkelte landes implementering samt diskussion af eventuelle problemsager (challenge procedures).

Der har været meget få tilbagemeldinger om brugen af de nationale klagebehandlingssystemer, men WTO påpeger, at det ikke nødvendigvis betyder at reglerne ikke er effektive, da de givetvis har en afskrækkende effekt.

De statistiske oplysninger, der findes i WTO-sekretariatet over brug af aftalen, er af ret begrænset omfang. Derfor kan man vanskeligt få et overblik over anvendelse af aftalen fra centralt hold.

Løsning af konflikter om aftalen er således overladt enten til medlemslandene i WTO eller til parterne i nationale organer efter til de procedurer, der i den forbindelse er fastsat i GPA.

Elektronisk tilbudsgivning: GPA forudsætter kommunikation af data ved hjælp af telex, telegrammer og fax. Den har ikke umiddelbart taget højde for anvendelse af informationsteknologi i forbindelse med indkøb. Med henblik på at sikre, at aftalen ikke kommer til at udgøre en hindring for anvendelse af moderne teknologi, er det forudsat, at der skal holdes regelmæssige konsultationer i WTOs komite vedrørende offentlige indkøb om udvikling i informationsteknologien og dens mulige anvendelse (artikel XXIV:8).

For de fleste af de lande, som er med under aftalen, skulle der ikke være de store vanskeligheder ved at øge den elektroniske tilbudsgivning. I EU er man i gang med at indføre den elektroniske tilbudsgivning via SIMAP-projektet, og i lande som USA, Norge og Singapore er den elektroniske tilbudsgivning vidt udbredt. Det skal bemærkes, at International Trade Centre (ITC, der 'ejes' af WTO og UNCTAD i fællesskab), aktivt søger at promovere indførelse af elektronisk tilbudsgivning i de udviklingslande, hvor organisationen arbejder.

2. Administration og markeder i udvalgte GPA-lande

Administrationen af GPA-reglerne skal i princippet være ensartet i alle landene, men der er alligevel forskelle. Dels dækker de omfattede lande mange forskelligartede politiske, økonomiske og administrative systemer, dels er der i aftalen – foruden de mange bilaterale undtagelser – plads for specielle nationale implementeringer, f.eks. af klagesystemerne.

Med henblik på at give en vurdering af GPAs implementering i praksis samt af de muligheder og barrierer, der vil være for danske virksomheder på de pågældende markeder, vil dette kapitel tegne et portræt af en række af de GPA-lande, som er vigtigst for danske virksomheder, nemlig USA, Japan, Korea, Singapore, Hong Kong, Canada og Schweiz, samt af et af observatørlandene, nemlig Polen, der i øvrigt som omfattet af en Europa-aftale med EU og et egentlig medlemskab af EU inden for en overskuelig tid, er på vej mod at indføre EUs regler på det offentlige indkøbsområde.

APEC

Det skal bemærkes, at der inden for rammerne af APEC (Asia-Pacific Economic Cooperation) er indledt et samarbejde om offentlige udbud. Dette samarbejde vedrører en række af de lande, som omtales nedenfor, nemlig USA, Canada, Japan, Hong Kong, Korea og Singapore.

APEC-samarbejdet startede i 1994, og allerede året efter blev det besluttet at inddrage offentlige udbud som en del af samarbejdet. Det er sket gennem en opfordring til medlemslandene om at:

- udvikle en fælles forståelse af offentlige indkøbspolitikker og -systemer samt af praksis på dette område
- skabe en liberalisering af de offentlige indkøbsmarkeder i Asien og i Stillehavsområdet og samtidig bidrage til udviklingen af arbejdet på dette område i andre multilaterale fora.

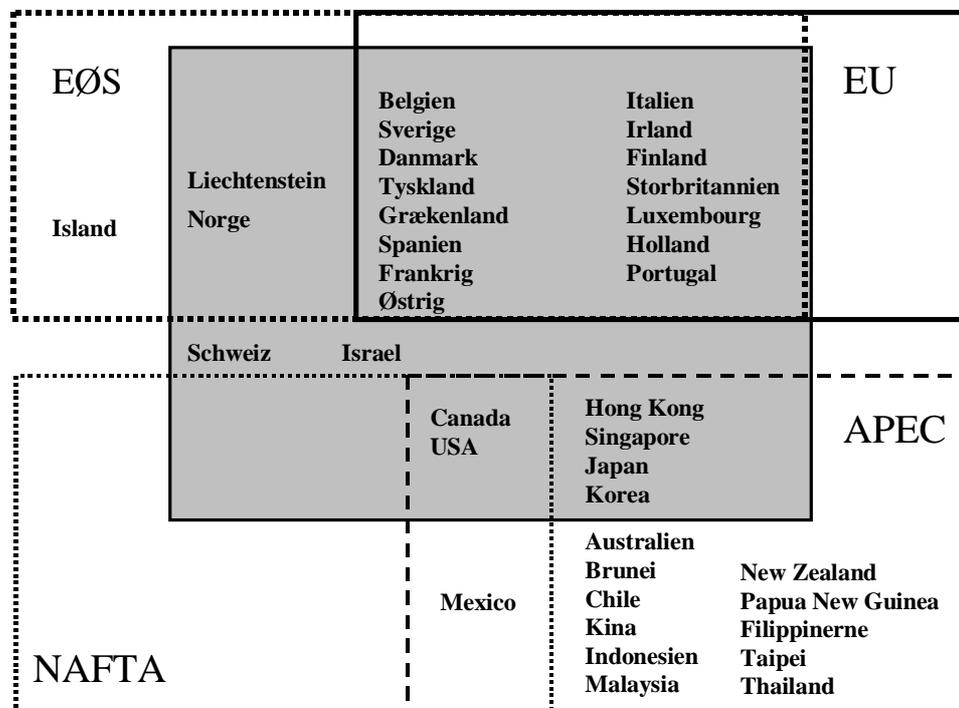

Der findes nu en 'Government Procurement Experts Group', som arbejder med og rapporterer om de offentlige udbud i medlemskredsen.

NAFTA

Også i NAFTA – det nordamerikanske frihandelsområde mellem Canada, USA og Mexico – findes der særlige aftaler om offentlige udbud. Artiklerne i NAFTA-overenskomsten specificerer og definerer de regler, som skal gælde på udbudsområdet, og opremser de institutioner i de tre lande, hvor udbudsreglerne gælder. De kan være på såvel føderalt som på delstats- og provinsniveau. Reglerne gælder for varer, tjenester samt bygge- og anlægsarbejder.

De særlige tærskelværdier i NAFTA-aftalen er:

- For centrale regeringsmyndigheder US\$ 50.000 for varer og tjenester og US\$ 6.5 millioner for bygge- og anlægsarbejder.
- For offentlige virksomheder er tærskelværdien US\$ 50.000 for varer og tjenester og US\$ 8 millioner for bygge- og anlægsarbejder
- For delstats- eller provinsmyndigheder er der defineret særlige og forskellige tærskelværdier i NAFTA-aftalens artikel 1024.

Denne figur søger at illustrere de overlappende medlemskaber af forskellige internationale systemer vedrørende offentlige udbud. GPA er markeret ved det grå område.

EU og GPA-markederne

Foruden at repræsentere EU-landene i WTO-sammenhæng, gøres der også et stort arbejde fra EUs side for at åbne handelen på verdensplan gennem bilaterale aftaler eller aftaler med grupper af lande som f.eks. ASEAN og MERCOSUR. Der findes endvidere en række services, som kan være til hjælp for eksportører – til de private markeder og til de offentlige indkøbsmarkeder.

Der er f.eks. et program, som kan hjælpe virksomheder, der ønsker at eksportere til det vanskelige japanske marked. Et program retter sig særligt mod små og mellemstore virksomheder. Det kan kontaktes på denne adresse:

EXPROM

Europa-Kommissionen, DGI/F/1
Rue de la Loi 200
B-1049 Bruxelles
Att. Richard Wright
Tlf.: +32 2 295 33 97
Fax: +32 2 299 05 99

Desuden findes der et program, som støtter praktikantophold i Japan:

Executive Training Programme in Japan
Europa-Kommissionen, DGI/F/1
Rue de la Loi 200
B-1049 Bruxelles
Att. Richard Wright
Tlf.: +32 2 295 33 97
Fax: +32 2 299 05 99

Kontakt i Danmark for dette program er:

SHL Danmark A/S
Gl. Lundtoftevej 1E
2800 Lyngby
Tlf.: 45 87 20 40
Fax: 45 87 20 38

Der er netop vedtaget et nyt EU-program, der tilbyder yngre europæiske erhvervsledere mulighed for at forberede sig til at arbejde på det koreanske marked. Deltagerne vil blive sat ind i de handelsmæssige forhold i Korea, inklusive den kommercielle kultur, og det etårige program tilbyder desuden sprogtræning og besøg i Koreanske virksomheder.

Der vil blive 16 deltagere på det første kursus, der administreres for Europa-Kommissionen af Barcelona and Seoul Chambers of Commerce. Der kan fås information på tlf. +34 93 41 69 389 eller på e-mail til etkorea@mail.cambrabcn.es

Ønskes information fra Korea kan man ringe på tlf. +83 2 22 53 56 31 eller bruge e-mail: etpkorea@eucck.org

Der planlægges tilsvarende programmer for andre lande i den kommende tid.

Desuden har Europa-Kommissionen opbygget en nyttig database for eksportører, kaldet *the Market Access Database*. Databasen er Internet-baseret og kan findes på adressen:

<http://mkaccdb.eu.int/>

Den rummer et væld af oplysninger om handelsbarrierer i forskellige lande, herunder de lande, som behandles nedenfor. Handelsrestriktionerne vil ofte have direkte betydning for bud i forbindelse med offentlige indkøbsordrer. Virksomheder opfordres til at holde sig i tæt kontakt med databasen og meddele om problemer, der måtte opstå på eksportmarkeder.

EU står også for klager på medlemslandenes vegne i forbindelse med overtrædelse af GPA. Siden den seneste aftales ikrafttræden i 1994 og til februar 1999 har der dog kun været rejst to sager, nemlig en mod Japan i forbindelse med et udbud af et satellit navigationssystem, og en klage over USA i forbindelse med delstaten Massachusetts' særlige lovgivning om virksomheder, der har forretningsforbindelse med Burma (Myanmar).

2.1 USA

2.1.1 Administrative karakteristika

USA er en forbundsstat med 50 delstater, som nyder et udbredt selvstyre på mange områder – herunder i høj grad på det udbudsmæssige område. Der bor næsten 270 millioner mennesker i landet. Det samlede BNP er på 50.000 mia. kroner, og BNP pr. indbygger er på ca. 160.000 kroner. Det føderale budget er på udgiftssiden på ca. 11.200 mia. kroner.

USA producerer stort set alle slags varer og tjenester og kunne være selvforsynende. Landet har dog alligevel en betydelig udenrigshandel, selv om den målt i forhold til landets størrelse er relativt beskedent.

BNP er sammensat af 2 pct. landbrug, 23 pct. industri og 75 pct. servicefag.

2.1.2 Implementering af GPA

USA har været med i GPA siden starten, men det er alligevel kun lykkedes at få 37 af de 50 delstater med under aftalen (hvilke er listet i bilag 2).

På centralt plan får de enkelte myndigheder hvert år fra Kongressen bevillinger, som er bestemmende for, hvilke programmer de kan bruge penge på – og hvor mange. Indkøb i den centrale regering foretages normalt gennem de enkelte myndigheder efter ensartede retningslinjer, som er fastsat efter 'the Federal Acquisition Regulations (FAR)'. FAR er gældende for alle føderale myndigheder, og det giver en vis ensartethed i den måde, hvorpå udbudsforretninger håndteres på tværs af den store administration.

I en række tilfælde skal de føderale myndigheder erhverve sig bestemte varer og tjenester fra centrale forsynings tjenester, som 'General Services Administration' eller 'Defence Logistic Agency'.

Den såkaldte 'Buy American Act' (se nedenfor) må principielt ikke bruges under GPA-udbud, men en anden lov – 'Small Business Act' – forlanger, at der i forbindelse med udbud af enhver størrelse skal ske en

favorisering af mindre virksomheders deltagelse, når der er en rimelig forventning til, at der vil komme bud fra mindst to mindre virksomheder, og at kontrakterne kan indgås til en fair pris set i forhold til markedet.

Et helt særligt problem er opstået, fordi Massachusetts sammen med mere end 20 byer og lokale myndigheder har besluttet at boykotte handel med virksomheder, der handler med Burma. Da dette også gælder for offentlige udbud, er der tale om et brud på GPA. Det hævdes i hvert fald af EU, der har søgt om konsultationer i WTO om denne sag. Der er også anlagt sag ved domstolene vedrørende denne lov (på foranledning af the National Foreign Trade Council) med krav om dens ophævelse, fordi den påstås at være grundlovsstridig. EU har ikke mindst klaget stærkt over denne lov, fordi den udbreder amerikansk lov – og her ligefrem en delstatslovgivning – ud over USAs territorium.

Der anvendes i reglen en af to former for udbud, alt efter kompleksiteten af udbudsforretningen.

For udbud med en forventet værdi på under USD 100.000 anvendes 'simplified acquisition procedures', og for udbud med en forventet kontraktværdi på over USD 100.000 anvendes 'sealed bid' eller forhandlede procedurer, der dog ikke må forveksles med udbudsformen udbud efter forhandling.

Der skal ske en forhåndsmeddelelse om et udbud 15 dage før det faktiske udbud annonceres, og loven kræver mindst 30 dage mellem den officielle meddelelse og deadline for indgivelse af bud. Kriterierne for tildeling af kontrakter skal fremgå af udbudsmeddelelsen, og sker der ændringer undervejs, skal alle bydende underrettes om det.

Bydende, der ikke vinder en kontrakt, kan forlange en skriftlig forklaring fra den ansvarlige for den pågældende myndighed. Hvis prisen alene har været kriterium for afgørelsen, vil de tabende under alle omstændigheder få besked om antallet af bud og hvad den totale kontraktpris for det vindende bud har været.

I USA kræver man aldrig garantistillelse for projekternes kvalitet og gennemførelse fra kontraktageren.

Det er kun sjældent, at man i USA benytter sig af udbudsformer, der ikke er fuldt ud åbne for konkurrence. Dette kan alene ske, hvis chefen for den pågældende myndighed giver lov til det og giver en skriftlig

forklaring på, hvorfor det har været nødvendigt eller praktisk at anvende denne metode.

Det kan kun ske, hvis en eller flere af følgende betingelser er opfyldt:

- Kun én leverandør kan leve op til kravene i udbuddet
- Der foreligger usædvanlige omstændigheder eller sagen er ekstremt hastende
- Der er tale om særlige ressourcer af teknisk eller forskningsmæssig karakter
- En international aftale gør brug af denne form nødvendig
- Brug af denne form nødvendiggøres af lovgivningen (f.eks. i forbindelse med handicappede, fængselsvæsenet o.a.)
- Der er særlige hensyn til den nationale sikkerhed
- Den offentlige interesse kræver det. Dette argument anvendes dog yderst sjældent, fordi dets anvendelse kræver Kongressens godkendelse.

Det skal tilføjes, at der er helt særlige procedurer for arkitekt- og ingeniørprojekter. Her vil et "evaluation board" gennemgå alle de virksomheder, der har svaret på en offentlig indkaldelse om kvalifikation. Dette board vurderer de potentielle bydende efter deres professionelle kapacitet, deres specialiserede kompetence og deres referencer med hensyn til kvalitet, omkostningskontrol og overholdelse af tidsterminer. Det pågældende evaluation board holder interviews med mindst tre af de mest kvalificerede virksomheder, og prioriterer dem på denne baggrund. En rapport om resultatet sendes til den ansvarlige for den endelige beslutning.

Hvis man bevæger sig ud på delstatsplan, bliver billedet af udbud meget uoverskueligt. Der er for det første mange niveauer for offentlig administration, idet de fleste stater er underopdelt i 'counties' og videre i 'cities and towns'. Nogle stater har endvidere særlige distrikter for skolesystemer og for vandforsyning. De relevante myndigheder har hals- og håndsret over deres budgetmidler, og den føderale regering har ikke udstukket retningslinjer for andre end den føderale forvaltning selv. De eneste retningslinjer er faktisk dem, som er nødvendiggjort af GPA for de stater, hvor GPA er gældende.

Der kan dog være tilfælde, hvor føderale midler skal anvendes i delstater, og hvor midlerne ledsages af retningslinjer for udbudsforretningerne fra den føderale donor. Det gælder f.eks. på miljøområdet og for konstruktion af motorveje.

Alle spørgsmål vedrørende implementeringen af GPA kan rettes til:

Office of WTO and Multilateral Affairs
Office of the United States Trade Representative
600 17th Street, N.W.
Washington D.C. 20508
Tlf.: +1 202 395 30 63

Det kan også stærkt anbefales at aflægge et besøg på Internetsiden:

<http://www.arnet.gov>

hvor der er henvisninger til lovgivningsimplementeringen og links til hele den føderale administration og dens udbudssystemer. Der er også her links til Internetsider vedrørende elektronisk handel og udbud. Fra 1999 skal alle føderale betalinger ske elektronisk, og der er udarbejdet en strategisk plan for udvikling af den elektroniske handel og elektroniske udbud. Se f.eks. på Internettet side:

<http://policyworks.gov/epic>

Udbud under grænseværdierne

Den såkaldte 'Buy American Act' fra 1993 giver problemer i forhold til udbudsområdet. Loven foreskriver bl.a., at man skal købe indenlandske varer til offentligt brug. Der findes desuden en såkaldt 'Executive Order', som bemyndiger føderale myndigheder til at beslutte med hvilken margin en pris tilbudt af en indenlandsk ordregiver må overskride et udenlandsk bud og alligevel stå lige i konkurrencen. Der anvendes normalt en margin på mellem 6 og 12 pct., men Buy American loven må ikke anvendes på udbud, der har en værdi over GPA-tærskelværdierne.

Loven gælder ikke på delstatsniveau eller på lokalt niveau, men ofte anvender delstaterne deres egne præferencesystemer for udbud. I de delstater, der ikke har tilsluttet sig GPA, kan man som udenlandsk leverandør ikke vide sig sikker på ikke at blive ramt af denne protektionisme.

Publikation af udbud

Det officielle meddelelsesorgan for udbud er 'the Commerce Business Daily' (se nedenfor under 2.1.6). Ud over dette medie – og dets Internetversion – benyttes også til tider mere specialiserede organer som aviser og faglige tidsskrifter.

Klageinstanser

Alle med en legitim interesse i det kan klage over:

- meddelelse om udbud fra en føderal myndighed om indkøb af varer eller tjenester
- aflysning af et udbud
- tildeling af en kontrakt eller forslag herom
- aflysning af en kontrakttildelelse.

Klager skal indleveres til 'General Accounting Office', der er en myndighed under Kongressen med generelt ansvar for tilsyn med føderale myndigheder. General Accounting Office meddeler sin anbefaling vedrørende klager inden 125 dage efter indleveringen af klagen, eller inden for 65 dage, hvis der er tale om en ekspresbehandling. For visse leverancer af computerudstyr kan der i stedet klages til 'General Services Board of Contract Appeals'.

Begge disse klageinstanser kan suspendere en udbudsproces, mens de undersøger sagen, for at sikre, at alle bydendes interesser tilgodeses.

Det skal endelig tilføjes, at en bydende også har mulighed for at klage direkte til den myndighed, der står for udbuddet, og eventuelt appellere klagen til 'Agency Board of Contract Appeals' eller sagsøge ved domstolene.

2.1.3 Markederne

Det giver næsten ingen mening at beskrive de amerikanske offentlige udbudsmarkeder, fordi deres størrelser er så helt utrolige. En måde at udtrykke dette på er, at 'hvert tyvende sekund på hver arbejdsdag underskriver den amerikanske regering en kontrakt efter et udbud til en gennemsnitlig værdi af 3,5 millioner kroner'.

En meget stor del af de offentlige budgetter (hvoraf det føderale budget er på over 1.000 milliarder kroner) går til ordrer efter udbud. Det er faktisk svært at finde præcise opgørelser over den samlede størrelse af markedet, men ud fra indirekte oplysninger kan det føderale indkøbsmarked anslås til ca. 1.700 mia. kroner om året, og markedet i den øvrige del af den offentlige sektor til ca. 900 mia. kr.

Danmark fik i 1997 ordrer for godt USD 51 millioner – ca. 350 millioner kroner. Det svarede dog kun til under 0,02 pct. af de samlede udenlandske ordrer. Nogenlunde det samme gjorde sig gældende i 1998, hvor beløbet dog var steget til godt 54 mio. USD. Blandt udenlandske virksomheder var de store vindere i de to år:

	1997 (mio. USD)	1998 (mio. USD)
Tyskland	671	775
Japan	509	339
Saudi Arabien	398	133
UK	290	279
Korea	247	350
Italien	226	156
Kuwait	156	-
Grækenland	146	13
Canada	131	210
Rusland	108	84

Blandt de succesfulde danske virksomheder var der repræsentanter fra den rådgivende branche (rådgivende ingeniører), vareleverancer (fødevarer og industriprodukter), men ingen bygge- og anlægsarbejder.

I denne sammenhæng er danske virksomheder at forstå som virksomheder med en adresse i Danmark. Der kan også have været leverancer fra et af de omkring 400 datterselskaber, som danske virksomheder har oprettet i USA, eller fra danske leverandører, der arbejder gennem agenter i andre lande, inkl. i USA.

Hvad angår forventningerne til markedet er der heller ikke grund til at sige andet, end at det fortsat vil være gigantisk og at der vil være et potentiale for danske virksomheder på stort set alle områder. Det er næppe realistisk at forvente, at virksomheder inden for bygge- og anlægsbranchen kan vinde kontrakter uden etablering i USA, men der ser ud til at være muligheder – og formentlig stigende muligheder – for vareleverancer hjemmefra, specielt fordi den elektroniske handel udvikler sig så stærkt som den gør i USA. Men også danske rådgivningsvirk-

somheder synes at have gode chancer i nicher på det amerikanske marked.

2.1.4 Barrierer for danske virksomheder

Der er ingen specielle barrierer for danske virksomheder, men en række tekniske og handelsmæssige barrierer findes generelt og specifikt for EU-virksomheder. Det er EU, som tager sig af de handelsmæssige relationer med USA, og bortset fra de jævnlige skærmydsler på konkrete områder mellem de to blokke, arbejdes der generelt for at lette den transatlantiske handel.

Det transatlantiske økonomiske samarbejde er med til at åbne også de handelsmæssige relationer. Der gøres især gennem TABD (Trans Atlantic Business Dialogue) et forsøg på at sætte fokus på virksomhedernes problemer, og under TABD arbejder en række virksomhedsledere fra de to sider sammen for at finde løsninger på praktiske spørgsmål. Det er bl.a. med udgangspunkt heri, at man fik etableret aftalerne om liberalisering på det informationsteknologiske område og på telekommunikationsområdet. De to aftaler har tilsammen liberaliseret handel til en værdi af 1.000 mia. euro. Senest er der indgået en tilsvarende aftale om liberalisering af handelen med finansielle tjenesteydelser. Disse transatlantiske aftaler danner ofte grundlaget for videre handelsliberalisering i WTO.

Det skal dog siges, at et af de mindst aktive områder i TABD har været offentlige indkøb. Til gengæld betyder det øvrige samarbejde ofte en harmonisering eller aftaler om gensidig anerkendelse af tekniske og andre standarder, som gør det lettere for danske virksomheder at afgive bud i USA.

Generelt set er det vanskeligt for udenlandske virksomheder at arbejde med DoD – forsvarsministeriet. Dette ministerium har gigantiske budgetter, men er også restriktiv i anvendelsen af eksterne leverandører. I større grad, naturligvis, jo tættere man kommer på de egentlige forsvaretsystemer. Danske virksomheder har f.eks. haft held til at levere fødevarer til forsvaret i USA.

Markedet består som nævnt af de føderale institutioner og de 37 delstater, der er med under GPA. I de øvrige delstater har man valgt en restriktiv politik med hensyn til international konkurrence om udbud, og praksis kan være ganske protektionistisk. Ved udbud under tærskelværdierne kan danske virksomheder risikere at løbe ind i problemer

med præferencereglerne under 'Buy American Act' og med præferencerne for små og mellemstore virksomheder.

Det skal også nævnes, at der findes en organisation, som repræsenterer større leverandører til den offentlige sektor i USA, 'the Coalition for Government Procurement'. Denne organisation hævder at repræsentere over 300 virksomheder, som sælger varer og tjenester til det offentlige, og disse virksomheder repræsenterer tilsammen halvdelen af alle indkøb fra de føderale myndigheder. Organisationen har til formål at 'beskytte medlemmernes fælles interesser, nemlig at opnå en fair og rimelig profit i forbindelse med salg til føderale og delstatsmyndigheder'.

Om dette så i realiteten er et forsøg på at danne en kartellignende organisation kan ikke bedømmes ud fra det foreliggende materiale, men på den skitserede baggrund ser organisationen ud til at være af stor betydning for tilrettelæggelse af udbudsregimet i USA.

Organisationen kan kontaktes på denne adresse:

The Coalition for Government Procurement
1990 M Street, NW Suite 400
Washington DC 20036
Tlf.: +1 202 331 0975
Fax: +1 202 822 9788
E-mail: coalgovpro@aol.com
Internet: <http://www.washmg.com/cgp/>

2.1.5 Nyttige adresser

'Commerce Business Daily' er det amerikanske handelsministeriums gratis elektroniske version af det officielle meddelelsesorgan med samme navn. Dog skal man være opmærksom på, at de udbudsmeddelelser, der står i den elektroniske udgave, ikke har retlig gyldighed, før de også foreligger i den trykte udgave. Man kan kontakte mediet på denne adresse:

GPO Access User Support Team
Tlf.: +1 202 512 1530
Fax: +1 202 512 1262
E-mail: cbd-support@gpo.gov
Internet: <http://cbdnet.access.gpo.gov/>

En anden officiel hjælpekilde er 'US Business Advisor – Doing Business with Government'. Der findes her links til stort set alle udbudsmyndigheder på føderalt og på delstatsplan. Se på Internettet på adressen:

<http://www.business.gov/DoingBusiness.html>

Man kan hente hjælp hos den elektroniske tjeneste GPAS, Inc. (Government Procurement Assistance Service), som har følgende Internetadresse:

<http://www.gpas.com/index.html>

En guide til Government Procurement findes på Internettet på siden:

<http://www.hardfordsmallbusiness.com/guide/default.htm>

At USA er en meget kommerciel økonomi, hvor reklamesproget kan være meget direkte, kan man få et indtryk af gennem en tekst, der skal reklamere for en udstilling vedrørende offentlige udbud fra forfatterne til den ovennævnte guide om offentlige indkøb:

You've drooled over the idea of juicy government contracts, right?

But you slammed against a titanium wall trying to figure out how to apply or get on the right lists.

Well, that's about to change – come to the money fair!

På Govcon's Internetside er der mange tips at hente, bl.a. om standarder, blanketter, der skal bruges, og meget mere. Man kan også der købe en 'Government Contractor Toolbox'. Adressen er: <http://www.govcon.com/>

2.1.6 Konklusion

Implementering af GPA	GPA er implementeret for de fleste føderale institutioner og for 37 delstater.
Åbenhed og transparens	Det er nemt at få adgang til oplysninger om udbud fra mange officielle kilder og fra en række private tjenester og organisationer, som hjælper til øget transparens.
Klageorgan	Der er oprettet klageorganer i overensstemmelse med GPA.
Markedets størrelse	Gigantisk, ganske enkelt. Danske virksomheder koncentrerer sig formentlig mest om de føderale indkøb – og måske nogle enkelte større delstater.
Betydning for nabomarkeder	Man kan naturligvis arbejde ind i nabolandene fra USA, men markedet er i sig selv så betydningsfuldt, at denne mulighed forekommer af sekundær betydning.
Sproglige og kulturelle barrierer	Ingen særlige barrierer for danske virksomheder. Man skal dog nok vænne sig lidt til den høje grad af kommercialisering, der adskiller USA fra de europæiske lande.
Markedsforventninger	Markedet vil, uanset svingninger i den økonomiske politik og de offentlige budgetter, under alle omstændigheder være af enorm betydning.
Tradition for dansk eksport	Der er hos mange danske virksomheder en god tradition for handel med USA.
Konkurrencesituation	Det amerikanske marked er meget konkurrencepræget, og den omfattende brug af offentlige udbud øger konkurrencen. Andre europæiske lande – og de amerikanske virksomheder – er de stærkeste konkurrenter for danske virksomheder.

2.2 Japan

2.2.1 Administrative karakteristika

Japan er Danmarks største eksportmarked i Asien, og landet har med sin meget betydelige økonomi en meget stærk stilling generelt i verdensøkonomien. Japans 126 millioner indbyggere bor på 375.000 kvadratkilometer i et teknologisk og økonomisk højt udviklet land. Det samlede bruttonationalprodukt er i størrelsesordenen 25.000 milliarder kroner, og hver indbygger kan i gennemsnit disponere over ca. 190.000 kroner.

Japan er et konstitutionelt monarki, og regeringen udpeges af parlamentet – Diet. Landet er opdelt i 47 'præfekturer', nemlig Aichi, Akita, Aomori, Chiba, Ehime, Fukui, Fukuoka, Fukushima, Gifu, Gumma, Hiroshima, Hokkaido, Hyogo, Ibaraki, Ishikawa, Iwate, Kagawa, Kagoshima, Kanagawa, Kochi, Kumamoto, Kyoto, Mie, Miyagi, Miyazaki, Nagano, Nagasaki, Nara, Niigata, Oita, Okayama, Okinawa, Osaka, Saga, Saitama, Shiga, Shimane, Shizuoka, Tochigi, Tokushima, Tokyo, Tottori, Toyama, Wakayama, Yamagata, Yamaguchi og Yamaguchi.

Det skal også nævnes, at det japanske retssystem efter Anden Verdenskrig er opbygget over europæiske retssystemer, men med engelsk-amerikansk indflydelse.

Der er i Japan en stærk tradition for samarbejde mellem regering og industrien. Inden for industrien ser man ofte tætte net opbygget mellem fremstillingsvirksomheder, leverandører og distributører – de såkaldte 'keiretsu'. De mange store virksomheder i Japan er med til at skabe en stærk lønmodtagertradition – og ydermere har mange ansatte i de store virksomheder haft en tradition for garanti for livslang ansættelse. Dette princip er dog langsomt ved at forsvinde.

Japans økonomi er stærkt præget af industrien. Serviceindustrien udgør kun omkring 56 pct. af det samlede bruttonationalprodukt, mens industrien udgør godt 41 pct. Omkring 50 pct. af arbejdsstyrken er ansat i handel og service, mens en tredjedel er ansat i fremstillingserhvervene samt i bygge- og anlægssektoren. Landbruget spiller en beskedne rolle med en andel på 3 pct. af BNP og 6 pct. af beskæftigelsen.

Japan er, med sin stærke industri, blandt verdens førende på områder som stålprodukter, elektronisk udstyr, biler, elektronik og telekommunikationsudstyr, maskinværktøjer, automatiserede produktionsanlæg, tog, skibe, tekstiler og forarbejdede fødevarer. Til gengæld er Japan fuldstændig afhængig af import af en stor del af sine råvarer og energi.

Japan har oparbejdet et betydeligt underskud på de offentlige finanser gennem de senere år, bl.a. fordi regeringen har søgt at puste liv i økonomien op gennem halvfemserne ved hjælp af de offentlige finanser.

Landet har på grund af den stærke industrialisering og den store befolkningstæthed store miljøproblemer, bl.a. i form af luftforurening og deraf følgende syreregn, og i form af forsurening af søer og drikkevandsreservoirer. Samtidig har det store forbrug af fisk og af tømmer været med til at udtynde ressourcerne på disse områder – ikke alene i Japan, men i hele Sydøstasien.

2.2.2 Implementering af GPA

Offentlige udbud i Japan foregår i høj grad på et decentraliseret plan. Der er indbygget udbudsprocedurer i de forskellige dele af det formelle grundlag for de centrale regeringsafdelinger og i de retsregler, der danner grundlaget for de lokale og regionale administrationer. De centrale myndigheder fører også tilsyn med, at udbudsreglerne er korrekte og at de bl.a. opfylder kravene fra GPA. På det centrale plan er 30 ministerier og 84 offentlige og halvoffentlige institutioner omfattet af GPA.

I overensstemmelse med GPA gælder der ikke nogen særlige oprindelsesregler – hverken for leverandører eller for varer – og der anvendes ikke-diskriminatoriske principper for udbud. Dette gælder også siden 1996 for sub-centrale myndigheder. Det skal især bemærkes, at Japan på en række områder, bl.a. computerprodukter og relaterede tjenester, telekommunikationsprodukter og -tjenester, medicinske apparater samt bygge- og anlægsarbejder er gået videre i liberaliseringen end krævet af GPA.

Der anvendes i reglen en af følgende tre typer af udbudsprocedurer:

- Offentlige udbud, hvor den pågældende myndighed annoncerer efter bud, og her er princippet, at kontrakter går til det laveste bud. Man forsøger i Japan at anvende denne form for udbud i videst muligt omfang for alle kontrakter (dog undtagen bygge- og anlægskontrakter) til en værdi af over SDR 100.000.

- Begrænsede udbud anvendes også i nogle tilfælde. Som regel foretages der en meddelelse om udbuddet i de officielle medier, hvor også kvalifikationskriterierne oplyses. På basis af de indkomne forslag udvælges en række virksomheder, der får adgang til at afgive bud. Hovedprincippet for valg mellem buddene er den laveste pris under de givne betingelser og specifikationer.
- I enkelte undtagelsestilfælde kan myndigheder få lov til at tildele kontrakter uden konkurrence. Disse undtagelsestilfælde kan bl.a. være, hvis ingen potentiel leverandør har reageret på en meddelelse om et offentligt eller et begrænset udbud, eller hvis der er tale om specielle forhold, f.eks. patenter, der gør, at kun én virksomhed i realiteten kan levere det ønskede.

Der foreligger oplysninger om brug af de enkelte udbudsformer i Japan, og selv om tallene ikke er helt up to date, giver de en indikation af, hvilke procedurer der typisk anvendes. Tallene er i pct. af samtlige.

	1994	1995	1996	1997
Offentlige udbud (antal kontrakter)	79,8	84,9	82,2	81,2
Offentlige udbud (værdi)	70,2	76,1	71,0	69,7
Begrænsede udbud (antal kontrakter)	8,9	4,2	3,0	2,6
Begrænsede udbud (værdi)	11,6	4,2	3,5	3,6
Uden konkurrence (antal kontrakter)	11,3	10,9	14,8	16,2
Uden konkurrence (værdi)	18,2	19,7	25,5	26,7

Selv om de offentlige udbud klart vejer tungest til – såvel i antal kontrakter som i værdi – spiller de exceptionelle 'udbud uden konkurrence' alligevel en stor rolle, og de står for op mod en fjerdedel af den samlede værdi af offentlige udbud. Hvis man spørger de japanske udbudsgivere om, hvorfor de har brugt denne metode, svarer 22 pct. af dem, at der ikke var et tilfredsstillende svar på en forudgående meddelelse om et offentligt eller et begrænset udbud, 27 pct. siger, at det skyldes copyright eller lignende forhold, mens 45 pct. siger, at det skyldes, at et skift af leverandør ville medføre manglende kompatibilitet med allerede indkøbt og fungerende udstyr. Af andre – mindre betydningsfulde – svar kan nævnes, at der har været tale om udstyr eller lignende, som var udviklet specielt for den pågældende offentlige myndighed.

Det er i realiteten en forudsætning for at kunne deltage i såvel de offentlige som i de begrænsede udbud, at virksomhederne har fået en attest fra de relevante myndigheder på, at de er kvalificerede og at de er

optaget på listerne over kvalificerede tilbudsgivere. De oplysninger, der normalt kræves, vedrører:

- Virksomhedens historie
- Oplysninger om virksomhedens økonomiske situation, og
- Beviser for, at alle skatter m.m. er betalt.

Virksomhederne på listen inddeles normalt i tre kategorier, A, B og C. I hvilken gruppe, man kommer, fastsættes efter objektive kriterier, der primært angår virksomhedernes økonomiske kapacitet og hvor længe virksomheden har eksisteret. Det er da også sådan, at virksomhederne kommer i betragtning til udbud af givne størrelser efter i hvilken kategori, de er placeret.

Varigheden af kvalifikationerne er i reglen 1-2 år.

For udbud over GPA-tærskelværdierne sker meddelelserne om udbud mindst 40 dage før afleveringsfristen, og udbudsmeddelelserne giver de oplysninger, der skal til for at kunne afgive et bud. Der kan også være tale om informationsmøder, hvor yderligere detaljer om projekterne bliver givet.

Japan har tidligere praktiseret et system med *minimumspriser* i forbindelse med udbud – især i de regionale administrationer. Der blev her sat en minimumspris for bud – den lavest tilladelige pris – som blev fastsat på et niveau på 20 pct. under den af myndigheden estimerede pris. Derefter blev alle bud under denne grænse automatisk ekskluderet – alene af denne grund. Systemet er (i hvert fald officielt) opgivet efter indførelsen af GPA, der ikke giver mulighed for at praktisere et minimumsbuds princip.

Systemet blev praktiseret fordi man mente, at bud under 20 pct. af den skønnede værdi af kontrakten ofte ville kunne føre til, at den virksomhed, som vandt kontrakten, ikke ville kunne udføre arbejdet på et tilfredsstillende kvalitetsniveau til en så lav pris. Men systemet eliminerer samtidig i høj grad priskonkurrencen, og det i særlig høj grad i forbindelse med internationalisering af udbuddene. Den skønnede minimumspris var nemlig typisk baseret på japanske erfaringer og omkostningsniveau, og derfor kan systemet ofte medføre en udelukkelse af udenlandske bud, der er konkurrencedygtige, fordi de kommer fra et land, der på det pågældende område er mere konkurrencedygtig end Japan.

Udbud under grænseværdierne

På det seneste har Japan taget skridt til at åbne de offentlige indkøbsmarkeder ud over, hvad der er krævet i GPA-reglerne. Således er den normale tærskelværdi for varer og tjenester, der i GPA er fastsat til SDR 130.000, nu SDR 100.000.

Publikation af udbud

Det officielle organ for udbudsmeddelelser er *Kanpo* (og i visse tilfælde lignende lokale officielle meddelelsesorganer). *Kanpo* er Japans officielle regeringsorgan, og det udgives af 'the Printing Bureau of the Ministry of Finance'. Man kan abonnere på tidsskriftet ved henvendelse til det ovennævnte bureau på adressen:

Kasumigaseki 1-2-1
Chiyoda-ku
Tokyo
Tlf.: +813 3504 3885

I dag er den japanske eksport Handelsorganisations *Government Procurement Database System* (JETRO) dog nok det vigtigste medium for virksomheder, der er interesserede i at prøve kræfter med det japanske udbudsmarked. Man kan få adgang til databasen på adressen: <http://www.jetro.go.jp/cgi-bin/gov/givint.cgi/html>

Her kan man søge på udbud efter en række kriterier, f.eks. type af meddelelser, produkter, tidsperioder og meget mere.

Man kan også kontakte JETRO's 'Government Procurement Information Liaison' på:

Tlf.: +813 3582 5549
Fax: +813 3589 4179

Klageinstanser

'The Office of Government Procurement Review' (OGPR) i statsministerens kontor, er øverste ansvarlige myndighed for implementeringen af GPA i Japan. Dette kontor udarbejder også en årlig rapport om status for det offentlige udbudsmarked i Japan. Denne rapport er i øvrigt solid læsning om det japanske udbudsmarked (og giver en række oplysninger om delmarkeder, f.eks. om telekommunikationsudstyr, medi-

cinsk udstyr, computere m.m.), og den kan hentes på Internettet på adressen:

<http://www.sorifu.go.jp/whitepaper/gaisei/shotatsu/english/index.html>

Klager over udbudsforretninger under den centrale regering behandles normalt af Government Procurement Review Board, mens der er oprettet særlige procedurer for de enkelte sub-centrale myndigheder.

Kontakt detaljer for sekretariatet for Government Procurement Review Board findes nedenfor under 2.2.6.

Der kan findes en udmærket vejledning i klagesystemet og dets anvendelse på Internettet på adressen:

<http://www.epa.gp.ja/chousei/chans/chans-e-1.html>

På denne internetside kan man også finde oplysninger om, hvem der deltager i behandlingen af klagesager på de forskellige områder.

2.2.3 Markederne

Det samlede marked for offentlige udbud er efter de seneste officielle opgørelser (vedrørende 1997) på 964 mia. JPY, svarende til 50 mia. danske kroner. Det er en opbremsning i forhold til de senere års store vækst i udbudsmarkedet, hvis værdi kan opgøres således over de seneste år:

	1994	1995	1996	1997
Totalt antal kontrakter	10.613	11.700	14.293	16.293
Total værdi af markedet i mia. JPY	7,318	8,452	9,753	9,640

Man kan dog ikke sige, at udenlandske leverandører spiller nogen fremtrædende rolle på det japanske udbudsmarked.

På tjenesteydelsesområdet blev således kun 2,3 pct. af samtlige kontrakter (målt efter værdi) tildelt udenlandske leverandører, mens 97,7 pct. tilfaldt japanske virksomheder. Det var faktisk kun på nogle informationsteknologiske områder (on-line services og databaser) samt på computerområdet, at der overhovedet var nogen udenlandsk deltagelse.

På vareleveranceområdet er situationen lidt anderledes, idet omkring 14 pct. af samtlige ordrer i 1996 gik til udenlandske leverandører. På følgende områder var der en høj andel af udenlandske leverandører:

Varetype	Procent andel af udenlandske leverandører (efter værdi)
Kemiske produkter	89,1 pct.
Lægemidler	30,3 pct.
Jernbaneudstyr	57,7 pct.
Fly	73,9 pct.
Medicinsk udstyr	39,1 pct.
Videnskabelige apparater	25,1 pct.
Total	14,1 pct.

De japanske statistikker viser følgende fordeling på hovedregioner af de udenlandske leverandører for 1997 (i pct.):

	Værdi af kontrakter	Antal kontrakter
USA	56,0	53,6
EU	24,9	18,6
Andre	19,1	27,8
I alt	100,0	100,0

Danske virksomheder fik i dette år kontrakter under GPA-reglerne til en værdi af 206 millioner SDR, hvilket er en relativt høj andel, Danmarks størrelse taget i betragtning. Det var således ca. 20 pct. af Tysklands andel i markedet.

2.2.4 Forventninger på mellemlangt sigt

Den japanske regering venter selv, at der i løbet af 1999 sker en vending af økonomien, så den efter den økonomiske og finansielle krise igen kommer ind på et spor, der vil vise positiv økonomisk vækst. Det er i denne forbindelse vigtigt at notere sig, at der er iværksat en række offentlige foranstaltninger, som skal stimulere efterspørgselen i økonomien og støtte opsvinget i erhvervslivet.

Man har f.eks. øget de offentlige investeringer i anlægsarbejder med 10 pct., og det indbefatter vejforbedringer, forbedring af miljøet, kontrol med erosioner og oversvømmelser, lufthavnsbyggeri og havneforbedringer. Der er også iværksat et offentligt støttet boligbyggeri. Disse in-

vesteringer vil naturligvis have en effekt også i de kommende år, men det skal ikke ventes, at regeringen kan øge de offentlige investeringer tilsvarende i de kommende finansår. Det tillader problemerne med underskud på de offentlige finanser ikke.

Der er i dag 17 millioner japanere i aldersgruppen over 65 år. Det svarer til 13 pct. af befolkningen. I 2025 vil denne andel være nået op på mere end 25 pct. Der skal derfor ske en udvidelse og en forbedring af ældreforsorgen, ligesom der forventes en øget efterspørgsel efter handicap- og rehabiliteringsudstyr. Der er vedtaget en lov, som fra 2000 skal sikre, at alle ældre får deres behov for sygepleje opfyldt. På baggrund af den i forvejen ganske gode danske situation på dette område, skulle der være gode muligheder for en forøgelse af eksporten til denne del af udbudsmarkedet.

Japanske kilder skønner ligeledes, at der vil være en konstant vækst i efterspørgselen efter lægemidler på 4-5 pct. om året de kommende år. Også på det medico-tekniske område ventes der vækst. Japan indkøber for mere end 45 mia. kroner udstyr af denne type om året, og der ventes en vækst på 5 pct. om året de næste fem år. Det er samtidig værd at bemærke, at omkring 40 pct. af alt sådant udstyr i dag importeres, og at tendensen til import er stigende.

Der skønnes ligeledes på mellemlangt sigt at være gode og stigende muligheder for eksport af miljøudstyr og løsninger på miljøproblemer til Japan. Der er f.eks. interesse for vindenergi, og opbygningen af vindmølleparker er startet i Japan. De næste 10 år ventes andelen af elproduktionen fra denne energikilde at stige fra de nuværende 9 MW til 300 MW om året. Også bioenergi spås en stor fremtid. Affald producerede 890 MW i 1996, og målet er en energiproduktion fra denne kilde på 4.000 MW i 2010.

Som nævnt ovenfor har man i det seneste par år gjort en del for at åbne og liberalisere de offentlige indkøbsmarkeder i Japan. Det er bl.a. sket ved at sænke tærskelværdierne, ved større åbenhed og bedre annoncering af udbud og ved at afholde en række seminarer for potentielle leverandører, jf. afsnit 2. Dette kan også medvirke til at åbne markedet – og give nye muligheder – for udenlandske, herunder danske, leverandører. Der har da også vist sig stor interesse for deltagelse i disse seminarer, idet der frem til og med 1996 havde været i alt 149 udenlandske virksomheder som deltagere ud af i alt 752 deltagende. Til slut skal det i denne forbindelse nævnes, at Europa-Kommissionen for øjeblikket er ved at undersøge, om der gives fortrinsstilling til amerikanske leverandører i forbindelse med liberaliseringen af udbudsmarkedet. Denne

frygt eksisterer i EU, og det synes som om det hårde amerikanske pres mod Japan generelt for at åbne markederne har givet resultater, som er skæve til fordel for USA.

2.2.5 Barrierer og muligheder for danske virksomheder

Danske virksomheder, der ønsker at gå ind på det japanske marked, skal som alle andre først lade sig registrere og opnå et certifikat for at være en kvalificeret leverandør. Dette betyder også, at man bliver optaget på den pågældende institutions leverandørliste. Desværre skal dette ske i forbindelse med den konkrete myndighed, og ønsker man derfor f.eks. også at deltage i udbud på lokalt eller regionalt plan kan det være en barriere. Det er desuden ret forskelligt, hvor lang tid registreringer tager og hvilke procedurer, der anvendes, så der ligger i denne registrering forhold, som kan være en alvorlig barriere. Registreringen tager ofte længere tid end de 40 dage, der normalt går mellem publicering af udbud og afleveringsfristen.

Det skal dog tilføjes, at den japanske regering har henstillet til alle myndigheder, der er omfattet af GPA, at de bør indrette disse registreringssystemer på en mere ensartet og overskuelig måde, og at de skal gøre sig særlig umage for, at systemerne er brugervenlige for udenlandske virksomheder, så der kan måske være forbedringer på vej på dette område. Der er nemlig ingen tvivl om, at selv om japanske og udenlandske leverandører formelt skal gennem den samme proces, så er det langt vanskeligere og mere bureaukratisk for udenlandske firmaer at registrere sig, end det er for japanske.

Fra Europa-Kommissionens side siger man, at selv om GPA-reglerne på papiret er gennemført i Japan, så vil det være ønskeligt at få ændret mentaliteten hos mange indkøbere – især på et lavere, operationelt niveau. Det siges f.eks., at det er yderst sjældent, at udenlandske virksomheder inviteres til at deltage i begrænsede udbud. Det forhold, at man i reglen anvender laveste pris som kriterium for tildeling af kontrakter, kritiseres også af EU. Det tillader nemlig ikke anvendelsen af materialer af højere kvalitet, og dermed en højere økonomisk værdi totalt set, at konkurrere med billigere japanske varer af ringere kvalitet.

Det japanske udenrigsministerium advarer også i en publikation om offentlige udbud om, at man i hovedsagen taler japansk i Japan, og at de færreste myndigheder vil være i stand til at håndtere udbudsforretninger – eller selv forespørgsler om sådanne – på andre sprog end japansk.

Statistikkerne viser, at der på tjenesteydelsesområdet stort set ikke er udenlandske leverandører, som får ordrer. Det kunne indicere, at de sprogmæssige og kulturelle barrierer på serviceområdet simpelt hen er for store til at udenlandske virksomheder kan begå sig på markedet. I denne forbindelse kan i øvrigt henvises til det program, som Europa-Kommissionen sammen med de japanske myndigheder finansierer for europæiske forretningsfolk, som ønsker at lære at begå sig på det japanske marked generelt.

Danske virksomheder, der ønsker at gå ind på det japanske udbudsmarked, skal være opmærksom på, at der findes en række tekniske standarder – først og fremmest Japan Industrial Standard – som ganske vist ikke ifølge de officielle regler kan anvendes i forbindelse med udbud, men som i realiteten og i praksis er gældende. Det blev således sagt i forbindelse med interviews af danske virksomheder til denne rapport, at 'japanske virksomheder er så veletablerede og har opbygget et så nært samarbejde med myndighederne, at specifikationerne udelukkede alle andre virksomheder end de japanske.' Man skal også i denne forbindelse erindre sig den stærke japanske tradition for samarbejde mellem regering og industri, og virkningen af de ovenfor nævnte 'keiretsu'.

Der findes en række barrierer for udenlandske virksomheders deltagelse i bygge- og anlægsmarkedet i Japan, herunder ikke mindst en række licensarrangementer. Der gøres dog en del i Japan for at fjerne disse hindringer, f.eks. skal virksomheder ikke længere have en erfaring i Japan at henviser til. Nu accepterer myndighederne erfaringer fra andre lande, hvis de er veldokumenterede. Desuden arbejder man på at få de regionale myndigheder til at lade være med at forlange oplysninger om virksomheder og produkter, der ikke er krævet i lovgivningen (herunder den af GPA afledte lovgivning).

Der er dog fortsat problemer med høje omkostninger i forbindelse med at opnå licenser, og der lægges bl.a. fra Europa-Kommissionen et pres på Japan for at nedsætte disse priser, som ofte gør det vanskeligt eller umuligt for udenlandske virksomheder at opnå den registrering, der skal til for at kunne være med i udbud. EU har klaget til de japanske klageorganer over disse problemer og har i tillæg krævet, at en række europæiske arkitektuddannelser skal kunne ligestilles med japanske førsteklases arkitekter.

Et andet område, der ifølge Europa-Kommissionen ofte giver problemer, er 'bid-rigging' – eller 'mestergrise', som på japansk hedder

'dango'. Det er naturligvis imod GPA-reglerne at lave sådanne arrangementer, hvor en gruppe af leverandører på forhånd bestemmer, hvem der skal vinde kontrakten og indretter deres bud efter det. Det er forbudt i forhold til de japanske regler. Men de findes, og de findes især inden for byggeindustrien, hvor de bidrager til at højne prisniveauet, fordi konkurrencen bliver elimineret. Så på dette område er Japan måske ikke så forskellig fra mange andre lande – også i EU. Men det skal også nævnes, at et tæt forhold mellem embedsmænd og politikere og byggeindustrien i Japan har givet anledning til unfair konkurrence.

Også en garantibetaling på typisk 5 pct. af kontraktsummen i forbindelse med tildeling af kontrakter kan udgøre en barriere især for udenlandske virksomheder. I nogle tilfælde forlanger myndighederne, at der stilles en garanti efter arbejdets udførelse mod defekte produkter eller fejl ved bygge- og anlægsarbejder. Det kan være svært for især mindre virksomheder at skulle stille en sådan garanti for en længere periode.

Japan er dog på vej til at blive et mere konkurrencebetonet samfund end det har været tidligere, og det er ikke mindst på grund af liberaliseringerne og den deraf følgende udenlandske konkurrence på markedet. På udbudsmarkedene er de hårdeste konkurrenter nok de lokale leverandører, som f.eks. på tjenesteydelsesområdet er næsten enerådende. Adgang til markedene vil være lettest på områder, hvor japanerne selv er relativt svage, bl.a. på miljøområdet, på forsøgsområdet og på sundhedsområdet, men her skal der påregnes konkurrence fra bl.a. amerikanske, tyske og britiske virksomheder og fra andre asiatiske lande.

Samlet har den danske succes på det japanske udbudsmarked hidtil været ganske god. Statistikkerne tillader ikke en detaljeret underopdeling af, på hvilke områder ordrene er faldet, men det må antages, at de største danske succeser ligger på vareleveranceområdet. Er man først registreret som en kvalificeret leverandør, og er man rede til at tilpasse sig de japanske standarder, forekommer markedet – ud over at være stort – også at være relativt åbent. Det vil i stigende omfang være muligt for danske virksomheder at søge oplysninger om udbud via de elektroniske udbudstjenester, men en kommerciel kontakt eller ligefrem en etablering i landet vil aldrig være til skade – specielt ikke, når det gælder opfyldelse af krav til eftersalgsservice m.m. og de sproglige krav.

2.2.6 Nyttige adresser i Japan

Eventuelle henvendelser om klager skal rettes til sekretariatet for Government Procurement Review Board:

Kasumigaseki 3-1-1
Chiyoda-ku
Tokyo 100
Tlf.: +813-3581 9576
Fax: +813-3581 9897
E-mail: chans.b@epa.go.jp

Den danske ambassade i Japan:

Royal Danish Embassy
29-6 Sarugaku-cho
Shibuya-ku
Tokyo 150-0033
Japan
Tlf.: +813 34 96 30 01
Fax: +813 34 96 34 40
Internet: <http://www.debmark.or.jp>

2.2.7 Konklusion

Implementering af GPA	Implementeringen af GPA synes at være på plads for så vidt angår alle formalia. Ændringer på det seneste af udbudsforholdene i den lokale forvaltning har korrigeret problemer der.
Åbenhed og transparens	Bl.a. på grund af et generelt pres på Japan for åbning af eksportmarkederne fra EU og USA, gøres der fra centralt hold en stor indsats for at åbne udbudsmarkedet for international konkurrence. Informationsmaterialet er af høj kvalitet og nemt tilgængeligt.
Klageorgan	Klageorgan er oprettet som krævet i GPA. Organet synes at være tilgængeligt.
Markedets størrelse	Markedet er principielt gigantisk, og det ventes

	at vokse på områder af central interesse for danske virksomheder.
Betydning for nabomarkeder	Japan giver ingen direkte adgang til nabomarkeder, men markedet er i sig selv så stort, at dette har mindre betydning.
Sproglige og kulturelle barrierer	Informationsmateriale – inkl. Internettet – findes i reglen på engelsk, men deltagelse i seminarer og i udbud skal normalt foregå på japansk. Der er kulturelle traditioner, som gør det vanskeligt for udenlandske leverandører at komme ind på markedet. 'Mestergrise' er ikke ukendte især i byggebranchen.
Markedsforventninger	Der er forventninger til vækst i udbudsmarkedet, dels på grund af satsninger på områder som miljø, sundhed og ældreomsorg, dels på grund af øget liberalisering af udbudsmarkedet.
Tradition for dansk eksport	Der er en høj grad af dansk tradition for eksport til Japan. Landet er Danmarks næststørste oversøiske eksportmarked, og Danmark har – som et af få lande i verden – et handelsoverskud med Japan.
Konkurrencesituation	På nøgleområder er der hård konkurrence fra lokale virksomheder, men også fra USA, Tyskland og UK – samt fra asiatiske lande.

2.3 Hong Kong

2.3.1 Administrative karakteristika

Hong Kong har siden 1997 været en 'Special Administrative Region' i Kina, og ifølge aftalen herom med Storbritannien skal Hong Kong fortsat have udbredt autonomi undtagen i udenrigs- og forsvarspolitikken.

Hong Kong dækker kun godt 1000 kvadratkilometer, og på dette beskedne areal bor der 6,7 millioner mennesker. Langt de fleste af dem er kinesere, og de officielle sprog i Hong Kong er engelsk og kinesisk (kantonesisk).

Der findes ingen specielle administrative opdelinger i Hong Kong. Regeringsapparatet består af et statsoverhoved (som er den kinesiske præsident Jiang Zemin), samt en regeringschef (Chief Executive) og en regering bestående af 3 ex-officio medlemmer (med ansvar for bl.a. finanser og justitsvæsen) samt 10 udpegede medlemmer.

Hong Kongs økonomi er stærkt baseret på servicefag, især handel og finans. Der er ingen landbrug af betydning i regionen, og industrien bidrager kun med 16 pct. til bruttonationalproduktet. Næsten 84 pct. af Hong Kongs værdiskabelse sker i servicefag.

Det samlede bruttonationalprodukt er i størrelsesordenen 1.400 milliarder kroner, og det gennemsnitlige bruttonationalprodukt pr. indbygger er på ca. 225.000 kroner. Hong Kong hører til blandt de 'asiatiske tigre' og har gennem en årrække været vant til økonomiske vækstrater i tigerklassen. Men efter en vækst i BNP i 1997 på næsten 6 pct., var der et fald i BNP i 1998 (på 4 pct.), og Hong Kong ventes at komme ud af 1999 med noget, der ligner nulvækst.

Hong Kong er helt afhængig af handel, og da der stort set ikke findes råmaterialer eller landbrugsproduktion, er afhængigheden af import meget stor. Det er kun omkring 13 pct. af den samlede arbejdsstyrke, som er beskæftiget med produktionsindustri og med byggeri, så stort set alt andet end tjenesteydelser importeres udefra.

Der er usikkerhed om, i hvilket omfang Hong Kong vil fortsætte med at handle med de traditionelle handelspartnere, dels på grund af den økonomiske krise, dels på grund af indlemmelsen i Kina. Der var allerede inden 1997 et nært handels- og investeringsmæssigt samkvem med

Kina, og det må formodes, at der i de kommende år vil ske en forskydning af de økonomiske relationer videre i den retning. I 1996 solgte Hong Kong 34 pct. af sin samlede eksport til Kina, og 37 pct. af al import til Hong Kong kom fra Kina.

Hong Kongs infrastruktur er excellent og understøtter de vigtige serviceerhverv. Telekommunikationen er moderne, udbredt, diversificeret og fremragende (Hong Kong er det største telekommunikationscenter i Asien), lufthavnen er måske verdens mest moderne, havnen er betydningsfuld og der findes et udbredt metrosystem i Hong Kong. Men det hører også med i billedet, at den kraftige urbanisering af Hong Kong har medført store miljøproblemer – især med luft- og vandforurening.

2.3.2 Implementering af GPA

Hong Kong har underskrevet GPA, men først i maj 1997, og denne situation er der ikke ændret på som følge af Hong Kongs ændrede status.

GPA er egentlig ikke implementeret ved lovgivning i Hong Kong, men gennem de såkaldte 'Stores and Procurement Regulations', som suppleres med såkaldte 'Financial Circulars'. I disse regler er grundlaget for offentlige indkøb lagt, og de er – over tærskelværdierne – i overensstemmelse med forpligtelserne i GPA.

Hong Kong anvender de 'sædvanlige' grænseværdier for omfattede udbud, nemlig SDR 130.000 for varer og tjenester og SDR 5.000.000 for bygge- og anlægsarbejder, for alle udbud fra regeringen. For kontrakter under bystyret og regionale organisationer anvendes SDR 200.000 for varer og tjenester og SDR 5.000.000 for bygge- og anlægsarbejder. Endelig gælder for udbud fra instanser, der ikke direkte hører under regeringen, en tærskelværdi på SDR 400.000 for varer og tjenester, mens SDR 5.000.000 også her er tærskelværdien for bygge- og anlægsarbejder. Blandt sådanne instanser kan nævnes the Housing Authority, the Hospital Authority, the Airport Authority, the Mass Transit Railway Corporation og the Kowloon-Canton Railway Corporation.

Som følge af Hong Kongs begrænsede muligheder for egenproduktion er der skabt en tradition for at købe ind på globalt plan og at få så megen konkurrence som muligt om leverancerne. Der er ingen særlige præferencer for lokale leverandører eller for særlige sektorer, som f.eks. mindre virksomheder.

Hong Kong anvender to principielt forskellige former for udbud. For indkøb af varer og tjenester samt bygge- og anlægsarbejder anvendes egentlige udbudsprocedurer i de tilfælde, hvor det, som planlægges indkøbt, kan specificeres præcist. I andre tilfælde, f.eks. i forbindelse med konsulenttjenester til problemløsning, eller i tilfælde hvor man ikke præcist kan specificere eller definere de forhold, der bestemmer kvaliteten af ydelsen, anvendes en procedure, som kaldes 'consultants selection'. Der kræves normalt i forbindelse med begge procedurer en tre-ugers periode fra meddelelsen om udbudsforretningen til buddene skal afleveres for at give såvel lokale som udenlandske virksomheder mulighed for at byde. For de udbud, der ligger over GPA grænseværdierne, skal der dog være 40 dage mellem udbudsmeddelelsen og fristen for indlevering af bud.

Der anvendes offentlige udbud, hvor alle interesserede virksomheder kan afgive bud. Alle sådanne udbud meddeles gennem 'the Government of the Hong Kong Special Administrative Region Gazette' og i stigende omfang via Internettet.

I tilfælde, hvor der anvendes prækvalifikationer, meddeles dette også i den nævnte Gazette, eller der sendes en invitation til alle leverandører, som er optaget på de relevante leverandørlistor. Udvælgelsen af de virksomheder, som får adgang til at byde, sker normalt efter kvalifikationskriterier eller tekniske krav, som bliver meddelt på forhånd.

I enkelte tilfælde, hvor helt specielle forhold gør sig gældende, kan man anvende udbud, hvor en enkelt eller nogle få leverandører inviteres til at afgive bud. Denne form kan kun anvendes, hvis den er godkendt af finansministeren eller direktøren for offentlige forsyninger.

Der findes en række 'Tender Boards', som har kompetence til at tage beslutning vedrørende udbud:

- *Central Tender Board* har under forsæde af finansministeren ansvaret for de helt store udbudsforretninger, hvis samlede værdi ligger ud over, hvad andre Tender Boards kan tage sig af. Dette board behandler under alle omstændigheder udbud for varer og tjenester til en værdi af over HK\$6 millioner og bygge- og anlægsarbejder til en værdi af over HK\$15 millioner.
- *Government Supplies Department Tender Board* (vareindkøb til en værdi af maksimalt HK\$6 millioner)
- *Public Works Tender Board* (bygge- og anlægskontrakter under HK\$15 millioner).

- *Home Affairs Department Tender Board* (mindre udbud vedrørende offentlige arbejder og miljøarbejder – op til HK\$3 millioner)
- *Marine Department Tender Board* (maritime udbud til en værdi af op til HK\$3,5 millioner).
- *Printing Department Tender Board* (trykkearbejder til maksimalt HK\$2,5 millioner).

Udbud under grænseværdierne

Der anvendes også ofte formaliserede udbudsregler for indkøb under GPAs tærskelværdier. I sådanne tilfælde vil sagerne ofte blive afgjort af såkaldte 'tender boards', eller af en embedsmand, som bliver autoriseret hertil af finansministeren.

Indkøb af varer til en værdi af under 500.000 HK\$ (ca. 10.000 kroner) og tjenester til en værdi af under HK\$ 1 million (ca. 20.000 kroner) kan indkøbes direkte af det pågældende offentlige organ uden særlige procedurer, men normalt skal der alligevel indhentes mindst fem tilbud, og det laveste bud, som opfylder specifikationerne, skal tildeles kontrakten.

Publikation af udbud

Meddelelser om udbud af varer til en værdi af over HK\$500.000 og tjenester til en værdi af over HK\$1.000.000 publiceres ugentligt på engelsk og kinesisk i 'Government of the Hong Kong Special Administrative Region Gazette'. En række offentlige myndigheder bruger også i stigende omfang meddelelser via Internettet.

Udbudsmeddelelser indeholder informationer om, hvem der står for udbuddet, hvad der ønskes indkøbt, hvorfra yderligere materiale kan indhentes, hvor buddene skal afleveres, og hvornår det senest skal ske.

Der bringes meddelelse om, hvem der har vundet kontrakter gennem udbudsforretninger i den nævnte Gazette ved udløbet af måneden efter afgørelsen om kontrakterne. Der bruges her bl.a. oplysninger om den pågældende kontrakt, hvem der har fået den tildelt, og hvad kontraktsummen er.

Klageinstanser

Der er mange muligheder for at klage over udbudsforretninger i Hong Kong. Man kan klage til den udbydende myndighed, til det relevante 'tender board', til 'the Independent Commission Against Corruption'

eller til Hong Kongs ombudsmand. Hong Kong er i færd med at strømlinje klagesystemet – i hvert fald hvad angår udbud under GPA-reglerne – ved at skabe et 'Bid Challenge Review Body', som skal tage sig af eventuelle problemer med udbud, der følger GPA. Dette organ var ved redaktionens slutning endnu ikke etableret.

2.3.3 Markederne

I finansåret 1996/97 (det seneste der findes statistik for) var værdien af de samlede offentlige indkøbskontrakter på vareområdet på ca. 3,5 mia. kroner. I samme finansår blev der tildelt kontrakter på bygge- og anlægsområdet til en værdi af ca. 16 mia. kroner.

For vareindkøbsområderne bør man være opmærksom på, at regeringen har et centralt indkøbskontor, der køber varer af den type, som ofte anvendes i mange typer af regeringsinstanser, f.eks. elektriske apparater, kontormaterialer og lægemidler. Det centrale indkøbskontor ('the Government Supplies Department') har egne varelagre og køber ind på vegne af andre dele af den offentlige sektor gennem særlige bevillinger, som 'betales tilbage' af de forskellige dele af regeringen i takt med, at varerne leveres. Det kan tilføjes, at GSD også står for indkøb til en række non-governmentale organisationer. GSD har en leverandørliste med ca. 4.000 registrerede potentielle leverandører.

GSD ventes i de kommende år at foretage store indkøb af computersystemer, hospitalsudstyr, lægemidler, telekommunikationsudstyr og meget mere (se også nedenfor).

Når GSD køber ind, gælder i høj grad konkurrenceprincippet og 'Best value for money'. GSD lægger normalt vægt på stringent opfyldelse af udbudskriterierne, leveringsdygtighed og -sikkerhed samt konkurrenceedygtighed ikke alene på prisen, men også på eventuel installation og eftersalgsservice.

På bygge- og anlægsområdet, derimod, står de enkelte dele af regeringen for egne indkøb – dog under generel koordination og tilsyn af 'the Works Bureau'. Dette organ har også et register over byggefirmaer og har etableret et system for evaluering af disse firmaer. Works Bureau har en leverandørliste med 320 virksomheder, der er godkendt som potentielle leverandører.

Endelig indkøber den offentlige sektor en række tjenesteydelser decentralt. Det gælder især rengøring, drift af bygninger, drift af transportsystemer og affaldshåndtering.

I forbindelse med indkøb af varer er der i Hong Kong en tradition for at købe ind på globalt plan gennem offentlige udbud, hvor det er muligt. Der søges den højeste mulige værdi for skatteydernes penge i disse tilfælde, og der anvendes normalt kun udbudsformer benævnt ”restricted tenders” og ”single tenders” ved vareindkøb, i de tilfælde hvor det sker for at sikre kompatibilitet med eksisterende udstyr eller i forbindelse med patenterede produkter.

Også på tjenesteydelsesområdet søges der normalt maksimal konkurrence gennem offentlige udbud, mens bygge- og anlægsarbejder i reglen tildeles efter indbudte licitationer, hvor firmaer, der er opført på de relevante lister inviteres til at byde.

2.3.4 Forventninger på mellemlangt sigt

Økonomien har som nævnt været i en nedgangsfase, og der kan næppe ventes mere end nulvækst i 1999. Til gengæld regnes der med en lille stigning i såvel det offentlige forbrug som i investeringerne, hvilket kunne indicere en stigning i markedet for offentlige udbud.

De officielle prognoser peger på følgende udvikling i økonomien:

	1999-2000	2000-2001	2001-2002	2002-2003
BNP i pct.	-0,5	3,5	3,5-4,0	4,0
Offentlige udgifter (mia. HK\$)	241.6	250.6	266.0	283.2

Der gives via Internettet forhåndsmeddelelse om ventede større udbudsforretninger inden for de kommende 12 måneder på adressen:

<http://www.info.gov.hk/gsd/forecast.htm>

Her findes meget detaljerede beskrivelser af de forventede udbudsforretninger i en meget brugervenlig form (på engelsk). De forventede udbud er opdelt på en række undergrupper.

Interesserede virksomheder kan registrere sig på nedenstående adresse, hvor man også kan inspicere de lister over potentielle leverandører, der allerede er registreret. Denne metode kan f.eks. anvendes til at skaffe sig et overblik over potentielle konkurrenter:

Supplies Officer (Supplier Registration)
Government Supplies Department
9/F, North Point Government Offices,

333 Java Road,
North Point,
Hong Kong.
Tlf.: +852 2231 5289
Fax: +852 2807 2764
E-mail : hktender@gsd.gcn.gov.hk

Miljøproblemerne i Hong Kong er stigende, og det vil være nødvendigt med betydelige investeringer i denne sektor i de kommende år, hvis livsstilen skal kunne fastholdes.

En nedbringelse af affaldsmængderne har højeste prioritet. Kapaciteten for Hong Kongs lossepladser vil blive fuldt udnyttet om maksimalt 10 år, og da man i dag kun forbrænder 10 pct. af affaldet, er der brug for mere moderne affaldshåndteringsmetoder.

Overvejelserne går især på at bruge waste-to-energy teknikker, og der er allerede indledt feasibility studier for sådanne anlæg. Der vil, ifølge planerne, i første omfang blive opført et forbrændingsanlæg med en kapacitet på 1 million tons om året (ca. 1/8 af den totale affaldsmængde i øjeblikket), og dette projekt vil blive gennemført på *design, build and operate* vilkår.

Der vil også være muligheder i forbindelse med store kloakerings- og spildevandsprojekter, herunder et projekt kaldet *Strategic Sewage Disposal Scheme*, som er under udvikling.

Der vil generelt i de kommende år blive brug for moderne udstyr, teknologi og know how på miljøområder som spildevandsrensning, affaldsbehandling og luftrensning, ikke alene i Hong Kong, men i hele Perleflodsdeltaet – dvs. i høj grad også i Kina. Selv om man ikke kan påregne, at projekter i selve Kina vil følge kendte udbudsregler, kan succesfulde løsninger i Hong Kong, vundet gennem GPA-udbud, meget vel føre til nye ordrer i det kinesiske bagland for danske virksomheder.

Hong Kong importerer i stigende grad lægemidler, og danske eksportører bør være opmærksom på mulighederne i at sælge gennem det offentlige indkøbskontor *Government Supplies Department*. Her købes

normalt gennem virksomheder, der er registreret på en leverandørliste (se ovenfor).

En række hospitaler og klinikker gennemgår i denne tid moderniseringer, og der indkøbes en del udstyr og instrumenter til denne sektor, også gennem *Government Supplies Department*. Der ventes i de kommende år gode muligheder for afsætning af revaliderings- og handicapudstyr samt udstyr til ældresektoren. Omkring 10 pct. af Hong Kongs indbyggere er over 65 år gamle.

På anlægsområdet har især den nye lufthavn, Chek Lap Kok, påkaldt sig interesse, men selv om lufthavnen blev taget i brug i sommeren 1998, er investeringerne i tilknytning til dette vigtige infrastrukturprojekt ikke ovre. Dels vil man udvide lufthavnen frem mod 2040 i et hæsbælende tempo: Fra i dag at kunne håndtere 35 millioner passagerer og 3 millioner tons luftfragt om året, skal lufthavnen om 40 år kunne klare 87 millioner passagerer og 9 millioner tons fragt om året. Men der er også andre anlægsprojekter, knyttet til lufthavnen, som vil blive igangsat i de kommende år.

Også Hong Kongs vigtige havn står over for betydelige udbygninger, og det offentlige venter at opføre omkring 50.000 boliger om året de næste fem år. Det giver muligheder for salg ikke alene af entreprenørydelser, men også af møbler, køkkenelementer osv. samt byggematerialer, f.eks. døre, gulvbelægning, ventilations- og sanitetsartikler og meget mere. Langt de fleste af de offentlige boliger er små (op til 70 kv.m.) så praktiske, standardiserede løsninger vil være i fokus.

2.3.5 Barrierer og muligheder for danske virksomheder

Hong Kong er Danmarks næststørste eksportmarked i Asien og er for mange danske virksomheder den vigtigste vej ind til det kinesiske marked. Flere dansk-kinesiske joint ventures er etableret via holdingselskaber i Hong Kong, og danske industriprodukter og fødevarer har fået en god position i Hong Kong. Dermed er der en tradition for dansk erhvervsliv på stedet, og en række virksomheder er allerede så veletablerede – alene eller gennem agenter – at de også meget vel kan deltage i det åbne system for offentlige indkøb.

Det passer formentlig også danske virksomheder godt, at markedet er relativt 'rent'. Ifølge det internationalt anerkendte 'korrupsionsindeks' fra Transparency International har Hong Kong en pæn placering på li-

sten over verdens mest korrupte lande – som det 16. mindst korrupte ud af 85 lande.

Der er danske banker etableret i Hong Kong, og havnen er et meget vigtigt knudepunkt for Maersks verdensomspændende container- og linietrafik.

De statistikker, der findes over udbudsforretninger i Hong Kong siden underskrivelsen af GPA i 1997 viser, at der i mere end halvdelen af udbuddene blev valgt en udenlandsk leverandør. Det er dog også klart, at Hong Kongs økonomi og erhvervsfordeling simpelt hen ikke gør det muligt for lokale leverandører at vinde alle kontrakter.

I 1997 kom danske virksomheder på en 20. plads over tildelte kontrakter efter offentlige udbud. De samlede kontrakter havde en værdi af HK\$22 mill., og de udgjorde en halv pct. af samtlige offentlige kontrakter dette år. Fordelingen på de 10 største leverandører så således ud:

	Værdi i HK\$	Pct. andel
USA	1.099.002	25,7
Kina	665.054	15,3
UK	631.000	14,7
Tyskland	259.724	6,1
Japan	231.292	5,4
Australien	163.013	3,8
Schweiz	154.442	3,6
Canada	107,835	2,5
Sverige	102.718	2,4
Indonesien	75.964	1,8
Danmark	22.021	0,5

I 1998 var Danmark rykket op på en 17. plads, og i det år så fordelingen således ud:

	Værdi i HK\$	Pct. andel
USA	1.854.918	36,9

Kina	731.078	14,6
UK	416.569	8,3
Tyskland	333.681	6,6
Australien	278.051	5,5
Japan	248.147	4,9
Taiwan	147.238	2,9
Schweiz	134.464	2,7
Sverige	120.257	2,4
Holland	78.186	1,6
Danmark	31.957	0,6

Ifølge oplysninger fra Hong Kongs myndigheder er en række kontrakter blevet tildelt danske virksomheder, og i stort set alle tilfælde er den adresse, der er angivet, enten den pågældende virksomheds adresse i Hong Kong eller en agent i Hong Kong, men der er også (få) eksempler på direkte leverancer fra Danmark.

Hvis man påtænker at starte en eksport til udbudsmarkederne i Hong Kong skal man være opmærksom på, at landet er et af de mest konkurrenceprægede i verden. Man får konkurrence på alle fronter – fra Kina og fra store multinationale firmaer især fra USA, Storbritannien og Tyskland. Samtidig skal man være opmærksom på, at der ofte skal skabes tillid – ikke alene til den øjeblikkelige leverance, men også til eftersalgsservice og leveringsevne. Derfor vil en lokal etablering, eller eventuelt en lokal partner, ofte være en god idé for mange danske virksomheders aktiviteter på dette marked.

2.3.6. Nyttige adresser

En central reference i forbindelse med offentlige indkøb er:

Controller of Government Supplies
 Government Supplies Department
 9/F North Point Government Offices
 333 Japav Road
 North Point
 Hong Kong
 Tlf.: +852 2231 5226

Fax: +852 2897 2764
E-mail: hktender@gsd.gcn.gov.hk
Internet: <http://www.info.gov.hk/gsd/tender.htm>

Desuden kan henvises til:

Treasury Officer
Finance Bureau
Room 440, 4/F
Central Government Offices, East Wing
Lower Albert Road
Hong Kong
Tlf.: +852 2810 2497
Fax: +852 2869 4519
E-mail: tender@hk.super.net

Vedrørende procedurespørgsmål kan henvises til:

Secretary, Central Tender Board
Tlf.: +852 2810 2257
Fax: +852 2869 4519

Spørgsmål vedrørende registrering på leverandørlistor til tjenesteydelser kan rettes til:

For finansielle konsulenter:
Management Accounting Division, Finance Bureau
Tlf.: +852 2810 3757
Fax: +852 2869 4531

For generelle management konsulenter:
Management Services Agency
Tlf. +852 2810 2221
Fax: +852 2523 8680

For arkitekter:
Architectural Services Department
Tlf.: +852 2867 3618
Fax: +852 2877 0584

For rådgivende ingeniører:
Civil Engineering Department
Tlf.: +852 2762 5018
Fax: +852 2714 0064

Publicering af udbud:
 The Government of the Hong Kong Special Administrative Region
 Gazette
 Government Printing Department
 14/F Cornwall House, Taikoo Place
 979 King's Road
 Quarry Bay
 Hong Kong
 Tlf.: +852 2537 1910
 Fax: +852 2523 7195

Kongelig Dansk Generalkonsulat
 K240B, Great Eagle Centre
 23, Harbour Road
 Wanchai
 Hong Kong
 Tlf.: +852 2878 8101
 Fax: +852 2827 4555
 E-mail: dabconhk@netvigator.com

Følgende Internetside giver reference til flere nyttige oplysninger om offentlige udbud:
<http://www.info.gov.hk/fb/guide/english/usefu.htm>

2.3.7 Konklusion

Implementering af GPA	Hong Kong nåede at slutte sig til GPA lige før tilslutningen til Kina, og implementeringen synes forbilledlig.
Åbenhed og transparens	Hong Kong er afhængig af import på mange områder, og alene af den grund er landet åbent for udenlandske leverandører. Udbudsprocedurer og meddelelser om udbud er i høj grad transparente og let tilgængelige.
Klageorgan	Der er et virvar af klageinstanser i Hong Kong, men systemet er alligevel gennemskueligt og under revision og strømlining.
Markedets størrelse	Hong Kong er et lille 'land', men højt udviklet. Markedet må – set med danske briller – siges at være betydeligt.

Betydning for nabomarkeder	Hong Kong er i stigende omfang en port ind til Kina, og selv om Kina endnu ikke har tilsluttet sig GPA, kan gode referencer fra Hong Kong være af betydning for videre eksportarbejde i Kina.
Sproglige og kulturelle barrierer	Hong Kong er fortsat tosproget, og udbudsmeddelelser – og selve udbuddene – kan i reglen foretages på engelsk.
Markedsforventninger	Landet har klaret sig hæderligt gennem den asiatiske økonomiske krise, og der ventes en pæn udvikling af økonomien – og af udbudsmarkederne, især på miljø- og sundhedsområdet.
Tradition for dansk eksport	Hong Kong er traditionelt en stærk dansk handelspost i Sydøstasien, og mange danske virksomheder er etableret der eller har nær kontakt til lokale samarbejdspartnere.
Konkurrencesituation	Hong Kong er præget af meget hård konkurrence. På udbudsmarkedet skal der også ventes hård konkurrence fra bl.a. USA, UK, Tyskland og Kina.

2.4 Singapore

2.4.1 Administrative karakteristika

Republikken Singapore et lille land, der nærmest har karakter af en bystat, beliggende på en ø ved den sydlige del af fastlands-Malaysia. Landet dækker 640 kv.km. og har en befolkning på 3,5 millioner, som er altovervejende kinesisk.

Singapore løsrev sig fra Malaysia i 1965 og har siden været en republik inden for Commonwealth.

Singapores bruttonationalprodukt er kun på ca. 600 milliarder kroner, men til gengæld er BNP pr. indbygger højt, nemlig på ca. 25.000 USD svarende til omkring 175.000 danske kroner.

Der er ikke i denne bystat nogen regional administrativ opdeling. Singapore administreres fra den centrale administration, hvis enkelte dele varetager udbudsforretningerne i overensstemmelse med de centralt fastsatte regler. Finansministeriet er ressortministerium for offentlige indkøb i Singapore, men langt størstedelen af udbuddene varetages af ministerier, departementer og 'Statutory Boards', dvs. styrelser. Hvis der er tale om indkøb, som indbefatter varer eller tjenester, der bruges af alle eller mange dele af regeringsapparatet, varetages udbudsforretningerne af centrale indkøbsafdelinger, som f.eks. finansministeriets 'Expenditure and Procurements Policies Unit', forsvarsministeriet, 'the Pharmaceutical Department of the Ministry of Health', 'Construction Industry Development Board' eller 'the National Computer Board'.

Der gøres forsøg med indførelse af elektroniske udbud i Singapore. Forsvarsministeriet startede således i 1998 et nyt Internet Procurement System (MINDEF), som gør det muligt for forsvarrets indkøbsafdeling af indkalde forslag samt modtage bud og fakturaer elektronisk. Der kan allerede nu konstateres en effektivisering af indkøbsprocedurerne som følge af dette system. Firmaer, som ønsker at deltage i dette system, skal først have et Digitalt Certifikat, som sikrer korrekt identifikation og muliggør elektroniske underskrifter. Nærmere oplysninger kan fås via:

<http://www.sco.mindef.gov.sg> og
<http://www.mips.mindef.gov.sg>

Også mere generelt er Singapore avanceret med hensyn til elektroniske udbud, som det fremgår nedenfor.

2.4.2 Implementering af GPA

Singapore lever i høj grad af handel med varer og tjenesteydelser med store dele af verden. Derfor er landet helt afhængigt af en åben og fri verdenshandel, og Singapore er derfor også en stærk støtte for WTO og denne organisations bestræbelser på at åbne verdenshandelen.

Det er derfor også naturligt, at Singapore er medunderskriver af GPA, og implementeringen af GPA-reglerne ser ud til at være gennemført på en transparent måde, der følger aftalens ånd og bogstav.

Singapore har kun ét sæt af regler vedrørende offentlige udbud, nemlig 'the Government Procurement Act', og denne lov implementerer også GPA-reglerne.

Singapore har ikke særlige politikker i forbindelse med offentlige indkøb, der bruges til at fremme særlige sociale eller økonomiske mål, som f.eks. støtte til mindre virksomheder, særlige sektorer eller særlige regioner. Der er heller ingen særlige regler om lokalt indhold i offentlige indkøb.

For indkøb over GPAs tærskelværdier anvendes offentlige udbud, begrænsede udbud og – i undtagelsestilfælde – udbud efter forhandling. Det generelle princip er, at der skal anvendes offentlige udbud eller begrænset udbud, mens udbud efter forhandling kun kan anvendes, hvis særlige forhold taler for det. Anvendelse af begrænsede udbud skal altid godkendes af en overordnet embedsmand – for ministeriernes vedkommende en departementschef og for styrelser direktøren. Ifølge Singapores regler kan de begrænsede udbud anvendes i tilfælde, hvor der ikke er kommet svar på et tidligere offentligt udbud, hvis udbuddet drejer sig om national sikkerhed, eller hvis offentlige udbud er udelukkede eller upraktiske, f.eks. på grund af intellektuelle ophavsrettigheder, eller hvis der er tale om kunstneriske arbejder.

Tilbudsgiveres professionelle og finansielle kapacitet vurderes altid centralt, enten i finansministeriets udbudsafdeling for generelle udbud, eller for lægemidler i Sundhedsministeriet (Pharmaceutical Department) og for bygge- og anlægsarbejder i Byggestyrelsen (Construction Industry Development Board). (Se i øvrigt nedenfor om kontaktadresser og elektronisk registrering ved disse myndigheder).

Efter behandlingen i den relevante myndighed udstedes en attest, som leverandører kan anvende ved fremtidige bud i hele Singapore i stedet for igen at skulle fremlægge detaljeret information.

Hvis en virksomhed vinder en kontrakt, skal den være parat til at erlægge et depositum som sikkerhed for leverancerne. Det kan ske i form af en check eller i form af en garanti fra en anerkendt finansvirksomhed. Dette depositum vil normalt udgøre 5 pct. af kontraktværdien.

Udbud under tærskelværdierne:

Singapore anvender særlige udbudsformer for udbud under GPAs tærskelværdier. For de helt små indkøb – op til ca. 5.000 kroner – kan de enkelte administrative enheder købe 'hyldevarer' som de vil hos kendte leverandører. For indkøb på mellem S\$1.000 til S\$30.000 (fra ca. 5.000 kroner til ca. 150.000 kroner) indhentes tilbud hos potentielle leverandører. Der skal være mindst to embedsmænd involveret i proceduren, hvor den ene står for indkøbet, mens den anden godkender de valg, der er foretaget af indkøberen.

Publikation af udbud:

Alle meddelelser om nye udbud bringes på Internettet på 'Government Internet Tendering Information Service' (GITIS), der også indeholder information om terminer for behandling af modtagne bud og om tildeling af kontrakter.

På denne Internetside findes de informationer, der kræves i forhold til GPA, f.eks. om den udbydende myndighed, beskrivelse af de varer, tjenester eller bygge- og anlægsprojekter, der ønskes, tidsterminer for udbudsforretningerne samt hvor man skal henvende sig for at få udbudsmaterialet.

Internetsiden er særdeles tilgængelig, også for danske virksomheder, idet den er på engelsk. Den er samtidig meget informativ og meget overskuelig. Den findes på adressen:

<http://www.db1.gov.sg/gitis>

På den nævnte Internetside kan man også registrere sig som potentiel leverandør ved en række myndigheder, inkl. Finansministeriet (generelle leverancer), ved Sundhedsministeriets administration af lægemidler og ved 'Building and Construction Authority'. Man kan samtidig

se, hvem der allerede er registreret som leverandør ved myndighederne i Singapore og derved få et billede af konkurrencesituationen.

Der anvendes dog også mere traditionelle former for annoncering af udbud, nemlig den engelsksprogede avis 'The Strait Times' og den kinesisksprogede 'Lian He Zao Bao'.

Klageinstanser:

Singapore har etableret et 'Government Procurement Adjudication Tribunal' for at implementere GPAs krav om en klageinstans, og dette tribunal tager sig af klager over manglende overholdelse af GPA-reglerne.

Henvendelser vedrørende klagerne kan rettes til:

Ministry of Finance
100 High Street
Singapore 179434
Tlf.: +65 332 8658 eller +65 332 8508
Fax: +65 332 74 35.

2.4.3 Markederne

Singapores økonomi er primært baseret på tjenesteydelser. Der er stort set intet landbrug i landet, og industriens bidrag til BNP er på ca. 28 pct. Servicefagene står for 72 pct. af bruttonationalproduktet. Handel og finanssektoren hører til blandt de dominerende erhverv. På det industrielle område er olieindustrien, gummiindustrien og elektronikindustrien vigtige sektorer.

Krisen i Asien har også ramt Singapore og har medført en afdæmpning eller ligefrem reduktion af BNP. Krisen har dog ikke ramt Singapore helt i samme grad som en række nabolande, men det har medført en relativ revaluering af Singapore dollar i forhold til nabolandene, og dette – sammenholdt med stigende arbejdskraftomkostninger – har medført en forringelse af Singapores konkurrenceevne.

Regeringens modsvar har været at satse på højere produktivitet, på en forbedret infrastruktur og på at flytte mere og mere af økonomien over i højværdisektorer.

Den offentlige sektor ser det i høj grad som sin rolle at give et solidt grundlag for udvikling af servicefagene. Det indebærer en stærk og øget vægt på infrastruktur, men desuden lægges der i Singapore stor vægt på miljø – en nødvendighed som følge af det meget begrænsede areal og den høje befolkningstæthed.

Singapore har meget store miljøproblemer. Der er stærk forurening fra industri, der er begrænsede mængder af forsyning med frisk vand, og så rammes Singapore sæsonvis af røgen fra skovbrandene i Indonesien.

Som nævnt foregår alle offentlige indkøb via den centrale regering, og for at få et indtryk af markedets størrelse, kan man se på det totale offentlige budget.

De samlede offentlige udgifter ligger i størrelsesordenen 150 milliarder kroner, og for de områder, der traditionelt udmønter sig i offentlige udbud, er de totale årlige budgetter:

Sundhedssektor	4,5 mia. kr.
Miljø	1,2 mia. kr.
Offentlige boligbyggeri	0,6 mia. kr.
Kommunikation	1,3 mia. kr.

Tallene indicerer, at de samlede offentlige budgetter i Singapore er små, men de siger ikke noget præcist om, hvor store de samlede udbud er. I de driftsudgifter, der er nævnt ovenfor, er således i mange tilfælde lønudgifter den største del, men i den anden retning trækker, at der til særlige projekter kan anvendes lånefinansiering.

På byggeområdet står det offentlige for en lille del af det samlede antal færdiggjorte bygninger, men for en stor del af byggeriet, når det opgøres efter kvadratmeter. Når det offentlige bygger, er det med andre ord ofte stort byggeri, der er tale om. Dette gælder især inden for byggeri af boliger og – til en vis grad – inden for kommercielt byggeri, mens industribyggeri stort set er på private hænder.

I 1997, som er det seneste år, der findes officielle statistikker for, stod den offentlige sektor for opførelsen af følgende antal kvadratmeter byggeri:

	Areal	Antal
Boligbyggeri	4.484	56
Kommercielt byggeri	268	11
Industribyggeri	558	7

Andet	630	57
I alt	5.939	131

2.4.4 Forventninger på mellemlangt sigt

Singapores økonomi er som nævnt beskeden, og den ventes ikke at vokse markant de kommende år.

På den anden side har Singapore som nævnt reageret prompte på krisetegnene, og der satses hårdt på højværdisektorer. Ud over finanssektoren, der næppe vil vokse markant ud over dens nuværende solide position, satses der især på informationsteknologien. Singapore er allerede førende inden for en række områder, og der satses stærkt på udvikling af telekommunikationsindustrien, som jo dog i denne sammenhæng udmærker sig ved i høj grad at være undtaget fra GPA-reglerne. Det gælder dog ikke nødvendigvis relaterede informationstjenester.

En nyere studie peger på, at Singapore i de første år af det nye årtusinde kan komme til at indtage en andenplads (efter USA) i verden som dominerende økonomi inden for informationsteknologi. Singapore er således allerede i dag nr. 1 i verden hvad angår Internetanvendelse og nr. 3 hvad angår brug af computere. Den nævnte studie, der inkluderer data fra Unesco, ITU (Den Internationale Telekommunikationsunion) og Verdensbanken, placerer de fem mest betydningsfulde informationsøkonomier således:

1998

USA
Sverige
Finland
Singapore
Norge

2002

USA
Singapore
Sverige
Australien
Japan

2.4.5 Barrierer og muligheder for danske virksomheder

De officielle statistikker fra Singapores udbudsmyndigheder rummer desværre ikke information om leverandørers nationalitet, så det er ikke ad den vej muligt at få et overblik over danske virksomheders eventuelle kontrakter i landet.

Men danske virksomheder, der overvejer at satse på Singapore som marked, bør først og fremmest betænke den begrænsede størrelse af økonomien og af den offentlige sektor samt den store afstand mellem Danmark og Singapore. I forbindelse med større anlægsarbejder kan man måske forestille sig, at Singapores marked kunne opdyrkes i forbindelse med andre arbejder i nabolande som Malaysia og Indonesien, idet det så her igen skal betænkes, at disse lande indtil videre er noget lammede af den økonomiske og finansielle krise.

På de områder, hvor der ventes vækst i de kommende år i Singapore, vil danske virksomheder formentlig stå bedst på miljøområdet, hvor der ikke er megen lokal ekspertise, og hvor danske erfaringer vil kunne anvendes med held. Men der kan forventes konkurrence på dette område fra forskellig side, inkl. store amerikanske og tyske virksomheder, som allerede er veletablerede i området.

På det informationsteknologiske område er det formentlig begrænset, hvad danske virksomheder kan levere af speciel interesse for markedet i Singapore, bortset fra mulige nicheområder.

Af positive træk for danske virksomheder kan især nævnes åbenheden af Singapores økonomi og den begrænsede protektionisme, der kommer af den begrænsede kapacitet i det lokale erhvervsliv. Samtidig er der en tradition for gode kontakter mellem Danmark og Singapore, og for danske virksomheder kan det være en hjælp, at der ud over den danske ambassade i landet også findes danske banker etableret i Singapores finanskvarter.

Det er ligeledes en fordel for danske virksomheder, at der opereres på engelsk foruden kinesisk, og med den vidt fremskredne anvendelse af Internettet i forbindelse med udbud, bliver afstandene på en række områder i realiteten begrænsede. Der bør være muligheder for danske leverancer f.eks. på vareområdet via Internettet, og med de regler, der gælder i Singapore for finansiell sikkerhed, skulle det yderligere gøre det sandsynligt, at man kan få held med 'fjernleverancer'. Derimod er det givet, at er der tale om leverancer af tjenesteydelser og – måske især – større bygge- og anlægsarbejder, vil tilstedeværelse i Singapore – evt. i form af et partnerskab – være værdifuldt om ikke nødvendigt.

Det skal endelig nævnes, at Singapore ifølge *Transparency International* er verdens syvende mindst korrupte land og derfor passer godt til danske forretningstraditioner.

2.4.7 Konklusion

Implementering af GPA	Der er ikke konstateret særlige problemer ved implementeringen, som heller ikke er karakteriseret af undtagelser.
Åbenhed og transparens	Singapore er en åben økonomi, som har brug for samhandel. Der er en udstrakt åbenhed omkring udbudssystemerne, men danske virksomheder, som kender markedet, klager over mindre transparens i praksis.
Klageorgan	Der er etableret et enstrengt klagesystem, som overholder GPA-kravene.
Markedets størrelse	Singapore er et lille land med en beskeden økonomi. Til gengæld købes meget fra udlandet, og velstanden er høj.
Betydning for nabomarkeder	Singapore er ikke noget specielt godt udgangspunkt for arbejde i nabolandene. Dem er der nemlig ret begrænsede kontakter med, og de er i øvrigt plaget af den økonomiske krise.
Sproglige og kulturelle barrierer	Det engelske sprog er så udbredt, at der næppe her bliver problemer for danske forretningsfolk. Kulturen er en blanding af vestlig orientering med en kinesisk baggrund.
Markedsforventninger	Det beskedne udbudsmarked ventes ikke at vokse særligt i de kommende år, men der kan ske interessante udviklinger på nicheområder, herunder især informationsteknologi, ligesom nogle miljøinvesteringer igangsættes.
Tradition for dansk eksport	Der er gode handelsmæssige relationer mellem Danmark og Singapore.
Konkurrencesituation	Landet er konkurrencepræget, og der kan ventes konkurrence fra lokale og fra internationale virksomheder, inkl. kinesiske.

2.5 Korea

2.5.1 Administrative karakteristika

Republikken Korea (Sydkorea) er dobbelt så stor som Danmark – 98.000 kv. kilometer, men der bor ikke færre end 46 millioner mennesker i landet. Landet har som en af 'dragerne' i Sydøstasien haft en næsten utrolig økonomisk vækst gennem de senere år. Efter Anden Verdenskrig hørte landet til blandt de fattigste i verden. I dag er det tæt på de fattigste EU-lande økonomisk set. Korea har et bruttonationalprodukt på ca. 4.800 milliarder kroner, og pr. indbygger bliver det til ca. 105.000 kroner.

Korea er som Japan ret industritungt. Industrien bidrager med 45 pct. til bruttonationalproduktet, tjenesteydelser med 47 pct. og landbrug med 8 pct. Der er 52 pct. af arbejdsstyrken beskæftiget i service og handel, 27 pct. i fremstillingsindustri og 21 pct. i landbrug, fiskeri og skovdrift.

Industrien fremstiller især elektronik, biler, kemikalier, skibe, tekstiler, stål, fødtøj og fødevarer.

Korea har en række alvorlige miljøproblemer, inkl. luftforurening i store byer og vandforurening fra industrierne.

Landet har 9 provinser og seks byer med en særlig status og særligt selvstyre. Retssystemet er en blanding af kontinentaleuropæiske traditioner, angloamerikansk indflydelse og traditionel kinesisk inspireret tankegang.

2.5.2 Implementering af GPA

Korea kom med under GPA-reglerne i 1994, men fik en overgangsperiode frem til 1. januar 1997 til at forberede sig. Landet har gennemført ændringer i sit udbudssystem, så det i princippet lever op til kravene om åben konkurrence, om national behandling samt ikke-diskrimination. Det er sket i loven 'Act Relating to Contracts to which the State is a Party (ARCSP)' fra 1995. Først i 1997 kom dog de særlige regler, der for alvor satte den nævnte lov i kraft ('the Special Re-

gulations of the Enforcement Decree of the ARCSP for Specific Procurement’).

I denne regulation angives tre former for udbud:

- Offentlige udbud
- Begrænsede udbud
- Kontrakttildeling uden konkurrence.

Det normale er, at kontrakter tildeles den lavest bydende, som samtidig overholder alle udbudskriterier og som bedømmes kapabel til at gennemføre kontrakten.

Koreas implementering af GPA viser en blanding af centraliserede og decentraliserede træk. For større udbud anvendes der centrale procedurer, og for udbud af en mindre værdi anvendes decentraliserede procedurer, hvor de enkelte ministerier og styrelser m.m. er ansvarlige for gennemførelsen af udbuddene.

Når procedurerne er centraliserede står 'Supply Administration of the Republic of Korea (SAROK)' for udbuddene. Selv i disse tilfælde er der dog også to muligheder, afhængig af, hvem der står for udbuddene. Hvis der er tale om såkaldt 'obligatoriske' udbydere (f.eks. de organer i den centrale og decentrale administration, der er omfattet af GPA) står SAROK for udbuddene. Hvis der er tale om 'frivillige' udbud, dvs. fra udbydere, som er finansierede af regeringen eller på anden måde har en fri stilling, kan det pågældende organ selv vælge, om man selv vil foretage udbuddene eller om de skal foregå gennem SAROK.

Der anvendes følgende tærskelværdier:

- For centrale regeringsmyndigheders indkøb af varer og tjenester: Won 151 millioner (ca. 500.000 kroner).
- For centrale regeringsmyndigheders bygge- og anlægsarbejder: Won 5.830 millioner (ca. 20 millioner kroner).
- For sub-centrale myndigheders indkøb af varer og tjenester: Won 233 millioner (ca. 750.000 kroner)
- For sub-centrale myndigheders bygge- og anlægsarbejder: Won 17.490 millioner (ca. 60 millioner kroner)

- For andre myndigheders indkøb af varer og tjenester: Won 524 millioner (ca. 1,8 millioner kroner)
- For andre myndigheders bygge- og anlægsarbejder: Won 17.490 millioner (ca. 60 millioner kroner).

Det skal bemærkes, at Korea har mange undtagelser i dækningen af GPA. Det gælder store og betydningsfulde områder såvel inden for vareområdet som på tjenesteydelsesområdet. Samtidig giver Korea mulighed for præferencebehandling for lokale indre virksomheder, og det bruges ganske meget. Op til 40 pct. af det totale marked dækkes af kontrakter, der er givet under præferenceforhold, og det sker gennem mindre kontrakter, der alle ligger under GPAs tærskelværdier.

Blandt de udbud, der ligger over tærskelværdierne, skønner Europa-Kommissionen, at tæt på halvdelen af alle kontrakter tildeles efter udbud uden konkurrence – en udbudsform, der følge GPA kun kan anvendes i absolutte undtagelsestilfælde!

Publikation af udbud

Der udarbejdes hvert år et udbudsprogram for såvel leverancer af varer og tjenester som af bygge- og anlægsarbejder, som skal indkøbes gennem SAROK, og det offentliggøres i 'the Official Government Gazette'. I løbet af året bringes der dagligt udbudsmeddelelser om konkrete udbud, hvor oplysninger om typer af varer, tjenester eller byggearbejder, der skal udføres, samt om andre forhold af betydning for udbuddene, offentliggøres.

Oplysningerne kommer også på Internettet, nemlig på SAROK's hjemmeside på adressen:
<http://www.sarok.go.kr>

Her skal man dog være skrap til koreansk for at begå sig. Det eneste ord på engelsk på denne side er 'News', og prøver man denne vej, kommer der igen tekst på koreansk.

Der forekommer af og til meddelelser om større udbud i den engelsksprogede avis The Korea Times, men denne kilde kan ikke bruges til at følge markedet systematisk.

Klageinstanser

Hvis en virksomhed føler, at der har været et brud på GPA i forbindelse med en udbudsforretning, i forbindelse med kvalifikationsprocedurer, i forbindelse med tildeling af kontrakter o.l., bør den først klage til den myndighed, der har forestået udbudsforretningen. Derefter kan man klage til det særlige klageorgan, 'the International Contract Dispute Mediation Committee (ICDMC)'. En klage kan også evt. komme for retten.

2.5.3 Markederne

Den stærke økonomiske vækst er ikke mindst skabt gennem tætte bånd mellem regeringen og industrien. Der har været tale om dels importbegrænsninger for at fremme visse erhverv, dels om statsstøtte i stort omfang til enkelte industrier.

Ifølge Europa-Kommissionens markedsadgangs-database er Korea et af de vanskeligste lande i verden at arbejde i for fremmede virksomheder. Og det på trods af de senere års liberalisering. Det skyldes i høj grad en byrdefuld og uigennemsigtig administration og importbarrierer. Desuden er den koreanske økonomi i høj grad domineret af de store virksomhedskonglomerater (chaebol), især inden for nøgleområder som stål, biler, skibsbygning og elektronik.

Forsøgene fra regeringens side på gradvist at liberalisere økonomien og åbne den for international konkurrence har mødt hård modstand fra dele af de politiske partier og store dele af befolkningen, der har demonstreret voldsomt mod de nye tendenser. Dele af erhvervslivet har spillet med på denne bølge, som bl.a. har resulteret i de mange kampanjer mod f.eks. europæiske luksusprodukter.

Som følge af den økonomiske krise fik Korea sent i 1997 et Stand-By arrangement med Den Internationale Valutafond (IMF), og som betingelse for denne facilitet har IMF bl.a. forlangt, at der sker en forbedring af mulighederne for udenlandsk deltagelse i økonomien, at handelsbarrierer nedbrydes og at en række konkurrenceforstyrrende træk i økonomien fjernes. Så måske kan disse krav være med til at forbedre situationen i den kommende tid.

Koreas samlede offentlige budgetudgifter ligger i et niveau på ca. 900 mia. kroner

I 1997 blev der udbudt kontrakter gennem SAROK på i alt 15,267 mia. Won (ca. 53 mia. kroner). Heraf var ca. 9 mia. kroner bygge- og an-

lægskontrakter. Af det samlede beløb gik ca. 7 mia. Won til udenlandske leverandører. Der foreligger ingen opgørelser fra koreansk side om fordelingen af disse kontrakter, hverken på lande eller på grupper af varer, tjenester eller bygge- og anlægsarbejder.

Der er hård konkurrence fra hjemmemarkedet i Korea. Ifølge oplysninger om det koreanske marked fra Europa-Kommissionen går op mod 40 pct. af alle kontrakter til lokale mindre virksomheder, og der er udstrakt brug af kontrakttildelelse uden konkurrence.

Samtidig anvendes ofte den praksis, at myndighederne offentliggør tre-års prognoser for vigtige indkøbsområder – først og fremmest for at opfordre koreanske virksomheder til at udvikle det nødvendige potentiale og kompetence til at kunne tage ordrerne.

Europa-Kommissionen fastslår kort og godt, at det koreanske system klart diskriminerer til fordel for lokale virksomheder i alle tilfælde, hvor der findes koreanske leverandører. Dog kan udenlandsk ejede virksomheder, der er etableret i Korea, anses som lokale.

2.5.4 Forventninger på mellemlangt sigt

De fantastiske vækstrater, man har set i den koreanske økonomi op til for få år siden blev bremsede af den økonomiske krise i Asien. Der var en nedgang i bruttonationalproduktet på 7 pct. i 1998 mod de tidligere års vækst på mellem 5 og 10 pct. om året. Der har været masser af virksomhedskrak, og ledigheden er steget fra 2 pct. til 9 pct.

Der ventes en bedring i situationen i 1999 med en positiv vækst på omkring 2 pct. efterfulgt af en mere robust vækst i det nye årtusinde med 5-6 pct.s årlig økonomisk vækst de kommende år.

De offentlige budgetter er blevet anstrengt noget af et stigende underskud, primært som følge af stigningen i ledigheden. Der vil i de kommende år blive brugt mange midler på dette område, ligesom den offentlige sektor generelt vil forsøge at stimulere økonomien, men hensynet til de offentlige underskud vil begrænse aktiviteten, og derfor kan det offentlige udbudsmarkedet i sig selv ikke ventes at få nogen markant vækst.

2.5.5 Barrierer for danske virksomheder

Det er en meget lille del af den danske eksport generelt, der går til Korea, og landet hører vel ikke til blandt de nære handelspartnere for Danmark. Der er dog ca. 20 datterselskaber af danske virksomheder i Korea.

Fra den danske ambassade i Seoul beskrives markedet som præget af protektionisme fra koreansk side, og samtidig bekræftes derfra det indtryk, man kan få ved at studere de officielle kilder, nemlig at viljen til at meddele udbud på andre sprog end koreansk er beskednen.

De meget få informationer, der er tilgængelige, sammenholdt med det meget komplicerede regeringsmaskineri i Korea, efterlader det indtryk, at barriererne vil være store for danske virksomheder. Der gives ikke det indtryk fra Koreas side, som f.eks. fra Singapores eller fra Hong Kongs, at man gerne ser internationale bud på leverancer til den offentlige sektor, simpelt hen fordi man ikke har gjort det nemt at foretage sådanne bud.

Tekniske standarder kan være et særligt problem i Korea. Ifølge Det Europæiske Handelskammer er der f.eks. over 9000 industrielle standarder i kraft i Korea. Ud af dem er kun 500 de samme som internationale standarder, og samtidig har koreanerne for vane at meddele ændringer i standarder med meget kort varsel og på en ikke særlig transparent måde.

Derfor skal potentielle leverandører ikke regne med at kunne anvende internationale eller europæiske standarder i Korea, men skal indstille sig på at anvende de lokale, som ofte er helt unikke i forhold til andre dele af verden.

Derfor må barriererne for danske virksomheder konstateres at være så betydelige, at det formentlig kun vil være virksomheder, der har specialiseret sig i koreanske forhold, eller virksomheder, som har allieret sig med koreanske partnere – eller har etableret sig på stedet – der i realiteten kan forventes at få held med at identificere udbud og at vinde dem.

Det skal endelig nævnes, at Korea ikke ligger på en særlig flatterende plads i det internationale indeks for korruption (fra Transparency International), nemlig på en plads som nr. 43 ud af 85 lande.

2.5.7 Konklusion

Implementering af GPA	Korea har implementeret GPA ret sent (1. Januar 1997), og har betydelige undtagelser i dækningen.
Åbenhed og transparens	Systemet giver ikke indtryk af noget videre ønske om hverken åbenhed eller transparens. Oplysninger på Internettet findes kun på koreansk.
Klageorgan	Der er operettet et klageorgan som krævet i GPA, men klager kan også ende ved domstolene.
Markedets størrelse	Det koreanske marked er mellemstort, men den økonomiske vækst er for tiden bremset op. Den forventes at tage til igen, om end næppe i det

	tidligere rekordtempo.
Betydning for nabomarkeder	Korea har ikke noget særlig position som udfaldsport til store nabomarkeder.
Sproglige og kulturelle barrierer	Både de sproglige og de kulturelle barrierer for danske virksomheder ser betydelige ud.
Markedsforventninger	Korea blev hårdt ramt af den økonomiske krise og genvinder kun langsomt robusthed i økonomien. Behovet for finansiering af en stor ledighed og for at nedbringe de offentlige underskud vil lægge en dæmper på udviklingen i udbudsmarkedet.
Tradition for dansk eksport	Korea spiller ikke nogen afgørende rolle i dansk eksportsammenhæng.
Konkurrencesituation	Konkurrence er især bestemt af de lokale virksomheder – ikke mindst de store konglomerater, som dominerer, men også mindre virksomheder, der får præferencestilling i forhold til udbud under tærskelværdierne.

2.6 Schweiz

2.6.1 Administrative karakteristika

Schweiz er på størrelse med Danmark, men der bor et par millioner mere i Schweiz end i Danmark (7,2 millioner).

Den schweiziske konføderation har et udbredt selvstyre, blandt andet på grund af landets fire sprog (tysk, fransk, italiensk og romansch) og dertil hørende kulturelle forskelle, i 26 kantoner, nemlig: Aargau, Auser-Rhoden, Basel-Landschaft, Basel-Stadt, Bern, Fribourg, Geneve, Glarus, Graubunden, Inner-Rhoden, Jura, Luzern, Neuchatel, Nidwalden, Obwalden, Sankt Gallen, Schaffhausen, Schwyz, Solothurn, Thurgau, Ticino, Uri, Valais, Vaud, Zug, Zürich.

Schweiz har traditionelt været forsigtig med deltagelse i forpligtende internationalt samarbejde, og landet er f.eks. fortsat kun observatør ved FN. På trods af dette ligger en del af FN-institutionerne i Schweiz, herunder WTO, som Schweiz er medlem af.

Det schweiziske bruttonationalprodukt ligger i størrelsesordenen 1.300 mia. kroner, og BNP pr. indbygger er meget højt, nemlig ca. 170.000 kroner.

Schweiz har dog gennem de senere år haft problemer med den økonomiske vækst, som har været lav eller ligefrem negativ. Schweizisk eksport har det ofte svært med en valuta, der er klart overvurderet som følge af den store kapitalindstrømning til de schweiziske bankers skatteparadis. På det seneste synes økonomien at være kommet ind i en stabiliseringsperiode, hvor bl.a. den svagere franc har givet mulighed for en øget eksport.

Det schweiziske statsbudget er ikke voldsomt stort – kun ca. 220 mia. kroner – ca. 17 pct. af BNP.

Sammensætningen af værdiskabelsen ligner det europæiske gennemsnit med 66 pct. fra servicefag, 31 pct. fra industri og resten fra landbrug.

Schweiz er meget afhængig af EU, idet over 70 pct. af al udenrigshandel foregår med EU-landene. Derfor har Schweiz nærmet sig EU på en del områder, og senest er der indgået en aftale mellem EU og Schweiz på syv nøgleområder (landevejstransport, luftfart, fri bevægelighed for personer, landbrugsvarer, forskning, offentlige indkøb og tekniske han-

delshindringer), som, når aftalerne træder i kraft i 2001, gør Schweiz til 'EU-medlem uden stemmeret' på betydelige områder.

Specielt for det offentlige udbudsområde vil de nye regler bringe Schweiz på linje med EUs udbudsmarked. Således vil EU få adgang til udbudsmarkedet for de schweiziske kommuner, der i dag er undtaget fra GPA. Desuden vil der blive øget adgang til de offentlige forsyningsvirksomheders indkøb – og til private, som driver forsyningsvirksomhed.

En komite med repræsentation fra såvel Schweiz som fra EU vil overse implementeringen af udbudsreglerne og foreslå eventuelle ændringer. Aftalen, der er udarbejdet i begyndelsen af 1999, vil efter implementeringen i første omgang være i kraft i syv år.

2.6.2 Implementering af GPA

Schweiz har gennemført GPA i den føderale lov om offentlige udbud af 1994, og i tilknyttede cirkulærer.

Reglerne gælder for de føderale institutioner og for nogle føderale offentlige virksomheder som postvæsenet og jernbanerne (hvor der dog gælder nogle begrænsninger).

Schweiz anvender disse fire former for udbud:

- Offentlige udbud, hvor udbuddene meddeles i det officielle meddelelsesorgan. Der gives 40 dage til indlevering af bud.
- Begrænsede udbud, hvor også invitationer meddeles i det officielle medie, men hvor myndighederne udvælger dem, der får adgang til at byde. Også her vil der være 40 dage til rådighed for at afgive bud.
- Inviterede udbud, hvor mindst tre virksomheder skal inviteres til at afgive et skriftligt tilbud uden offentlig meddelelse.
- Direkte kontrakttildeling.

Der er ikke egentlige præferencebestemmelser for Schweiz, men det forlanges, at man respekterer de schweiziske arbejderbeskyttelsesregler og andre arbejdsmarkedsforhold for kontrakter, der skal udføres i Schweiz. Man skal ligeledes overholde den nationale lovgivning om li-

ge løn for lige arbejde til mænd og kvinder. Det skal også nævnes, at såfremt man vinder kontrakter og overlader en del af arbejdet til en anden virksomhed, skal denne ligeledes forpligte sig til at overholde de schweiziske arbejdsmarkedsregler og ligestillingsregler.

Der anvendes følgende tærskelværdier i Schweiz:

Varer og tjenester:

Føderale myndigheder	CHF 248.950
Kantoner	CHF 383.000
Forsyningsvirksomheder	CHF 766.000

Bygge- og anlægsarbejder:

For alle områder CHF 9.575 millioner.

Man anvender i Schweiz ikke automatisk laveste bud som kriterium for tildeling af kontrakter. I stedet anvendes normalt en kombination af kriterier, der anføres i udbudsmaterialet. Det vil ofte være forhold som overholdelse af deadlines, kvalitet, driftsomkostninger, kundeservice og miljøforhold. Kun for egentlige 'hyldevarer' anvendes prisen som eneste kriterium.

Man anvender til tider i Schweiz forhandlinger om kontrakterne efter et offentligt udbud. Dette må kun ske, hvis det udtrykkeligt er nævnt i udbudsmeddelelsen og hvis intet bud umiddelbart ser ud til at være det bedste. Sådanne forhandlinger vil også kunne ske, hvis der har været tale om et begrænset udbud efter invitation. Man laver altid et skriftligt referat af forhandlingerne, som skal underskrives af alle tilstedeværende.

Der findes i Schweiz en 'Føderal Indkøbskommission', hvis hovedopgave det er at koordinere indkøbs- og udbudspolitikken for vare- og tjenestoområdet (bygge- og anlægsområdet er undtaget).

Indkøbskommissionen giver input til reglerne på udbudspolitikens område, den etablerer standardkontrakter, den er rådgivende i forhold til de offentlige indkøbsmyndigheder generelt, og den koordinerer arbejdet mellem de forskellige myndigheder, der er ansvarlige for udbud. Desuden forestår kommissionen træning af indkøbere i administrationen og varetager kontakt med potentielle leverandører og leverandørkredse. Derimod står kommissionen aldrig selv for udbudsforretninger, og den fungerer aldrig som mægler eller lignende i klagesager.

Kommissionen har repræsentanter fra den føderale administration, fra postvæsenet og fra jernbanerne. Desuden er der repræsentanter fra de føderale antitrustmyndigheder, økonomi- og arbejdsministeriet, den føderale personaleadministration, de schweiziske bistandsmyndigheder, samt ministerierne for informatik, miljø og den føderale revision.

Udbud under grænseværdierne

Hvis kontraktværdien er under CHF 50.000 kan myndighederne typisk købe ind direkte uden særlige udbudsprocedurer, men det skal dog være foreskrevet i den relevante lov. Dog skal myndighederne altid forsøge at skabe konkurrence, hvor det er muligt, og de kan altid anvende mere konkurrencebetonede udbudsformer, end foreskrevet, hvis de foretrækker. Ellers vil man normalt invitere mindst tre tilbudsgivere til udbud, der ikke er omfattet af GPA, men der er naturligvis ikke nogen forpligtelse til at invitere ikke-schweiziske virksomheder til at byde under disse omstændigheder.

Publikation af udbud

Det officielle meddelelsesorgan for udbud er Handelsblatt/Feuille Officielle Suisse du Commerce.

Det kan kontaktes på adressen:

Schweizerisches Handelsamtsblatt
Effingerstrasse 1
Postfach 8164
CH-3001 Bern
Tlf.: +41 31 324 09 92
Fax: +41 31 324 09 61
E-mail: shab@bawi.admin.ch

Man kan også se i dette blad på Internettet på adressen:
http://www.shab.admin.ch/infos_d.htm

Klageinstanser

Schweiz har som krævet i GPA indført et klageorgan. Det er 'the Appeals Commission of Public Procurement', der er beliggende i Lausanne (Avenue Tissot 8, CH-1006 Lausanne). Dette klageorgan kan kun anvendes i forbindelse med udbud, der falder under GPA-reglerne.

Man kan klage over:

- udbudsforretningen som sådan
- beslutninger vedrørende valg af bydende i begrænsede udbud
- aflysninger af udbudsforretninger
- eksklusion af visse bydende
- kontrakttildelingen.

Man skal indgive sin klage senest 20 dage efter modtagelsen af den beslutning, man vil klage over. Man vil ikke annullere allerede indgåede kontrakter, men udbudsmyndighederne kan gøres økonomisk ansvarlige for skader som følge af ulovligheder i forbindelse med udbud. Dette økonomiske ansvar er dog begrænset til de omkostninger, der måtte have været i forbindelse med budet og klagen.

2.6.3 Markederne

Det samlede indkøb til de myndigheder, der er omfattet af GPA, var i 1997 på ca. 32 mia. kroner. Heraf stod de føderale myndigheder for halvdelen, mens postvæsenet stod for 33 pct. og jernbanerne for de resterende 17 pct. I samme år blev der indgået servicekontrakter for ca. 6 mia. kroner samt bygge- og anlægsarbejder for ca. 13 mia. kroner.

Man søger i Schweiz at centralisere indkøb på en sådan måde, at (især) varer af samme type indkøbes at et enkelt indkøbskontor i administrationen. Undtaget herfra er dog postvæsenet og jernbanerne, som har deres egne indkøbsorganisationer.

Sådanne centrale indkøbskontorer, af hvilke der findes 23, har ansvaret for:

- udbudsforretningerne
- at følge udviklingen på markedet inden for det pågældende område og identificere innovationer og nye produkter
- at indkøbe standardiserede produkter, hvis det er muligt
- at der bliver fulgt sunde indkøbsprincipper, som sund økonomi og miljøansvarlighed.

Det er derimod meget mere typisk, at udbud af tjenesteydelser foregår decentralt, og at kontrakter tildeles af de enkelte enheder i den føderale administration.

Det schweiziske marked er stærkt ombejlet, fordi det har et så højt velstandsniveau. Nabolande som Frankrig, Italien, Tyskland og Østrig, der alle har sprogfællesskab med (dele af) Schweiz, står stærkt på markedet og vil altid udgøre en stærk konkurrencefaktor for danske virksomheder.

2.6.4 Forventninger på mellemlangt sigt

Den svage økonomiske udvikling i Schweiz giver ikke anledning til forventninger om et stærkt stigende forbrug – heller ikke i den offentlige sektor. Den samlede vækst i de offentlige udgifter i 1998 var på 0,2 pct., og i 1999 regnes der med en svag tilbagegang i udgifterne. I 1999 udløber et stort infrastrukturinvesteringsprogram, som ikke bliver forlænget, og samtidig regnes der med en nedgang i det offentlige byggeri.

Lyspunkter for udbudsmarkedernes udvikling er der dog. I 1998 gav den schweiziske befolkning nemlig ved en folkeafstemning grønt lys for starten af fire store jernbaneprojekter. Der skal investeres CHF 30 mia. (ca. 120 mia. kroner) over en årrække, og det forventes, at der vil komme en afsmittende virkning af denne investering på andre områder.

2.6.5 Barrierer for danske virksomheder

Der er ikke identificeret særlige barrierer for danske virksomheder. Schweiz er normalt ikke et af de mest åbne lande i verden for international konkurrence. Der gøres ikke nogen særlig indsats for at gøre udenlandske virksomheder opmærksomme på mulighederne i det schweiziske marked. Der findes en beskeden brochure på engelsk om 'Procurement of Goods and Services by the Swiss Federal Government', som er udgivet af den føderale indkøbskommission. Man skal lede langt på Internettet for at finde egentlige oplysninger om, hvordan man skal forholde sig, og de få oplysninger, der er, er næsten altid på tysk, fransk og italiensk. Schweiz glimrer da også ved sit fravær med henvisninger på WTOs hjemmeside om links til medlemslandenes informationer.

Det er måske betegnende, at der i flere kilder om det schweiziske udbudsmarked gøres meget mere ud af at diskutere, hvordan man kan sikre en åben adgang til udbud for de tre hovedsproggrupper i Schweiz. Det er som om denne diskussion ikke rigtig er kommet ind på en udvidelse af markederne internationalt.

Dette bliver der nu ændret på. Med den bilaterale aftale med EU tvinges Schweiz til at åbne en meget større del af udbudsmarkedet for EU-virksomheder, og samtidig kommer Schweiz meget tættere på Det Indre Marked i andre sammenhænge (f.eks. tekniske standarder og trans-

portpolitik), hvilket uden tvivl vil mindske barriererne for danske virksomheder i fremtiden.

2.6.6. Nyttige adresser

De schweiziske myndigheder er noget karrige med at give oplysninger om, hvorledes man kommer i kontakt med udbudsmarkedet. Beskrivelserne virker ofte noget antikverede, og der angives sjældent andet end en adresse, man kan skrive til, og i en række tilfælde også telefon og fax (Det er måske også symptomatisk, at der selv i den engelsksprogede brochure kun gives schweiziske telefonnumre – uden internationalt retningsnummer!). E-mail adresser og Internetsider findes der kun meget få af i forbindelse med udbud.

Nogle af de vigtigste føderale indkøbsmyndigheder kan træffes på følgende adresser:

2.6.7 Konklusion

Implementering af GPA	Schweiz har indført GPA med en del begrænsninger, men har også i 1999 indgået en aftale med EU om indførelse af størstedelen af EUs udbudsregler i landet i løbet af et par år.
Åbenhed og transparens	Det schweiziske udbudsregime virker lukket og ikke-transparent set fra udlandet.
Klageorgan	Schweiz har indført et enstrengt klagesystem efter WTO-reglerne.
Markedets størrelse	Det schweiziske udbudsmarked er lidt mindre end det danske, og de få tal og statistikker, der findes, peger i retning af et ganske beskedent marked.
Betydning for nabomarkeder	Som følge af, at Schweiz ikke er medlem af EU, vil landet ikke være nogen særlig solid bastion for arbejde i nabolande. Det vil snarere være relevant at arbejde fra Schweiz' nabolande ind i

	Schweiz eller i de sprogligt relevante dele af landet.
Sproglige og kulturelle barrierer	Der er sprog nok i Schweiz, og ingen af dem er vel danskere særligt fremmede, men til gengæld skal man være klar til at arbejde på de relevante sprog i de relevante dele af landet.
Markedsforventninger	Der ruttet ikke med de offentlige midler, og Schweiz' stræben efter at få økonomien bragt ind i en rolig gænge igen peger ikke i retning af en voldsom øgning. Dog vil gennemførelsen af aftalen om udbudsmarkederne med EU betyde en vis åbning af markedet.
Tradition for dansk eksport	Schweiz hører ikke til Danmarks største samhandelspartnere, men der har været en del danske etableringer i Schweiz, dels af kommercielle grunde, dels af skattemæssige grunde.
Konkurrencesituation	Der er hård konkurrence på det schweiziske marked, såvel fra lokale virksomheder som fra nabolandenes virksomheder. De nyder godt af den geografiske og sproglige nærhed.

2.7 Canada

2.7.1 Administrative karakteristika

Canada er en føderal stat, og den fungerer på to sprog – engelsk og fransk. Landet er større end USA i udstrækning, men der bor kun ca. 30 millioner mennesker.

Canada har 10 provinser og 2 såkaldte territorier, nemlig Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, Northwest Territories, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan og Yukon Territory. Det skal bemærkes, at Northwest Territories i 1999 er splittet op i to dele.

Den canadiske økonomi ligner på mange måder den amerikanske, som har en stærk indflydelse i Canada. Landet har et bruttonationalprodukt på ca. 5.000 mia. kroner og et bruttonationalprodukt pr indbygger på ca. 160.000 kroner. De offentlige udgifter på centralt niveau er i størrelsesordenen 1.000 milliarder kroner.

Canada har en veludviklet infrastruktur på stort set alle områder og har et erhvervsmæssigt mix af landbrug, råvare- og energiproduktion, industri og serviceerhverv, som gør landet selvforsynende på mange områder.

2.7.2 Implementering af GPA

Det er i Canada 'the Treasury Board of Canada', som er ansvarlig for den føderale regerings politik på udbudsområdet.

Canada har gennemført ændringer i sin politik på udbudsområdet for at tilpasse den til internationale aftaler, nemlig GPA og udbudsreglerne i NAFTA – det nordamerikanske frihandelsområde. Canada har taget et generelt forbehold i forhold til små og mellemstore virksomheder i de internationale aftaler. Det har i øjeblikket ikke den helt store betydning på føderalt plan, fordi det eneste program, som følger dette forbehold, er et program, der skal styrke små virksomheder, som drives af den oprindelige befolkning, i forbindelse med udbud. Situationen er anderledes på provinsplan (se nedenfor).

Udbud under grænseværdierne

For udbud til den føderale regering og styrelser under GPAs tærskelværdier gives der præference til canadiske virksomheder, men de skal så også konkurrere om ordrerne, undtagen i særtilfælde, som f.eks. hastesager, små indkøb (under Can\$25.000) og i tilfælde, hvor kun én leverandør kan klare opgaven.

Publikation af udbud

Canada anvender et elektronisk udbudssystem (MERX), som er tilgængeligt døgnet rundt. Her findes udbudsbekendtgørelser, meddelelser om tildelte kontrakter og en række meddelelser om påtænkte kommende udbud.

MERX kan findes på Internettet på adressen <http://www.merx.cebra.com>

Her kan vælges mellem en fransk og en engelsk version, og der kan foretages en egentlig tilmelding til systemet via e-mail. Der er en månedlig registreringsafgift på Can\$7.95, og der en afgift i forbindelse med oplysninger og søgninger.

På MERX er der nu oprettet en ny service – 'Opportunity Matching', hvor virksomhederne tilmelder sig med en profil og derefter får leveret oplysninger om udbud, der passer til denne profil. Oplysninger kan blive sendt via fax eller e-mail.

Via MERX kan der også fås en række andre vigtige oplysninger. Der findes f.eks. en række artikler og rapporter om udbudsforhold samt diskussionsfora om, hvordan man bedst vinder ordrer i forbindelse med offentlige udbud. Førende eksperter i udbudsforretninger giver også gode råd via MERX.

Man er begyndt at afholde seminarer om 'Developing Winning Proposals', hvor potentielle leverandører kan deltage. Foreløbig har der været afholdt ét seminar, nemlig i april 1999 i Ottawa, men der er planlagt flere, og interesserede kan følge med også på dette område via MERX-hjemmesiden.

Det skal også nævnes, at MERX foruden at være kilde til udbud fra den føderale regering også bringer meddelelse om alle udbud fra regeringerne i Ontario, Quebec, Alberta, New Brunswick, Prince Edward's Island, Manitoba og Saskatchewan.

For fuldstændighedens skyld skal det nævnes, at der tillige findes et trykt medie – 'Government Business Opportunities', som udkommer tre gange om ugen, og som på fransk og engelsk bringer oplysninger om udbud.

Klageinstanser

I Canada er det 'Canadian International Trade Tribunal', der er klageinstans for problemer under GPA-aftalen (og under NAFTA-aftalen). Dette tribunal har status som en domstol, og det kan gribe ind over for offentlige myndigheder, der har begået fejl i forbindelse med udbud – herunder idømme erstatning og tilbagebetaling af omkostninger. Tribunallet kan også udsætte eller ophæve en udbudsforretning, forlange en ny udbudsrunde og søge supplerende bud.

Virksomheder, der vil bruge klagesystemet, skal skynde sig, for man skal klage inden 10 dage fra det tidspunkt, hvor problemerne med rimelighed skulle være kendt af tilbudsgiveren. Derefter kan Tribunallet bruge op til 135 dage til at tage sin beslutning.

2.7.3 Markederne

Det samlede udbudsmarked i Canada skønnes at være på ca. 25 mia. kroner om året. Der bringes i gennemsnit 200 nye udbud på MERX om dagen, og fra denne elektroniske tender service anslås det, at der konstant er 1.500 muligheder for ordrer til den offentlige sektor åbne, hvoraf en stor del er åbne for GPA-lande.

Bl.a. som følge af den føderale og decentraliserede struktur foretages mange udbudsforretninger i ministerier og styrelser. Dog er mange vareindkøb centraliserede under 'the Department of Public Works and Government Services'.

Til gengæld er de sub-centrale myndigheder i Canada ikke dækket af GPA. Den dækker kun de føderale myndigheder. På grund af Canadas betydelige decentralisering på provinsplan, spiller de offentlige indkøb i provinserne måske en større rolle, end indkøb fra det føderale niveau. Der er som nævnt ovenfor en præference for små og mellemstore virksomheders deltagelse i udbud, og dette gør sig især gældende på provinsplan. Der kan være tale om prispræferencer, hvor mindre virksomheder kan blive tildelt kontrakter, selv om de har budt en højere pris end en stor virksomhed. Der findes desuden en del udbud, som simpelt hen er reserverede for de mindre virksomheder. Endelig er der tilfælde,

hvor der anvendes kvotaer, som sikrer de mindre virksomheder en fastsat del af samtlige offentlige udbud.

Blandt de vigtige diskriminatoriske tiltag, der er i brug for øjeblikket, kan nævnes følgende eksempler fra EUs Market Access Database:

Quebec: Der er præference for canadiske virksomheder, når der er to eller flere canadiske bydende.

Ontario: Der gives en 10 pct. præference for canadisk indhold af leverancerne. Der tillades endvidere præferencebehandling af canadiske leverandører, hvis der er økonomiske eller industrielle fordele ved det.

Saskatchewan: Der gives prioritet til virksomheder fra provinsen. I praksis foregår dette ved, at der gives en 10 pct. prispræference for lokale bydende.

Manitoba: Der gives prispræferencer for lokale produkter.

British Columbia: Der er diskrimination til fordel for canadiske produkter baseret på kriterier vedrørende beskæftigelse, investeringer og eksportpotentiale.

Canada stillede efter undertegnelsen af GPA i udsigt, at der ville ske ændringer, så sub-centrale offentlige myndigheder ville blive dækket af aftalen 18 måneder efter undertegnelsen. Det skete imidlertid ikke. Den canadiske regering kunne simpelt hen ikke få provinsmyndighederne med på ideen.

2.7.4 Forventninger på mellemlangt sigt

Canada har kæmpet hårdt mod underskud på de offentlige finanser, og regeringen satser nu på et balanceret offentligt budget for de kommende år. Da der samtidig loves skattelettelser, betyder det et mindre offentligt engagement i økonomien end tidligere.

Blandt de områder, som Canada virkelig satser på at støtte via de offentlige finanser, er især to af betydning i denne sammenhæng, nemlig store investeringer i sundhedsvæsenet og en styrkelse af konkurrenceevnen gennem en satsning på informationsteknologi og relaterede uddannelser.

Investeringerne i sundhedssektoren vil i høj grad foregå decentralt i og med at føderale budgetmidler overføres til de canadiske provinser og territorier. I de kommende fem år vil der blive tale om ekstrainvesteringer i sundhedssektoren på omkring 65 milliarder kroner.

På centralt plan vil Canada bl.a. opbygge et Sundhedsinformationssystem, satse yderligere på forskning og udvikling samt på en præventiv indsats i forhold til sygdomme.

Hvad angår udviklingen af 'det vidensbaserede samfund' vil Canada satse hårdt på forskning og dissemination af viden. I løbet af ganske få år skal Canada være et af de lande i verden, hvor telekommunikation og Internetforbindelser er mest udbredt. Der skal etableres pilotprojekter i form af 'Smart Communities' i hver af de canadiske provinser og territorier.

Det er oplagt, at der er muligheder for ordrer i disse sektorer, men konkurrencen vil blive hård. Dels ser man gerne i Canada, at så mange opgaver som muligt løses af lokale virksomheder, dels er nærheden til og den stærke afhængighed af USA en faktor, der i hvert fald på det informationsteknologiske områder er af stor betydning. Det kan dog også være en fordel for f.eks. potentielle danske leverandører, at canadierne til tider 'får nok' af amerikanske løsninger og foretrækker andre leverandører.

På sundhedsområdet har danske leverandører formentlig meget at byde på, og det vil nok være det område, der vil frembyde flest (nye) muligheder for danske virksomheder på det canadiske marked de kommende år.

2.7.5 Barrierer for danske virksomheder

Canada har verdens syvendestørste økonomi og har et betydeligt marked for offentlige indkøb. Men på trods af at Canada både gennem NAFTA og WTO er med i internationale aftaler om offentlige indkøb, synes landet ikke videre åbent for udenlandske bud. Der er i mange kredse i Canada en vis mistro til 'frihandel' og 'investeringsliberalisering', fordi det i mange tilfælde primært har ført til en friere adgang for amerikanske virksomheder og leverandører til det canadiske marked.

Der er ingen videre tradition for, at danske virksomheder har deltaget i det canadiske udbudsmarked, og den danske ambassade i Ottawa har da også i forbindelse med en forespørgsel om oplysninger til denne

rapport lakonisk meddelt, at der ingen er, og at man ikke der har kendskab til danske virksomheder, som har interesse i markedet.

For udbud over GPA-tærskelværdierne er der dog ingen egentlige barrierer for danske virksomheder på det føderale plan. Alle kontakter kan foretages på engelsk (og fransk, naturligvis), og danske virksomheder, som måske allerede arbejder på det amerikanske marked, kan måske med fordel forsøge sig også i Canada.

Derimod må markedet i Canadas provinser anses for generelt at være stærkt diskriminatorisk – og klart ikke venligt for udenlandske leverandører. Med mindre man har en helt særlig position i forhold til myndighederne, synes det ret uoverkommeligt for danske virksomheder at skulle begå sig i konkurrencen. Det er især et problem, fordi provinsmyndighederne i landet tilsammen råder over større budgetter end den føderale regering.

Det elektroniske tendersystem (MERX) er ganske nyt, og det giver i sig selv gode muligheder især for vareleverancer fra oversøiske leverandører. Da systemet er billigt at benytte, giver det også nye muligheder for danske virksomheder, især i forbindelse med leverance af varer.

Endelig skal den føderale regerings stærke satsning på sundhedssektoren og på 'det vidensbaserede samfund' nævnes igen. Disse satsninger vil i den kommende tid give sig udslag i konkrete udbudsforretninger, som kan identificeres via MERX.

Canada har siden 1992 diskuteret gensidige anerkendelser af standarder på en række områder, og i 1998 blev der principiel enighed om en sådan gensidig anerkendelse for informationsteknologisk udstyr, lægemidler, medicinsk udstyr og personlige værnemidler. I takt med at denne aftale materialiserer sig, vil den også gøre det lettere for EU-virksomheder at deltage i de offentlige udbudsforretninger.

2.7.7 Konklusion

Implementering af GPA	GPA-reglerne er indført på føderalt niveau, men provinserne er ikke omfattet.
Åbenhed og transparens	Brugen af elektroniske udbudsmeddelelser og seminarer for bydende peger i retning af åbenhed og gennemsigtighed, men der er samtidig en underliggende følelse af protektionisme, som især slår igennem på provinsplan, og som formentlig mest er rettet mod frygt for amerikansk dominans.
Klageorgan	Der er oprettet en enstreget klagestruktur, som opfylder GPA-reglerne.
Markedets størrelse	Canadas økonomi er verdens syvendestørste, men det store problem er, at GPA-reglerne kun gælder på føderalt niveau. Ønsket om balancerede offentlige budgetter og skattelettelser lægger en dæmper på udviklingen af offentlige indkøb.
Betydning for nabomarkeder	Det er nok de færreste, som vil placere sig i Canada for at arbejde på det amerikanske marked. Situationen vil nok snarere være omvendt, men der er naturligvis i vidt omfang adgang til USA fra Canada.
Sproglige og kulturelle barrierer	Der er ikke særlige sproglige barrierer, idet alle udbudsforretninger foretages på engelsk eller fransk. Den helt store barriere for udenlandske virksomheder er den i realiteten stærke protektionisme, der stikker sit hoved frem på føderalt plan og som er dominerende på provinsplan.
Markedsforventninger	Se under 'Markedets størrelse'
Tradition for dansk eksport	Der er begrænsede traditioner for dansk-canadisk samhandel.
Konkurrencesituation	Konkurrencen er stærk fra USA og i stigende omfang fra Mexico som følge af NAFTA-præferencer, men den største konkurrencefaktor er de lokale virksomheder, der ofte får præferencestilling.

2.8 Polen

2.8.1 Generelt om landene i Øst- og Centraleuropa

Ikke alene Polen, men alle de lande i Øst- og Centraleuropa, der er kandidater til medlemskab af EU engang i det nye årtusinde, har en række særlige problemer på udbudsområdet.

De skal, inden de bliver medlemmer af EU, have etableret et moderne og transparent udbudssystem, men det er ikke mange år siden, de havde kommandoøkonomier, hvor offentlige indkøb var en integreret del af det centralt styrede økonomiske system.

De hovedproblemer, østlandene nu står overfor, er ifølge OECD/EU-projektet SIGMA, som giver støtte til forbedret offentlig ledelse i Øst- og Centraleuropa, følgende:

- Skabelsen af et lovmæssigt og administrativt grundlag, som kan udrede det forvirrende billede af indkøbsenheder i et samlet og sammenhængende netværk med en høj grad af professionalisme.
- Sikring af, at de offentlige indkøbskontorer er bemandede med personale, der forstår moderne offentlige indkøbsprincipper, som de fungerer i en markedsøkonomi.
- Investering i systemer, som giver de data og den information, der skal til i moderne indkøbsfunktioner.
- Give tilbudsgivere adgang til træning og information, som kan fremme deres konkurrenceevne og dermed styrke landenes økonomier.
- Indføre systemer, der kan bekæmpe svindel, spild og korrupsion.

Det er oplagt, at moderne udbudsprincipper som fri og åben konkurrence kombineret med en høj grad af gennemsigtighed er en udfordring for en offentlig administration, som for få år siden fungerede under den centraldirigerede økonomis betingelser. Østlandene har for manges vedkommende fortsat en 'køb nationalt' politik, når det gælder offentlige udbud, og de har fået lov til at beholde disse principper i en årræk-

ke, selv under Europa-aftalerne med EU. Disse aftaler er nemlig skæve til fordel for Østlandene, der har fået adgang til EU-markederne, mens det omvendte endnu ikke er tilfældet. Men den lokale beskyttelse, der ligger i at købe nationalt, vil ikke være ved. Inden medlemskabet er på plads, skal den internationale konkurrence være indført.

UNCITRAL-modellerne for offentlige indkøb, der er omtalt i delrapport 2, har vist sig udmærkede i forbindelse med opbygning af systemer i Øst- og Centraleuropa, og i forbindelse med træning af personalet. Disse principper peger klart i den rigtige retning, nemlig mod indførelsen af EUs udbudsregler.

Det skal til slut bemærkes, at en stor del af de projekter, som bl.a. danske virksomheder interesserer sig for i Polen, er finansieret af forskellige donororganisationer, som f.eks. EBRD, Verdensbanken og EU. I disse tilfælde er det i reglen de pågældende organisationers udbudsregler, der er gældende.

2.8.2 Administrative karakteristika

Polen er det største af de 10 ansøgerlande til EU i Øst- og Centraleuropa. Der bor 38 millioner på de godt 312.000 kvadratkilometer. Polen er en republik med en centralregering og 49 provinser. Økonomien er en af de mest succesfulde blandt østlandene, og den udstrakte privatisering har skabt en betydningsfuld virksomhedssektor. Polen har som et klart mål at blive medlem af EU så hurtigt som muligt, og landet har derfor undgået at indføre protektionistiske foranstaltninger, f.eks. til at forsøge at bedre det store betalingsbalanceunderskud. Tværtimod har Polen bekendt sig til frihandel og til en åben økonomi.

Polen har nu et bruttonationalprodukt på ca. 2.000 mia. kroner, og det er i de senere år vokset med 5-8 pct. om året. BNP pr. indbygger er dog fortsat lavt, nemlig på godt 50.000 kroner. Det samlede statsbudget holdes i stramme tøjler, og det er på ca. 250 mia. kroner.

Den polske økonomi begynder i sin sammensætning at ligne en europæisk markedsøkonomi med godt 6 pct. af BNP fra landbrug, 35 pct. fra industri og 59 pct. fra servicefag.

Store dele af infrastrukturen trænger fortsat hårdt til en modernisering. Det gælder bl.a. telefonsystemerne, men også transportsystemer og andet. Desuden er der fortsat behov for en stor indsats på det miljømæssige område og på bygningsrenoveringsområdet.

2.8.3 Udbudssystemet

Polen har ikke underskrevet GPA, men landet har en observatørstatus i forhold til aftalen.

Det polske udbudssystem fungerer på basis af en Lov om Offentlige Udbud fra juni 1994. Denne lov ledsages af nogle cirkulærer, bl.a. om lokale præferencer i offentlige udbud og om tærskelværdier. Loven blev ændret i 1997, hvor man fastsatte en tærskelværdi på 30.000 euro (ca. 220.000 kroner) over hvilken der principielt skal anvendes offentlige udbud.

Når der foretages offentlige udbud, er det mest brugte kriterium for kontrakttildelingen den laveste pris. Ikke færre end 68 pct. af alle udbudsforretninger i 1997 blev afgjort på grundlag af laveste pris.

Den foretrukne metode for udbud er offentligt udbud. I 1997 var 26.000 af de knap 46.000 udbud offentlige udbud.

Det polske udbudskontor (på engelsk 'the Office of Public Procurement - PPO') blev oprettet i 1995, men det har allerede nu 60 medarbejdere. PPO er det organ, som udstikker grundlaget for politikken på det offentlige udbudsområde i Polen, og det har samtidig en koordinerende rolle for markedet. PPO er et uafhængigt organ i regeringen, som hører til under statsministerens direkte ansvar.

PPO foretager ikke andre udbud end dem, der hører til dets eget virke. I stedet er hovedopgaverne bl.a.:

- Udgivelse af det officielle meddelelsesorgan om udbud.
- Stillingtagen til ansøgninger om brug af andre former for udbud end offentlige udbud.
- Forberedelse og gennemførelse af træningsprogrammer.

Meddelelser om udbud:

Det generelle meddelelsesorgan for offentlige udbud er Public Procurement Bulletin. Man er også begyndt at bruge Internettet til meddelelse af udbud. Det foregår på adressen:

<http://www.uzp.gov.pl>

Denne server har nu 104.000 'hits' om måneden, eller i gennemsnit over 3.000 om dagen.

Den reviderede lov om offentlige udbud af 1997 fastslår følgende regler om meddelelse af udbud:

- Alle offentlige udbud over 30.000 euro skal annonceres i Public Procurement Bulletin (PPB)
- Alle invitationer til at indsende interessetilkendegivelser for begrænsede udbud over 30.000 euro skal meddeles i PPB
- Informationer om prækvalifikation skal meddeles i PPB
- Alle totrins udbud til en værdi af over 30.000 euro skal meddeles i PPB
- Resultater af udbud skal meddeles i PPB

Klageinstanser:

Klager skal rettes til the Office of Public Procurement.

Office of Public Procurement

Al. Szucha 2/4

00-582 Warszawa

Kontoret har en Internetside på adressen:

<http://www.uzp.gov.pl/general.html>

Der er stor interesse i at klage over udbud i Polen. I 1995 var der 348 klager, i 1996 837 og i 1997 1.005 klager.

2.8.3 Markederne

I 1998 – efter tre år med den polske lov om offentlige udbud, har der været næsten 26.000 udbud over den dagældende tærskelværdi på 20.000 euro. I 1997 var der offentlige udbud i Polen til en værdi af 13,6 mia. PLN (ca. 23 mia. kroner). Der har været en markant stigning i antallet af udbud gennem de senere år. I 1995 – det første år med den

nye lov – var der 11.958 udbud, i 1996 34.136 og i 1997 (det seneste år der foreligger statistik fra) var der 44.567 udbud.

Den lave tærskelværdi giver mange, mindre udbud i Polen. Blandt udbuddene over tærskelværdien var 50 pct. under 400.000 PLN (ca. 700.000 kroner), men der var også store kontrakter: næsten 15 pct. af alle havde en værdi på over 1 mio. PLN (ca. 1,7 mio. kroner).

Der kan konstateres stigende konkurrence om udbuddene. Der var i 1997 i gennemsnit 4,2, der bød på udbuddene. Det var en stigning fra 3,6 i 1996, og det indikerer en stigende interesse for at være med i udbuddene.

Det polske udbudsmarked adskiller sig fra mange andre, der er behandlet i denne rapport, ved en meget stor vægt på bygge- og anlægssektoren. Det er formentlig det store behov for nybygning og renovering samt for arbejde med infrastrukturen, der ligger bag disse tal.

Andel af samtlige offentlige udbud i de forskellige sektorer (centralforvaltning):			
	Bygge- og anlæg	Varer	Tjenester
1995	79,5	12	8,5
1996	70	17	13
1997	70	18	12

Dette billede bekræftes af, at man i 1997 anvendte 84 pct. af de offentlige indkøbsmidler til bygge- og anlægsarbejder, mens der gik 10 pct. til indkøb af varer og 6 pct. til indkøb af tjenester. Man kan også heraf se det ikke overraskende, at bygge- og anlægskontrakterne har en gennemsnitligt højere pris end vare- og tjenestekontrakterne.

Det er værd at lægge mærke til, at billedet ser anderledes ud, hvis man vender sig til de kommunale udbud. Her anvendtes i 1996 kun 23,4 pct. til bygge- og anlægsområdet, mens 76,6 pct. gik til varer og tjenester.

2.8.4 Forventninger på mellemlangt sigt

De polske statistikker viser desværre ikke noget om, i hvor høj grad udenlandske virksomheder vinder kontrakter hos de polske myndigheder. Men der er nok heller ingen tvivl om, at det ikke er normen. På den anden side må Polen gradvist til at vænne sig til international konkurrence på dette marked, og når Polen – formentlig omkring 2002-05 – bliver medlem af EU, bliver der fri adgang for danske virksomheder til det polske udbudsmarked.

Dette sammenholdt med den store økonomiske vækst i landet samt det fortsatte behov for renoveringer samt miljø- og infrastrukturforbedringer, peger i retning af Polen som et særdeles interessant marked for danske virksomheder på mellemlangt sigt.

Udbudsmarkedet er som nævnt ovenfor stærkt voksende, og der er hård konkurrence om de ofte ret små udbud. Danske virksomheder, der har etableret sig i Polen, eller som arbejder med en polsk partner, skulle derfor allerede i dag med succes kunne deltage i markedet.

2.8.5 Barrierer for danske virksomheder

Der er barrierer for danske virksomheder på det polske marked, for Europa-aftalen giver nok polske virksomheder adgang til EU-markederne for offentlige udbud på lige fod med EU-virksomheder, men den omvendte vej bliver der ikke lukket op før ved udgangen af overgangsperioden, og det vil i realiteten nok sige ved Polens medlemskab af EU.

Der er tilladelse til, at Polen kan foretrække polske virksomheder (eller udenlandske etableret i Polen) i udbudsforretninger. Derfor skal danske virksomheder ikke regne med at komme i betragtning, hvis de arbejder udelukkende fra Danmark, med mindre der er tale om donorfinansierede projekter eller hvis de besidder en særlig ekspertise, som de polske myndigheder har brug for.

Polen tilnærmer kontinuerligt sin lovgivning til EUs, og det gælder f.eks. også på standardiseringsområdet. Denne proces er med til at nedbryde skranker og barrierer for EU-virksomhederne på markedet.

Den danske ambassade i Polen kan kontaktes på denne adresse:

Ambasada Du'nska
Ul. Rakowiecka 19
02-517 Warszawa

Tlf.: +47 22 48 26 00

Fax: +48 22 48 75 80

2.8.7 Konklusion

Implementering af GPA	Polen er ikke medunderskriver af GPA, men er observatør.
Åbenhed og transparens	Systemet er i stigende grad åbent og gennem-sigtigt. Der anvendes som regel offentlige ud-bud, og tærskelværdien er lav.
Klageorgan	Der er oprettet et klageorgan, og det bruges flittigt.
Markedets størrelse	Markedet udvikler sig fra næsten ingen ting med en høj vækstrate.
Betydning for nabomarkeder	Polen kan tænkes at være et brohoved ind i na-bolande, men det polske marked kan vokse til at være interessant nok I sig selv.
Sproglige og kulturelle barrierer	Der er fortsat reminiscenser af det kommunisti-ske system, men Polen prøver af al kraft at nærmere sig Vesteuropa. Danske virksomheder har i andre sammenhænge vist, at de kan klare den sproglige udfordring, og at de kulturelle barrierer ikke er så store endda.
Markedsforventninger	Man kan vente sig en hel del af et voksende og i stigende omfang åbent polsk udbudsmarked.
Tradition for dansk eksport	Siden systemskiftet har danske virksomheder placeret sig som vigtige partnere for Polen.
Konkurrencesituation	Konkurrencen er i dag hårdest fra lokale virk-somheder. Derfor kan en lokal etablering eller et partnerskab være nødvendigt for at kunne være med på udbudsmarkedet.

*) Arkitektydelser: 1,500,000

Bilag 2. Delstater i USA der er omfattet af GPA

GPA omfatter som nævnt ikke alene det centrale regeringsniveau, men også niveauer herunder. I USA har den føderale regering ikke kunnet binde delstaterne på dette område, og derfor har kun en del af dem valgt at være med i aftalen. Det gælder i alt 37 delstater, som er nævnt nedenfor. Billedet kompliceres dog yderligere af, at det ikke er alle myndigheder i de pågældende delstater, som er omfattet af aftalen. Detaljerne herom fremgår af annekserne til GPA.

Bilag 3. English Summary

Implementation of GPA in some member countries – and the markets

This report consist of an analysis of the way GPA is implemented in a number of the countries covered by the agreement – plus Poland, a nation which has not yet signed the GPA, but has an observer position. Furthermore there is an analysis of the markets for public procurement, and an identification of barriers for Danish enterprises.

The following tables summarise the conclusions on each country.

USA

Implementation of GPA	GPA is implemented for most federal institutions and for 37 states.
Openness and transparency	Information about tenders is easily accessible from many official sources and from a number of private services that contributes to transparency of the system.
Review Body	Review Body's exist in accordance with GPA.
Size of the market	The market is gigantic. Danish enterprises will probably need to focus on federal tenders, and/or selected states.
Importance for neighbouring markets	It is possible to work into neighbouring countries from the US (including NAFTA partners Canada and Mexico) but it is most likely that the US market is the main reason in itself for working there.
Language and culture barriers	There are no special barriers for Danish enterprises. The culture is, however, somewhat more commercial than in Europe.
Market expectations	The market will, despite any conjunctural changes, be of outmost importance.
Tradition for Danish export	Many Danish enterprises have long-established traditions for trading with the US.
The Competition	The American market is very competitive, and the high use of open tendering increases competition. Other European countries, Japan and US

	enterprises will be the strongest competitors
--	---

Japan

Implementation of GPA	The implementation of GPA seems to be in place at least formally. Recent changes for tenders in local administration have corrected problems there.
Openness and transparency	A general pressure from EU and USA for opening of the Japanese market has had a positive effect on procurement markets. The information material is easily accessible and of high quality.
Review Body	A Review Body is set up as required. It seems quite accessible.
Size of the market	The market is very large indeed, and is expected to grow in areas of interest to Danish companies.
Importance for neighbouring markets	Japan does not give any access to neighbouring markets in principle, but the market in itself is so large that this is of minor importance.
Language and culture barriers	Information material – including the Internet – is often in English, but participation in seminars and in tenders will normally take place in Japanese. Some cultural traditions make the market difficult for foreigners and bid rigging is not unknown especially in construction.
Market expectations	There are large expectations to growth in the market, among other areas in environment, health and care for the elderly. Also increased liberalisation will provide new opportunities.
Tradition for Danish export	There is a high degree of tradition for Danish exports to Japan. Japan is the second largest Danish export market and Denmark has as one of the few countries in the world a trade surplus with Japan.
The competition	In key areas there are tough competition from local enterprises – and from Asia and firms from USA, Germany and UK.

Hong Kong

Implementation of GPA	Hong Kong managed to get membership of GPA in place just before accession to China, and the implementation seems to be perfect.
Openness and transparency	Hong Kong is dependent on import in many areas and is alone for that reason traditionally open for international relations. Tendering procedures seems transparent and open.
Review Body	There are many review bodies in Hong Kong, but the system is transparent and is under revision and streamlining.
Size of the market	Hong Kong is a small country but highly developed. The market is seen from a Danish perspective considerable.
Importance for neighbouring markets	Hong Kong is increasingly an important access point to China, and even if China has not (yet) been a part of GPA, references from Hong Kong could be of importance at the Chinese market.
Language and culture barriers	Hong Kong is bilingual and tenders are often performed in English.
Market expectations	Hong Kong has managed the Asian crisis reasonably well, and a reasonable good economic development is forecasted. This is also true for public procurement markets – in particular in the field of environment and health.
Tradition for Danish export	Hong Kong is traditionally a strong post for Denmark in Asia, and many Danish enterprises are established there or have close relations with partners
The competition	Hong Kong is a very competitive market. For procurements competition must be expected from USA, UK, Germany and China among others.

Singapore

Implementation of GPA	No particular problems in the implementation have been identified. Implementation is not characterised by exemptions.
Openness and transparency	Singapore is an open economy, which needs trade. There is openness concerning tenders, but Danish companies that know the market, complaints about less transparency and fairness in praxis.
Review Body	Singapore has a clearly structured review system, which complies with GPA.
Size of the market	Singapore is a small country with a modest economy. On the other hand much is procured abroad and the economic situation is very good in general
Importance for neighbouring markets	Singapore is not a particularly good point of departure for working in neighbouring states, with whom Singapore has limited connections. And the neighbours are hit hard by the economic crisis.
Language and culture barriers	The English language is so widely used that there should be no problems for Danish business people. The culture is a mix of Western orientation and Chinese tradition.
Market expectations	The modest procurement market is not expected to grow dramatically, but there may be interesting opportunities in niche markets such as information technology and environment.
Tradition for Danish export	Good trade relations exist between Singapore and Denmark..
The competition	Competition is generally high and should be expected from international and local firms, including Chinese.

Korea

Implementation of GPA	Korea has implemented GPA rather late (1. January 1997) and has numerous exemptions.
Openness and transparency	The systems do not leave an impression of a wish for openness and transparency for foreigners. Information is often only in Korean.
Review Body	There has been established a Review Body, but complaints can also go to court.
Size of the market	The Korean market is of medium size, but economic growth is moderate for the moment. It is expected to pick up again but not in the record pace previously seen.
Importance for neighbouring markets	Korea does not hold a very important position for neighbouring markets.
Language and culture barriers	Both types of barriers seems considerable for Danish companies
Market expectations	Korea was hit hard by the economic crisis and is only slowly gathering pace. The need for financing unemployment and to bring down a large government deficit puts a brake on the development of the procurement market.
Tradition for Danish export	Korea does not play a major role for Danish export.
The competition	Competition is largely determined by local companies – not least the huge conglomerates.

Switzerland

Implementation of GPA	Switzerland has implemented GPA with some reservations, but has in 1999 made an agreement with the EU on public procurement.
Openness and transparency	The Swiss procurement system looks closed and non-transparent seen from foreign countries.
Review Body	There is a clear system for complaints in place.
Size of the market	The Swiss procurement market is a bit smaller than the Danish, and the few statistics available indicates a modest market.
Importance for neighbouring markets	As Switzerland is not a member of the EU it does not seem to be a strong station for working in neighbouring countries. It will probably be more relevant to work in Switzerland from neighbouring countries.
Language and culture barriers	There are many languages in Switzerland, and none of them are normally a problem for Danes. Exporters should be prepared to work in the relevant languages in the different parts of the country.
Market expectations	The Swiss are no big spenders – for procurement either. Attempts to stabilise the economy do not indicate an increase in public spending. The agreement with EU will probably open the markets more in the future.
Tradition for Danish export	Switzerland is not one of the largest Danish trading partners, but some Danish companies are established in Switzerland for commercial and tax reasons.
The competition	There is tough competition on the Swiss market; in particular from the neighbours that enjoys the same languages.

Canada

Implementation of GPA	GPA is implemented on federal level, but not in provinces.
Openness and transparency	The use of electronic advertising of tenders and increasing use of seminars for bidders seems to indicate more openness, but there is also an underlying feeling of protectionism – mostly at the provincial level.
Review Body	The complaint structure is in accordance with GPA.
Size of the market	The Canadian economy is the seventh largest in the world. But the fact that GPA is only implemented on federal level limits the market.
Importance for neighbouring markets	Few would possibly locate in Canada to work in the US. The opposite is more likely to happen.
Language and culture barriers	There are not many formal barriers and the French and English language does not pose major problems. The underlying protectionism can be a more serious problem, in particular at province level
Market expectations	Problems with government finances tend to limit expectations.
Tradition for Danish export	There is relatively limited tradition for Canadian-Danish trade.
The competition	Competition is strong from the US and Mexico (NAFTA), but indeed also from local companies.

Poland

Implementation of GPA	Poland has not implemented GPA (yet), but is an observer.
Openness and transparency	The Polish system is increasingly open and transparent. Open tenders are widely used.
Review Body	A Review Body exists and it is widely used.
Size of the market	The market is developing at a high rate.
Importance for neighbouring markets	Poland could be an important post for trading into other Eastern countries, but seems to develop to become an interesting market in itself.
Language and culture barriers	Remains of the communist system are still around but Poland is pursuing transition very hard. Danish enterprises have shown that they can manage the Polish market.
Market expectations	The market is expected to grow and to develop to be an important market, increasingly open for EU companies.
Tradition for Danish export	Since the transition period started many Danish companies have successfully traded with Poland.
The competition	Competition is today strongest from local companies. Establishment in Poland or a Polish partner is probably the best way to success in the market.

WTO, GATS og bibliotekene

Av FRODE BAKKEN, hovedbibliotekar ved Høgskolen i Telemark

De færreste har gått glipp av at det pågår internasjonale forhandlinger om tjenester under WTO-paraplyen (World trade organization - <http://www.wto.org/>). Det er framforhandlet en egen rammeavtale for tjenester, «GATS - General agreement on trade in services», som også Norge har undertegnet <http://www.wto.org/wto/services/gatsintr.htm>.

Det Norske Utenriksdepartementet har en bred presentasjon av WTO og aktuelle spørsmål på: «Informasjon fra norsk UD»: <http://odin.dep.no/ud/norsk/handelspolitikk/032091-990314/index-dok000-b-n-a.html>.

Forhandlingene har skapt betydelig engasjement også på grasrotplan, og problemstillinger og aktivitet har bidratt til mer debatt og mer åpenhet om hele prosessen. Avtalene under WTO har som mål å fremme liberalisering av handel mellom landene og etablere mekanismer for løsning av tvister mellom parter. Avtalene dekker både varer, tjenester, investeringer og vern av åndsverk. For øyeblikket er WTO inne i en ny hektisk runde med forhandlinger om tjenester som skal gå fram til 2004.

WTO, GATS , bibliotek og bindingslister

WTO-systemet og også GATS bygger på at det enkelte medlemsland på fritt grunnlag beslutter om landet ønsker å forplikte seg til de enkelte mekanismene - såkalte bindingslister.

EU vedlikeholder en oversikt over disse bindingslistene ordnet etter tjenestesektorer <http://gats-info.eu.int/gats-info/gatscomm.pl?MENU=fff> og etter land: <http://gats-info.eu.int/gats-info/gatscomm.pl?MENU=eee>. Her kan en lett få oversikt over f.eks. Norges forpliktelser - eller bindingsliste: <http://gats-info.eu.int/gats-info/nwtosvc.pl?COUNTRY=Norway>.

WTO presiserer at det er opp til det enkelte land å forplikte seg - og dette er korrekt. Til nå har 13 land ført opp bl.a. bibliotek på sine bindingslister som del av hovedsektoren «Recreational, Cultural and Sporting Services» <http://gats-info.eu.int/gats-info/swtosvc.pl?&SECCODE=10.C>. Her finner man bl.a. Japan, Singapore og USA, men oppsiktsvekkende nok også Island. Hovedsektoren «Recreational, Cultural and Sporting Services» er imidlertid et for snevert perspektiv. Bibliotekdrift som sorterer under «Recreational, Cultural and Sporting Services» er bare en del av den samlede bibliotekdrift i et nasjonalt biblioteksystem («det sømløse bibliotek») og annen bibliotekdrift har en helt annen forankring i sektorsystemet innen GATS, hvor særlig utdanning vil spille en dominerende rolle. Videre vil det også eksistere bibliotek tjenester som ikke i utgangspunktet er sektor-spesifikke (eks. online-tjenester) men som har utgangspunkt i et bibliotek som kan plasseres inn i en GATS-sektor. Et åpenbart eksempel vil kunne være web-baserte referansetjenester som klart kan komme i konflikt med kommersielle «On-line Information and Data Base Retrieval»-aktører under sektoren «Communication Services» eller andre grenseområder.

Det er mange aspekter ved de mulige trusler for bibliotekene fra de nye handelspolitiske regimene som nå utvikles i stor fart - eller alt for sakte etter WTOs syn. I det øyeblikk et land har ført opp en sektor eller en delsektor på sin bindingsliste i WTO-systemet trer WTOs regelverk under GATS i verk. Det er ulike mekanismer som trår i kraft når det gjelder forpliktelser knyttet til «Limitations on Market Access», «Limitations on National Treatment» og «Additional Commitments». I tillegg kan det ha betydning om tjenesten distribueres som «Cross-border supply», «Consumption Abroad», «Commercial Presence» eller «Presence of Natural Persons». Graden av forpliktelser kan også virke inn. Dette er beskrevet enkelt her: <http://gats-info.eu.int/gats-info/gatscomm.pl?MENU=hhh>

Det er også et eget unntaksregime som for Norges vedkommende kan sees her: <http://gats-info.eu.int/gats-info/nwtosvc.pl?COUNTRY=Norway&MFN=00>

I den kanadiske bibliotekforeningen - som reiste hele sakskomplekset i kanadisk og internasjonalt

bibliotekmiljø - er et (av flere mulige) scenarier beskrevet slik (opprinnelig formulert i forbindelse med MAI-avtalen - noe justert):

«Consider the following scenario: a foreign «information services» company enters (in this case) Canada and sets up its operation. The company defines its services as similar to those offered by libraries here in Canada. It then demands equal treatment with Canadian libraries under the articles of the GATS. Equal treatment would include government subsidies, and the government would then be faced with the following options in response to this demand:

- 1. subsidize the information services companies to the same degree as libraries*
- 2. -decrease subsidies to libraries, and then extend this decreased level of assistance to the foreign corporations as well*
- 3. -cut funding to libraries altogether and thereby avoid subsidizing every information services company that enters Canada.»*

Fra WTO bestrides ikke at slike mekanismer kan tre i kraft - men det presiseres at det er det enkelte medlemsland som selv tar beslutninger om hvilke forpliktelser og innen hvilke sektorer. Dette har særlig vært en problemstilling i tilknytning til offentlige utførte tjenester og dette er jevnlig presisert fra WTOs side http://www.wto.org/english/news_e/news01_e/observerlet_march01_e.htm og http://www.wto.org/english/tratop_e/serv_e/gats_factfiction_e.htm

Vi er kjent med at noen land inkludert USA - som spiller en avgjørende rolle i WTO-forhandlingene - har ført opp bibliotek på sine bindingslister «Recreational, Cultural and Sporting Services» Den viktigste GATS-arena for bibliotekene blir sannsynligvis bibliotek innen utdanningssektoren, og da særlig i UH-sektoren. Til nå er det helt marginale forpliktelser på utdanningsområdet (21 av totalt 140 medlemsland i høyere utdanning) men det er kjent fra mediene at USA og bl.a. Australia presser systematisk på i forhandlingene for å bringe høyere utdanning inn. Det belyses godt i et oppslag i Times Higher Education Supplement 12. juli 2002

<http://www.dcs.warwick.ac.uk/~skelk/GATS/THES16.html> hvor det heter:

«The European University Association discovered last week that the commission had formally asked the US to open its market to higher education bodies from Europe. The request matches commitments signed by the commission in 1994 to allow such institutions access to Europe.

...

If the eventual level of agreement fails to meet expectations, higher education could be part of a new round of global negotiations after the conclusion of Gats talks in January 2005. The commission's move brings closer the possibility of US-based for-profit organisations competing directly with European universities - and even demanding access to state funding and accreditation. Eric Froment, president of the EUA, warned: «Armed with a Gats agreement, private for-profit ventures might challenge the public funding of existing institutions as unfair competition or ask for public funding themselves.» The EUA is a driving force in the Bologna process of establishing a single European space for higher education and research and is committed to reducing barriers to international cooperation in higher education outside a trade policy regime. In a joint declaration with the American Council on Education and the Association of Canadian Colleges and Universities, the EUA said: «Globalisation and strong encouragement of market forces in higher education may lead to undue stress on competition among universities, thus undermining the Prague communique (of European higher education ministers), which stated that higher education should be considered a public good.»

Hva har så skjedd fra bibliotekenes side?

IFLA

Det var det kanadiske bibliotekmiljøet som reiste problemstillingene i 1997-1998 og siden dette har

saken vært på dagsorden også i IFLA som allerede i 1998 opprettet en arbeidsgruppe under sin «Copyright and other legal matters committee» <http://www.ifla.org/III/clm/wkg/wg-mai.htm>. Det er utarbeidet egne posisjonsdokumenter og WTO har vært tema på flere IFLA-konferanser <http://www.ifla.org/III/clm/copyr.htm#3>

NORGE

Norsk Bibliotekforening opprettet i 2000 en egen arbeidsgruppe som har arbeidet med WTO-spørsmål over noe tid. Arbeidsgruppen har hatt møte med Utenriksdepartementets handelsavdeling og også tatt opp spørsmålene om bibliotekenes rolle i en egen henvendelse til UD - se brev og svar: <http://www.nb.no/cgi-bin/wa?A2=ind0110&L=BIBLIOTEKNORGE&P=R15165> og <http://www.nb.no/cgi-bin/wa?A2=ind0111&L=BIBLIOTEKNORGE&P=R9556>. Det er også gjort henvendelser om saken til UD fra Nasjonalbiblioteket: <http://www.nb.no/cgi-bin/wa?A2=ind0110&L=BIBLIOTEKNORGE&P=R11016> og Norsk Kommuneforbund: <http://www.nb.no/cgi-bin/wa?A2=ind0110&L=BIBLIOTEKNORGE&P=R16816>.

I sitt svar til NBF sier Utenriksdepartementet:

«Utenriksdepartementet takker for brev av 17. oktober d.å. med vedlagt dokument fra den internasjonale bibliotekorganisasjonen IFLA.

Som opplyst på vårt møte 26. mars i år kan WTOs medlemmer selv bestemme hvilke forpliktelser de vil påta seg under forhandlingene, og disse forpliktelsene føres opp i spesielle bindingslister for hvert enkelt land.

Da Norge ble medlem av WTO i 1995 valgte Norge ikke å føre opp bibliotek tjenester i den norske bindingslisten. Bibliotek tjenester er heller ikke omtalt i det norske forhandlingsforslag som er fremmet under de pågående tjenesteforhandlinger.

Som Norsk bibliotekforening nevner hadde 13 land påtatt seg forpliktelser innenfor biblioteksektoren da GATS-forhandlingene ble innledet. Disse forpliktelsene har stått uendret siden GATS trådte i kraft i 1995. Ingen av de nevnte land har tatt opp nye forslag om handel med bibliotek tjenester i de pågående forhandlingene.

De forhandlingsforslag Norge fremlegger utformes etter omfattende konsultasjoner mellom myndighetene, næringslivet, interesseorganisasjoner og frivillige organisasjoner. Utenriksdepartementet ser frem til fortsatt nær kontakt med Norsk bibliotekforening i det videre arbeid med WTO-forhandlingene.»

Det er ikke kjent for meg om Kultur- og kirke departementet, Statens bibliotektilsyn eller Riksbibliotek tjenesten har gjort noen egne henvendelser om dette spørsmålet.

EBLIDA

EBLIDA har opprettet en WTO working group som nå arbeider systematisk med å følge tjenesteforhandlingene i WTO for å bidra til at EBLIDA gjør innspill til Europakommisjonen til fordel for generelle bibliotekbehov og synspunkter <http://www.eblida.org/topics/wto/wto.htm>. EBLIDA vil i disse dager sende en egen henvendelse til Europakommisjonen hvor spørsmålet om tjenesteforhandlingene og bibliotekene tas opp på bred basis. Handelspolitikk vil utvilsomt måtte bli et tema med øket oppmerksomhet i bibliotekmiljøene - i Norge og internasjonalt.
